Using this methodology the base year population as of January 1, 2019 was established to be 44,575 residents inside the corporate limits and 5,041 people residing in the Extraterritorial Jurisdiction (ETJ).

EMPLOYMENT

The base employment data was calculated using ArcGIS *Business Analyst*, which is software that provides location-based market information. Utilizing this tool, the City's Geographic Information Systems (GIS) Division was able to query employment and business information relating to each data collection zone (*i.e. Land Use District*). This information was then broken down into one (1) of the three (3) employment categories (*i.e. Basic, Service, or Retail*). Based on the analysis, the City's corporate limits were shown to have a total employment of 24,083 jobs on January 1, 2019. Of the total employment 2,505 jobs were classified as *Basic*, 12,403 jobs were classified as *Service*, and 9,175 jobs were classified as *Retail*. The Extraterritorial Jurisdiction (ETJ) was shown to have an additional 643 jobs, with 535 jobs being classified as *Service* and 108 jobs being classified as *Retail*. In addition, the GIS Division calculated the total non-residential building square footages (*i.e. improvements*) relating to all of these employment types at ~14,444,596 SF inside the City's corporate boundaries and Extraterritorial Jurisdiction (ETJ), with ~3,209,401 SF being classified as *Basic*, ~5,374,068 SF being classified as *Service*, and ~5,861,127 SF being classified as *Retail*. The total non-residential square footage of land area 139,424,433.67 (or 3,200.74-acres), with 11,967,581.81 SF being classified as *Basic*, 58,451,896.18 SF being classified as *Service*, and 69,004,955.68 SF being classified as *Retail*.

TEN-YEAR GROWTH PROJECTIONS

GROWTH ASSUMPTIONS

In this planning study, growth is characterized in two (2) forms: 1) Population (*i.e. residential land use*), and 2) Employment (*i.e. non-residential land use*). To calculate a reasonable growth rate for population and employment it was necessary for staff to make a series of assumptions on which to base the ten (10) year growth projections. These assumptions are summarized as follows:

- Future growth identified within this study will conform to the *Future Land Use Plan* depicted in the OURHometown Vision 2040 Comprehensive Plan.
- Infrastructure will continue to be development driven, and the City will continue to be able to finance any other necessary improvements needed to accommodate future growth.
- School facilities will continue to be sufficient to accommodate any increases in population.
- Densities will generally conform to the land classifications and *District Strategies* identified within the OURHometown Vision 2040 Comprehensive Plan, and as depicted on the Future Land Use Map.
- The residential and non-residential carrying capacity for the City or its *build out* will occur simultaneously.

The ten (10) year projections for population are based on the growth rate, which was previously discussed and staff's consideration of past development trends. The ten (10) year projections for employment are based on the overall carrying capacity for non-residential development compared to the current non-residential development in the City. *Tables 1 & 2* detail the ten (10) year projections for households, population and employment for the service areas associated with roadway and water/wastewater impact fees.

POPULATION GROWTH RATE ANALYSIS

The City of Rockwall has experienced steady residential population growth (*see Figure 5*) over the last 18-years and -- *with the City being ~48.29% vacant and taking into account the City's current availability of water and wastewater infrastructure* -- staff anticipates that the population growth will continue to be fairly steady. It should be noted, however, that the City has seen a slight decline in the population growth percentage over the last five (5) years. From 2000 to 2018, the population growth percentage was 5.08%, but when looking at the last five (5) years this number drops to 1.79% (*see Table 3*).

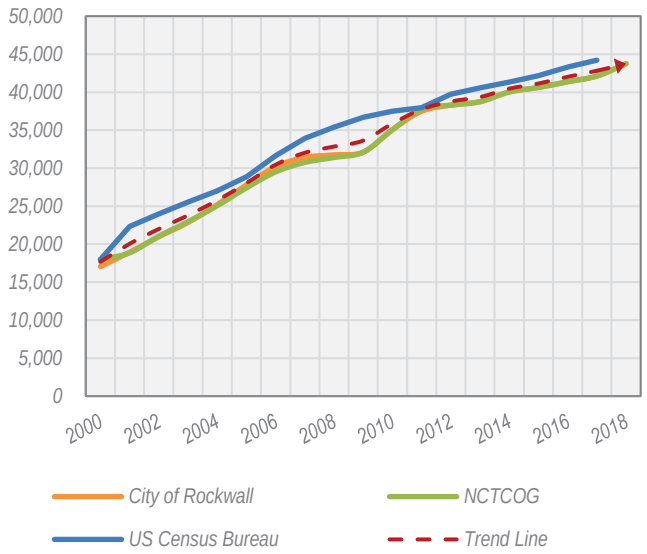

TABLE 1: SUMMARY OF TEN-YEAR GROWTH (ALL ROADWAY SERVICE AREAS)

	2019	2029	Increase
Households	16,690	22,135	24.60%
Population	44,575	59,898	25.58%
Total Employment	24,083	32,366	25.59%
Basic	2,505	3,367	25.60%
Service	12,403	16,669	25.59%
Retail	9,175	12,330	25.59%

TABLE 2: SUMMARY OF TEN-YEAR GROWTH (WATER/WASTE WATER SERVICE AREA)

	2019	2029	Increase
Households	18,390	26,609	30.89%
Population	49,616	73,228	32.24%
Total Employment	25,369	34,065	25.53%
Basic	2,505	3,367	25.60%
Service	13,473	18,082	25.49%
Retail	9,391	12,616	25.56%

FIGURE 5: POPULATION BY AGENCY, 2000-2018

To calculate the ten (10) year population projections, City staff utilized the *Compound Annual Growth Rate (CAGR)* method. CAGR allows for a general assessment of growth when considering periodic increases and decreases in residential

population growths that coincide with changing economic conditions. The formula for CAGR is as follows:

$$CAGR = \left(\frac{x}{y}\right)^{\left(\frac{1}{n}\right)} - 1$$

Where:
CAGR = Compound Annual Growth Rate
x = End Value
y = Beginning Value
n = Number of Years

In 2007, a CAGR of four (4) percent was used to calculate the ten (10) year population projections; however, based on the five (5) year annual growth rate and the number depicted in *Table 3*, staff utilized a more conservative three (3) percent annual growth rate. In assessing the past growth rates, staff used several sources including the North Central Texas Council of Governments (NCTCOG), the U.S. Census Bureau, and the City of Rockwall. Based on a three (3) percent CAGR, the following chart shows the anticipated population growth over the next ten (10) years:

TABLE 4: TEN (10) YEAR POPULATION GROWTH
This table shows the projected ten (10) year population growth at a three (3) percent Compound Annual Growth Rate (CAGR).

Year	Population
2019	44,575
2020	45,907
2021	47,284
2022	48,703
2023	50,164
2024	51,669
2025	53,219
2026	54,815
2027	56,460
2028	58,154
2029	59,898

TABLE 3: CITY OF ROCKWALL GROWTH RATES

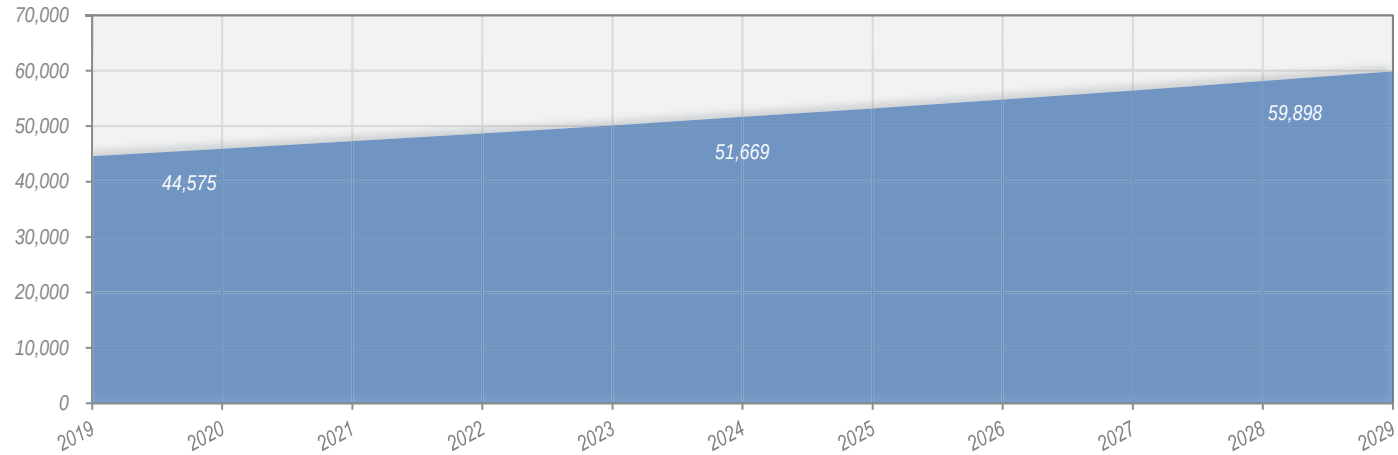
Data Source	Growth Rate
2014 – 2017 US Census	*1.70%*
2010 – 2017 US Census	*2.08%*
2000 – 2017 US Census	*5.13%*
2014 – 2018 Single Family Permits	*1.82%*
2010 – 2018 Single Family Permits	*4.80%*
2000 – 2018 Single Family Permits	*-2.93%*
Future Growth Projection	*3.0%*

PROJECTED POPULATION FOR 2029

Utilizing the three (3) percent Compound Annual Growth Rate (CAGR) established in the previous section, staff projects that the population for the City will be 59,898 in 2029 (*see Table 4 and Figure 6*). This estimate does appear to be consistent with trends that have been observed at the county and regional level (*see Figure 7 for a comparison of the City's population growth versus the County's population growth*). Although, the growth rate has slowed over the last five (5) years this is seen as a temporary trend and not a sign indicative of the City's future growth trend.

In determining this population projection, staff observed how this projection would relate to the City's projected building permits, and the additional population added to the City on an annual basis (*see Table 5*). Taking this into consideration, the estimated average annual building permits anticipated over this time period is approximately 522. This represents a decrease of approximately 121 permits annually from the estimates completed in 2014. This estimate -- *while still likely high in some years due to shifts in market demand* -- is a more conservative estimate than what was used in 2014. It should be noted that this estimate takes into consideration the type of development likely to occur in a given area (*i.e. single-family or multi-family*).

FIGURE 6: TEN (10) YEAR POPULATION GROWTH
This chart shows the projected ten (10) year population growth at a three (3) percent Compound Annual Growth Rate (CAGR).



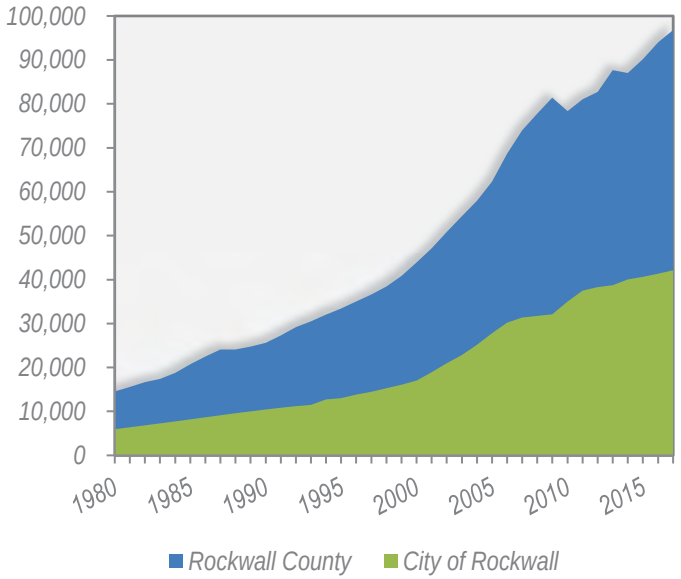


TABLE 5: PROJECTED BUILDING PERMITS

Year	Population	New Residents	New Building Permits
2019	44,575	825	294
2020	45,907	1,332	474
2021	47,284	1,377	490
2022	48,703	1,419	505
2023	50,164	1,461	520
2024	51,669	1,505	536
2025	53,219	1,550	552
2026	54,815	1,597	568
2027	56,460	1,644	585
2028	58,154	1,694	603
2029	59,898	1,745	621
Average Number of Annual Permits:			522

FIGURE 7: CITY POPULATION VS COUNTY POPULATION, 1980-2017

PROJECTED EMPLOYMENT FOR 2029

Employment data for the year 2029 was calculated by taking the information established in the base year analysis -- *which was obtained through the ArcGIS Business Analyst tool* -- and the corresponding ratio of employment to population, and extrapolating this information out to January 1, 2029. These estimates are summarized in Appendix C, *Employment Breakdown by Roadway Service Area*, and Appendix D, *Employment Breakdown by Water/Wastewater Service Area*.

BUILD OUT ANALYSIS

A *Build Out Projection* for a city (also referred to as the city's *Carrying Capacity*) is an estimate of the location and density of all potential development, employment and population that a city can support within its future corporate boundaries.

ESTABLISHING HOUSEHOLDS AND POPULATION AT THE CITY'S BUILD OUT

As part of the newly adopted OURHometown Vision 2040 Comprehensive Plan, City staff calculated the number of households and residents at *Build Out*. In establishing the City's households and population at *Build Out* staff made the following assumptions:

- All vacant or undeveloped land within the City's corporate boundaries will develop with the maximum density permitted for the current zoning per the Unified Development Code (UDC).
- All Agricultural (AG) District property is assumed to be vacant or undeveloped and will develop at the maximum density permitted in accordance to the property's' designation on the Future Land Use Map contained in the OURHometown Vision 2040 Comprehensive Plan.
- All property within the Extraterritorial Jurisdiction (ETJ) is assumed to be vacant and will be developed in conformance with the Future Land Use Map at the maximum density permitted by the OURHometown Vision 2040 Comprehensive Plan.
- The City's ETJ is fixed and will not increase in the future.

Taking these assumptions into consideration, staff utilized Geographical Information Systems (GIS) software to calculate all the undeveloped land within the city's corporate boundaries, including the ETJ. Once calculated the acreages were broken down by land use and multiplied by the maximum density permitted for each of the land uses as established within the Unified Development Code (UDC) and the Comprehensive Plan. These totals were then multiplied by the average people per household [*i.e. 2.81 per the US Census Bureau*] to establish the unadjusted population at *Build Out*. Staff then reviewed the projected densities coupled with current land use patterns, and adjusted the numbers to account for known or anticipated development activity. Based on the final *Build Out* population (*i.e. 149,525*), staff projected the population forward using the previously established three (3) percent Compound Annual Growth Rate (CAGR) [*see the Ten-Year Growth Assumptions section*] until the build out population was reached (*see Table 6*). This established a build out year of 2060. The following formula lays out the methodology used to calculate these numbers:

TABLE 6: PROJECTED POPULATION @ 3% COMPOUND ANNUAL GROWTH (CAGR)

Year	Population	New Residents
2018	43,750	1,630
2019	44,570	820
2020	45,907	1,337
2021	47,284	1,377
2022	48,703	1,419
2023	50,164	1,461
2024	51,669	1,505
2025	53,219	1,550
2026	54,815	1,597
2027	56,460	1,644
2028	58,154	1,694
2029	59,898	1,745
2030	61,695	1,797
2031	63,546	1,851
2032	65,453	1,906
2033	67,416	1,964
2034	69,439	2,022
2035	71,522	2,083
2036	73,667	2,146
2037	75,877	2,210
2038	78,154	2,276
2039	80,498	2,345
2040	82,913	2,415
2041	85,401	2,487
2042	87,963	2,562
2043	90,602	2,639
2044	93,320	2,718
2045	96,119	2,800
2046	99,003	2,884
2047	101,973	2,970
2048	105,032	3,059
2049	108,183	3,151
2050	111,429	3,245
2051	114,771	3,343
2052	118,215	3,443
2053	121,761	3,546
2054	125,414	3,653
2055	129,176	3,762
2056	133,052	3,875
2057	137,043	3,992
2058	141,154	4,111
2059	145,389	4,235
2060	149,751	*BO:* 149,525

$$BO = P + CP + EP$$

$$CP = (\sum[(LU_1 xD_1) \dots (LU_x\, xD_x)]\,) x\ AHS$$

$$EP = (LDR\ x\ 2.5) + (MDR\ x\ 3.5) + (HDR\ x\ 5)$$

Where:

BO = Build Out Population
P = Population as of January 1, 2019
CP = Population of Vacant or Undeveloped Land in the City Limits
EP = Population of Vacant or Undeveloped Land in the ETJ
LU = Vacant Available Land Inside the City Limits for a Land Use
D = Maximum Density Permitted for a Land Use per UDC
AHS = Average Household Size [2.81185 per US Census Bureau]
LDR = Low Density Residential Acreage Available in ETJ
MDR = Medium Density Residential Acreage Available in ETJ
HDR = High Density Residential Acreage Available in ETJ

ESTABLISHING EMPLOYMENT AT THE CITY'S BUILD OUT

To calculate employment at *Build Out*, staff utilized the employment numbers calculated with the base year analysis, and -- *based on the estimated current year population* -- calculated ratios between employment and population for the City and its Extraterritorial Jurisdiction (ETJ). These ratios were then used to extrapolate the number of employees for basic, service and retail sectors for the ten (10) year and build out projections.

SUMMARY

The following is a summary of staff's findings when preparing the *Land Use Assumption Report* in preparation for the update of the Roadway, Water and Wastewater Impact Fees for 2019:

- The average annual growth rate as calculated by staff is three (3) percent. This growth rate was established based on data from the US Census, North Texas Council of Governments (NCTCOG), the City and County of Rockwall. Using this growth rate staff projected the following population numbers:
  - The population of the City of Rockwall as of January 1, 2019 was 44,691. This is expected to increase by 25.39% in the next ten (10) years to an estimated 59,898 by January 1, 2029.
  - The population for the City of Rockwall and its Extraterritorial Jurisdiction (ETJ) as of January 1, 2019 was 49,743. This is expected to increase by 32.07% in the next ten (10) years to an estimated 73,228 by January 1, 2029.
- The estimated employment for the City of Rockwall as of January 1, 2019 was 24,083 jobs, with another 1,286 jobs existing within its Extraterritorial Jurisdiction (ETJ). Staff estimates this number to climb to 32,366 jobs within the current city limits, and another 1,699 jobs within the current Extraterritorial Jurisdiction (ETJ) by January 1, 2029.
- Staff has established that there are currently 8,204.17 undeveloped acres of land within the city limits. This represents ~48.29% of the current land in the City. Additionally, the City of Rockwall has access to another 14,083.24-acres of land within its current Extraterritorial Jurisdiction (ETJ). Approximately 75.11% (10,577.67-acres) of the land within this area is vacant.
- According to staff's estimate, the City of Rockwall is expected to be built out in the year 2060, with a total population of 149,525.

Chapter 1: Introduction

Shrinking funds available for transportation improvements on city thoroughfares limit many cities from upgrading infrastructure to meet increasing travel demands. To meet the needs of new growth, many cities collect "impact fees" from new development to help fund transportation improvements necessitated by such development. What is unique about impact fees is that they often finance roadway improvements that are considered “offsite” to new development. However, when considering the traffic implications created by new development on the roadway system, impact fees provide a means by which infrastructure may keep pace with new development.

Texas initially authorized the use of impact fees with the 1987 legislature. Now codified in Chapter 395 of the Texas Local Government Codes, the legislation authorizes cities to collect fees from new developments to finance new construction or expansion of capital improvements such as water treatment and distribution facilities, storm and wastewater facilities, and transportation facilities. The law stipulates that all fees collected from new development must not exceed the maximum amount calculated by the methodology described therein.

The law also mandates that impact fee systems be updated periodically to ensure that an appropriate cost per service unit is calculated commensurate with an impact fee capital improvements program. The law also mandates that as new transportation improvements are completed, actual costs are inserted into the cost per service unit calculation to reflect a more accurate reading of service area costs as opposed to estimated costs that were established at the onset of the impact fee system. Finally, new capital improvement projects may be added to the program, subject to meeting eligibility requirements.

In September 2001, Chapter 395 was amended which revised called for several technical and administrative changes of impact fee systems including:

- Expansion of the permissible service area structure for roadway facilities from three to six miles;
- A credit for the portion of ad valorem tax revenues generated by improvements over the program period, or the credit equal to 50% of the total projected cost of implementing the capital improvements plan;
- A city's share of costs on the federal or Texas highway system, including matching funds and costs related to utility line relocation, the establishment of curbs and gutters, sidewalks, drainage appurtenances, and rights-of-way;
- Increase in the time period of update of impact fee land use assumptions and capital improvements plan from a three to five-year period;
- Changes in compliance requirements as they relate to annual reporting; and
- Consolidation of the land use assumptions and capital improvements plan hearings.

The implementation and administration of roadway impact fee systems offers several advantages to both a city and new development among which include: 1) a systematic, structured approach to assessment of fees, 2) a clear, equitable distribution of costs associated with the impact of new development, 3) the ability to pool funds for project initiation within a service area, 4) assurance that fees collected will be spent in the area where new development is occurring, 5) up-front knowledge of fees to be imposed, 6)

credits for developer participation, and 7) ability for developers to demonstrate that, pursuant to city guidelines, specific unit equivalencies (service unit generation) may be different from those presented in the land use equivalency table.

Recognizing the need to provide adequate facilities and desiring to have equitable funding of transportation improvements, the City of Rockwall embarked in the development of a roadway impact fee system in January 2008 and is updating the program to comply with legislative requirements identified in Chapter 395. The program was updated in 2013. This update amends the roadway capital improvements program based on updated land use assumptions as well as, input by the designated impact fee Capital Improvements Advisory Committee. To assist with this study, the City of Rockwall retained Freese and Nichols, Inc. to update the roadway impact fee system.

Study Methodology

To update the roadway impact fee for the City of Rockwall, a series of work tasks were undertaken and are described below:

1. Meetings were held with the City of Rockwall Staff and the Capital Improvement Advisory Committee to discuss the approach and roadway methodology to be used in the study update.

2. Impact fee service areas were reviewed and amended for any city annexations. Roadway service areas are contained to the current city limits.

3. The vehicle-mile of travel (VMT) during the PM peak hour was retained as the unit of measure for the roadway impact fee system.

4. A roadway conditions inventory was conducted on Rockwall thoroughfares for lane geometries, roadway classifications and segment lengths. New arterial and/or collector streets not previously assessed were added to the program database.

5. The existing roadway network was evaluated based on traffic volume count data collected May 2019, to determine roadway capacity, current utilization, and if any capacity deficiencies exist within each impact fee service area.

6. Projected 10-year growth, in terms of vehicle-miles of demand, was calculated for the service areas based on updated land use assumptions (projections of population and employment growth) prepared by Rockwall City Staff in June 2019 and supplemented with the updated land use equivalency table. The Land Use Assumptions for Impact Fees report was reviewed and approved by the Capital Improvements Advisory Committee (CIAC) prior to development of VMT growth projections and capital improvements plan (CIP) update.

7. The existing impact fee CIP was evaluated with updated traffic count data to ensure that excess capacity remained within each impact fee project for retention in the system. The analysis of the existing impact fee CIP revealed excess capacity and therefore could remain in the impact fee program.

8. A roadway impact fee CIP was reviewed and amended relative to projected growth from the updated land use assumptions, analysis of existing system deficiencies, likelihood of project initiation over the short-term, the Rockwall Comprehensive Plan, and input by the CIAC and City Staff. The CIP was amended for John King Boulevard to include portions of the roadway that were previously out of the city and the addition of several new projects to the program.

9. Roadway costs associated with construction, engineering, right-of-way, and project financing for recoupment projects were provided by the City. Cost estimates for new projects were prepared by Freese and Nichols. Costs for study updates are eligible for recovery and were included in the total project cost. Roadway cost data was compiled and distributed by service area.

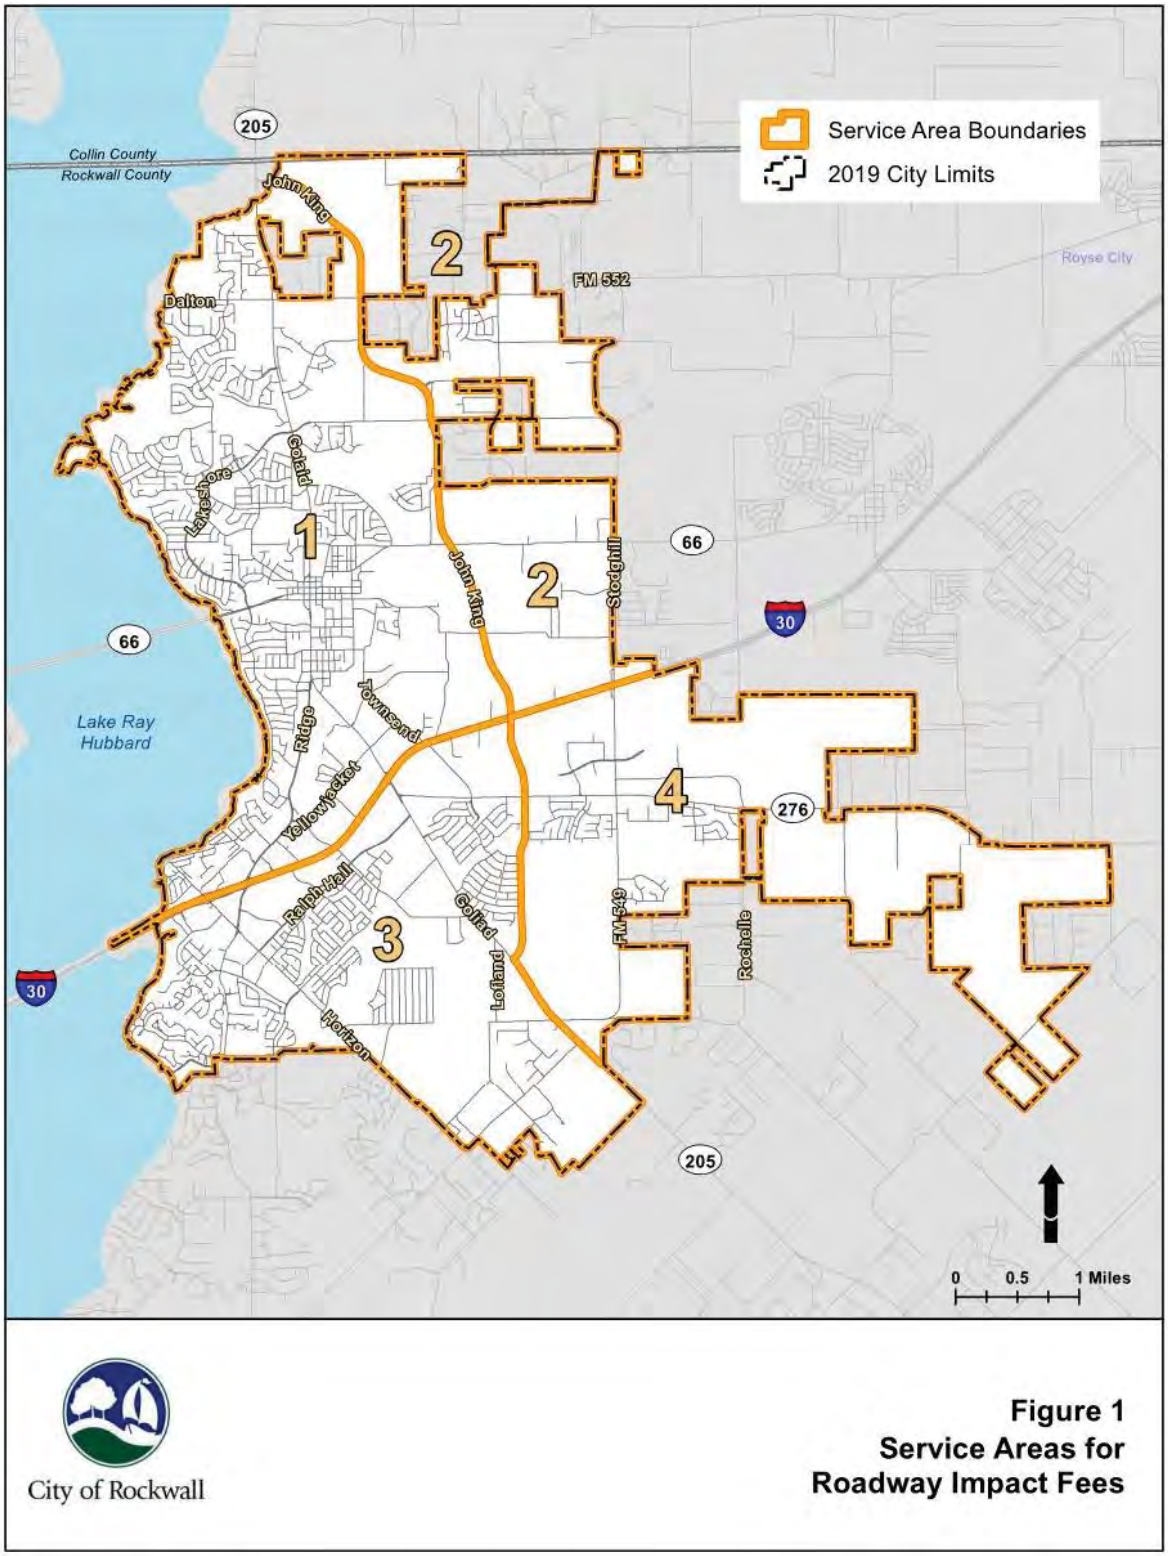
10. The cost of capacity supplied, cost attributable to new development and the maximum cost per service unit was calculated for each service area. A credit of 50% was applied to the overall cost of the capital improvements program for use in the calculation of the cost per service unit.

11. This report was prepared to document the procedures, findings, and conclusions of the study.

Organization of Report

This report describes the background information, analysis, and findings of the study in six parts, with a chapter devoted to each:

- Roadway Impact Fee Service Areas (Chapter 2)
- Roadway Impact Fee Service Units (Chapter 3)
- Existing Conditions Analysis (Chapter 4)
- Projected Conditions Analysis (Chapter 5)
- Calculation of Impact Fees (Chapter 6)
- Conclusion (Chapter 7)



Chapter 2: Roadway Impact Fee Service Areas

Chapter 395 requires that service areas be defined for impact fees to ensure that facility improvements are in proximity to the area that is generating the need. Legislation mandates that roadway service areas be limited to a six-mile maximum and must be located within the current city limits. Roadway service areas are different from other impact fee service areas, which can include the city limits and Extra-Territorial Jurisdiction (ETJ). This is primarily because roadway systems are "open" to both local and regional use as opposed to a defined limit of service that is provided with water and wastewater systems. The result is that new development can only be assessed an impact fee based on the cost of necessary capital improvements within that service area.

The service area structure was developed using the criteria defined in Chapter 395 as it relates to conformance with city limits and the six-mile boundary limits. Other considerations included use of physical or natural features, potential roadway projects and their relation to undeveloped areas of the community, and the planning areas used in long-range plan efforts (for consideration of service area expansion due to possible annexation).

Four service areas were initially developed for the program in 2007 and have been retained in each of the program updates and are generally delineated by John King Boulevard and IH-30. Changes to the service area structure include city annexations on the northern and southern sector of the city. The service area structure for Rockwall is illustrated in **Figure 1**.

Figure 1: Service Areas for Roadway Impact Fees

Chapter 3: Roadway Impact Fee Service Units

An important aspect of the impact fee system is the determination of the proper service unit to be used to calculate and assess impact fees for new developments. As defined in Chapter 395, "Service unit means a standardized measure of consumption, use, generation, or discharge attributable to an individual unit of development in accordance with generally accepted engineering or planning standards for a particular category of capital improvements or facility expansions."

To determine the roadway impact fee for a development, the service unit must accurately identify the impact that the development will have on the transportation system serving the development. This impact is a combination of the number of new trips generated by the development, the peaking characteristics of the land-use(s) within the development, and the length of each new trip on the transportation system.

The correct service unit must also reflect the supply, which is provided by the roadway system, and the demand placed on the system during the time in which peak, or design, conditions are present on the system. Transportation facilities are designed and constructed to accommodate volumes expected to occur during the peak hours (design hours). These volumes typically occur during the morning (AM) and evening (PM) rush hours as motorists travel to and from work.

The vehicle-mile was retained as the service unit for calculating and assessing transportation impact fees in Rockwall. The vehicle-mile as a service unit establishes a way to relate the intensity of land development to the demand on the system with published trip generation data. It also recognizes state legislation requirements with regards to trip length.

The PM peak hour was retained as the time period for assessing impacts because the greatest demand for roadway capacity occurs during this hour. Roadways are sized to meet this demand, and roadway capacity can more easily be defined on an hourly basis. Traffic volume data collected in May 2019 was used as the basis for the system update.

Service Units

Service units create a link between supply (roadway projects) and demand (development). Both can be expressed as a combination of the number of vehicles traveling during the peak hour and the distance traveled by these vehicles in miles.

Service Unit Supply

For roadway capital projects improvement, the number of service units provided during the peak hour is simply the product of the capacity of the roadway in one hour and the length of the project. For example:

> Given a four-lane divided roadway project with a 600 vehicle per hour per lane capacity and a length of two miles, the number of service units provided is:
>
> *600 vehicles per hour per lane x 4 lanes x 2 miles = 4,800 vehicle-miles*

Service Unit Demand

The demand placed on the system can be expressed in a similar manner. For example, a development generating 100 vehicle trips in the PM peak hour with an average trip length of two miles would generate:

100 vehicle-trips x 2 miles/trip = 200 vehicle-miles

Likewise, the existing demand placed on the roadway network is calculated in the same manner with a known traffic volume (peak hour roadway tube counts) on a street and a given segment length.

Service Units for New Development

An important objective in the development of the impact fee system is the development of a specific service unit equivalency for individual developments. The vehicle-miles generated by a new development are a function of the trip generation and average trip length characteristics of that development. The following describes the process used to develop the vehicle-equivalency table, which relates land use types and sizes to the resulting vehicle-miles of demand created by that development.

Travel characteristics were reviewed and deemed to be similar in nature to the previous system update, and therefore no changes were made to the resultant land use equivalency table.

Trip Generation

Trip generation information for the PM peak hour was based on data published in the Tenth Edition of *Trip Generation* by the Institute of Transportation Engineers (ITE). *Trip Generation* is a reference publication that contains travel characteristics of over 160 land uses across the nation and is based on empirical data gathered from over 4,600 studies that were reported to the Institute by public agencies, developers and consulting firms. Data contained in this publication is generally accepted for use in studies by transportation engineers throughout the nation. Data not available was drawn from other published information. Rates were established for specific land use types within the broader categories of residential, office, commercial, industrial and institutional land uses. Within each of the land use categories, a rate was also established for any land uses not specifically identified.

Adjustments

The actual "traffic impact" of a specific site for impact fee purposes is based on the amount of traffic added to the street system as a result of new development. To accurately estimate new trips generated, adjustments must be made to trip generation rates and equations to account for pass-by and diverted trips. The added traffic is adjusted so that each development is assigned only for a portion of trips associated with a specific development and thus reducing the possibility of over-counting by counting only primary trips generated. Trip generation rates were reduced by percentages presented in **Table 1** to isolate the primary trip purpose.

Pass-by trips are those trips that are already on a route for a different purpose and simply stop at a development on that route. For example, a stop at a convenience store on the way home from the office is a pass-by trip for the convenience store. A pass-by trip does not create an additional burden on the street system and therefore should not be counted in the assessment of impact fees of a convenience store.

A diverted trip is a similar situation, except that a diversion is made from the regular route to make an interim stop. For example, a trip from work to home using Ridge Road (from IH-30) would be a diverted trip if the travel path were changed Yellow Jacket and Goliad for the purpose of stopping at a retail site. On a system-wide basis, this trip places a slightly additional burden on the street system but in many cases, this burden is minimal.

Table 1 contains the documented estimates of trip rate adjustments used in determining the appropriate rate to use in the impact fee calculation process. Adjustments were based on studies documented in the ITE trip generation manual.

The resulting recommended trip rates are illustrated as part of Table 3 Land Use/Vehicle Mile Equivalency Table illustrated later in this chapter. Rates were developed in lieu of equations to simplify the assessment of impact fees by the City and likewise, the estimation of impact fees by persons who may be required to pay an impact fee in conjunction with a development project.

A local study may also be conducted to confirm rates in *Trip Generation* or change rates to reflect local conditions. In such cases, a minimum of three sites should be counted. Selected sites should be isolated in nature with driveways that specifically serve the development and not other land uses. The results should be plotted on the scatter diagram of the selected land use contained in *Trip Generation* for comparison purposes. It is recommended that no change be approved unless the results show a variation of at least fifteen percent across the range of sample sizes surveyed. *Trip Generation* was used as the primary source of information for this study.

Trip Length

Trip lengths (in miles) are used in conjunction with site trip generation to estimate vehicle-miles of travel. Trip length data was based on information generated in the 1995 North Central Texas Council of Governments (NCTCOG) Workplace Survey and the National Workplace Survey. These travel characteristics were applied to Rockwall to determine average trips lengths for common land use types.

Table 2 summarizes the derived average trip lengths for major land use categories. These trip lengths represent the average distance that a vehicle will travel between an origin and destination of which either the origin or destination contains the land-use category identified below. Data compiled by the Workplace Survey represents the best available information on trip lengths for this area.

Adjustments

The assessment of an individual development's impact fee is based on the premise that each vehicle-trip has an origin and a destination and that the development end should pay for one-half of the cost necessary to complete each trip. Thus, the development is charged only for a portion of the vehicle-trip associated with that development.

To prevent double charging, and to fairly attribute the demand placed on the system to each trip end location, the trip length was adjusted to remove travel on the federal roadway system and then divided by two to reflect half of the vehicle trip to and from the development. Data from the NCTCOG travel forecast model was used to compare vehicle-miles of travel (VMT) by roadway functional class. Data revealed 43% of travel to use the federal system and thus the average trip length was reduced by this percentage to reflect localized travel on city streets (reflected in column 2). The average trip length, localized trip length, and adjustment for one-half trip length are illustrated in column 3 of Table 2. Where specific land uses were considered to exhibit different trip length characteristics than those identified in Table 3, engineering judgment was used to estimate the average trip length. Finally, as the service area structure was based on a six-mile boundary, those land uses that exhibited trip lengths greater than six miles were limited to this threshold.

Service Unit Equivalency Table

The result of combining the trip generation and trip length information is an equivalency table which establishes the service unit rate for various land uses. These service unit rates are based on an appropriate development unit for each land use. For example, a dwelling unit is the basis for residential uses, while 1,000 gross square feet of floor area is the basis for office, commercial, and retail uses. Other less common land uses are based on appropriate independent variables.

Separate rates have been established for specific land uses within the broader categories of residential, commercial, industrial and institutional to reflect the differences between land uses within the categories. However, even with these specific land use types, information is not available for every conceivable land use, so limitations do exist.

The updated equivalency table is illustrated in **Table 3**. Table 3 is reflective of adjusted trip rates (detailed in Table 1) and trip lengths (Table 2).

GLA = Gross Leasable Area

Chapter 4: Existing Conditions Analysis

Chapter 395 identifies specific requirements necessary in the capital improvements plan for impact fees. The existing conditions, including defining the existing roadway system, and analysis of the total capacity, the level of current usage, and commitments for usage of the existing roadway, are required as part of the capital improvements plan. This chapter discusses the existing conditions.

Existing Conditions

An inventory of the collector and arterial roadway facilities within the city limits was conducted to determine existing conditions throughout Rockwall. This analysis determines the capacity provided by the existing roadway system, the demand currently placed on the system, and the potential existence of deficiencies on the system. Updated data for the inventory was obtained from traffic volume counts conducted by the City and field reconnaissance of current roadway sections.

The roadways were divided into segments based on volume changes, major intersections, service area boundaries, and capacity changes. For each roadway segment, the length, number of lanes, cross-section, and PM peak hour volume data were obtained. Lane capacities were assigned to each segment based on functional street classification, associated roadway lane capacities and the present number of lanes. Lane capacities used in the analysis are shown in **Table 4.**

Table 4: Roadway Facility Vehicle-Mile Lane Capacities

Roadway Facility	Designation	Hourly Vehicle-Mile Capacity per Lane Mile of Roadway Facility
Divided Arterial	DA	600
Divided Collector	DC	500
Undivided Arterial	UA	575
Undivided Collector	UC	475
Special Arterial (with two-way left turn lane)	SA	450

Roadway hourly volume capacities are based on information reflecting Level-of-Service “C” operation, as identified in the transportation element of the Rockwall Comprehensive Plan.

Existing Volumes

Existing directional PM peak hour volumes were obtained from automated traffic counts conducted in May 2019 by the City. Automated traffic counts at 25 separate locations were collected on major roadways (as identified in the Thoroughfare Plan as arterial or collector status) throughout Rockwall. To minimize the total number of counts, data was collected at locations where traffic volumes would typify link volumes on the major segments within the immediate area. For segments not counted, existing volumes were used, or estimates were developed based on data from adjoining roadway counts.

Data was compiled for roadway segments throughout the city and entered into the database for use in calculations. A summary of volumes by roadway segment is included in **Appendix D** as part of the existing capital improvements database.

Vehicle-Miles of Existing Capacity Supply

An analysis of the total capacity for each service area was performed. For each roadway segment, the existing vehicle-miles of capacity supplied were calculated using the following equation:

Vehicle-Miles of Capacity = Link capacity per peak hour per lane x Number of lanes x Length of segment (miles)

A summary of the current capacity available on the roadway system is shown in **Table 5**. It is important to note that the roadway capacity depicted in Table 5 is system-wide for most major roadways and not restricted to those roadways proposed in the impact fee capital improvements plan. Directional calculations of capacity were performed separately. For a detailed listing of vehicle-miles of capacity by roadway segment, refer to Appendix D.

Vehicle-Miles of Existing Demand

The level of current usage in terms of vehicle-miles was calculated for each roadway segment. The vehicle-miles of existing demand were calculated by the following equation:

Vehicle-Miles of Demand = PM peak hour volume x Length of segment (miles)

Table 5 also lists total vehicle-miles of demand. Appendix D includes a detailed listing of vehicle-miles of demand by directional roadway segment.

Vehicle-Miles of Existing Excess Capacity and Deficiencies

For each roadway segment, the existing vehicle-miles of excess capacity and/or deficiencies were calculated. Each direction was evaluated to determine if vehicle demands exceeded the available capacity. If demand exceeded capacity in one or both directions, the deficiency is deducted from the supply associated with the impact fee capital improvement plan. A summary of peak hour excess capacity and deficiencies are shown in **Table 6**. A detailed listing of the existing excess capacity and deficiencies by roadway segment is also located in Appendix D.

Table 5: Peak Hour Vehicle-Miles of Existing Capacity and Demand

Service Area	Capacity (Veh-Mile)	Demand (Veh-Mile)
1	32,508	18,560
2	10,799	4,944
3	21,972	16,417
4	9,674	6,816
Total	74,952	46,738

Table 6: Peak Hour Vehicle-Miles of Excess Capacity and Deficiencies

Service Area	Excess Capacity (Veh-Mile)	Deficiencies (Veh-Mile)
1	15,085	1,137
2	5,854	0
3	6,480	925
4	3,666	808
Total	31,085	2,871

Chapter 5: Projected Conditions Analysis

Chapter 395 requires a description of all capital improvements or facility expansions and their costs necessitated by and attributable to new development within the service area. This chapter describes the projected growth, vehicle-miles of new demand, capital improvements program, vehicle-miles of new capacity supplied, and costs of the roadway improvements.

Projected Growth

The projected growth for each transportation service area is represented by the increase in the number of new vehicle-miles generated over the 10-year planning period. The basis for the calculation of new demand is the population and employment projections that were prepared as part of a technical report entitled Land Use Assumptions for Roadway Impact Fees by the Rockwall Planning Department in June 2019. Estimates of population and employment were prepared for the years 2019 and 2029.

Population data was provided in terms of the number of dwelling units, households and persons. Employment data is aggregated into three sectors of employees: basic, service and retail. These employment sectors serve as the typical components used in the traffic forecast modeling process. The employment grouping also correlate with the North American Industrial Classification (NAIC) system and include: basic employment (NAIC 210000-422999) generally encompasses the industrial and manufacturing uses; service employment (NAIC 520000-928199) encompasses government, office and professional uses; and retail employment (NAIC 440000-454390) generally includes commercial and retail use.

Projected Vehicle-Miles of New Demand

Projected vehicle-miles of demand were calculated based on the growth expected to occur during the 10-year planning period and the service unit generation for each of the population and employment data components (basic, service and retail). Separate calculations were performed for each data component and were then aggregated for the service area. Vehicle-miles of demand for population growth were based on dwelling units, and vehicle-miles of demand for employment were based on the number of employees and estimates of square footage per employee.

Land Use Equivalency for 10-Year Demand Estimate

Information extracted from the NCTCOG regional travel demand model, used for development of the Mobility 2040, provides information on average trip lengths for the residential and the three types of land uses. These are : 3.12 vehicle-miles per dwelling unit for residential, 1.77 vehicle-miles per thousand square feet for Basic and Retail employment, and 3.92 vehicle-miles per thousand square feet for Service employment.

Table 7 lists the projected vehicle-miles of demand over the 10-year planning period for Rockwall. **Appendix C** contains the projected demand calculation worksheet.

Table 7: Vehicle-Miles of New Demand

Service Area	Projected 10-Year Growth (Vehicle-Miles)
1	13,731

3	13,001
4	2,814
Total	33,222

Capital Improvements Program

Evaluation of Current Impact Fee CIP

At the outset of the update process, capacity of the CIP was evaluated to ensure that excess capacity remained in previously approved impact fee projects. Chapter 395 mandates that only CIP projects with excess capacity are eligible for consideration. The initial impact fee program contained only one project, John King Boulevard, which extended from the northern city limit to Goliad Street (SH205) just north of FM549. Traffic volume count data collected at several locations within this corridor was used to determine if excess capacity remains on this project. The analysis revealed all segments of John King Boulevard to contain excess capacity and therefore can be retained in the program.

New Impact Fee CIP – Recoupment & Future Projects

Recoupment Projects:

John King Boulevard was the lone project identified for the initial impact fee program in 2008 and 2013 update. At the time the impact fee system was initiated, not all portions of this roadway in the north were within the city limits. The segment between FM552 and SH205 was within the county and not eligible for impact fee consideration. With annexations in 2013, additional portions of the facility were included in the program.

Three of the added projects were recently implemented and are considered recoupment. Traffic counts were also conducted on these three to assess whether excess capacity remains in these projects.

Future Projects:

Two new CIP projects are future projects planned for implementation within the next 10 years. Costs estimates for new project segments were prepared by Freese and Nichols.

Actual costs for project recoupment were provided by City Staff. **Figure 2** illustrates the location of this capital improvement in relation to the city and associated service areas. Project costs were broken into general categories of construction, engineering, right-of-way and finance (debt service). The breakout of costs among the various service areas are listed in **Table 8**. The cost of the impact fee program is $145.9 million. When considering the state mandated credit (50%), the cost eligible for impact fee consideration totals $72.9 million. The impact fee CIP also includes the cost of two five-year updates estimated at $40,000 each.

N- New Impact Fee Project

R- Impact Fee Recoupment Project

Projected Vehicle-Miles Capacity Available for New Growth

The vehicle-miles of new capacity supply were calculated similar to the vehicle-miles of existing capacity supplied. The equation used was:

Vehicle-Miles of New Capacity Supplied = Link capacity per peak hour per lane
x Num. of lanes within Service Area
x Length of segment (miles)

Vehicle-miles of new supply provided by the CIP are listed in **Table 9**. While the project has not been built, there are system deficiencies (by service area) that have been removed from the total supply to properly account for new "net" availability. Table 9 depicts net availability of supply by the CIP. **Appendix E** details capacity calculations provided by the CIP program.

Table 9: Vehicle-Miles of New Capacity Supplied

Service Area	Vehicle-Miles of New Capacity Supplied	Vehicle-Miles of Net New Capacity Supplied
1	13,836	5,869
2	6,096	3,114
3	11,489	4,476
4	4,751	2,405
Total	36,172	15,864

Cost of Roadway Improvements

The total and net cost to implement the roadway improvements plan projects by service area is shown in **Table 10**. If traffic exists on proposed CIP project roadways or there are any deficiencies present in each respective service area, the total system cost is adjusted to reflect the net capacity being made available by the impact fee program. In other words, only the unused portion of the CIP and its associated costs are considered eligible. A detailed listing by project segment in each service area can be found in **Appendix F**. **Appendix G** details system costs by service area.

Table 10: Summary of Roadway Improvements Plan Cost Analysis

Service Area	Actual Cost of Proposed Impact Fee Program	Adjusted Cost (50% Credit) of Proposed Impact Fee Program
1	$73,550,103	$36,775,052
2	$31,656,236	$15,828,118
3	$26,175,186	$13,087,593
4	$14,519,597	$7,259,799
Total	$145,901,123	$72,950,562

State law is specific in identifying that only the portion of the CIP necessitated and attributable to new development is eligible for cost recovery. For example, if only 60% of the net service units supplied by the CIP are needed in the next 10 years, only 60% of the cost (credited at 50% per legislative requirements) may be considered in the calculation of fees. All the capacity provided by the impact fee CIP will be necessitated to address future growth over the 10-year planning period. The cost attributable to new

growth is $31.9 million and represents the citywide cost to implement projects on the impact fee program. **Table 11** depicts CIP costs attributable to new growth by service area.

Table 11: Capital Improvements Plan Costs Attributable to New Development

Service Area	Adjusted Cost (50% Credit) of Net New Capacity	Adjusted Cost (50% Credit) Attributable to New Growth
1	$15,598,596	$15,598,596
2	$8,084,777	$8,084,777
3	$5,098,520	$5,098,520
4	$3,675,714	$3,675,714
Total	$31,993,304	$31,993,304

Chapter 6: Calculation of Impact Fees

This chapter discusses the calculation of the cost per service unit and the calculation of roadway impact fees. The transportation impact fee will vary by the land use, service area, and size of the development. Examples are included to better illustrate the method by which the transportation impact fees are calculated.

Cost Per Service Unit

The cost per service unit is calculated by dividing the cost of the CIP necessitated and attributable to new demand (net cost) by the projected service units of growth over the 10-year planning period.

Generally, the cost per service unit varies by service area because of variations in cost of CIP, projected growth and the number of service units necessitated by new growth between zones. Where net capacity supplied is greater than demand, the cost per service unit is simply the cost of the net capacity divided by the number of service units provided. In this case, only the portion of the CIP necessitated by new development is used in the calculation. If the net capacity supplied is *less* than projected new demand, then the cost per service unit is calculated by dividing the total cost of net supply by the portion of new demand attributable and necessary by development. The result is generally a decrease in the cost per service unit, because such cost is spread over the larger number of service units of growth.

Table 12 lists the results of the cost per service unit calculation by service area. The actual cost per service unit reflects the true burden to the City for the implementation of the roadway capital improvements program. As per state law, a credit for the portion of ad-valorem tax revenues generated by improvements over the program period, or a credit equal to 50% of the total projected cost of implementing the capital improvements plan must be given. Based on this analysis, the maximum collection rate reflects the maximum amount per service unit that can be charged to follow the state statute. **Appendix G** details the maximum fee per service unit calculation for each service area.

Table 12: Cost Per Service Unit Summary

Service Area	Actual Cost Per Service Unit	Maximum Fee per Service Unit (50% Credit)
1	$2,272.00	$1,136.00
2	$4,398.00	$2,199.00
3	$784.00	$392.00
4	$2,612.00	$1,306.00
Total	$1,926.00	$963.00

Calculation of Roadway Impact Fees

The calculation of roadway impact fees for new development involves a two-step process. Step one is the calculation of the total number of service units that will be generated by the development. Step two is the calculation of the impact fee due by the new development.

Step 1: Determine number of service units (vehicle-miles) generated by the development using the equivalency table.

No. of Development Units	x	Vehicle-miles per development unit	=	Development's Vehicle-miles

Step 2: Calculate the impact fee based on the fee per service unit for the service area where the development is located.

Development's Vehicle-miles	x	Fee per vehicle-mile	=	Impact Fee due from Development

Examples: The following fees would be assessed to new developments in Service Area 3 if the cost per service unit were retained at the current collection rate $256.00 (adopted in 2008, retained in 2013).

Single-Family Dwelling

1 dwelling unit x 3.12 vehicle-miles/dwelling unit = 3.12 vehicle-miles
3.12 vehicle-miles x $256.00 /vehicle-mile = $798.72

20,000 square foot (s.f.) Office Building

20 (1,000 s.f. units) x 3.92 vehicle-miles/1,000 s.f. units = 78.40 vehicle-miles
78.40 vehicle-miles x $256.00 /vehicle-mile = $20,070.40

100,000 s.f. Retail Center

100 (1,000 s.f. units) x 1.77 vehicle-miles/1,000 s.f. units = 177.00 vehicle-miles
177.00 vehicle-miles x $256.00 /vehicle-mile = 45,312.00

200,000 s.f. Industrial Development

200 (1,000 s.f. units) x 1.77 vehicle-miles/1,000 s.f. units = 354.00 vehicle-miles
354.00 vehicle-miles x $256.00 /vehicle-mile = $90,624.00.

Chapter 7: Conclusions

Chapter 395 authorizes the assessment and collection of impact fees in Texas for transportation related capital improvements that must be met in order to assess and collect impact fees. This study was conducted to fulfill the requirements of Chapter 395 in developing a transportation-related impact fee for the City of Rockwall.

Three service areas were created for Rockwall. This service area structure was configured so that no point is greater than the six-mile maximum set forth by law. The six-mile limit ensures that roadway improvements are near the development paying the fees that it serves.

Vehicle-miles of travel in the PM peak hour are used as the service unit for calculating and assessing impact fees. Vehicle-miles establish a relationship between the intensity of land development and the demand on the roadway system using published trip generation data and average trip length. The PM peak hour is used as the time period for assessment because typically the greatest demand for roadway capacity occurs during this hour. Additionally, roadways are sized to meet this demand and roadway capacity can more accurately be defined on an hourly basis.

The service units (vehicle-miles) for new development are a function of trip generation and the average trip length for specific land uses. Trip generation information was based on data published by the Institute of Transportation Engineers as reported in the initial study. Where appropriate, trip generation rates were adjusted to reflect the primary trip purpose. This ensures that new development is assigned for the portion of trips associated with that specific development. Average trip length data was based on information compiled by NCTCOG and based on data from a NCTCOG Workplace Survey, statistics from the US Census Bureau National Workplace Survey and tailored to Rockwall.

The result of combining trip generation and trip length information is an equivalency table that establishes a service unit rate for various land uses. Separate rates were established for specific land uses within the broader categories of residential, community, industrial and institutional uses.

An analysis of existing conditions revealed that the current roadway system provides over 74,952 vehicle-miles of capacity. The existing demand placed on the system was determined to be 46,738 vehicle-miles. Evaluation of the existing roadway system found 2,871 vehicle-miles of deficiencies on the existing roadway network.

Projected growth, in terms of vehicle-miles over the 10-year planning period, was based on population and employment data that was prepared in the Land Use Assumptions for Roadway Impact Fees dated August 2019 by the City Planning Department. Based on this growth, the projected vehicle-miles of demand calculated to be 33,222.

Rockwall City Staff identified the roadway impact fee capital improvements program for the 10-year planning period. Projects eligible for this CIP include arterial and collector streets that have been designated on the officially adopted Thoroughfare Plan of the City. Developer funded roadways are not eligible for inclusion in calculating impact fees. Projects totaling $145.9 million, was identified for impact fee consideration based on need, projected growth, project affordability and achievability, financial

considerations, jurisdictional issues, the Thoroughfare Plan, and staff recommendation. The credited (50%) cost attributable to new growth is $72.94 million and represents 100% of the net capacity made available for development by impact fee roadway projects. The recommended CIP program will provide 15,864 vehicle-miles of new net capacity.

The *actual* cost per service unit was calculated to be between $784.00 and $4,398.00 and was based on the total cost of net capacity supplied by the CIP and the demand attributable to new development over the 10-year planning period. State legislation requires that a credit for the portion of ad-valorem tax revenues generated by improvements over the program period, or a credit equal to 50% of the total projected cost of implementing a roadway impact fee capital improvements program be given. Based on a 50% credit, the cost per service unit ranges between $392.00 and $2,199.00.

The determination of fees due from new development is based upon the size of development, its associated service unit generation (equivalency table) and the cost per service unit derived or adopted for each service area.

APPENDICES

A. Roadway Impact Fee Definitions

ROADWAY IMPACT FEE DEFINITIONS

Average Trip Length - the average actual travel distance between two points. The average trip length by specific land use varies.

Diverted Trip - similar to pass-by trip, but a diversion is made from the regular route to make an interim stop.

Impact Fee - a charge or assessment imposed by a city against new development to generate revenue for funding or recouping roadway improvements necessitated and attributable to new development.

Land Use Equivalency – correlation of a land use to the rate of vehicle miles CIP of network capacity it would consume

Maximum Fee Per Service Unit - the highest impact fee that may be collected by the City per vehicle-mile of supply. Calculated by dividing the costs of the capital improvements by the total number of vehicle-miles of demand expected in the 10-year planning period.

Pass-by Trip - a trip made as an intermediate stop on the way from an origin to a primary trip destination. For example, a stop at a convenience store on the way to office from home.

PM Peak Hour - the hour when the highest volume of traffic typically occurs. Data collection (May 2019) revealed the peak hour of travel between 5:00 and 6:00 pm for Rockwall.

PM Peak Hour Traffic Counts - the number of vehicles passing a certain point during the peak hours of travel. Traffic counts are conducted during the PM peak hour because the greatest demand for roadway capacity occurs during this hour.

Primary Trip - a trip made for the specific purpose of visiting a destination; for example, from home to office.

Roadway Demand - the demand placed on the roadway network as a result of development. Determined by multiplying the trip generation of a specific land use by the average trip length.

Roadway Supply (or Capacity) - the number of service units provided by a segment of roadway over a period of time. Determined by multiplying the lane capacity by the roadway length.

Service Area - the area within the city boundaries to be served by capital improvements. Criteria for developing the service area structure include; 1) restricted to six-mile limit by legislation (to ensure proximity of roadway improvements to development), 2) conforms to census or forecast model boundaries, 3) projects on CIP as boundaries, 4) effort to match roadway supply with projected demand, or 5) city limit boundaries.

Service Unit - a measure of use or generation attributable to new development for roadway improvements. Also used to measure supply provided by existing and proposed roadway improvements.

Trip - a single, one-direction vehicle movement from an origin to a destination.

Trip Generation - the total trip ends for a land use over a given period or the total of all trips entering and exiting a site during that designated time. Used in the development of the land use equivalency table for Rockwall. Based primarily on data prepared by the Institute of Transportation Engineers (ITE).

Vehicle - for impact fee purposes, any motorized appurtenance that carries passengers and/or goods on the roadway system during peak periods of travel.

Vehicle-mile - a unit used to express both supply and demand provided by, and placed on, the roadway system. A combination of a number of vehicles traveling during a given time period and the distance in which these vehicles travel in miles.

B. Land Use Definitions

LAND USE DEFINITIONS

Residential

Single-Family Detached - Any single-family detached home on an individual lot is included in this category. A typical example of this land use is a home in a suburban subdivision. Also included are duplex residential units and manufactured homes and other residential land uses not specified above.

Multi-Family - This land use includes both low-rise ("walk-up" dwellings) and high-rise multi-family apartments. An apartment is defined as a dwelling unit that is located within the same building with three or more dwelling units. Also included in this land use are residential condominiums, townhomes, triplex and quadplex units. Residential condominiums and townhomes are defined as single-family units that have at least one other single-family unit within the same building structure.

Independent Senior Living Facility - Retirement communities - restricted to adults or senior citizens - contain residential units like apartments or condominiums and are usually self-contained villages. They may also contain special services such as medical facilities, dining facilities, and some limited supporting retail facilities.

Office (Service)

General Office Building - A general office building houses one or more tenants and is the location where affairs of a business, commercial or industrial organization, and professional activity are conducted. The building or buildings may be limited to one tenant or contain a mixture of tenants including professional services, insurance companies, investment brokers, company headquarters, and services for the tenants such as a bank or savings and loan, a restaurant or cafeteria, and several retail facilities. Also included in this category are office parks, and other office uses not specified above.

Medical Office Building – A building that provides diagnoses and outpatient care on a routine basis but is unable to provide prolonged in-house medical and surgical care. One or more private physicians or dentists generally operate this type of facility.

Commercial/Retail

General Retail – General retail includes a variety of land uses that include shopping centers, home improvement stores, hardware stores selling a complete assortment of food, household goods and materials, apparel, servicing items. A shopping center is an integrated group of commercial establishments that is planned, developed, owned, and managed as a unit. It is related to its market area in terms of size, location, and type of store. Shopping centers provide on-site parking facilities. Some centers may include non-merchandising uses such as small office professional services, post offices, banks, health clubs, video rentals, and recreational facilities such as ice-skating rinks or video arcades.

Restaurant - This land use consists of sit-down eating establishments. Quality and high-turnover (sit-down) restaurants are included in this category. Quality restaurants usually have a turnover rate of at least one hour or longer. The turnover rate for a high-turnover (sit-down) restaurant is usually less than one hour.

Fast Food Restaurant - This category includes fast food restaurants with or without drive-through windows, such as McDonalds, Burger King, Dunkin Donuts, and Taco Bell. Some establishments may include an indoor or outdoor playground.

Convenience Store/Gas Station - Any convenience market that sells convenience foods, newspapers, magazines, and often, beer and wine and may have gasoline pumps. Gas stations generally are located at intersections or freeway interchanges and may include facilities for servicing, repairing, fueling motor vehicles and may have convenience stores. Convenience stores/gas stations that have a fast-food restaurant contained within should be calculated on a separate basis based on the appropriate independent variable.

Bank - This land use includes walk-in and drive-in banks. Walk-in banks are generally free-standing buildings with their own parking lots. These banks do not have drive-in windows. Drive-in banks provide banking facilities for the motorist while in a vehicle; many also serve patrons who walk into the building. Savings and loan companies should also be included in this category.

Hotel/Motel – A place of lodging that provides sleeping accommodations, small restaurants, lounges, and meeting spaces. Some hotels or motels may provide banquet rooms or other retail and service shops.

Furniture and Appliance Sales - A store specializing in the sale of furniture, household appliances and goods and often, carpeting.

Theater – This land use consists of a movie or live theater and contains audience seating, single or multiple auditoriums, lobby, offices and refreshment stands.

Self-Storage Facilities - A self-serve storage unit or vault that is rented for the storage of goods. Each unit is physically separated from other units and access is usually provided through an overhead door or other common access point.

Industrial (Basic)

General Industrial – General industrial includes a variety of land uses such as light industrial, manufacturing, salvage, facilities for preparation/assembly and warehouse/distribution of goods. Other uses include materials testing laboratories, high-tech facilities and assemblers of technical equipment. Most facilities are free standing and devoted to a single use. Also included in this category are any other industrial uses not specified above.

Manufacturing – Facilities where the primary activity is the conversion or fabrication of raw materials to finished products. In addition to production of goods, manufacturing facilities may also have ancillary office, warehouse and associated functions.

Warehousing – These facilities are primarily devoted to the storage of materials. These facilities differ from mini warehouse in that they are generally not self-service in nature.

Institutional

Private School - Private schools serve students between the kindergarten and middle school or high school levels. Private schools are usually centrally located in residential communities in order to facilitate student access and have no student drivers.

Community College - Community college provides two and four-year advanced degrees. Vocational and technical schools are other uses that may fall under this category.

Day Care Center - A day care center is a facility where care for pre-school age children is provided, normally during the daytime hours. Day care facilities generally include classrooms, offices, eating areas, and playgrounds. Some centers also provide after-school care for older children.

Hospital - A hospital is any institution where medical or surgical care is given to non-ambulatory and ambulatory patients, and overnight accommodations are provided.

Nursing Home - A nursing home is any facility whose primary purpose is to care for persons who are unable to care for themselves. The term applies to rest homes, chronic care, and convalescent homes.

Religious Facilities – Churches, synagogues or houses of worship that provide public worship services, and generally house an assembly hall or sanctuary, meeting rooms, classrooms, and occasionally dining, catering, or party facilities.

Activity Centers – A recreational center or private club such as a YMCA that may offer classes and clubs for adults and children; a day care or a nursery school, meeting rooms, swimming pools and whirlpools; saunas, tennis, racquetball and handball courts, exercise classes, weightlifting equipment and locker rooms. Some may offer a small restaurant or snack bar within.

U.S. Post Office – A building that contains service windows for mailing packages and letters, post office boxes, offices, sorting and distributing facilities for mail and vehicle storage areas.

C. Calculation of Vehicle-Miles of New Demand

2019-2029 Vehicle-Mile Trip Generation, Rockwall Roadway Impact Fee Study

Based on June 2019 Land Use Assumptions by City of Rockwall; ITE 10th-Trip Gen., NCTCOG Avg. Trip Lengths; FNI employee densities.

Estimated Residential Growth Vehicle-Mile Trip Generation (single family detached, typ.)

Service Area	Added Dwelling Units	Vehicle-Miles per DU	Total Vehicle-Miles
1	1,740	3.12	5,426
2	917	3.12	2,860
3	2,030	3.12	6,331
4	757	3.12	2,361

Estimated Basic Employment Growth Vehicle-Mile Generation (general light industrial, typ.)

Service Area	Added Employees	Square Feet per emp.	Total Square Feet	Vehicle-Miles Per 1000/SF	Total Vehicle-Miles
1	750	1500	1,125,000	1.77	1,992
2	102	1500	153,000	1.77	271
3	9	1500	13,500	1.77	24
4	0	1500	0	1.77	0

Estimated Service Employment Growth Vehicle-Mile Generation (general office building, typ.)

Service Area	Added Employees	Square Feet per emp.	Total Square Feet	Vehicle-Miles Per 1000/SF	Total Vehicle-Miles
1	1,726	500	863,000	3.92	3,384
2	130	500	65,000	3.92	255
3	2,242	500	1,121,000	3.92	4,396
4	169	500	84,500	3.92	331

Estimated Retail Employment Growth Vehicle-Mile Generation (retail/shopping center, typ.)

Service Area	Added Employees	Square Feet per emp.	Total Square Feet	Vehicle-Miles Per 1000/SF	Total Vehicle-Miles
1	1,654	1000	1,654,000	1.77	2,929
2	164	1000	164,000	1.77	290
3	1,271	1000	1,271,000	1.77	2,251
4	69	1000	69,000	1.77	122

2013-2023 Vehicle-mile Generation Summary

Service Area	Residential Growth Vehicle-Miles	Basic Growth Vehicle-Miles	Service Growth Vehicle-Miles	Retail Growth Vehicle-Miles	Total Growth Vehicle-Miles
1	5,426	1,992	3,384	2,929	**13,731**
2	2,860	271	255	290	**3,676**
3	6,331	24	4,396	2,251	**13,001**

Total	16,977	2,286	8,367	5,592	**33,222**

D. Existing Capital Improvements

EXISTING CAPITAL IMPROVEMENTS

Definitions

LANES	The total number of lanes in both directions available for travel.
TYPE	The type of roadway (used in determining capacity): DA = divided arterial UA = undivided arterial UC = undivided collector
PK-HR VOLUME	The existing volume of cars on the roadway segment traveling during the afternoon (P.M.) peak hour of travel. A and B indicate the two directions of travel. Direction A is a northbound or eastbound and direction B is southbound or westbound. If only one half of the roadway is located within the service area (see % in service area), the opposing direction will have no volume in the service area.
% IN SERVICE AREA	If the roadway is located on the boundary of the service area (with the city limits running along the centerline of the roadway), then half of the roadway is inventoried in the service area and the other half is not. This value is either 50% or 100%.
VEH-MI SUPPLY PK-HR	The number of total service units (vehicle-miles) supplied within the service area, based on the length and established capacity of the roadway type.
VEH-MI TOTAL DEMAND PK-HR	The total service unit (vehicle-mile) demand created by existing traffic on the roadway segment in the afternoon peak hour.
EXCESS CAPACITY PK-HR VEH-MI	The number of service units supplied but unused by existing traffic in the afternoon peak hour.
EXISTING DEFICIENCIES PK-HR VEH-MI	The number of service units of demand in excess of the service units supplied.

NOTE: Excess capacity and existing deficiencies are calculated separately for each direction. It is possible to have excess capacity in one direction and an existing deficiency in the other. When both directions have excess capacity or deficiencies, the total for both directions are presented.

E. Roadway Improvement Plan Projects

ROADWAY IMPROVEMENTS PLAN PROJECTS

Definitions

LANES	The total number of lanes in both directions available for travel.
TYPE	The type of roadway (used in determining capacity): DA = divided arterial SA = special arterial (similar to DA)
PK-HR VOLUME	the existing volumes of cars on the roadway segment traveling during the afternoon (P.M.) peak hour of travel.
% IN SERVICE AREA	If the roadway is located on the boundary of the service area (with the city limits running along the centerline of the roadway), then half of the roadway is inventoried in the service area and the other half is not. This value is either 50% or 100%.
VEH-MI SUPPLY TOTAL	The number of total service units (vehicle-miles) supplied within the service area, based on the length and established capacity of the roadway type.
VEH-MI TOTAL DEMAND PK-HR	The total service unit (vehicle-mile) demand created by existing traffic on the roadway segment in the afternoon peak hour.
EXCESS CAPACITY PK-HR VEH-MI	The number of service units supplied but unused by existing traffic in the afternoon peak hour.
FINANCE COST	Estimate of the cost of financing the cost of project development. Included for recoupment projects along John King Boulevard. Not applied for new recoupment and future projects added under this updated Impact Fee CIP
ROW	Estimated value of private owned right of way needed to be acquired for construction of the roadway improvements.

Engineering/Survey/Testing		7.0%	$ 2,499,900
Right-of-Way Acquisition	Cost per sq. ft.: $ 1.00	$ 267,200	$ 267,200
	Impact Fee Project Cost Estimate Total:		**$ 38,480,400**
	Estimated Finance Cost (11.9%; i.e. 3% over 10 years)		**$ 4,579,100**

2019 Roadway Impact Fee
City of Rockwall

Freese and Nichols, Inc.
Updated: 7/2019

F. Roadway Improvements Plan Cost Analysis

ROADWAY IMPROVEMENTS PLAN COST ANALYSIS

Definitions

LANES	The total number of lanes in both directions available for travel.
TYPE	The type of roadway (used in determining capacity): DA = divided arterial SA = special arterial
% IN SERVICE AREA	If the roadway is located on the boundary of the service area (with the city limits running along the centerline of the roadway), then half of the roadway is inventoried in the service area and the other half is not. This value is either 50% or 100%.
TOTAL SEGMENT COST	The estimated cost (in dollars) of the entire segment of the proposed improvement.
TOTAL COST IN SERVICE AREA	The estimated cost (in dollars) of the portion of the proposed roadway improvement within the service area.

CITY OF ROCKWALL
2019 – 2029 WATER & WASTEWATER IMPACT FEE UPDATE

SECTION 1 – INTRODUCTION

A. GENERAL

In accordance with the requirements of Chapter 395.052 of the Local Government Code, this report establishes the City of Rockwall's Capital Improvement Plan for water and wastewater impact fees and calculates the maximum allowable fee for each. Land use assumptions for impact fees were generated under a separate document prepared by the City of Rockwall's Planning Department.

Chapter 395, of the Local Government Code is an act that provides guidelines for financing capital improvements required by new development in municipalities, counties, and certain other local governments. The basis for determination of an impact fee requires the preparation and adoption of a land use plan and growth assumption, and the preparation of a 10-year capital improvement plan. The capital improvement plan requires an analysis of total capacity, the level of current usage and commitments of capacity of existing capital improvements. From these two phases, a maximum impact fee is calculated.

The Act allows the maximum impact fee to be charged if revenues from future ad valorem taxes, and water and sewer bills are included as a credit in the analysis. If not, the Act allows the maximum fee to be set at 50% of the calculated maximum fee. The following items were included in the impact fee calculation:

1. The portion of the cost of the new infrastructure that is to be paid by the City, including engineering, property acquisition and construction cost.

2. Existing excess capacity in lines and facilities that will serve future growth and which were paid for in whole or part by the City.

3. Engineering and quality control fees for construction projects.

4. Interest and other finance charges on bonds issued by the City to cover its portion of the cost. 5% is assumed for this analysis.

The engineering analysis portion of the Water and Wastewater Fee determines utilized capacity cost of the major water distribution and wastewater collection facilities between the year 2019 and the year 2029. Facilities in this analysis include, water pump stations, water storage tanks, water transmission lines and wastewater collection lines. The North Texas Municipal Water District (NTMWD) water treatment, and water distribution components were excluded from this analysis. The study period is a ten-year period with 2019 as the base year. The impact fee calculations for the water and wastewater systems are based on land use assumptions prepared by the City of Rockwall. Prior to this impact fee update, the City's Water Distribution and Wastewater Collection hydraulic models were updated for 2019, 2029 and buildout conditions. The hydraulic model results are available for review from the City of Rockwall. The equivalency factors utilized in this analysis conform to the American Water Works Association Standards (C700 - C703).

B. WATER & WASTEWATER IMPACT FEE GLOSSARY

1. Advisory Committee means the capital improvements advisory committee established by the City for purposes of reviewing and making recommendations to the City Council on adoption of the City's impact fee program.

2. Area-Related Facility means a capital improvement or facility expansion which is designated in the impact fee capital improvements plan and which is not a site-related facility. Area-Related Facility may include capital improvements that are located off-site, or within or on the perimeter of the development site.

3. Assessment means the determination of the amount of the maximum impact fee per service unit that can be imposed on new development.

4. Capital Improvement means either a water facility or a wastewater facility with a life expectancy of three or more years, to be owned and operated by or on behalf of the City.

5. City means the City of Rockwall, Texas.

6. Credit means the amount of the reduction of an impact fee due, determined under this ordinance or pursuant to administrative guidelines that is equal to the value of area-related

facilities provided by a property owner pursuant to the City's subdivision or zoning regulations or requirements, for the same type of facility.

7. Debt Service means the 20-year financing costs of projects applied to all eligible existing and proposed water and wastewater facilities.

8. Facility Expansion means either a water facility expansion or a sewer facility expansion.

9. Impact Fee means either a fee for water facilities or a fee for wastewater facilities, imposed on new development by the City pursuant to Chapter 395 of the Texas Local Government Code in order to generate revenue to fund or recoup the costs of capital improvements or facility expansion necessitated by and attributable to such new development. Impact fees do not include the dedication of rights-of-way or easements for such facilities, or the construction of such improvements, imposed pursuant to the City's zoning or subdivision regulations.

10. Impact Fee Capital Improvements Plan means either a water capital improvements plan or a wastewater capital improvement plan adopted or revised pursuant to the impact fee regulations.

11. Land Use Assumptions means the projections of population and growth, and associated changes in land uses, densities and intensities over at least a ten-year period, as adopted by the City and as may be amended from time to time, upon which the capital improvements plans are based.

12. Land Use Equivalency Table means a table converting the demands for capital improvements generated by various land uses to numbers of service units, as may be amended from time to time.

13. New Development means the subdivision of land; the construction, reconstruction, redevelopment, conversion, structural alteration, relocation, or enlargement of any structure; or any use or extension of the use of land; any of which increases the number of service units.

14. Recoupment means the imposition of an impact fee to reimburse the City for capital improvements that the City had previously oversized to serve new development.

15. Service Area means either a water service area or wastewater service area which impact fees for capital improvements or facility expansion will be collected for new development occurring within such area, and within which fees so collected will be expended for those types of improvements or expansions identified in the type of capital improvements plan applicable to the service area.

16. Service Unit means the applicable standard units of measure shown on the land use equivalency table in the Impact Fees Capital Improvements Plan that can be converted to water meter equivalents, for water or for wastewater facilities, which serves as the standardized measure of consumption, use or generation attributable to the new unit of development.

17. Site-Related Facility means an improvement or facility which is for the primary use or benefit of a new development, and/or which is for the primary purpose of safe and adequate provision of water or wastewater facilities to serve the new development, and which is not included in the impact fees capital improvements plan and for which the property owner is solely responsible under subdivision or other applicable development regulations.

18. Utility Connection means installation of a water meter for connecting a new development to the City's water system, or connection to the City's wastewater system.

19. Wastewater Facility means a wastewater interceptor or main, lift station or other facility included within and comprising an integral component of the City's collection system for wastewater. Wastewater facility includes land, easements or structure associated with such facilities. Wastewater facility excludes site-related facilities.

20. Wastewater Facility Expansion means the expansion of the capacity of any existing wastewater improvement for the purpose of serving new development, but does not include the repair, maintenance, modernization, or expansion of an existing sewer facility to serve existing development.

21. Wastewater Capital Improvements Plan means the adopted plan, as may be amended from time to time, which identifies the wastewater facilities or wastewater expansions and their associated costs which are necessitated by and which are attributable to new development, for a period not to exceed 10 years.

22. Water Facility means a water main, pump station, storage tank or other facility included within and comprising an integral component of the City's water storage or distribution system. Water facility includes CCN acquisition, land, easements or structures associated with such facilities. Water facility excludes site-related facilities.

23. Water Facility Expansion means the expansion of the capacity of any existing water facility for the purpose of serving new development, but does not include the repair, maintenance, modernization, or expansion of an existing water improvement to serve existing development.

24. Water Capital Improvements Plan means the adopted plan, as may be amended from time to time, which identifies the water facilities or water expansions and their associated costs which are necessitated by and which are attributable to new development, for a period not to exceed 10 years.

25. Water Meter means a device for measuring the flow of water to a development, whether for domestic or for irrigation purposes.

C. LAND USE ASSUMPTIONS *(Prepared By: City of Rockwall Planning Department)*

The impact fee land use assumptions utilized in this update were prepared by the City of Rockwall's Planning Department and are presented in a separate document. The land use assumptions projected an ultimate residential population of approximately 149,525 in the City of Rockwall's ultimate planning boundary.

The residential and non-residential growth provided by the City for the year 2019 through 2029 is summarized in Table No. 1.

TABLE NO. 1

Residential and Non-Residential Growth from 2019 to 2029

Year	LUA Residential Population *	Residential Population Served **	Non-Residential Uses*** Employees	
2019	49,616	44,748	25,369	
2029	73,228	64,768	34,064	
Res. Growth Rate	**1.48**		**Non-Res. Growth Rate**	**1.34**

** Residential Population Inside Planning Boundary*
*** Residential Population Served Inside Existing City of Rockwall City Limit Boundary*
**** Basic – Industrial Land Uses*
**** Service – Office & Institutional Land Uses*
**** Retail – Commercial Land Uses*

As shown in Table No. 1, increases in the residential population and non-residential uses will occur during the 10-year capital recovery period. The water demand and wastewater flows from the residential and non-residential uses dictate the ultimate size of facilities, while the rate of growth is important to determine the timing of system improvements to meet the City's growing needs. The eligible water impact fee facilities are shown **on Exhibit 1**. The eligible wastewater facilities are shown on **Exhibit 2** in this report.

SECTION II

WATER & WASTEWATER C.I.P. AND IMPACT FEE ANALYSIS

A. DEFINITION OF A SERVICE UNIT – WATER AND WASTEWATER

Chapter 395 of the Local Government Code requires that impact fees be based on a defined service unit. A "service unit" means a standardized measure of consumption, use generation, or discharge attributable to an individual unit of development calculated in accordance with generally accepted engineering or planning standards. This impact fee defines a water and wastewater service unit to be a *5/8-inch water meter* and has referred to this service unit as a Single Family Living Unit Equivalent (SFLUE). The SFLUE is based on the continuous duty capacity of a 5/8-inch water meter. This is the City of Rockwall's typical meter used for a single family detached dwelling, and therefore is considered to be equivalent to one "living unit". Other meter sizes can be compared to the 5/8-inch meter through a ratio of water flows as published by the American Water Works Association as shown in **Table No. 2** below. This same ratio is then used to determine the proportional water and wastewater impact fee amount for each water meter size.

TABLE NO. 2

Living Unit Equivalencies For Various Types and Sizes of Water Meters

Meter Type	Meter Size	Continuous Duty Maximum Rate (gpm) [a]	Ratio to 5/8" Meter
Simple	5/8"	10	1.0
Simple	1"	25	2.5
Simple	1-1/2"	50	5.0
Simple	2"	80	8.0
Compound	2"	80	8.0
Turbine (Irrigation)	2"	160	16.0
Compound	3"	160	16.0
Turbine (Irrigation)	3"	350	35.0
Compound	4"	250	25.0
Turbine (Irrigation)	4"	650	65.0
Compound	6"	500	50.0
Turbine (Irrigation)	6"	1,400	140.0
Compound	8"	800	80.0
Turbine (Irrigation)	8"	2,400	240.0
Turbine	10"	3,500	350.0
Turbine	12"	4,400	440.0

[a] *Source: AWWA Standard C700 - C703*

B. CALCULATION OF WATER & WASTEWATER - LIVING UNIT EQUIVALENTS

The City of Rockwall provided the existing water meter count by size category as of December 2018. In total, there are 15,680 domestic water and irrigation meters serving an existing population of 49,616 residents and business. **Table No. 3** shows the number of existing meters, the living unit equivalent factor and the total number of living unit equivalents for each sized water meter.

Similar, the City provided the number of wastewater accounts by corresponding water meter size. This number of wastewater accounts is 15,053. **Table No. 4** illustrates the existing wastewater accounts and the SFLUE's. The difference between the water and wastewater accounts is irrigation meters are not included in the wastewater accounts.

The residential growth rate of 1.48 in **Table 1** was applied to 5/8-inch through 1-1/2-inch meters. The non-residential growth rate of 1.34 in **Table 1** was applied to 2-inch through 12-inch meters. Utilizing these growth rates in a straight-line extrapolation of the existing water and wastewater accounts, the numbers of new accounts was calculated for the year 2029. City records indicate the historical growth of 5/8-inch and 1-inch meters is approximately 96% 5/8-inch meters and 4% 1-inch meters for the base meter sizes. These percentages were applied to the total growth of 5/8-inch and 1-inch meters. Living unit equivalents were then applied to the water meters and wastewater accounts for 2019 and 2029, resulting in a total number of living units. The difference in the total number of 2019 and 2029 living units results in the new living unit equivalents during the impact fee period. The calculation of living unit equivalents is summarized in **Table 3 and Table 4**.

TABLE NO. 3

Water Living Unit Equivalents 2019 – 2029

Meter Size	2019			2029			New Living Unit Equivalents During Impact Fee Period
	Number of Water Meters	Living Unit Equivalent Ratio for 5/8" Used	Total Number of Living Units	Number of Water Meters	Living Unit Equivalent Ratio for 5/8" Used	Total Number of Living Units	
5/8"	14,261	1.0	14,261	21,108	1.0	21,108	6,847
1"	597	2.5	1,493	882	2.5	2,205	712
1-1/2"	188	5.0	940	278	5.0	1,390	450

C. COST OF FACILITIES

Unit costs for proposed water and wastewater lines larger than 12 inches in diameter that are anticipated to be constructed between 2019 and 2029 by private development include the City's oversize cost participation only. These water and wastewater lines are colored green on **Exhibits 1 and 2**. Oversize cost participation from City is based on availability of funds. For City participation, the developer must bid the 12-inch as a base and the oversize as an additive alternate. City initiated water and wastewater lines include the full cost of the proposed facility. These water and wastewater lines are colored red on **Exhibits 1 and 2**. Developer initiated water and wastewater line projects which are 12 inches or less in diameter are not included in this Impact Fee analysis, as the cost for these size lines are the responsibility of the developer. These water and wastewater lines are colored light blue (cyan) on **Exhibits 1 and 2**.

Actual construction costs of the various existing elements of the water and wastewater systems were utilized where the information was known. The existing cost of facilities was determined from Contractor's final pay requests, City purchase orders, bid tabulation forms and developer's agreements. Existing water and wastewater facilities included in the impact fee analysis are only those with excess capacity available for future growth are colored dark blue on **Exhibits 1 and 2**.

Cost data for existing water and wastewater facilities included in the impact fee analysis were provided by the City. A 5% debt service, over a period of 20-years, has been added to all projects. Actual costs were used for those existing projects where records were available.

D. WATER DISTRIBUTION SYSTEM

Computer hydraulic models for the years 2019, 2029 and Buildout were prepared and analyzed by Birkhoff, Hendricks & Carter, L.L.P. The models were developed and water demand distributed from residential population and non-residential land use projections prepared by the City of Rockwall's Planning Department. The projected developed land areas from the City's Land Use Assumptions follow closely to the construction of major facilities in the system. These facilities include pump stations, storage tanks, and major distribution lines. All computer models were run for the Maximum Hourly Demands in a three-day extended period simulation to ensure proper sizing of the facilities to meet peak demands.

1. Existing Pump Stations, Ground Storage Reservoirs & Elevated Storage Tanks

The existing water distribution system included in the impact fee analysis (As of December 2018) includes the facilities summarized in **Table No. 5** and **Table No. 6**.

TABLE NO. 5

Water Distribution System -- Existing Pump Stations & Ground Storage

Pump Station	Number of Pumps	Rated Capacity (MGD)	Number of Ground Storage Tanks	Total Ground Storage Available (Gallons)
Heath Street 698.75	6	17.7	1	3,000,000
Eastside 698.75	6	25.9	1	3,000,000
698.75 Subtotal:	**12**	**43.6**	**2**	**6,000,000**
Eastside 780	3	8.6	1	1,000,000
780 Subtotal:	**3**	**8.6**	**1**	**1,000,000**
Total:	**15**	**52.2**	**3**	**7,000,000**

TABLE NO. 6

Existing Elevated Storage Tanks

Elevated Storage Tanks	Capacity in Million Gallons
Southside Elevated Storage Tank	1.0
Country Lane Elevated Storage Tank	2.0
Springer Elevated Storage Tank	2.0
Total	**5.0**

The pump stations and ground storage facilities were analyzed with the maximum daily demand, while elevated storage acts dynamically and therefore was analyzed utilizing the difference between the Maximum Hourly Demand and the Maximum Daily Demand.

2. Distribution Lines

The distribution lines consist of all lines within the Service Area planning boundary supplying water to customers in the City of Rockwall. Existing and proposed distribution lines vary in size from 5/8-inch services to 48-inch transmission lines and pump station piping. The cost of water lines includes construction cost, appurtenances (water valves, fire hydrants, taps and the like), utility relocations, purchase of easements and engineering costs. Financing cost over a 20-year term is included for each project.

Unit cost for proposed capital improvement water lines 12-inches and larger in diameter classified as City initiated, or City participation in oversize water lines. Developer's initiated water line projects, 12 inches or less in diameter were not included in this Impact Fee analysis, as the cost for these size lines are the responsibility of the developer.

3. Water Supply

The City of Rockwall currently receives all of its water supply from the North Texas Municipal Water District (NTMWD). Rockwall's allocation of the capital cost of services as a Member of the NTMWD was specifically excluded from the impact fee analysis.

If included, Rockwall's share of the NTMWD capital cost could include the original construction cost, expansion cost and financing cost of the following components:

a) Water Rights Cost in Lake Lavon and other Sources

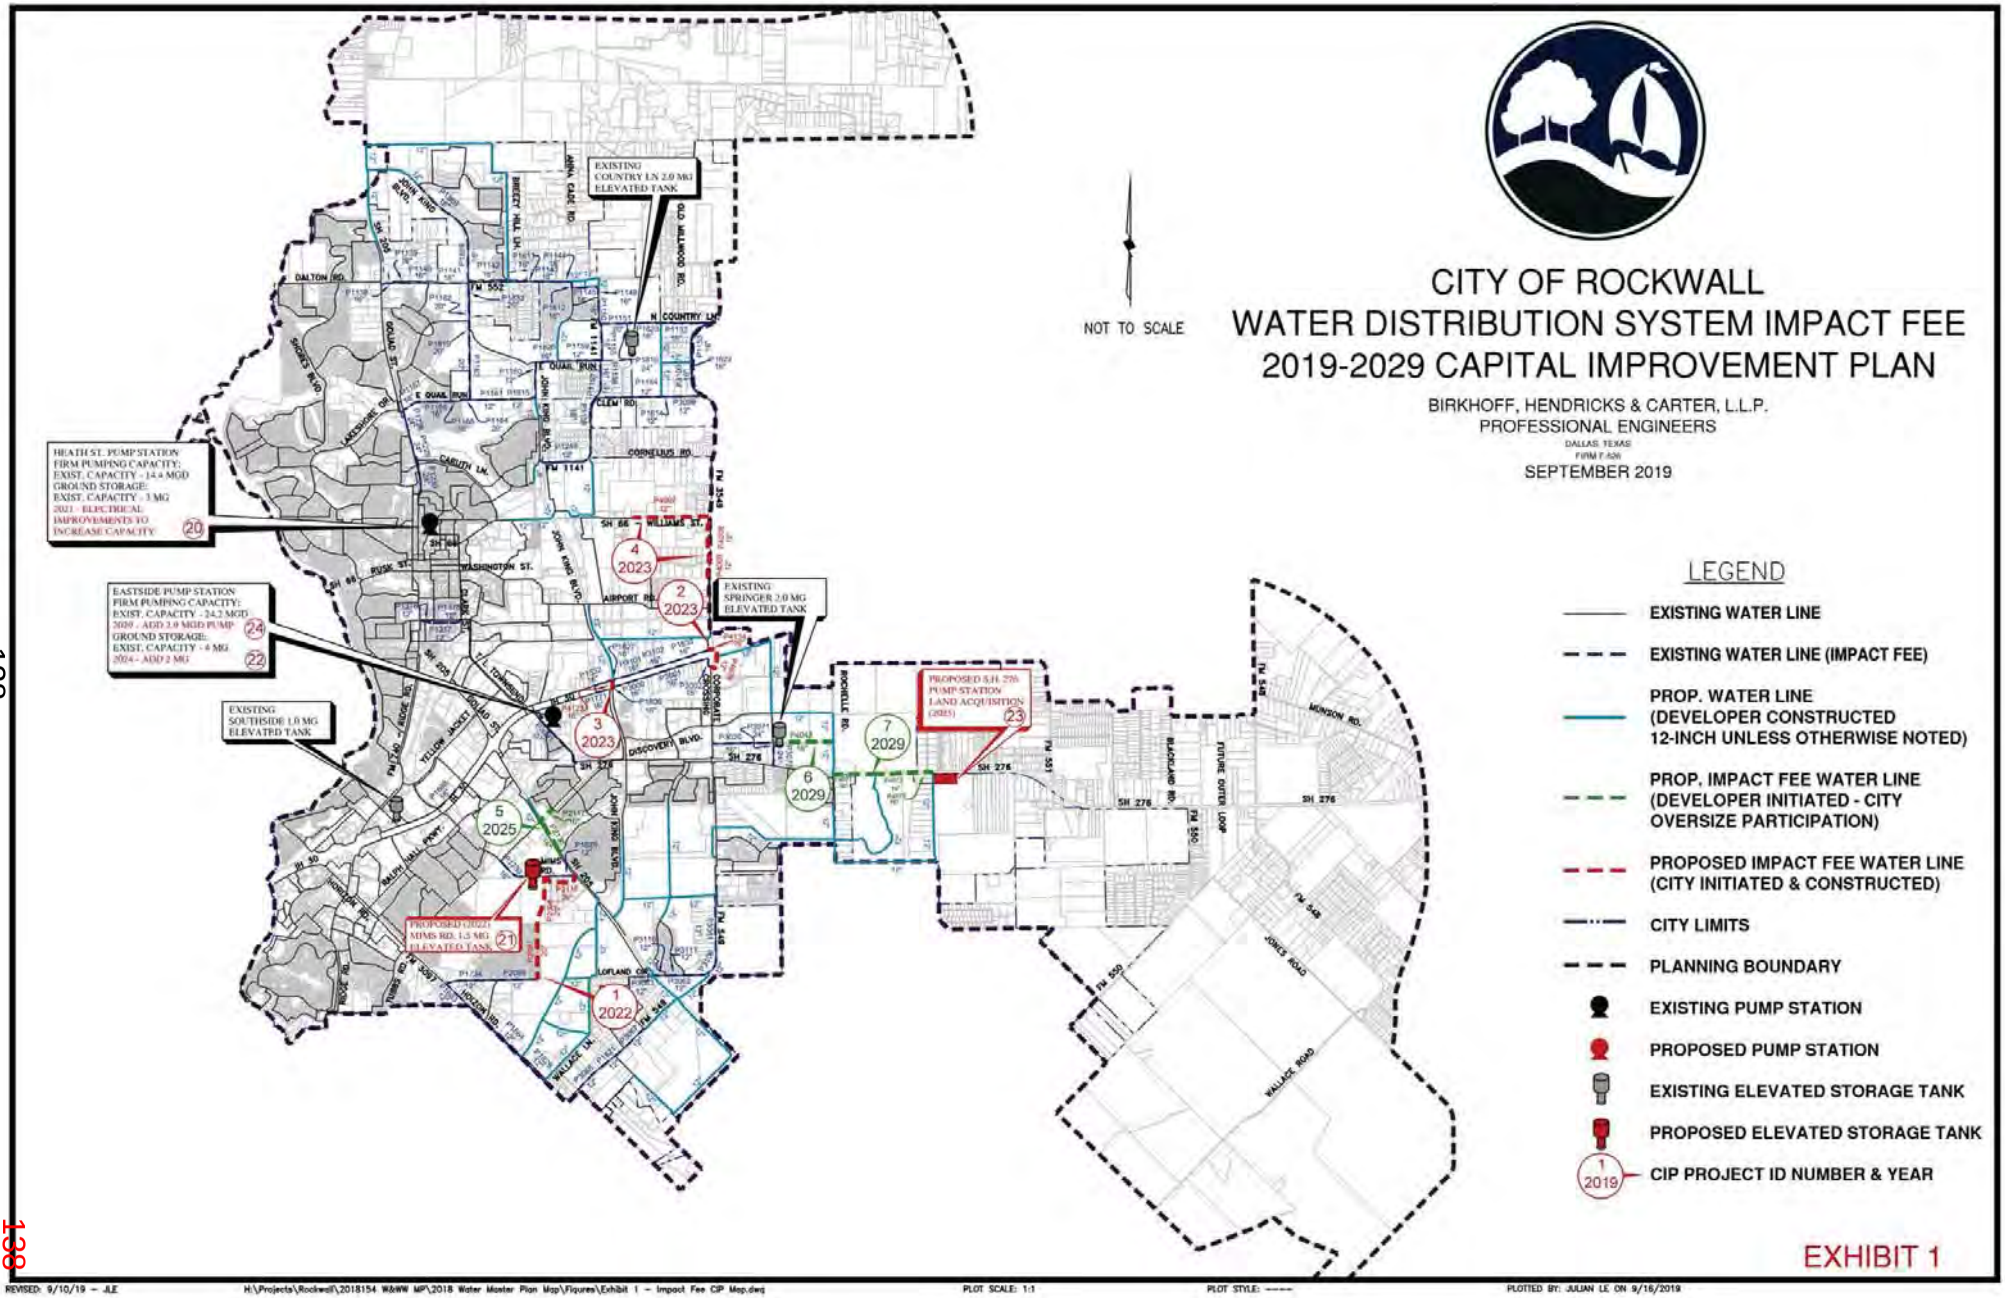
b) Raw Water Intake Structures

c) Raw Water Pump Stations

d) Treatment Plant and Expansion

e) High Service Pump Stations

f) Transmission Lines



g) NTMWD Owned Ground Storage Facilities

NTMWD has indicated that determining Rockwall's portion of cost for these items would not be possible, thus these costs have not been included in this analysis.

4. Water Distribution System Capital Improvement Projects for Impact Fees

In order to meet the demands of the anticipated growth over the next 10-years, as provided in the Land Use Assumptions prepared by the City of Rockwall, certain water distribution system improvements are required. **Exhibit 1** shows the recommended water system improvements and **Table No. 7** itemizes each project and the project cost in 2019 dollars. These recommended improvements form the basis for the water system impact fee calculation.

The capital improvement plan for impact fees provides for system improvements within the defined Service Area Planning Boundary. Most of the capital improvements are within the city limits, as requested by the City due to new State of Texas Annexation Laws.

a) Engineer's Opinion of Construction Cost
b) Professional Services Fees (Survey, Engineering, Testing, Legal)
c) Cost of Easement or Land Acquisitions

(B) Debt Service Based on 20-Year Simple Interest Bonds at 5%

5. Utilized Capacity

Utilized capacity for the water distribution system was calculated based on the water line size required for each model year (2019, 2029 and buildout). Analysis of the water distribution system is based on the maximum daily demand, maximum hourly demand, and the minimum hourly demand. Pump station capacity is generally based on the maximum daily system demand while transmission and distribution facilities are sized based on either the maximum hourly demand or the minimum hourly demand, whichever demand is greater for a particular water line. Often times, the capacity of water lines are determined by the flows generated by the minimum hourly demand. The minimum hourly flows are usually higher in those lines that are used to refill elevated storage. For each line segment in the water distribution model, the maximum buildout flow rate in the line was compared to the flow rate in the same line segment for the 2019 and the 2029 models.

The percent utilized capacity was then calculated for each year based on the buildout capacity. The utilized capacity during the Impact Fee period is the difference between the year 2029 capacity and the year 2019 capacity. **Table No. 8** below summarizes the project cost and utilized capacity cost over the Capital Recovery Period (CRP) of 2019 - 2029 for each element of the Water Distribution System. The utilized capacity for each water distribution facility, both existing and proposed, is presented in detail in Impact Fee Capacity Calculation **Table Nos. 9, 10, 11, 12, 13 and 14.**

Table No. 8

Summary of Eligible Water Distribution Project Cost and Utilized Capacity Cost

Water System Facility	20-Year Project Cost	Utilized Capacity ($) In the CRP
Existing Pump Stations & Storage	$24,635,679	$8,804,864

E. WASTEWATER COLLECTION SYSTEM

Computer models for the years 2019, 2029 and Buildout were prepared by Birkhoff, Hendricks & Carter L.L.P. The models were developed and peak flows calculated from the residential population and non-residential land use projections prepared by the City of Rockwall's Planning Department. Computer models were run to determine peak wet weather flow to insure proper sizing of the collection system.

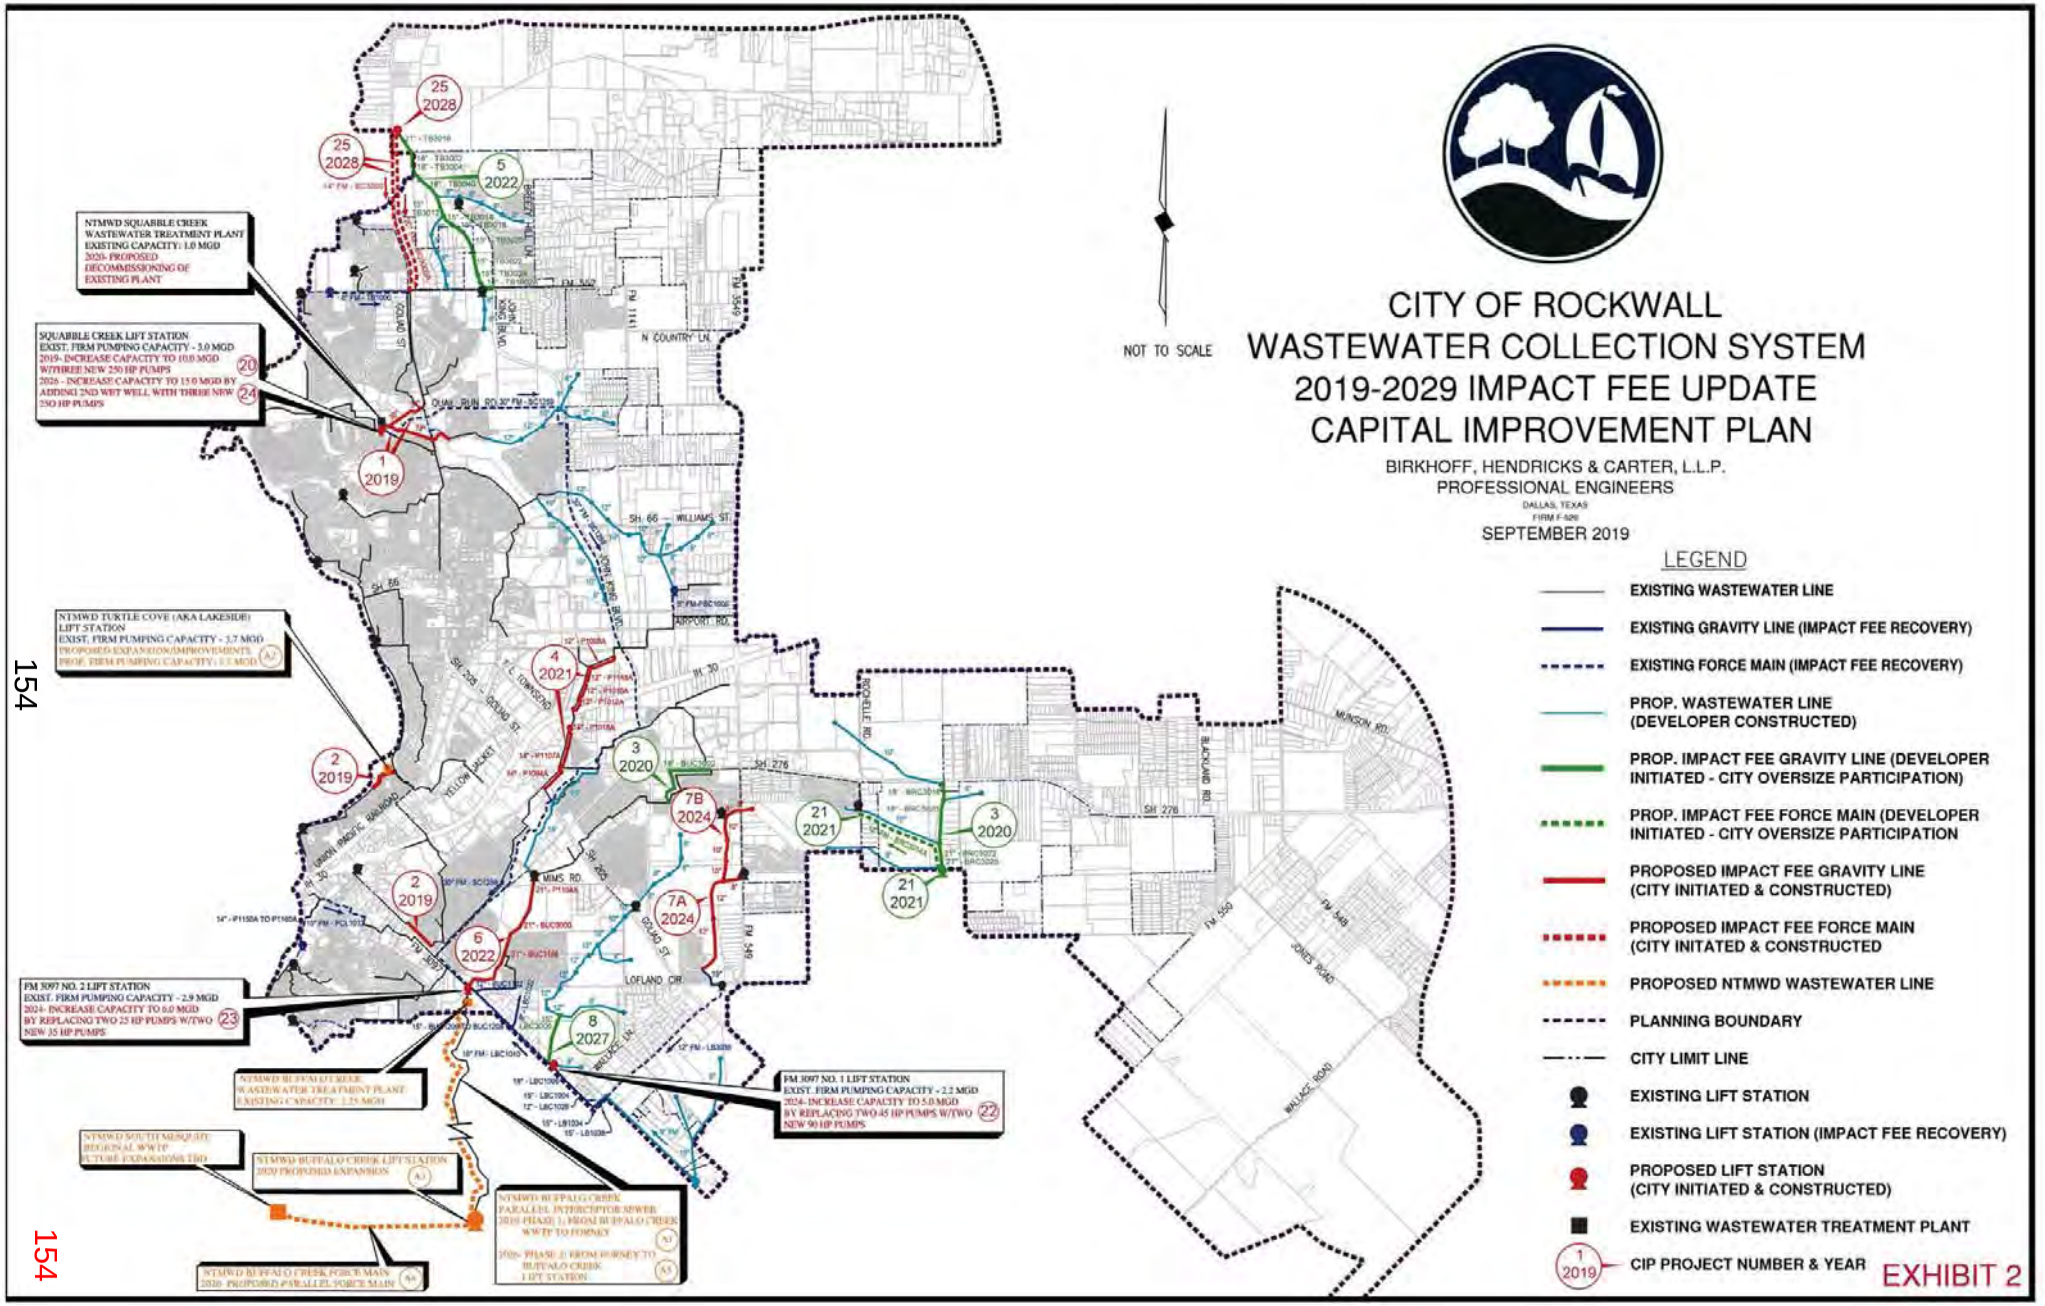
1. Collection Lines

The natural creeks, whose basins will collect wastewater through the installed system of collection lines that flow into the geographic treatment area serviced by the NTMWD.

The wastewater collection system analysis covered all of the drainage basins within the Service Area planning boundary. Each collection system was analyzed for line sizes 12-inches in diameter and larger. Eliminating line sizes smaller than 12-inches in diameter from the study leaves only the interceptor and trunk lines included in the study. The wastewater project costs include necessary appurtenances (manholes, lift stations, aerial crossings and the like), purchase of easements, utility relocation, pavement removal and replacement, and engineering costs. For existing Impact Fee projects, actual costs were utilized where known. Future project cost estimates were based on 2019 average unit cost per linear foot and includes engineering, easements, and construction cost.

All eligible wastewater collection line projects in the Service Area planning boundary were included in the impact fee analysis. Eligible existing and proposed wastewater facilities are shown on **Exhibit 2** and have capacity for future growth.

2. Treatment



The North Texas Municipal Water District (NTMWD) provides the City of Rockwall with the entirety of wastewater treatment. NTMWD owns and operates the Squabble Creek and Buffalo Creek Wastewater Treatment Plants (WWTP). Excess flows above the permit levels of the Squabble Creek and Buffalo Creek WWTP's are conveyed to the NTMWD Buffalo Creek Regional system. Rockwall pays NTMWD for the cost of this service according to the City's percentage of wastewater flow contributions in any given year.

This Impact Fee study includes the cost of NTMWD regional collection and transportation, and facilities located within the City's Service Area planning boundary that were paid for by NTMWD. Existing treatment plant and future treatment plant expansion costs of NTMWD were included in this Impact Fee analysis.

3. Wastewater System Capital Improvement Projects for Impact Fees

The 10-year Wastewater System Capital Improvement Plan for Impact Fees was developed by Birkhoff, Hendricks & Carter L.L.P. **Exhibit 2** shows the recommended system improvements and **Table No. 15** itemizes each project and the project cost. These recommended improvements form the basis for the Wastewater System Impact Fee Calculation.

The capital improvement plan for impact fees provides for system improvements within the defined Service Area Planning Boundary.

PROPOSED WASTEWATER FACILITIES

CIP #	Year	1=City Participation in Cost Oversize 2=City Initiated and Funded (X) = CIP Project ID Number	Project	Capacity (MGD)	Opinion of Project Cost (A)	Debt Service (B)	Total Project Cost
20	2019	2	Squabble Creek Lift Station Improvements - Install Three 250-HP Pumps, Electrical Upgrades & Standby Pump System	10.0 MGD	$ 2,800,769	$ 1,470,404	$ 4,271,173
21	2021	1	Proposed Brushy Creek Lift Station & 12" Force Main	3.3 MGD	$ 1,610,000	$ 845,250	$ 2,455,250
22	2024	2	FM 3097 No. 1 Lift Station Improvements - Replace Two 45-HP Pumps w/Two 90-HP Pumps	5.0 MGD	$ 575,000	$ 301,875	$ 876,875
23	2024	2	FM 3097 No. 2 Lift Station Improvements - Replace Two 25-HP Pumps w/Two 35-HP Pumps	6.0 MGD	$ 862,500	$ 452,813	$ 1,315,313
24	2026	2	Squabble Creek Lift Station Improvements - Add 2nd Wet Well w/Three New 250-HP Pumps	15.0 MGD	$ 4,600,000	$ 2,415,000	$ 7,015,000
25	2028	2	Proposed Bluff Creek Lift Station & Parallel Force Mains (14" & 20")	2.4 MGD	$ 5,865,000	$ 3,079,125	$ 8,944,125
			Subtotal: Proposed Wastewater Facilities		**$ 16,313,269**	**$ 8,564,467**	**$ 24,877,736**
Total City of Rockwall Proposed Wastewater System Improvements					**$ 24,461,929**	**$ 12,842,511**	**$ 37,304,440**

(A) Opinion of Cost includes:

a) Engineer's Opinion of Construction Cost
b) Professional Services Fees (Survey, Engineering, Testing, Legal)
c) Cost of Easement or Land Acquisitions

(B) Debt Service Based on 20-Year Simple Interest Bonds at 5%

Table No. 15 (Continued)

10-Year Wastewater System Capital Improvement Plan for Impact Fees

NTMWD REGIONAL SYSTEM

CIP #	Year	3=Funded by NTMWD, 100% City Responsibility 4=Part of NTMWD Buffalo Interceptor System, assumed 59% City Responsibility 5=Part of NTMWD Regional Systems, assumed 2.915% City Responsibility	NTMWD Wastewater Line & Facility Projects	Size/ Added Capacity	Opinion of Project Cost (A)	Debt Service (B)	Total Project Cost
A1	2019	4	NTMWD Buffalo Creek Parallel Interceptor Sewer - Phase 1: From Buffalo Creek WWTP to Forney	TBD	$ 11,835,394	$ -	$ 11,835,394
A2	2020	3	NTMWD Turtle Cove (a.k.a. Lakeside) Lift Station Expansion/Replacement	+1.6 MGD	$ 4,600,000	$ -	$ 4,600,000
A3	2020	4	NTMWD Buffalo Creek Lift Station Expansion	TBD	$ 17,868,150	$ -	$ 17,868,150
A4	2020	4	NTMWD Buffalo Creek Parallel Force Main	TBD	$ 1,681,500	$ -	$ 1,681,500
A5	2026	4	NTMWD Buffalo Creek Parallel Interceptor - Phase 2: From Forney to Buffalo Creek Lift Station	TBD	$ 7,924,880	$ -	$ 7,924,880
A6	2019-2029	5	10-Year CIP for NTMWD Sewer System (Rockwall Responsibility Only)	N/A	$ 5,435,164	$ -	$ 5,435,164
A7	2019-2029	5	10-Year CIP for NTMWD Regional Wastewater System (Rockwall Responsibility Only)	N/A	$ 11,619,512	$ -	$ 11,619,512
			Total: NTMWD Wastewater System Improvements:		**$ 60,964,600**	**$ -**	**$ 60,964,600**

(A) Opinion of Cost includes:

a) Engineer's Opinion of Construction Cost

b) Professional Services Fees (Survey, Engineering, Testing, Legal)

c) Cost of Easement or Land Acquisitions

Notes: 1. City obligations estimated based on City of Rockwall's contracted proportion or historical usage of NTMWD Regional Systems.

2. 10-Year CIP for NTMWD Regional Systems based on project listings provided for "Summary of Sewer System CIP" and "Summary of Regional Wastewater System CIP", both dated May 11, 2018.

PLANNING EXPENSES

	Project Description	Engineering Services	Opinion of Project Cost (A)
2029	Wastewater Masterplan & Impact Fee Update	$ 59,850	$ 59,850
		Total: Planning Expenses:	**$ 59,850**
Grand Total, City of Rockwall & NTMWD Wastewater System Improvements:			**$ 98,328,890**

4. Utilized Capacity

Utilized capacity for the wastewater collection system was calculated based on land use assumptions prepared by the City of Rockwall. The population and non-residential growth in each wastewater drainage basin was determined utilizing the City's growth projections. These growth rates were utilized to calculate 2019, 2029 and buildout peak design flows.

The percent-utilized capacity was calculated for the design flow of each study year based on the buildout capacity. The utilized capacity during the Impact Fee period is the difference between the year 2019 capacity and the year 2029 capacity. **Table No. 16** below summarizes the project cost and utilized cost over the impact fee period of 2019 – 2029. The utilized capacity for each eligible existing and proposed wastewater collection line is presented in detail in the Impact Fee Capacity Calculation **Table Nos. 17 and 18**. **Table No. 19** summarizes the utilized capacity of lift stations eligible for impact fee recovery. **Table 20** summarizes the utilized capacity of NTMWD facilities eligible for impact fee recovery. **Table 21** includes the summary of utilized capacity allocation between the City of Rockwall and NTMWD.

TABLE NO. 16

Summary of Eligible Wastewater System Project Cost and Utilized Capacity Cost

Wastewater System Facility	20-Year Project Cost	Utilized Capacity ($) in the CRP Period
Existing Wastewater Collection Line	$12,344,474	$3,863,647
Existing Wastewater Facilities	$6,402,514	$629,875
Proposed Wastewater Collection Line	$12,426,705	$9,608,437
Proposed Wastewater Facilities	$24,877,736	$18,193,334
NTMWD Facilities	$60,964,600	$9,627,128
Planning Expenses	$59,850	$59,850
Total:	**$117,075,879**	**$41,982,271**

Proposed NTMWD Facility Total						**$ 60,964,600**		**$ 60,964,600**							**$ 20,229,523**	**$ 29,856,651**	**$ 9,627,128**

Notes: 1. City obligations estimated based on City of Rockwall's historical usage of NTMWD Regional Systems.
2. 10-Year CIP for NTMWD Regional Systems based on project listings provided for "Summary of Sewer System CIP" and "Summary of Regional Wastewater System CIP", both dated May 11, 2018.
3. Funded by NTMWD, 100% City Responsibility
4. Part of NTMWD Buffalo Interceptor System, assumed 59% City Responsibility
5. Part of NTMWD Regional Systems, assumed 2.915% City Responsibility
6. Utilized capacities for NTMWD facilities were determined using the proportion of the existing and projected 2029 population as compared to the build-out population.

TABLE NO. 21

Summary of Utilized Capacity Allocation between City of Rockwall & NTMWD Wastewater System

	CITY OF ROCKWALL Utilized Capacity		NTMWD Utilized Capacity		TOTAL	
	($)	%	($)	%	($)	%
Existing Wastewater System	$ 4,493,522	100.00%	$ -	0.00%	$ 4,493,522	100%
Proposed Wastewater System & Planning Cost	$ 27,861,621	74.32%	$ 9,627,128	25.68%	$ 37,488,749	100%
TOTAL	**$ 32,355,143**	**77.07%**	**$ 9,627,128**	**22.93%**	**$ 41,982,271**	**100%**

F. CALCULATION OF MAXIMUM IMPACT FEES - WATER & WASTEWATER

Chapter 395, of the Local Government Code allows the maximum impact fee to be charged if revenues from Future Ad Valorem Taxes, and water and sewer bills are included as a credit in the analysis. If not, the Act allows the maximum assessable fee to be set at 50% of the calculated maximum fee. The maximum impact fees for the water and wastewater systems are calculated separately by dividing the cost of the capital improvements or facility expansions necessitated and attributable to new development in the Service Area within the ten year period by the number of living units anticipated to be added to City within the ten year period. To simplify collection, we recommend the fee remain fixed throughout the 5-year period, unless changed by Council.

The **Water System** impact fee for a 5/8" meter is calculated as follows:

$$\text{Maximum Impact Fee} = \frac{\text{Eligible Existing Facility Cost} + \text{Eligible Proposed Facility Cost}}{\text{Number of New Living Unit Equivalent over the Next 10-Years}}$$

$$= \frac{\$12,324,530 + \$18,582,427}{9,846} = \frac{\$30,906,957}{9,846}$$

Calculated Water Maximum Impact Fee = $3,139.04 *

* Maximum Allowable Water Impact Fee is 50% of the Calculated Water Maximum Impact Fee

Maximum Assessable Water Impact Fee = $3,139.04 X 50% = $1,569.52

The **Wastewater System** impact fee for a 5/8" water meter is calculated as follows:

$$\text{Maximum Impact Fee} = \frac{\text{Eligible Existing Facility Cost} + \text{Eligible Proposed Facility Cost}}{\text{Number of New Living Unit Equivalent over the Next 10-Years}}$$

$$= \frac{\$4,493,522 + \$37,488,749}{8,710} = \frac{\$41,982,271}{8,710}$$

Calculated Water Maximum Impact Fee = $4,820.01 *

* Maximum Allowable Water Impact Fee is 50% of the Calculated Water Maximum Impact Fee

Maximum Assessable Wastewater Impact Fee = $4,820.01 X 50% = $2,410.00

Table No. 22 summarizes the per service unit equivalent maximum assessable impact fee that can be charged based on the calculated 50% credit above.

TABLE NO. 22

Maximum Assessable Water & Wastewater Impact Fee

Maximum Assessable Water Impact Fee per Living Unit Equivalent: **$1,569.52**

Maximum Assessable Wastewater Impact Fee per Living Unit Equivalent: **$2,410.00**

2019-2029 WATER & WASTEWATER IMPACT FEE UPDATE

BIRKHOFF, HENDRICKS & CARTER, L.L.P.
PROFESSIONAL ENGINEERS
DALLAS, TEXAS

SEPTEMBER 2019

CITY OF ROCKWALL

ORDINANCE NO. 19-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE MUNICIPAL CODE OF ORDINANCES OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING ARTICLE III, *IMPACT FEE REGULATIONS*, OF CHAPTER 38, *SUBDIVISIONS*, FOR THE PURPOSE OF AMENDING THE IMPACT FEES FOR WATER, WASTEWATER, AND ROADWAY FACILITIES BY UPDATING THE LAND USE ASSUMPTIONS AND CAPITAL IMPROVEMENTS PLAN FOR SAID FACILITIES; ESTABLISHING UPDATED SERVICE AREAS FOR SUCH FACILITIES; PROVIDING FOR DEFINITIONS; PROVIDING FOR COLLECTION AND ASSESSMENT; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR REMEDIES; PROVIDING FOR CONFLICTS; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City of Rockwall adopted its impact fee program for roadway impact fees by *Ordinance No. 08-21*, and its impact fee program for water and wastewater impact fees by *Ordinance No. 90-22*; and

WHEREAS, the City of Rockwall has prepared studies updating its land use assumptions (*see Exhibit 'A'*), capital improvements plan (*see Exhibits 'B' & 'C'*) and impact fees for water, wastewater, and roadway facilities and associated service areas and equivalency tables; and

WHEREAS, the City of Rockwall has recalculated the maximum impact fee for water, wastewater, and roadway facilities that may be assessed against new development based on such land use assumptions and capital improvements plan; and

WHEREAS, a public hearing, following written endorsement of the impact fee update study by the Capital Improvements Advisory Committee (CIAC) [*Planning & Zoning Commission*], was held before the City Council and testimony was taken on *October 21, 2019*, to consider proposed amendments to land use assumptions, capital improvements plan and impact fees for water, wastewater, and roadway facilities and associated service areas and equivalency tables, and corresponding changes to rates of assessment and collection for impact fees; and

WHEREAS, the City published notice of such public hearing in a newspaper of general circulation within the City in accordance with the requirements of Chapter 395 of the Texas Local Government Code; and

WHEREAS, the City Council finds that the collection of impact fees for new developments at revised rates in order to fund water, wastewater, and roadway improvements to serve such developments substantially furthers the public health, safety and general welfare; and

WHEREAS, the City Council finds that changes to the land use assumptions, capital improvements plan and impact fee assessment and collection rates are fully warranted, as presented in the impact fee update studies prepared by the City's engineering consultants; and

WHEREAS, the City Council further finds that the collection rates for water, wastewater, and roadway impact fees are reasonable and further the public health, safety and general welfare;

WHEREAS, the City Council further finds that the collection rates for water, wastewater, and roadway facilities are substantially less than the City's actually costs of mitigating the impacts from new development on the City's water, wastewater, and roadway systems;

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

SECTION 1. ***Municipal Code of Ordinances.*** *Sections 38-360 & 38-361* of Chapter 38, *Subdivisions*,

of the City of Rockwall's Municipal Code of Ordinances are hereby repealed in their entirety replaced with the provisions contained in *Exhibit 'A'* of this ordinance; and

SECTION 2. ***Land Use Assumptions.*** The land use assumptions for water, wastewater, and roadway impact fees are hereby updated and amended, as set forth in *Exhibit 'B': Land Use Assumptions for Impact Fees* of this ordinance, which herein after shall be referred to as *Exhibit 'B'*, and incorporated herein by reference; and

SECTION 3. ***Service Areas.*** The service areas for roadway impact fees hereby is updated and amended as depicted in *Figure 3: Roadway Service Area* of *Exhibit 'B'* of this ordinance, and the service areas for water and wastewater impact fees hereby are updated and amended as depicted in *Figure 4: Water/Wastewater Service Area* of *Exhibit 'B'* of this ordinance.

SECTION 4. ***Capital Improvements Plans.*** The capital improvements plan for roadway impact fees hereby is updated and amended as set forth in *Exhibit 'C': 2019 Update of Roadway Impact Fees* of this ordinance -- *which herein after shall be referred to as Exhibit 'C', and incorporated herein by reference* --, and the capital improvements plan for water and wastewater impact fees hereby are updated and amended, as set forth in *Exhibit 'D': 2019-2029 Water & Wastewater Impact Fee Update* of this ordinance -- *which herein after shall be referred to as Exhibit 'D', and incorporated herein by reference* --; and

SECTION 5. ***Land Use Equivalency Tables.*** The land use equivalency table that converts land uses into the total service units for roadway impact fees hereby is updated and amended as set forth in *Table 3: Land-Use Vehicle Mile Equivalency Table* of *Exhibit 'C'* of this ordinance; and, the land use equivalency table that coverts land uses into number of living unit equivalents (*service units*) for water and wastewater impact fees, hereby is updated and amended, as set forth in *Table No. 22: Maximum Assessable Water & Wastewater Impact Fee* of *Exhibit 'D'* of this ordinance.

SECTION 6. ***Impact Fee Assessment.*** The amount of the roadway impact fees to be assessed per roadway service area hereby is established as set forth in *Section 1* of *Section 362.(a)(1)* of *Exhibit 'A'* of this ordinance, and the amount of the water and wastewater impact fees to be assessed per living unit equivalent hereby is established as set forth in *Schedule 1* of *Section 362.(b)(1)* of *Exhibit 'A'* of this ordinance.

SECTION 7. ***Impact Fee Collection.*** The amount of the roadway impact fees to be collected per roadway service area hereby is established as set forth in *Schedule 2* of *Section 362.(a)(2)* of *Exhibit 'A'* of this ordinance, and the water and wastewater impact fees to be collected per living unit equivalent hereby is established as set forth in *Schedule 2* of *Section 362.(b)(2)* of *Exhibit 'A'* of this ordinance.

SECTION 8. ***Ordinances Cumulative.*** All ordinances of the City of Rockwall in conflict with the provisions of this ordinance be, and the same are hereby superseded to the extent of that conflict.

SECTION 9. ***Severability.*** If any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Subdivision Regulations of the City of Rockwall, Texas, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable.

SECTION 10. ***Effective Date.*** This ordinance shall take effect immediately.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF NOVEMBER, 2019.

DRAFT ORDINANCE 10.21.19

Jim Pruitt, *Mayor*

ATTEST:

Kristy Cole, *City Secretary*

APPROVED AS TO FORM:

Frank J. Garza, *City Attorney*

1st Reading: *October 21, 2019*

2nd Reading: *November 4, 2019*

DRAFT ORDINANCE 10.21.2019

SECTION 38-360: LAND USE ASSUMPTIONS REPORT

See *Ordinance No. 19-XX* for the 2019 Land Use Assumptions Report.

SECTION 38-361: SCHEDULES FOR IMPACT FEES

(a) *Roadway Impact Fees.*

(1) *Schedule 1: Roadway Impact Fee Assessment*. The following schedule is for roadway impact fee assessment.

Service Area	Cost Per Service Unit
1	$2,272.00
2	$4,398.00
3	$784.00
4	$2,612.00

(2) *Schedule 1: Roadway Impact Fee Collection*. The following schedule is for roadway impact fee collection.

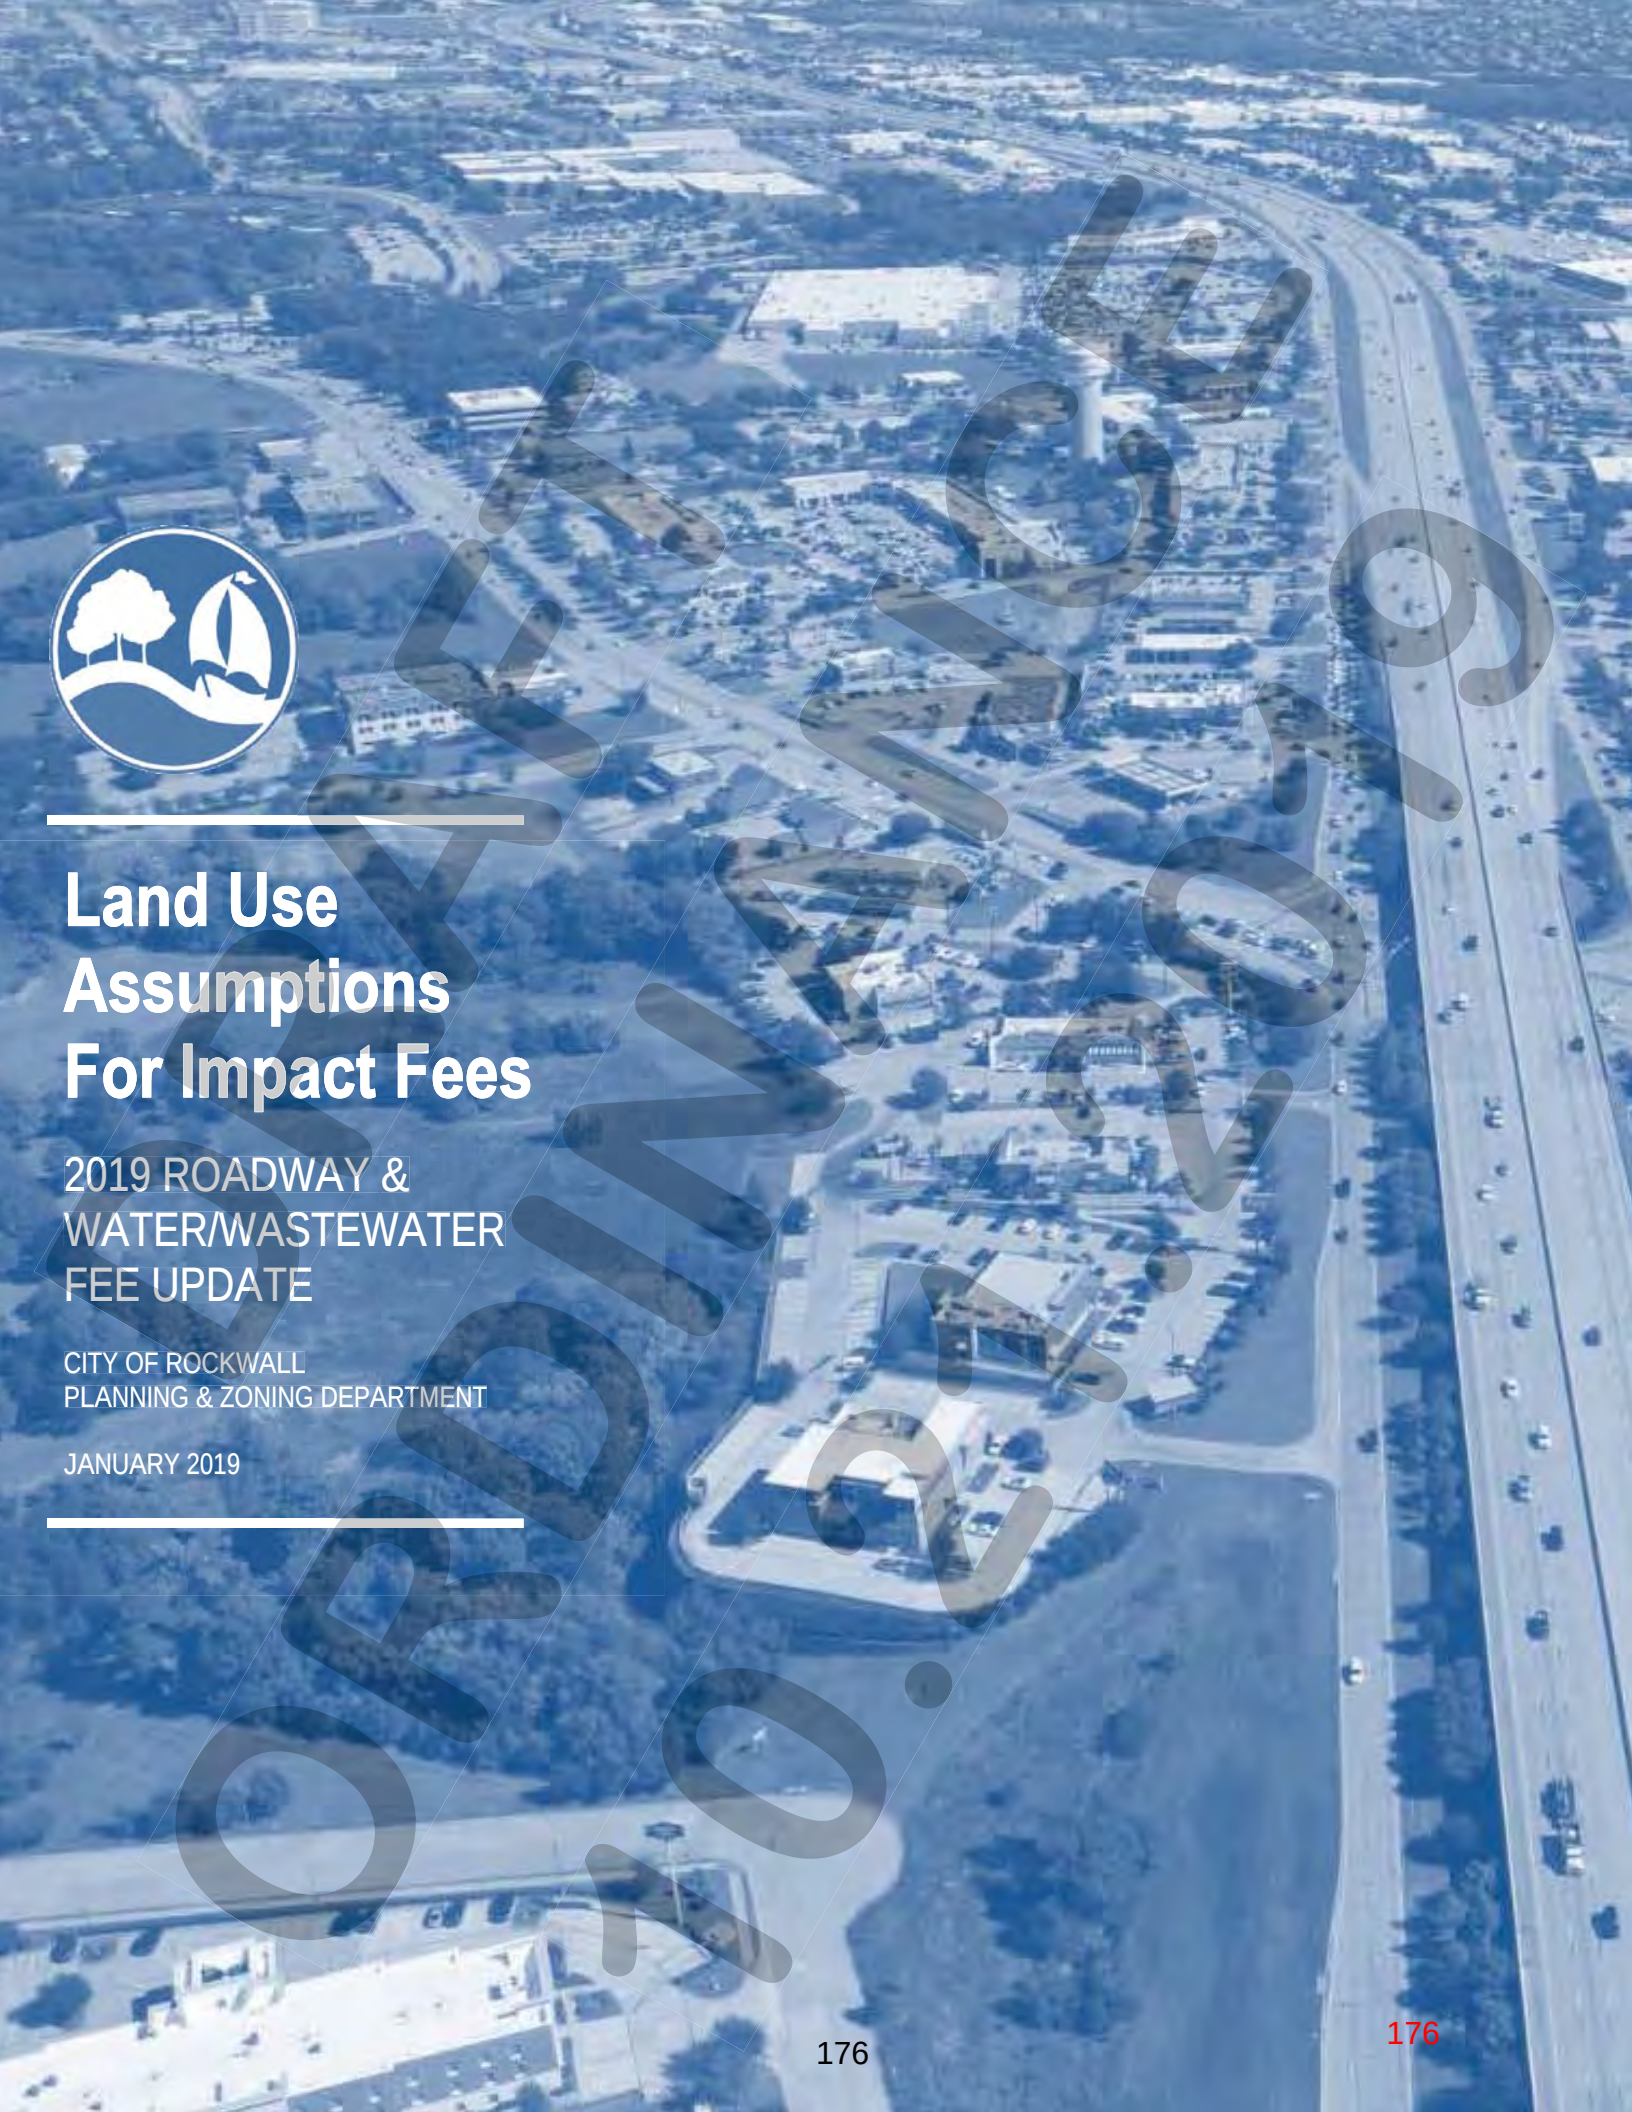
Service Area	Cost Per Service Unit
1	$320.00
2	$320.00
3	$320.00
4	$320.00

(b) *Water & Wastewater Impact Fees.*

(1) *Schedule 1: Maximum Water & Wastewater Impact Fees*. The following schedule is the maximum impact fees per single-family living unit equivalent for water and wastewater facilities. The below impact fees per service unit depicted in each column also apply to new developments that were unplatted and which did not require platting at the time of development within the period listed.

	Land Platted or Replatted between 07/16/1990 & 06/02/2008 [1]	Land Platted or Replatted between 06/02/2008 & 10/20/2014	Land Platted or Replatted between 10/20/2014 & 11/04/2019	Land Platted after 11/04/2019
Water (per SFLUE)	$848.00	$4,229.03	$3,111.05	$3,139.04
Wastewater (per SFLUE)	$3,340.00	$783.49	$2,472.58	$4,820.01

Notes:
[1]: For nonresidential uses, assessment was expressed as SFLUEs per acre: 2.11 SFLUE/acre for water impact fees and 2.17 SFLUE/acre for wastewater impact fees, within the period listed.



(2) *Schedule 2: Impact Fees to be Paid Per Service Unit for Water and Wastewater Facilities.*

	Per Living Unit Equivalent (5/8" Water Meter)
Water Facilities	$1,569.52
Wastewater Facilities	$2,410.00

FORWARD

What are *Impact Fees? Impact Fees* are charges that are imposed by local governments against new development for the purpose of generating revenue for or to recoup the cost of capital facilities (*i.e. infrastructure*) that are necessitated by and attributable to new development. These fees are generally implemented to reduce the economic burden of a municipality and its taxpayers when addressing the need for adequate capital improvements to accommodate growth. Impact fees are typically paid to a municipality in advance of the completion of a particular development project, and are based on a defined methodology and calculation that is derived from the cost of the facility and the scope/impact of the development.

PURPOSE

Chapter 395, *Financing Capital Improvements Required by New Development in Municipalities, Counties, and Certain Other Local Governments*, of the Texas Local Government Code outlines the process for adopting and updating impact fees for political subdivisions. On October 20, 2014, the City of Rockwall adopted roadway and water/wastewater impact fees through *Ordinance No. 14-47*. According to the statutory requirements stipulated by the Texas Local Government Code impact fees are required to be updated at a minimum of every five (5) years [*§395.052*].

In approaching an update to existing impact fees it is important for a city to assess its growth and employment potential, and establish land use assumptions that will guide development for a ten (10) year planning period (*i.e. 2019-2029*) [*§395.001(5)*]. These land use assumptions form the basis for the preparation of the *Impact Fee Capital Improvement Plan* for water, wastewater, and roadway facilities.

In order to determine the need and timing of capital improvements to serve future development, a rational estimate of the future growth of the City is required. The purpose of this report is to formulate growth and employment projections based upon assumptions pertaining to the type, location, quantity and timing of future development within the City, and to establish and document the methodology used for preparing these land use assumptions.

ELEMENTS OF THE LAND USE ASSUMPTIONS REPORT

This report contains the following components:

- *Methodology*: This component of the report contains the systematic and theoretical analysis of the methods and principals used to prepare the projections and land use assumptions contain within this report.
- *Data Collection Zones and Service Areas*: This component provides an explanation of the data collection zones (*i.e. Land Use Districts established in the OURHometown 2040 Comprehensive Plan*) and the Roadway, Water and Wastewater Impact Fee Service Areas for capital facilities.
- *Base Year Data*: This component provides information on population, housing and employment in the City of Rockwall as of January 1, 2019 for each capital facility service area.
- *Ten-Year Growth Projections*: This component provides assumptions with respect to the population, housing and employment data for the City of Rockwall in ten (10) years (*i.e. 2029*). This information is broken out by the capital facility service area.
- *Build Out Analysis:* This component provides projections for population, housing and employment under the assumption that the City and its Extraterritorial Jurisdiction (ETJ) are developed to their carrying capacity, or their *Built Out*.
- *Summary*: This component provides a synopsis of the land use assumptions contained within this report.
- *Appendices:* This component contains information that was important in deriving the population, housing and employment projections for 2019-2029.

DRAFT 10.21.2019

METHODOLOGY

Building off the base year and build out projections contained in the OURHometown Vision 2040 Comprehensive Plan, and the growth assumptions and capital improvement needs estimated to support future growth, it is possible to develop an impact fee structure that fairly allocates improvement cost to growing areas of the City with relation to the growths' potential impact on the entire infrastructure system. The data contained in this report has been formulated using reasonable and generally accepted planning principles.

These land use assumptions and future growth projections take into consideration several factors influencing development patterns, including:

- The character, type, density and quantity of existing development.
- The current zoning patterns as documented on the City's zoning map and the anticipated future land uses as established in the OURHometown Vision 2040 Comprehensive Plan, which contains the City's Future Land Use Plan.
- The availability of land and infrastructure to support future expansion of development.
- The current and historical growth trends of both population and employment within the City.
- The location and configuration of vacant parcels of land and their ability to support development.
- The growth of employment utilizing previously established and generally accepted data from ESRI's ArcGIS *Business Analyst*.
- Local knowledge concerning future development projects or anticipated development within the city.

LAND USE ASSUMPTIONS REPORT METHODOLOGY

The following is the general methodology that was used for the preparation of this report:

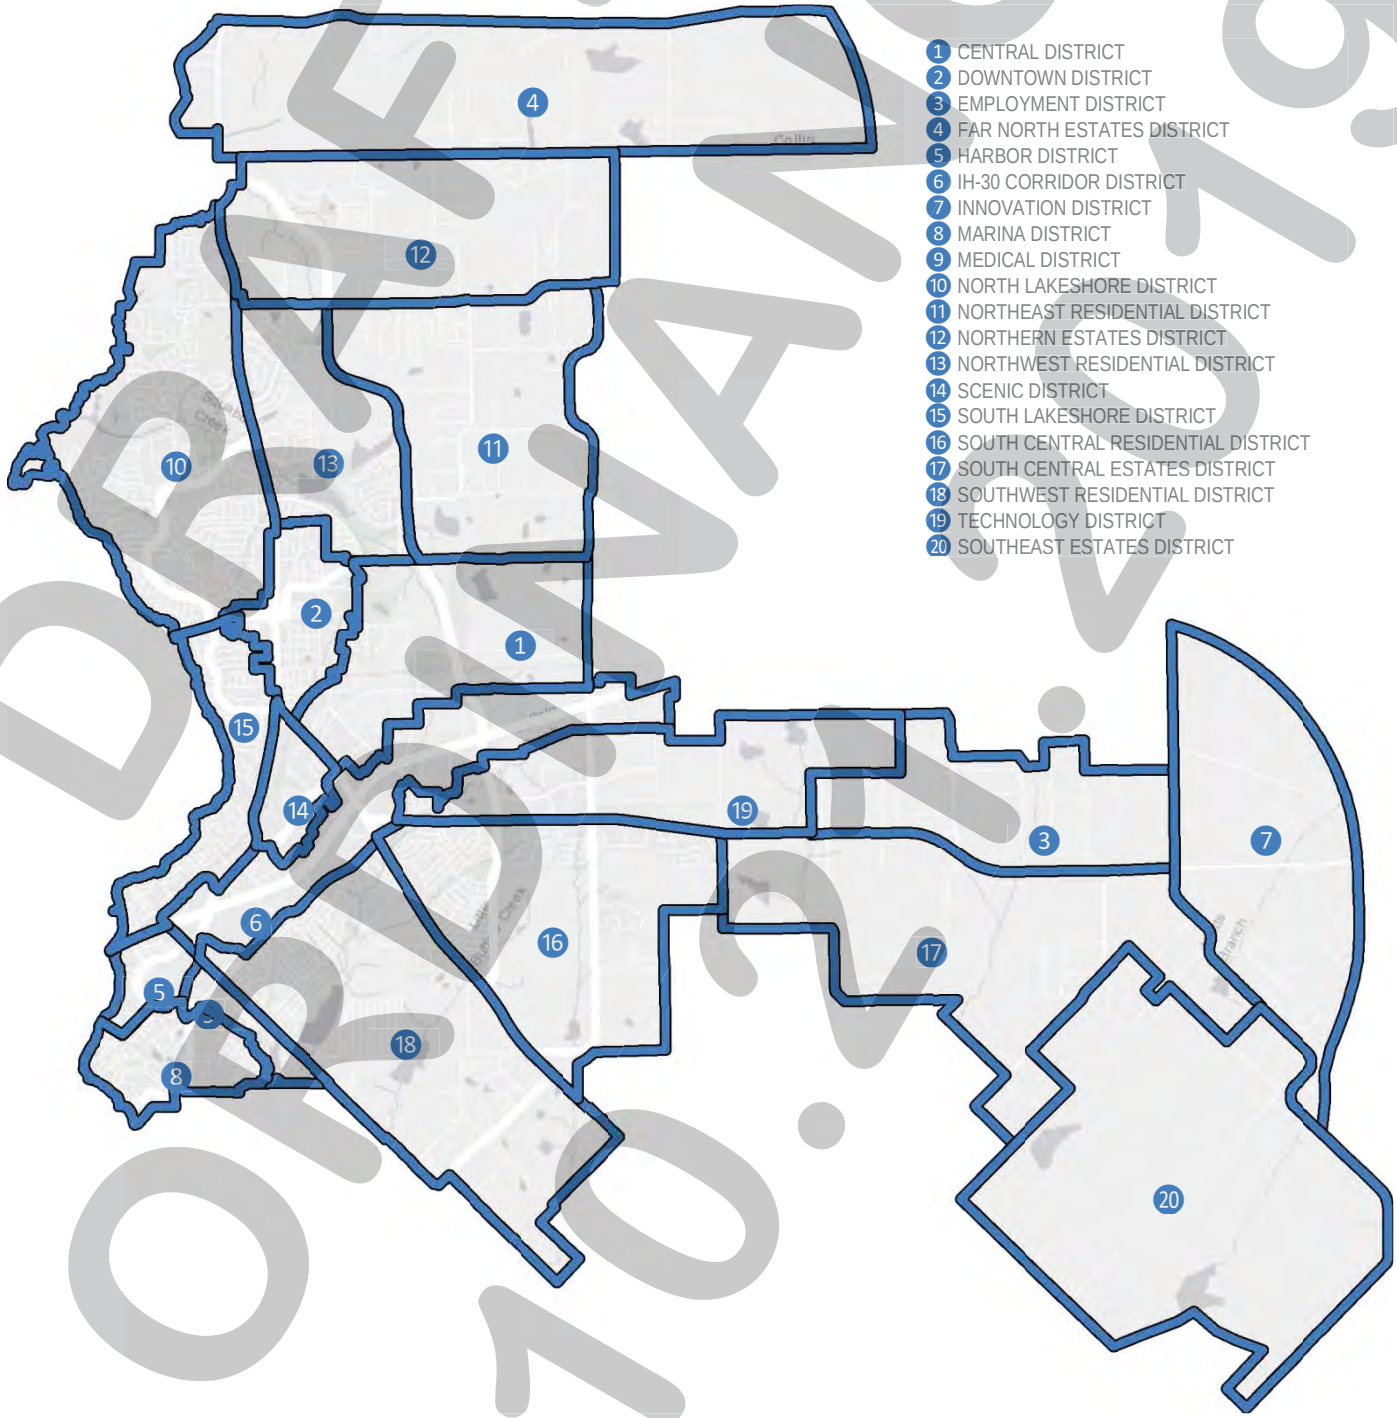
(1) Population, housing and employment data was collected from the United States Census Bureau, North Central Texas Council of Governments (*NCTCOG*), the City of Rockwall's Geographic Information Systems (GIS) Division, the City of Rockwall's Building Inspection Department and other acceptable sources. This information was then analyzed and used to provide base information for all service areas from which projections could be extrapolated [see *Service Areas and Data Collection Zones*].

(2) The base year (*i.e. January 1, 2019*) estimates for housing, population and employment were calculated based on the information collected [see *Base Year Data*].

(3) From the base year and the information gathered from various sources a growth rate was established by examining recent growth trends experienced by the City over the last ten (10) years. This growth rate was then applied to each of the impact fee service areas to project the base year data over the ten (10) year planning period (*i.e. 2019-2029*) [see *Ten Year Growth Assumptions*].

(4) After the projections for housing, population and employment were prepared for the ten (10) year planning period, city staff made adjustments to account for known or anticipated development activity within the planning periods. In making these adjustments city staff took into consideration the recommendations made within the newly adopted OURHometown Vision 2040 Comprehensive Plan, existing public works data, and demographic information provided by the GIS Division and the Building Inspections Department.

(5) Finally, the City's *Build Out* projections for housing, population and employment were calculated by establishing the City's carrying capacity in terms of developable acres and projecting population forward using the previously established Compound Annual Growth Rate (CAGR) to establish a *Build Out Year*. The housing and employment information were then projected to the *Build Out Year* [see *Build Out Projections*].



DRAFT ORDINANCE 10.21.19

DATA COLLECTION ZONES AND SERVICE AREAS

DATA COLLECTION ZONES

The *Data Collection Zones* used for this study were taken from the OURHometown Vision 2040 Comprehensive Plan, which breaks the City down into 20 *Land Use Districts* (*see Figure 1*). These districts were created as a way of breaking down the overall *Future Land Use Plan* to create strategies to help manage growth and land uses in the future. They were also intended to be used as a tool by the City's various boards, commissions and the City Council when contemplating policy changes that could affect certain areas of the City.

FIGURE 1: DATA COLLECTION ZONES
NOTE: The Data Collection Zones are the Land Use Districts contained in the OURHometown Vision 2040 Comprehensive Plan.

DRAFT
ORDINANCE
10.3.19

SERVICE AREAS

The Texas Local Government Code (TLGC) requires that service areas be established within the corporate boundaries of a political subdivision for the purpose of ensuring that capital improvements service the areas generating need. The boundaries for impact fees are defined as follows:

- *Roadway Impact Fees* refers to a service area that is limited to the corporate boundaries of a political subdivision or city, and cannot extend into the Extraterritorial Jurisdiction (ETJ) or for a distance exceeding more than six (6) miles. The City of Rockwall is divided into four (4) service areas that are depicted in *Figure 3*.

- *Water and Wastewater Impact Fees* refers to a service area that includes a city's corporate boundaries and Extraterritorial Jurisdiction (ETJ), which is depicted in *Figure 2*. This service area is depicted in *Figure 4*.

SUMMARY OF DATA

As opposed to the databases calculated in 2007 and 2013 -- *which utilized Traffic Survey Zones (TSZ) as the data collection zones* -- the current database utilizes the following geographic areas:

- *Land Use Districts from the OURHometown Vision 2040 Comprehensive Plan.* These geographic areas better conformed to the City's corporate boundaries, and were drafted with the OURHometown Vision 2040 Comprehensive Plan as the geographic regions intended to be used for all future long-range planning/data collection exercises.

- *Service Areas.* The Service Areas correlate to the Water, Wastewater and Roadway Service Areas identified in *Figures 3 & 4*. As previously stated, the corporate boundaries of the City of Rockwall serve as the limits for the Roadway Service Areas and the Water and Waste Water Service Areas include the corporate boundaries and the Extraterritorial Jurisdiction (ETJ) of the City.

Additionally, all databases and projections utilized the following variables:

- *Households (2019).* The *Residential Address Point* feature class in the City's Geographic Information Systems (GIS) software includes all residential addresses (i.e. *single-family, duplex, multi-family, group home/quarters, etc.*) existing as of January 1, 2019. The total number of residential address points (*i.e. households*) was queried from this layer to establish the base years' numbers.

FIGURE 2: CITY OF ROCKWALL CITY LIMITS AND EXTRATERRITORIAL JURISDICTION (ETJ)
NOTE: The City Limits of Rockwall are depicted in RED. The Extraterritorial Jurisdiction (ETJ) is depicted in BLUE.

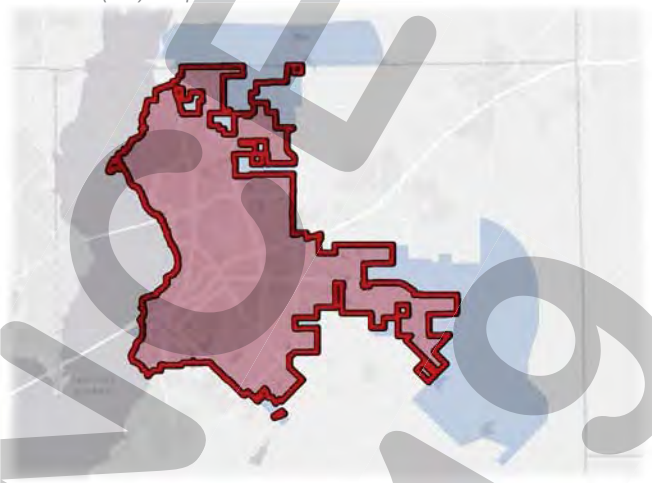


FIGURE 3: ROADWAY SERVICE AREAS
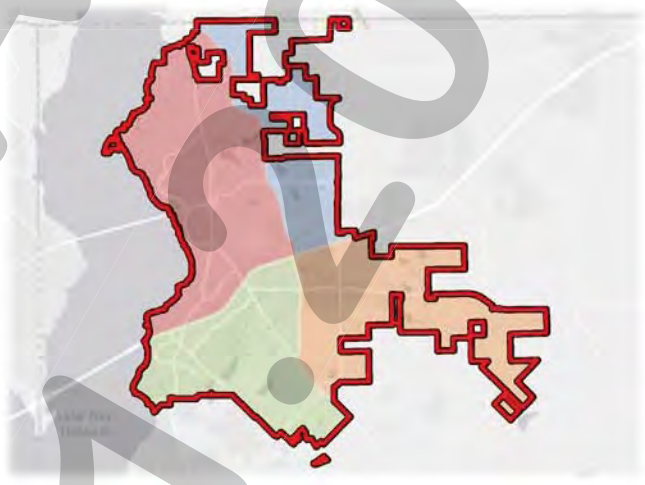
This is the derived service area structure for roadway facilities. These service areas conform to the current city limits of the City of Rockwall and are divided by John King Boulevard and Interstate Highway 30.
NOTE: RED: Service Area 1; BLUE: Service Area 2; GREEN: Service Area 3; YELLOW: Service Area 4



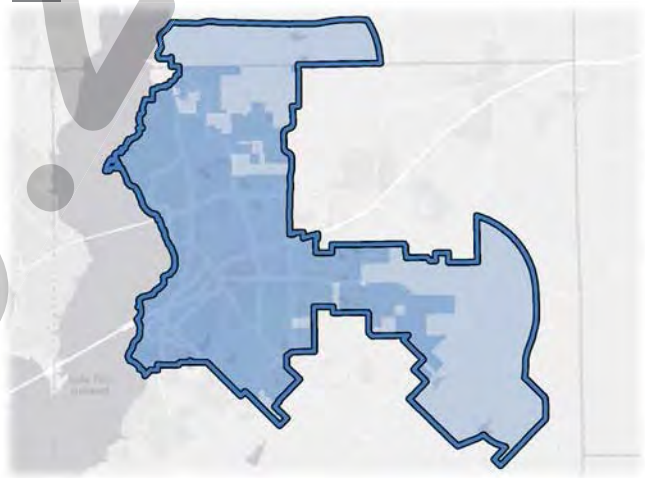


FIGURE 4: WATER/WASTE WATER SERVICE AREAS
This is the derived service area structure for water/wastewater facilities. These service areas conform to the current city limits and Extraterritorial Jurisdiction (ETJ).
NOTE: BLUE: Service Area

DRAFT NOT FOR APPROVAL

- *Households (2029).* This is the projected household data by service area for the year 2029, which represents a ten (10) year growth projection. This information was derived by staff using the stated databases and proper projection techniques.
- *Population (2019)*. This is the existing population for the base year (i.e. *2019*). This information was calculated utilizing the number of households existing as of January 1, 2019, the occupancy, rate and the average household size as established by the United States Census Bureau for each Census Block.
- *Population (2029)*. This is the projected population by service area for the year 2029, which represents a ten (10) year growth projection. This information was derived by staff using the stated databases and proper projection techniques.
- *Employment (2019).* Employment data was aggregated to three (3) employment sectors, which include *Basic*, *Retail* and *Service* as provided by the Business Analyst tool available from ESRI (*the City's provider for its geospatial database software*). These service sectors serve as the basis for non-residential trip generation. The following is a summary of these employment sectors followed by corresponding North American Industry Classification System (NAICS) code:
    - *Basic.* Land use activities that produce goods and services such as those that are exported outside the local economy. These include manufacturing, construction, transportation, wholesale trade, warehousing and other industrial uses (NAICS Code: *#210000 - #422999*).
    - *Retail.* Land use activities that provide for the retail sale of goods that primarily serve households and whose location choice is oriented toward the residential sector. These include uses such as grocery stores, restaurants, etc. (NAICS Code: *#440000 - #454390*).
    - *Service.* Land use activities that provide personal and professional services. These include such uses as financial, insurance, government, and other professional and administrative offices (NAICS Code *#520000 - #928199*).
- *Employment (2029).* The projected employment data was aggregated to three (3) employment sectors, which include *Basic*, *Retail* and *Service* as provided by the Business Analyst tool available from ESRI. These service sectors were then projected by service area to the year 2029, which represents a ten (10) year growth projection. This information was derived by staff using the stated databases and proper projection techniques.

DRAFT ORDINANCE 10.21.2019

BASE YEAR DATA

This section documents the methods used to derive the base year data for the City of Rockwall as of January 1, 2019. This *benchmark* information provides data for the corporate limits and Extraterritorial Jurisdiction (ETJ) of the City, and creates a starting point in which to extrapolate the ten (10) year growth projections that are depicted in the following section (*see Ten-Year Growth Projections*). This information was initially developed with the OURHometown Vision 2040 Comprehensive Plan, but has been updated to include the additional growth that has taken place since the original numbers were derived and the numbers for January 1, 2019.

HOUSEHOLDS

Utilizing the City's Geographic Information System (GIS) software, the residential addresses for each data collection zone (*i.e. Land Use Districts*) were queried. This provided the raw housing data that was then reviewed to remove any vacant lots or anomalies in the data set. Based on this process, the City of Rockwall was shown to have 16,690 households inside the City's corporate limits and 1,700 households in the City's Extraterritorial Jurisdiction (ETJ) as of January 1, 2019. The total number of households is 18,390. Staff should note that this query included all residential housing types (*i.e. multi-family, single-family, and group homes*) from the data sets.

POPULATION

The City of Rockwall generally uses the North Central Texas Council of Government's (NCTCOG) population estimates as the City's official population; however, for the purposes of this planning study it was necessary to calculate a baseline population that was specific to January 1, 2019. This was also necessary in order to estimate the population of the City's Extraterritorial Jurisdiction (ETJ).

To calculate the population as of January 1, 2019, the City's Geographic Information Systems (GIS) Division utilized the following formula to derive the population estimate for each of the data collection zones:

$$\sum_{d=1}^{20} POP = ((a * o) * f)$$

Where:

POP = Population as of January 1, 2019
d = Land Use District
a = Number of Residential Address Points in Each District
o = Occupancy Rate [per U.S. Census Bureau]
f = Density Factor per Census Block [U.S. Census Bureau]

Using this methodology the base year population as of January 1, 2019 was established to be 44,575 residents inside the corporate limits and 5,041 people residing in the Extraterritorial Jurisdiction (ETJ).

EMPLOYMENT

The base employment data was calculated using ArcGIS *Business Analyst*, which is software that provides location-based market information. Utilizing this tool, the City's Geographic Information Systems (GIS) Division was able to query employment and business information relating to each data collection zone (*i.e. Land Use District*). This information was then broken down into one (1) of the three (3) employment categories (*i.e. Basic, Service, or Retail*). Based on the analysis, the City's corporate limits were shown to have a total employment of 24,083 jobs on January 1, 2019. Of the total employment 2,505 jobs were classified as *Basic*, 12,403 jobs were classified as *Service*, and 9,175 jobs were classified as *Retail*. The Extraterritorial Jurisdiction (ETJ) was shown to have an additional 643 jobs, with 535 jobs being classified as *Service* and 108 jobs being classified as *Retail*. In addition, the GIS Division calculated the total non-residential building square footages (*i.e. improvements*) relating to all of these employment types at ~14,444,596 SF inside the City's corporate boundaries and Extraterritorial Jurisdiction (ETJ), with ~3,209,401 SF being classified as *Basic*, ~5,374,068 SF being classified as *Service*, and ~5,861,127 SF being classified as *Retail*. The total non-residential square footage of land area 139,424,433.67 (or 3,200.74-acres), with 11,967,581.81 SF being classified as *Basic*, 58,451,896.18 SF being classified as *Service*, and 69,004,955.68 SF being classified as *Retail*.

DRAFT
ORDINANCE
10.21.19

TEN-YEAR GROWTH PROJECTIONS

GROWTH ASSUMPTIONS

In this planning study, growth is characterized in two (2) forms: 1) Population (*i.e. residential land use*), and 2) Employment (*i.e. non-residential land use*). To calculate a reasonable growth rate for population and employment it was necessary for staff to make a series of assumptions on which to base the ten (10) year growth projections. These assumptions are summarized as follows:

- Future growth identified within this study will conform to the *Future Land Use Plan* depicted in the OURHometown Vision 2040 Comprehensive Plan.
- Infrastructure will continue to be development driven, and the City will continue to be able to finance any other necessary improvements needed to accommodate future growth.
- School facilities will continue to be sufficient to accommodate any increases in population.
- Densities will generally conform to the land classifications and *District Strategies* identified within the OURHometown Vision 2040 Comprehensive Plan, and as depicted on the Future Land Use Map.
- The residential and non-residential carrying capacity for the City or its *build out* will occur simultaneously.

The ten (10) year projections for population are based on the growth rate, which was previously discussed and staff's consideration of past development trends. The ten (10) year projections for employment are based on the overall carrying capacity for non-residential development compared to the current non-residential development in the City. *Tables 1 & 2* detail the ten (10) year projections for households, population and employment for the service areas associated with roadway and water/wastewater impact fees.

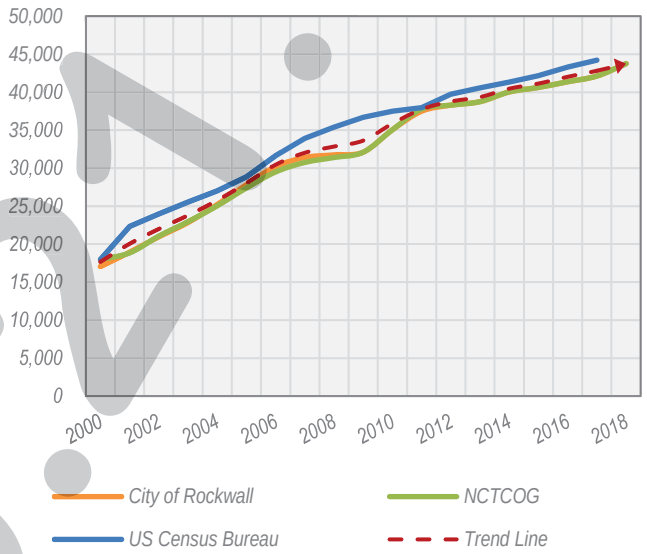

TABLE 1: SUMMARY OF TEN-YEAR GROWTH (ALL ROADWAY SERVICE AREAS)

	2019	2029	Increase
Households	16,690	22,135	24.60%
Population	44,575	59,898	25.58%
Total Employment	24,083	32,366	25.59%
Basic	2,505	3,367	25.60%
Service	12,403	16,669	25.59%
Retail	9,175	12,330	25.59%

TABLE 2: SUMMARY OF TEN-YEAR GROWTH (WATER/WASTE WATER SERVICE AREA)

	2019	2029	Increase
Households	18,390	26,609	30.89%
Population	49,616	73,228	32.24%
Total Employment	25,369	34,065	25.53%
Basic	2,505	3,367	25.60%
Service	13,473	18,082	25.49%
Retail	9,391	12,616	25.56%

FIGURE 5: POPULATION BY AGENCY, 2000-2018

POPULATION GROWTH RATE ANALYSIS

The City of Rockwall has experienced steady residential population growth (*see Figure 5*) over the last 18-years and -- *with the City being ~48.29% vacant and taking into account the City's current availability of water and wastewater infrastructure* -- staff anticipates that the population growth will continue to be fairly steady. It should be noted, however, that the City has seen a slight decline in the population growth percentage over the last five (5) years. From 2000 to 2018, the population growth percentage was 5.08%, but when looking at the last five (5) years this number drops to 1.79% (*see Table 3*).

To calculate the ten (10) year population projections, City staff utilized the *Compound Annual Growth Rate (CAGR)* method. CAGR allows for a general assessment of growth when considering periodic increases and decreases in residential

DRAFT 10.21.19

population growths that coincide with changing economic conditions. The formula for CAGR is as follows:

$$CAGR = \left(\frac{x}{y}\right)^{\left(\frac{1}{n}\right)} - 1$$

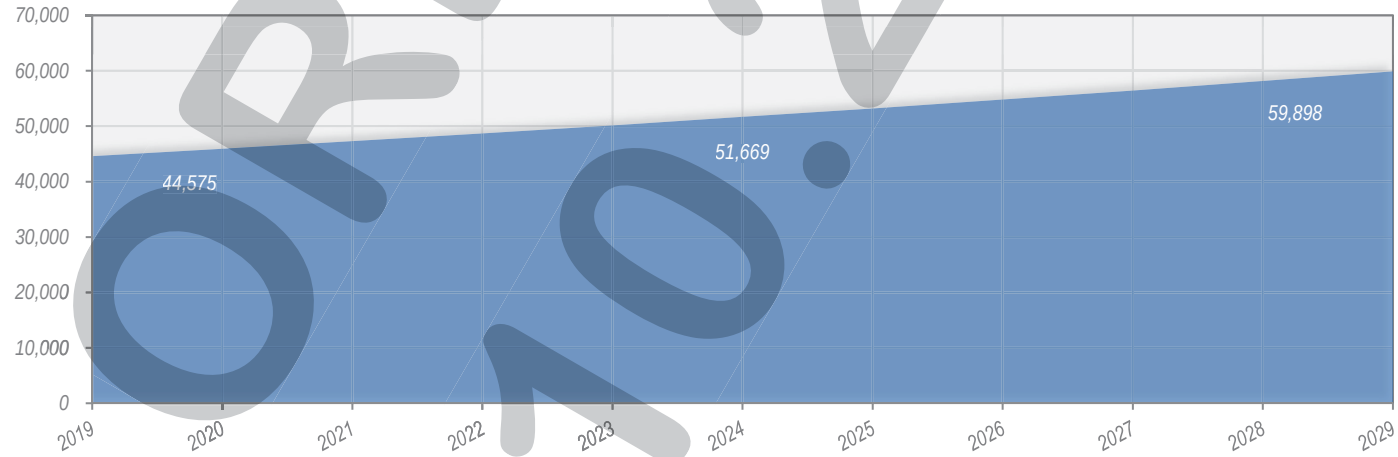
Where:
CAGR = Compound Annual Growth Rate
x = End Value
y = Beginning Value
n = Number of Years

In 2007, a CAGR of four (4) percent was used to calculate the ten (10) year population projections; however, based on the five (5) year annual growth rate and the number depicted in *Table 3*, staff utilized a more conservative three (3) percent annual growth rate. In assessing the past growth rates, staff used several sources including the North Central Texas Council of Governments (NCTCOG), the U.S. Census Bureau, and the City of Rockwall. Based on a three (3) percent CAGR, the following chart shows the anticipated population growth over the next ten (10) years:

TABLE 4: TEN (10) YEAR POPULATION GROWTH
This table shows the projected ten (10) year population growth at a three (3) percent Compound Annual Growth Rate (CAGR).

Year	Population
2019	44,575
2020	45,907
2021	47,284
2022	48,703
2023	50,164
2024	51,669
2025	53,219
2026	54,815
2027	56,460
2028	58,154
2029	59,898

TABLE 3: CITY OF ROCKWALL GROWTH RATES



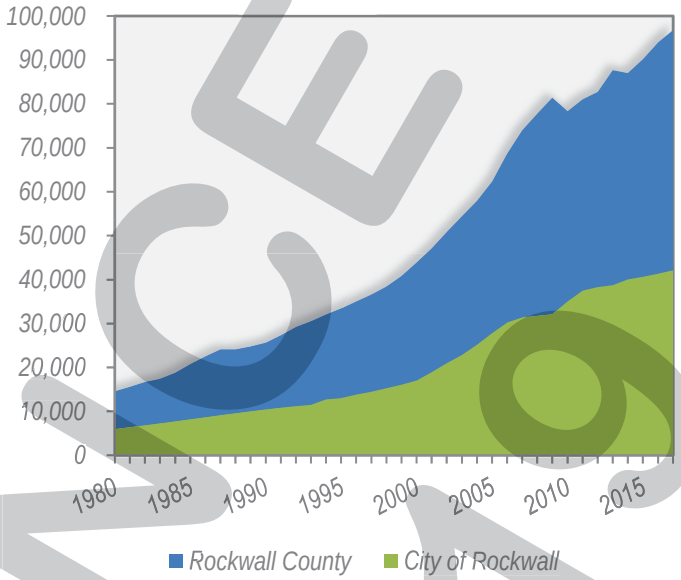
Data Source	Growth Rate
2014 – 2017 US Census	*1.70%*
2010 – 2017 US Census	*2.08%*
2000 – 2017 US Census	*5.13%*
2014 – 2018 Single Family Permits	*1.82%*
2010 – 2018 Single Family Permits	*4.80%*
2000 – 2018 Single Family Permits	*-2.93%*
Future Growth Projection	*3.0%*

PROJECTED POPULATION FOR 2029

Utilizing the three (3) percent Compound Annual Growth Rate (CAGR) established in the previous section, staff projects that the population for the City will be 59,898 in 2029 (*see Table 4 and Figure 6*). This estimate does appear to be consistent with trends that have been observed at the county and regional level (*see Figure 7 for a comparison of the City's population growth versus the County's population growth*). Although, the growth rate has slowed over the last five (5) years this is seen as a temporary trend and not a sign indicative of the City's future growth trend.

In determining this population projection, staff observed how this projection would relate to the City's projected building permits, and the additional population added to the City on an annual basis (*see Table 5*). Taking this into consideration, the estimated average annual building permits anticipated over this time period is approximately 522. This represents a decrease of approximately 121 permits annually from the estimates completed in 2014. This estimate -- *while still likely high in some years due to shifts in market demand* -- is a more conservative estimate than what was used in 2014. It should be noted that this estimate takes into consideration the type of development likely to occur in a given area (*i.e. single-family or multi-family*).

FIGURE 6: TEN (10) YEAR POPULATION GROWTH
This chart shows the projected ten (10) year population growth at a three (3) percent Compound Annual Growth Rate (CAGR).



DRAFT ORDINANCE 10-24-19

TABLE 5: PROJECTED BUILDING PERMITS

Year	Population	New Residents	New Building Permits
2019	44,575	825	294
2020	45,907	1,332	474
2021	47,284	1,377	490

2029	59,898	1,745	621
Average Number of Annual Permits:			522

FIGURE 7: CITY POPULATION VS COUNTY POPULATION, 1980-2017

PROJECTED EMPLOYMENT FOR 2029

Employment data for the year 2029 was calculated by taking the information established in the base year analysis -- *which was obtained through the ArcGIS Business Analyst tool* -- and the corresponding ratio of employment to population, and extrapolating this information out to January 1, 2029. These estimates are summarized in Appendix C, *Employment Breakdown by Roadway Service Area*, and Appendix D, *Employment Breakdown by Water/Wastewater Service Area*.

DRAFT ORDINANCE 10.21.19

BUILD OUT ANALYSIS

A *Build Out Projection* for a city (also referred to as the city's *Carrying Capacity*) is an estimate of the location and density of all potential development, employment and population that a city can support within its future corporate boundaries.

ESTABLISHING HOUSEHOLDS AND POPULATION AT THE CITY'S BUILD OUT

As part of the newly adopted OURHometown Vision 2040 Comprehensive Plan, City staff calculated the number of households and residents at *Build Out*. In establishing the City's households and population at *Build Out* staff made the following assumptions:

- All vacant or undeveloped land within the City's corporate boundaries will develop with the maximum density permitted for the current zoning per the Unified Development Code (UDC).
- All Agricultural (AG) District property is assumed to be vacant or undeveloped and will develop at the maximum density permitted in accordance to the property's' designation on the Future Land Use Map contained in the OURHometown Vision 2040 Comprehensive Plan.
- All property within the Extraterritorial Jurisdiction (ETJ) is assumed to be vacant and will be developed in conformance with the Future Land Use Map at the maximum density permitted by the OURHometown Vision 2040 Comprehensive Plan.
- The City's ETJ is fixed and will not increase in the future.

Taking these assumptions into consideration, staff utilized Geographical Information Systems (GIS) software to calculate all the undeveloped land within the city's corporate boundaries, including the ETJ. Once calculated the acreages were broken down by land use and multiplied by the maximum density permitted for each of the land uses as established within the Unified Development Code (UDC) and the Comprehensive Plan. These totals were then multiplied by the average people per household [*i.e. 2.81 per the US Census Bureau*] to establish the unadjusted population at *Build Out*. Staff then reviewed the projected densities coupled with current land use patterns, and adjusted the numbers to account for known or anticipated development activity. Based on the final *Build Out* population (*i.e. 149,525*), staff projected the population forward using the previously established three (3) percent Compound Annual Growth Rate (CAGR) [*see the Ten-Year Growth Assumptions section*] until the build out population was reached (*see Table 6*). This established a build out year of 2060. The following formula lays out the methodology used to calculate these numbers:

TABLE 6: PROJECTED POPULATION @ 3% COMPOUND ANNUAL GROWTH (CAGR)

Year	Population	New Residents
2018	43,750	1,630
2019	44,570	820
2020	45,907	1,337
2021	47,284	1,377
2022	48,703	1,419
2023	50,164	1,461
2024	51,669	1,505
2025	53,219	1,550
2026	54,815	1,597
2027	56,460	1,644
2028	58,154	1,694
2029	59,898	1,745
2030	61,695	1,797
2031	63,546	1,851
2032	65,453	1,906
2033	67,416	1,964
2034	69,439	2,022
2035	71,522	2,083
2036	73,667	2,146
2037	75,877	2,210
2038	78,154	2,276
2039	80,498	2,345
2040	82,913	2,415
2041	85,401	2,487

2048	105,032	3,059
2049	108,183	3,151
2050	111,429	3,245
2051	114,771	3,343
2052	118,215	3,443
2053	121,761	3,546
2054	125,414	3,653
2055	129,176	3,762
2056	133,052	3,875
2057	137,043	3,992
2058	141,154	4,111
2059	145,389	4,235
2060	149,751	*BO:* 149,525

DRAFT 10.2019

$$BO = P + CP + EP$$

$$CP = (\sum[(LU_1 xD_1) \dots (LU_x xD_x)]\,)x\ AHS$$

$$EP = (LDR\ x\ 2.5) + (MDR\ x\ 3.5) + (HDR\ x\ 5)$$

Where:

BO = Build Out Population
P = Population as of January 1, 2019
CP = Population of Vacant or Undeveloped Land in the City Limits
EP = Population of Vacant or Undeveloped Land in the ETJ
LU = Vacant Available Land Inside the City Limits for a Land Use
D = Maximum Density Permitted for a Land Use per UDC
AHS = Average Household Size [2.81185 per US Census Bureau]
LDR = Low Density Residential Acreage Available in ETJ
MDR = Medium Density Residential Acreage Available in ETJ
HDR = High Density Residential Acreage Available in ETJ

ESTABLISHING EMPLOYMENT AT THE CITY'S BUILD OUT

To calculate employment at *Build Out*, staff utilized the employment numbers calculated with the base year analysis, and -- *based on the estimated current year population* -- calculated ratios between employment and population for the City and its Extraterritorial Jurisdiction (ETJ). These ratios were then used to extrapolate the number of employees for basic, service and retail sectors for the ten (10) year and build out projections.

DRAFT ORDINANCE 10.21.2019

SUMMARY

The following is a summary of staff's findings when preparing the *Land Use Assumption Report* in preparation for the update of the Roadway, Water and Wastewater Impact Fees for 2019:

- The average annual growth rate as calculated by staff is three (3) percent. This growth rate was established based on data from the US Census, North Texas Council of Governments (NCTCOG), the City and County of Rockwall. Using this growth rate staff projected the following population numbers:
  - The population of the City of Rockwall as of January 1, 2019 was 44,691. This is expected to increase by 25.39% in the next ten (10) years to an estimated 59,898 by January 1, 2029.
  - The population for the City of Rockwall and its Extraterritorial Jurisdiction (ETJ) as of January 1, 2019 was 49,743. This is expected to increase by 32.07% in the next ten (10) years to an estimated 73,228 by January 1, 2029.
- The estimated employment for the City of Rockwall as of January 1, 2019 was 24,083 jobs, with another 1,286 jobs existing within its Extraterritorial Jurisdiction (ETJ). Staff estimates this number to climb to 32,366 jobs within the current city limits, and another 1,699 jobs within the current Extraterritorial Jurisdiction (ETJ) by January 1, 2029.
- Staff has established that there are currently 8,204.17 undeveloped acres of land within the city limits. This represents ~48.29% of the current land in the City. Additionally, the City of Rockwall has access to another 14,083.24-acres of land within its current Extraterritorial Jurisdiction (ETJ). Approximately 75.11% (10,577.67-acres) of the land within this area is vacant.
- According to staff's estimate, the City of Rockwall is expected to be built out in the year 2060, with a total population of 149,525.

DRAFT ORDINANCE 10.21.2019

APPENDIX A: SUMMARY OF ROADWAY SERVICE AREAS

SERVICE AREA 1

DRAFT ORDINANCE 10.21.2019

Chapter 1: Introduction

Shrinking funds available for transportation improvements on city thoroughfares limit many cities from upgrading infrastructure to meet increasing travel demands. To meet the needs of new growth, many cities collect "impact fees" from new development to help fund transportation improvements necessitated by such development. What is unique about impact fees is that they often finance roadway improvements that are considered "offsite" to new development. However, when considering the traffic implications created by new development on the roadway system, impact fees provide a means by which infrastructure may keep pace with new development.

Texas initially authorized the use of impact fees with the 1987 legislature. Now codified in Chapter 395 of the Texas Local Government Codes, the legislation authorizes cities to collect fees from new developments to finance new construction or expansion of capital improvements such as water treatment and distribution facilities, storm and wastewater facilities, and transportation facilities. The law stipulates that all fees collected from new development must not exceed the maximum amount calculated by the methodology described therein.

The law also mandates that impact fee systems be updated periodically to ensure that an appropriate cost per service unit is calculated commensurate with an impact fee capital improvements program. The law also mandates that as new transportation improvements are completed, actual costs are inserted into the cost per service unit calculation to reflect a more accurate reading of service area costs as opposed to estimated costs that were established at the onset of the impact fee system. Finally, new capital improvement projects may be added to the program, subject to meeting eligibility requirements.

In September 2001, Chapter 395 was amended which revised called for several technical and administrative changes of impact fee systems including:

- Expansion of the permissible service area structure for roadway facilities from three to six miles;
- A credit for the portion of ad valorem tax revenues generated by improvements over the program period, or the credit equal to 50% of the total projected cost of implementing the capital improvements plan;
- A city's share of costs on the federal or Texas highway system, including matching funds and costs related to utility line relocation, the establishment of curbs and gutters, sidewalks, drainage appurtenances, and rights-of-way;
- Increase in the time period of update of impact fee land use assumptions and capital improvements plan from a three to five-year period;
- Changes in compliance requirements as they relate to annual reporting; and
- Consolidation of the land use assumptions and capital improvements plan hearings.

The implementation and administration of roadway impact fee systems offers several advantages to both a city and new development among which include: 1) a systematic, structured approach to assessment of fees, 2) a clear, equitable distribution of costs associated with the impact of new development, 3) the ability to pool funds for project initiation within a service area, 4) assurance that fees collected will be spent in the area where new development is occurring, 5) up-front knowledge of fees to be imposed, 6)

DRAFT ORDINANCE NO. 20-09

credits for developer participation, and 7) ability for developers to demonstrate that, pursuant to city guidelines, specific unit equivalencies (service unit generation) may be different from those presented in the land use equivalency table.

Recognizing the need to provide adequate facilities and desiring to have equitable funding of transportation improvements, the City of Rockwall embarked in the development of a roadway impact fee system in January 2008 and is updating the program to comply with legislative requirements identified in Chapter 395. The program was updated in 2013. This update amends the roadway capital improvements program based on updated land use assumptions as well as, input by the designated impact fee Capital Improvements Advisory Committee. To assist with this study, the City of Rockwall retained Freese and Nichols, Inc. to update the roadway impact fee system.

Study Methodology

To update the roadway impact fee for the City of Rockwall, a series of work tasks were undertaken and are described below:

1. Meetings were held with the City of Rockwall Staff and the Capital Improvement Advisory Committee to discuss the approach and roadway methodology to be used in the study update.

2. Impact fee service areas were reviewed and amended for any city annexations. Roadway service areas are contained to the current city limits.

3. The vehicle-mile of travel (VMT) during the PM peak hour was retained as the unit of measure for the roadway impact fee system.

4. A roadway conditions inventory was conducted on Rockwall thoroughfares for lane geometries, roadway classifications and segment lengths. New arterial and/or collector streets not previously assessed were added to the program database.

5. The existing roadway network was evaluated based on traffic volume count data collected May 2019, to determine roadway capacity, current utilization, and if any capacity deficiencies exist within each impact fee service area.

6. Projected 10-year growth, in terms of vehicle-miles of demand, was calculated for the service areas based on updated land use assumptions (projections of population and employment growth) prepared by Rockwall City Staff in June 2019 and supplemented with the updated land use equivalency table. The Land Use Assumptions for Impact Fees report was reviewed and approved by the Capital Improvements Advisory Committee (CIAC) prior to development of VMT growth projections and capital improvements plan (CIP) update.

7. The existing impact fee CIP was evaluated with updated traffic count data to ensure that excess capacity remained within each impact fee project for retention in the system. The analysis of the existing impact fee CIP revealed excess capacity and therefore could remain in the impact fee program.

DRAFT ONLY 10.21.2019

8. A roadway impact fee CIP was reviewed and amended relative to projected growth from the updated land use assumptions, analysis of existing system deficiencies, likelihood of project initiation over the short-term, the Rockwall Comprehensive Plan, and input by the CIAC and City Staff. The CIP was amended for John King Boulevard to include portions of the roadway that were previously out of the city and the addition of several new projects to the program.

9. Roadway costs associated with construction, engineering, right-of-way, and project financing for recoupment projects were provided by the City. Cost estimates for new projects were prepared by Freese and Nichols. Costs for study updates are eligible for recovery and were included in the total project cost. Roadway cost data was compiled and distributed by service area.

10. The cost of capacity supplied, cost attributable to new development and the maximum cost per service unit was calculated for each service area. A credit of 50% was applied to the overall cost of the capital improvements program for use in the calculation of the cost per service unit.

11. This report was prepared to document the procedures, findings, and conclusions of the study.

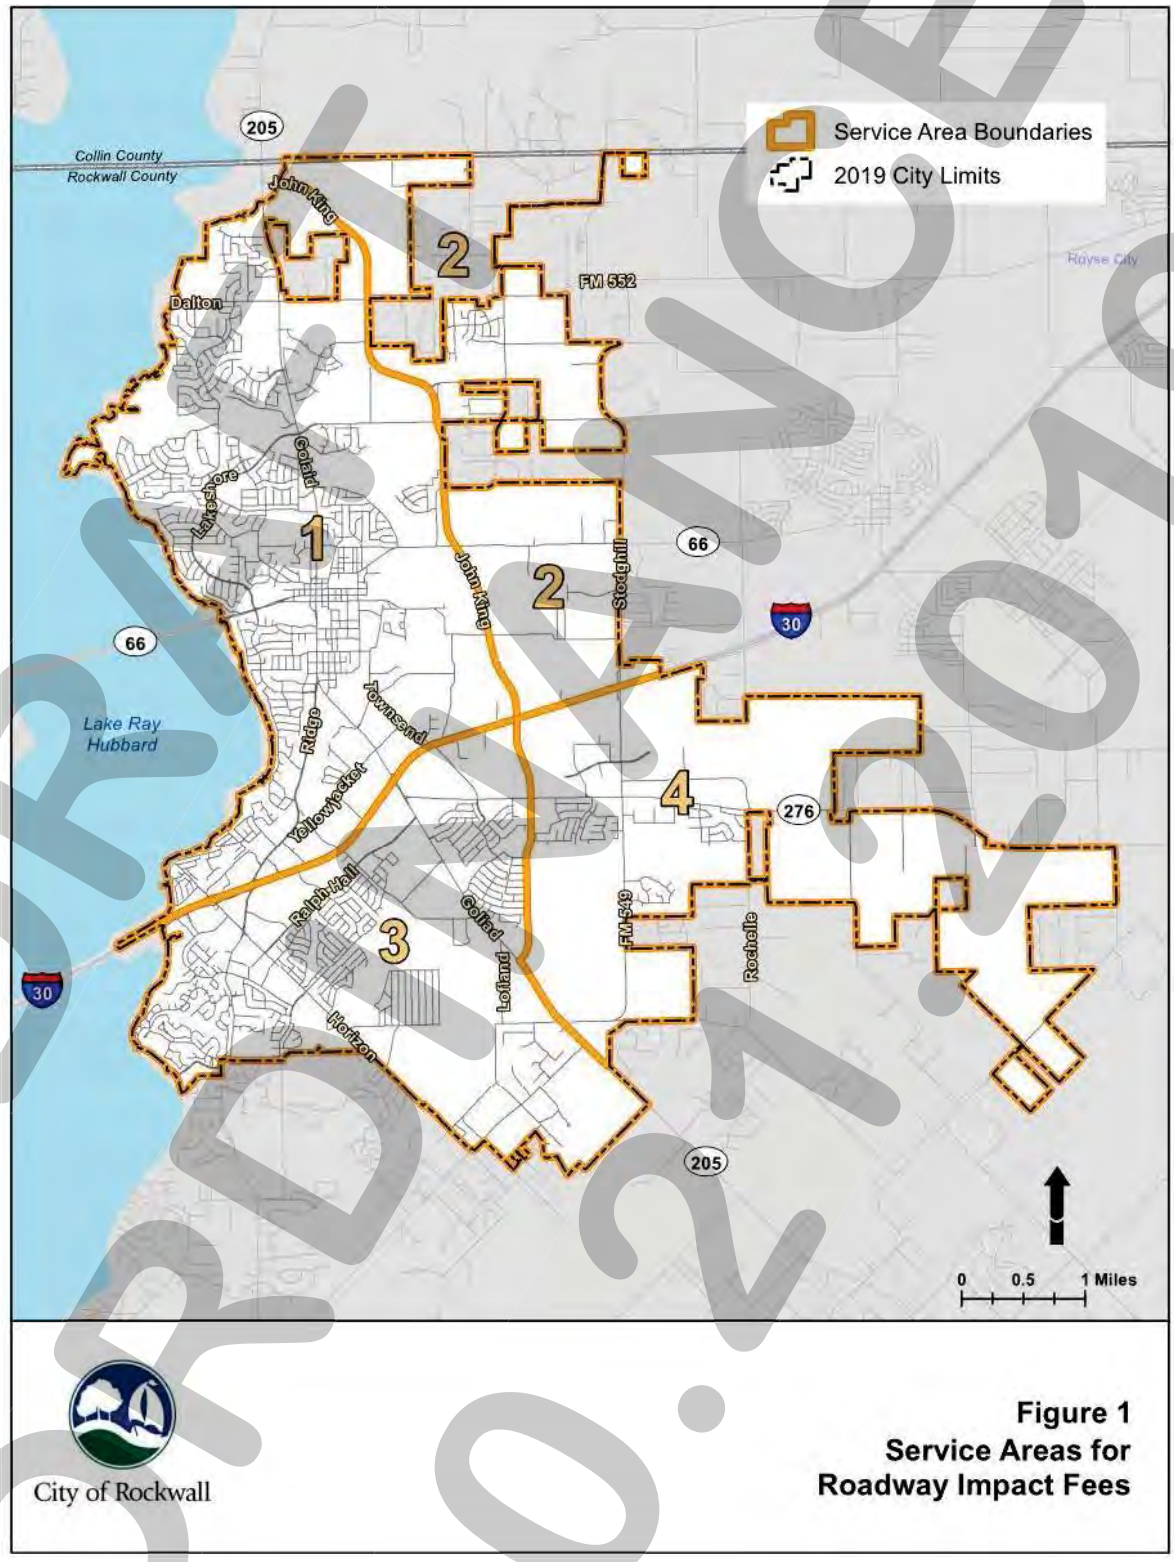
Organization of Report

This report describes the background information, analysis, and findings of the study in six parts, with a chapter devoted to each:

- Roadway Impact Fee Service Areas (Chapter 2)
- Roadway Impact Fee Service Units (Chapter 3)
- Existing Conditions Analysis (Chapter 4)
- Projected Conditions Analysis (Chapter 5)
- Calculation of Impact Fees (Chapter 6)
- Conclusion (Chapter 7)

DRAFT ORDINANCE 10.21.2019

Chapter 2: Roadway Impact Fee Service Areas



Chapter 395 requires that service areas be defined for impact fees to ensure that facility improvements are in proximity to the area that is generating the need. Legislation mandates that roadway service areas be limited to a six-mile maximum and must be located within the current city limits. Roadway service areas are different from other impact fee service areas, which can include the city limits and Extra-Territorial Jurisdiction (ETJ). This is primarily because roadway systems are "open" to both local and regional use as opposed to a defined limit of service that is provided with water and wastewater systems. The result is that new development can only be assessed an impact fee based on the cost of necessary capital improvements within that service area.

The service area structure was developed using the criteria defined in Chapter 395 as it relates to conformance with city limits and the six-mile boundary limits. Other considerations included use of physical or natural features, potential roadway projects and their relation to undeveloped areas of the community, and the planning areas used in long-range plan efforts (for consideration of service area expansion due to possible annexation).

Four service areas were initially developed for the program in 2007 and have been retained in each of the program updates and are generally delineated by John King Boulevard and IH-30. Changes to the service area structure include city annexations on the northern and southern sector of the city. The service area structure for Rockwall is illustrated in **Figure 1**.

DRAFT ORDINANCE 10.21.2019

Figure 1: Service Areas for Roadway Impact Fees

DRAFT NOT FOR ORDINANCE 10.21.2019

Chapter 3: Roadway Impact Fee Service Units

An important aspect of the impact fee system is the determination of the proper service unit to be used to calculate and assess impact fees for new developments. As defined in Chapter 395, "Service unit means a standardized measure of consumption, use, generation, or discharge attributable to an individual unit of development in accordance with generally accepted engineering or planning standards for a particular category of capital improvements or facility expansions."

To determine the roadway impact fee for a development, the service unit must accurately identify the impact that the development will have on the transportation system serving the development. This impact is a combination of the number of new trips generated by the development, the peaking characteristics of the land-use(s) within the development, and the length of each new trip on the transportation system.

The correct service unit must also reflect the supply, which is provided by the roadway system, and the demand placed on the system during the time in which peak, or design, conditions are present on the system. Transportation facilities are designed and constructed to accommodate volumes expected to occur during the peak hours (design hours). These volumes typically occur during the morning (AM) and evening (PM) rush hours as motorists travel to and from work.

The vehicle-mile was retained as the service unit for calculating and assessing transportation impact fees in Rockwall. The vehicle-mile as a service unit establishes a way to relate the intensity of land development to the demand on the system with published trip generation data. It also recognizes state legislation requirements with regards to trip length.

The PM peak hour was retained as the time period for assessing impacts because the greatest demand for roadway capacity occurs during this hour. Roadways are sized to meet this demand, and roadway capacity can more easily be defined on an hourly basis. Traffic volume data collected in May 2019 was used as the basis for the system update.

Service Units

Service units create a link between supply (roadway projects) and demand (development). Both can be expressed as a combination of the number of vehicles traveling during the peak hour and the distance traveled by these vehicles in miles.

Service Unit Supply

For roadway capital projects improvement, the number of service units provided during the peak hour is simply the product of the capacity of the roadway in one hour and the length of the project. For example:

> Given a four-lane divided roadway project with a 600 vehicle per hour per lane capacity and a length of two miles, the number of service units provided is:
>
> *600 vehicles per hour per lane x 4 lanes x 2 miles = 4,800 vehicle-miles*

DRAFT OF ORDINANCE 10-21-2019

Service Unit Demand

The demand placed on the system can be expressed in a similar manner. For example, a development generating 100 vehicle trips in the PM peak hour with an average trip length of two miles would generate:

100 vehicle-trips x 2 miles/trip = 200 vehicle-miles

Likewise, the existing demand placed on the roadway network is calculated in the same manner with a known traffic volume (peak hour roadway tube counts) on a street and a given segment length.

Service Units for New Development

An important objective in the development of the impact fee system is the development of a specific service unit equivalency for individual developments. The vehicle-miles generated by a new development are a function of the trip generation and average trip length characteristics of that development. The following describes the process used to develop the vehicle-equivalency table, which relates land use types and sizes to the resulting vehicle-miles of demand created by that development.

Travel characteristics were reviewed and deemed to be similar in nature to the previous system update, and therefore no changes were made to the resultant land use equivalency table.

Trip Generation

Trip generation information for the PM peak hour was based on data published in the Tenth Edition of *Trip Generation* by the Institute of Transportation Engineers (ITE). *Trip Generation* is a reference publication that contains travel characteristics of over 160 land uses across the nation and is based on empirical data gathered from over 4,600 studies that were reported to the Institute by public agencies, developers and consulting firms. Data contained in this publication is generally accepted for use in studies by transportation engineers throughout the nation. Data not available was drawn from other published information. Rates were established for specific land use types within the broader categories of residential, office, commercial, industrial and institutional land uses. Within each of the land use categories, a rate was also established for any land uses not specifically identified.

Adjustments

The actual "traffic impact" of a specific site for impact fee purposes is based on the amount of traffic added to the street system as a result of new development. To accurately estimate new trips generated, adjustments must be made to trip generation rates and equations to account for pass-by and diverted trips. The added traffic is adjusted so that each development is assigned only for a portion of trips associated with a specific development and thus reducing the possibility of over-counting by counting only primary trips generated. Trip generation rates were reduced by percentages presented in **Table 1** to isolate the primary trip purpose.

Pass-by trips are those trips that are already on a route for a different purpose and simply stop at a development on that route. For example, a stop at a convenience store on the way home from the office is a pass-by trip for the convenience store. A pass-by trip does not create an additional burden on the street system and therefore should not be counted in the assessment of impact fees of a convenience store.

DRAFT ORDINANCE 10-21-19

A diverted trip is a similar situation, except that a diversion is made from the regular route to make an interim stop. For example, a trip from work to home using Ridge Road (from IH-30) would be a diverted trip if the travel path were changed Yellow Jacket and Goliad for the purpose of stopping at a retail site. On a system-wide basis, this trip places a slightly additional burden on the street system but in many cases, this burden is minimal.

Table 1 contains the documented estimates of trip rate adjustments used in determining the appropriate rate to use in the impact fee calculation process. Adjustments were based on studies documented in the ITE trip generation manual.

The resulting recommended trip rates are illustrated as part of Table 3 Land Use/Vehicle Mile Equivalency Table illustrated later in this chapter. Rates were developed in lieu of equations to simplify the assessment of impact fees by the City and likewise, the estimation of impact fees by persons who may be required to pay an impact fee in conjunction with a development project.

A local study may also be conducted to confirm rates in *Trip Generation* or change rates to reflect local conditions. In such cases, a minimum of three sites should be counted. Selected sites should be isolated in nature with driveways that specifically serve the development and not other land uses. The results should be plotted on the scatter diagram of the selected land use contained in *Trip Generation* for comparison purposes. It is recommended that no change be approved unless the results show a variation of at least fifteen percent across the range of sample sizes surveyed. *Trip Generation* was used as the primary source of information for this study.

Trip Length

Trip lengths (in miles) are used in conjunction with site trip generation to estimate vehicle-miles of travel. Trip length data was based on information generated in the 1995 North Central Texas Council of Governments (NCTCOG) Workplace Survey and the National Workplace Survey. These travel characteristics were applied to Rockwall to determine average trips lengths for common land use types.

Table 2 summarizes the derived average trip lengths for major land use categories. These trip lengths represent the average distance that a vehicle will travel between an origin and destination of which either the origin or destination contains the land-use category identified below. Data compiled by the Workplace Survey represents the best available information on trip lengths for this area.

DRAFT ORDINANCE 10.21.2019

Adjustments

The assessment of an individual development's impact fee is based on the premise that each vehicle-trip has an origin and a destination and that the development end should pay for one-half of the cost necessary to complete each trip. Thus, the development is charged only for a portion of the vehicle-trip associated with that development.

To prevent double charging, and to fairly attribute the demand placed on the system to each trip end location, the trip length was adjusted to remove travel on the federal roadway system and then divided by two to reflect half of the vehicle trip to and from the development. Data from the NCTCOG travel forecast model was used to compare vehicle-miles of travel (VMT) by roadway functional class. Data revealed 43% of travel to use the federal system and thus the average trip length was reduced by this percentage to reflect localized travel on city streets (reflected in column 2). The average trip length, localized trip length, and adjustment for one-half trip length are illustrated in column 3 of Table 2. Where specific land uses were considered to exhibit different trip length characteristics than those identified in Table 3, engineering judgment was used to estimate the average trip length. Finally, as the service area structure was based on a six-mile boundary, those land uses that exhibited trip lengths greater than six miles were limited to this threshold.

Service Unit Equivalency Table

The result of combining the trip generation and trip length information is an equivalency table which establishes the service unit rate for various land uses. These service unit rates are based on an appropriate development unit for each land use. For example, a dwelling unit is the basis for residential uses, while 1,000 gross square feet of floor area is the basis for office, commercial, and retail uses. Other less common land uses are based on appropriate independent variables.

Separate rates have been established for specific land uses within the broader categories of residential, commercial, industrial and institutional to reflect the differences between land uses within the categories. However, even with these specific land use types, information is not available for every conceivable land use, so limitations do exist.

The updated equivalency table is illustrated in **Table 3**. Table 3 is reflective of adjusted trip rates (detailed in Table 1) and trip lengths (Table 2).

DRAFT ORDINANCE 10.21.19

Chapter 4: Existing Conditions Analysis

Chapter 395 identifies specific requirements necessary in the capital improvements plan for impact fees. The existing conditions, including defining the existing roadway system, and analysis of the total capacity, the level of current usage, and commitments for usage of the existing roadway, are required as part of the capital improvements plan. This chapter discusses the existing conditions.

Existing Conditions

An inventory of the collector and arterial roadway facilities within the city limits was conducted to determine existing conditions throughout Rockwall. This analysis determines the capacity provided by the existing roadway system, the demand currently placed on the system, and the potential existence of deficiencies on the system. Updated data for the inventory was obtained from traffic volume counts conducted by the City and field reconnaissance of current roadway sections.

The roadways were divided into segments based on volume changes, major intersections, service area boundaries, and capacity changes. For each roadway segment, the length, number of lanes, cross-section, and PM peak hour volume data were obtained. Lane capacities were assigned to each segment based on functional street classification, associated roadway lane capacities and the present number of lanes. Lane capacities used in the analysis are shown in **Table 4.**

Table 4: Roadway Facility Vehicle-Mile Lane Capacities

Roadway Facility	Designation	Hourly Vehicle-Mile Capacity per Lane Mile of Roadway Facility
Divided Arterial	DA	600
Divided Collector	DC	500
Undivided Arterial	UA	575
Undivided Collector	UC	475
Special Arterial (with two-way left turn lane)	SA	450

Roadway hourly volume capacities are based on information reflecting Level-of-Service "C" operation, as identified in the transportation element of the Rockwall Comprehensive Plan.

Existing Volumes

Existing directional PM peak hour volumes were obtained from automated traffic counts conducted in May 2019 by the City. Automated traffic counts at 25 separate locations were collected on major roadways (as identified in the Thoroughfare Plan as arterial or collector status) throughout Rockwall. To minimize the total number of counts, data was collected at locations where traffic volumes would typify link volumes on the major segments within the immediate area. For segments not counted, existing volumes were used, or estimates were developed based on data from adjoining roadway counts.

Data was compiled for roadway segments throughout the city and entered into the database for use in calculations. A summary of volumes by roadway segment is included in **Appendix D** as part of the existing capital improvements database.

DRAFT OF ORDINANCE 10.21.2019

Vehicle-Miles of Existing Capacity Supply

An analysis of the total capacity for each service area was performed. For each roadway segment, the existing vehicle-miles of capacity supplied were calculated using the following equation:

Vehicle-Miles of Capacity = Link capacity per peak hour per lane x Number of lanes x Length of segment (miles)

A summary of the current capacity available on the roadway system is shown in **Table 5**. It is important to note that the roadway capacity depicted in Table 5 is system-wide for most major roadways and not restricted to those roadways proposed in the impact fee capital improvements plan. Directional calculations of capacity were performed separately. For a detailed listing of vehicle-miles of capacity by roadway segment, refer to Appendix D.

Vehicle-Miles of Existing Demand

The level of current usage in terms of vehicle-miles was calculated for each roadway segment. The vehicle-miles of existing demand were calculated by the following equation:

Vehicle-Miles of Demand = PM peak hour volume x Length of segment (miles)

Table 5 also lists total vehicle-miles of demand. Appendix D includes a detailed listing of vehicle-miles of demand by directional roadway segment.

Vehicle-Miles of Existing Excess Capacity and Deficiencies

For each roadway segment, the existing vehicle-miles of excess capacity and/or deficiencies were calculated. Each direction was evaluated to determine if vehicle demands exceeded the available capacity. If demand exceeded capacity in one or both directions, the deficiency is deducted from the supply associated with the impact fee capital improvement plan. A summary of peak hour excess capacity and deficiencies are shown in **Table 6**. A detailed listing of the existing excess capacity and deficiencies by roadway segment is also located in Appendix D.

DRAFT ORDINANCE 10.21.2019

Table 5: Peak Hour Vehicle-Miles of Existing Capacity and Demand

4	3,666	808
Total	31,085	2,871

DRAFT ORDINANCE 10.21.2019

Chapter 5: Projected Conditions Analysis

Chapter 395 requires a description of all capital improvements or facility expansions and their costs necessitated by and attributable to new development within the service area. This chapter describes the projected growth, vehicle-miles of new demand, capital improvements program, vehicle-miles of new capacity supplied, and costs of the roadway improvements.

Projected Growth

The projected growth for each transportation service area is represented by the increase in the number of new vehicle-miles generated over the 10-year planning period. The basis for the calculation of new demand is the population and employment projections that were prepared as part of a technical report entitled Land Use Assumptions for Roadway Impact Fees by the Rockwall Planning Department in June 2019. Estimates of population and employment were prepared for the years 2019 and 2029.

Population data was provided in terms of the number of dwelling units, households and persons. Employment data is aggregated into three sectors of employees: basic, service and retail. These employment sectors serve as the typical components used in the traffic forecast modeling process. The employment grouping also correlate with the North American Industrial Classification (NAIC) system and include: basic employment (NAIC 210000-422999) generally encompasses the industrial and manufacturing uses; service employment (NAIC 520000-928199) encompasses government, office and professional uses; and retail employment (NAIC 440000-454390) generally includes commercial and retail use.

Projected Vehicle-Miles of New Demand

Projected vehicle-miles of demand were calculated based on the growth expected to occur during the 10-year planning period and the service unit generation for each of the population and employment data components (basic, service and retail). Separate calculations were performed for each data component and were then aggregated for the service area. Vehicle-miles of demand for population growth were based on dwelling units, and vehicle-miles of demand for employment were based on the number of employees and estimates of square footage per employee.

Land Use Equivalency for 10-Year Demand Estimate

Information extracted from the NCTCOG regional travel demand model, used for development of the Mobility 2040, provides information on average trip lengths for the residential and the three types of land uses. These are : 3.12 vehicle-miles per dwelling unit for residential, 1.77 vehicle-miles per thousand square feet for Basic and Retail employment, and 3.92 vehicle-miles per thousand square feet for Service employment.

Table 7 lists the projected vehicle-miles of demand over the 10-year planning period for Rockwall. **Appendix C** contains the projected demand calculation worksheet.

Capital Improvements Program

Evaluation of Current Impact Fee CIP

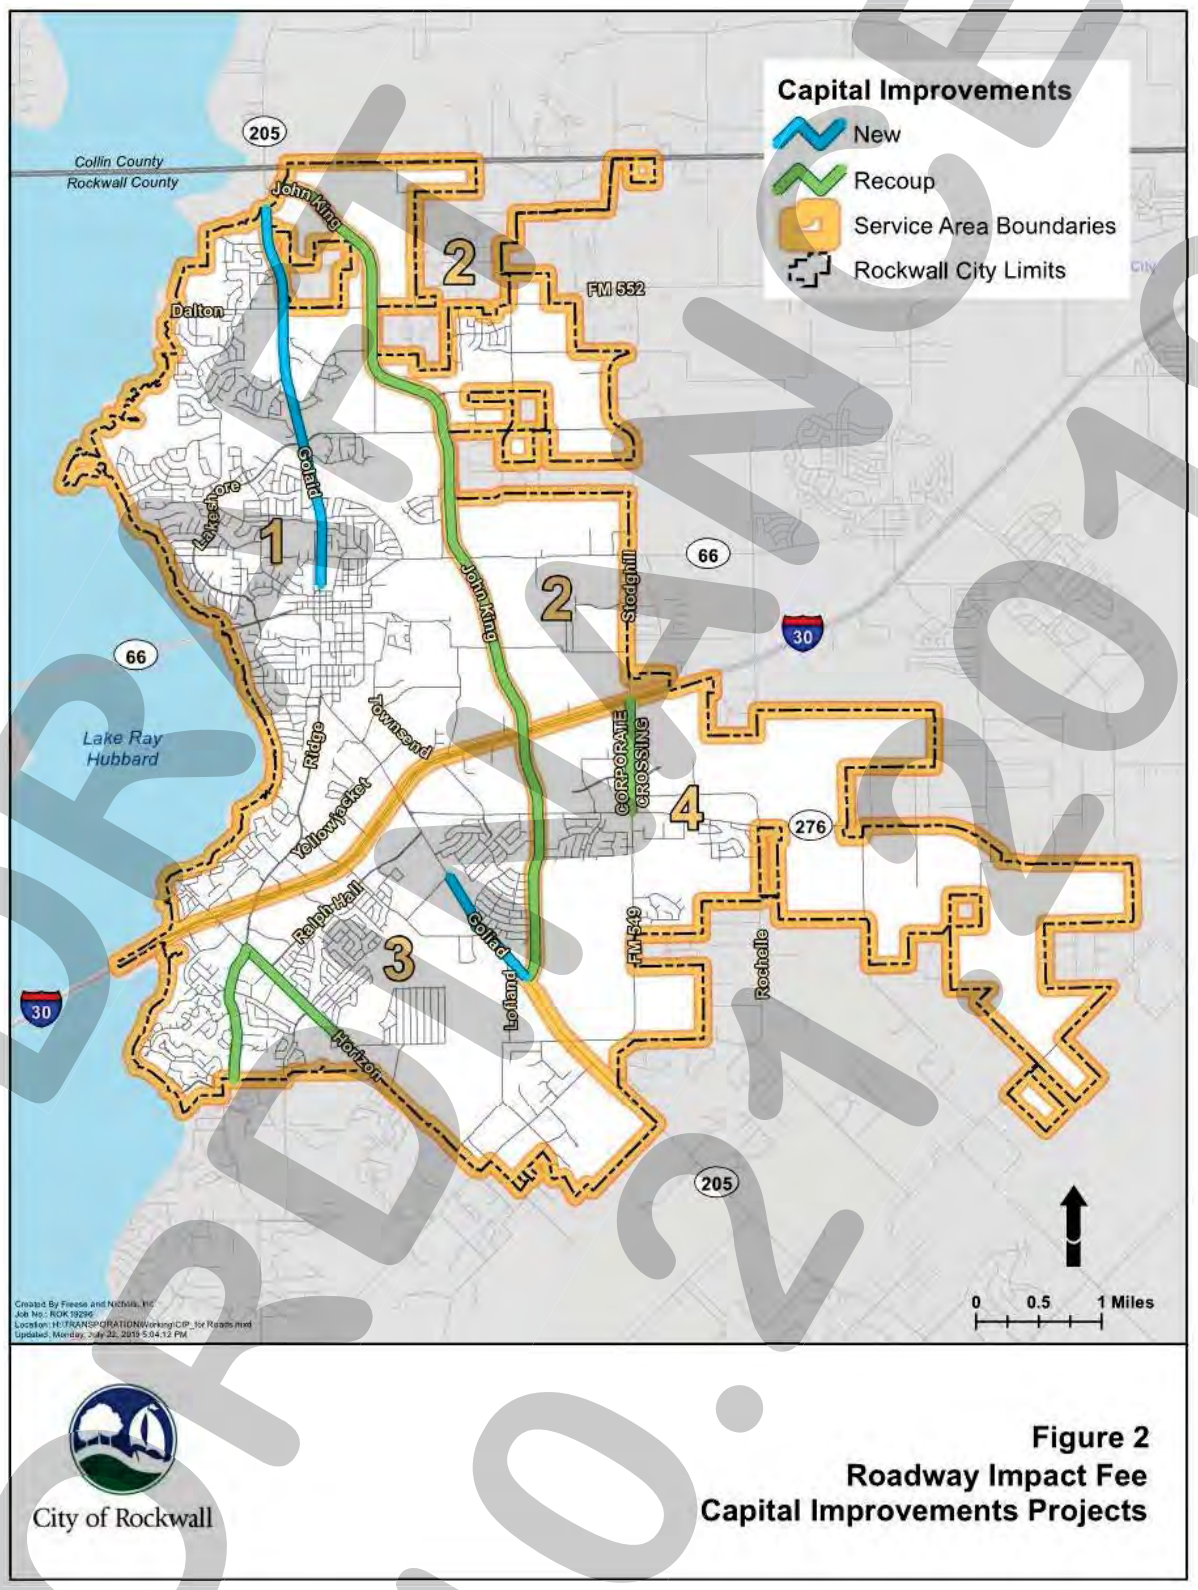
At the outset of the update process, capacity of the CIP was evaluated to ensure that excess capacity remained in previously approved impact fee projects. Chapter 395 mandates that only CIP projects with excess capacity are eligible for consideration. The initial impact fee program contained only one project, John King Boulevard, which extended from the northern city limit to Goliad Street (SH205) just north of FM549. Traffic volume count data collected at several locations within this corridor was used to determine if excess capacity remains on this project. The analysis revealed all segments of John King Boulevard to contain excess capacity and therefore can be retained in the program.

New Impact Fee CIP – Recoupment & Future Projects

Recoupment Projects:

John King Boulevard was the lone project identified for the initial impact fee program in 2008 and 2013 update. At the time the impact fee system was initiated, not all portions of this roadway in the north were within the city limits. The segment between FM552 and SH205 was within the county and not eligible for impact fee consideration. With annexations in 2013, additional portions of the facility were included in the program.

Three of the added projects were recently implemented and are considered recoupment. Traffic counts were also conducted on these three to assess whether excess capacity remains in these projects.



Future Projects:

Two new CIP projects are future projects planned for implementation within the next 10 years. Costs estimates for new project segments were prepared by Freese and Nichols.

Actual costs for project recoupment were provided by City Staff. **Figure 2** illustrates the location of this capital improvement in relation to the city and associated service areas. Project costs were broken into general categories of construction, engineering, right-of-way and finance (debt service). The breakout of costs among the various service areas are listed in **Table 8**. The cost of the impact fee program is $145.9 million. When considering the state mandated credit (50%), the cost eligible for impact fee consideration totals $72.9 million. The impact fee CIP also includes the cost of two five-year updates estimated at $40,000 each.

Notes:

DA- Divided Arterial

N- New Impact Fee Project

R- Impact Fee Recoupment Project

Projected Vehicle-Miles Capacity Available for New Growth

The vehicle-miles of new capacity supply were calculated similar to the vehicle-miles of existing capacity supplied. The equation used was:

Vehicle-Miles of New Capacity Supplied = Link capacity per peak hour per lane x Num. of lanes within Service Area x Length of segment (miles)

Vehicle-miles of new supply provided by the CIP are listed in **Table 9**. While the project has not been built, there are system deficiencies (by service area) that have been removed from the total supply to properly account for new "net" availability. Table 9 depicts net availability of supply by the CIP. **Appendix E** details capacity calculations provided by the CIP program.

Table 9: Vehicle-Miles of New Capacity Supplied

Service Area	Vehicle-Miles of New Capacity Supplied	Vehicle-Miles of Net New Capacity Supplied
1	13,836	5,869
2	6,096	3,114
3	11,489	4,476
4	4,751	2,405
Total	36,172	15,864

Cost of Roadway Improvements

The total and net cost to implement the roadway improvements plan projects by service area is shown in **Table 10**. If traffic exists on proposed CIP project roadways or there are any deficiencies present in each respective service area, the total system cost is adjusted to reflect the net capacity being made available by the impact fee program. In other words, only the unused portion of the CIP and its associated costs are considered eligible. A detailed listing by project segment in each service area can be found in **Appendix F**. **Appendix G** details system costs by service area.

Table 10: Summary of Roadway Improvements Plan Cost Analysis

Service Area	Actual Cost of Proposed Impact Fee Program	Adjusted Cost (50% Credit) of Proposed Impact Fee Program
1	$73,550,103	$36,775,052
2	$31,656,236	$15,828,118
3	$26,175,186	$13,087,593
4	$14,519,597	$7,259,799
Total	$145,901,123	$72,950,562

State law is specific in identifying that only the portion of the CIP necessitated and attributable to new development is eligible for cost recovery. For example, if only 60% of the net service units supplied by the CIP are needed in the next 10 years, only 60% of the cost (credited at 50% per legislative requirements) may be considered in the calculation of fees. All the capacity provided by the impact fee CIP will be necessitated to address future growth over the 10-year planning period. The cost attributable to new

DRAFT ORDINANCE 10.21.2019

growth is $31.9 million and represents the citywide cost to implement projects on the impact fee program. **Table 11** depicts CIP costs attributable to new growth by service area.

Table 11: Capital Improvements Plan Costs Attributable to New Development

Service Area	Adjusted Cost (50% Credit) of Net New Capacity	Adjusted Cost (50% Credit) Attributable to New Growth
1	$15,598,596	$15,598,596
2	$8,084,777	$8,084,777
3	$5,098,520	$5,098,520
4	$3,675,714	$3,675,714
Total	$31,993,304	$31,993,304

DRAFT ORDINANCE 10.21.2019

Chapter 6: Calculation of Impact Fees

This chapter discusses the calculation of the cost per service unit and the calculation of roadway impact fees. The transportation impact fee will vary by the land use, service area, and size of the development. Examples are included to better illustrate the method by which the transportation impact fees are calculated.

Cost Per Service Unit

The cost per service unit is calculated by dividing the cost of the CIP necessitated and attributable to new demand (net cost) by the projected service units of growth over the 10-year planning period.

Generally, the cost per service unit varies by service area because of variations in cost of CIP, projected growth and the number of service units necessitated by new growth between zones. Where net capacity supplied is greater than demand, the cost per service unit is simply the cost of the net capacity divided by the number of service units provided. In this case, only the portion of the CIP necessitated by new development is used in the calculation. If the net capacity supplied is *less* than projected new demand, then the cost per service unit is calculated by dividing the total cost of net supply by the portion of new demand attributable and necessary by development. The result is generally a decrease in the cost per service unit, because such cost is spread over the larger number of service units of growth.

Table 12 lists the results of the cost per service unit calculation by service area. The actual cost per service unit reflects the true burden to the City for the implementation of the roadway capital improvements program. As per state law, a credit for the portion of ad-valorem tax revenues generated by improvements over the program period, or a credit equal to 50% of the total projected cost of implementing the capital improvements plan must be given. Based on this analysis, the maximum collection rate reflects the maximum amount per service unit that can be charged to follow the state statute. **Appendix G** details the maximum fee per service unit calculation for each service area.

Table 12: Cost Per Service Unit Summary

Service Area	Actual Cost Per Service Unit	Maximum Fee per Service Unit (50% Credit)
1	$2,272.00	$1,136.00
2	$4,398.00	$2,199.00
3	$784.00	$392.00
4	$2,612.00	$1,306.00
Total	$1,926.00	$963.00

DRAFT ORDINANCE 10.21.2019

Calculation of Roadway Impact Fees

The calculation of roadway impact fees for new development involves a two-step process. Step one is the calculation of the total number of service units that will be generated by the development. Step two is the calculation of the impact fee due by the new development.

Step 1: Determine number of service units (vehicle-miles) generated by the development using the equivalency table.

No. of Development Units	x	Vehicle-miles per development unit	=	Development's Vehicle-miles

Step 2: Calculate the impact fee based on the fee per service unit for the service area where the development is located.

Development's Vehicle-miles	x	Fee per vehicle-mile	=	Impact Fee due from Development

Examples: The following fees would be assessed to new developments in Service Area 3 if the cost per service unit were retained at the current collection rate $256.00 (adopted in 2008, retained in 2013).

Single-Family Dwelling

1 dwelling unit x 3.12 vehicle-miles/dwelling unit = 3.12 vehicle-miles
3.12 vehicle-miles x $256.00 /vehicle-mile = $798.72

20,000 square foot (s.f.) Office Building

20 (1,000 s.f. units) x 3.92 vehicle-miles/1,000 s.f. units = 78.40 vehicle-miles
78.40 vehicle-miles x $256.00 /vehicle-mile = $20,070.40

100,000 s.f. Retail Center

100 (1,000 s.f. units) x 1.77 vehicle-miles/1,000 s.f. units = 177.00 vehicle-miles
177.00 vehicle-miles x $256.00 /vehicle-mile = 45,312.00

200,000 s.f. Industrial Development

200 (1,000 s.f. units) x 1.77 vehicle-miles/1,000 s.f. units = 354.00 vehicle-miles
354.00 vehicle-miles x $256.00 /vehicle-mile = $90,624.00.

DRAFT ORDINANCE 10.21.2019

Chapter 7: Conclusions

Chapter 395 authorizes the assessment and collection of impact fees in Texas for transportation related capital improvements that must be met in order to assess and collect impact fees. This study was conducted to fulfill the requirements of Chapter 395 in developing a transportation-related impact fee for the City of Rockwall.

Three service areas were created for Rockwall. This service area structure was configured so that no point is greater than the six-mile maximum set forth by law. The six-mile limit ensures that roadway improvements are near the development paying the fees that it serves.

Vehicle-miles of travel in the PM peak hour are used as the service unit for calculating and assessing impact fees. Vehicle-miles establish a relationship between the intensity of land development and the demand on the roadway system using published trip generation data and average trip length. The PM peak hour is used as the time period for assessment because typically the greatest demand for roadway capacity occurs during this hour. Additionally, roadways are sized to meet this demand and roadway capacity can more accurately be defined on an hourly basis.

The service units (vehicle-miles) for new development are a function of trip generation and the average trip length for specific land uses. Trip generation information was based on data published by the Institute of Transportation Engineers as reported in the initial study. Where appropriate, trip generation rates were adjusted to reflect the primary trip purpose. This ensures that new development is assigned for the portion of trips associated with that specific development. Average trip length data was based on information compiled by NCTCOG and based on data from a NCTCOG Workplace Survey, statistics from the US Census Bureau National Workplace Survey and tailored to Rockwall.

The result of combining trip generation and trip length information is an equivalency table that establishes a service unit rate for various land uses. Separate rates were established for specific land uses within the broader categories of residential, community, industrial and institutional uses.

An analysis of existing conditions revealed that the current roadway system provides over 74,952 vehicle-miles of capacity. The existing demand placed on the system was determined to be 46,738 vehicle-miles. Evaluation of the existing roadway system found 2,871 vehicle-miles of deficiencies on the existing roadway network.

Projected growth, in terms of vehicle-miles over the 10-year planning period, was based on population and employment data that was prepared in the Land Use Assumptions for Roadway Impact Fees dated August 2019 by the City Planning Department. Based on this growth, the projected vehicle-miles of demand calculated to be 33,222.

Rockwall City Staff identified the roadway impact fee capital improvements program for the 10-year planning period. Projects eligible for this CIP include arterial and collector streets that have been designated on the officially adopted Thoroughfare Plan of the City. Developer funded roadways are not eligible for inclusion in calculating impact fees. Projects totaling $145.9 million, was identified for impact fee consideration based on need, projected growth, project affordability and achievability, financial

DRAFT ORDINANCE NO. 20-19

considerations, jurisdictional issues, the Thoroughfare Plan, and staff recommendation. The credited (50%) cost attributable to new growth is $72.94 million and represents 100% of the net capacity made available for development by impact fee roadway projects. The recommended CIP program will provide 15,864 vehicle-miles of new net capacity.

The *actual* cost per service unit was calculated to be between $784.00 and $4,398.00 and was based on the total cost of net capacity supplied by the CIP and the demand attributable to new development over the 10-year planning period. State legislation requires that a credit for the portion of ad-valorem tax revenues generated by improvements over the program period, or a credit equal to 50% of the total projected cost of implementing a roadway impact fee capital improvements program be given. Based on a 50% credit, the cost per service unit ranges between $392.00 and $2,199.00.

The determination of fees due from new development is based upon the size of development, its associated service unit generation (equivalency table) and the cost per service unit derived or adopted for each service area.

DRAFT ORDINANCE 10.21.2019

APPENDICES

DRAFT ORDINANCE 10.21.2019

City of Rockwall

DRAFT ORDINANCE 10.21.2019

A. Roadway Impact Fee Definitions

ROADWAY IMPACT FEE DEFINITIONS

Average Trip Length - the average actual travel distance between two points. The average trip length by specific land use varies.

Diverted Trip - similar to pass-by trip, but a diversion is made from the regular route to make an interim stop.

Impact Fee - a charge or assessment imposed by a city against new development to generate revenue for funding or recouping roadway improvements necessitated and attributable to new development.

Land Use Equivalency – correlation of a land use to the rate of vehicle miles CIP of network capacity it would consume

Maximum Fee Per Service Unit - the highest impact fee that may be collected by the City per vehicle-mile of supply. Calculated by dividing the costs of the capital improvements by the total number of vehicle-miles of demand expected in the 10-year planning period.

Pass-by Trip - a trip made as an intermediate stop on the way from an origin to a primary trip destination. For example, a stop at a convenience store on the way to office from home.

PM Peak Hour - the hour when the highest volume of traffic typically occurs. Data collection (May 2019) revealed the peak hour of travel between 5:00 and 6:00 pm for Rockwall.

PM Peak Hour Traffic Counts - the number of vehicles passing a certain point during the peak hours of travel. Traffic counts are conducted during the PM peak hour because the greatest demand for roadway capacity occurs during this hour.

Primary Trip - a trip made for the specific purpose of visiting a destination; for example, from home to office.

Roadway Demand - the demand placed on the roadway network as a result of development. Determined by multiplying the trip generation of a specific land use by the average trip length.

Roadway Supply (or Capacity) - the number of service units provided by a segment of roadway over a period of time. Determined by multiplying the lane capacity by the roadway length.

Service Area - the area within the city boundaries to be served by capital improvements. Criteria for developing the service area structure include; 1) restricted to six-mile limit by legislation (to ensure proximity of roadway improvements to development), 2) conforms to census or forecast model boundaries, 3) projects on CIP as boundaries, 4) effort to match roadway supply with projected demand, or 5) city limit boundaries.

DRAFT ORDINANCE 10.21.2019

Service Unit - a measure of use or generation attributable to new development for roadway improvements. Also used to measure supply provided by existing and proposed roadway improvements.

Trip - a single, one-direction vehicle movement from an origin to a destination.

Trip Generation - the total trip ends for a land use over a given period or the total of all trips entering and exiting a site during that designated time. Used in the development of the land use equivalency table for Rockwall. Based primarily on data prepared by the Institute of Transportation Engineers (ITE).

Vehicle - for impact fee purposes, any motorized appurtenance that carries passengers and/or goods on the roadway system during peak periods of travel.

Vehicle-mile - a unit used to express both supply and demand provided by, and placed on, the roadway system. A combination of a number of vehicles traveling during a given time period and the distance in which these vehicles travel in miles.

DRAFT ORDINANCE 10.21.2019

DRAFT ORDINANCE 10.21.2019

B. Land Use Definitions

LAND USE DEFINITIONS

Residential

Single-Family Detached - Any single-family detached home on an individual lot is included in this category. A typical example of this land use is a home in a suburban subdivision. Also included are duplex residential units and manufactured homes and other residential land uses not specified above.

Multi-Family - This land use includes both low-rise ("walk-up" dwellings) and high-rise multi-family apartments. An apartment is defined as a dwelling unit that is located within the same building with three or more dwelling units. Also included in this land use are residential condominiums, townhomes, triplex and quadplex units. Residential condominiums and townhomes are defined as single-family units that have at least one other single-family unit within the same building structure.

Independent Senior Living Facility - Retirement communities - restricted to adults or senior citizens - contain residential units like apartments or condominiums and are usually self-contained villages. They may also contain special services such as medical facilities, dining facilities, and some limited supporting retail facilities.

Office (Service)

General Office Building - A general office building houses one or more tenants and is the location where affairs of a business, commercial or industrial organization, and professional activity are conducted. The building or buildings may be limited to one tenant or contain a mixture of tenants including professional services, insurance companies, investment brokers, company headquarters, and services for the tenants such as a bank or savings and loan, a restaurant or cafeteria, and several retail facilities. Also included in this category are office parks, and other office uses not specified above.

Medical Office Building – A building that provides diagnoses and outpatient care on a routine basis but is unable to provide prolonged in-house medical and surgical care. One or more private physicians or dentists generally operate this type of facility.

Commercial/Retail

General Retail – General retail includes a variety of land uses that include shopping centers, home improvement stores, hardware stores selling a complete assortment of food, household goods and materials, apparel, servicing items. A shopping center is an integrated group of commercial establishments that is planned, developed, owned, and managed as a unit. It is related to its market area in terms of size, location, and type of store. Shopping centers provide on-site parking facilities. Some centers may include non-merchandising uses such as small office professional services, post offices, banks, health clubs, video rentals, and recreational facilities such as ice-skating rinks or video arcades.

DRAFT ORDINANCE 10-21-19

Restaurant - This land use consists of sit-down eating establishments. Quality and high-turnover (sit-down) restaurants are included in this category. Quality restaurants usually have a turnover rate of at least one hour or longer. The turnover rate for a high-turnover (sit-down) restaurant is usually less than one hour.

Fast Food Restaurant - This category includes fast food restaurants with or without drive-through windows, such as McDonalds, Burger King, Dunkin Donuts, and Taco Bell. Some establishments may include an indoor or outdoor playground.

Convenience Store/Gas Station - Any convenience market that sells convenience foods, newspapers, magazines, and often, beer and wine and may have gasoline pumps. Gas stations generally are located at intersections or freeway interchanges and may include facilities for servicing, repairing, fueling motor vehicles and may have convenience stores. Convenience stores/gas stations that have a fast-food restaurant contained within should be calculated on a separate basis based on the appropriate independent variable.

Bank - This land use includes walk-in and drive-in banks. Walk-in banks are generally free-standing buildings with their own parking lots. These banks do not have drive-in windows. Drive-in banks provide banking facilities for the motorist while in a vehicle; many also serve patrons who walk into the building. Savings and loan companies should also be included in this category.

Hotel/Motel – A place of lodging that provides sleeping accommodations, small restaurants, lounges, and meeting spaces. Some hotels or motels may provide banquet rooms or other retail and service shops.

Furniture and Appliance Sales - A store specializing in the sale of furniture, household appliances and goods and often, carpeting.

Theater – This land use consists of a movie or live theater and contains audience seating, single or multiple auditoriums, lobby, offices and refreshment stands.

Self-Storage Facilities - A self-serve storage unit or vault that is rented for the storage of goods. Each unit is physically separated from other units and access is usually provided through an overhead door or other common access point.

Industrial (Basic)

General Industrial – General industrial includes a variety of land uses such as light industrial, manufacturing, salvage, facilities for preparation/assembly and warehouse/distribution of goods. Other uses include materials testing laboratories, high-tech facilities and assemblers of technical equipment. Most facilities are free standing and devoted to a single use. Also included in this category are any other industrial uses not specified above.

Manufacturing – Facilities where the primary activity is the conversion or fabrication of raw materials to finished products. In addition to production of goods, manufacturing facilities may also have ancillary office, warehouse and associated functions.

DRAFT ORDINANCE 10.21.2019

Warehousing – These facilities are primarily devoted to the storage of materials. These facilities differ from mini warehouse in that they are generally not self-service in nature.

Institutional

Private School - Private schools serve students between the kindergarten and middle school or high school levels. Private schools are usually centrally located in residential communities in order to facilitate student access and have no student drivers.

Community College - Community college provides two and four-year advanced degrees. Vocational and technical schools are other uses that may fall under this category.

Day Care Center - A day care center is a facility where care for pre-school age children is provided, normally during the daytime hours. Day care facilities generally include classrooms, offices, eating areas, and playgrounds. Some centers also provide after-school care for older children.

Hospital - A hospital is any institution where medical or surgical care is given to non-ambulatory and ambulatory patients, and overnight accommodations are provided.

Nursing Home - A nursing home is any facility whose primary purpose is to care for persons who are unable to care for themselves. The term applies to rest homes, chronic care, and convalescent homes.

Religious Facilities – Churches, synagogues or houses of worship that provide public worship services, and generally house an assembly hall or sanctuary, meeting rooms, classrooms, and occasionally dining, catering, or party facilities.

Activity Centers – A recreational center or private club such as a YMCA that may offer classes and clubs for adults and children; a day care or a nursery school, meeting rooms, swimming pools and whirlpools; saunas, tennis, racquetball and handball courts, exercise classes, weightlifting equipment and locker rooms. Some may offer a small restaurant or snack bar within.

U.S. Post Office – A building that contains service windows for mailing packages and letters, post office boxes, offices, sorting and distributing facilities for mail and vehicle storage areas.

D. Existing Capital Improvements

EXISTING CAPITAL IMPROVEMENTS

Definitions

LANES	The total number of lanes in both directions available for travel.
TYPE	The type of roadway (used in determining capacity): DA = divided arterial UA = undivided arterial UC = undivided collector
PK-HR VOLUME	The existing volume of cars on the roadway segment traveling during the afternoon (P.M.) peak hour of travel. A and B indicate the two directions of travel. Direction A is a northbound or eastbound and direction B is southbound or westbound. If only one half of the roadway is located within the service area (see % in service area), the opposing direction will have no volume in the service area.
% IN SERVICE AREA	If the roadway is located on the boundary of the service area (with the city limits running along the centerline of the roadway), then half of the roadway is inventoried in the service area and the other half is not. This value is either 50% or 100%.
VEH-MI SUPPLY PK-HR	The number of total service units (vehicle-miles) supplied within the service area, based on the length and established capacity of the roadway type.
VEH-MI TOTAL DEMAND PK-HR	The total service unit (vehicle-mile) demand created by existing traffic on the roadway segment in the afternoon peak hour.
EXCESS CAPACITY PK-HR VEH-MI	The number of service units supplied but unused by existing traffic in the afternoon peak hour.
EXISTING DEFICIENCIES PK-HR VEH-MI	The number of service units of demand in excess of the service units supplied.

NOTE: Excess capacity and existing deficiencies are calculated separately for each direction. It is possible to have excess capacity in one direction and an existing deficiency in the other. When both directions have excess capacity or deficiencies, the total for both directions are presented.

DRAFT 10.2019

City of Rockwall

DRAFT ORDINANCE 10.21.2019

E. Roadway Improvement Plan Projects

ROADWAY IMPROVEMENTS PLAN PROJECTS

Definitions

LANES	The total number of lanes in both directions available for travel.
TYPE	The type of roadway (used in determining capacity): DA = divided arterial SA = special arterial (similar to DA)
PK-HR VOLUME	the existing volumes of cars on the roadway segment traveling during the afternoon (P.M.) peak hour of travel.
% IN SERVICE AREA	If the roadway is located on the boundary of the service area (with the city limits running along the centerline of the roadway), then half of the roadway is inventoried in the service area and the other half is not. This value is either 50% or 100%.
VEH-MI SUPPLY TOTAL	The number of total service units (vehicle-miles) supplied within the service area, based on the length and established capacity of the roadway type.
VEH-MI TOTAL DEMAND PK-HR	The total service unit (vehicle-mile) demand created by existing traffic on the roadway segment in the afternoon peak hour.
EXCESS CAPACITY PK-HR VEH-MI	The number of service units supplied but unused by existing traffic in the afternoon peak hour.
FINANCE COST	Estimate of the cost of financing the cost of project development. Included for recoupment projects along John King Boulevard. Not applied for new recoupment and future projects added under this updated Impact Fee CIP
ROW	Estimated value of private owned right of way needed to be acquired for construction of the roadway improvements.

F. Roadway Improvements Plan Cost Analysis

ROADWAY IMPROVEMENTS PLAN COST ANALYSIS

Definitions

LANES	The total number of lanes in both directions available for travel.
TYPE	The type of roadway (used in determining capacity): DA = divided arterial SA = special arterial
% IN SERVICE AREA	If the roadway is located on the boundary of the service area (with the city limits running along the centerline of the roadway), then half of the roadway is inventoried in the service area and the other half is not. This value is either 50% or 100%.
TOTAL SEGMENT COST	The estimated cost (in dollars) of the entire segment of the proposed improvement.
TOTAL COST IN SERVICE AREA	The estimated cost (in dollars) of the portion of the proposed roadway improvement within the service area.

CITY OF ROCKWALL
2019 – 2029 WATER & WASTEWATER IMPACT FEE UPDATE

SECTION I – INTRODUCTION

A. GENERAL

In accordance with the requirements of Chapter 395.052 of the Local Government Code, this report establishes the City of Rockwall's Capital Improvement Plan for water and wastewater impact fees and calculates the maximum allowable fee for each. Land use assumptions for impact fees were generated under a separate document prepared by the City of Rockwall's Planning Department.

Chapter 395, of the Local Government Code is an act that provides guidelines for financing capital improvements required by new development in municipalities, counties, and certain other local governments. The basis for determination of an impact fee requires the preparation and adoption of a land use plan and growth assumption, and the preparation of a 10-year capital improvement plan. The capital improvement plan requires an analysis of total capacity, the level of current usage and commitments of capacity of existing capital improvements. From these two phases, a maximum impact fee is calculated.

The Act allows the maximum impact fee to be charged if revenues from future ad valorem taxes, and water and sewer bills are included as a credit in the analysis. If not, the Act allows the maximum fee to be set at 50% of the calculated maximum fee. The following items were included in the impact fee calculation:

1. The portion of the cost of the new infrastructure that is to be paid by the City, including engineering, property acquisition and construction cost.

2. Existing excess capacity in lines and facilities that will serve future growth and which were paid for in whole or part by the City.

3. Engineering and quality control fees for construction projects.

4. Interest and other finance charges on bonds issued by the City to cover its portion of the cost. 5% is assumed for this analysis.

DRAFT ORDINANCE 10.21.2019

The engineering analysis portion of the Water and Wastewater Fee determines utilized capacity cost of the major water distribution and wastewater collection facilities between the year 2019 and the year 2029. Facilities in this analysis include, water pump stations, water storage tanks, water transmission lines and wastewater collection lines. The North Texas Municipal Water District (NTMWD) water treatment, and water distribution components were excluded from this analysis. The study period is a ten-year period with 2019 as the base year. The impact fee calculations for the water and wastewater systems are based on land use assumptions prepared by the City of Rockwall. Prior to this impact fee update, the City's Water Distribution and Wastewater Collection hydraulic models were updated for 2019, 2029 and buildout conditions. The hydraulic model results are available for review from the City of Rockwall. The equivalency factors utilized in this analysis conform to the American Water Works Association Standards (C700 - C703).

B. WATER & WASTEWATER IMPACT FEE GLOSSARY

1. Advisory Committee means the capital improvements advisory committee established by the City for purposes of reviewing and making recommendations to the City Council on adoption of the City's impact fee program.

2. Area-Related Facility means a capital improvement or facility expansion which is designated in the impact fee capital improvements plan and which is not a site-related facility. Area-Related Facility may include capital improvements that are located off-site, or within or on the perimeter of the development site.

3. Assessment means the determination of the amount of the maximum impact fee per service unit that can be imposed on new development.

4. Capital Improvement means either a water facility or a wastewater facility with a life expectancy of three or more years, to be owned and operated by or on behalf of the City.

5. City means the City of Rockwall, Texas.

6. Credit means the amount of the reduction of an impact fee due, determined under this ordinance or pursuant to administrative guidelines that is equal to the value of area-related

DRAFT ORDINANCE 10.21.19

facilities provided by a property owner pursuant to the City's subdivision or zoning regulations or requirements, for the same type of facility.

7. Debt Service means the 20-year financing costs of projects applied to all eligible existing and proposed water and wastewater facilities.

8. Facility Expansion means either a water facility expansion or a sewer facility expansion.

9. Impact Fee means either a fee for water facilities or a fee for wastewater facilities, imposed on new development by the City pursuant to Chapter 395 of the Texas Local Government Code in order to generate revenue to fund or recoup the costs of capital improvements or facility expansion necessitated by and attributable to such new development. Impact fees do not include the dedication of rights-of-way or easements for such facilities, or the construction of such improvements, imposed pursuant to the City's zoning or subdivision regulations.

10. Impact Fee Capital Improvements Plan means either a water capital improvements plan or a wastewater capital improvement plan adopted or revised pursuant to the impact fee regulations.

11. Land Use Assumptions means the projections of population and growth, and associated changes in land uses, densities and intensities over at least a ten-year period, as adopted by the City and as may be amended from time to time, upon which the capital improvements plans are based.

12. Land Use Equivalency Table means a table converting the demands for capital improvements generated by various land uses to numbers of service units, as may be amended from time to time.

13. New Development means the subdivision of land; the construction, reconstruction, redevelopment, conversion, structural alteration, relocation, or enlargement of any structure; or any use or extension of the use of land; any of which increases the number of service units.

DRAFT ORDINANCE 10.21.2019

14. Recoupment means the imposition of an impact fee to reimburse the City for capital improvements that the City had previously oversized to serve new development.

15. Service Area means either a water service area or wastewater service area which impact fees for capital improvements or facility expansion will be collected for new development occurring within such area, and within which fees so collected will be expended for those types of improvements or expansions identified in the type of capital improvements plan applicable to the service area.

16. Service Unit means the applicable standard units of measure shown on the land use equivalency table in the Impact Fees Capital Improvements Plan that can be converted to water meter equivalents, for water or for wastewater facilities, which serves as the standardized measure of consumption, use or generation attributable to the new unit of development.

17. Site-Related Facility means an improvement or facility which is for the primary use or benefit of a new development, and/or which is for the primary purpose of safe and adequate provision of water or wastewater facilities to serve the new development, and which is not included in the impact fees capital improvements plan and for which the property owner is solely responsible under subdivision or other applicable development regulations.

18. Utility Connection means installation of a water meter for connecting a new development to the City's water system, or connection to the City's wastewater system.

19. Wastewater Facility means a wastewater interceptor or main, lift station or other facility included within and comprising an integral component of the City's collection system for wastewater. Wastewater facility includes land, easements or structure associated with such facilities. Wastewater facility excludes site-related facilities.

DRAFT ORDINANCE 10.21.2019

20. Wastewater Facility Expansion means the expansion of the capacity of any existing wastewater improvement for the purpose of serving new development, but does not include the repair, maintenance, modernization, or expansion of an existing sewer facility to serve existing development.

21. Wastewater Capital Improvements Plan means the adopted plan, as may be amended from time to time, which identifies the wastewater facilities or wastewater expansions and their associated costs which are necessitated by and which are attributable to new development, for a period not to exceed 10 years.

22. Water Facility means a water main, pump station, storage tank or other facility included within and comprising an integral component of the City's water storage or distribution system. Water facility includes CCN acquisition, land, easements or structures associated with such facilities. Water facility excludes site-related facilities.

23. Water Facility Expansion means the expansion of the capacity of any existing water facility for the purpose of serving new development, but does not include the repair, maintenance, modernization, or expansion of an existing water improvement to serve existing development.

24. Water Capital Improvements Plan means the adopted plan, as may be amended from time to time, which identifies the water facilities or water expansions and their associated costs which are necessitated by and which are attributable to new development, for a period not to exceed 10 years.

25. Water Meter means a device for measuring the flow of water to a development, whether for domestic or for irrigation purposes.

C. LAND USE ASSUMPTIONS *(Prepared By: City of Rockwall Planning Department)*

The impact fee land use assumptions utilized in this update were prepared by the City of Rockwall's Planning Department and are presented in a separate document. The land use assumptions projected an ultimate residential population of approximately 149,525 in the City of Rockwall's ultimate planning boundary.

DRAFT ORDINANCE 10.21.19

The residential and non-residential growth provided by the City for the year 2019 through 2029 is summarized in Table No. 1.

TABLE NO. 1

Residential and Non-Residential Growth from 2019 to 2029

Year	LUA Residential Population *	Residential Population Served **	Non-Residential Uses*** Employees	
2019	49,616	44,748	25,369	
2029	73,228	64,768	34,064	
Res. Growth Rate	**1.48**		**Non-Res. Growth Rate**	**1.34**

** Residential Population Inside Planning Boundary*
*** Residential Population Served Inside Existing City of Rockwall City Limit Boundary*
**** Basic – Industrial Land Uses*
**** Service – Office & Institutional Land Uses*
**** Retail – Commercial Land Uses*

As shown in Table No. 1, increases in the residential population and non-residential uses will occur during the 10-year capital recovery period. The water demand and wastewater flows from the residential and non-residential uses dictate the ultimate size of facilities, while the rate of growth is important to determine the timing of system improvements to meet the City's growing needs. The eligible water impact fee facilities are shown **on Exhibit 1**. The eligible wastewater facilities are shown on **Exhibit 2** in this report.

DRAFT ORDINANCE 10.21.19

SECTION II

WATER & WASTEWATER C.I.P. AND IMPACT FEE ANALYSIS

A. DEFINITION OF A SERVICE UNIT – WATER AND WASTEWATER

Chapter 395 of the Local Government Code requires that impact fees be based on a defined service unit. A "service unit" means a standardized measure of consumption, use generation, or discharge attributable to an individual unit of development calculated in accordance with generally accepted engineering or planning standards. This impact fee defines a water and wastewater service unit to be a *5/8-inch water meter* and has referred to this service unit as a Single Family Living Unit Equivalent (SFLUE). The SFLUE is based on the continuous duty capacity of a 5/8-inch water meter. This is the City of Rockwall's typical meter used for a single family detached dwelling, and therefore is considered to be equivalent to one "living unit". Other meter sizes can be compared to the 5/8-inch meter through a ratio of water flows as published by the American Water Works Association as shown in **Table No. 2** below. This same ratio is then used to determine the proportional water and wastewater impact fee amount for each water meter size.

TABLE NO. 2

Living Unit Equivalencies For Various Types and Sizes of Water Meters

Meter Type	Meter Size	Continuous Duty Maximum Rate (gpm) [a]	Ratio to 5/8" Meter
Simple	5/8"	10	1.0
Simple	1"	25	2.5
Simple	1-1/2"	50	5.0
Simple	2"	80	8.0
Compound	2"	80	8.0
Turbine (Irrigation)	2"	160	16.0
Compound	3"	160	16.0
Turbine (Irrigation)	3"	350	35.0
Compound	4"	250	25.0
Turbine (Irrigation)	4"	650	65.0
Compound	6"	500	50.0
Turbine (Irrigation)	6"	1,400	140.0
Compound	8"	800	80.0
Turbine (Irrigation)	8"	2,400	240.0
Turbine	10"	3,500	350.0
Turbine	12"	4,400	440.0

DRAFT ORDINANCE 10-21-2019

B. CALCULATION OF WATER & WASTEWATER - LIVING UNIT EQUIVALENTS

The City of Rockwall provided the existing water meter count by size category as of December 2018. In total, there are 15,680 domestic water and irrigation meters serving an existing population of 49,616 residents and business. **Table No. 3** shows the number of existing meters, the living unit equivalent factor and the total number of living unit equivalents for each sized water meter.

Similar, the City provided the number of wastewater accounts by corresponding water meter size. This number of wastewater accounts is 15,053. **Table No. 4** illustrates the existing wastewater accounts and the SFLUE's. The difference between the water and wastewater accounts is irrigation meters are not included in the wastewater accounts.

The residential growth rate of 1.48 in **Table 1** was applied to 5/8-inch through 1-1/2-inch meters. The non-residential growth rate of 1.34 in **Table 1** was applied to 2-inch through 12-inch meters. Utilizing these growth rates in a straight-line extrapolation of the existing water and wastewater accounts, the numbers of new accounts was calculated for the year 2029. City records indicate the historical growth of 5/8-inch and 1-inch meters is approximately 96% 5/8-inch meters and 4% 1-inch meters for the base meter sizes. These percentages were applied to the total growth of 5/8-inch and 1-inch meters. Living unit equivalents were then applied to the water meters and wastewater accounts for 2019 and 2029, resulting in a total number of living units. The difference in the total number of 2019 and 2029 living units results in the new living unit equivalents during the impact fee period. The calculation of living unit equivalents is summarized in **Table 3 and Table 4**.

TABLE NO. 3

Water Living Unit Equivalents 2019 – 2029

Meter Size	2019			2029			New Living Unit Equivalents During Impact Fee Period
	Number of Water Meters	Living Unit Equivalent Ratio for 5/8" Used	Total Number of Living Units	Number of Water Meters	Living Unit Equivalent Ratio for 5/8" Used	Total Number of Living Units	
5/8"	14,261	1.0	14,261	21,108	1.0	21,108	6,847
1"	597	2.5	1,493	882	2.5	2,205	712
1-1/2"	188	5.0	940	278	5.0	1,390	450
2"	617	8.0	4,936	827	8.0	6,616	1,680
3"	5	16.0	80	7	16.0	112	32
4"	10	25.0	250	13	25.0	325	75
6"	2	50.0	100	3	50.0	150	50
8"	0	80.0	0	0	80.0	0	0
10"	0	350.0	0	0	350.0	0	0
12"	0	440.0	0	0	440.0	0	0
Totals	**15,680**		**22,060**	**23,118**		**31,906**	**9,846**

DRAFT 10.21.19

TABLE NO. 4

Wastewater Living Unit Equivalents 2019 – 2029

Meter Size	2019			2029			New Living Unit Equivalents During Impact Fee Period
	Number of Wastewater Accounts	Living Unit Equivalent Ratio for 5/8" Used	Total Number of Living Units	Number of Water Meters	Living Unit Equivalent Ratio for 5/8" Used	Total Number of Living Units	
5/8"	14,179	1.0	14,179	20,956	1.0	20,956	6,777
1"	377	2.5	943	587	2.5	1,468	525

10"	0	350.0	0	0	350.0	0	0
12"	0	440.0	0	0	440.0	0	0
Totals	**15,053**		**18,946**	**22,227**		**27,656**	**8,710**

C. COST OF FACILITIES

Unit costs for proposed water and wastewater lines larger than 12 inches in diameter that are anticipated to be constructed between 2019 and 2029 by private development include the City's oversize cost participation only. These water and wastewater lines are colored green on **Exhibits 1 and 2**. Oversize cost participation from City is based on availability of funds. For City participation, the developer must bid the 12-inch as a base and the oversize as an additive alternate. City initiated water and wastewater lines include the full cost of the proposed facility. These water and wastewater lines are colored red on **Exhibits 1 and 2**. Developer initiated water and wastewater line projects which are 12 inches or less in diameter are not included in this Impact Fee analysis, as the cost for these size lines are the responsibility of the developer. These water and wastewater lines are colored light blue (cyan) on **Exhibits 1 and 2**.

Actual construction costs of the various existing elements of the water and wastewater systems were utilized where the information was known. The existing cost of facilities was determined from Contractor's final pay requests, City purchase orders, bid tabulation forms and developer's agreements. Existing water and wastewater facilities included in the impact fee analysis are only those with excess capacity available for future growth are colored dark blue on **Exhibits 1 and 2**.

DRAFT ORDINANCE 10.24.2019

Cost data for existing water and wastewater facilities included in the impact fee analysis were provided by the City. A 5% debt service, over a period of 20-years, has been added to all projects. Actual costs were used for those existing projects where records were available.

D. WATER DISTRIBUTION SYSTEM

Computer hydraulic models for the years 2019, 2029 and Buildout were prepared and analyzed by Birkhoff, Hendricks & Carter, L.L.P. The models were developed and water demand distributed from residential population and non-residential land use projections prepared by the City of Rockwall's Planning Department. The projected developed land areas from the City's Land Use Assumptions follow closely to the construction of major facilities in the system. These facilities include pump stations, storage tanks, and major distribution lines. All computer models were run for the Maximum Hourly Demands in a three-day extended period simulation to ensure proper sizing of the facilities to meet peak demands.

1. Existing Pump Stations, Ground Storage Reservoirs & Elevated Storage Tanks

The existing water distribution system included in the impact fee analysis (As of December 2018) includes the facilities summarized in **Table No. 5** and **Table No. 6**.

TABLE NO. 5

Water Distribution System -- Existing Pump Stations & Ground Storage

Pump Station	Number of Pumps	Rated Capacity (MGD)	Number of Ground Storage Tanks	Total Ground Storage Available (Gallons)
Heath Street 698.75	6	17.7	1	3,000,000
Eastside 698.75	6	25.9	1	3,000,000
698.75 Subtotal:	**12**	**43.6**	**2**	**6,000,000**
Eastside 780	3	8.6	1	1,000,000
780 Subtotal:	**3**	**8.6**	**1**	**1,000,000**
Total:	**15**	**52.2**	**3**	**7,000,000**

DRAFT ORDINANCE 10.21.19

TABLE NO. 6

Existing Elevated Storage Tanks

Elevated Storage Tanks	Capacity in Million Gallons
Southside Elevated Storage Tank	1.0
Country Lane Elevated Storage Tank	2.0
Springer Elevated Storage Tank	2.0
Total	**5.0**

The pump stations and ground storage facilities were analyzed with the maximum daily demand, while elevated storage acts dynamically and therefore was analyzed utilizing the difference between the Maximum Hourly Demand and the Maximum Daily Demand.

2. Distribution Lines

The distribution lines consist of all lines within the Service Area planning boundary supplying water to customers in the City of Rockwall. Existing and proposed distribution lines vary in size from 5/8-inch services to 48-inch transmission lines and pump station piping. The cost of water lines includes construction cost, appurtenances (water valves, fire hydrants, taps and the like), utility relocations, purchase of easements and engineering costs. Financing cost over a 20-year term is included for each project.

Unit cost for proposed capital improvement water lines 12-inches and larger in diameter classified as City initiated, or City participation in oversize water lines. Developer's initiated water line projects, 12 inches or less in diameter were not included in this Impact Fee analysis, as the cost for these size lines are the responsibility of the developer.

3. Water Supply

The City of Rockwall currently receives all of its water supply from the North Texas Municipal Water District (NTMWD). Rockwall's allocation of the capital cost of services as a Member of the NTMWD was specifically excluded from the impact fee analysis.

If included, Rockwall's share of the NTMWD capital cost could include the original construction cost, expansion cost and financing cost of the following components:

a) Water Rights Cost in Lake Lavon and other Sources

DRAFT ORDINANCE 10.21.19

b) Raw Water Intake Structures

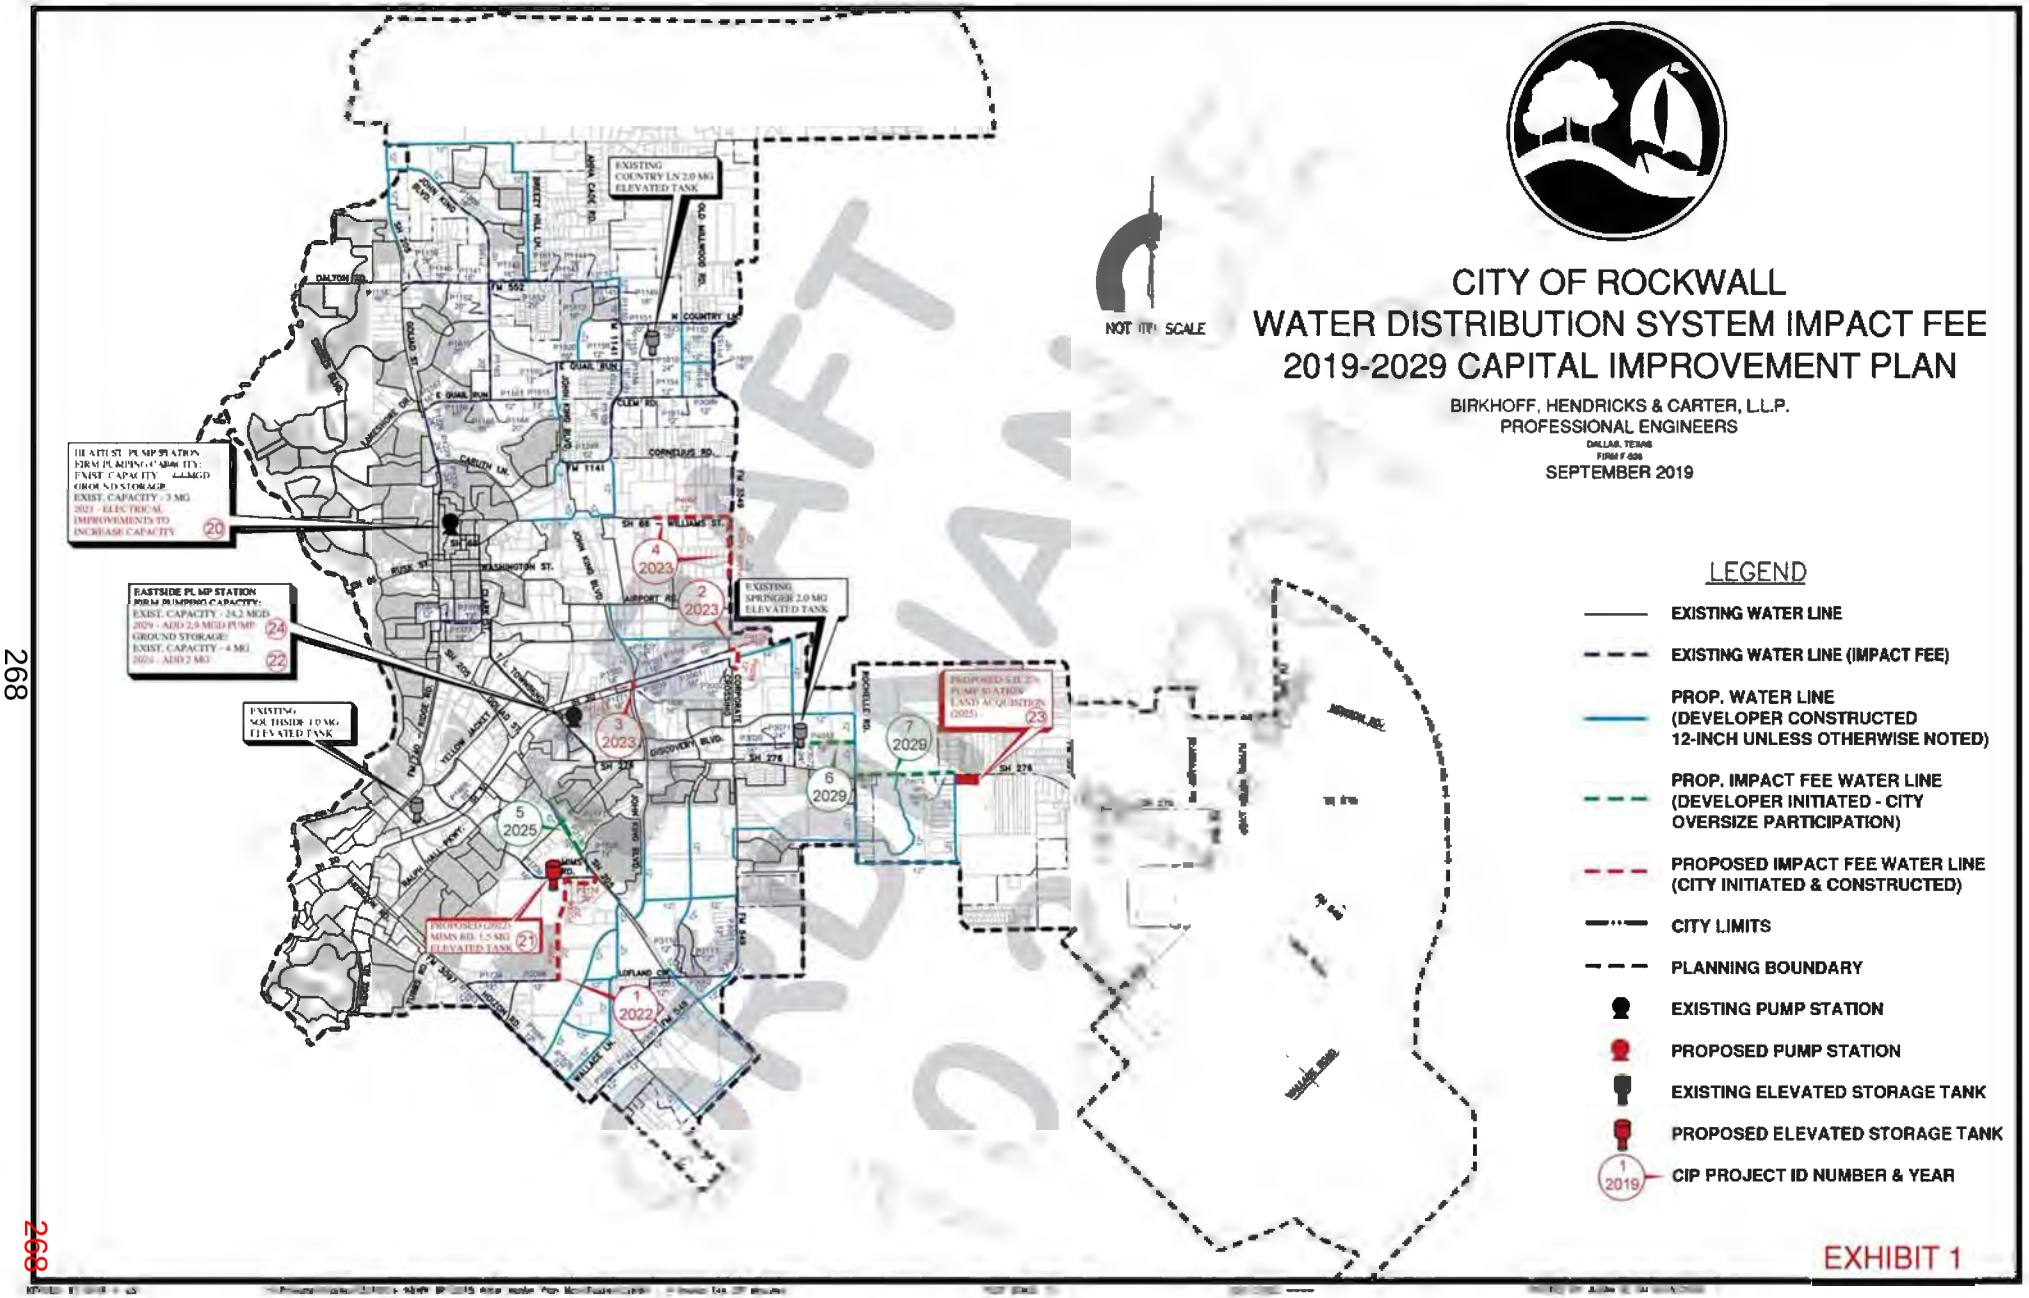
c) Raw Water Pump Stations

d) Treatment Plant and Expansion

e) High Service Pump Stations

f) Transmission Lines

g) NTMWD Owned Ground Storage Facilities



NTMWD has indicated that determining Rockwall's portion of cost for these items would not be possible, thus these costs have not been included in this analysis.

4. Water Distribution System Capital Improvement Projects for Impact Fees

In order to meet the demands of the anticipated growth over the next 10-years, as provided in the Land Use Assumptions prepared by the City of Rockwall, certain water distribution system improvements are required. **Exhibit 1** shows the recommended water system improvements and **Table No. 7** itemizes each project and the project cost in 2019 dollars. These recommended improvements form the basis for the water system impact fee calculation.

The capital improvement plan for impact fees provides for system improvements within the defined Service Area Planning Boundary. Most of the capital improvements are within the city limits, as requested by the City due to new State of Texas Annexation Laws.

PLANNING EXPENSES

Year		Project Description			Engineering Services	Debt Service (B)	Total Project Cost
2019		Water & Wastewater System Master Plan & Impact Fee Analysis			$ 74,675		$ 74,675
		Subtotal: Planning Expenses			**$ 74,675**	**$ -**	**$ 74,675**
		GRAND TOTAL: WATER DISTRIBUTION 10-YEAR CIP			**$ 15,109,073**	**$ 7,893,060**	**$ 23,002,133**

(A) Opinion of Cost includes:
a) Engineer's Opinion of Construction Cost
b) Professional Services Fees (Survey, Engineering, Testing, Legal)
c) Cost of Easement or Land Acquisitions

(B) Debt Service Based on 20-Year Simple Interest Bonds at 5%

DRAFT ORDINANCE 10.21.19

5. Utilized Capacity

Utilized capacity for the water distribution system was calculated based on the water line size required for each model year (2019, 2029 and buildout). Analysis of the water distribution system is based on the maximum daily demand, maximum hourly demand, and the minimum hourly demand. Pump station capacity is generally based on the maximum daily system demand while transmission and distribution facilities are sized based on either the maximum hourly demand or the minimum hourly demand, whichever demand is greater for a particular water line. Often times, the capacity of water lines are determined by the flows generated by the minimum hourly demand. The minimum hourly flows are usually higher in those lines that are used to refill elevated storage. For each line segment in the water distribution model, the maximum buildout flow rate in the line was compared to the flow rate in the same line segment for the 2019 and the 2029 models.

The percent utilized capacity was then calculated for each year based on the buildout capacity. The utilized capacity during the Impact Fee period is the difference between the year 2029 capacity and the year 2019 capacity. **Table No. 8** below summarizes the project cost and utilized capacity cost over the Capital Recovery Period (CRP) of 2019 - 2029 for each element of the Water Distribution System. The utilized capacity for each water distribution facility, both existing and proposed, is presented in detail in Impact Fee Capacity Calculation **Table Nos. 9, 10, 11, 12, 13 and 14.**

Table No. 8

Summary of Eligible Water Distribution Project Cost and Utilized Capacity Cost

Water System Facility	20-Year Project Cost	Utilized Capacity ($) In the CRP
Existing Pump Stations & Storage	$24,635,679	$8,804,864
Existing Transmission/Distribution Lines	$14,222,504	$2,863,156
Proposed Pump Stations & Storage	$17,499,436	$15,502,253
Proposed Transmission/Distribution Lines	$5,428,022	$3,005,499
CCN Acquisition	$5,048,042	$656,510
Planning Expenses	$74,675	$74,675
Total:	**$66,908,358**	**$30,906,957**

DRAFT ORDINANCE 10.21.19

281

E. WASTEWATER COLLECTION SYSTEM

Computer models for the years 2019, 2029 and Buildout were prepared by Birkhoff, Hendricks & Carter L.L.P. The models were developed and peak flows calculated from the residential population and non-residential land use projections prepared by the City of Rockwall's Planning Department. Computer models were run to determine peak wet weather flow to insure proper sizing of the collection system.

1. Collection Lines

The natural creeks, whose basins will collect wastewater through the installed system of collection lines that flow into the geographic treatment area serviced by the NTMWD.

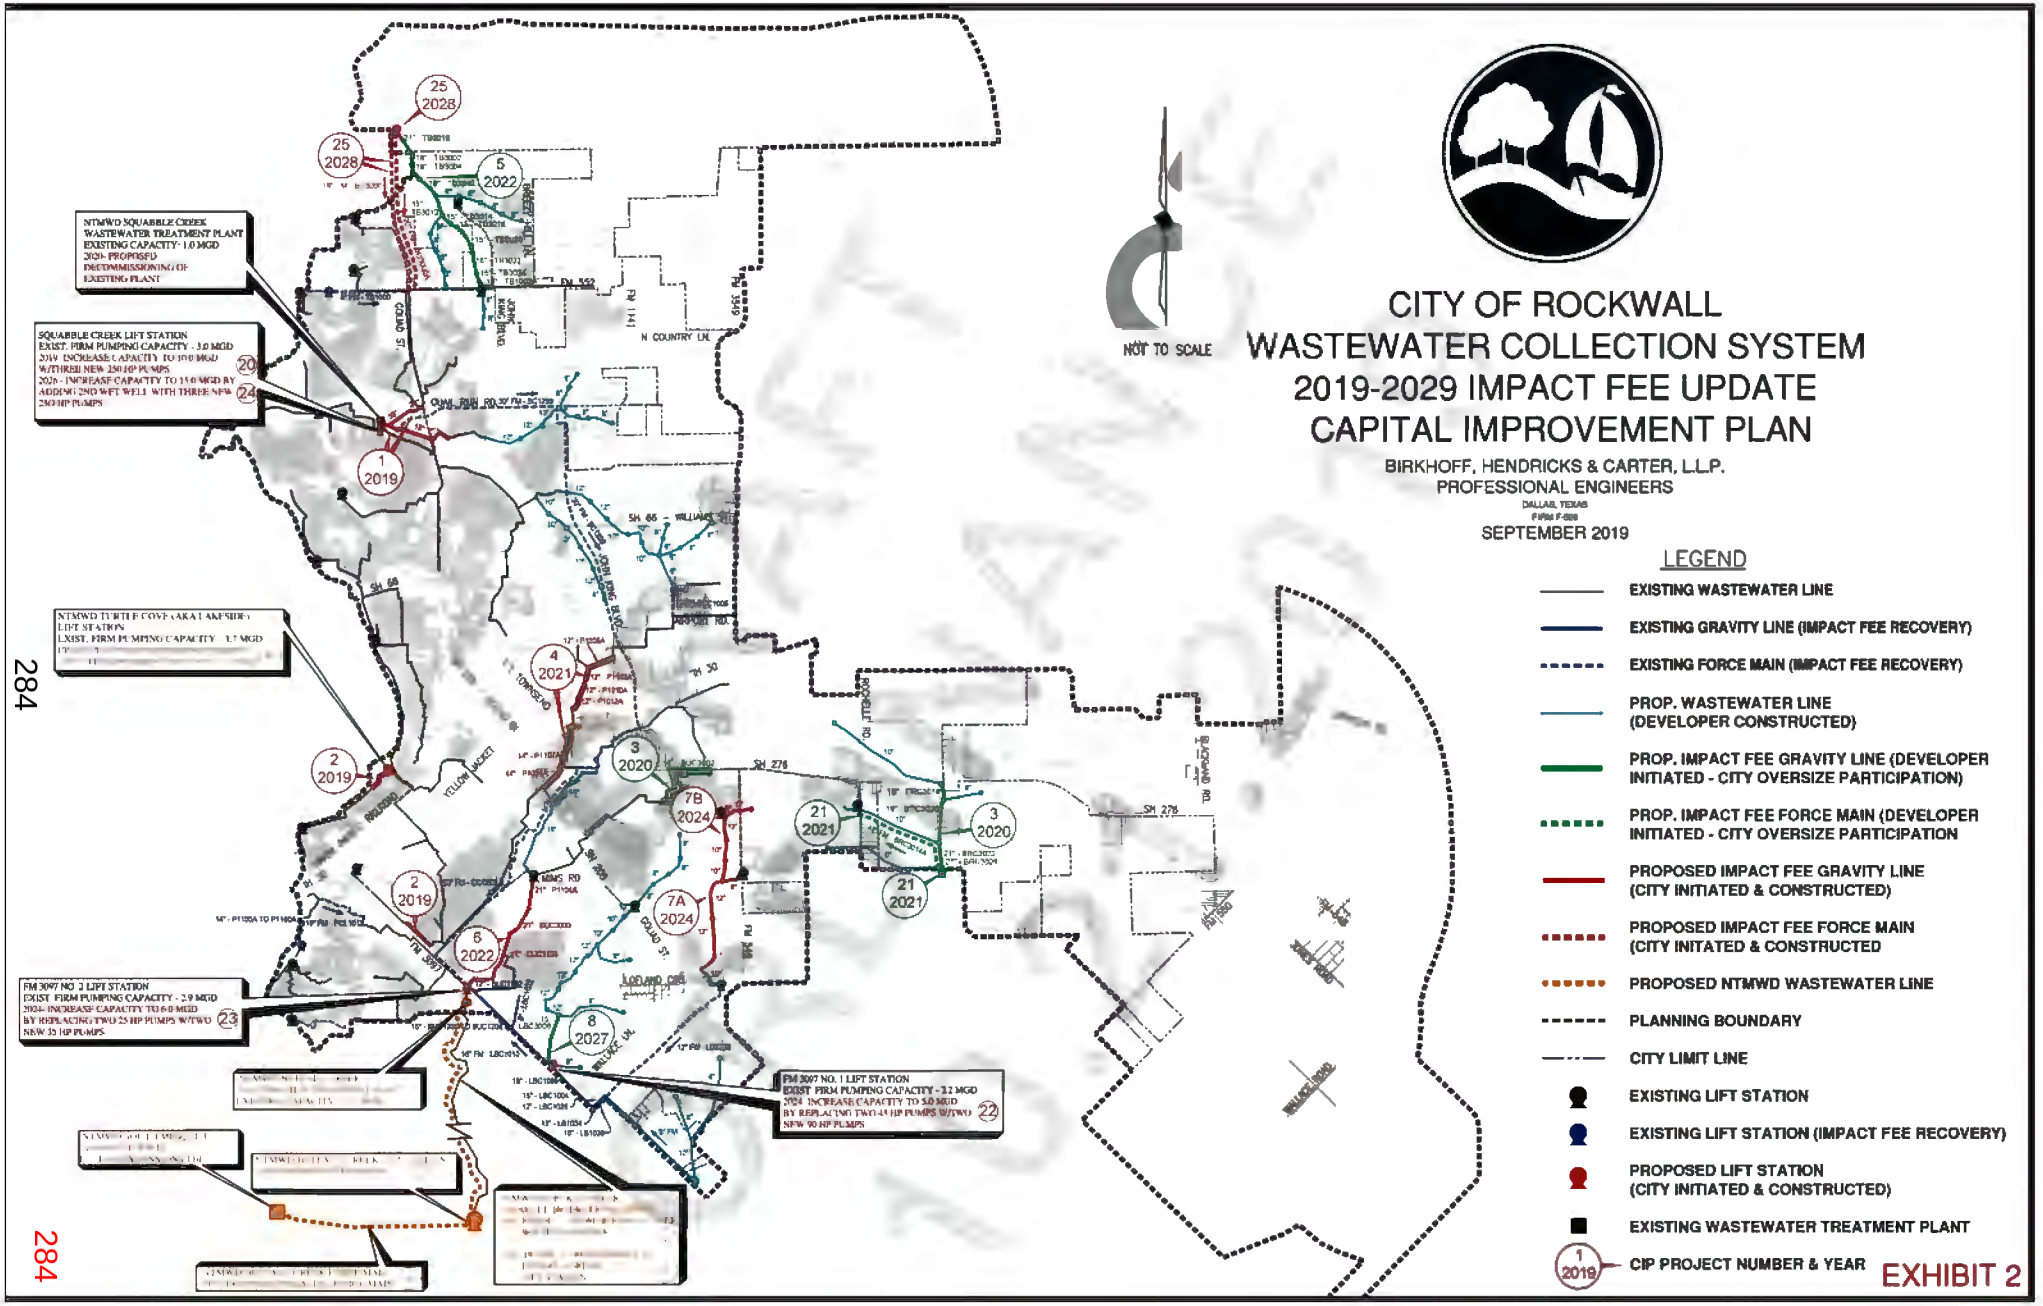
The wastewater collection system analysis covered all of the drainage basins within the Service Area planning boundary. Each collection system was analyzed for line sizes 12-inches in diameter and larger. Eliminating line sizes smaller than 12-inches in diameter from the study leaves only the interceptor and trunk lines included in the study. The wastewater project costs include necessary appurtenances (manholes, lift stations, aerial crossings and the like), purchase of easements, utility relocation, pavement removal and replacement, and engineering costs. For existing Impact Fee projects, actual costs were utilized where known. Future project cost estimates were based on 2019 average unit cost per linear foot and includes engineering, easements, and construction cost.

All eligible wastewater collection line projects in the Service Area planning boundary were included in the impact fee analysis. Eligible existing and proposed wastewater facilities are shown on **Exhibit 2** and have capacity for future growth.

2. Treatment

The North Texas Municipal Water District (NTMWD) provides the City of Rockwall with the entirety of wastewater treatment. NTMWD owns and operates the Squabble Creek and Buffalo Creek Wastewater Treatment Plants (WWTP). Excess flows above the permit levels of the Squabble Creek and Buffalo Creek WWTP's are conveyed to the NTMWD Buffalo Creek Regional system. Rockwall pays NTMWD for the cost of this service according to the City's percentage of wastewater flow contributions in any given year.

DRAFT ORDINANCE 10.21.19



This Impact Fee study includes the cost of NTMWD regional collection and transportation, and facilities located within the City's Service Area planning boundary that were paid for by NTMWD. Existing treatment plant and future treatment plant expansion costs of NTMWD were included in this Impact Fee analysis.

3. Wastewater System Capital Improvement Projects for Impact Fees

The 10-year Wastewater System Capital Improvement Plan for Impact Fees was developed by Birkhoff, Hendricks & Carter L.L.P. **Exhibit 2** shows the recommended system improvements and **Table No. 15** itemizes each project and the project cost. These recommended improvements form the basis for the Wastewater System Impact Fee Calculation.

The capital improvement plan for impact fees provides for system improvements within the defined Service Area Planning Boundary.

			Total: NTMWD Wastewater System Improvements:		**$ 60,964,600**	**$ -**	**$ 60,964,600**

(A) Opinion of Cost includes:
a) Engineer's Opinion of Construction Cost
b) Professional Services Fees (Survey, Engineering, Testing, Legal)
c) Cost of Easement or Land Acquisitions

Notes: 1. City obligations estimated based on City of Rockwall's contracted proportion or historical usage of NTMWD Regional Systems.
2. 10-Year CIP for NTMWD Regional Systems based on project listings provided for "Summary of Sewer System CIP" and "Summary of Regional Wastewater System CIP", both dated May 11, 2018.

PLANNING EXPENSES

	Project Description	Engineering Services	Opinion of Project Cost (A)
2029	Wastewater Masterplan & Impact Fee Update	$ 59,850	$ 59,850
		Total: Planning Expenses:	**$ 59,850**
Grand Total, City of Rockwall & NTMWD Wastewater System Improvements:			**$ 98,328,890**

DRAFT ORDINANCE 10.21.19

4. Utilized Capacity

Utilized capacity for the wastewater collection system was calculated based on land use assumptions prepared by the City of Rockwall. The population and non-residential growth in each wastewater drainage basin was determined utilizing the City's growth projections. These growth rates were utilized to calculate 2019, 2029 and buildout peak design flows.

The percent-utilized capacity was calculated for the design flow of each study year based on the buildout capacity. The utilized capacity during the Impact Fee period is the difference between the year 2019 capacity and the year 2029 capacity. **Table No. 16** below summarizes the project cost and utilized cost over the impact fee period of 2019 – 2029. The utilized capacity for each eligible existing and proposed wastewater collection line is presented in detail in the Impact Fee Capacity Calculation **Table Nos. 17 and 18**. **Table No. 19** summarizes the utilized capacity of lift stations eligible for impact fee recovery. **Table 20** summarizes the utilized capacity of NTMWD facilities eligible for impact fee recovery. **Table 21** includes the summary of utilized capacity allocation between the City of Rockwall and NTMWD.

TABLE NO. 16

Summary of Eligible Wastewater System Project Cost and Utilized Capacity Cost

Wastewater System Facility	20-Year Project Cost	Utilized Capacity ($) in the CRP Period
Existing Wastewater Collection Line	$12,344,474	$3,863,647
Existing Wastewater Facilities	$6,402,514	$629,875
Proposed Wastewater Collection Line	$12,426,705	$9,608,437

Proposed NTMWD Facility Total						**$ 60,964,600**		**$ 60,964,600**							**$ 20,229,523**	**$ 29,856,651**	**$ 9,627,128**

Utilized Capacity for Regional NTMWD Treatment Facilities calculated using proportion of years 2019 & 2029 population to build-out population.

296

Notes: 1. City obligations estimated based on City of Rockwall's historical usage of NTMWD Regional Systems.
2. 10-Year CIP for NTMWD Regional Systems based on project listings provided for "Summary of Sewer System CIP" and "Summary of Regional Wastewater System CIP", both dated May 11, 2018.
3. Funded by NTMWD, 100% City Responsibility
4. Part of NTMWD Buffalo Interceptor System, assumed 59% City Responsibility
5. Part of NTMWD Regional Systems, assumed 2.915% City Responsibility
6. Utilized capacities for NTMWD facilities were determined using the proportion of the existing and projected 2029 population as compared to the build-out population.

DRAFT ORDINANCE 10.21.19

TABLE NO. 21

Summary of Utilized Capacity Allocation between City of Rockwall & NTMWD Wastewater System

	CITY OF ROCKWALL Utilized Capacity		NTMWD Utilized Capacity		TOTAL	
	($)	%	($)	%	($)	%
Existing Wastewater System	$ 4,493,522	100.00%	$ -	0.00%	$ 4,493,522	100%
Proposed Wastewater System & Planning Cost	$ 27,861,621	74.32%	$ 9,627,128	25.68%	$ 37,488,749	100%
TOTAL	**$ 32,355,143**	**77.07%**	**$ 9,627,128**	**22.93%**	**$ 41,982,271**	**100%**

DRAFT ORDINANCE 10.21.2019

F. CALCULATION OF MAXIMUM IMPACT FEES - WATER & WASTEWATER

Chapter 395, of the Local Government Code allows the maximum impact fee to be charged if revenues from Future Ad Valorem Taxes, and water and sewer bills are included as a credit in the analysis. If not, the Act allows the maximum assessable fee to be set at 50% of the calculated maximum fee. The maximum impact fees for the water and wastewater systems are calculated separately by dividing the cost of the capital improvements or facility expansions necessitated and attributable to new development in the Service Area within the ten year period by the number of living units anticipated to be added to City within the ten year period. To simplify collection, we recommend the fee remain fixed throughout the 5-year period, unless changed by Council.

The **Water System** impact fee for a 5/8" meter is calculated as follows:

$$\text{Maximum Impact Fee} = \frac{\text{Eligible Existing Facility Cost} + \text{Eligible Proposed Facility Cost}}{\text{Number of New Living Unit Equivalent over the Next 10-Years}}$$

$$= \frac{\$12,324,530 + \$18,582,427}{9,846} = \frac{\$30,906,957}{9,846}$$

Calculated Water Maximum Impact Fee = $3,139.04 *

* Maximum Allowable Water Impact Fee is 50% of the Calculated Water Maximum Impact Fee

Maximum Assessable Water Impact Fee = $3,139.04 X 50% = $1,569.52

The **Wastewater System** impact fee for a 5/8" water meter is calculated as follows:

$$\text{Maximum Impact Fee} = \frac{\text{Eligible Existing Facility Cost} + \text{Eligible Proposed Facility Cost}}{\text{Number of New Living Unit Equivalent over the Next 10-Years}}$$

$$= \frac{\$4,493,522 + \$37,488,749}{8,710} = \frac{\$41,982,271}{8,710}$$

Calculated Water Maximum Impact Fee = $4,820.01 *

* Maximum Allowable Water Impact Fee is 50% of the Calculated Water Maximum Impact Fee

Maximum Assessable Wastewater Impact Fee = $4,820.01 X 50% = $2,410.00

Table No. 22 summarizes the per service unit equivalent maximum assessable impact fee that can be charged based on the calculated 50% credit above.

DRAFT ORDINANCE 10.21.19

TABLE NO. 22

CASE NUMBER:	Z2019-021; *Amendment to Planned Development District 79 (PD-79)*

SUMMARY

Hold a public hearing to discuss and consider a request by Pat Atkins of KPA Consulting, Inc. on behalf of the owners Gwen Reed, Saddle Star South Holdings, LLC, and CDT Rockwall/2017, LLC for the approval of a zoning amendment to Planned Development District 79 (PD-79) [*Ordinance No. 16-39*] for the purpose of amending the development standards and concept plan on a 70.408-acre tract of land identified as Tracts 1, 1-03, 1-5 & 2-03 of the P. B. Harrison Survey, Abstract No. 97, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 79 (PD-79) for Single-Family 8.4 (SF-8.4) District land uses, situated within the SH-205 By-Pass Overlay (SH-205 BY-OV) District, located on the north side of John King Boulevard south of Featherstone Drive, and take any action necessary.

BACKGROUND

On January 4, 2016, the City Council approved Planned Development District 79 (PD-79) [*Case No. Z2015-034; Ordinance No. 16-07*], which rezoned a 45.292-acre portion of the subject property from an Agricultural (AG) District to a Planned Development District establishing an entitlement for a single-family residential subdivision consisting of 113 single-family lots. On May 16, 2019, the applicant voluntarily annexed an additional 11.121-acre tract of land [*A2016-001*] and amended Planned Development District 79 (PD-79) [*Z2016-015; Ordinance No. 16-39*], incorporating this property into the subdivision. The annexation created a 55.413-acre residential subdivision. The amendment to PD-79 also increased the lot count from 113 to 138 lots, and granted an increase in the maximum front entry garages from 0% to 50%. On January 22, 2019, the applicant voluntarily annexed an additional 14.995-acre tract of land [*A2018-004*] with the intent of incorporating it into Planned Development District 79 (PD-79).

PURPOSE

On September 13, 2019, the applicant submitted an application requesting to amend PD-79 [*Ordinance No. 16-39*] for the purpose of amending the development standards and concept plan by incorporating the additional 14.995-acre tract of land into the existing 55.413-acre tract of land to create an additional phase (*i.e. Phase III*) for the Saddle Star Estates Subdivision. This amendment would increase the total acreage of the subdivision to 70.408-acres.

ADJACENT LAND USES AND ACCESS

The subject property is located on the north side of John King Boulevard south of Featherstone Drive. The land uses adjacent to the subject property are as follows:

North: Directly north of the subject property is the corporate boundaries of the City of Rockwall followed by two (2) single-family homes on large tracts of land situated within the City's Extraterritorial Jurisdiction (ETJ).

South: Directly south of the subject property is John King Boulevard, which is identified as a P6D (*principle arterial, six [6] lane, divided roadway*) on the City's Master Thoroughfare Plan. Beyond this is a 67.50-acre tract of land (*i.e. Tracts 2-01, 2-04 & 2-05, of the P. B. Harrison Abstract No. 97*) zoned Agricultural (AG) District.

East: Directly east of the subject property is the corporate limits of the City of Rockwall followed by Park Ridge Estates and Windmill Valley Subdivisions. Both subdivisions are situated within the City's Extraterritorial Jurisdiction (ETJ).

West: Directly south of the subject property is John King Boulevard, which is identified as a P6D (*principle arterial, six [6] lane, divided roadway*) on the City's Master Thoroughfare Plan. Beyond this arterial is a vacant property zoned Planned Development District 70 (PD-70) for Single Family 10 (SF-10) District land uses. This is scheduled to be the final phase of the Stone Creek Subdivision.

CHARACTERISTICS OF THE REQUEST

Currently, Planned Development District 79 (PD-79) [*Ordinance No. 16-39*] allows the applicant to construct 138, 70' x 125' single-family lots on 55.413-acres. The proposed amendment would increase the size of the proposed subdivision to 70.408-acres (*i.e. adding an additional 14.995-acres*) and add an additional five (5), 70' x 125' lots and 33, 80' x 125' single family lots. The new lot product would be subject to all of the same standards as the existing lot type; however, the applicant would be incorporating 100% j-swing or traditional swing garages with the 80' x 125' as opposed to the 50% flat front entry currently permitted on 138, 70' x 125' lot product. As a note the applicant would be adding an addition five (5) lots of which 50% would be able to be flat front entry. A summary of the resulting lot mix and development standards is as follows:

Table 2: Lot Dimensional Requirements

Lot Type >	*A*	*B*
Minimum Lot Width [1]	70'	80'
Minimum Lot Depth	125'	125'
Minimum Lot Area	8,750 SF	10,000 SF
Minimum Front Yard Setback [2] & [5]	20'	20'
Minimum Side Yard Setback	5'	5'
Minimum Side Yard Setback (Adjacent to a Street) [2] & [5]	10'	10'
Minimum Length of Driveway Pavement	25'	25'
Maximum Height [3]	30'	30'
Minimum Rear Yard Setback [4]	20'	20'
Minimum Area/Dwelling Unit (SF)	2,700 SF	2,700 SF
Maximum Lot Coverage	65%	65%
Permitted Encroachment into Required Setbacks [5]	Allowed	Allowed

General Notes:

[1]: The minimum lot width shall be measured at the *Front Yard Building Setback*.

[2]: The location of the *Front Yard Building Setback* as measured from the front property line.

[3]: The *Maximum Height* shall be measured to the eave or top plate (whichever is greater) of the single-family home.

[4]: As measured from the rear yard property line.

[5]: Sunrooms, porches, stoops, bay windows, balconies, masonry clad chimneys, eaves and similar architectural features may encroach beyond the *Front Yard Building Setback* by up to ten (10) feet for any property; however, the encroachment shall not exceed five (5) feet on *Side Yard Setbacks (Adjacent to a Street)* and shall not encroach into public right-of-way [a *Sunroom* is an enclosed room no more than 15-feet in width that has glass on at least 50% of each of the encroaching faces].

INFRASTRUCTURE

Based on the applicant's request to rezone the subject property, the following infrastructure will be required to be constructed in order to provide adequate public services to the subject property:

Water: The City does not currently have the rights to serve the proposed 14.995-acre addition to Planned Development District 79 (PD-79). The applicant will need to work with Mt. Zion Water Supply Corporation to secure the right for the City of Rockwall to serve the additional acreage.

Wastewater: The lift station located at John King Boulevard and FM-552 is not currently sized to serve the proposed 14.995-acre addition to Planned Development District 79 (PD-79). The applicant will be required to perform an infrastructure study to determine the upgrades necessary to meet the required capacity.

All proposed infrastructure improvements must meet the Engineering Department's *Standards of Design and Construction*.

CONFORMANCE WITH THE CITY'S CODES

The changes to Planned Development District 79 (PD-79) do not change the conformance of the proposed subdivision with regards to the City's existing codes.

CONFORMANCE WITH OURHOMETOWN VISION 2040 COMPREHENSIVE PLAN

Since the applicant's request does not change the underlying use of the majority of the property and the additional 14.995-acre tract of land being incorporated into the PD is being rezoned in conformance with the Future Land Use Map (*i.e. to a Low Density Residential designation*) the request does not change Planned Development District 79 (PD-79) conformance to the OURHometown Vision 2040 Comprehensive Plan. With regard to the goals and policies contained in this document, the following goals and policies apply to the applicant's request:

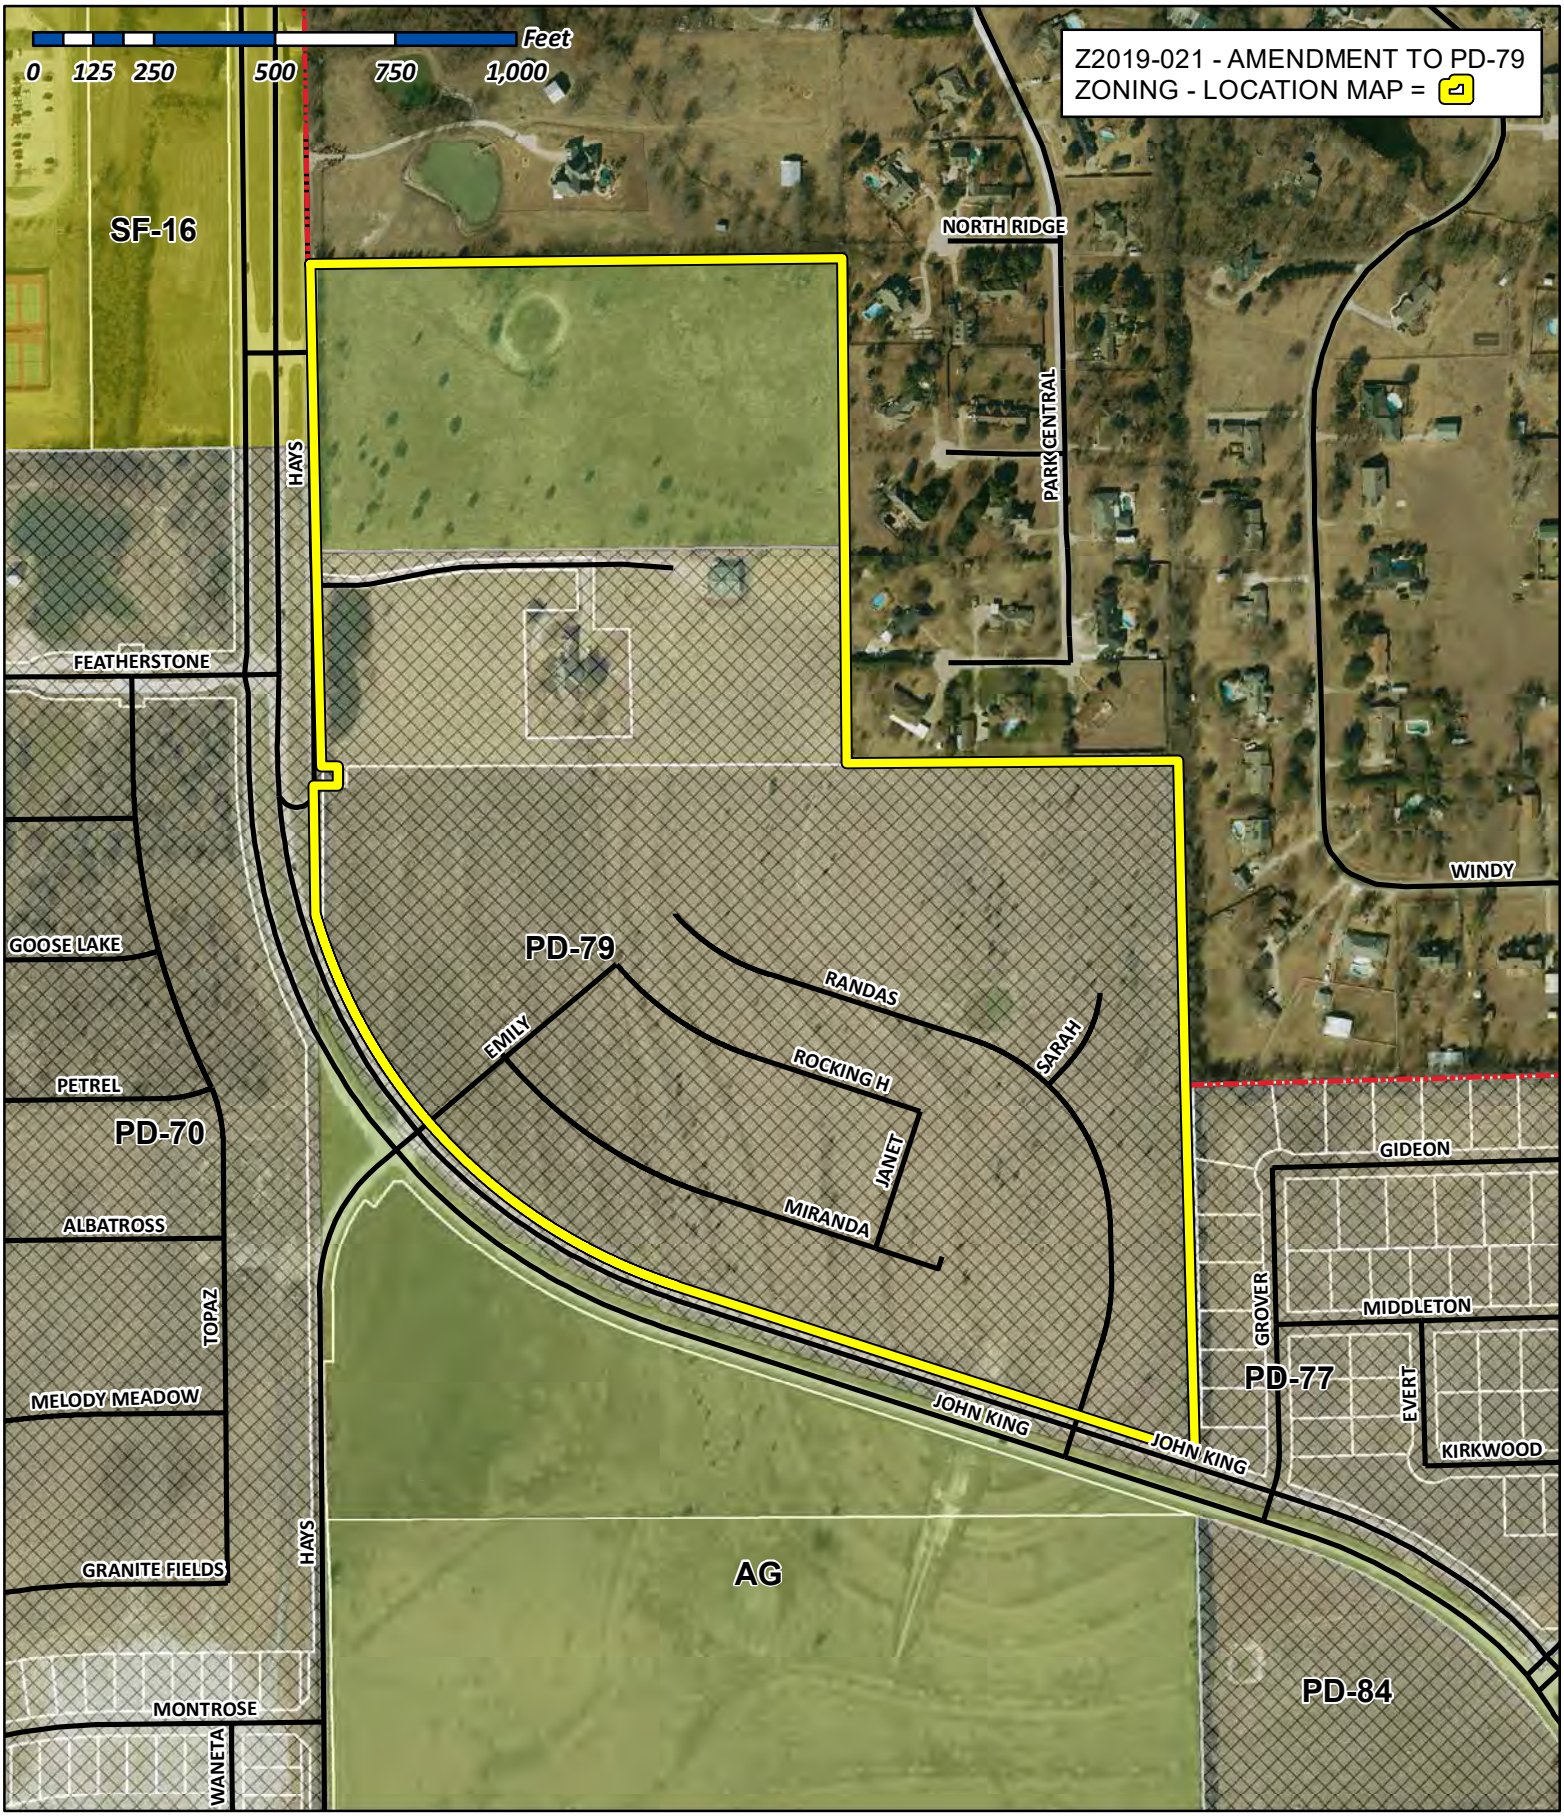
(1) *Chapter 8; Section 2.03; Goal 3; Policy 3:* In cases where flat front entry garages (*i.e. even with the front façade of the primary structure*) are requested as part of a development, no greater than 20% should be incorporated into the development. In addition, flat front entry garages should have a minimum of a 25-foot front yard building setback to allow vehicles to be parked in the driveway without overhanging public right-of-way. This type of garage may not be appropriate for all developments and should be generally discouraged.

In this case, Planned Development District 79 (PD-79) was approved with 50% flat front entry garages. The proposed amendment would actually reduce the number of flat front entry garages in the subdivision to 40.625% bringing it closer to conforming to the current goals and policies of the Comprehensive Plan. With this being said the applicant's request to amend the existing Planned Development District is a discretionary decision for the City Council.

NOTIFICATIONS

On September 20, 2019, staff mailed nine (9) notices to property owners and residents within 500-feet of the subject property. Staff also emailed notices to the Stone Creek and Stoney Hollow Homeowner's Associations (HOA's), which are the only HOA's located within 1,500 feet of the subject property participating in the notification program. Additionally, staff posted a sign adjacent to the subject property along N. Goliad Street [*SH-205*] and advertised the public hearings in the Rockwall Herald Banner as required by the Unified Development Code (UDC). At the time this case memo was drafted, staff had received one (1) notice from the City's online portal opposed to the applicant's request.

CONDITIONS OF APPROVAL



If the City Council chooses to approve the applicant's request to amend Planned Development District 79 (PD-79), then staff would propose the following conditions of approval:

(1) The applicant shall be responsible for maintaining compliance with the conditions contained within the *Planned Development District* ordinance;

(2) Any construction resulting from the approval of this zoning change shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION

On October 8, 2019, the Planning and Zoning Commission's motion to recommend approval of the amendment to Planned Development District 79 (PD-79) with staff conditions passed by a vote of 7-0.

CITY OF ROCKWALL, PLANNING & ZONING DEPARTMENT

PHONE: (972) 771-7745
EMAIL: PLANNING@ROCKWALL.COM

To Whom It May Concern:

You are hereby notified that the City of Rockwall Planning and Zoning Commission and City Council will consider the following application:

Case No. Z2019-021: Saddle Star South

Hold a public hearing to discuss and consider a request by Pat Atkins of KPA Consulting, Inc. on behalf of the owners Gwen Reed, Saddle Star South Holdings, LLC, and CDT Rockwall/2017, LLC for the approval of a zoning amendment to Planned Development District 79 (PD-79) [Ordinance No. 16-39] for the purpose of amending the development standards and concept plan on a 70.408-acre tract of land identified as Tracts 1, 1-03, 1-5 & 2-03 of the P. B. Harrison Survey, Abstract No. 97, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 79 (PD-79) for Single-Family 8.4 (SF-8.4) District land uses, situated within the SH-205 By-Pass Overlay (SH-205 BY-OV) District, located on the north side of John King Boulevard south of Featherstone Drive, and take any action necessary.

For the purpose of considering the effects of such a request, the Planning and Zoning Commission will hold a public hearing on **Tuesday, 10/8/2019 at 6:00 p.m.,** and the City Council will hold a public hearing on **Monday, 10/21/2019 at 6:00 p.m.** These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street.

As an interested property owner, you are invited to attend these meetings. If you prefer to express your thoughts in writing please return the form to:

David Gonzales
Rockwall Planning and Zoning Dept.
385 S. Goliad Street
Rockwall, TX 75087

You may also email your comments to the Planning Department at planning@rockwall.com. If you choose to email the Planning Department please include your name and address for identification purposes.

Your comments must be received by **10/21/2019** to ensure they are included in the information provided to the City Council.

Sincerely,

Ryan Miller, AICP

Zoning & Specific Use Permit Input Form

Case Number *

Please provide the Case Reference Number of the Zoning or Specific Use Permit (SUP) request that you are providing input on (Example: Z2019-001).

Z2019-024.

Please place a check mark on the appropriate line below: *

- [ ] I am in favor of the request.
- [x] I am in opposition to the request.

Please provide any additional information concerning your support or opposition to the request.

Why are you allowing a developer to increase the development site up to 70 acres without a traffic study? John King was supposed to offer a way around the traffic mess created for residents living in the north part of the county due to runaway development you allowed along Hwy. 205. Also, it appears the city's water and sewer infrastructure won't support this increase in the number of houses either. So why the push for a large, unnecessary development that will likely lower the quality of life for existing residents?

TRACT ONE

BEING 44.292 acres of land situated in the P.B. Harrison Survey, Abstract No. 97, Rockwall County, Texas, and being part of two tracts of land, the "First Tract" being a called 32.5 acres and the "Second Tract" being a called 32 acres, described in a Special Warranty Deed to R & R Hance Investments, L.P., recorded as Instrument No. 2008-00396963 and in Volume 5433, Page 49 of the Deed Records of Rockwall County, Texas (DRRCT), SAVE AND EXCEPT the called "Parcel 16 (Parts 1 and 2)" conveyed to the City of Rockwall, recorded as Instrument No. 2007-00380919 and in Volume 5124, Page 210 (DRRCT), and being more particularly described as follows:

BEGINNING at a 1/2" capped iron rod stamped, "6081," found for corner in the northeasterly right-of-way line of John Kind Boulevard (variable width right-of-way) at the common north corner of said "Part 1" of Parcel 16 and called "Parcel 15" conveyed to the City of Rockwall, recorded as Instrument No. 2009-00424601 and in Volume 5951, Page 84 (DRRCT), said point also being in the common line of said "First Tract" and a called 29.185 acre tract of land conveyed to Gideon Grove Ltd., recorded as Instrument No. 20150000014609 of the Official Public Records of Rockwall County, Texas;

THENCE North 72°06'44" West along the common northeasterly line of said John Kind Boulevard and said Part 1, a distance of 1,126.56 feet to a point for corner at the beginning of a tangent curve to the right, having a radius of 1,140.00 feet and a chord which bears North 44°02'06" West, a distance of 1,073.12 feet;

THENCE in the northwesterly direction along said curve to the right, and last mentioned common line, through a central angle of 56°09'19", an arc distance of 1,117.31 feet to a 1/2" iron rod with a yellow cap stamped, "RPLS 3963," set for corner at the end of said curve and at the most northerly corner of said Part 1;

THENCE North 00°38'27" West continuing along the east right-of-way line of said John Kind Boulevard, a distance of 261.96 feet to a "PK" nail set for corner at the southwest corner of said Part 2;

THENCE North 89°38'44" East along the south line of said Part 2, a distance of 50.00 feet to a 1/2" iron rod with a yellow cap found for the southeast corner thereof;

317

THENCE North 00°38'27" West along the east line of said Part 2, a distance of 40.00 feet to a 1/2" iron rod with a yellow cap found for the northeast corner thereof in the north line of said Second Tract and being in the south line of a tract of land conveyed to Randy and Gwen Reed, recorded in Volume 260, Page 1 (DRRCT);

THENCE North 89°38'05" East along the common line of last mentioned tracts, at 1,051.89 feet passing a 1/2" iron rod found for the southeast corner of said Reed tract common to the southwest corner of Park Ridge Estates, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 390 of the Plat Records of Rockwall County, Texas (PRRCT), and continuing along the north line of said Second Tract and the south line of said Park Ridge Estates, a total distance of 1,736.25 feet to a 3/8" iron rod found for the common east corner thereof, and being in the west line of Block A of Windmill Valley Subdivision, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 157 (PRRCT);

THENCE South 01°17'27" East along the common line of said Second Tract and said Block A, a distance of 669.75 feet to a 1/2" iron rod found for the southwest corner of said Block A, and being the northwest corner of said 29.185 acre tract;

THENCE South 01°30'45" East along the west line of said 29.185 acre tract and partially along the east lines of said First Tract and said Second Tract, a distance of 761.52 feet to the PLACE OF BEGINNING and Containing 44.292 acres, or 1,929,345 square feet, of land.

TRACT TWO

BEING 11.121 acres of land situated in the P.B. Harrison Survey, Abstract No. 97, Rockwall County, Texas, and being all of a called 11.126 acre tract of land described in a Warranty Deed with Vendor's Lien to Randy Reed and wife, Gwen Reed, recorded in Volume 260, Page 1 of the Deed Records of Rockwall County, Texas (DRRCT), and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner near the edge of an asphalt surface in the east margin of Hays Road, said point also being the common west corner of said Reed tract and a tract of land conveyed to Stephen L. Branch and Judy C. Branch, recorded in Volume 234, Page 527 (DRRCT);

318

THENCE North 89°26'12" East along the common line of last mentioned tracts, a distance of 1,092.52 feet to a 1/2" iron rod found for the common east corner thereof, and being in the west line of Park Ridge Estates, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 390 of the Plat Records of Rockwall County, Texas (PRRCT);

THENCE South 00°30'07" East along the common line of said Reed tract and said Park Ridge Estates, a distance of 446.60 feet to a 1/2" iron rod found for the common south corner thereof, and being in the north line of a called 32 acre tract described in a Special Warranty Deed to R & R Hance Investments, L.P., as "Second Tract," recorded as Instrument No. 2008-00396963 and in Volume 5433, Page 49 (DRRCT);

THENCE South 89°38'05" West along the common line of said Second Tract and said Reed tract, a distance of 1,086.19 feet to a 1/2" iron rod found at the southwest corner of said Reed tract and being in the east margin of said Hays Road;

THENCE North 01°19'17" West along the west line of said Reed tract and the east line of said Hays Road, a distance of 442.88 feet to the PLACE OF BEGINNING and Containing 11.121 acres, or 484,450 square feet, of land.

319

TRACT THREE

BEING 14.955 acres of land situated in the P.B. Harrison Survey, Abstract No. 97, Rockwall County, Texas, and all of a called 15.00 acre tract of land described in a Warranty Deed to Steve L. Branch and wife Judy C. Branch, recorded in Volume 234, Page 527 of the Deed Records of Rockwall County, Texas (DRRCT), and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner in the original Hays Road at the common west corner of said 15.00 acre tract and a tract of land described in a deed to Randy and Gwen Reed, recorded in Volume 260, Page 1 (DRRCT);

THENCE North 01°10'15" West, continuing along and within Hays Road and with the west line of said 15.00 acre Branch tract, a distance of 596.15 feet, to a 1/2" iron rod found for corner at the northwest corner thereof, common to the southwest corner of a called 15.00 acre tract of land described in a deed to Gerald Glen Cox and wife Rosalba Cox, recorded in Volume 3295 Page 9, (DRRCT);

THENCE North 89°26'26" East, along the common line of last mentioned tracts, a distance of 1,099.11 feet, to a point for corner at the common east corner thereof, and also being in the west line of Park Ridge Estates, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 390 of the Plat Records of Rockwall County, Texas (PRRCT), from which a 1/2" iron rod with a yellow cap stamped "5034" bears South 68°26'26" West, a distance of 0.18 feet;

THENCE South 00°32'13" East, along the common line of said Branch tract and said Park Ridge Estates, a distance of 596.04 feet, to a 1/2" iron rod found for corner at the southeast corner thereof, common to the northeast corner of said Reed tract;

THENCE South 89°26'12" West, along the common line of last mentioned tracts, a distance of 1,092.52 feet to PLACE OF BEGINNING and Containing 653,191 square feet, or 14.995 acres of land.

320

CITY OF ROCKWALL

ORDINANCE NO. 19-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, SO AS TO FURTHER AMEND PLANNED DEVELOPMENT DISTRICT 79 (PD-79) [*ORDINANCE NO. 16-39*] FOR THE PURPOSE OF AMENDING THE DEVELOPMENT STANDARDS AND CONCEPT PLAN ON A 70.408-ACRE TRACT OF LAND, ZONED PLANNED DEVELOPMENT DISTRICT 79 (PD-79) FOR SINGLE FAMILY 8.4 (SF-8.4) DISTRICT LAND USES, BEING IDENTIFIED AS TRACTS 1, 1-03, 1-5 & 2-03 OF THE P. B. HARRISON SURVEY, ABSTRACT NO. 97, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has received a request by Pat Atkins of KPA Consulting, Inc. on behalf of the owners Gwen Reed, Saddle Star South Holdings, LLC, and CDT Rockwall/2017, LLC for the purpose of amending Planned Development District 79 (PD-79) [*Ordinance No. 16-39*] in order to change the development standards and concept plan for a 70.408-acre tract of land identified as Tracts 1, 1-03, 1-5 & 2-03 of the P. B. Harrison Survey, Abstract No. 97, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 79 (PD-79) for Single Family 8.4 (SF-8.4) District land uses, situated within the SH-205 By-Pass Overlay (SH-205 BY OV) District, generally located east of the intersection of Featherstone Drive and John King Boulevard, and more fully described in *Exhibit 'A'* of this ordinance, which hereinafter shall be referred to as the *Subject Property* and incorporated by reference herein; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the affected area, and in the vicinity thereof, and the governing body in the exercise of its legislative discretion, has concluded that Planned Development District 79 [*Ordinance No. 16-39*] and the Unified Development Code [*Ordinance No. 04-38*] should be amended as follows:

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:

Section 1. That the approval of this ordinance shall supersede all requirements stipulated in *Ordinance No. 16-39*;

Section 2. That the *Subject Property* shall be used only in the manner and for the purposes authorized by this Planned Development District Ordinance and the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall as heretofore amended, as amended herein by granting this zoning change, and as maybe amended in the future;

DRAFT ORDINANCE 10.21.19

Section 3. That development of the *Subject Property* shall generally be in accordance with the *Planned Development Concept Plan*, described in *Exhibit 'B'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'B'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

Section 4. That development of the *Subject Property* shall generally be in accordance with the *Development Standards*, described in *Exhibit 'C'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'C'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

Section 5. That development of the *Subject Property* shall be in conformance with the schedule listed below (*except as set forth below with regard to simultaneous processing and approvals*).

(a) The procedures set forth in the City's subdivision regulations on the date this ordinance is approved by the City, as amended by this ordinance (*including Subsections 5(b) through 5(g) below*), shall be the exclusive procedures applicable to the subdivision and platting of the *Subject Property*.

(b) The following plans and plats shall be required in the order listed below (*except as set forth below with regard to simultaneous processing and approvals*). The City Council shall act on an application for an *Open Space Master Plan* in accordance with the time period specified in *Section 212.009* of the *Texas Local Government Code*.

(1) Open Space Master Plan
(2) Master Plat
(3) PD Site Plan
(4) Preliminary Plat
(5) Final Plat

(c) *Open Space Master Plan.* An *Open Space Master Plan* for the *Subject Property*, prepared in accordance with this ordinance and consistent with the *Planned Development Concept Plan*, and shall be considered for approval by the City Council following recommendation of the Parks and Recreation Board.

(d) *Master Plat.* A *Master Plat* for the *Subject Property* shall be submitted and shall identify the proposed timing of each phase of the proposed development. A *Master Plat* application may be processed by the City concurrently with a *Open Space Master Plan* for the development.

(e) *PD Site Plan.* A *PD Site Plan* covering all of the *Subject Property* shall be submitted and shall identify all site/landscape/hardscape plan(s) for all open space, neighborhood parks, trail systems, street buffers and entry features. A *PD Site Plan* application may be processed by the City concurrently with a *Preliminary Plat* application for the development.

(f) *Preliminary Plat.* A *Preliminary Plat* covering all of the *Subject Property* shall be submitted and shall include a *Treescape Plan*. A *Preliminary Plat* application may be processed by the City concurrently with a *PD Site Plan* application for the development.

(g) *Final Plat.* Prior to the issuance of any building permits, a *Final Plat*, conforming to the *Preliminary Plat*, for all of the *Subject Property* shall be submitted for approval.

DRAFT ORDINANCE 2019

Section 6. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars* ($2,000.00) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

Section 7. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

Section 8. The standards in this ordinance shall control in the event of a conflict between this ordinance and any provision of the Unified Development Code or any provision of the City Code, ordinance, resolution, rule, regulation, or procedure that provides a specific standard that is different from and inconsistent with this ordinance. References to zoning district regulations or other standards in the Unified Development Code (including references to the *Unified Development Code*), and references to overlay districts, in this ordinance or any of the Exhibits hereto are those in effect on the date this ordinance was passed and approved by the City Council of the City of Rockwall, Texas;

Section 9. That this ordinance shall take effect immediately from and after its passage and the publication of the caption of said ordinance as the law in such cases provides;

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF NOVEMBER, 2019.

_____
Jim Pruitt, *Mayor*

ATTEST:

_____
Kristy Cole, *City Secretary*

APPROVED AS TO FORM:

_____
Frank J. Garza, *City Attorney*

DRAFT ORDINANCE 10.21.19

Exhibit 'A':
Legal Description and Survey

TRACT 1:

BEING 44.292 acres of land situated in the P. B. Harrison Survey, Abstract No. 97, Rockwall County, Texas, and being part of two tracts of land, the "*First Tract*" being a called 32.5 acres and the "*Second Tract*" being a called 32 acres, described in a Special Warranty Deed to R & R Hance Investments, LP., recorded as Instrument No. 2008-00396963 and in Volume 5433, Page 49 of the Deed Records of Rockwall County, Texas (DRRCT), SAVE AND EXCEPT the called "Parcel 16 (Parts 1 and 2)" conveyed to the City of Rockwall, recorded as Instrument No. 2007-00380919 and in Vol u me 5124, Page 210 (DRRCT), and being more particularly described as follows:

BEGINNING at a 1/2" capped iron rod stamped, "6081," found for corner in the northeasterly right-of-way line of John King Boulevard (120' right-of-way) at the com mon north corner of said "Part 1" of Parcel 16 and called "Parcel 15" conveyed to the City of Rockwall, recorded as Instrument No. 2009-00424601 and in Volume 5951, Page 84 (DRRCT), said point also being in the common line of said "First Tract" and a called 29.185 acre tract of land conveyed to Gideon Grove Ltd., recorded as Instrument No. 20150000014609 of the Official Public Records of Rockwall County, Texas;

THENCE North 72°06'44" West along the common northeasterly line of said John King Boulevard and said Part 1, a distance of 1,126.56 feet to a point for corner at the beginning of a tangent curve to the right, having a radius of 1,140.00 feet and a chord which bears North 44° 02' 06" West, a distance of 1,073.12-feet;

THENCE in the northwesterly direction along said curve to the right, and last mentioned common line, through a central angle of 56°09'19", an arc distance of 1,117.31-feet to a 1/2" iron rod with a yellow cap stamped, "RPLS 3963," set for corner at the end of said curve and at the most northerly corner of said Part 1;

THENCE North 00°38'27" West continuing along the east right-of-way line of said John King Boulevard, a distance of 261.96 feet to a "PK" nail set for corner at the southwest corner of said Part 2;

THENCE North 89°38'44" East along the south line of said Part 2, a distance of 50.00 feet to a 1/2" iron rod with a yellow cap found for the southeast corner thereof;

THENCE North 00°38'27" West along the east line of said Part 2, a distance of 40.00 feet to a 1/2" iron rod with a yellow cap found for the northeast corner thereof in the north line of said Second Tract and being in the south line of a tract of land conveyed to Randy and Gwen Reed, recorded in Volume 260, Page 1 (DRRCT);

THENCE North 89°38'05" East along the common line of last mentioned tracts, at 1,051.89 feet passing a 1/2" iron rod found for the southeast corner of said Reed tract com mon to the southwest corner of Park Ridge Estates, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 390 of the Plat Records of Rockwall County, Texas (PRRCT), and continuing along the north line of said Second Tract and the south line of said Park Ridge Estates, a total distance of 1,736.25 feet to a 3/8" iron rod found for the com mon east corner thereof, and being in the west line of Block A of Windmill Valley Subdivision, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 157 (PRRCT);

THENCE South 01°17'27" East along the common line of said Second Tract and said Block A, a distance of 669.75 feet to a 1/2" iron rod found for the southwest corner of said Block A, and being the northwest corner of said 29.185 acre tract;

THENCE South 01°30'45" East along the west line of said 29.185-acre tract and partially along the east lines of said First Tract and said Second Tract, a distance of 761.52 feet to the PLACE OF BEGINNING and Containing 44.292 acres, or 1,929,345 square feet, of land.

TRACT 2:

BEING 11.121 acres of land situated in the P. B. Harrison Survey, Abstract No. 97, Rockwall County, Texas, and being all of a called 11.126 acre tract of land described in a Warranty Deed with Vendor's Lien to Randy Reed and wife, Gwen Reed, recorded in Volume 260, Page 1 of the Deed Records of Rockwall County, Texas (DRRCT), and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner near the edge of an asphalt surface in the east margin of Hays Road, said point being the common west corner of said Reed tract and a tract of land conveyed to Stephen L. Branch and Judy C. Branch, recorded in Volume 234, Page 527 (DRRCT);

THENCE North 89°26'12" East along the common line of last mentioned tracts, a distance of 1,092.52-feet to a 1/2" iron rod found for the common east corner thereof, and being in the west line of Park Ridge Estates, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 390 of the Plat Records of Rockwall County, Texas (PRRCT);

THENCE South 00°30'07" East along the common line of said Reed tract and said Park Ridge Estates, a distance of 446.60 feet to a 1/2" iron rod found for the common south corner thereof, and being in the north line of a called 32 acre tract described, in a Special Warranty Deed to R & R Hance Investments, L.P., as "*Second Tract*," recorded as Instrument No. 2008-00396963 and in Volume 5433, Page 49 (DRRCT);

THENCE South 89°38'05" West along the common line of said Second Tract and said Reed tract, a distance of 1,086.19-feet to a 1/2" iron rod found at the southwest corner of said Reed tract and being in the east margin of said Hays Road;

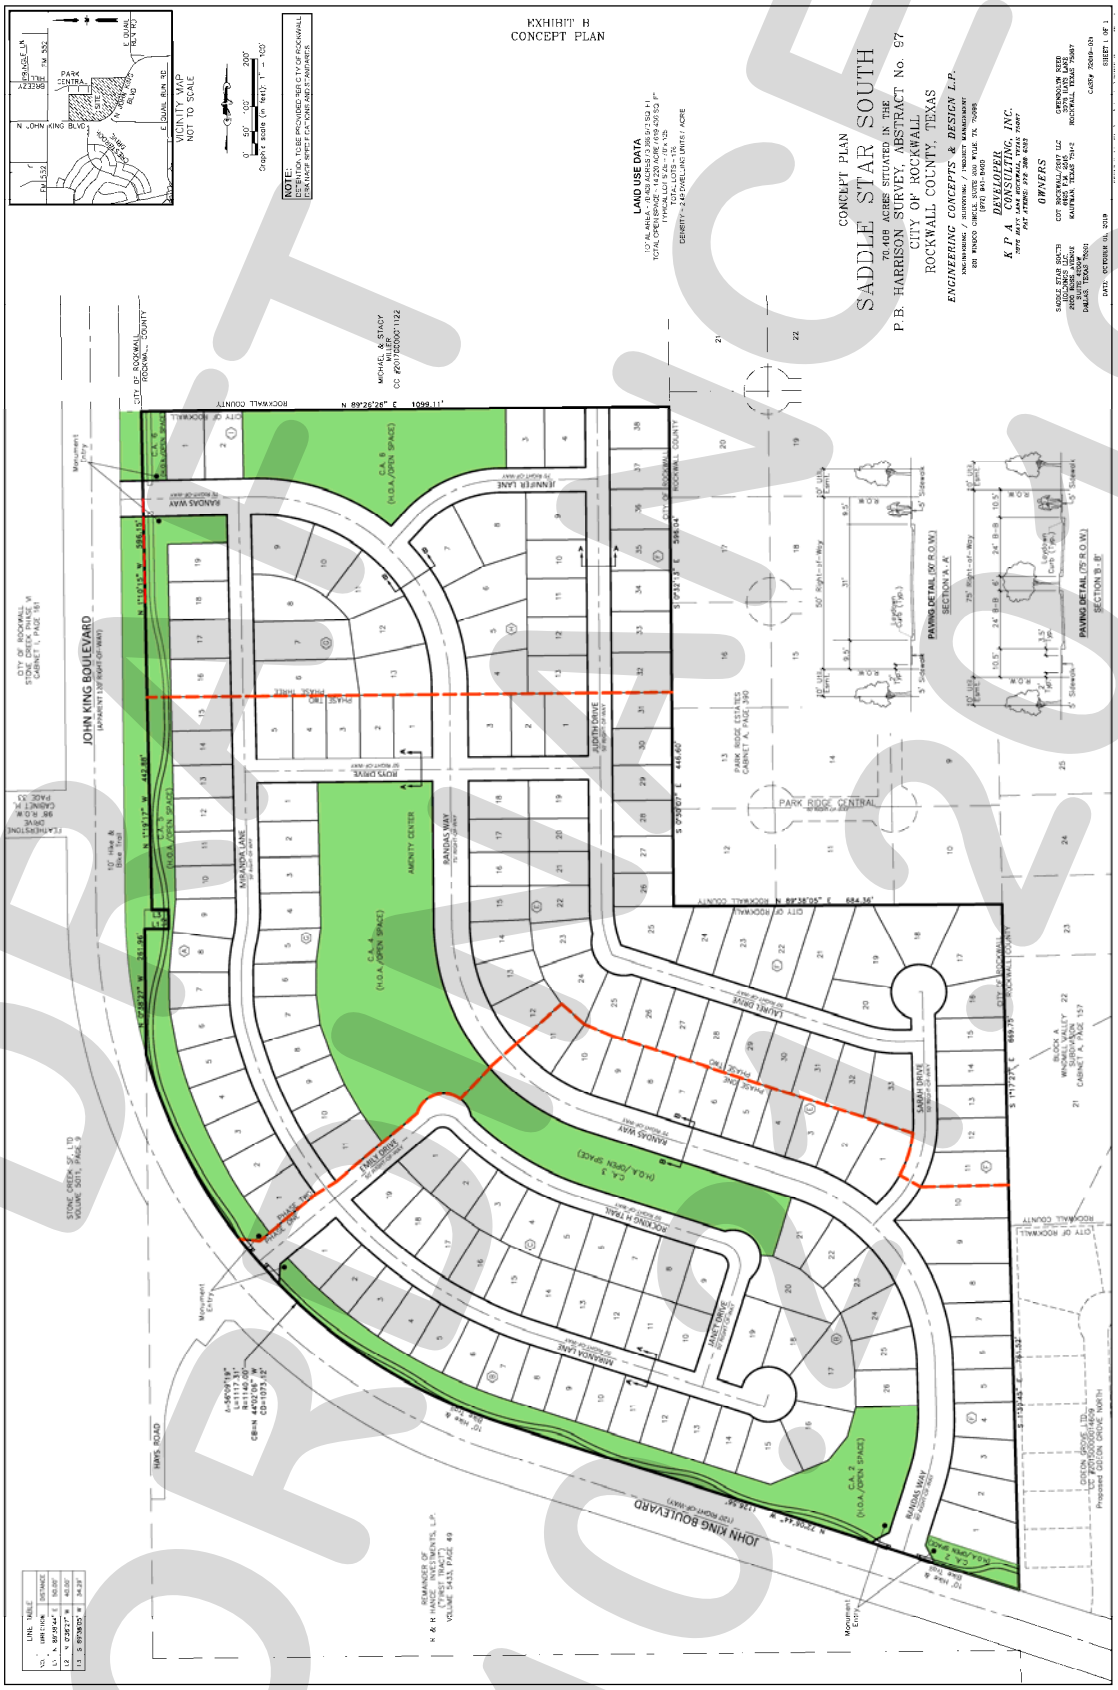
THENCE North 01°19'17" West along the west line of said Reed tract and the east line of said Hays Road, a distance of 442.88-feet to the PLACE OF BEGINNING and Containing 11.121-acres, or 484,450 square feet, of land.

TRACT 3:

BEING 14.955 acres of land situated in the P.B. Harrison Survey, Abstract No. 97, Rockwall County, Texas, and all of a called 15.00 acre tract of land described in a Warranty Deed to Steve L. Branch and wife Judy C. Branch, recorded in Volume 234, Page 527 of the Deed Records of Rockwall County, Texas (DRRCT), and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner in the original Hays Road at the common west corner of said 15.00 acre tract and a tract of land described in a deed to Randy and Gwen Reed, recorded in Volume 260, Page 1 (DRRCT);

THENCE North 01°10'15" West, continuing along and within Hays Road and with the west line of said 15.00 acre Branch tract, a distance of 596.15 feet, to a 1/2" iron rod found for corner at the northwest corner thereof, common to the southwest corner of a called 15.00 acre tract of land described in a deed to Gerald Glen Cox and wife Rosalba Cox, recorded in Volume 3295 Page 9, (DRRCT);



THENCE North 89°26'26" East, along the common line of last mentioned tracts, a distance of 1,099.11 feet, to a point for corner at the common east corner thereof, and also being in the west line of Park Ridge Estates, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 390 of the Plat Records of Rockwall County, Texas (PRRCT), from which a 1/2" iron rod with a yellow cap stamped "5034" bears South 68°26'26" West, a distance of 0.18 feet;

THENCE South 00°32'13" East, along the common line of said Branch tract and said Park Ridge Estates, a distance of 596.04 feet, to a 1/2" iron rod found for corner at the southeast corner thereof, common to the northeast corner of said Reed tract;

THENCE South 89°26'12" West, along the common line of last mentioned tracts, a distance of 1,092.52 feet to PLACE OF BEGINNING and Containing 653,191 square feet, or 14.995 acres of land.

DRAFT ORDINANCE 10.21.2019

Exhibit 'B':
Concept Plan

DRAFT
ORIGINAL
10/10/2019

Development Standards.

1. *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, only those uses permitted within the Single Family 8.4 (SF-8.4) District, as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC), are allowed on the *Subject Property*.

2. *Lot Composition and Layout.* The lot layout and composition shall generally conform to the *Concept Plan* depicted in *Exhibit 'B'* and stated in *Table 1*, which is as follows:

Table 1: Lot Composition

Lot Type	*Minimum Lot Size (FT)*	*Minimum Lot Size (SF)*	*Dwelling Units (#)*	*Dwelling Units (%)*
A	70' x 125'	8,750 SF	143	78.41%
B	80' x 125'	10,000 SF	33	21.59%
		Maximum Permitted Units:	*176*	*100.00%*

3. *Density and Dimensional Requirements.* Unless specifically provided by this Planned Development ordinance, the development standards stipulated by the Single Family 8.4 (SF-8.4) District, as specified by Article V, *District Development Standards*, of the Unified Development Code are applicable to all development on the *Subject Property.* The maximum permissible density for the *Subject Property* shall not exceed *2.50* dwelling units per gross acre of land; however, in no case should the proposed development exceed *176* units. All lots shall conform to the standards depicted in *Table 2*, which is as follows:

Table 2: Lot Dimensional Requirements

Lot Type >	*A*	*B*
Minimum Lot Width [1]	70'	80'
Minimum Lot Depth	125'	125'
Minimum Lot Area	8,750 SF	10,000 SF
Minimum Front Yard Setback [2] & [5]	20'	20'
Minimum Side Yard Setback	5'	5'
Minimum Side Yard Setback (Adjacent to a Street) [2] & [5]	10'	10'
Minimum Length of Driveway Pavement	25'	25'
Maximum Height [3]	30'	30'
Minimum Rear Yard Setback [4]	20'	20'
Minimum Area/Dwelling Unit (SF)	2,700 SF	2,700 SF
Maximum Lot Coverage	65%	65%
Permitted Encroachment into Required Setbacks [5]	Allowed	Allowed

General Notes:

[1]: The minimum lot width shall be measured at the *Front Yard Building Setback*.

[2]: The location of the *Front Yard Building Setback* as measured from the front property line.

[3]: The *Maximum Height* shall be measured to the eave or top plate (whichever is greater) of the single-family home.

[4]: As measured from the rear yard property line.

[5]: Sunrooms, porches, stoops, bay windows, balconies, masonry clad chimneys, eaves and similar architectural features may encroach beyond the *Front Yard Building Setback* by up to ten (10) feet for any property; however, the encroachment shall not exceed five (5) feet on *Side Yard Setbacks (Adjacent to a Street)* and shall not encroach into public right-of-way [a *Sunroom* is an enclosed room no more than 15-feet in width that has glass on at least 50% of each of the encroaching faces].

4. *Building Standards.* All development shall adhere to the following building standards:

(a) *Masonry Requirement.* The minimum masonry requirement for the exterior façades of all buildings shall be 90%. For the purposes of this ordinance, the masonry requirement shall be limited to full width brick, natural stone, and cast stone. Cementaceous fiberboard horizontal lap-siding (*e.g. HardiBoard or Hardy Plank*) and, stucco (*i.e. three [3] part stucco or a comparable -- to be determined by staff*) may be used for up to 50% of the masonry requirement; however, stucco (*i.e. three [3] part stucco or a comparable -- to be determined by staff*) shall be permitted through a Specific Use Permit (SUP) only.

(b) *Roof Pitch.* A minimum of an *8:12* roof pitch is required on all structures with the exception of sunrooms and porches, which shall have a minimum of a *4:12* roof pitch.

(c) *Garage Orientation.* A minimum of 50% of the garages for the *Type A* lots and 100% of the *Type B* lots shall be oriented in a *traditional swing* (*or j-swing*) configuration. The remainder of garages maybe configured in a front entry configuration with a minimum setback of 20-feet (*i.e. allowing the garage to be flush with the front façade of the primary structure*). In this case the front façade of the primary structure does not include a permitted encroachment (*e.g. a porch, sunroom, etcetera*) allowed in *Table 2* above. All garage configurations that are not front entry shall meet the requirements of Article VI, *Parking and Loading*, of the Unified Development Code.

5. *Anti-Monotony Restrictions.* The development shall adhere to the *Anti-Monotony Matrix* depicted in *Table 3* below (*for spacing requirements see the illustration below*).

Table 3 : Anti-Monotony Matrix

Lot Type	*Minimum Lot Size*	*Elevation Features*
A	70' x 125'	(1), (2), (3), (4)
B	80' x 125'	(1), (2), (3), (4)

(1) Identical brick blends or paint colors may not occur on adjacent (*side-by-side*) properties along any block face without at least five (5) intervening homes of differing materials on the same side of the street beginning with the adjacent property and six (6) intervening homes of differing materials on the opposite side of the street.

(2) Front building elevations shall not repeat along any block face without at least five (5) intervening homes of differing appearance on the same side of the street and six (6) intervening homes of differing appearance on the opposite side of the street. The rear elevation of homes backing to open spaces or on John King Boulevard shall not repeat without at least five (5) intervening homes of differing appearance. Homes are considered to have a differing appearance if any of the following two (2) items deviate:

(a) Number of Stories
(b) Permitted Encroachment Type and Layout
(c) Roof Type and Layout
(d) Articulation of the Front Façade

(3) Permitted encroachments (*i.e. porch and sunroom*) elevations shall not repeat or be the same along any block face without at least five (5) intervening homes of sufficient

DRAFT 10.21.19

dissimilarity on the same side of the street beginning with the home adjacent to the subject property and six (6) intervening homes beginning with the home on the opposite side of the street.

(4) Each phase of the subdivision will allow for a maximum of four (4) compatible roof colors, and all roof shingles shall be an architectural or dimensional shingle (*3-Tab Roofing Shingles are prohibited*).

Illustration 1: Properties line up on the opposite side of the street. Where RED is the subject property.

Illustration 2: Properties do not line up on opposite side of the street. Where RED is the subject property.

6. *Fencing Standards.* All individual residential fencing and walls shall be architecturally compatible with the design, materials and colors of the primary structure on the same lot, and meet the following standards:

(a) Wood Fences. All wood fences shall be constructed of a standard fencing material (*minimum of ½" thickness or better; spruce fencing will not be allowed*), and use fasteners that are hot dipped galvanized or stainless steel. Wood fences facing onto a street shall be painted and/or stained and sealed with all pickets being placed on the *public side* facing the street. All wood fences shall be smooth-finished, free of burs and splinters, and be a maximum of six (6) feet in height.

(b) Wrought Iron/Tubular Steel. Lots located along the perimeter of roadways, abutting open spaces, greenbelts and parks shall be required to install a wrought iron or tubular steel fence. Wrought iron/tubular steel fences can be a maximum of six (6) feet in height.

(c) *Corner Lots*. Corner lots fences (*i.e. adjacent to the street*) shall provide masonry columns at 45-feet off center spacing that begins at the rear of the property line. A maximum of six (6) foot solid *board-on-board panel* fence constructed utilizing cedar fencing shall be allowed between the masonry columns along the side and/or rear lot adjacent to a street. In addition, the fencing shall be setback from the side property line adjacent to a street a minimum of five (5) feet. The property owner shall be required to maintain both sides of the fence.

(d) *Solid Fences (including Wood Fences)*. All solid fences shall incorporate a decorative top rail or cap detailing into the design of the fence.

7. *Landscape and Hardscape Standards.*

(1) *Landscape.* Landscaping shall be reviewed and approved with the PD Site Plan. All *Canopy/Shade Trees* planted within this development shall be a minimum of four (4) caliper inches in size and all *Accent/Ornamental/Under-Story Trees* shall be a minimum of four (4) feet in total height. The following tree species are approved for planting within this subdivision:

(a) *Canopy/Shade Trees*. Bald Cyprus, Cedar Elm, Texas Red Oak, Homestead Elm, Lace Bark Elm, Alle Elm, Chinese Pistachio, Shumard Oak, Sycamore, and Burr Oak.

(b) *Accent/Ornamental/Under-Story Trees*. Texas Redbud, Eve's Necklace, Mexican Plum, Downy Hawthorn, Crepe Myrtle, Texas Mountain Laurel, Vitex, and Desert Willow.

(2) *Landscape Buffers.* All landscape buffers and plantings located within the buffers shall be maintained by the Homeowner's Association (HOA).

(a) *Landscape Buffer and Sidewalks (John King Boulevard)*. A minimum of a 50-foot landscape buffer shall be provided along the frontage of John King Boulevard (*outside of and beyond any required right-of-way dedication*), and shall incorporate ground cover, a *built-up* berm and shrubbery along the entire length of the frontage. Berms and shrubbery shall have a minimum height of 30-inches and a maximum height of 48-inches. In addition, three (3) canopy trees and four (4) accent trees shall be planted per 100-feet of linear frontage. The developer shall also be responsible for the construction of a ten (10) foot curvilinear sidewalk situated within the 50-foot landscape buffer adjacent to John King Boulevard.

(3) *Streetscape Landscaping.* Prior to the issuance of a Certificate of Occupancy (CO), all residential, single family lots situated within the proposed subdivision shall be landscaped with canopy trees from the list stipulated by *Section 7(1)* of this ordinance in the following sizes and proportions:

(i) Two (2), three (3) inch trees measured six (6) inches above the root ball shall be planted in the front yard of an interior lot.

DRAFT
ORDINANCE
10.21.19

(ii) Two (2), three (3) inch trees measured six (6) inches above the root ball shall be planted in the front yard of a corner lot and two (2), three (3) inch caliper trees shall be planted in the side yard facing the street.

Note: For the purposes of this section only [i.e. Section 7(3)], the term "front yard" includes the area within the dedicated right-of-way for a parkway immediately adjoining the front yard of the lot.

(4) *Irrigation Requirements*. Irrigation shall be installed for all required landscaping located within common areas, landscape buffers and/or open space. Irrigation installed in these areas shall be designed by a Texas licensed irrigator or landscape architect and shall be maintained by the Homeowner's Association.

(5) *Hardscape.* Hardscape plans indicating the location of all sidewalks and trails shall be reviewed and approved with the PD Site Plan.

8. *Street.* All streets (*excluding drives, fire lanes and private parking areas*) shall be built according to City street standards.

9. *Lighting*. Light poles shall not exceed 20-feet in total height (*i.e. base and lighting standard*). All fixtures shall be directed downward and be positioned to contain all light within the development area.

10. *Sidewalks.* At a maximum, all sidewalks adjacent to a street shall begin two (2) feet behind the right-of-way line and be five (5) feet in overall width.

11. *Buried Utilities.* New distribution power-lines required to serve the *Subject Property* shall be placed underground, whether such lines are located internally or along the perimeter of the *Subject Property*, unless otherwise authorized by the City Council. Temporary power-lines constructed across undeveloped portions of the *Subject Property* to facilitate development phasing and looping may be allowed above ground, but shall not be considered *existing lines* at the time the area is developed, and if they are to become permanent facilities, such lines shall be placed underground pursuant to this paragraph. Franchise utilities shall be placed within a ten (10) foot public utility easement behind the sidewalk, between the home and the property line.

12. *Open Space.* The development shall consist of a minimum of *20%* open space (*or 14.082-acres*), and generally conform to the *Concept Plan* contained in *Exhibit 'B'* of this ordinance. All open space areas shall be maintained by the Homeowner's Association (HOA).

Continued on Next Page …

DRAFT ORDINANCE 10.2019

13. *Trail Rest Area.* The developer shall be responsible for the construction of a *Trail Rest Area* that generally conforms to the rest area depicted in *Figure 1* (*below*).

Figure 1: *Trail Rest Area Concept*

14. *Neighborhood Signage.* Permanent subdivision identification signage shall be permitted at all major entry points for the proposed subdivision. Final design and location of any entry features shall be reviewed and approved with the *PD Site Plan*.

15. *Homeowner's Association (HOA)*. A Homeowner's Association shall be created to enforce the restrictions established in accordance with the requirements of Section 38-15 of the Subdivision Regulations contained within the Municipal Code of Ordinances of the City of Rockwall. The HOA shall also maintain all neighborhood parks, trails, open space and common areas, irrigation, landscaping, screening fences associated with this development.

16. *Variances*. The variance procedures and standards for approval that are set forth in the Unified Development Code shall apply to any application for variances to this ordinance.

CITY COUNCIL MEMORANDUM

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller; *Director of Planning and Zoning*
DATE:	October 21, 2019
SUBJECT:	Z2019-022; SUP for Accessory Building

On October 15, 2019, the applicant, Marty Wright submitted a letter requesting to postpone the public hearing for this case until November 4, 2019. The applicant has stated that he will be attending a business trip and will be out of town on October 21, 2019. According to Subsection 2.03(C), *Postponement, Recess, and Continuation of a Public Hearing*, of Article XI, *Development Applications and Review Procedures*, of the Unified Development Code (UDC), a public hearing may be postponed by announcing the postponement at the time and place of the notified public hearing. The public hearing shall be to a specific time and date no later than 30-days from the first or most recent public hearing. Attached to this memorandum is a copy of the applicant's letter.

PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
DATE:	October 21, 2019
APPLICANT:	Marty Wright
CASE NUMBER:	Z2019-022; *Specific Use Permit (SUP) for a Detached Garage*

SUMMARY

Hold a public hearing to discuss and consider a request by Marty Wright for the approval of a Specific Use Permit (SUP) for a detached garage on a one (1) acre tract of land identified as Lot 10, Block B, Saddlebrook Estates #2 Addition, City of Rockwall, Rockwall County, Texas, zoned Single-Family 16 (SF-16) District, addressed as 2340 Saddlebrook Lane, and take any action necessary.

BACKGROUND

The subject property was annexed in 1999 [*Ordinance No. 99-33*], is zoned Single-Family 16 (SF-16) District, and is addressed as 2340 Saddlebrook Lane. On November 11, 2001, the City Council approved a change in zoning [*Case No. PZ2008-102; Ordinance No. 01-102*], from an Agricultural (AG) District to a Single-Family 16 (SF-16) District for the Saddlebrook Estates #2 Addition. On October 21, 2002, the City Council approved a replat [*Case No. PZ2002-71-01*] for the Saddlebrook Estates #2 Addition.

PURPOSE

The applicant is requesting approval of a Specific Use Permit (SUP) to allow a detached garage that exceeds the maximum allowable size for a property in a Single-Family 16 (SF-16) District.

ADJACENT LAND USES AND ACCESS

The subject property is located at 2340 Saddlebrook Lane. The land uses adjacent to the subject property are as follows:

North: Directly north of the subject property there are several single-family homes located within the Saddlebrook Estates #2 Addition, followed by the corporate limits of the City of Rockwall. These homes are zoned Single-Family 16 (SF-16) District. Beyond this is E. Quail Run Road, which is identified as a M4U (*major collector, four [4] lane, undivided roadway*) on the City's Master Thoroughfare Plan. Following this, there is a large vacant tract of land zoned Agricultural (AG) District.

South: Directly south of the subject property, are several single-family homes within the Saddlebrook Estates #2 Addition, which are zoned Single-Family 16 (SF-16) District, followed by the corporate limits of the City of Rockwall. Beyond this is FM-1141, which is identified as a M4D (*major collector, four [4] lane, divided roadway*) on the City's Master Thoroughfare Plan.

East: Directly east of the subject property there are several single-family homes within the Saddlebrook Estates #2 Addition, which are zoned Single-Family 16 (SF-16) District. Beyond this is FM-1141, which is identified as a M4D (*major collector, four [4] lane, divided roadway*) on the City's Master Thoroughfare Plan and delineates the corporate limits of the City of Rockwall.

West: Directly west of the subject property are several single-family homes within the Saddlebrook Estates #2 Addition, which are zoned Single-Family 16 (SF-16) District. Beyond this are several single-family homes zoned Agricultural (AG) District followed by John King Boulevard, which is identified as a P6D (*principle arterial, six [6] lane, divided roadway*) on the City's Master Thoroughfare Plan.

CHARACTERISTICS OF THE REQUEST

The applicant is requesting approval of a Specific Use Permit (SUP) for a detached garage that exceeds the maximum allowable size for properties located within a Single-Family 16 (SF-16) District. Currently situated on the subject property, there is a 3,397 SF brick single-family home and a 216 SF accessory building that is clad with wood. The proposed building will be situated behind the main structure, will be 13' 8" in height, and will be constructed of metal. The building will include a 24' x 40' (*i.e. 960 SF*) detached garage and a 6' x 40' (*i.e. 240 SF*) porch that will be on the front of the building. The total footprint of the building will be 1,200 SF (*i.e. 35% of the size of the home*). The porch will incorporate windows with shutters, double walk-in doors, and wooden posts. The applicant has stated that the purpose of the porch is to blend the building with the neighborhood by incorporating architectural elements that are typically seen on a single-family home. The building will have two (2) roll-up doors located on each of the side façades (*i.e. north and south façades*) and the applicant has stated that detached garage will be utilized to store several antique vehicles. The existing 12' x 18' (*i.e. 216 SF*) accessory building will be relocated and will be situated adjacent to the northern side façade of the proposed detached garage. The applicant has provided a site plan and proposed building elevations to be reviewed by the Planning and Zoning Commission and the City Council.

CONFORMANCE WITH THE CITY'S CODES

According to Subsection 7.04, *Accessory Structure Development Standards*, of Section 7, *District Development Standards*, of Article V, *District Development Standards*, of the Unified Development Code (UDC), in a Single-Family 16 (SF-16) District a detached garage is permitted provided that it is no larger than 625 SF. The detached garage shall include a minimum of one (1) garage bay door large enough to accommodate a standard size motor vehicle and shall be architecturally compatible with the primary structure. In this case, the proposed detached garage is 960 SF and the porch is 240 SF (*i.e. a total building footprint of 1,200 SF*), which exceeds the maximum allowable size of a detached garage. Although the proposed building exceeds the maximum allowable size, the applicant has provided additional architectural elements (*i.e. the front porch, windows and shutters, and the double walk-in doors*) on the building in order for the building to be consistent with the main structure. Additionally, the proposed building incorporates two (2) roll-up doors that are large enough to accommodate a standard passenger vehicle. Based on the proposed design of the building, the applicant's request appears to be in conformance with the requirements stipulated by the Unified Development Code (UDC) with regard to detached garages; however, the Planning and Zoning Commission and City Council are tasked with determining if the proposed building is architecturally compatible with the primary structure.

STAFF ANALYSIS

When looking at the applicant's request, it was observed that a large majority of property owners *(i.e. 26 of the 44 homes or roughly 60%*) currently have a detached garage and/or accessory building on their properties. Of the existing accessory buildings within the Saddlebrook Estates #2 Addition, several are roughly the same size or larger than (*i.e. 900-1,300 SF*) the proposed detached garage. It should be noted that most of the accessory buildings that are visible from the street utilize exterior materials similar to the main structure (*i.e. a combination of brick and cementitious lap siding*). Staff was able to determine that 30 building permits have been for accessory buildings within the Saddlebrook Estates #2 Addition and 27 of the permits are still active (*i.e. not expired, voided, or withdrawn*). A vast majority of the permits were issued between 2002 (*i.e. shortly after this area was annexed*) and 2009. In this case, the proposed detached garage is larger than the maximum allowable

detached garage; however, the design of the structure (*i.e. inclusion of a front entryway door, windows, shutters, and front porch*) appears to be architecturally compatible with the main house and would resemble a residential building. The building will sit more than 100-feet from the front property line and be approximately four (4)-feet higher than the street. Due to this, visibility of the garage bay doors will be limited from the front property line. Should the detached garage be visible from of the front of the property, the garage would likely resemble the existing detached garages on the surrounding properties (*i.e. the bay doors would be visible from the street*). Given that a majority of the surrounding homes have a detached garage, an accessory building, and/or a portable building approval of this request does not appear to negatively impact the subject property or surrounding properties. Staff should note, approval of a Specific Use Permit (SUP) is a discretionary decision for the City Council, pending a recommendation from the Planning and Zoning Commission. Should this request be approved, a total of two (2) accessory buildings will be located on the subject property.

NOTIFICATIONS

On September 20, 2019, staff sent 30 notices to all residents/property owners within 500-feet of the subject property. There are no Homeowner's Associations (HOA's)/Neighborhood Associations located within 1,500-feet of the subject property and are participating in the Neighborhood Notification Program. At the time this report was written, staff had received four (4) emails and one (1) notice in favor and one (1) email in opposition of this request.

CONDITIONS OF APPROVAL

If the City Council chooses to approve the applicant's request then staff would propose the following conditions of approval:

(1) The following conditions pertain to the operation of a *detached garage* on the *Subject Property* and conformance to these conditions are required for continued operations:

(a) The detached garage shall generally conform to the concept plan and the conceptual building elevations depicted in *Exhibits 'B'* & *'C'* of the attached ordinance;

(b) The detached garage shall not exceed a maximum size of 1,200 SF;

(c) The detached garage shall not exceed an overall height of 15-feet;

(d) The subject property shall not have more than two (2) accessory buildings;

(2) Any construction resulting from the approval of this zoning change shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION

On October 8, 2019, the Planning and Zoning Commission's motion to recommend denial of the applicant's request was approved by a vote of 7-0. According to Section 2.03(G), *Protest of a Zoning Change*, of Article XI, *Development Applications and Review Procedures*, of the Unified Development Code (UDC), "(i)f such change [*zoning change or Specific Use Permit (SUP)*] is recommended for denial by the Planning and Zoning Commission, such zoning change or Specific Use Permit (SUP) shall require a supermajority vote (*i.e. a three-forths vote of those members present*), with a minimum of four (4) votes in the affirmative required for approval."

NOTICE OF PUBLIC HEARING
CITY OF ROCKWALL, PLANNING & ZONING DEPARTMENT

PHONE: (972) 771-7745
EMAIL: PLANNING@ROCKWALL.COM

To Whom It May Concern:

You are hereby notified that the City of Rockwall Planning and Zoning Commission and City Council will consider the following application:

Case No. Z2019-022: SUP for Accessory Building

Hold a public hearing to discuss and consider a request by Marty Wright for the approval of a Specific Use Permit (SUP) for an accessory building on a one (1) acre tract of land identified as Lot 10, Block B, Saddlebrook Estates #2 Addition, City of Rockwall, Rockwall County, Texas, zoned Single-Family 16 (SF-16) District, addressed as 2340 Saddlebrook Lane, and take any action necessary.

For the purpose of considering the effects of such a request, the Planning and Zoning Commission will hold a public hearing on **Tuesday, 10/8/2019 at 6:00 p.m.,** and the City Council will hold a public hearing on **Monday, 10/21/2019 at 6:00 p.m.** These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street.

As an interested property owner, you are invited to attend these meetings. If you prefer to express your thoughts in writing please return the form to:

Korey Brooks
Rockwall Planning and Zoning Dept.
385 S. Goliad Street
Rockwall, TX 75087

You may also email your comments to the Planning Department at planning@rockwall.com. If you choose to email the Planning Department please include your name and address for identification purposes.

Your comments must be received by **10/21/2019** to ensure they are included in the information provided to the City Council.

Sincerely,

Ryan Miller, AICP
Director of Planning & Zoning

Subject: Case No. Z2019-022

This is in regards to the above SUP request for 2340 Saddlebrook Lane.

First of all, we are 100% in favor of the request to build an accessory building in excess of 900 square feet which we assume is the reason for the SUP.

We know from building our own workshop in 2006 that at that time, the city required that the exterior cladding contains the same materials, excluding glass, as found on the main structure which in our case meant that we needed to brick the accessory building. I can think of at least 7 accessory buildings in Saddlebrook Estates that have been built and all of them comply with this requirement. From looking at the request and viewing the renderings, it appears that this structure is a 100% steel building.

Is this SUP just for the structure being greater than 900 square feet?

Is there an additional variance being applied for not using the same cladding material as the main residence?

Has the Rockwall UDC changed since 2006 that allows for a metal accessory building not allowed previously?

We know that bricking an accessory building is more expensive than not, but up to this point everyone in our neighborhood has had to comply. And honestly it has kept the neighborhood looking much better than if we had all built metal buildings.

Thanks for any clarification you can provide,

Kevin & Debbie Berger

Our names are Willard and Peggy Thomas and we are in favor of the request for the zoning change. It is our belief that the inhabitants of the home will build an appropriate structure for our neighborhood, as their home is one of the nicest ones in the neighborhood and so very well-kept thank you very much.

Willard and Peggy Thomas

Case No. Z2019-022
I am in favor of the request for SUP for Accessory Building to 2340 Saddlebrook Lane.

I also request that the Council consider the advantages of a Steel Building over conventional construction of wood and brick.
I have attached 2 sites that I have found listing the advantages.

Eco-friendly
Lower Cost
More efficient
Durability - Little to no maintenance
Noncombustible material - **lower risk of fire**
Insurance discounts
Increased resale value

PLEASE RETURN THE BELOW FORM

Case No. Z2019-022: SUP for Accessory Building

Please place a check mark on the appropriate line below:

☑ I am in favor of the request for the reasons listed below.

☐ I am opposed to the request for the reasons listed below.

While I recognize the fact that no one wants their neighborhood to become a warehouse district, I think Mr. Wright's request should be approved. If anyone will keep it looking nice, he will. He and his wife and son are always out doing yard work & landscaping. Best yard in the neighborhood! I'm sure it will be done tastefully to fit in and maintained to look great.

Bradley and Susan Jones
2352 Saddlebrook Lane
Rockwall, TX 75087

We are opposed to the request for the reasons listed below:

The size and construction type are not compatible with the neighborhood. We are considering building a detached garage and research indicates that the structure needs to be built with the same materials as the house…not a metal building. Also, the addition of a building that size would start to crowd the lot and not be consistent with the rest of the neighborhood. For these two reasons, I believe the construction of this structure would decrease home values in the future and lead potentially lead to other requests of this nature.

Regards, Brad Jones

Planning and zoning:

The situs address is 2340 Saddlebrook Ln. Rockwall, Texas 75087. We hope to build a storage building on our property. The property is 1 acre and currently has our home, pool, cabana, accessory building and all fence is wrought iron and a 8 foot wood fence on the east side that belongs to my neighbor.

What we plan to do is move our current accessory building to the north end of the property and add a storage building just of south of that structure. The proposed storage building will have a slab 30x40. The structure will include 24x40 of storage and a 6x40 porch on the west side. All windows and walk-in doors will be on the porch side and it will include overhead roll up door on the north and south end of the building. Maximun height will be 13 foot 8 inches. Colors will be Sandstone, Brown and wainscot trim on the bottom. No plumbing will be added and electricity will be added at a later time. A 90 foot driveway will be added to meet up with the proposed building at a later time.

We have a building quote from Eversafe Buildings for a total of $14,245.52 not including the slab. Eversafe has also included the concrete slab recommendations, which I have included in this packet. The slab cost is estimated to be approx. $9600.00, for a total project cost of approx. $23,850.00.

In our neighborhood we have other projects that also went past the maximum square footage and one having a second floor and going well above the 15-foot maximum height requirement.

Our use of this building to store several antique cars. The reason for the porch was my wife's idea.

I have included:

Site map of my property indicating proposed building site and feet between borders

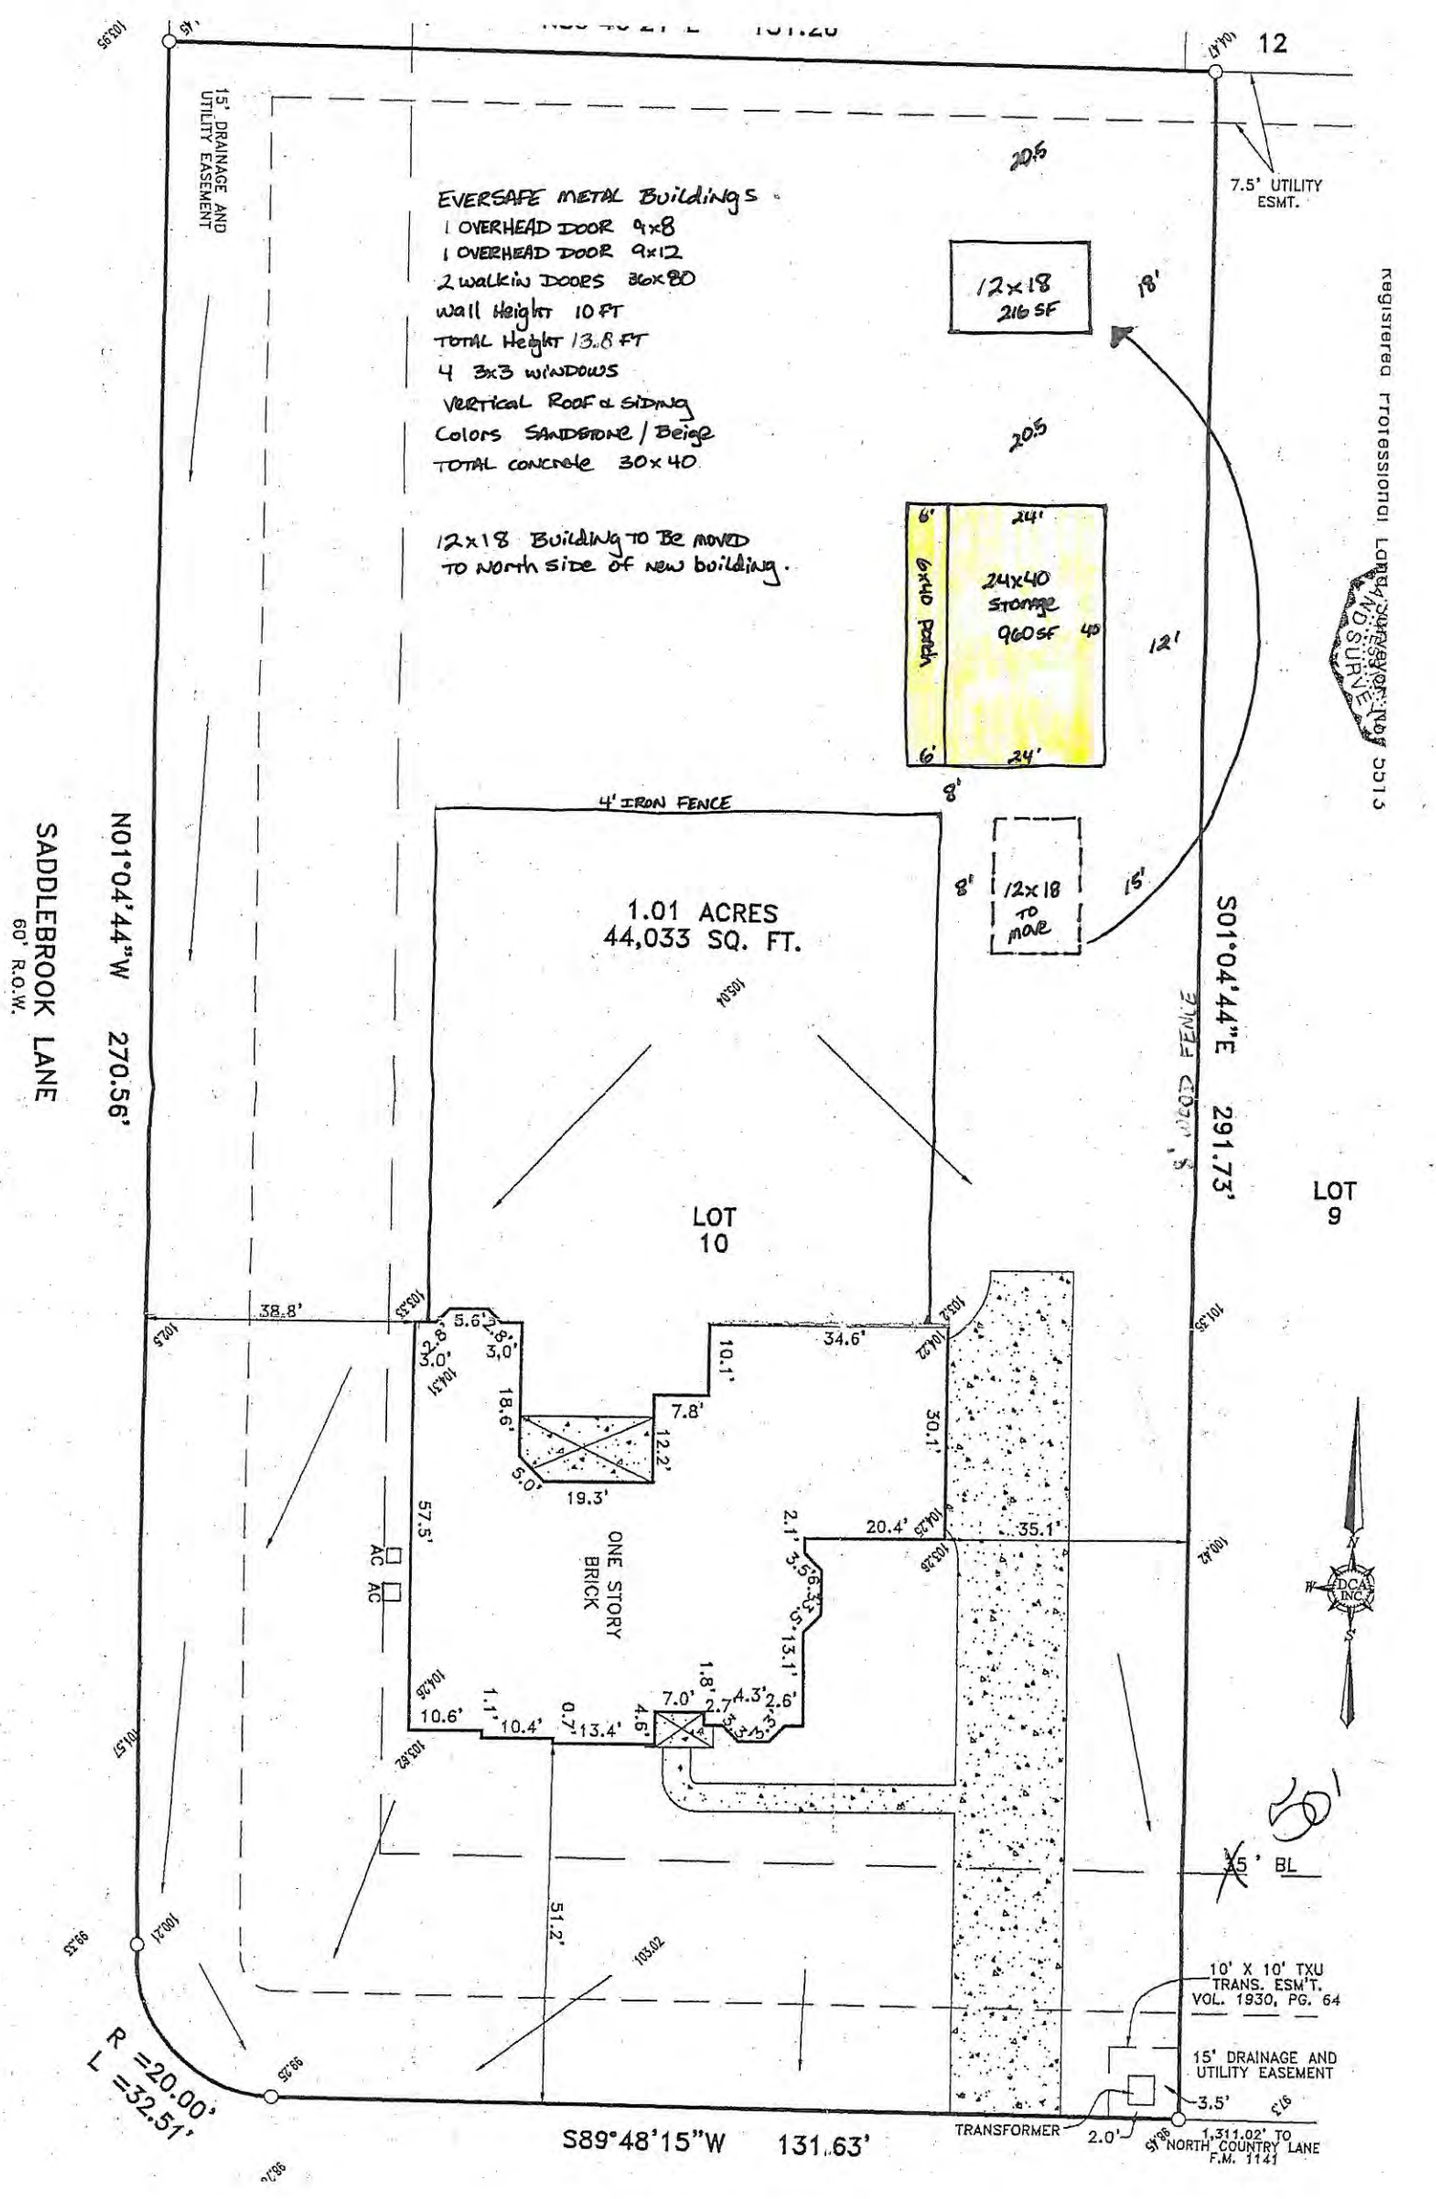
Building quote

Recommendation of concrete slab

3D models of proposed storage building

Two photos of current accessory building to be moved

Two photos of proposed site of building



If you need any other information, please call me or email anytime.

Thanks for your time,

Marty and Debra Wright

Building Colors

Eversafe Steel Buildings offers a variety of standard colors for your steel building. You can select from 13 different colors for the roof, the sides and the trim. Make your choices from the selections below:

*Colors shown represent finish colors as accurately as possible, however color may vary slightly on actual building. Due to monitor and screen variations on different devices, digital depictions of colors may vary. Not all colors are available in every state and colors may vary by state. Non-standard colors, color matching and two-tone wall color wainscoting available in certain states. Please ask your representative for details.

Concrete Specifications

From: Bob Fuerstenau (bfuerstenau@eversafebuildings.com)

To: mwright-1@att.net

Date: Friday, September 6, 2019, 10:41 AM CDT

Marty,

The concrete slab that we recommend should be/have:

- 4" thick ***(minimum)*** w/ a 12"x12" continuous footer
- same exact dimensions as your building frame (e.g. 24'x35')**
- 2,500 PSI concrete ***(minimum)***
- two #5 rebar continuous
- NO wet-set anchors (anchors will be provided at installation)

**If pulling a permit using our generic engineer-stamped drawings, foundation should be 5 5/8" wider than the building frame with a ¾" step down all around.

This e-mail is strictly for the purposes of budgeting and obtaining estimates. Please do not use the information herein as sole guidelines for pouring concrete slab.

Let me know if you have any questions or concerns.

Sincerely,

Bob Fuerstenau

CITY OF ROCKWALL

ORDINANCE NO. 19-XX

SPECIFIC USE PERMIT NO. S-XXX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE (UDC) [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, ROCKWALL COUNTY TEXAS, AS PREVIOUSLY AMENDED, SO AS TO GRANT A SPECIFIC USE PERMIT (SUP) TO ALLOW A *DETACHED GARAGE BUILDING* THAT EXCEEDS THE MAXIMUM ALLOWABLE SIZE ON A ONE (1)-ACRE PARCEL OF LAND, IDENTIFIED AS LOT 10, BLOCK B, SADDLEBROOK ESTATES #2 ADDITION, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS; AND MORE SPECIFICALLY DESCRIBED IN *EXHIBIT 'A'* OF THIS ORDINANCE; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has received a request from Marty Wright for the approval of a Specific Use Permit (SUP) to allow a *detached garage* that exceeds the maximum allowable size on a one (1)-acre parcel of land being described as Lot 10, Block B, Saddlebrook Estates #2 Addition, City of Rockwall, Rockwall County, Texas, zoned Single-Family 16 (SF-16) District, addressed as 2340 Saddlebrook Lane, and being more specifically depicted in *Exhibit 'A'* of this ordinance, which herein after shall be referred to as the *Subject Property* and incorporated by reference herein; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall, in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall, have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally, and to all persons interested in and situated in the affected area and in the vicinity thereof, the governing body in the exercise of its legislative discretion has concluded that the Unified Development Code (UDC) [*Ordinance No. 04-38*] of the City of Rockwall should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED** by the City Council of the City of Rockwall, Texas;

SECTION 1. That the Unified Development Code (UDC) [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended so as to grant a Specific Use Permit (SUP) allowing a *detached garage* as stipulated by Subsection 7.04, *Accessory Structure Development Standards,* of Section 7, *District Development Standards*, of Article V, *District Development Standards*, the Unified Development Code (UDC) [*Ordinance No. 04-38*] on the *Subject Property*; and,

SECTION 2. That the Specific Use Permit (SUP) shall be subject to the requirements set forth in Subsection 7.04, *Accessory Structure Development Standards*, of Section 7, *District Development Standards,* of Article V, *District Development Standards*, of the Unified

ORDINANCE 10-21-19

Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended and as may be amended in the future, and shall be subject to the following:

2.1 OPERATIONAL CONDITIONS

The following conditions pertain to the operation of a *detached garage* on the *Subject Property* and conformance to these conditions are required for continued operations:

1) The detached garage shall generally conform to the concept plan and the conceptual building elevations depicted in *Exhibits 'B'* & *'C'* of this ordinance;

2) The detached garage shall not exceed a maximum size of 1,200 SF;

3) The detached garage shall not exceed an overall height of 15-feet;

4) The subject property shall not have more than two (2) accessory buildings;

2.2 COMPLIANCE

Approval of this ordinance in accordance with Subsection 2.05, City *Council Action*, of Article XI, *Zoning Related Applications,* of the Unified Development Code (UDC) will require compliance to the following:

1) Upon obtaining a building permit, should the homeowner fail to meet the minimum operational requirements set forth herein and outline in the Unified Development Code (UDC), the City Council may (*after proper notice*) initiate proceedings to revoke the Specific Use Permit (SUP) in accordance with Section 2.02.D(3) of Article XI, *Zoning Related Applications*, of the Unified Development Code (UDC).

SECTION 3. That the official zoning map of the City be corrected to reflect the changes in zoning described herein.

SECTION 4. That all ordinances of the City of Rockwall in conflict with the provisions of this ordinance be, and the same are hereby repealed to the extent of that conflict.

SECTION 5. Any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *TWO THOUSAND DOLLARS ($2,000.00)* for each offence and each and every day such offense shall continue shall be deemed to constitute a separate offense.

SECTION 6. If any section or provision of this ordinance or the application of that section or provision to any person, firm, corporation, situation or circumstance is for any reason judged invalid, the adjudication shall not affect any other section or provision of this ordinance or the application of any other section or provision to any other person, firm, corporation, situation or circumstance, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions of this ordinance shall remain in full force and effect.

SECTION 7. That this ordinance shall take effect immediately from and after its passage.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF NOVEMBER, 2019.

CITY COUNCIL CASE MEMO

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
DATE:	10/21/2019
APPLICANT:	Adam Buczek; *Stone Creek Balance, LTD*
CASE NUMBER:	Z2019-024; *Amendment to Planned Development District 70 (PD-70)*

SUMMARY

Hold a public hearing to discuss and consider a request by Adam Buczek of Stone Creek Balance, LTD for the approval of a zoning amendment to Planned Development District 70 (PD-70) for the purpose of changing the number of hard-edged retention ponds required for the residential subdivision being a ~336.00-acre tract of land identified as the Stone Creek Subdivision and being situated within the W. T. Deweese Survey, Abstract No. 71 and the S. King Survey, Abstract No 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for Single-Family 10 (SF-10) District land uses, situated within the North SH-205 Overlay (N. SH-205 OV) and SH-205 By-Pass Overlay (SH-205 BY-OV) Districts, generally located at the southeast corner of the intersection of FM-552 and SH-205 [*N. Goliad Street*], and take any action necessary.

BACKGROUND

The subject property was annexed into the City by four (4) different ordinances: [*1*] *Ordinance No. 61-01* on February 6, 1961, [*2*] *Ordinance No. 61-02* on February 6, 1961, [*3*] *Ordinance No. 86-37* on May 19, 1986, and [*4*] *Ordinance No. 98-10* on March 16, 1998. On October 18, 2004, the City Council denied a preliminary plat [*Case No. P2004-046*] that proposed establishing 1,519 single-family lots on a 405.29-acre property situated within the City's extraterritorial jurisdiction, and that would later become the Breezy Hill Subdivision. After three (3) years of litigation over this case, Richard Skorburg of the Skorburg Company submitted two (2) development agreements covering both the subject property and the 405.29-acre property covered by the 2004 preliminary plat request. In addition, a request to rezone the subject property from an Agricultural (AG) District to a Planned Development District for General Retail (GR) District and Single Family 10 (SF-10) District land uses was submitted. This request [*i.e. Z2007-006 and the development agreements*] was approved by the City Council on April 2, 2007 by *Ordinance No. 07-13*, which established Planned Development District 70 (PD-70) in accordance with the approved development agreement. Planned Development District 70 (PD-70) would later be amended twice [*i.e. Ordinance No.'s 09-44 & 11-35*] both times to increase the amount of land zoned for General Retail (GR) District land uses at the southwestern corner of the Planned Development (PD) District (*i.e. adjacent to the Walgreens Pharmacy*).

At the time of establishment Planned Development District 70 (PD-70) permitted 918 single-family homes that had lot sizes that ranged from 50' x 120' to 100' x 200'. As of today, the Skorburg Co. has established 768 of the permitted 918 single-family lots, and has submitted a final plat (*i.e. P2019-035 -- which was withdrawn by the applicant with the intent of resubmitting the case at the conclusion of this zoning case*) proposing an additional 118 single-family lots. This means that the total development will include 886 single-family lots, or 32 lots less than the maximum permitted by Planned Development District 70 (PD-70). In addition, the original site plan included a location for a fire station (*i.e. presently Fire Station #7*), a school site (*i.e. Rockwall Elementary No. 15 -- currently under construction*), and private open space areas. In 2014, the Skorburg Co. and the City agreed to the establishment of a 11.35-acre public park at the northwest corner of Featherstone Drive and John King Boulevard.

PURPOSE

On September 13, 2019, the applicant submitted an application requesting to amend Planned Development District 70 (PD-70) [*Ordinance No.'s 09-44 & 11-35*] for the purpose of reducing the number of required hard edged retention ponds from four (4) ponds to three (3) ponds. Additionally, the applicant has submitted a letter stating an intent to provide an additional fountain feature for the existing retention pond located adjacent to York Street.

ADJACENT LAND USES AND ACCESS

The subject property is located at the southeast corner of the intersection of FM-552 and SH-205 [*N. Goliad Street*]. The land uses adjacent to the subject property are as follows:

North: Directly north of the subject property is FM-552, which is identified as TXDOT4D (*i.e. TXDOT, four [4] lane, divided roadway*) on the City's Master Thoroughfare Plan. Beyond this is the corporate boundaries for the City of Rockwall.

South: Directly south of the *subject property* is E. Quail Run Road, which is identified as a M4D (*i.e. major collector, four [4] lane, divided roadway*) on the City's Master Thoroughfare Plan. Beyond this is Planned Development District 5 (PD-5), which is zoned for Single Family 7 (SF-7) District land uses and consists of ~539.00-acres.

East: Directly east of the *subject property* is J. W. Williams Middle School, which is situated on a 25.569-acre tract of land zoned Single-Family 16 (SF-16) District. Continuing along the eastern boundary of PD-70 are several parcels of land zoned Agricultural (AG) District, and Planned Development District 79 (PD-79) for Single-Family 10 (SF-10) District land uses. Beyond this is John King Boulevard, which is identified as a M4D (*i.e. major collector, four [4] lane, divided roadway*) on the City's Master Thoroughfare Plan.

West: Directly west of the *subject property* is N. Goliad Street, which is identified as a M4D (*i.e. major collector, four [4] lane, divided roadway*) on the City's Master Thoroughfare Plan. Beyond this are several properties that are zoned Single-Family 16 (SF-16) District, Planned Development District 37 (PD-37), Agricultural (AG) District, Single-Family Estate (SFE-1.5) District, and Planned Development District 3 (PD-3). These areas include a mix of land uses, but are primarily residential.

CHARACTERISTICS OF THE REQUEST

Planned Development District 70 (PD-70) [*Ordinance No. 09-44*] -- *in accordance with the original development agreement* -- requires the developer to provide a minimum of four (4) retention ponds with hard edges and fountain features. According to the ordinance, the location and configuration of the proposed ponds is to be determined at the time of development. Currently, the developer has constructed three (3) of the four (4) ponds required by Planned Development District 70 (PD-70): [*1*] the first pond is located at the northeast corner of the intersection of N. Goliad Street [*SH-205*] and Featherstone Drive (*i.e. at the entry to the subdivision*), [*2*] the second pond located south of and adjacent to homes along Crestbrook Drive, and [*3*] the third pond located within the public park located at the northwest corner of Featherstone Drive and John King Boulevard. The pond at the entryway to the subdivision is the only pond that incorporates both a hardedge and a fountain feature. The pond located south of and adjacent to Crestbrook Drive only incorporates a hardedge, and the pond in the public park does not incorporate either a hardedge or a fountain; however, this pond was exempted by the City to make the park eligible for matching grants through the State of Texas, which were applied to increase the amenity of the park. The applicant has requested to change the language in the Planned Development District 70 (PD-70) to reduce the number of ponds from three (3) to four (4) ponds, and has agreed to incorporate a fountain feature in the pond adjacent to Crestbrook Drive and another in a secondary pond along York Street. This means that the only thing the applicant is lacking to meet the

current requirements would be a hardedge along the pond located adjacent to York Street; however, staff should point out that this pond is located within the 100-year floodplain and is not highly visible from the street. The applicant has stated the reason for the request is tied to the lengthy and indefinite permitting process required by the Texas Commission on Environmental Quality (TCEQ), and a desire to *not* put an additional cost burden on the Stone Creek Homeowner's Association (HOA).

As has been done with past requests to amend Planned Development (PD) District ordinances, staff has consolidated the two (2) regulating ordinances into one (1) regulating ordinances; however, the only change made in the attached draft ordinance is to the verbiage relating to the number of retention ponds permitted within the development.

INFRASTRUCTURE

There are no infrastructure requirements associated with the proposed amendment. In addition, staff should point out that the additional retention pond is not needed to meet the stormwater detention requirements, as the retention ponds were not accounted for in the required detention for the subdivision (*i.e. the development was required to provide detention in other areas of the subdivision to meet the City's engineering requirements*).

CONFORMANCE WITH THE CITY'S CODES

Since the request is only tied to a requirement of Planned Development District 70 (PD-70), the request remains in compliance with all of the requirements of the City's codes.

CONFORMANCE WITH OURHOMETOWN VISION 2040 COMPREHENSIVE PLAN

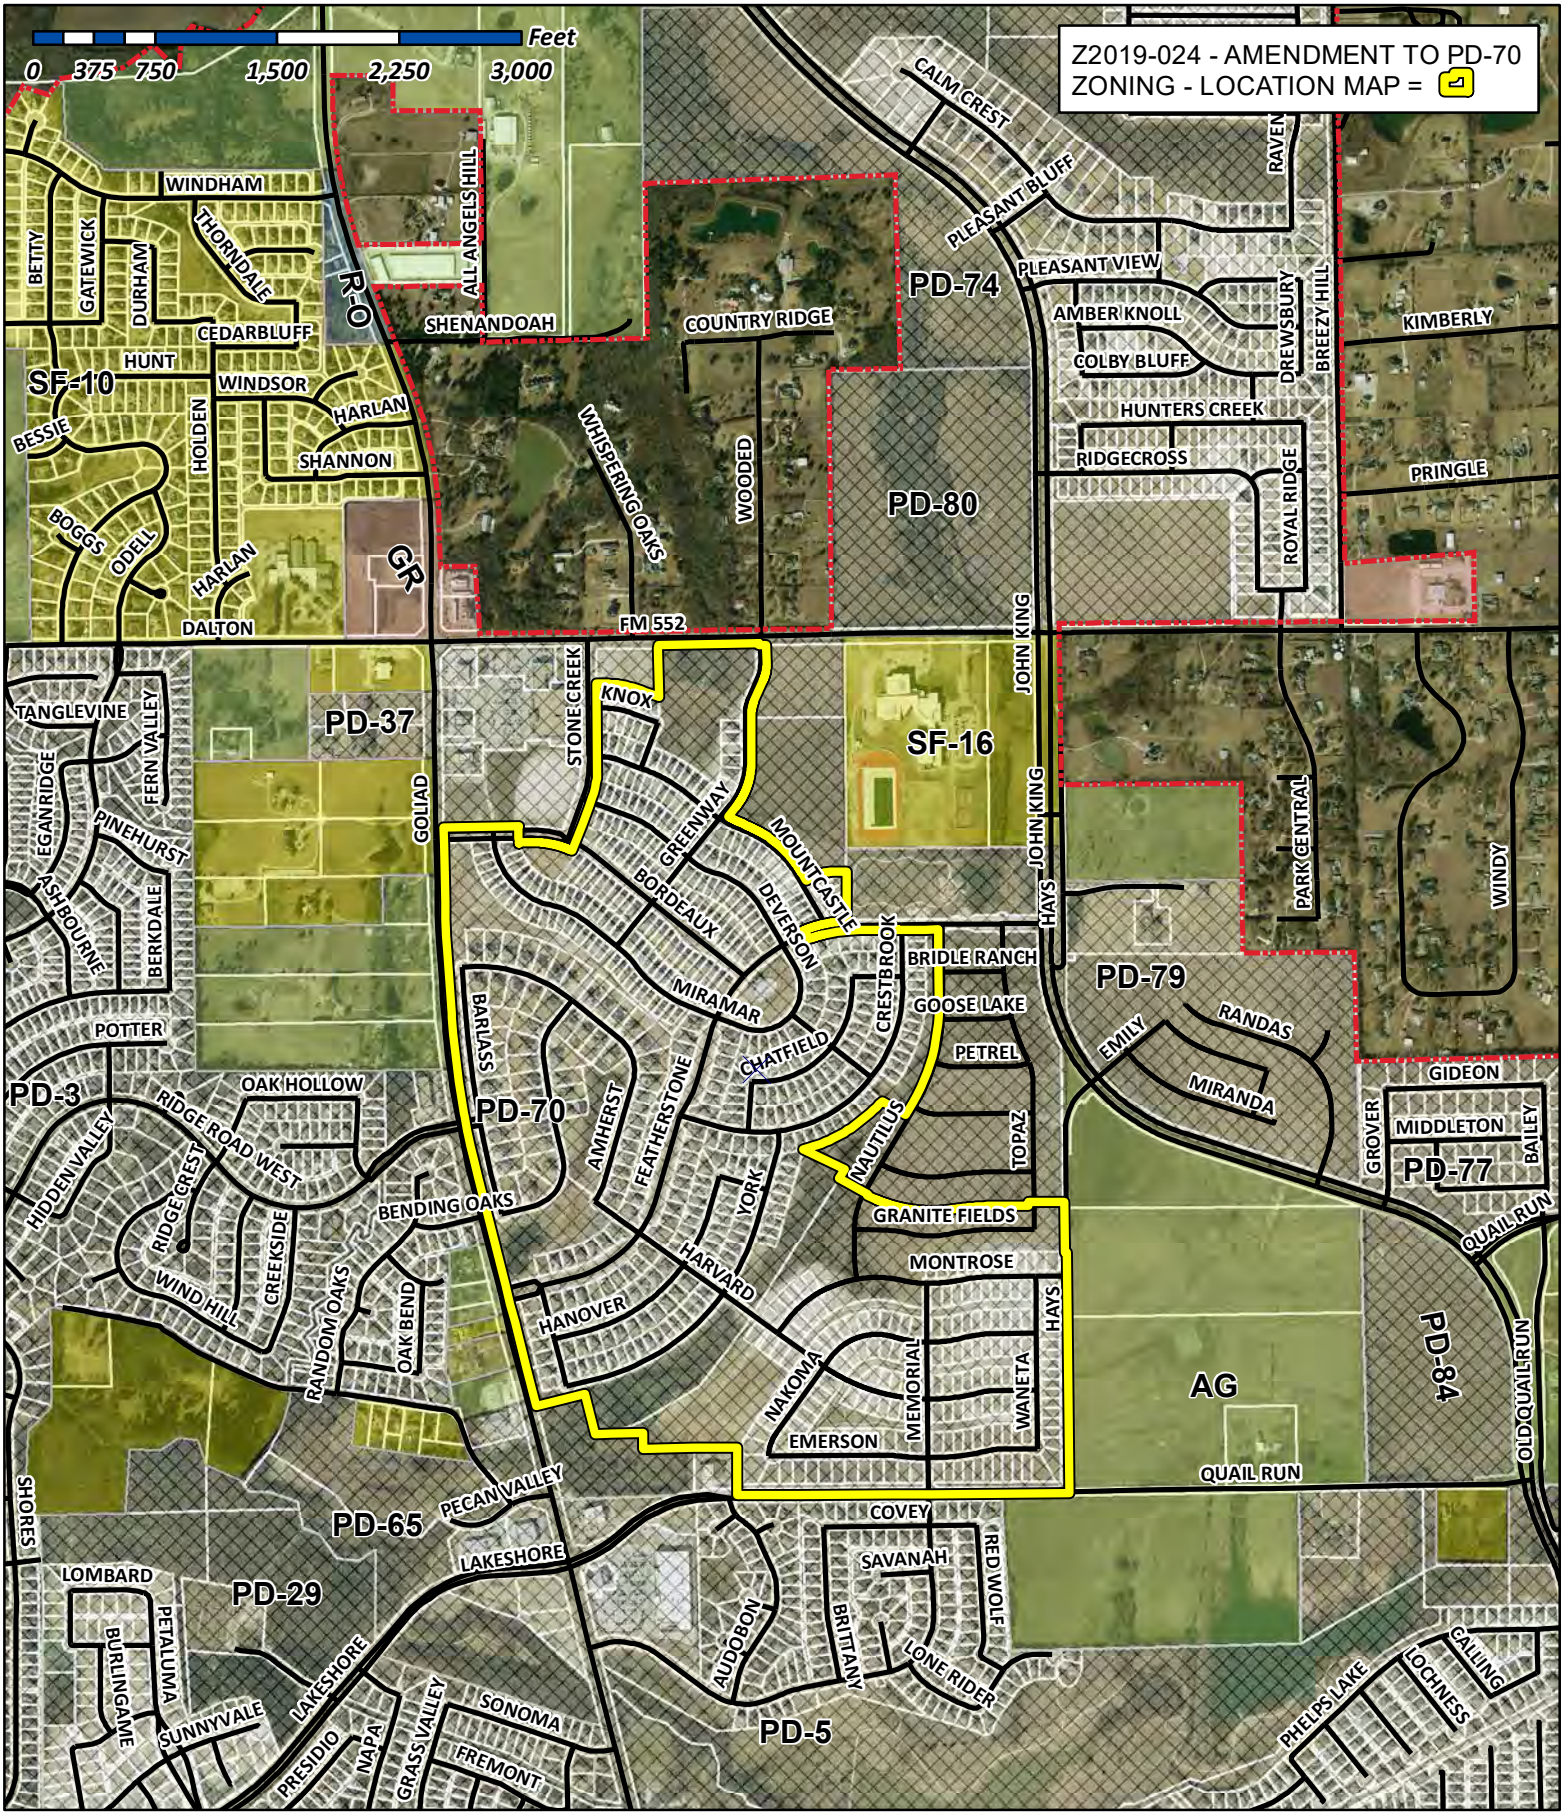
The proposed request does not change any of the land uses permitted within Planned Development District 70 (PD-70), and as a result does not have an impact on the City's Future Land Use Map. In addition, the request does not relate to any of the specific goals, policies, or strategies contained within the OURHometown Vision 2040 Comprehensive Plan.

NOTIFICATIONS

On September 20, 2019, staff mailed 928 notices to property owners and residents within 500-feet of Planned Development District 70 (PD-70). Staff also emailed notices to the Quail Run Valley, Lakeview Summit, Random Oaks, and Rockwall Shores Homeowner's Associations (HOA's), which are the only HOA's located within 1,500-feet of Planned Development District 70 (PD-70) participating in the *Neighborhood Notification Program*. Additionally, staff posted a sign adjacent to the subject property along N. Goliad Street [*SH-205*], and advertised the public hearings in the Rockwall Herald Banner as required by the Unified Development Code (UDC). At the time this case memo was drafted, staff had received four (4) notices, three (3) online forms, & twelve (12) emails in favor of the request, and four (4) notices, one (1) online form, & five (5) emails opposed to the request.

CONDITIONS OF APPROVAL

If the City Council chooses to approve the applicant's request to amend Planned Development District 70 (PD-70), then staff would propose the following conditions of approval:



(1) The applicant shall be responsible for maintaining compliance with the conditions contained within the Planned Development District ordinance;

(2) Any construction resulting from the approval of this zoning amendment shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and

with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION

On October 8, 2019, the Planning and Zoning Commission's motion to recommend approval of the amendment to Planned Development District 70 (PD-70) with staff conditions passed by a vote of 5 to 2, with Commissioners Welch and Thomas dissenting.

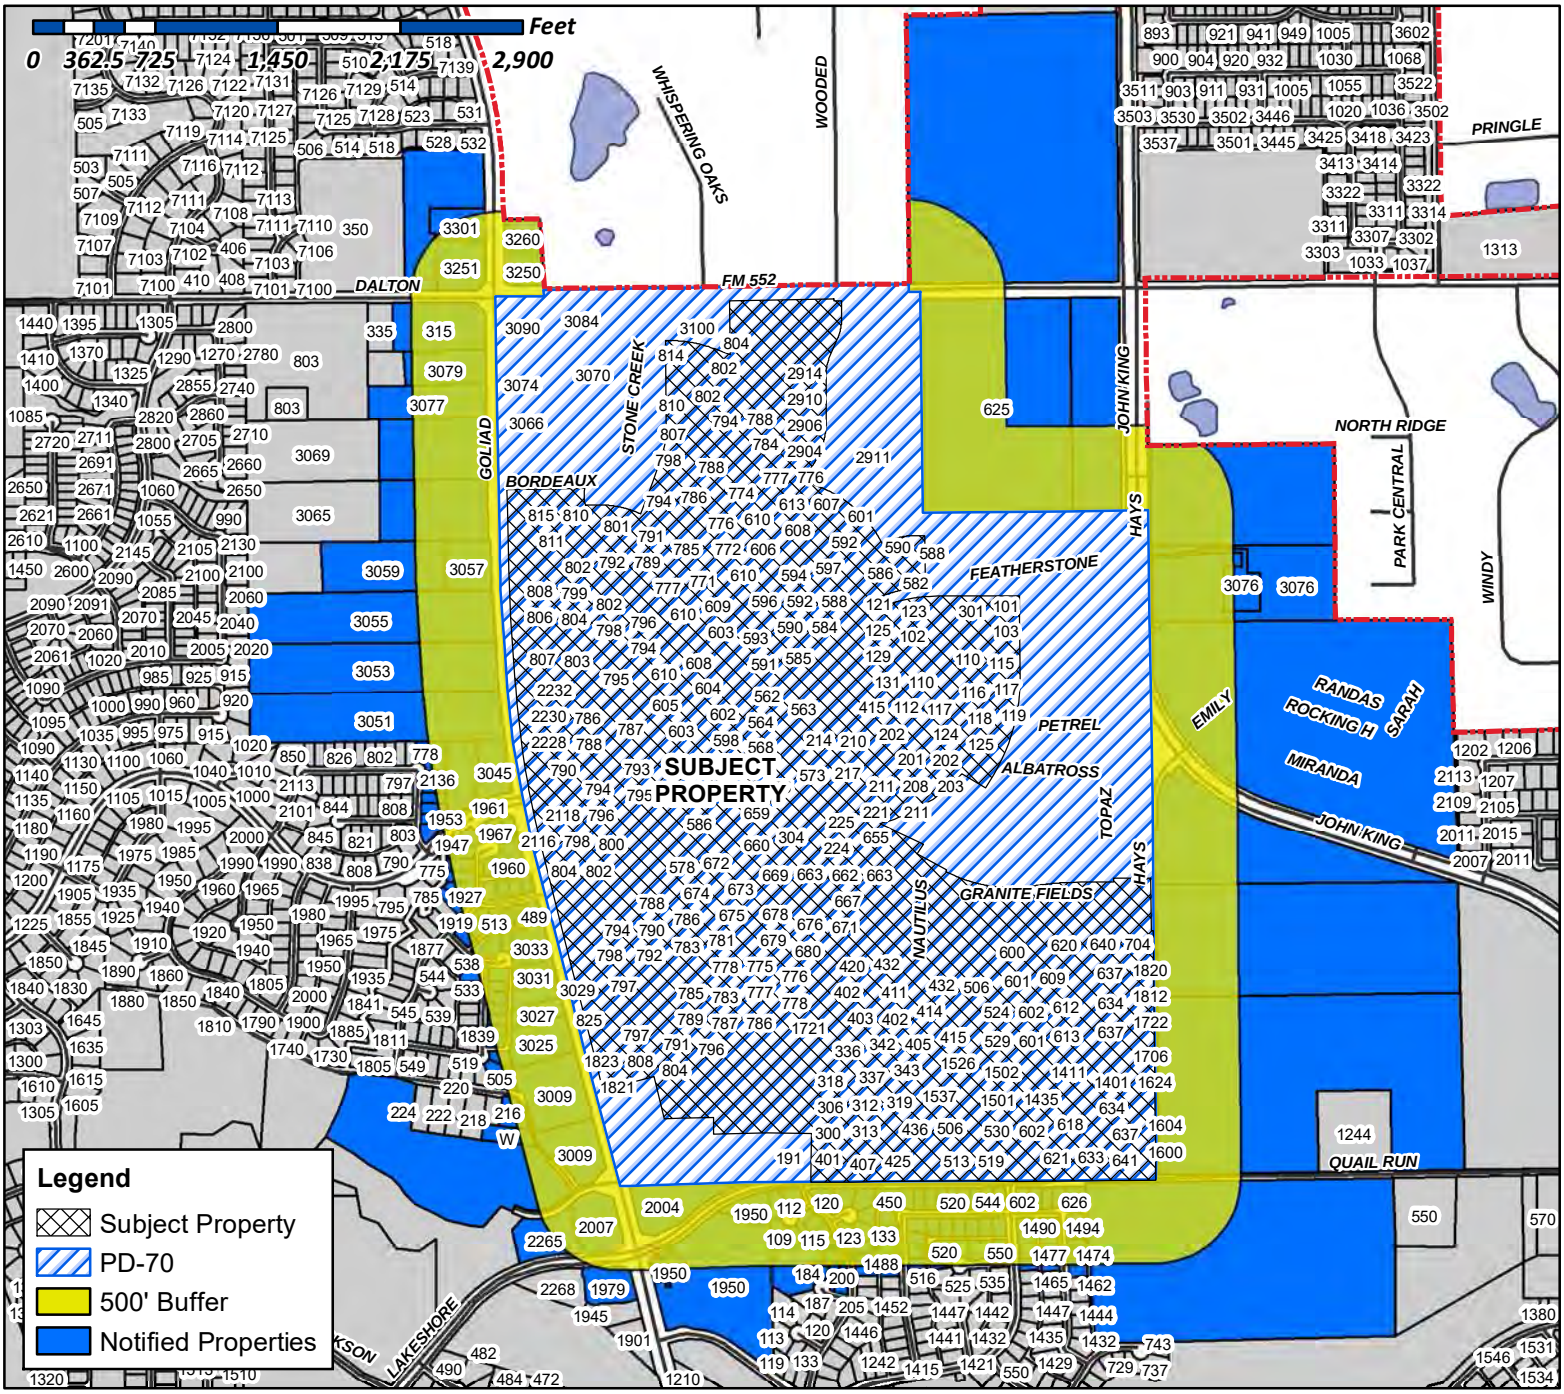
Subject: Neighborhood Notification Program: Notice of zoning request
Attachments: Z2019-024 HOA Map.pdf; PUBLIC NOTICE.pdf

To whom it may concern:

Per your participation in the Neighborhood Notification Program, you are receiving this notification to inform your organization and residents of a request for a zoning change that lies within 1,500 feet of the boundaries of your neighborhood or subdivision. As the primary contact for the organization, you are encouraged to share this information with the residents of your subdivision. Please find attach ed a map detailing the location of the subject property requesting the zoning change in relation to your subdivision boundaries. Additionally, below is a summary of the zoning request that was published in the Rockwall Herald Banner ***September 20, 2019***. The Planning and Zoning Commission will hold a public hearing on ***Tuesday 10/8/2019 at 6:00 p.m.***, and the City Council will hold a public hearing on ***Monday 10/21/2019 at 6:00 p.m***. These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street. These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street. If you have any questions or comments regarding this request, the contact information for the Planning Department is listed below. Additional information can also be found at https://sites.google.com/site/rockwallplanning/development/development-cases

> **Z2019-024- Hold a public hearing to discuss and consider a request by Adam Buczek of Stone Creek Balance, LTD for the approval of a zoning amendment to Planned Development District 70 (PD-70) for the purpose of changing the number of hard-edged retention ponds required for the residential subdivision being a ~336-acre tract of land identified as the Stone Creek Subdivision and being situated within the W. T. Deweese Survey, Abstract No. 71 and the S. King Survey, Abstract No 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for Single-Family 10 (SF-10) District land uses, situated within the North SH-205 Overlay (N. SH-205 OV) and SH-205 By-Pass Overlay (SH-205 BY-OV) Districts, generally located at the southeast corner of the intersection of FM-552 and SH-205 [N. Goliad Street], and take any action necessary.**

If this email is reaching you in error, please forward it to your HOA or neighborhood group representative and update the contact information at http://www.rockwall.com/planning/hoa.asp.



Sincerely,

Laura Morales

NOTICE OF PUBLIC HEARING
CITY OF ROCKWALL, PLANNING & ZONING DEPARTMENT

PHONE: (972) 771-7745
EMAIL: PLANNING@ROCKWALL.COM

To Whom It May Concern:

You are hereby notified that the City of Rockwall Planning and Zoning Commission and City Council will consider the following application:

Case No. Z2019-024: PD Amendment to PD-70

Hold a public hearing to discuss and consider a request by Adam Buczek of Stone Creek Balance, LTD for the approval of a zoning amendment to Planned Development District 70 (PD-70) for the purpose of changing the number of hard-edged retention ponds required for the residential subdivision being a ~336-acre tract of land identified as the Stone Creek Subdivision and being situated within the W. T. Deweese Survey, Abstract No. 71 and the S. King Survey, Abstract No 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for Single-Family 10 (SF-10) District land uses, situated within the North SH-205 Overlay (N. SH-205 OV) and SH-205 By-Pass Overlay (SH-205 BY-OV) Districts, generally located at the southeast corner of the intersection of FM-552 and SH-205 [N. Goliad Street], and take any action necessary.

For the purpose of considering the effects of such a request, the Planning and Zoning Commission will hold a public hearing on **Tuesday, 10/8/2019 at 6:00 p.m.,** and the City Council will hold a public hearing on **Monday, 10/21/2019 at 6:00 p.m.** These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street.

As an interested property owner, you are invited to attend these meetings. If you prefer to express your thoughts in writing please return the form to:

David Gonzales
Rockwall Planning and Zoning Dept.
385 S. Goliad Street
Rockwall, TX 75087

You may also email your comments to the Planning Department at planning@rockwall.com. If you choose to email the Planning Department please include your name and address for identification purposes.

Your comments must be received by **10/21/2019** to ensure they are included in the information provided to the City Council.

Sincerely,

Ryan Miller, AICP
Director of Planning & Zoning

EMAIL: PLANNING@ROCKWALL.COM

To Whom It May Concern:

You are hereby notified that the City of Rockwall Planning and Zoning Commission and City Council will consider the following application:

Case No. Z2019-024: PD Amendment to PD-70

Hold a public hearing to discuss and consider a request by Adam Buczek of Stone Creek Balance, LTD for the approval of a zoning amendment to Planned Development District 70 (PD-70) for the purpose of changing the number of hard-edged retention ponds required for the residential subdivision being a ~336-acre tract of land identified as the Stone Creek Subdivision and being situated within the W. T. Deweese Survey, Abstract No. 71 and the S. King Survey, Abstract No 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for Single-Family 10 (SF-10) District land uses, situated within the North SH-205 Overlay (N. SH-205 OV) and SH-205 By-Pass Overlay (SH-205 BY-OV) Districts, generally located at the southeast corner of the intersection of FM-552 and SH-205 [N. Goliad Street], and take any action necessary.

For the purpose of considering the effects of such a request, the Planning and Zoning Commission will hold a public hearing on **Tuesday, 10/8/2019 at 6:00 p.m.**, and the City Council will hold a public hearing on **Monday, 10/21/2019 at 6:00 p.m.** These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street.

As an interested property owner, you are invited to attend these meetings. If you prefer to express your thoughts in writing please return the form to:

David Gonzales
Rockwall Planning and Zoning Dept.
385 S. Goliad Street
Rockwall, TX 75087

You may also email your comments to the Planning Department at planning@rockwall.com. If you choose to email the Planning Department please include your name and address for identification purposes.

Your comments must be received by **10/21/2019** to ensure they are included in the information provided to the City Council.

Sincerely,

Ryan Miller, AICP
Director of Planning & Zoning

Subject: Case Z2019-024 PD Amendment to PD-70

Good morning

I received a notice for this change in the mail. I will be out of town and will not be able to attend the hearing. I would like to express my opposition to the change. I feel that the developer needs to stick with the original plans for the neighborhood.

Gonzales, David

From: [redacted]
[redacted]
Tuesday, October 8, 2019 2:31 PM
To: Planning
Cc: Miller, Ryan; Gonzales, David
Subject: Case No. Z2019-024 PD Amendment to PD-70

Importance: High

Although we are not opposed to the Developer not installing an additional pond, we are **opposed** to the existing amendment as we interpret it.

We have communicated with the Corp. of Engineers (CoE) and we have an email from the CoE stating that no permit is required to clean the banks of a waterway if the roots within the waterway are not disturbed.

Stone Creek already has four (4) ponds: Featherstone at Goliad, Crestbrook, York, and at the City Park. So, the number of ponds seems to have been met.

The main outstanding issue within the PD-070 is the number of "hard-edges" and the "fountain features" for the existing ponds.

Cleaning out the area around on both sides of the creek and pond along York Drive to the water's edge and installing a fountain feature to cut down on algae would go a long way to enhance the appearance of that area.

We would like for the Developer to consider having the PD amendment written to require four (4) ponds with a fountain feature, and omitting the "hard-edge" requirement. Additionally, to accomplish the goal of making the neighborhood aesthetically pleasing, which was the original purpose of this (PD-070) requirement, the Developer would commit to cleaning out the underbrush on our creeks and around both sides of the ponds on York Drive, at his expense. No one is expecting any additional plant material, irrigation, or anything else. Just a clean-up so that the areas may be mowed to the water's edge like in the picture in the PD. Actually, the areas remaining to be cleaned are not that large, but very visible!

The City Park pond has been exempted from the water feature, so our recommendation should result in a fountain feature on Featherstone-Goliad entrance (already provided), on Crestbrook, and on the York pond.

We could end up with a beautiful neighborhood and a plan that is cost effective for the Developer and our HOA.

I am hopeful that the result of this discussion is a "win-win". The Developer wins by not having to install another hard edge pond somewhere within the neighborhood, and the citizens win a community that both the homeowners and the Developer can be proud of.

My name is Luis Rey. I live at 806 York Dr. in Stone Creek Estates. I am opposed to the request for the change in Case No. Z2019-024. I want this plan to be followed as it was originally presented. This developer has a bad habit of not doing the things he was supposed to do in Stone Creek. Now he's ready to move on, and does not want to mess with us anymore. We will never again buy a home in any neighborhood that is developed by Skorburg. He is helping ruin the beauty of Rockwall, while whoever is in charge of Rockwall, allows him to do it.
Thank you.

Subject: Z2019-024

This serves as my vote to allow Z2019-024 to pass, allowing the developer of Stone Creek Estates to reduce the number of hard-edges ponds from 4 to 3 IF the developer is held to his promise to add a fountain to the pond on York Drive. I live on York and the pond and creek in their current state are an eyesore and dangerous.

Dann Shirley

Follow Up Flag: Follow up
Flag Status: Flagged

Good afternoon David, I hope all is well with you.
I have completed the the public hearing response form and returned it to you.

I want to reiterate a previous conversation between the Planning Department and the Stone Creek Landscape Committee is as follows:

Of the 4 hard edge ponds referenced by PD-70, the only hard edged pond in existence is the pond located of of Featherstone Drive and Goliad (SH205). In a separate agreement, the pond that was dedicated with the public park land has been counted as the second of 4 hard edge ponds, even though that pond was not configured with a hard edge. The remaining 2 ponds are still a requirement and will be required to be provided; however the development still has future phases that these ponds could be provided.

Section 10 is the last phase available to the developer to provide the remaining hard edge pond. Therefore I request that the requirement for the hard edge not be waived.
I further suggest that the existing pond be modified to a hard edge and to retain some of the existing trees around the pond. This will provide a pleasing entry and a natural retention area.

Please fill free to contact me at 614-312-9192 with any questions or comments.
Thank you,
Ralph Chizzonite

Subject: Stone Creek Estates - Please Vote

The City has Planned Development (PD) 0rdinances that define the requirements for specific areas.

On October 21 the City Council will vote on a proposed change to ours (PD-70).
It involves the requirement for 4 ponds with hard-edges (not natural) and fountains.

The developer will comply with the current PD-70, but is requesting one waiver of the hard-edge
for pond #4. Here are the 4 ponds, with upgrades if PD-70 change is approved.:

#1 at main entrance, already has hard-edge and fountain
#2 at park, hard-edge and fountain were waived by city & parks
#3 behind Crestbrook, he will add fountain and it already has hard edge
#4 along York, he will add fountain, but wants the hard-edge waived.

If you are in favor or not in favor of the change, please forward the message below to

Mr. Gonzales
Rockwall City Planner
Z2019-024,

I would most definitely approve the change to add a fountain on the York pond directly in front of my house. This would help tremendously with the algae and growth that has greatly increased since the bridge being installed.

PS if they would clean out the dead trees and debris that would be greatly appreciated as well.

Subject: Case No Z2019-024 PD Amendment to PD-70

I would to like to make known I oppose the request to amend PD-70. The developer knew the requirements going into to this development and he needs to stick to them. He has cut as many corners as possible. Hard edged retention ponds are needed to replace the natural areas that are no longer natural but have streets, sidewalks and roofs.

If I need to mail in the notice to be heard please let me know asap.

SKORBURG COMPANY

8214 Westchester Drive, Suite 710
Dallas, Texas 75225

Mr. Ryan Miller
Director of Planning & Zoning
385 S. Goliad Street
Rockwall, Texas 75087

September 12, 2019

Dear Mr. Miller:

Please accept this request for a zoning change to reduce the required number of hard edge retention ponds from four (4) to three (3) as described in Exhibit "C" (Planned Development District No. 70) to PD Ordinance No. 07-13 (as amended by Ordinance No. 09-44), more specifically contained in the last paragraph of Section C ("Standards for District Design and Connectivity"), Paragraph 6(d) (under "Parks and Open Space"). No other changes to the PD are being requested.

The original Stone Creek PD was approved in 2007 that included a requirement to have four (4) hard edge ponds built throughout Stone Creek Estates. The exact location and configuration of the ponds was to be determined at the time of development.

To date, three (3) ponds have been fulfilled: two (2) hard edge retention ponds were constructed with Phase I, and the third pond is located within the 11.3 acre City park that was dedicated to the City of Rockwall in January 2014. An exhibit showing the location of these three (3) existing ponds is included on the attached **Exhibit "A"**. While the pond located in the City park does not have a hard edge, it has been counted towards the PD requirement as it was the City's decision to not install a hard edge to be eligible for a State matching grant for the park. Hence, three (3) of the four (4) hard edge ponds as required by the existing PD have been satisfied.

For additional background on this request, Phase I was constructed in 2007-08, which included two (2) hard edge retention ponds. In 2012, we received notice from the City that the City's process for obtaining a Texas Commission on Environmental Quality ("TCEQ") permit for retention ponds had changed, which lengthened the permitting time period to up to a year, and due to water rights, there would be no guarantee if the permit would be approved after that time period.

To avoid the potential need for another TCEQ permit (that may or may not be approved) and adding more long-term maintenance cost burden on the HOA, we believe it is in the best interests of Stone Creek Estates not to construct an additional hard edge pond.

As such, we respectfully request the PD be modified per the attached **Exhibit "B"** to reduce the number of hard edge ponds from four (4) to three (3).

In lieu of installing a hard edge around the City park pond and a fourth hard edge pond somewhere that could pose potential future TCEQ issues in the future, we redirected value to Stone Creek residents and the City by enlarging the park dedication area (resulting in fewer lots), and will be finishing the build out of Stone Creek Estates with 32 fewer lots than allowed under the PD (the PD allows a maximum of 918 total SF lots, but the final phase of Stone Creek will result in the build out being only 886 SF lots based on the City approved preliminary plat for the final phase).

We look forward to visiting with the Planning and Zoning Commission and City Council on this proposed amendment to our master planned community.

Sincerely,

Adam J. Buczek
Skorburg Company, Development Partner
On behalf of Stone Creek Balance, Ltd, a Texas limited partnership (Owner and Applicant)

459

EXHIBIT "A"

Three (3) Existing Pond Locations

The single-family zoned land of Stone Creek Estates is outlined in yellow below.

The two (2) existing hard edge retention ponds are outlined in **BLUE.**

The one (1) existing City park pond (no hard edge, but counted toward PD hard edge pond requirement) is outlined in **ORANGE**.

460

EXHIBIT "B"

Requested Stone Creek PD Language Modification

With respect to Exhibit "C" (Planned Development District No. 70) to PD Ordinance No. 07-13 (as amended by Ordinance No. 09-44), this zoning application requests that the last paragraph of Section C ("Standards for District Design and Connectivity"), Paragraph 6(d) (under "Parks and Open Space") be modified to read as follows:

"The Developer shall provide retention ponds in the locations depicted on the Concept Plan in Exhibit "B" of this ordinance. Hardedges and fountain features shall be incorporated into Ponds 1 & 2, Pond 3 shall incorporate a natural edge, and Pond 4 shall incorporate a fountain feature and a natural edge. All retention pond hard edges shall be similar to the hard edge shown in Figure 5 below."

Figure 5: Retention Pond with Hardedge.

In addition to the above change, the Concept Plan included on Exhibit "B" of the ordinance would be updated accordingly.

Subject: FW: Stone Creek Q&A / information on requested PD change

Follow Up Flag: Follow up
Flag Status: Flagged

Good morning, Ryan and David.

I am forwarding you this e-mail exchange with Bob Wacker (Stone Creek resident) in which he has helped compile feedback from Stone Creek residents (on the HOA NextDoor website) about the zoning change request. I have provided responses to each on in red font below, and I want you to have this on record as we're going to install a fountain in the Crestbrook pond regardless of the outcome of this case so that pond is fully compliant with the existing PD (giving us 3 fully compliant ponds including the main entry pond (which has a fountain already) and the City Park pond – which counts even though it does not but that's with City direction.

Insofar as the 4th pond…….if this PD request gets approved, based on resident input below, we (developer) will also install an additional fountain in the pond along York (which does not have a hard edge). If not, then we'll just build the 4th pond and include a fountain in a TBD location within Stone Creek Estates while we develop the last phase of Stone Creek.

This will hopefully provide clarity and additional context for how 3 of the 4 ponds under the current PD conditions will be fully satisfied "as is", and if the PD is approved as requested – then we'll also install a fountain in the York pond (even though no hard edge) to help address the "aesthetics" comments below.

Subject: Stone Creek Q&A / information on requested PD change

Good morning, Bob. Thanks for keeping me in the loop and helping me get resident feedback. I have typed responses to each comment below under "Against PD-70 Change" in **red font**. I also added some commentary / clarifying notes to your original email to make sure there's no confusion on certain facts. Feel free to share as you wish with homeowners as we want to be 100% transparent. The main things here are that we are going to install a fountain in the Crestbrook pond regardless to fulfill the PD requirement on that pond.

Also – if the PD amendment is approved, we will also install a fountain in the pond off York (which does not have a hard edge), but we'll do it anyway. If the PD amendment is not approved, then we will NOT install a fountain in the York pond – but instead, will plan to install a fountain in the 4th hard edge pond that we end up building to fulfill the existing requirements of the PD.

I will be sharing this correspondence with NMI and city staff so we are all in the loop. Questions let me know. Thanks.

Subject: Status

I've summarized the key posts (Nextdoor and emails).

AGAINST PD-70 CHANGE

The City should hold the Developer accountable for the requirements (shall provide) stated in the PD?
It's the "aesthetic purpose" that we are concerned about that has not been met.

1. Why not consider a natural edge pond, with a water feature, in a different area within the neighborhood? If the City (and Stone Creek residents) prefer to leave the PD unchanged and have us install a 4th hard edge pond, we will do so. For reasons cited in our summary letter with the zoning application, the developer does not think it's the best use of HOA funds long-term – but we are happy to proceed either way.

2. Isn't the actual reason for finishing out the PD with fewer lots due to the fact that the PD requires an
average lot size of 8,000 s.f., and the Developer has to put in larger lots in Phase X to maintain that average? No. Our average lot size is voluntarily larger than what was required in the PD. For instance, we opted for a larger lot mix, dedicated a City park that is 45% larger than required by the PD, and sold additional land to the Rockwall ISD – all of which contributed to the planned build out of Stone Creek being 32 lots less than allowed by the PD.

3. Why should this pond (the one behind Crestbrook) be acceptable to the City or our neighborhood? Other than the fact that it does not currently have a fountain in it, the

pond meets the requirements of the PD. The developer will install a fountain in the Crestbrook pond in conjunction with the development of the last phase of Stone Creek to fully satisfy the PD with respect to the pond behind Crestbrook. A fountain was not previously installed due to it being a low visibility area, and therefore, we did not think it would be the best use of HOA funds in terms of directing maintenance dollars, but unless residents object, we're going to install a fountain in this pond to complete this PD element.

4. if the Developer were to agree to go back and clean-up some of these under-developed Common
Areas, perhaps the City/Developer (and residents of Stone Creek) might then be able to come to
a reasonable compromise. First and foremost, we want our residents to be happy. Open spaces in prior phases have been dedicated to the City of Rockwall and are to be maintained by the HOA pursuant to the PD and their respective recorded plats. If there are some specific areas or items that residents would like the developer to consider assisting with, they should send such items to NMI and ask them to pass on and share / discuss with the developer. One of the functions an HOA management company serves is to provide a path of communication between residents and the developer. The developer is happy to privately and in good faith review items that residents would like to be taken into consideration. Notwithstanding the foregoing, we respectfully ask residents and the City to take into account the following items in context with this zoning request:

A. Reducing the required number of hard edge ponds from 4 to 3 would help keep homeowners dues down via lower maintenance costs. A 4th pond for the HOA to maintain is not going to add value to the community, as this is an amenity that already exists in other locations. Ponds are not cheap to maintain – particularly long-term. In our view, HOA dues could be better spent / directed towards adding other types of assets in open space areas, if residents desire down the road. In turn, we have redirected value for the residents in Items B through D below.

B. With our current approved preliminary plat for the last phase of Stone Creek, we plan to finish the build out of Stone Creek with 32 fewer lots than allowed under the PD, which is significantly lower density than allowed under the PD. As stated in #2 above, we opted for a larger lot mix, dedicated a City park that is 45% larger than required, and sold additional land to the Rockwall ISD – all of which contributed to the planned build out of Stone Creek being 32 lots less than allowed by the PD.

C. Part of our plan in lieu of not doing a 4th pond was that we donated a 45% larger City park than required by the PD (and did so in a manner which got matching grant dollars to the City from the Texas Parks & Wildlife Foundation to help expedite and enhance the park improvements). The required City Park area per the PD was 7.8 acres of contiguous land. Our City Park dedication area was 11.3 acres – an increase of 3.5 acres.

D. The long-term value that is being enjoyed by the City and residents of Stone Creek is reflected in the fact that the price points of the homes throughout the community have far exceeded expectations from original projections / requirements of the original 212 agreement with the City.

5. Why not require that all the creeks and ponds be consistent with the picture that the Developer submitted as Appendix "C" in the original PD? The existing ponds are constructed in a manner consistent with the intent of the PD. The picture attached to the PD is conceptual, and as stated in the PD, the exact size/shape/configuration of ponds were to be determined at the time of development.

6. A reasonable solution would be for the Developer to clean all the Common Areas to be consistent with the picture in Appendix "C" (without a hard edge) so that all Common Areas could be mowed to the water line. Each pond has its own natural configuration, design, and maintenance needs. All common areas that have been completed to date have been timely turned over to the HOA in good condition as required. Once a common area is turned over to the HOA, the maintenance becomes the responsibility of the HOA.

7. A fountain feature needs to be added to the ponds on York Drive and maybe to the one on Crestbrook Drive to decrease algae and inhibit mosquito growth. As stated in #3 above, the developer will add a fountain to the Crestbrook pond so this pond will be 100% in compliant with the existing PD. The pond along York Drive is not one of the existing 3 ponds that have been counted towards the PD requirements; however, if this PD request gets approved, the developer will happily install an additional fountain in the pond along York Drive as well. If the zoning change request is not approved, then the 4th pond requirement will be satisfied with the construction of a separate 4th pond and fountain located elsewhere within Stone Creek Estates.

The City-owned land across from the new elementary school needs to be cleaned out for easy mowing. Then the Developer could proceed to finish out Phase X as he has initially presented with no additional pond. The City controls and maintains City-owned property.

If many of the features required by the city were not done by the developer, then this would be something he needs to complete. I feel there are many areas that are wasted and not taken advantage of due to the developer and if this is our chance to hold his feet to the fire, this is our last chance to do so. For purposes of this zoning request, the definition of "Many features…not done by the developer" means just 1 more pond and adding 2 more fountains to said ponds. All other requirements of the PD have been fulfilled to

date. On the flip, additional value has been added for the benefit of the community as described in #4 above.

I happen to view the existing pond in Phase X from my back yard, but that does afford me the ability to see the pond in active use by neighbors, and the wildlife that it facilitates. I would love to see it remain and to help future neighbors avoid future foundation issues. This pond is a stock tank pond – non-jurisdictional, and will be filled in with the development of the last phase of Stone Creek.

FOR PD-70 CHANGE

My initial posting on Nextdoor

When Stone Creek was started, the City's PD (Planned Development-70) ordinance required 4 hard-edge (stone, brick, concrete, etc) ponds. Two were built … #1 and #2. The HOA has to maintain them. The annual cost is typically $7k-$10k. Pond #3 was planned for the park, but the city waived that requirement. Its a natural area and they wanted it to stay that way.

The developer submitted the last plot of land (Phase 10) to the city for approval. The developer wants to finish Stone Creek ASAP and doesn't want to build the pond. The reason we don't want to build the pond is because we don't see it adding any value as an additional amenity to the HOA, and since we've redirected value via other avenues as stated above. Adding another pond will only add ongoing maintenance cost to the HOA, and while the location of a 4th pond is not yet determined – if we build it along the floodplain – it could require us to obtain another TCEQ permit, which we don't want to deal with. The only remaining location would be the 'pond' across from the park. Not true. We have a few options for the 4th pond location, so regardless – this stock tank pond is going to be filled in and go away with the development of the last phase of Stone Creek (Phase X). It is not a natural pond, nor a necessary retention or detention pond. It is a very old shallow stock pond. Correct. It's maintenance would be very expensive.
The park already has a large enough pond immediately across Featherstone Drive for adequate recreation. Agreed – no need for pond overkill. The HOA can accumulate $7K-$10K per year in funds and save up to add much more complimentary and other value-added amenities if it so chooses down the road rather than continually sink money into another pond.

If the PD change request is denied and a hard-edge pond must be built, it would take several

months of planning and approvals. Not true. This would only be true in the event we opted to pick a location that would require a TCEQ permit to construct the last pond. If the PD modification request is denied, we would then look for options to construct a 4th pond somewhere that would not require a TCEQ permit. And then be an extra annual maintenance cost to the HOA.

If the PD change is approved, then Phase 10 can be started quickly. Phase 10 can and is planned to start this fall regardless of the outcome of this zoning request, and the 4th pond can be built (if the PD change is not approved) anywhere within Stone Creek Estates. That will allow the homeowners to continue to take control of their HOA Board of Directors. We already have one on the Board, and the sale of the Phase 10 lots would let us replace the other two BOD members (i.e., the developer's officers) right away. Bob – the Developer will remain in control of the HOA until the last lot is sold to builders (so the homeowners will not take control of the HOA until that time – which will likely take a few more years).

I support the change and recommend that those who also agree, should read the notice we just received, check the appropriate box, sign it, and then mail it back to the City.

Another reply of mine….

1. **The existing ponds have been resolved with TCEQ and the City.**
2. **The differences in green spaces were approved at each Phase by the City. We should have raised any concerns then. WE SHOULD BE DOING THAT FOR PHASE 10 NOW.**
3. **The HOA is responsible for the existing ponds. We decide and pay for maintenance and whatever improvements we want to make.**

And another of mine …

The push to force Skorburg into building a 4th pond is also to try to get leverage on him for alternative actions … clean up the main pond, help fix the Amenity Center, etc. If he does build a 4th pond, his costs will be passed on to the new lot owners, but the HOA will have the cost of maintaining another pond. It likely would delay (TCEQ plans, approvals, construction) the homeowners takeover of the HOA BOD. The outcome of this zoning request will have no impact on the timing at which the homeowners take over the HOA BOD, as the timing of the last phase of Stone Creek will not be delayed over this item.

Approving the PD-70 amendment expedites build-out of Stone Creek Estates and our take-over..
That's why I'm in favor of it.

Bob Wacker

CITY OF ROCKWALL

ORDINANCE NO. 19-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING PLANNED DEVELOPMENT DISTRICT 70 (PD-70) AND THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING THE DEVELOPMENT STANDARDS APPROVED WITH ORDINANCE NO. 09-44, BEING A 395.075-ACRE TRACT OF LAND SITUATED IN THE W. T. DEWEESE SURVEY, ABSTRACT NO. 71 AND THE S. KING SURVEY, ABSTRACT NO. 131, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has received a request by Adam Buczek of Stone Creek Balance, LTD for the approval of a zoning amendment to Planned Development District 70 (PD-70) for the purpose of changing the number of hard-edged retention ponds required for the Stone Creek Subdivision being a 395.075-acre tract of land situated in the W. T. DeWeese Survey, Abstract No. 71 and the S. King Survey, Abstract No. 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for General Retail (GR) District and Single Family 10 (SF-10) District land uses, located at the southwest corner of FM-552 and N. Goliad Street (*SH-205*), and more fully described in *Exhibit 'A'* of this ordinance, which hereinafter shall be referred to as the *Subject Property* and incorporated by reference herein; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the affected area, and in the vicinity thereof, and the governing body in the exercise of its legislative discretion, has concluded that Planned Development District 70 [*Ordinance No.'s 07-13, 09-44 & 11-35*] and the Unified Development Code [*Ordinance No. 04-38*] should be amended as follows:

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:

Section 1. That the approval of this ordinance shall supersede all requirements stipulated in *Ordinance No.'s 07-13, 09-44 & 11-35*;

Section 2. That the *Subject Property* shall be used only in the manner and for the purposes authorized by this Planned Development District Ordinance and the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall as heretofore amended, as amended herein by granting this zoning change, and as maybe amended in the future;

Section 3. That development of the *Subject Property* shall generally be in accordance with the *Planned Development Concept Plan*, contained in *Exhibit 'B'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'B'*, which is deemed hereby to be a

DRAFT ORDINANCE 10-21-19

478

condition of approval of the amended zoning classification for the *Subject Property*;

Section 4. That development of the *Subject Property* shall generally be in accordance with the *Development Standards*, contained in *Exhibit 'C'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'C'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

Section 5. A PD Development Plan must be approved for the areas designated as *Retail* on the *Concept Plan* contained in *Exhibit 'B'*; however, the *PD Development Plan* application may be processed by the City of Rockwall concurrently with a preliminary plat application and *PD Site Plan* application.

Section 6. That the official zoning map of the City of Rockwall shall be corrected to reflect the changes in zoning as described herein.

Section 7. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars* (*$2,000.00*) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

Section 8. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

Section 9. The standards in this ordinance shall control in the event of a conflict between this ordinance and any provision of the Unified Development Code or any provision of the City Code, ordinance, resolution, rule, regulation, or procedure that provides a specific standard that is different from and inconsistent with this ordinance. References to zoning district regulations or other standards in the Unified Development Code (including references to the *Unified Development Code*), and references to overlay districts, in this ordinance or any of the Exhibits hereto are those in effect on the date this ordinance was passed and approved by the City Council of the City of Rockwall, Texas;

Section 10. That this ordinance shall take effect immediately from and after its passage.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF NOVEMBER, 2019.

LEGAL DESCRIPTION

Being a 395.075-Acre tract of land situated in the W. T. DeWeese Survey, Abstract No. 71 and the S. King Survey, Abstract No. 131, City of Rockwall, Rockwall County, Texas and being all of a called 385.075-acre tract of land conveyed to W. W. Caruth Jr. by Deed recorded in *Volume 54, Page 22* Deed Records, Rockwall County, Texas (DRRCT) and also being all of a called 2.25-acre tract of land conveyed to Soden H. Harris and wife Adrine V. Harris by deed recorded in *Volume 50, Page 375* (DRRCT) being more particularly described by metes and bounds as follows:

BEGINNING at a ½-inch iron pipe found for a northeast corner of aforesaid 392.938-acre tract and being the northwest corner of Rockwall Middle School No. 4 Addition to the County of Rockwall by plat recorded in *Cabinet F, Page 67*, Plat Records, Rockwall County, Texas and being on the south right-of-way line of FM-552 (a variable width right-of-way).

THENCE South 00 Degrees 35 Minutes 35 Seconds East along a east line of aforesaid 392.938-acre tract and the common west line of aforesaid Rockwall Middle School No. 4 Addition a distance of 1,270.02-feet to a ½-inch capped iron rod found for the inside corner of said 382-938-acre tract and the southwest corner of said Rockwall Middle School No. 4 Addition.

THENCE North 69 Degrees 25 Minutes 13 Seconds East along a north line of aforesaid 392.938-acre tract and the common south line of aforesaid Rockwall Middle School No. 4 Addition a distance of 1,331.00-feet to a PK Nail set for a northeast corner of said 392.938-acre tract in the approximate centerline of Hayes Road (a variable width prescriptive right-of-way) and being on the west line of a called 15.00-acre tract of land conveyed to Steve L. Branch and wife Judy C. Branch by deed recorded in *Volume 234, Page 527 D*eed Records, Rockwall County, Texas a ½-inch capped iron rod found bears North 87 Degrees 58 Minutes 03 Seconds a distance of 22.82-feet.

THENCE South 00 Degrees 35 Minutes 35 Seconds East along the east line of aforesaid 392.938-acre tract and the approximate centerline of aforesaid Hayes Road and the west line of aforesaid 15.00-acre tract and the west line of a called 11.126-acre tract of land conveyed to Leon A. Smith by deed recorded in *Volume 160, Page 1,* Deed Records, Rockwall County, Texas and the west line of a called 32.00-acre and 35.5-acre tracts of land conveyed to Roy Lee Hance by deed recorded in *Volume 68, Page 73*, Deed Records, Rockwall County, Texas, a distance of 3,980.56-feet to a PK Nail set for the southeast corner of said 392.938-acre tract and being on the north line of a called 38.639-acre tract of land conveyed to Roy L. Hance and wife, Randa B. Hance by deed recorded in *Volume 91, Page 107* Deed Records, Rockwall County, Texas.

THENCE along the south line of aforesaid 392.938-acre tract and the common north line of aforesaid 30.033-acre tract and the north line of Quail Run Valley No. 2 an addition to the City of Rockwall by plat recorded in *Cabinet E, Page 185*, Plat Records, Rockwall County, Texas and the north line of Quail Run Valley, No. 1 an addition to the City of Rockwall by Plat Recorded in *Cabinet E, Page 57,* Plat Records, Rockwall County, Texas the following courses and distances:

South 89 Degrees 34 Minutes 36 Seconds West a distance of 2,364.65-Feet to a 5/8-inch iron rod with a yellow plastic cap stamped *Carter Burgress* set for corner.

South 88 Degrees 24 Minutes 39 Seconds West a distance of 650.72-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgress* set for a southwest corner of aforesaid 392.938-acre tract.

THENCE North 54 Degrees 44 Minutes 21 Seconds West a distance of 165.14-feet to a ½-inch iron pipe found for corner on the east right-of-way of State Highway 205 (a 100-foot right-of-way).

THENCE along the west line of aforesaid 392.938-acre tract and the common east right-of-way of aforesaid State Highway 205 the following courses and distances:

North 14 Degrees 18 Minutes 45 Seconds West a distance of 1,942.08-feet to a 5/8 inch iron rod with a

DRAFT ORDINANCE 10.21.19

481

yellow plastic cap stamped *Carter Burgess* set for corner and the beginning of a tangent curve to the right having a central angle of 10 Degrees 15 Minutes 35 Seconds a radius of 5,380.00-feet. A chord bearing of North 69 Degrees 11 Minutes 27 Seconds West and a chord length of 1,015.74-feet.

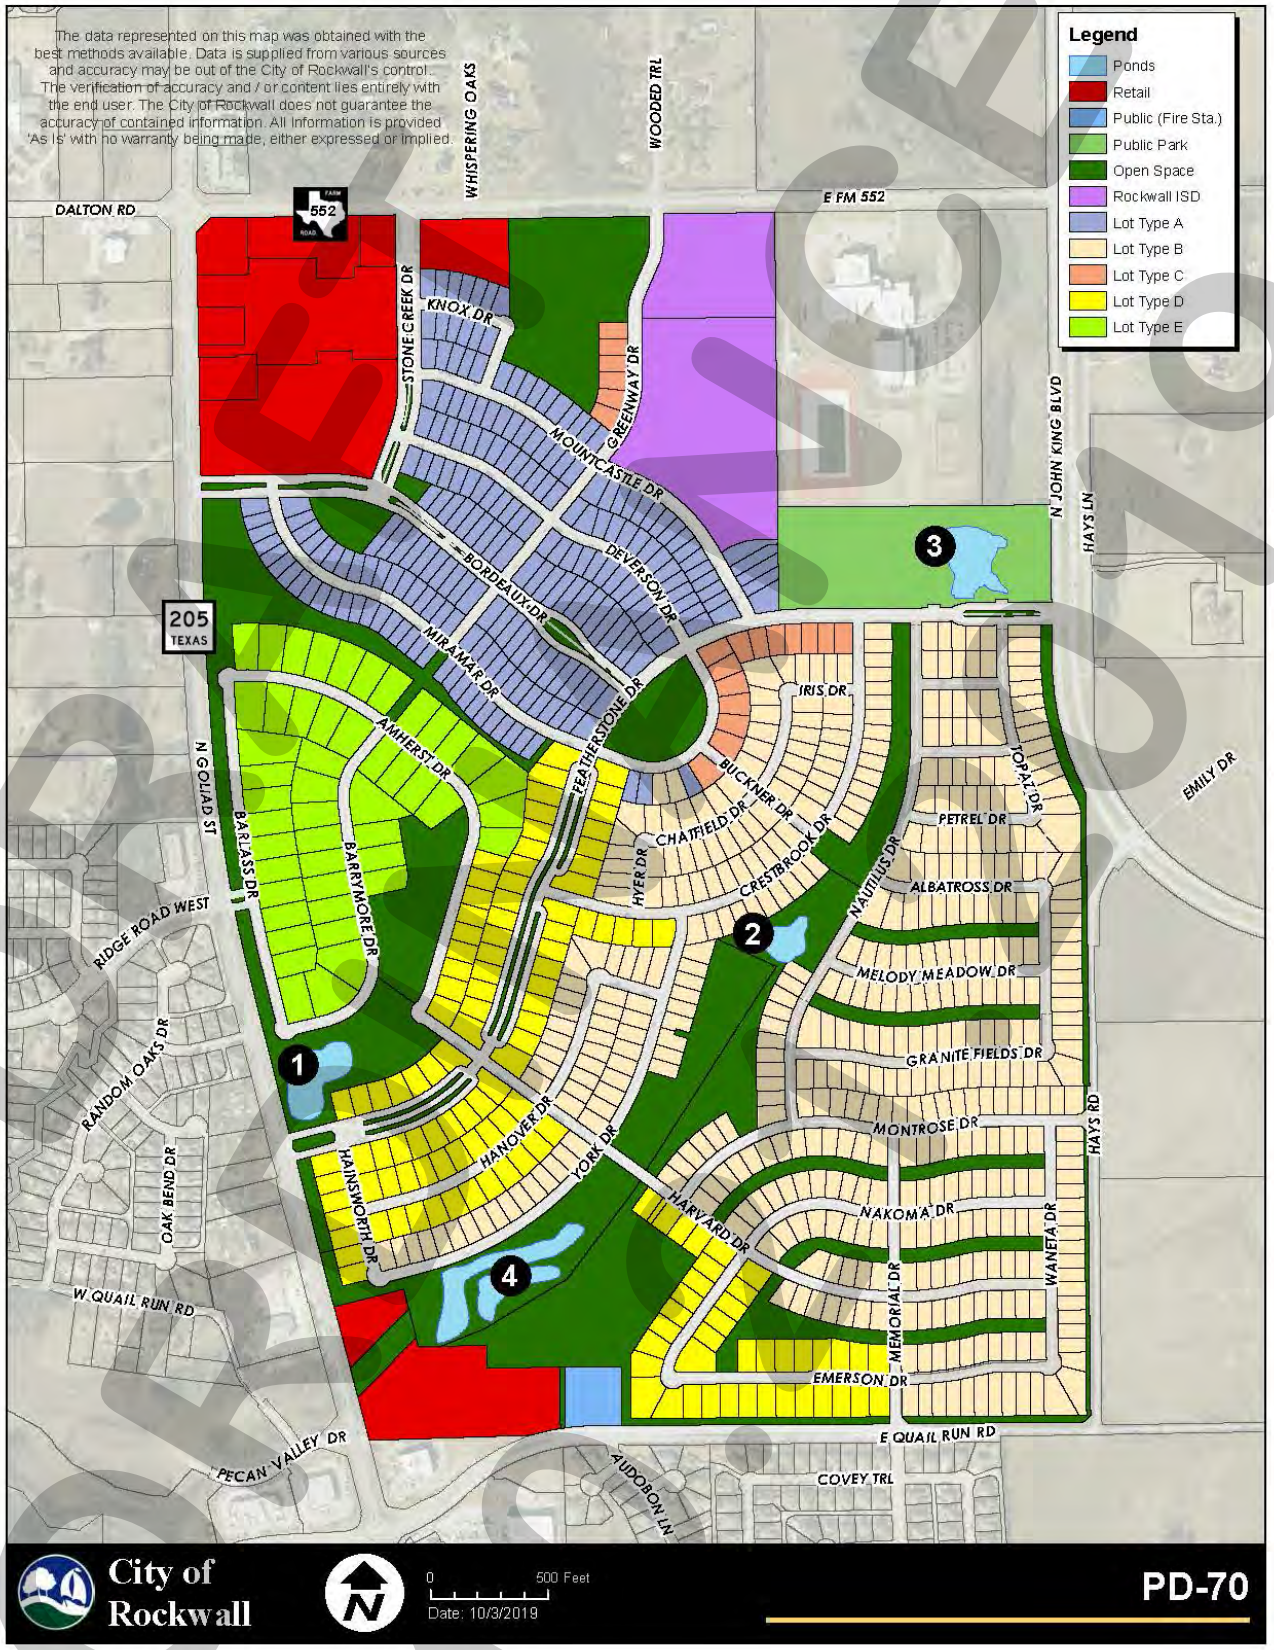
Along said tangent curve to the right an arc length of 1,017.09-feet to a concrete right-of-way monument found for corner.

North 04 Degrees 03 Minutes 51 Seconds West a distance of 379.29-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner, a concrete right-of-way monument found bears South 00 Degrees 29 Minutes 25 Seconds West a distance of 4.10-feet and being the beginning of a tangent curve to the right having a central angle of 03 Degrees 07 Minutes 00 Seconds a radius of 5,580.00-feet a cord bearing of North 02 Degrees 30 Minutes 27 Seconds West and a chord length of 305.93-feet.

Along said tangent curve to the right an arc length of 305.97-feet, to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner a concrete right-of-way monument found bears South 02 Degrees 45 Minutes 01 Seconds East a distance of 3.95-feet.

North 00 Degrees 56 Minutes 57 Seconds West a Distance of 1,499.13-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner a concrete right-of-way monument found bears South 10 Degrees 54 Minutes 38 Seconds East, a distance of 5.48-feet.

North 44 Degrees 58 Minutes 31 Seconds East a distance of 85.41-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner at the intersection of the east right-of-way of aforesaid State Highway 205 and the south right-of-way of aforesaid FM-552 a concrete right-of-way monument found bears South 83 Degrees 49 Minutes 06 Seconds West a distance of 16.86-feet.



THENCE along the north line of aforesaid 392.938-acre tract and the common south right-of-way of aforesaid FM-552 the following courses and distances:

North 89 Degrees 09 Minutes 25 Seconds East a distance of 1,890.00-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner.

South 00 Degrees 50 Minutes 35 Seconds East, a distance of 10.00-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner.

North 89 Degrees 09 Minutes 25 Seconds East a distance of 521.43-feet to the *Point of Beginning* and containing 395.075-acres of land, more or less.

A. GENERAL REQUIREMENTS

1. *Uses Allowed.* The following uses are permitted for the *Subject Property*.

   a. *Residential Uses*. Uses permitted of right or by Specific Use Permit (SUP) for the Single Family 10 (SF-10) District, as set forth in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance 04-38*], shall be allowed for areas designated for single-family (*i.e. labeled as 50's, 60's, 70's, 80's & 100's*) on the *Concept Plan*, subject to approval of a Specific Use Permit (SUP) if required by the Single Family 10 (SF-10) District regulations.

   b. *Non-residential uses*. Non-residential uses shall be allowed only within the area designated as retail on the approved *Concept Plan* for the district, and are limited to those uses permitted of right or by special use permit for the General Retail (GR) District subject to approval of a *PD Development Plan* and *PD Site Plan* in accordance with the Planned Development District regulations contained in Section 2 of Article X, *Planned Development Regulations*. of the Unified Development Code [*Ordinance No. 04-38*], and subject to approval of a Specific Use Permit (SUP) if required by the General Retail (GR) District regulations; provided, however, that the following uses are expressly prohibited:

   - ☑ Animal Hospital/Clinic
   - ☑ Animal Boarding/Kennel without Outside Pens
   - ☑ Convent or Monastery
   - ☑ Hotel or Motel
   - ☑ Hotel, Residence
   - ☑ Cemetery/Mausoleum
   - ☑ Mortuary of Funeral Chapel
   - ☑ Social Service Provider
   - ☑ Billiard Parlor or Pool Hall
   - ☑ Carnival, Circus, or Amusement Ride
   - ☑ Commercial Amusement/Recreation (*Outside*)
   - ☑ Gun Club, Skeet or Target Range (*Indoor*)
   - ☑ Astrologer, Hypnotist, or Psychic Art and Science
   - ☑ Garden Supply/Plant Nursery
   - ☑ Night Club, Discotheque, or Dance Hall
   - ☑ Secondhand Dealer
   - ☑ Auto Repair Garage (*Minor*)
   - ☑ Car Wash, Self Service*
   - ☑ Service Station*
   - ☑ Mining and Extraction (*Sand, Gravel, Oil & Other*)
   - ☑ Helipad
   - ☑ Railroad Yard or Shop
   - ☑ Transit Passenger Facility

   ** Not including a convenience store with an accessory car wash use or more than two (2) gas pumps, which accessory uses are permitted by SUP.*

   The following additional use shall be permitted of right in the PD District:

   - ☑ Grocery Store with a maximum building area of eighty thousand (80,000) square feet.

   c. *Design of Non-Residential Uses.* The retail areas shall be designed to be pedestrian-oriented and easily accessible to adjacent residential neighborhoods. Additionally, the retail area shall be designed and constructed to be integrated with adjacent uses, not separated from them by screening walls or other physical barriers. This will be

DRAFT OR 21.2019

accomplished by creating paths from adjacent development into the retail area and through the use of landscaping buffers, building design and other urban design elements to create compatibility with the surrounding residential neighborhood.

d. *Density and Lot Composition*. No more than 918 single-family residential dwelling units may be constructed within the *Subject Property*. Except as provided in subsection (e), single-family residential units shall be allocated by product type in accordance with the following table:

Table 1: Lot Composition

Lot Type	Lot Size Minimum	Lot SF Minimum	Driveway Access	Total Units	Total Dwelling Units (%)
A	50' x 120'	6,000	Front	180	19.6%
B	60' x 120'	7,200	Front	521	56.8%
C	70' x 120'	8,400	Front	36	03.9%
D	80' x 125'	10,000	Front	134	14.6%
E	100' x 200'	20,000	Front	47	05.1%
AVERAGE LOT SIZE:		8,000 SF			
			MAXIMUM ALLOWED TOTAL UNITS:	918	100%

e. *Variation in lot composition.* The allocation of single-family dwellings among lot types may deviate from that in subsection (d), provided that the maximum allowed total dwelling units does not exceed 918 units, the average lot size for the development is not less than 8,000 square feet, and the following rules are met:

(1) Lot types 'A', 'B', & 'C' may increase not more than 5% in aggregate number.

(2) Lot type 'D' shall not be decreased below 124 lots of the total lots developed on the *Subject Property*.

(3) Lot type 'E' shall not be decreased below 47 lots of the total lots developed on the *Subject Property*.

2. *Development Standards Applicable.*

(1) *Residential uses*. Except as may be modified by these *PD Development Standards*, areas designated for single-family (*i.e. labeled as 50's, 60's, 70's, 80's & 100's*) shall be subject to the development standards for the Single Family 10 (SF-10) District, as set forth in Subsection 3.07 of Article V, *District Development Standards*, of the Unified Development Code (UDC), to the development standards stipulated for the North SH-205 Overlay (N SH-205 OV) and the SH-205 Bypass Overlay (205 BY-OV) Districts, and to all supplemental standards contained in the Unified Development Code in effect on the effective date of this ordinance.

(2) *Non-residential uses.* Except as may be modified by these *PD Development Standards*, areas designed for *Retail* land uses shall be subject to the development standards for the General Retail (GR) District, as set forth in Subsection 4.04 of Article V, *District Development Standards*, of the Unified Development Code (UDC), to the development standards stipulated for the North SH-205 Overlay (N SH-205

DRAFT ORDINANCE 101.2019

485

OV) and the SH-205 Bypass Overlay (205 BY-OV) Districts, and to all supplemental standards contained in the Unified Development Code in effect on the effective date of this ordinance.

3. *Homeowner's Association (HOA).* A *Homeowner's Association* (*HOA*) shall be formed and duly incorporated in the State of Texas for the *Subject Property*. Membership shall be mandatory for the owner of each residential lot within these areas of the *Subject Property*. This HOA shall be established to ensure the proper maintenance of all common areas for which the HOA is either the owner or is the party designated as responsible for maintenance. The bylaws of this HOA shall establish a system of payment of dues, a system of enforcement of its rules and regulations; and an explanation of the responsibility of each member with regard to the common areas. The bylaws shall be submitted to the Director of Planning for review and approval, not to be unreasonably withheld, for conformity with this paragraph prior to the initial transfer to the HOA of ownership of any real property.

4. *Architectural Review.* All developments within the PD District shall be reviewed by an Architectural Review Committee (ARC) for the *Subject Property*, which will be composed of *Developer* representatives, throughout the completion of development. The ARC shall remain in effect until all new construction has concluded. City of Rockwall building permits shall not be issued prior to ARC approval. Certification of ARC approval shall be submitted with each building permit application, which shall comply with all anti-monotony standards as described in *Section B.4.*, *Anti-Monotony Features* of this document.

B. SPECIAL DEVELOPMENT STANDARDS

1. Dimensional Standards for Residential Uses.

Table 2: Lot Type Matrix

Lot Types	A	B	C	D	E
Maximum Building Height	36'	36'	36'	36'	36'
Minimum Air Conditioned Square Footage	1,800	2,200	2,400	2,600 [2]	3,000
Minimum Front Yard Building Setback	15'	20'	20'	20'	25'
Minimum Rear Yard Building Setback	10'	10'	15'	15'	15'
Minimum Side Yard (*Interior*)	5'	5'	5'	6'	7'
Minimum Side Yard Adjacent to a Street	15'	15'	15'	15'	15'
Minimum Distance of Driveway (*from Property Line*)	*N/A*	20'	20'	20'	25'
Minimum Lot Area (*Square Feet*)	6,000	7,200	8,400	10,000	20,000
Minimum Lot Frontage [1]	50'	60'	70'	80'	100'

Notes:

[1]: Lots fronting onto curvilinear streets, cul-de-sacs and eyebrows may be reduced by twenty percent (20%) in lot width measured at the front property line provided that the lot width will be met at the front building line. Additionally, the lot depth on lots fronting onto curvilinear streets, cul-de-sacs and eyebrows may be reduced by up to 10 percent (10%) but shall meet the minimum lot size for each lot type as referenced within Table 1.

[2]: A maximum of 20% of the lots may have homes not less than 2,500 sq. ft.

DRAFT ORDINANCE 10.21.2019

486

2. *Development Standards for Residential Uses by Lot Product/Type*

a. *Detached Single Family Lot Type A*

Development Standards	
Minimum Lot Size	6,000 SF
Minimum Lot Width (@ Front Building Line)	50’
Minimum Lot Depth	110’
Minimum Lot Width (Corner Lot)	55’
Minimum Side Yard Setback	5’
Minimum Front Yard Building Setback	15’
Minimum Rear Yard Building Setback	10’
Minimum Air Conditioned Square Footage	1,800 SF
Minimum Roof Pitch	8:12 Except for 4:12 on Porch Roofs
Minimum Masonry Requirement [*Brick, Stone, Cultured Stone, 3-Part Stucco, cementitious siding with color palette*]	80%
Garage Orientation	Garages will be allowed to be accessed from the street; however, a minimum driveway length of 20-foot must be provided.
Maximum Lot Coverage	75%

b. *Detached Single Family Lot Type B*

Development Standards	
Minimum Lot Size	7,200 SF
Minimum Lot Width (@ Front Building Line)	60’
Minimum Lot Depth	110’
Minimum Lot Width (Corner Lot)	65’
Minimum Side Yard Setback	5’
Minimum Front Yard Building Setback	20’
Minimum Rear Yard Building Setback	10’
Minimum Air Conditioned Square Footage	2,200 SF
Minimum Roof Pitch	8:12 Except for 4:12 on Porch Roofs
Minimum Masonry Requirement [*Brick, Stone, Cultured Stone, 3-Part Stucco*]	80%
Garage Orientation	Garages will be allowed to have the garage accessed from the street using traditional “swing” or “J” drives. A second single garage door facing street is permitted behind (width) of double garage door in “swing” or “J” configuration only. A minimum of 33% of Type ‘B’ lots shall have 3 car garages.
Maximum Lot Coverage	65%

c. *Detached Single Family Lot Type C*

Development Standards	
Minimum Lot Size	8,400 SF
Minimum Lot Width (@ Front Building Line)	70’
Minimum Lot Depth	120’
Minimum Lot Width (Corner Lot)	75’
Minimum Side Yard Setback	6’
Minimum Front Yard Building Setback	20’
Minimum Rear Yard Building Setback	10’
Minimum Air Conditioned Square Footage	2,400 SF

DRAFT ORDINANCE 10.21.19

487

Minimum Roof Pitch	8:12 Except for 4:12 on Porch Roofs
Minimum Masonry Requirement [*Brick, Stone, Cultured Stone, 3-Part Stucco*]	80%
Garage Orientation	Garages will be allowed to have the garage accessed from the street using traditional "swing" or "J" drives. A second single garage door facing street is permitted behind (width) of double garage door in "swing" or "J" configuration only. A minimum of 33% of Type 'C' lots shall have 3 car garages.
Maximum Lot Coverage	65%

d. *Detached Single Family Lot Type D*

Development Standards	
Minimum Lot Size	10,000 SF
Minimum Lot Width (@ Front Building Line)	80'
Minimum Lot Depth	125'
Minimum Lot Width (Corner Lot)	85'
Minimum Side Yard Setback	6'
Minimum Front Yard Building Setback	20'
Minimum Rear Yard Building Setback	15'
Minimum Air Conditioned Square Footage	2,600 SF [1]
Minimum Roof Pitch	8:12 Except for 4:12 on Porch Roofs
Minimum Masonry Requirement [*Brick, Stone, Cultured Stone, 3-Part Stucco*]	80%
Garage Orientation	Traditional "swing" or "J" drive required. A second single garage door facing street is permitted behind (width) of double garage door in "swing" or "J" configuration only. A minimum of 80% of Type 'D' lots shall have 3 car garages.
Maximum Lot Coverage	65%

Notes:

[1]: *A maximum of 20% of the lots may have homes not less than 2,500 SF.*

e. Detached Single Family Lot Type E

Development Standards	
Minimum Lot Size	20,000 SF
Minimum Lot Width (@ Front Building Line)	100'
Minimum Lot Depth	175'
Minimum Lot Width (Corner Lot)	100'
Minimum Side Yard Setback	7'
Minimum Front Yard Building Setback	25'
Minimum Rear Yard Building Setback	15'
Minimum Air Conditioned Square Footage	3,000 SF
Minimum Roof Pitch	8:12 Except for 4:12 on Porch Roofs
Minimum Masonry Requirement [*Brick, Stone, Cultured Stone, 3-Part Stucco*]	80%
Garage Orientation	Traditional "swing" or "J" drive required. A second single garage door facing street is permitted behind (width) of double garage door in "swing" or "J" configuration only. A minimum of 80% of Type 'E' lots shall have 3 car garages.
Maximum Lot Coverage	70%

DRAFT ORDINANCE 10.21.2019

3. *Fencing.*

   a. *Residential uses.* All individual residential fencing shall be cedar standard fencing material (minimum ½" thickness) or better (spruce fencing will not be allowed). All cedar pickets shall be placed on the "public side" facing the street, alley or neighboring property. Tubular steel fencing is also acceptable for individual residential fencing, and shall be *required* on lots located along perimeter roadways, and/or abutting open spaces, greenbelts and parks. Corner lot fencing (adjacent to the street) shall provide masonry columns at 45-feet off center spacing that begins at the rear property line corner and terminates ten (10') feet behind the front yard building setback line. A maximum six (6') foot solid board on board "panel" cedar fencing shall be allowed between the masonry columns along the side and/or rear yard lot adjacent to a street. In addition, the fencing shall be setback from the side property line adjacent to a street a minimum of five (5') feet. The property owner shall maintain that portion of the property outside the fence. Fencing shall be consistent with the language described above and *Figure 1* below.

Figure 1: *Fence Example.*

4. *Anti-Monotony Features.* Lot types shall incorporate the following elevation features.

Table 3 : Anti-Monotony Matrix

Lot Type	Lot Size (Approx.)	Elevation Features
A	50' x 120'	i, iii, iv
B	60' x 120'	ii, iii, iv

DRAFT 10.1.2019

489

C	70’ x 120’	ii, iii, iv
D	80’ x 125’	ii, iii, iv
E	100’ x 200’	ii, iii, iv

i. Exterior facade must be composed of eighty percent (80%) masonry (brick, stone, cultured stone, three-part stucco, cementitious siding). Identical brick blends may not occur to adjacent (side-by-side) properties. Elevations shall not repeat along the fronting or siding streetscape without at least three (3) intervening homes of sufficient dissimilarity (to be determined by the ARC) on the same side of the street or two (2) intervening homes on the opposite side of the street. All chimneys shall be constructed of masonry materials, excluding cementitious siding.

ii. Exterior facade must be composed of eighty percent (80%) masonry (brick, stone, cultured stone, three-part stucco). Identical brick blends may not occur to adjacent (side-by-side) properties. Elevations shall not repeat along the fronting or siding streetscape without at least four (4) intervening homes of sufficient dissimilarity (to be determined by the ARC) on the same side of the street and (2) intervening homes on the opposite side of the street). The rear elevation of homes backing to open spaces or thoroughfares shall not repeat without at least two (2) intervening homes of sufficient dissimilarity (to be determined by the ARC). All chimneys shall be constructed of masonry materials, excluding cementitious siding.

iii. Minimum of 8:12 roof pitch, except for 4:12 roof pitches on porches. For each phase, a maximum of four compatible roof colors may be used. Dimensional shingles shall be used. Crown molding will be installed in all living and family rooms, unless vaulted or pop-up ceilings are utilized. No Formica counters in kitchens and bathrooms, no blown acoustic ceilings. No vinyl flooring will be used in kitchens and bathrooms.

iv. If the garage is accessed from the street a traditional “swing” or “J” drive will be used. Second single garage door facing street is permitted behind (width) of double garage door in “swing” or “J” configuration only.

5. *Streetscape Landscape.* Prior to issuance of a Certificate of Occupancy, yards for all single-family lots on the *Subject Property* shall be landscaped with large canopy trees.

(1) Two minimum three (3) inch trees measured six (6) inches above the root ball shall be planted in the front yard of an interior lot.

(2) Two minimum three (3) inch trees measured six (6) inches above the root ball shall be planted in the front yard of a corner lot and two additional trees of same caliper shall be planted in the side yard facing the street.

(3) For purposes of this section only, the term “front yard” includes the area within the dedicated right-of-way for a parkway immediately adjoining the front yard of the lot for properties in the areas identified as *Residential* on the *Concept Plan* in *Exhibit B* of this ordinance.

6. *Master Design Guidelines.* Additional design guidelines specific to each phase of development that shall apply to all single-family dwellings units within that phase of development, shall be submitted to the City prior to issuance of any building permits for that portion of the development.

DRAFT ORDINANCE 10.21.19

490

C. STANDARDS FOR DISTRICT DESIGN AND CONNECTIVITY

1. *Streetscape Standards for Collectors & Non-Fronting Thoroughfares.* All streets, excluding drives, fire lanes and private parking areas, shall be built according to City of Rockwall street standards as modified by *Street Buffer Strip Elevation and Street Cross-Section Elevations* below in *Figure 2*.

Figure 2: Illustration on next page

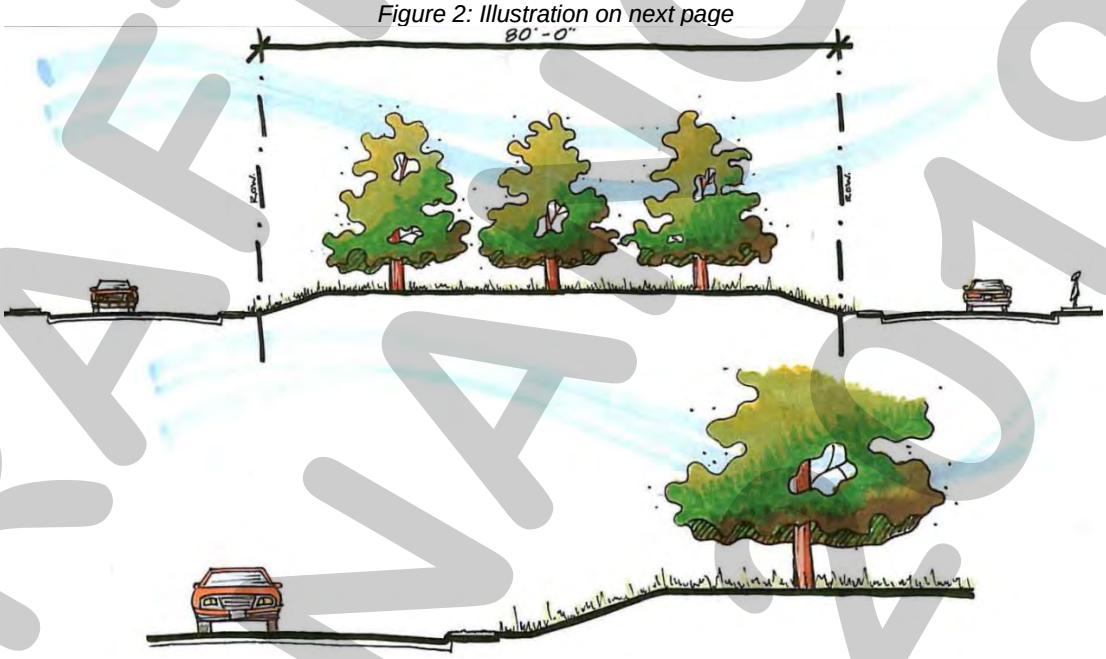

Figure 2: *Street Buffer Strip Elevation and Street Cross-Section Elevations.*

a. *Buffer-Strip for the North SH-205 Overlay (N. SH-205 OV) District.* The landscape buffer strip shall be as described in Section E, *Landscape Standards*, of Article V, *District Development Standards*, of the Unified Development Code (UDC), and be a minimum width of 60-feet as illustrated below in *Figures 3 & 4* and as indicated on the PD Concept Plan. Sidewalks and Hike & Bike Trails are to be placed according to city requirements and as set forth in the *Open Space Master Plan* for the District.

b. *Buffer-Strip for the SH-205 By-Pass Overlay (SH-205 BY-OV) District.* The landscape buffer strip shall be as described in Section E, *Landscape Standards*, of Article V, *District Development Standards*, of the Unified Development Code (UDC), and be a minimum width of 50-feet as illustrated below in *Figures 3 & 4* and as indicated on the PD Concept Plan. Sidewalks and Hike & Bike Trails are to be placed according to city requirements and as set forth in the *Open Space Master Plan* for the District.

DRAFT ORDINANCE 1021.10.19

491

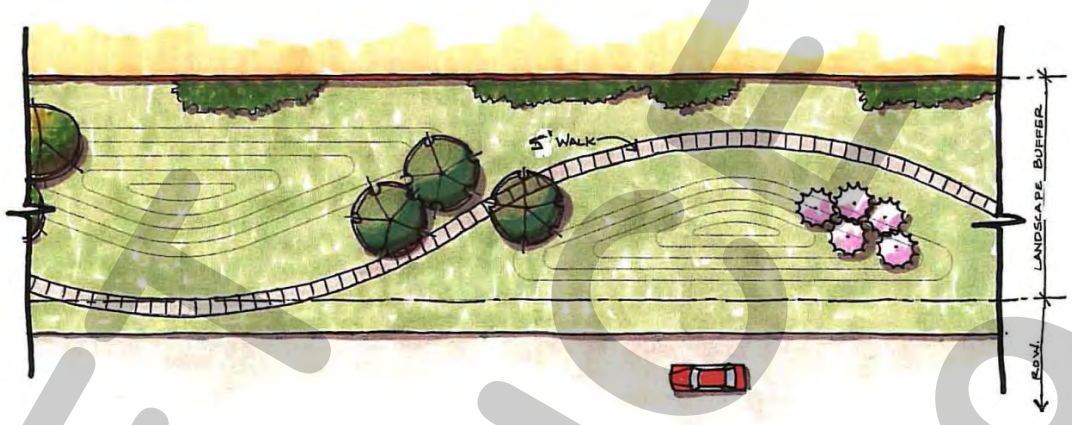

Figure 3: *Landscape Buffer Plan*

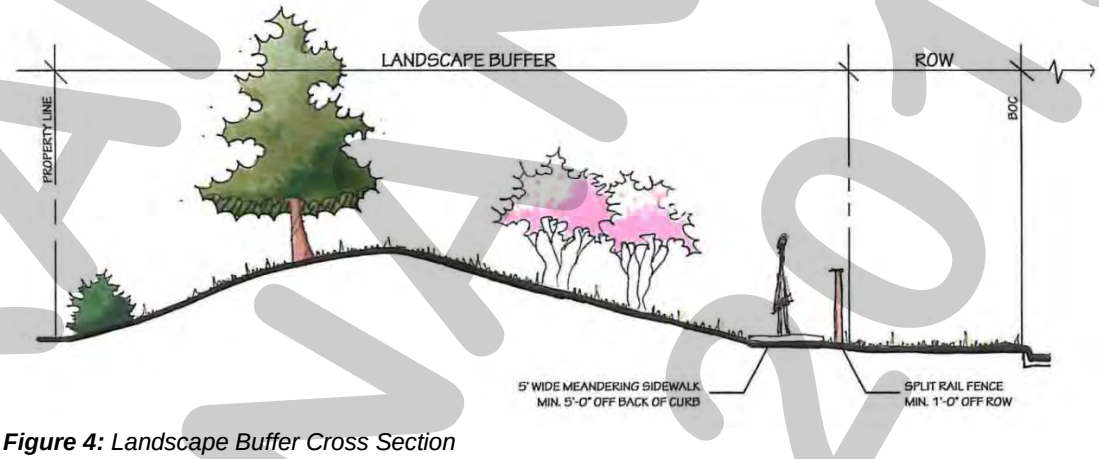

Figure 4: *Landscape Buffer Cross Section*

c. *Buffer-Strip (Outside of Overlay Districts).* The landscape buffer strip shall be a minimum of ten (10) feet on Hays Road and Quail Run Road. Sidewalks and Hike & Bike Trails are to be placed according to city requirements and as set forth in the *Open Space Master Plan* for the District.

d. *Irrigation.* Any irrigation installed in landscape areas and public parks must be designed by a Texas licensed irrigator or landscape architect.

e. *HOA Maintained Fencing.* The Homeowner's Association (HOA) will maintain all common area and perimeter fencing surrounding the *Subject Property*. Such perimeter fencing shall be composed of a six (6) foot tall tubular steel fencing with masonry entry features or such other fencing as may be approved by the City at the time of platting. Perimeter screening may also be accomplished by earthen berms landscaped with living screening. Property owners will maintain all fences constructed on private property.

f. *Curvilinear Walks. Curvilinear Walks* are to be a minimum of five (5) feet in width and a maximum of six (6) feet in width (*i.e. Hike & Bike Trails*) consistent with the approved *Open Space Master Plan*. *Collector Streets*, with or without center medians, may incorporate sidewalks six (6) feet in width adjacent to or within the *front yard* landscape easements. *Curvilinear Walks* may meander within the

DRAFT ORDINANCE 2019

492

parkway and common areas; however, the edge of the walk shall be no closer than four (4) feet from the back-of-curb.

g. *Medians.* Any proposed median openings shall meet the City standards at the time of *PD Site Plan* approval.

2. *Lighting.* Light poles shall not exceed 20-feet in height, and all light fixtures shall direct light downward and be contained within the *Subject Property*.

3. *Sidewalks.* At a minimum, sidewalks located on streets shall begin four (4) feet behind the back of curb and shall be five (5) feet in overall width.

4. *Curbing.* Within *Lot Types A & B*, *roll-up-curbing* may be incorporated in an effort to minimize frequent curb cuts and maximize streetscape continuity. These *roll-up-curbs* shall be approved by the City of Rockwall Engineering Department with the approval of the final plat application.

5. *Buried Utilities.* New distribution power-lines required to serve the *Subject Property* shall be placed underground, whether such lines are located internally or along the perimeter of the *Subject Property*, unless otherwise authorized by the City Council. New transmission power-lines, or distribution lines of a size not typically or cost effectively placed underground (*i.e. 3-phase lines*), or additional lines that are added to existing poles, may be above ground, if located along the perimeter of the *Subject Property*, except along the SH-205 By-Pass (*i.e. John King Boulevard*). Additionally, if such above ground lines are installed along the perimeter of the *Subject Property* and adjacent to non-residential uses, then the lines shall be installed behind the non-residential buildings where the installation is possible. The *Developer* shall not be required to re-locate existing overhead power-lines along the perimeter of the *Subject Property*. Temporary power-lines constructed across undeveloped portions of the *Subject Property* to facilitate development phasing and looping may be allowed above ground, but shall not be considered *existing lines* at the time the area is developed, and if they are to become permanent facilities, such lines shall be placed underground pursuant to this paragraph.

6. *Parks and Open Space.* Allowing inclusion of approximately 50% of the school sites and floodplain shown on the *Concept Plan* and approximately 20.0% of the land on the *Subject Property* shall constitute open space, which is hereby deemed sufficient if supported by the following standards and conditions.

a. The *Subject Property* shall contain not less than 79-acres of open space including approximately 26.6-acres of floodplain as shown on *Exhibit B* of this ordinance.

b. Allowable open space may include but is not limited to public or private parks, trails, natural areas, buffers, traffic circle medians, entry features, common areas (*including any HOA recreation center or similar facilities*) and other features depicted on the *Concept Plan*, as set forth in the *Open Space Master Plan* prepared in accordance with subparagraph (c) below. Street right-of-way will not be included as open space. At least 80% of the single-family dwellings within the development shall be located within 800-feet of a public or private open space. In

DRAFT ORDINANCE No. 19-XX

493

order to qualify, such open space must be at least one (1) continuous acre in area, not including roadway buffers less than 50-feet in width.

c. The *Developer* shall prepare the *Open Space Master Plan* to be consistent with the approved *Concept Plan*. The purpose of an *Open Space Master Plan* is to supplement the *Concept Plan* by providing an additional level of detail for public and private open space areas. The *Open Space Master Plan* shall identify the locations of and improvements to public parks, school sites and other public and private open space or common areas, taking into consideration the proximity of single-family dwellings, as required by subparagraph (a), and shall illustrate an integral system of trail improvements that, together with intervening land held by other property owners or the City, is designed to connect residential areas, schools and retail areas within the *Subject Property* to parks and open space within the *Subject Property* and that provides for continuation and connection of the trail system to off-site parks and open space, in accordance with the City's *Master Park and Recreation Plan*. The *Open Space Master Plan* shall clearly differentiate public parks from private facilities and common lands to be maintained by the HOA. The locations of public parks, school sites and other public and private open space or common areas shown on the *Open Space Master Plan* shall be in conformance with the *Concept Plan*, except as otherwise provided in Section 7 of Article II of the *Capital Facilities Agreement* pertaining to school sites. The *Open Space Master Plan* shall include a phasing plan for construction of all trails and parks, and common open space and facilities. The *Open Space Master Plan* shall be considered for approval if it complies with this section, the applicable City regulations, the *Concept Plan*, and generally accepted park-planning practices.

d. The District shall contain not less than 7.8 acres of land to be used as public or private parkland. A minimum of 7.8 contiguous acres shall be dedicated to the City in accordance with the City's *Neighborhood Parkland Dedication Ordinance* on approval of the final plat for the first phase of the development. This dedication shall include the dedication of a five (5) foot wide parcel to connect the *City Park* within the *Subject Property* to the existing City property to the east of the middle school. The remaining area will be retained as a private park within the *District*. Park improvements shall be constructed in accordance with the approved *Open Space Master Plan*. The site plan incorporating the design of park improvements and hike /bike trail improvements shall be considered for approval with the final plat for the phase of the development containing such improvements. Performance of the obligations in this subparagraph shall be deemed to fully satisfy the City's *Neighborhood Parkland Dedication Ordinance* regarding land dedication. At the time of recordation of final plats for each phase, *Developer* shall pay park improvement fees to the City. These fees shall be held in an escrow account until the commencement of *Phase 3*, at which time the *Developer* shall inform the City if the *Developer* wishes to use the escrowed fees as well as future fees to construct park improvements. Said improvements shall be approved by *Parks Director*, approval not to be unreasonably withheld, and invoices for improvements shall be submitted to *Parks Director* for approval. Performance of the obligations in this subparagraph shall be deemed to fully satisfy the City's *Neighborhood Parkland Dedication Ordinance* regarding park development fees, provided that park improvements are installed at a value equal or exceeding the value of park improvement fees for the entire *District*

DRAFT
ORDINANCE
XXXX 2.19

494

applicable at that time, or improvement fees are paid. Thereafter, the *Developer* shall not be responsible for additional parkland dedication or park development fees associated with the *Subject Property*, except as otherwise may be provided in a *Capital Facilities Agreement* approved by the City.

The *Developer* shall provide retention ponds in the locations depicted on the *Concept Plan* in *Exhibit 'B'* of this ordinance. Hardedges and fountain features shall be incorporated into *Ponds 1 & 2*, *Pond 3* shall incorporate a natural edge, and *Pond 4* shall incorporate a fountain feature and a natural edge. All retention pond hardedges shall be similar to the hardedge shown in *Figure 5* below.

Figure 5: *Retention Pond with Hardedge.*

7. *Signage.* Permanent subdivision identification signage shall be permitted at all major entry points, in general conformance to the signage elevations and plan shown below in *Figures 6 & 7*. Final design of entry features to be determined with the Planned Development Site Plan.

DRAFT
ORD 10.21.19

495

Figure 6: *Main Entry Subdivision Signage Elevations*

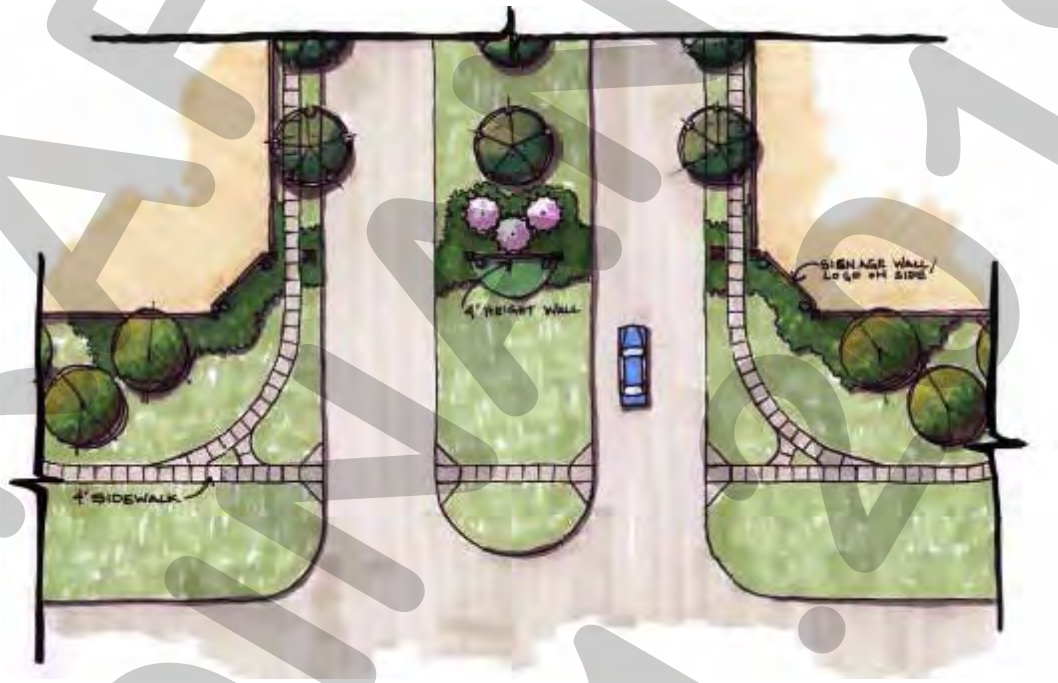

Figure 7: *Main Entry Subdivision Signage Plan*

8. *Variances.* The variance procedures and standards for approval set forth in the Unified Development Code (UDC) shall apply to any application for variance(s) to this ordinance.

9. *Amenity Center.* Developer shall construct an amenity center in approximate size and detail as shown below in *Figure 8*.

DRAFT ORDINANCE 10.21.19

496

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Honorable Mayor and Council**

FROM: **Jeffrey Widmer, Building Official**

DATE: **October 21, 2019**

SUBJECT: **Variance request to reduce the required sign separation distance**

Doctor Michael Fisher and Doctor Marisa Zitterich of Fisher & Zitterich Dentistry located at 1306 Summer Lee Drive have requested to appear before the City Council to seek a variance from the required sign separation requirements for a new monument sign.

Our sign ordinance requires a minimum separation distance of 60' between free standing signs. The Applicants are currently constructing their new office building and desire to build a new monument sign with a separation distance of 44' from the nearest sign, due to very limited options for their sign placement.

The proposed monument sign complies with all other provisions within the sign code.

499

SIGN VARIANCE APPLICATION

Date: 10.17.19

Property Address of Subject: 1306 Summer Lee Dr.

Applicant Name: Zeke Bullock / Barnett Signs Day Phone #: (972) 362-8779

Address: 4250 Action Dr. Mesquite, TX 75150

Owner of Property: 1306 Summer Lee LLC Michael & Carla Fisher Day Phone #: (972) 771-4000

Address: 244 Harvest Ridge Dr. Rockwall, TX 75032

Legal Description of Property (Description may be attached):

Lot 6, Block A Temunovic Addition

Total Acreage: 1.082 Number of Lots: 1

Current Use of Property: New Construction

Proposed Use of Property: Medical Office

Requirement or Regulation for which a Variance is Requested:

We are requesting a variance to the sign ordinance for monument signs requiring 60' of separation between signs.

Reason For Variance Request: (Attach any necessary documents)

In addition to reasons stated on attached letter, there is only one other possible location in which this sign could be installed and that location also poses several hardships as well. The first being that the location would be confusing to the public as it would appear to be intended for the drive into the property to the east of this location. In addition, after meeting the required 20' adjoining property line setback, There would only be 5' of space in which to install this sign, resulting in customers unable to open their car doors without hitting their door on the sign.

DR. MICHAEL FISHER DR. MARISA ZITTERICH

October 16, 2019

City of Rockwall, To Whom Concerned:

I am requesting a variance to the sign ordinance specifying 60' of separation between monument signs on adjoining properties for our new dental office currently under construction at 1306 Summer Lee Drive. Our proposed sign meets all requirements of the City sign code including size, height, masonry, electrical, front setback, and adjoining property line setback. However, due to site layout and easements on the property, the only location in which a monument sign can be constructed allows for 44' of separation between our proposed sign and the current Lakeside Allergy monument sign.

This is due to the fact that Lakeside Allergy only had to maintain a 20' adjoining property line setback as well. During the site planning phase and development of our project the City required us to use the shared access from the road with Lakeside Allergy. So we could not position our entrance farther away from that of Lakeside Allergy, and thus we cannot now position our sign farther away.

In order to meet the 60' of separation and stay out of all easements, our monument sign would have to be located far away from the entrance, and directly within several parking spaces that are now established in City-inspected and approved concrete. During the design, approval and permitting process with the City our sign position was never seen or presented as a concern, and all of our submitted site plans showed our currently requested position for our monument sign.

Please grant this request for the sign variance described above so our monument sign may have the same favorable position relative to our entrance as that of our neighbors, Lakeside Allergy and Lowrance Dental.

Gratefully,

Michael Fisher

CITY COUNCIL MEMORANDUM

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller, *Director of Planning and Zoning*
DATE:	October 21, 2019
SUBJECT:	Comprehensive Plan Advisory Committee (CPAC)

At the October 7, 2019 City Council meeting, the City Council requested that staff contact the previous Comprehensive Plan Advisory Committee (CPAC) members to see if they would like to continue their service on the committee. Staff has contacted all members of the previous committee, and all seven (7) members have indicated that they would like to continue to serve on the new committee. Attached to this memorandum is a resolution that would reinstate the CPAC as a standing committee; however, the City Council may choose, at their discretion, to increase the size of the committee by appointing additional members. Should this be the case, staff will make any corrections to the resolution and bring it back before the City Council at the *November 4, 2019* City Council meeting. For general reference, staff has included the memorandum and supporting documents from the October 7, 2019 City Council meeting for the City Council's review. Should the City Council have any questions staff will be available at the October 21, 2019 City Council meeting.

511

CITY OF ROCKWALL

RESOLUTION NO. 19-23

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ESTABLISHING THE COMPREHENSIVE PLAN ADVISORY COMMITTEE AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, a City's Comprehensive Plan -- *also known as a general plan or master plan* -- is a document intended to layout a 20-year vision for a city and guide a City Council's actions on policy decisions relating to land use and development regulations, and expenditures for capital improvements; and,

WHEREAS, the City Charter for the City of Rockwall states that "(t)he existing master plan [*Comprehensive Plan*] for the physical development of the City contains recommendations for the growth, development and beautification of the City and its extraterritorial jurisdiction … "; and,

WHEREAS, the City of Rockwall's Comprehensive Plan was originally drafted in 1966 with major updates being approved in 1986, 1995, and 2001; and,

WHEREAS, the City Council of the City of Rockwall adopted the OURHometown Vision 2040 Comprehensive Plan on December 3, 2018 by *Ordinance No. 18-48*; and,

WHEREAS, the OURHometown Vision 2040 Comprehensive Plan calls for the establishment of a standing Comprehensive Plan Advisory Committee (CPAC) that can review the Comprehensive Plan on an annual basis to account for changes to the physical development of the City, provide accountability for the progress of the plan, and to provide a clear vision for the future growth of the community; and,

WHEREAS, in an effort to ensure transparency and to further citizen involvement in the planning process, the City Council hereby establishes an appointed board of Rockwall citizens to serve as the Comprehensive Plan Advisory Committee (CPAC); and,

WHEREAS, the Comprehensive Plan Advisory Committee (CPAC) shall serve as an advisory and recommending body to ensure that the findings, recommendations and strategies identified by City staff are in alignment with the goals and vision of the community and the City Council;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:

SECTION 1. *Purpose.* The Comprehensive Plan Advisory Committee (CPAC) serves in an advisory role overseeing the preparation and annual review of the OURHometown Vision 2040 Comprehensive Plan for the purpose of achieve the following:

1) To provide advisory recommendations to City Staff, the City Council Development Review Committee (CCDC), and the City Council; and,

2) To ensure that all findings, recommendations and strategies prepared for the Comprehensive Plan are in alignment with the goals and vision of the Community and the City Council.

SECTION 2. *Members.* The Comprehensive Plan Advisory Committee (CPAC) shall consist of seven (7) members that are appointed by the City Council. These members should be

512

DRAFT RESOLUTION 10.21.19

representative of the community and may consist of members of the City's other boards and commissions, community leaders, stakeholder groups and development experts; however, all appointees shall be citizens of the City of Rockwall.

SECTION 3. *Term of Membership.* The members of the Comprehensive Plan Advisory Committee (CPAC) shall be appointed for a term of five (5) years with the ability to serve two (2) consecutive terms. Any member of the Comprehensive Plan Advisory Committee (CPAC) may be removed from office for any cause deemed by the City Council to be sufficient for removal. If a vacancy should exist on the committee due to removal from office, resignation, death, refusal or inability to serve, the City Council shall appoint a new member to fill the vacancy for a new term.

SECTION 4. *Attendance.* If a member of the Comprehensive Plan Advisory Committee (CPAC) has three (3) consecutive absences that are not excused by the Comprehensive Plan Advisory Committee (CPAC), or is absent from more than 25% of the meetings, that member may be removed from the committee; however, if absent from 50% of the meetings in any calendar year, the member will automatically be removed from the Comprehensive Plan Advisory Committee (CPAC).

SECTION 3. *Officers.* At the first Comprehensive Plan Advisory Committee (CPAC) meeting, the committee shall elect a Chairman and Vice-Chairman. These positions will serve for a term of three (3) years. The Vice-Chairman is to preside in the absence of the chair.

SECTION 4. *Voting.* All recommendations and decisions of the Comprehensive Plan Advisory Committee (CPAC) shall be decided by a simple majority vote.

SECTION 5. *Meetings.* The Comprehensive Plan Advisory Committee (CPAC) shall meet on an as needed basis. Since the Comprehensive Plan Advisory Committee (CPAC) is an advisory board and not a regulatory board, its meetings shall not be subject to the requirements of the Texas Open Meetings Act as stipulated by Chapter 551 of the *Texas Local Government Code*; however, the agenda for each meeting shall be posted on the City's bulletin board, in front of City Hall, a minimum of 24-hours prior to the meeting. The agenda shall indicate the time and place of each meeting. All Comprehensive Plan Advisory Committee (CPAC) meetings shall be open to the general public.

SECTION 6. *Dissolution Date [Sunset Clause].* The Comprehensive Plan Advisory Committee (CPAC) shall serve at the discretion of the City Council and may be dissolved by the City Council at any time. Upon the dissolution of the committee the members shall be released from any further obligations with respect to the Comprehensive Plan Advisory Committee (CPAC).

SECTION 7. *Effective Date.* This resolution shall take effect immediately from and after its adoption and it is so resolved.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ON THIS THE 21ST DAY OF OCTOBER, 2019.

APPROVED:

_____
Jim Pruitt, *Mayor*

CITY OF ROCKWALL

CITY COUNCIL MEMORANDUM

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller, *Director of Planning and Zoning*
DATE:	October 7, 2019
SUBJECT:	Comprehensive Plan Advisory Committee (CPAC)

On December 3, 2018, the City Council approved *Ordinance No. 18-48*, which adopted the OURHometown Vision 2040 Comprehensive Plan. This document was the result of a two (2) year collaboration between the Comprehensive Plan Advisory Committee (CPAC), the City's boards and commissions, City staff, and the general public. The original resolution that established the CPAC in 2016 (*i.e. Resolution No. 16-17*) contained a sunset clause dissolving the committee upon the adoption of the Comprehensive Plan; however, one of the adopted implementation strategies approved with the plan calls for a standing CPAC committee that can assist staff with the required annual updates.

In response to this implementation strategy staff is requesting that the City Council appoint a standing CPAC that will function similar to the City's other advisory boards. To assist the City Council, staff has included the memorandum and guidelines presented to the City Council in 2016, and a list of the previous members of the CPAC. Staff should point out that while the previous CPAC consisted of seven (7) members, the City Council may establish a larger committee at their discretion. Staff anticipates that this committee will only meet two (2) to three (3) times a year during the annual update process, and potentially more during the five (5) and ten (10) year update process. Once the City Council has provided staff with direction concerning the committee and the number of members, staff will prepare a resolution outlining the responsibilities of the committee. Staff is currently preparing the annual update to the OURHometown Vision 2040 Comprehensive Plan for the committee's review. Should the City Council have any questions concerning this request, staff will be available at the *October 7, 2019* City Council meeting.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*

FROM: Ryan Miller, *Director of Planning and Zoning*

DATE: October 3, 2016

SUBJECT: Comprehensive Plan Advisory Committee (CPAC) Resolution

As will be discussed in the work session on October 3, 2016, the City Council will need to appoint a citizen steering committee to assist staff through the proposed Comprehensive Plan update. In order to give the City Council the option of approving the resolution and/or appointing members at the October 3, 2016 meeting staff has placed this as an action item on the agenda; however, this item can be postponed to a future meeting date and does not require the Council to take action. Staff has attached the proposed resolution and a list of suggested criteria for selecting members that was provided to the City Council during the 2010 Comprehensive Plan update (*see Exhibits 'A'*). Should the City Council have any questions staff will be available at the meeting to discuss.

516

Suggestions for Comprehensive Plan Advisory Committee

- ☑ Former Planning and Zoning Commissioners;
- ☑ Current or past REDC Board Members;
- ☑ Former or Current County Commissioners;
- ☑ Independent local businessmen with interest in community;
- ☑ Representatives from the R.I.S.D. (could be a teacher);
- ☑ Real Estate individual involved in residential and commercial development;
- ☑ Local Corporate Business owner or CEO;
- ☑ Local Builder/Developer;
- ☑ Banking/Financial Investment representative involved in local development and business investment;
- ☑ Individuals that represent large neighborhoods/subdivisions or H.O.A. within the city;
- ☑ Local Civil Engineers involved in land use and development;
- ☑ Citizens that are large land owners or representatives of large land owners within the City; and,
- ☑ Representatives from non-profit organizations that affect large areas of the City.

The potential participants on the Committee should generally be individuals that:

- ☑ are interested in the growth of the City
- ☑ may have been involved in land use planning
- ☑ may have been involved in a land use conflict
- ☑ may have a considerable influence on land use planning
- ☑ may be affected by the outcome of land use planning

CITY OF ROCKWALL

RESOLUTION NO. 16-17

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ESTABLISHING THE COMPREHENSIVE PLAN ADVISORY COMMITTEE AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, a City's Comprehensive Plan -- *also known as a general plan or master plan* -- is a document intended to layout a 20-year vision for a city and guide a City Council's actions on policy decisions relating to land use and development regulations, and expenditures for capital improvements; and,

WHEREAS, the City Charter for the City of Rockwall states that "(t)he existing master plan [*Comprehensive Plan*] for the physical development of the City contains recommendations for the growth, development and beautification of the City and its extraterritorial jurisdiction ... "; and,

WHEREAS, the City of Rockwall's Comprehensive Plan was originally drafted in 1966 with major updates being approved in 1986, 1995, and 2001; and,

WHEREAS, the City of Rockwall's last Comprehensive Plan update was adopted on March 5, 2012 by *Resolution No. 12-07*; and,

WHEREAS, the City Council of the City of Rockwall acknowledges that the Comprehensive Plan needs to be updated from *time-to-time* to account for changes to the physical development of the City and to provide a clear vision for the future growth of the community; and,

WHEREAS, in an effort to ensure transparency and to further citizen involvement in the planning process, the City Council hereby establishes an appointed board of Rockwall citizens to serve as the Comprehensive Plan Advisory Committee (CPAC); and,

WHEREAS, the Comprehensive Plan Advisory Committee (CPAC) shall serve as an advisory and recommending body to ensure that the findings, recommendations and strategies identified by City staff are in alignment with the goals and vision of the community and the City Council;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:

SECTION 1. *Purpose.* The Comprehensive Plan Advisory Committee (CPAC) serves in an advisory role overseeing the preparation of the Comprehensive Plan update to achieve the following:

1) To provide advisory recommendations to City Staff, the City Council Development Review Committee (CCDC), and the City Council; and,

2) To ensure that all findings, recommendations and strategies prepared for the Comprehensive Plan update are in alignment with the goals and vision of the Community and the City Council.

SECTION 2. *Members.* The Comprehensive Plan Advisory Committee (CPAC) shall consist of seven (7) members that are appointed by the City Council. These members should be representative of the community and may consist of members of the City's other boards and commissions, community leaders, stakeholder groups and development experts; however, all

appointees shall be citizens of the City of Rockwall.

SECTION 3. *Officers.* At the first Comprehensive Plan Advisory Committee (CPAC) meeting, the committee shall elect a Chairman and Vice-Chairman. These positions will serve for the duration of the committee [*i.e. until the dissolution date*].

SECTION 4. *Voting.* All recommendations and decisions of the Comprehensive Plan Advisory Committee (CPAC) shall be decided by a simple majority vote.

SECTION 5. *Meetings.* The Comprehensive Plan Advisory Committee (CPAC) shall meet on an as needed basis. Since the CPAC is an advisory board and not a regulatory board, its meetings shall not be subject to the requirements of the Texas Open Meetings Act as stipulated by Chapter 551 of the *Texas Local Government Code*; however, the agenda for each meeting shall be posted on the City's bulletin board, in front of City Hall, a minimum of 24-hours prior to the meeting. The agenda shall indicate the time and place of each meeting. All CPAC meetings shall be open to the general public.

SECTION 6. *Dissolution Date [Sunset Clause].* Upon the completion and adoption of the 2017 Comprehensive Plan Update, the Comprehensive Plan Advisory Committee (CPAC) shall be dissolved and its members shall be released from any further obligations with respect to the Committee.

SECTION 7. *Effective Date.* This resolution shall take effect immediately from and after its adoption and it is so resolved.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ON THIS THE 3RD DAY OF OCTOBER, 2016.

APPROVED:

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **October 14, 2019**

SUBJECT: **2019 Update of the Standards of Design and Construction**

Over the course of the last year and half staff has updated the City's Standards of Design and Construction. The current Standards of Design and Construction were approved by City Council on November 7, 2016. Staff conducted several internal reviews of the Standards to address current gaps and additions.

Staff has attached a list of major changes to these standards that were made and the Updated 2019 Standards of Design and Construction. For reference the portions of the standards that have been changed are in "red". There are two of the major items that staff would like to discuss with City Council in detail. They are:

- Section 3.4: Detention
  - The addition of requiring storm water detention in the Buffalo Creek Watershed for all developments. A map has been attached for your reference as far as the extents of the Buffalo Creek Watershed within the City Limits along with a letter of recommendation from the Cities hydrologic and hydraulics engineering consultant.
- Section 6.2: Grading, Fill, Excavation and Earthwork Permit
  - The addition of the following language: *"An early fill, excavation and earthwork permit will not be issued to any development or re-development projects that are in actively being reviewed by the Engineering Division. Grading for the parcels/development will only be released after final construction plan release by the Engineering Division."*

Staff request consideration to proceed with the City Council adoption of the October 2019 update to the Standards of Design and Construction.

If you have any questions, please advise.

Major Changes to the Standards of Design and Construction

1. **General Requirements**
   - Standard Specifications: Adoption of the 5th Edition, November 2017, NCTCOG Standard Specifications for Public Works Construction.
   - Clarification of right-of-way and easement requirements
2. **Streets**
   - Addition of procedures for driveway construction and replacement on TxDOT Facilities.
   - Addition of sidewalk requirements for roadway reconstruction project. Result of the 2018 roadway bond project sidewalk policy decision from the September 3, 2019 Council Meeting.
   - Clarification of decorative sign poles and fixtures.
   - Clarification of requirements for Temporary Traffic Control.
   - Addition of Traffic Impact Analysis and Mitigation Requirements.
3. **Storm Drainage Facilities**
   - Clarification of requirements, definitions and procedures pertaining to the Unit Hydrograph Method.
   - Addition of requiring storm water detention for all developments within the Buffalo Creek Watershed.
   - Addition of requirements for determining local 100-year flood zones.
   - Clarifications and expansion of the Flood Studies, Reclamation and Modifications section to work to reduce problems staff has dealt with in past reviews.
4. **Vegetation**
   - Expanded definition of how close trees can be planted next to public utilities based on the size of the utility.
5. **Water System and Wastewater System**
   - Combined Water and Wastewater in to one section.
   - Addition of requirements for when a Infrastructure Capacity Study shall be performed.
   - Addition of procedures for water and wastewater line installation within TxDOT Right-of-Way
   - Clarification of requirements for Crossings (Culvert, Creek, TxDOT Highway, and Railroad)
   - Addition of requirements for sizing water and wastewater mains.
   - Clarification of requirements for design flow of wastewater system.
   - Addition of requirements for dead end water mains.
   - Addition of requirements on manholes for internal drop connections, corrosion protection and inflow prevention.
   - Addition of structural requirements for wastewater aerial creek crossings.
   - Addition of new sub-section for wastewater lift stations and force mains.
6. **Miscellaneous Requirements**
   - Addition of requirements allowing when grading permits are issued.
7. **Special Provisions to the NCTCOG's Standard Specifications for Public Works Construction Standards**
   - Updated to conform to the NCTCOG's 5th Edition, November 2017 and integrate City amendments.
8. **Special Provisions to the NCTCOG's Standard Drawings for Public Works Construction Standards**
   - Updated to conform to the NCTCOG's 5th Edition, November 2017 and integrate City amendments.
   - Addition of several new and updated standard details.

Re: Detention Considerations for Buffalo Creek Watershed

Dear Ms. Williams:

Two of the largest watershed areas within the City of Rockwall are the Buffalo Creek watershed and the Squabble Creek watershed. Both watersheds have a long history of flooding problems, especially for areas located at the downstream portions of their drainage system. The City's stormwater management requirements for the Squabble Creek watershed have long been more stringent than those for the Buffalo Creek watershed, requiring detention and other mitigation measures for both non-residential and residential developments. In the Buffalo Creek watershed, detention has normally been a requirement for only non-residential development, although some residential developments have incorporated detention facilities or other mitigation measures for the purpose of preventing increases in flooding and flood damage potential.

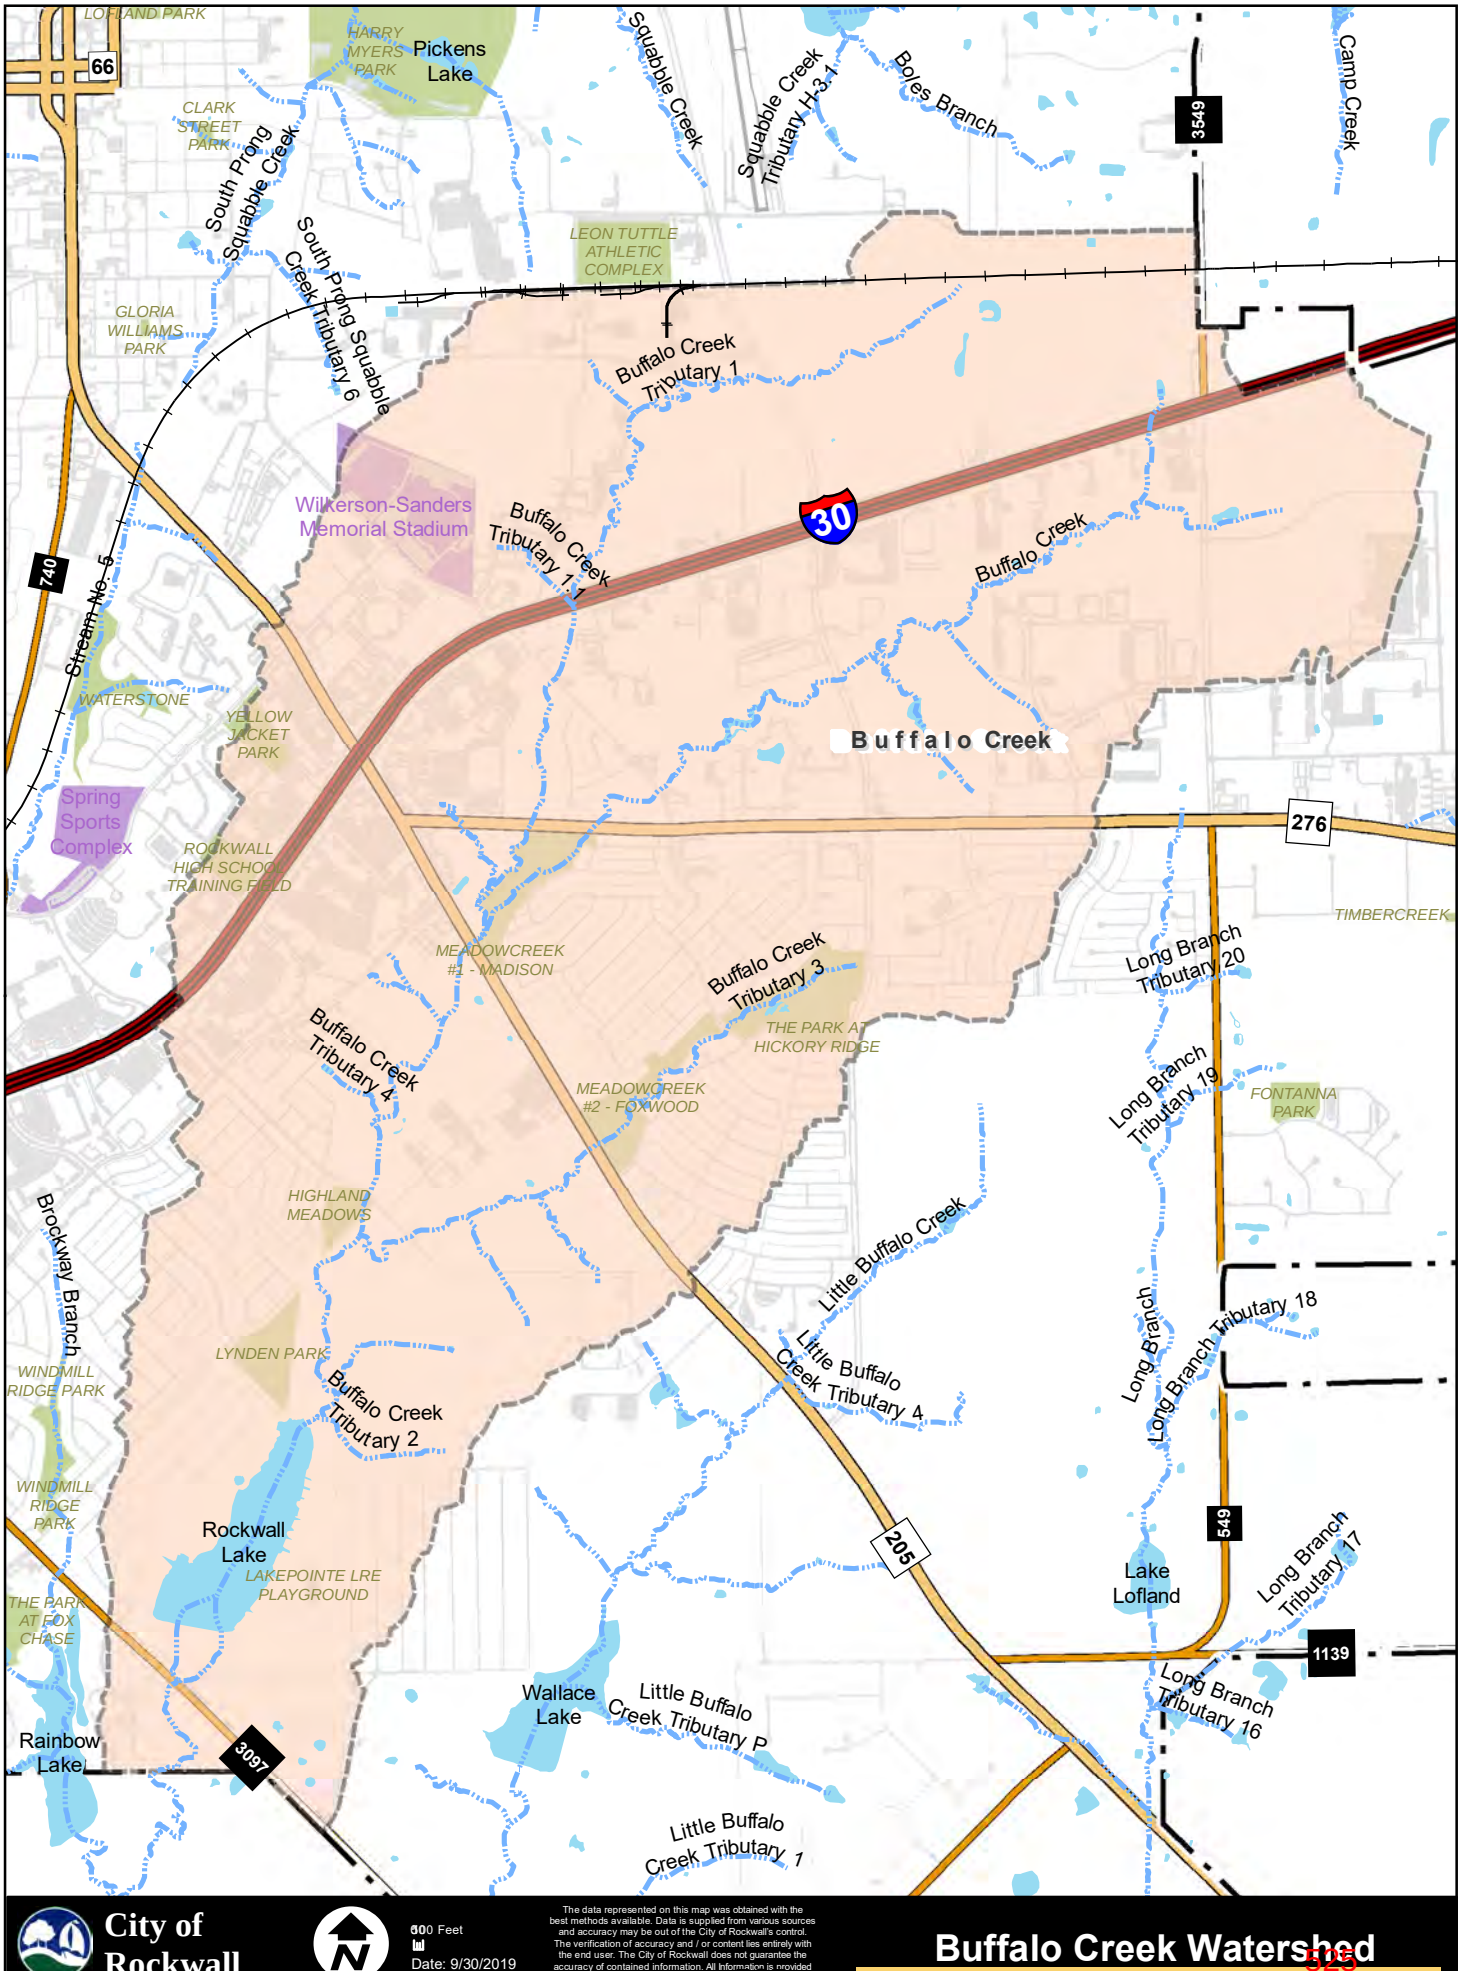
As the City is well aware, one of the major flooding issues associated with the Buffalo Creek watershed is the ongoing flooding of homes along Rockwall Lake. These flooded homes, for whatever reason, were allowed to be constructed within flood prone areas prior to the City annexing the area. Although detention requirements for future development within the watershed will not prevent or partially mitigate any of the existing flooding conditions in the vicinity of Rockwall Lake, it is highly recommended that the City provide regulation to at least help prevent the flooding situation from becoming worse in the future. Therefore, it is recommended that the City adopt stormwater management standards for the Buffalo Creek watershed similar to those currently enforced in regulating stormwater within the Squabble Creek watershed. Such standards should include the requirement of providing forms of mitigation to include, but not be limited to, detention facilities to prevent any increases in flood peak discharges and flood elevations at all points downstream of any proposed development, extending downstream to include Rockwall Lake (and the discharges through Rockwall Lake Dam). Additionally, as it has been determined that homes around Rockwall Lake, as well as other structures along Buffalo Creek, begin to flood during storm events that produce less than the 100-year frequency rainfall, this standard should not be limited to just the 100-year flood event, but should also include lesser flood events, such as the 10-year, 25-year, and 50-year floods.

It is recognized that the City's ordinances related to stormwater management already requires that proposed construction not cause any unacceptable increases in flooding on other off-site

properties. However, requiring flood detention facilities for new developments within the Buffalo Creek watershed, that are properly designed, constructed, operated, and maintained, will help prevent the current flooding situation along Rockwall Lake from becoming worse, by helping to prevent faster-rising flood levels and helping to prevent increases in lake flood elevations (to levels more than would otherwise occur for any particular flood).

To be consistent with stormwater management requirements throughout the City, it is further recommended that the City consider similar standards for regulating stormwater in other watersheds. For example, similar flooding situations associated with Wallace Lake, located within the Little Buffalo Creek watershed, could benefit by these requirements for proposed construction within the upstream watershed.

Additionally, the City's Master Drainage Study for the Buffalo Creek watershed has become outdated in many respects. Therefore, it is further recommended that the hydrologic and hydraulic digital computer models for the watershed be updated as soon as possible. Providing such models to engineering consultants for their use in design and analyses of future development projects will help reduce the burden of complying with the City's requirements of proving that proposed construction will not cause increased flooding at Rockwall Lake and along streams downstream of their projects.



Please feel free to contact me if you have any questions or would like to discuss these recommendations.

Sincerely,

Dwayne Stubblefield

CITY OF ROCKWALL

ORDINANCE NO. 19-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE ROCKWALL CODE OF ORDINANCES IN CHAPTER 38. SUBDIVISIONS; ARTICLE I. IN GENERAL; SECTION 38-23 STANDARDS FOR DESIGN OF DEVELOPMENTS WITHIN SUBDIVISIONS ADOPTED; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the governing body of the City of Rockwall, in the exercise of its legislative discretion, has concluded that the "Standards for Design of Development Within Subdivisions" should be updated in order to reflect certain amendments.

NOW, THEREFORE, **BE IT ORDAINED by the City Council of the City of Rockwall, Texas that:**

Section 1. Chapter 38. "Subdivisions;" Article I. "In General;" Section 38-23 "Standards for Design of Developments Within Subdivisions Adopted" of the Code of Ordinances is hereby amended so as to delete subsection "c" in its entirety and replace it with a new subsection "c" which shall hereafter read as follows:

~~(c) The October 2016 updated of the Standards for Design and Construction are adopted replacing the Standards of Design, Standard Construction Specifications, dated August 2003, a copy of which is on file for public inspection in the city secretary's office~~

(c) The October 2019 updated of the Standards for Design and Construction are adopted replacing the Standards of Design, Standard Construction Specifications, dated October 2016, a copy of which is on file for public inspection in the city secretary's office

Section 2. Chapter 38. "Subdivisions;" Article I. "In General;" Section 38-23 "Standards for Design of Developments Within Subdivisions Adopted" of the Code of Ordinances is hereby amended so as to delete subsection "d" in its entirety and replace it with a new subsection "d" which shall hereafter read as follows:

~~(d) The Public Works Construction Standards and Specifications, North Central Texas, 4th Edition, October 2004 as amended by the City of Rockwall are adopted replacing the Standard Specifications for Public Works Construction, North Central Texas, 3rd Edition, 1998.~~

(d) The Public Works Construction Standards and Specifications, North Central Texas, 5th Edition, November 2017 as amended by the City of Rockwall are adopted replacing the Standard Specifications for Public Works Construction, North Central Texas, 4th Edition, 2004.

526

Section 3. A new, 2019 version of the city's "Standards for Design of Developments Within Subdivisions Adopted" is hereby adopted as reflected in **"Exhibit A"** of this ordinance, a copy of which shall be kept on file for public inspection within the city secretary's office.

Section 4. Any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of Two Thousand Dollars ($2,000.00) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

Section 5. If any section or provision of this ordinance or the application of that section or provision to any person, firm, corporation, situation or circumstance is for any reason judged invalid, the adjudication shall not affect any other section or provision of this ordinance or the application of any other section or provision to any other person, firm, corporation, situation or circumstance, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions of this ordinance shall remain in full force and effect.

Section 6. This ordinance shall be cumulative of all other ordinances of the City and shall not repeal any of the provisions of those ordinances except in those instances where the provisions of those ordinances are specifically repealed or those in direct conflict with the provisions of this ordinance.

Section 7. This ordinance shall take effect immediately from and after its passage and approval and the publication of the caption of said ordinance as the law in such cases provides, and it is so ordained.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, this the 4th day of November, 2019.

City of Rockwall
The New Horizon

1. GENERAL REQUIREMENTS

1.1 Introduction

The "Standards of Design" are generated to implement the provisions of the Subdivision Ordinance and to provide for the orderly, safe, healthy and uniform development of the area within the corporate city limits and within the surrounding City, extraterritorial jurisdiction (ETJ).

The 5th Edition of the NCTCOG Standard Specifications for Public Works Construction dated November 2017 as modified by the City of Rockwall Special Provisions are supplemental and are made a part of these Standards of Design. These documents are to be considered as the minimum requirements of engineering design. The adherence to the requirements of these documents and/or the approval by the City of Rockwall and its agents in no way relieves the developer or their engineer of the responsibility for adequacy of design, which may require more stringent standards than these, the completeness of plans and specifications or the suitability of the completed facilities. In unusual circumstances, the City of Rockwall may determine that designs other than those of the Standards are necessary and will inform the developer of such requirements before final engineering review.

The developer and/or their representative shall obtain authorization from the City of Rockwall, in writing, for any deviations from the requirements set forth in the Standards of Design, Standard Specifications for Construction or Standard Details.

1.2 Standards of Design

The Standards of Design, as adopted by the City of Rockwall, are set forth herein. These standards shall be considered as the minimum requirements, and it shall be the responsibility of the developer to determine if more stringent requirements are necessary for a particular development. It is not intended that the Standards of Design cover all aspects of a development. For those elements omitted, the developer will be expected to provide designs and facilities in accordance with good engineering practice and to cause the facilities to be constructed utilizing first class workmanship and materials. The City Engineer reserves the right to request additional information not covered within these Standards of Design to be included in the design plans by the developer/design engineer in order to validate the intent, safety, constructability, readability and competency of the design plans.

Developer/Engineer must ensure that all design and construction is in accordance with all Federal, State and local regulations and must provide certification on final plans. A copy of all determinations, permits, and approvals

received from Federal, State, and local agencies must be provided to the Engineering Department prior to approval.

Engineering design and plans submitted to the Engineering Department by the developer/design engineer shall be in conformance with the adopted Standards of Design and Construction that are in affect when the 1st submittal is received by the Engineering Department. If subsequent submittals have not been received within one (1) year of the previous submittal, any subsequent submittals must conform to the current adopted Standards of Design and Construction. Approved construction plans will expire within one (1) year of approval date, and must be reviewed and revised to meet the current adopted Standards of Design and Construction.

1.3 Standard Specifications for Construction

The City of Rockwall Special Provisions to the NCTCOG Standard Specifications for Public Works Construction, 5th Edition, November 2017, as adopted by the City of Rockwall is referenced in this document. The Standard Specifications for construction set forth the minimum requirements for materials and workmanship for streets, parking lots, sidewalks, drainage, water and wastewater systems.

1.4 Standard Details

In an effort to have uniformity and to facilitate maintenance, the City has adopted the North Central Texas Council of Governments (NCTCOG) Standard Drawings as modified by the City of Rockwall Special Provisions for certain facilities such as manholes, street sections, sidewalks, water, wastewater, storm water, curb inlets, barrier free ramps, etc. The City of Rockwall Special Provisions can be obtained from the City Engineering Department. The NCTCOG Standard Specifications can be obtained from the North Central Texas Council of Governments, Regional Information Center 817-695-9140.

1.5 Inspection of Construction by City Personnel

Inspection of construction and verification of compliance to the plans and specifications shall be conducted by the City of Rockwall staff under the direction of the City Engineer. The facilities included in this inspection requirement are streets, sidewalks, parking lots, alleys, storm drainage facilities, water distribution systems, wastewater collection system, etc. The developer shall advise all of his construction contractors of this requirement. No development will be accepted by the City until all construction has been approved by the City of Rockwall's staff. The developer shall be responsible for any additional expense to the City at a rate established by the City at that time when inspection is done after normal business hours of the City. The date of acceptance will be when all items have been accepted by the City. Twenty months from the date of acceptance the City will determine any failures or defects and repairs will be made by the contractor.

The accepted method of inspection for underground utilities shall be videoed and the City will require a copy of such inspection. The developer or contractor shall be responsible for the cost of the videoed inspection.

1.6 Franchise and Public Utilities to be Underground

All franchise and public utilities within a residential development shall be placed underground. Utilities are defined for this purpose as water pipelines, wastewater pipelines, storm water pipelines, natural gas pipelines, telephone wires, cable TV wires and electric wires. In case of special or unique circumstances, the City may grant variances or exceptions to this requirement. Any request for variance or exception should be submitted in writing to the City of Rockwall setting forth the justification for an exception. The granting of a variance or exception by the City will be in writing. No work will be accepted without written approval from the City Engineer or in the case of franchise utilities, the Planning Director. Commercial developments may have overhead utilities as approved by the City Council.

1.7 Submittal to Utility Companies

The developer shall be responsible for submittal of information needed to design private utilities for the development. This information shall be submitted to the franchise (gas, electric, phone, and cable) companies. Written confirmation from the franchise companies shall be submitted to the Engineering Department, verifying that the affected utility companies have installed their respective utilities prior to engineering acceptance of project.

1.8 Requirements of the Final Engineering Drawings

The final engineering drawings shall conform to the established “Engineering Drawings Requirements” and these Standards of Design. The Engineering Drawings Requirements can be found the Appendix.

The final engineering drawings will consist of drawings showing all information necessary to completely review the engineering design of improvements proposed for or affected by the site and sealed by a Registered Professional Engineer within the State of Texas.

1.9 Engineering Plan Approval/Construction Permit Release

All review fees (plan, flood study, TIA, Lift station, etc.) shall be paid prior to engineering construction permit release and submittal of building permit.

1.10 Easements and ROW

All easements and right-of-way required for construction of a proposed project must be approved and accepted for filing prior to the approval or release of the final design/construction drawings.

A. Requirements for On-Site Easements and Right-of-Way Dedication to the City:
   1. All easements and right-of-way shall be dedicated on a plat. No separate instruments will be allowed.
   2. No structures (buildings, walls, fences, decks, swimming pools, signage/monuments, etc.) are allowed in or over any easements or right-of-ways. No trees shall be planted within 10' of any public water or sewer line 10" in diameter or larger. No trees shall be planted within 5' of any public water and sewer line less than 10" in diameter. No trees shall be planted within 5' of any public storm system.
   3. All drainage and detention easements shall be maintained, repaired, and replaced by the property owner. This statement is to be noted on the plat.
   4. No public utilities allowed in detention easements.
   5. All right-of-ways shall have a minimum 10' utility easement dedicated adjacent to them.
   6. Easement dimensions and other special requirements can be found in the utility's respective section of these Standards.

B. Requirements for Off-Site Easements Dedicated to the City:
   1. All easement and right-of-way documents shall be written by the City.
   2. Owner/Developer shall furnish the City a current title report and, metes and bounds description, and exhibit that is signed and sealed by a Texas Registered Professional Land Surveyor that shows the easements' or right-of-way, location, and current ownership information.
   3. All easements shall be reviewed and approved by the City prior to releasing the documents for signatures by the property owners.
   4. The individual or entity requesting the easement shall pay all filing fees required by the County.
   5. The individual or entity shall return, to the City, all originally signed documents and a check for filing fees made out to Rockwall County for filing.
   6. All filing information for all easements must be shown on all plats.
   7. After recordation, a copy of the filed document will be forwarded to the property owner.

1.11 Final Acceptance

Final Acceptance shall occur when all the items on the Checklist for Final Acceptance have been completed and signed-off by the City. An example of the

checklist for final acceptance has been included in the Appendix. Items on the checklist for final acceptance will vary per project and additional items not shown on the check list may be required. After improvements have been constructed, the developer shall be responsible for providing to the City "As Built" or "Record Drawings". The Design Engineer shall furnish all digital files of the project formatted in Auto Cad 14, or 2000 format or newer **and** Adobe Acrobat (.pdf) format with a CD-ROM disk or flash drive. The disk or drive shall include a full set of plans along with any landscaping, wall plans, and details sheets.

Submit 1-set of printed drawings of the "Record Drawings" containing copies of all sheets. The printed sheets will be reviewed by the construction inspector **PRIOR** to producing the "Record Drawing" digital files on disk or flash drive. This will allow any revisions to be addressed prior to producing the digital files.

Record Drawing Disk drawings shall have the Design Engineers seal, signature and must be stamped and dated as "Record Drawings" or "As Built Drawings" on all sheets.

The City of Rockwall will not accept any Record Drawing disk drawings which include a disclaimer with the like or similar verbiage. A disclaimer shall not directly or indirectly state or indicate that the design engineer or the design engineer's surveyor/surveyors did not verify grades after construction, or that the Record Drawings were based solely on information provided by the construction contractor/contractors. Any Record Drawings which include like or similar disclaimer verbiage will not be accepted by the City of Rockwall.

Example of Acceptable Disclaimer:

To the best of our knowledge ABC Engineering, Inc., hereby states that this plan is As-Built. This information provided is based on surveying at the site and information provided by the contractor.

1.12 Changes in Standards of Design, Construction Specifications and this Document

These Standards of Design, Construction Specifications and this document can be modified by City Council through ordinance or resolution. This document can also be updated time to time to reflect changes in City requirements. It is the responsibility of the user to obtain the latest revisions of the City's requirements.

2. STREETS

2.1 General

The street system, including the street layout, shall be in accordance with generally accepted engineering practices and in compliance with the Comprehensive Plan, the latest Thoroughfare Plan, the Zoning Ordinances, the Subdivision Regulations and other applicable regulations. The drainage system, as incorporated into the street system, shall comply with Section 3 of this document. The plans and specifications, design computations, if required, and other applicable data shall be submitted to the City for review. Construction shall not commence prior to approval of the plans and specifications by the City. All changes during construction shall be submitted to the Engineering Department for approval prior to any construction modifications.

2.2 Street Arrangement

Unless otherwise approved by the City, provisions shall be made for the extension of existing major arterials, collector streets and local streets in accordance with the Thoroughfare Plan and any specific street alignments as adopted by the City Council.

Off-center intersections will be considered for approval only for minor collector and local streets and only when there is a minimum property line separation of 125’ unless otherwise approved by the City Engineer.

Within residential areas, the following design elements are encouraged: (A) Developing only a limited number of access points to arterial streets bordering the subdivision; (B) More than one point of access; (C) Incorporate curvilinear streets into the plan and (D) Incorporating a discontinuous residential street network, which utilizes three-way intersections in lieu of four-way intersections. When these factors are incorporated into a residential street plan, the result is enhanced character and traffic safety.

2.3 Thoroughfare and Street Geometry

Geometric design standards are presented in two formats within this section. Table 2.1 identifies specific design criteria for each standard roadway type. Figure 2.1A and 2.1B shows the typical cross-section for each standard roadway type. It is noted that dimensions shown are to the face of curb, unless specifically identified otherwise.

Each roadway type is keyed to the City Thoroughfare Plan, with the exception of local streets. The reader is referred to this document for information as to the locations where these roadways are to be used.

City of Rockwall

LOCAL (RESIDENTIAL STREET)

Figure 2.1B: Typical Thoroughfare Cross Sections

TYPICAL CUL-DE-SAC

TYPICAL EYEBROW

Figure 2.1C: Typical Thoroughfare Cross Sections

2.4 Turn Lanes

All left turn storage areas shall be eleven (11) feet wide with minimum storage requirements for left-turn lanes as in Figure 2.2. The transition curves used in left-turn lanes shall be two (2), 250-foot radius reverse curves with a total transition length of 100 feet. Medians less than seven (7') feet wide (face to face) are required to be constructed of reinforced integral stained and stamped color concrete a minimum of six (6") inch thick median pavement. All median noses are to be constructed of City approved integral stained and stamped color concrete. The color and pattern to be approved by the City. The paver system shall be installed a distance of ten (10') feet from the end of the nose.

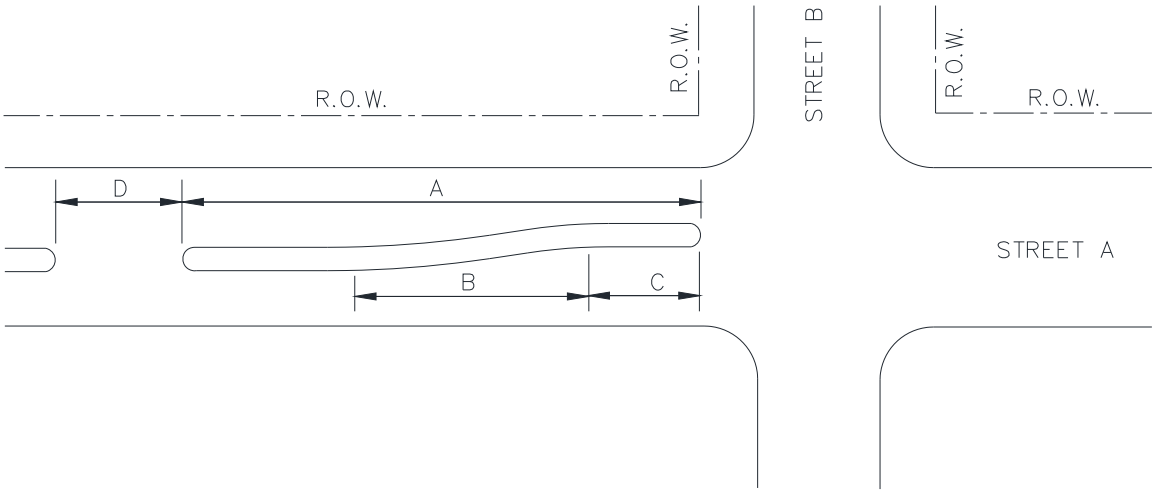
2.5 Median Openings, Width, Location and Spacing

Arterial thoroughfares in Rockwall have raised medians. Arterials having continuous two-way left turn lanes are discouraged and may be utilized only in special circumstances with the approval of the City Council.

Median openings at intersections shall be from right-of-way to right-of-way of the intersecting street, unless otherwise approved by the City Engineer.

The width of mid-block median openings shall not be less than 60 feet, but no greater than 70 feet.

Using the above requirements, examples of the minimum distance between median openings on a divided street where left-turn storage is provided in both directions are:



A. 310 feet from nose to nose of the median from the intersection of two major thoroughfares to a street or drive (see Figure 2.2);

B. 260 feet from nose to nose of the median from the intersection of two secondary thoroughfares or a secondary thoroughfare and a major thoroughfare to a residential street or a drive, and;

C. 220 feet from nose to nose of the median for intersection combinations of drives and/or residential streets.

Medians less than seven (7') feet wide are required to be constructed of a City approved paver or stamped concrete system. All median noses are to be constructed of City approved paver or stamped concrete system, a distance of ten (10') feet from the end of the nose. Any median that has landscaping requires a mow ramp to be installed for access. Noses shall be a solid poured steel reinforced concrete bullet nose.

Figure 2.2: Median Design Standards

LEFT-TURN STORAGE AREA WIDTH 11' MINIMUM

MEDIAN WIDTH (SEE GEOMETRIC DESIGN STANDARD FOR PRINCIPAL AND MINOR ARTERIAL).

***MINIMUM LENGTH – ACTUAL LENGTH DEPENDENT UPON ANTICIPATED TURN VOLUME**

** **OR STREET WIDTH + 8 FEET – WHICHEVER IS GREATER. A VARIANCE MAYBE GRANTED BY CITY COUNCIL ON A CASE BY CASE BASIS.**

2.6 Driveway Locations

Minimum standards for driveway separation accessing the same site are shown in Figure 2.3. This standard applies to all non-residential uses.

There is a minimum distance upstream and downstream from adjacent intersections within which driveways should not be located. This separation distance varies with the classification of street and is shown in Figure 2.3. This standard applies to all non-residential users.

At mid-block access points, there is a minimum distance from a median nose, within which driveways should not be located. This is shown in Figure 2.3 and is equally applicable along both major and minor arterials for non-residential uses. All proposed paving connections to existing paving requires a longitudinal butt joint connection.

2.6.1 Driveways on TxDOT Facilities

Driveways on TxDOT facilities shall be placed in accordance to City Standards set forth in this section and the requirements of the current TxDOT's Access Management Manual and require TxDOT Driveway Permit approval. TxDOT Driveway Permits shall be processed through the City Engineering Department. TxDOT Permit Plan sets shall be 11"x17" in size and signed and sealed by a licensed professional engineer with the State of Texas. Permit plan sets shall include: typical sections, paving plan and profile, all applicable TxDOT standard details, traffic control plans sheets, striping plans, demo plans, drainage plans (drainage area map, storm sewer plans and profiles, culvert plans and profiles), and any other items required by TxDOT or City Engineer to construct the driveway. A Traffic Impact Analysis shall be submitted to the Engineering Department with all TxDOT Driveway Permits.

2.7 Block Lengths

In general, streets shall be provided at such intervals as to serve cross traffic adequately and to intersect with existing streets. Where no existing plats control, the blocks shall be not more than 1,600 feet in length. Block arrangements must provide access to all lots, and in no case, shall a block interfere with traffic circulation.

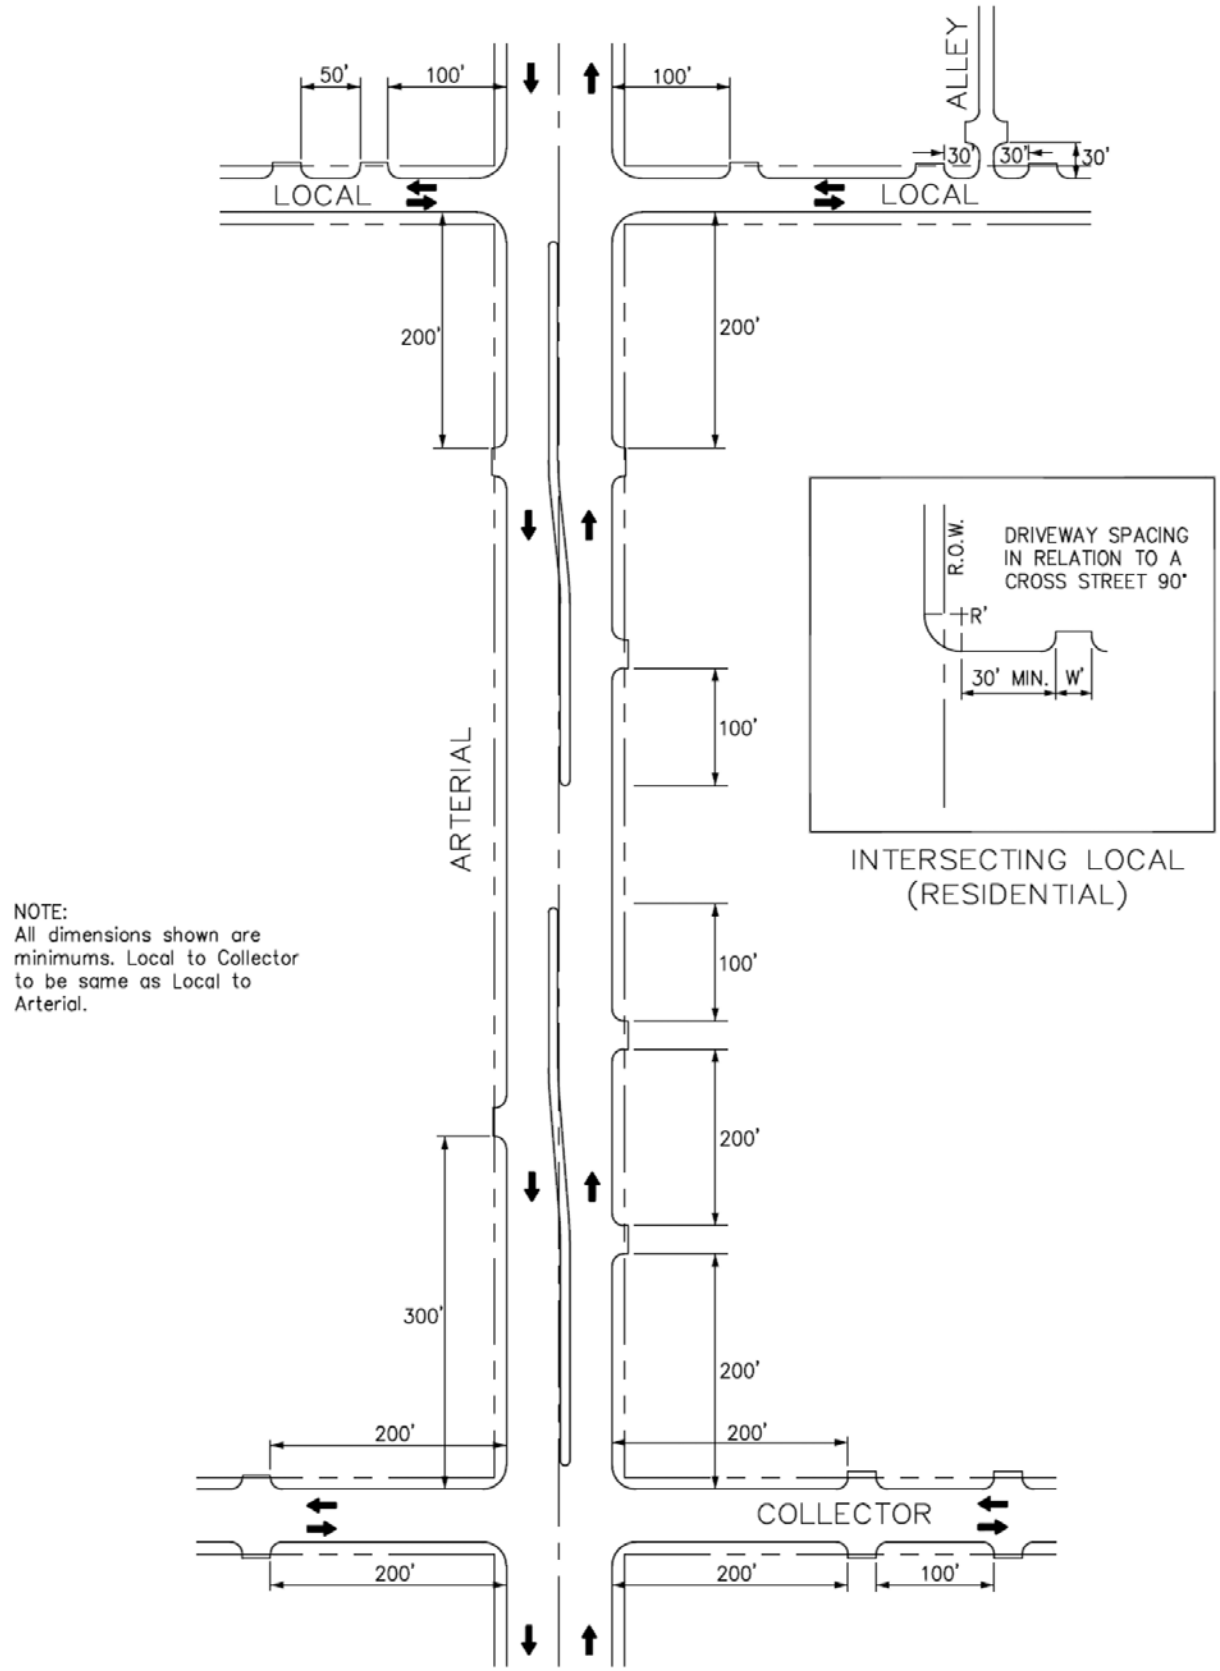

Figure 2.3: Minimum Driveway Spacing & Corner Clearance

2.8 Street Intersections

More than two streets intersecting at one point shall be avoided. All streets and thoroughfares should intersect other streets and thoroughfares at an angle of ninety (90) degrees unless otherwise approved by the City Engineer.

Arterial and collector street intersections shall have property line corner clips with a minimum tangent distance of thirty (30) feet. Residential streets shall not normally be required to have a ROW corner clip at their intersection with other streets or thoroughfares, but a 10-foot by 10-foot sidewalk corner easement will be required.

Visibility easements will be required for all ninety (90°) degree intersections. For all intersections that are not ninety (90°) degrees, an engineered visibility easement is required by the design engineer.

A. Arterial/Collector street intersections - thirty (30) foot by thirty (30) foot easement
B. Residential street intersections - twenty (20) foot by twenty (20) foot easement
C. Alley to street intersections - ten (10) foot by ten (10) foot easement

Curb radii at intersections shall have a minimum radius of thirty (30) feet along arterials, twenty-five (25) feet along collectors and twenty (20) feet along residential streets.

In any case where streets intersect at an angle of other than ninety (90) degrees, the City may require non-standard right-of-way corner clips and curb return radii.

All proposed paving connections to existing paving requires a longitudinal butt joint connection.

2.9 Relation to Adjoining Streets

The system of streets designed for the development, except in unusual cases, must connect with streets already dedicated in adjacent developments. Where no adjacent connections are platted, the streets must be the reasonable projection of streets in the nearest subdivided tracts and must be continued to the boundaries of the tract development, so that other developments may eventually connect with the proposed development. Strips of land controlling access to or egress from other property or any street or alley or having the effect of restricting or damaging the adjoining property for development or subdivision purposes or which will not be taxable or accessible for special improvements shall not be permitted in any development unless such reserve strips are conveyed to the City on fee simple. This determination is made by the City

Planning Director or City Engineer. When such access is needed to maintain permanent City owned utilities, the roadway will be an improved right-of-way. If the utilities are temporary, an improved easement may be approved.

2.10 Dead End Streets, Cul-de-Sacs and Courts

Cul-de-sacs are permitted and encouraged within residential subdivisions. Use of this design shall provide proper access to all lots and shall not exceed six hundred (600) feet in length, measured from the center of the cul-de-sac to the center of the intersecting street (not a dead end street). Cul-de-sac shall have a minimum paving radius of forty-seven and half (47 ½) feet and a minimum right-of-way radius of fifty-seven and half (57 ½) feet. Specific aspects of the standard cul-de-sac design are given in Figure 2.1C. In lieu of the typical design shown, the City may approve alternative concepts for a specific application.

2.11 Alleys and Alley Widths

Alleys shall be provided in all residential areas and shall be paved with steel reinforced concrete. No alley may be over 1,000 feet long. The City Council may waive the residential alley requirement, if it is in the best interest of the City. Alleys may be required in commercial and industrial districts. The City may waive this requirement where other definite and assured provisions are made for service access such as off-street loading, unloading and parking consistent with and adequate for the uses proposed. The minimum right-of-way width of an alley shall be twenty (20) feet. Dead-end alleys shall not be permitted. The City may waive this requirement where such dead-end alleys are unavoidable and where adequate turnaround facilities have been provided. Adequate provisions shall be made at all intersections in order that equipment, such as garbage collection vehicles and maintenance vehicles, can maneuver the corners. The interior edge of the pavement, at the corners, shall have a minimum radius of thirty (30) feet. The exterior edge of the pavement, at the corners, shall have a minimum radius of twenty (20) feet. The alley paving is to be flared at the street intersection. The right-of-way limits shall be expanded, if necessary, beyond the minimum requirement in order to include all of the paved section and utilities within the right-of-way of the alley. Alley turnouts shall be paved to the property line and shall be fifteen (15) feet wide at that point. All alleys shall have a minimum of twelve (12) feet of steel reinforced paved concrete roadway. Alley shall have a minimum thickness of seven (7) inches on the exterior edges and five (5) inches in the center sections.

2.12 Street Grades

Arterial streets may have a maximum grade of seven and one-half (7 ½) percent, for a maximum continuous distance of two hundred (200) feet. Collector streets may have a maximum grade of seven and one-half (7 ½) percent. Residential streets may have a maximum grade of ten (10) percent, unless otherwise

approved by the City, where the natural topography is such as to require steeper grades. All streets must have a minimum grade of at least seven-tenths (0.7) of one (1) percent. Centerline grade changes with an algebraic difference of more than one (1) percent shall be connected with vertical curves in compliance with the minimum length requirements set forth in Table 2.2.

2.13 Pavement Design

Traffic projections for next 30 years, engineered paving designs, and sub-grade conditions are required for the pavement design section determinations of all collector and arterial streets.

2.13.1 Subgrade

Subgrades shall be compacted and finished to a smooth uniform surface. Subgrades of native material which have a Plasticity Index (P.I.) of fifteen (15) or more shall be lime stabilized to a minimum depth of six (6) inches. The lime stabilization shall be used for the full width of the street, back of curb to back of curb, plus twelve (12) inches on outside of the curb. The minimum lime content shall be six (6) percent of the dry weight of the material (at least 27 lbs. per square yard). Lime stabilization or concrete stabilization may be required for soils showing a P.I. of 15 or less. Type of stabilization and paving design will be determined prior to pavement construction by a certified geotechnical testing lab. The subgrade materials will be tested in accordance to the Standard Specifications for Construction, unless otherwise approved by the City. In general, the soils testing will include the testing of Atterburg limits and testing of sulfates to determine if lime stabilization is infeasible. Laboratory tests must be submitted to the Engineering Department for approval to determine amount of lime required. Subgrades should be compacted to ninety-five (95) percent standard densities. No sand is allowed under any paving.

2.13.2 Steel Reinforced Concrete Pavement

All pavement shall be steel reinforced size and spacing shall conform to Table 2.3 below. All non-structural cracks in paving shall be routed and sealed as determined by the City. All reinforcing steel placed within the public right-of-way shall be grade 60 steel and comply with Texas Department of Transportation specifications.

Fly ash may be used in concrete pavement locations provided that the maximum cement reduction does not exceed 20% by weight per cubic yard of concrete. The fly ash replacement shall be 1.25 pounds per 1.0 pound of cement reduction.

At a minimum all concrete pavement shall conform to Table 2.3.

Table 2.3: Steel Reinforced Concrete Pavement Design

Street/Pavement Type	Minimum Thick-ness (inches)	Strength 28-Day (psi)	Minimum Cement (sacks / CY)		Steel Reinforcement	
			Machine placed	Hand Placed	Bar #	Spacing (O.C.E.W.)
Arterial *	10”	3,600	6.0	6.5	#4 bars”	18”
Collector *	8”	3,600	6.0	6.5	#4 bars	18”
Residential	6”	3,600	6.0	6.5	#3 bars	24”
Alley	7”-5”-7”	3,600	6.0	6.5	#3 bars	24”
Fire Lane	6”	3,600	6.0	6.5	#3 bars	24”
Driveways	6”	3,600	6.0	6.5	#3 bars	24”
Barrier Free Ramps	6”	3,600	N/A	6.5	#3 bars	24”
Sidewalks	4”	3,000	N/A	5.5	#3 bars	24”
Parking Lot/Drive Aisles	5”	3,000	5.0	5.5	#3 bars	24”
Dumpster Pads	7”	3,600	6.0	6.5	#3 bars	24”

* Paving section designs for arterials and collectors shall be based off 30 year projected traffic volumes and geotechnical analysis/report. (Paving section design shall include but not limited to the following: pavement thickness, reinforcing size and spacing, pavement strength, subgrade thickness, subgrade treatment type (lime or cement))

Concrete batch designs for all paving, sidewalks, and sewer/storm structures are to be reviewed and approved by the Engineering Department. All batch designs shall be submitted with history of recent cylinder breaks for each separate strength requirement (machine placement and hand placed). All batch designs shall have the current date, project name, and use labeled on each design. Submit batch designs to the Engineering Department a minimum of ten (10) days prior to the projected placement date for review and approval.

During construction the contractor shall furnish the following at his own expense:

- Batch plant control from a qualified commercial laboratory. Laboratory personnel shall be competent to determine free moisture in aggregates and make needed adjustments in control of the mix and slump.

- Prepare a minimum four compression cylinders for each 150 cubic yards of concrete or fraction thereof, with one cylinder break at 7 days, one at 14 days, and a minimum of two cylinders broken at 28 days. Note* No averaging on cylinder breaks.

- Testing labs are to submit copies of any and all concrete cylinder breaks that do not meet 28 day break specifications. Cores are to be taken within ten (10) days of any 28 day cylinder break failures.

- Test data and copies of all laboratory reports for site work are to be directed to the attention of the designated engineering construction inspector that is assigned to the project.

The City of Rockwall may suspend concreting operations if the quality of the concrete being placed is not acceptable or due to adverse climate conditions. Concrete placement shall cease if the concrete temperature meets or exceeds ninety-five (95) degree Fahrenheit. If in the opinion of the owner or the City of Rockwall concrete placement operations shall cease a combination of temperature, wind, and humidity create conditions which are adversely affecting the condition of the concrete. Concrete placement shall also cease if concrete temperature is below forty (40) degrees Fahrenheit and falling. Except by specific written authorization of the owner/City of Rockwall, no concrete shall be placed when the air temperature is less than forty (40) degrees Fahrenheit and falling but may be placed when the air temperature is above thirty-five (35) degrees Fahrenheit and rising, "Pending No Freezing Weather is Imminent" with the temperature being taken in the shade away from artificial heat. When and if such permission is granted, the contractor shall furnish sufficient protective material and devices to enclose and protect the fresh concrete in such a way as to maintain the temperature of fifty (50) degree Fahrenheit for a period of at least five (5) days. No concrete shall be placed on frozen subgrades. If in the opinion of the owner or the City of Rockwall concrete operations shall cease if a combination of temperature, wind, and humidity create conditions which are adversely affecting the condition of the concrete, then concrete placement shall cease. It is to be distinctly understood that the contractor is responsible for the quality and strength of the concrete placed under any weather conditions.
Maximum time intervals between the addition of mixing water and/or cement to the batch, and the placing of concrete in the forms shall not exceed the following:

Air or Concrete Temperature Which Ever is Higher	Maximum Time From Addition Of Water To Placement
Non-Agitated Concrete	
Up to 80° F	30 Minutes
Above 80° F	15 Minutes
Agitated Concrete	
Up to 75° F	90 Minutes
75° to 89° F	60 Minutes
Over 89° F	45 Minutes

The use of an approved set-retarding admixture will permit the extension of the above time maximums, by thirty (30) minutes for agitated concrete only.

2.14 Parkways, Grades and Sidewalks

All parkways shall be constructed to conform to top of curb grades with a standard transverse slope of one-quarter (1/4) inch per foot rise from top of curb to right-of-way. All City right-of-way shall be sodded if disturbed.

Where the natural topography is such as to require steeper grades, transverse slopes (except for sidewalk) up to three-quarter (¾) inch per foot may be used with approval of the City of Rockwall.

Sidewalks shall be provided for all residential streets in subdivisions zoned for one or two family dwellings and on all streets designated on the adopted Master Thoroughfare Plan. Barrier free ramps and sidewalks along screening walls, landscaped areas, trails, parks, open space, greenbelts, and/or drainage ways, shall be installed by the Developer with street construction and the sidewalks in front of residential lots shall be installed by the home builder. The City may require sidewalks in other locations. Sidewalks shall be five (5) feet in width and shall have two (2) feet of green space between the Right of Way line and the outside edge of sidewalk. Sidewalks shall be located wholly within the street Right of Way, sidewalk corner clip easement, or road easement. If a fire hydrant is too close to the sidewalk, swerve sidewalk toward the right-of-way line to maintain five (5) feet clear path. If sidewalk has to be built outside the right-of-way, a sidewalk easement is required. This requirement may be waived by the City Council as provided for in Section 24-17 of the Code of Ordinances.

Sidewalks/Trails wider than 5’ will be required to have engineered details.

Sidewalks placed adjacent to the back of the curb must be six (6) feet wide and lugged in to the curb. Sidewalks to be place against the back of curb shall be approved by the City Engineer.

2.14.1 Roadway Reconstruction

During a roadway reconstruction project if a block of a street to be reconstructed does not currently have sidewalks in place, a six (6) foot sidewalk against/adjacent to the curb shall be required on both sides of the roadway within that street block if the following criteria are met:

1. The roadway is above a residential/local classification or on the currently adopted Thoroughfare Plan. (i.e. Minor Collector, Major Collector, Minor Arterial and Major Arterial) and has an Average Daily Traffic (ADT) of 750 vehicles or more per day; or,
2. Any portion of the street block is located within 1,000 feet of a school, city park, or church. In cases where the street block is located within this 1,000 foot buffer the street block shall have a direct connection to another street block or sidewalk system that is also located within the 1,000 foot

buffer. Any street block or sidewalk system that is inhibited from connecting to an existing street block or sidewalk system by a physical barrier (e.g. bridges) may be exempted from this requirement at the discretion of the City Engineer.

For the purpose of this section a street block shall be defined as the section of the road that extends from one (1) street intersection to another, or from a street intersection to the end of a cul-de-sac or dead-end.

This section shall only apply to City initiated reconstruction projects.

2.15 Driveways/Drive Aisles

2.15.1 Residential

Steel reinforced concrete residential driveways to serve single car garages shall not be less than twelve (12) feet in width. Two car garages, carports and/or storage areas shall not be less than eighteen (18) feet nor more than twenty four (24) feet in width at the property line. The width of the driveway for a three car garage shall be twenty eight (28) feet or larger on a case by case basis.

Residential driveways shall be separated from one another by a distance of at least ten (10) feet. The radii of all residential driveway returns shall be a minimum of five (5) feet and shall not extend past the adjoining property line. The driveway approaches devoted to one use shall not occupy more then sixty percent (60%) of the frontage abutting the roadway or alley.

2.15.2 Multi-Family and Non-Residential

Steel reinforced concrete driveways providing access to multi-family or non-residential uses shall have a minimum width of twenty four (24) feet and a maximum width of forty five (45) feet when measured at their narrowest point near, or at, the property line. The minimum radius for these uses shall be twenty-five (25) feet. Larger radii are encouraged. Limitations on permissible locations for these driveways are addressed in Section 2.6, Driveway Locations. Driveway radii returns shall not extend across abutting property lines. The drive aisles shall have a minimum width of twenty four (24) feet.

2.15.3 Grades

The change in grade between the roadway cross slope and the slope of the driveway apron is important to ensure a smooth, low speed turning maneuver. The maximum algebraic change in grade is shown in Table 2.4. An abrupt change in grade will cause the front bumper to drag on the surface of the street and driveway.

Table 2.4: Driveway Grades and Grade Change

Type	Max Grade	Max Algebraic Change in Grade
Residential	14%	12%
Non-Residential	8%	8%

When an algebraic change in grade occurs within a driveway of more than 4% vertical curve will be required. The minimum recommended lengths of vertical curve for the corresponding change in grade for driveway profiles are shown in Table 2.5. It is recommended to put a 2 foot vertical curve where ever the algebraic change in grade is less than 4%.

Table 2.5: Vertical Curve Lengths for Driveways

Algebraic Change in Grade	Minimum Length (ft)	
	Crest Curve	Sag Curve
< 4%	2	2
4% - 5%	5	6
6% - 8%	5	7
9% – 12%	6	8

All driveway profiles should be designed to accommodate a sidewalk crossing at a maximum allowable cross-slope of 2% in order to meet ADA requirements. A sidewalk crossing grade of 2% shall be incorporated into the driveway even if a sidewalk is not to be constructed at the same time.

Reference Figure 2.4 for driveway profiles on an upgrade and Figure 2.5 for driveway profiles on a downgrade. No downgrade driveways will be allowed for new development or construction. If an existing driveway with a downgrade already exists it shall be reconstructed to conform to Figure 2.5. All down grade driveways shall have a raise that must be equal to or above the top of curb elevation.

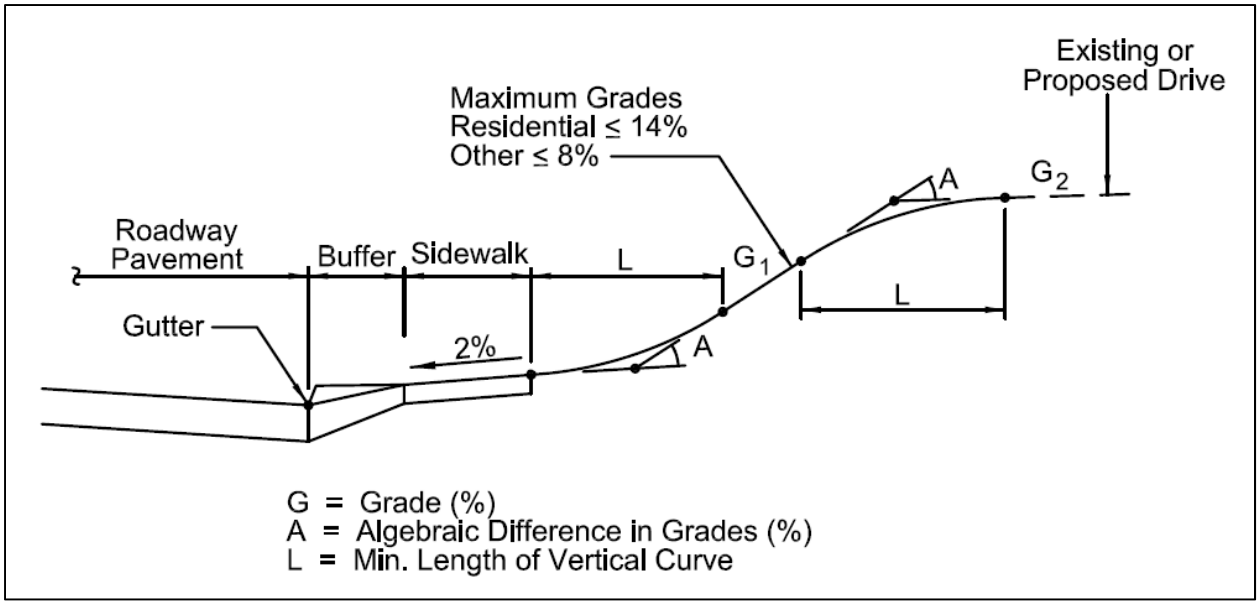

Figure 2.4: Driveway Profiles on an Upgrade

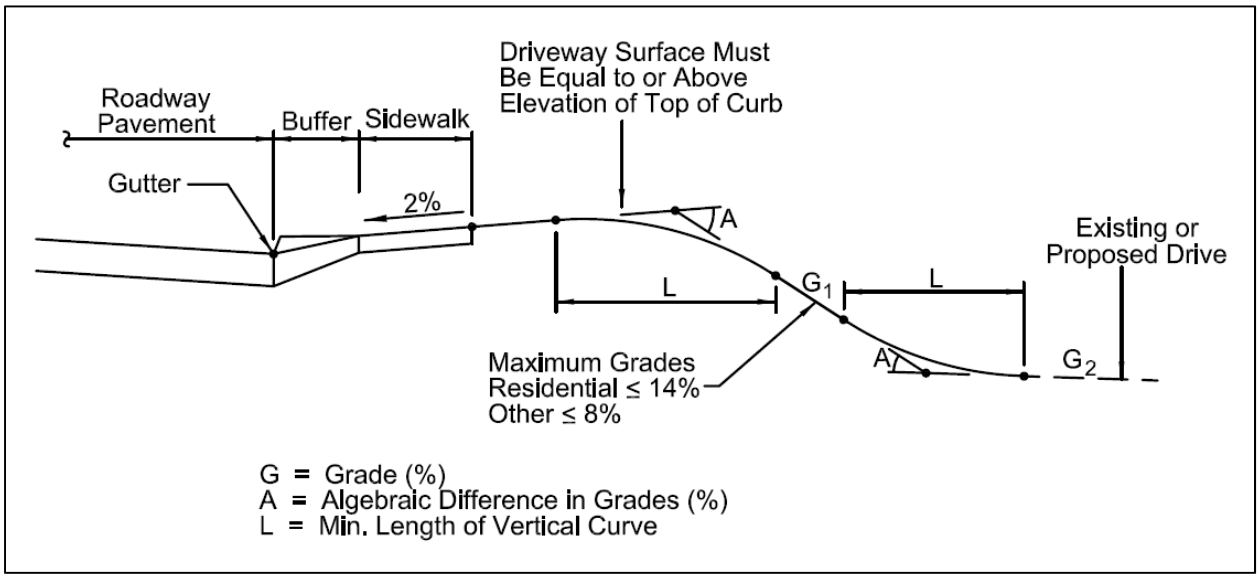

Figure 2.5: Driveway Profiles on a Downgrade

2.16 Traffic Information and Control Devices

Any work disturbing traffic on City streets shall require a signed and sealed traffic control plan by a Registered Professional Engineer in the State of Texas. All signage in City right-of-way shall conform to the Texas Manual of Uniform Traffic Control Devices.

The developer shall be responsible for and arrange for the installation of all pavement striping, regulatory, warning, guide, and school zone signs including posts, as shown on the plans or as directed by the City. Street name signs shall be installed at each intersection. Examples of regulatory, warning, information and guide signs are as follows:

A. Regulatory signs shall include, but are not limited to, STOP, 4-WAY, YIELD, KEEP RIGHT and speed limit signs.

B. Warning signs shall include, but are not limited to, DEAD END, NO OUTLET, DIVIDED ROAD, DIP, and PAVEMENT ENDS.

C. Guide signals shall include, but are not limited to, street name signs, DETOUR, direction arrow and advance arrow.

D. Traffic striping and buttons shall be provided by the developer as shown on plans or as directed by the City.

All signage within medians shall be break away pole bases.

2.16.1 Regulatory Signage

Regulatory signs should be used only where justified by engineering judgment. All signage plans shall be reviewed and approved by the City of Rockwall Engineering Department and be designed in accordance with the principles described in the current Texas Manual on Uniform Traffic Control Devices (TMUTCD).

All street and regulatory signage shall be installed, inspected and approved, prior to final acceptance of the project. This inspection typically takes place as part of the Engineering Department's final walkthrough. Any sign related issue/issues will be noted on the projects final punch list.

A. A detailed street and regulatory signage plan is to be submitted to the City of Rockwall Engineering Department. All signs shall be shown in the engineering plans for review and approval. The signage plan shall be shown on a separate signage & pavement marking layout sheet or as a part of the plan & profile sheet. The plan shall identify the specific sign

designation, size and location for each sign. Sign standards shall also be included in the engineering plans.

B. All signage installed shall comply with the current "*Texas Manual on Uniform Traffic Control Devices*" and the "*Standard Highway Sign Designs for Texas."* The sign layout drawings shall show the color and dimensions of all sign face legend components including background color, legend color, borders, symbols, letter size and style.

C. The developer shall be responsible for furnishing and installing all regulatory signage, warning signage and street name signage along with all necessary sign mounts in accordance with the approved engineering plans. A sample production sign shall be submitted to the Traffic Signs & Pavement Markings Supervisor for review and approval. The sample shall be directed to the City of Rockwall Service Center located at 1600 Airport Road, Rockwall Texas 75087. The sample sign must be submitted at least 10 days prior to the scheduled installation date.

D. For a street with a cul-de-sac end, a standard W 14-2a shall be mounted over the street name blade, if the cul-de-sac is not clearly visible from the adjoining roadway, or is located in excess of 400 linear feet from the adjoining roadway.

2.16.2 Street Name Blades

A. Street name sign blades shall be double-sided with rounded corners.

B. Street Name Blades shall be nine-inch (9") tall flat aluminum. The blades shall be 0.080 inches thick and be a minimum of 36" long.

C. The lettering for the street signs shall be 3M 3930 high Intensity prismatic material sheeting for street, regulatory and warning signs and shall be high intensity diamond grade type III prismatic. The street sign background shall be green and the legend shall be white.

D. The street sign blade must incorporate the current City of Rockwall logo. The logo shall consist of white Scotchlite Series 3930 high intensity prismatic material. (Product Code 3930)

E. Block Numbers are required on all street name blades and shall be located on the top right corner of the street blade.

F. The lettering for the street blades shall be composed of a combination of lower-case letters with initial upper-case letters. The Clearview TCAD-1W font shall be used. The lettering shall be composed of initial upper-case letters of at least 6 inches in height and lower case letters of at least 4.5

inches in height. For supplementary lettering to indicate the type of street (such as Street, Avenue or Road) shall be composed of initial upper-case letters at least 3-inches in height and lower-case letters at least 2.25 inches in height. Abbreviations may be used (for example St., Ave., or Rd) except the street name itself. The supplementary lettering shall be located at the lower right corner of the street blade, under the block number.

G. The street blade sign shall consist of green Scotchlite 3930 high intensity prismatic material background (product code 3937) and white Scotchlite 3930 high intensity prismatic material for the lettering (product code – 3930). The background sheeting shall be white 3M 390 high intensity prismatic material. The background material shall be applied to the full width and height of the sign blank leaving no metal exposed. The background material shall be one continuous piece of material. Patching of background material is not allowed and any sign with patching material of any type will be rejected by the City.

   Alternative Option:
   As an alternative, the foreground color may be green transparent Scotchlite ElectroCut1177 film (E.C. film). Lettering shall be cut out and removed producing a single continuous piece of green transparent film material.

2.16.3 Standard Street Sign Pole and Fixtures

A. Standard Street Sign Post – shall be 12’ long - minimum (2-3/8”) galvanized steel round post with a minimum of 60 mil wall thickness.

B. Standard Post Installation Depth – sign post shall be installed into solid ground to a minimum depth of 24-inches and anchored with a minimum of 60lbs of concrete.

C. Standard Post Bracket – shall be (18”) cast aluminum round post bracket street sign mount for bottom street blade.

D. Standard Top Crossing Bracket – shall be (12”) cast aluminum top crossing street sign bracket mount for top street blade.

E. Standard Mounting Bracket Assemblies – shall be (2-2/8”) diameter aluminum round post interlocking bracket x 2 per pole.

2.16.4 Decorative Sign Poles and Fixtures

The City of Rockwall will allow the installation of decorative signs and posts or other non-standard items by Developers/Homeowners Associations on a case-by-case basis provided that their installation does not result in an adverse

impact to the public safety and that there is no cost to the City for installation or maintenance. Residential developer requesting such installations will be required to give the recorded documentation of an incorporated Homeowner's Association (HOA) to the City. The City of Rockwall maintains only standard street and regulatory signs/post installed on public streets within its designated right-of-ways. The City of Rockwall does not maintain decorative sign poles and fixtures installed by developers or HOA.

If the developer elects to install non-standard decorative signs, sign poles and fixtures, the designated HOA must enter into a maintenance agreement with the City covering the hold harmless provisions. These provisions shall be noted on the approved final plat for the subdivision. The platted maintenance provisions will serve as the agreement and applies to all non-standard decorative signs, poles/post, hardware, or any other attachments. The City of Rockwall has no maintenance or other responsibility to these items. The ownership and maintenance of all such signs, poles and fixtures become the maintenance responsibility of the designated HOA.

Decorative Sign Pole/Fixture Submittals:

A detail of the decorative sign poles, pole fixtures and base mounting shall be included with the submittal of the civil engineering construction plans. The submittal shall also include a street/site plan indicating the location and identification of all proposed signage and post to scale.

HOA Maintenance - Responsibilities and Provisions:

A. The HOA is responsible for maintaining all non-standard decorative signs, poles/post, hardware, attachments or other approved non-standard items under this agreement. The City of Rockwall has no maintenance or other responsibility to these items. The City of Rockwall and the HOA agree the Association will bear any and all maintenance cost related to the said improvements. The City has the statutory authority to install and maintain traffic control devices for vehicular traffic on public streets/roads within the city limits of the City of Rockwall, Texas. This agreement in no way constitutes a change in that authority and does not constitute any delegation of this authority to the Association.

B. The City of Rockwall reserves the right to install temporary replacement signs using standard sign post mounting or alternate temporary mounting when decorative sign posts and signs are damaged. Routine maintenance/replacement of damaged signs, posts and any sign mounting backboard/trim/hardware or other fixtures is the sole responsibility of the HOA and must be repaired within 4 weeks of reporting to the HOA.

C. The City of Rockwall will not handle, store or be responsible for any decorative non-standard sign, post or associated fixtures installed under this agreement.

D. All signs (regulatory and warning) shall be in conformance with the "Texas Manual on Uniform Traffic Control Devices" (Texas MUTCD) and the "Standard Highway Sign Designs for Texas."

E. Sign posts must be of sufficient height to mount the sign in conformance with the current (Texas MUTCD) requirements. Most typical installations require a vertical clearance of 7 feet from the bottom edge of the sign to the ground surface. Overhead signs must conform to all required standards.

F. Signs/posts must be installed in locations as provided in the approved engineering/construction plans or as otherwise approved by the City of Rockwall. On occasion, it may be necessary to re-locate signage/poles based engineering judgment, study or when otherwise deemed necessary by the City.

G. The City of Rockwall reserves the right to approve or disapprove any sign/pole design and/or location. The City of Rockwall must approve the color of signposts and any requested sign mounting/trim.

2.16.5 Miscellaneous

Street address markers shall be installed for each lot in the subdivision. The markers shall be located at the center of the lot on the face of the curbs. The address markers shall have a deep green background with reflective white numbers. The number size shall be four (4) inches in height. The background of the address marker shall be eighteen (18) inches in length and from the top of curb to the gutter flow line. The address marker shall show the full numerical portion of the address of the lot.

All signage for multifamily, commercial, retail and industrial developments are required to have a separate permit from the building department. Signs, including any overhangs, are not allowed in any right-of-ways and/or easements. Location of any signage is not approved on engineering plans

2.17 Temporary Traffic Control

When the normal function of the roadway is suspended through closure of any portion of the right-of-way, temporary construction work zone traffic control devices shall be installed to effectively guide the motoring public through the

area. Consideration for road user safety, worker safety, and the efficiency of road user flow is an integral element of every traffic control zone.

All traffic control plans shall be prepared and submitted to the Engineering Department in accordance with the standards identified in Part VI of the most recent edition of the TMUTCD. Lane closures will not occur on roadways without an approved traffic control plan. Traffic control plans shall be required on all roadways as determined by the City Engineer or the designated representative.

All traffic control plans must be prepared and signed and sealed by an individual that is licensed as a professional engineer in the State of Texas. All traffic control plans and copies of work zone certification must be submitted for review and approval a minimum of three (3) weeks prior to the anticipated temporary traffic control.

The contractor executing the traffic control plan shall notify all affected property owners two (2) weeks prior to any the closures.

Any deviation from an approved traffic control plan must be reviewed by the City Engineer or the designated representative. If an approved traffic control plan is not adhered to, the contractor will first receive a verbal warning and be required to correct the problem immediately. If the deviation is not corrected, all construction work will be suspended, the lane closure will be removed, and the roadway opened to traffic.

All temporary traffic control devices shall be removed as soon as practical when they are no longer needed. When work is suspended for short periods of time at the end of the workday, temporary traffic control devices that are no longer appropriate shall be removed or covered. The first violation of this provision will result in a verbal warning to the construction foreman. Subsequent violations will result in suspension of all work at the job site for a minimum of 48 hours. All contractors working on City funded projects will be charged one working day for each 24 hour closure.

Lane closures on any major or minor arterial will not be permitted between the hours of 6:00 am to 9:00 am and 4:00 pm to 7:00 pm. Where lane closures are needed in a school area, they will not be permitted during peak hours of 7:00 am – 9:00 am and 3:00 pm to 5:00 pm. Closures may be adjusted according to the actual start-finish times of the actual school with approval by the City Engineer. The first violation of this provision will result in a verbal warning to the construction foreman. Subsequent violations will result in suspension of all work at the job site for a minimum of 48 hours. All contractors working on City funded projects will be charged one working day for each 24 hour closure of a roadway whether they are working or not.

2.18 Street Lighting

All developments shall provide streetlights. In general, lights should be located at street intersections and at intervals no greater than four hundred (400) feet apart. Street lights shall be centered one and half (1 ½) feet off the back of curb.

2.19 Barrier Free Ramps

Barrier free ramps shall be provided in all commercial areas and in residential areas which have sidewalks. Ramps shall be located to provide access in accordance with the standards set by the Texas Department of Licensing and Regulation (TDLR) at all pedestrian sidewalks. Laydown curbs and ramps shall be constructed at all street intersections and driveways whether or not sidewalks are being installed. Laydown curbs and ramps shall be constructed by the developer. Barrier free ramps shall have truncated dome plates in the color approved by the City. No truncated dome pavers or ridges allowed.

2.20 Off-Street Parking

All parking areas and spaces shall be designed and constructed of steel reinforced concrete in accordance with the following requirements:

1. All parking areas and spaces shall be designed and constructed of steel reinforced concrete so as to have free ingress and egress at all times.

2. No parking space or parking area shall be designed so as to require a vehicle to back into a public street or across a public sidewalk, except in the case of one and two family dwelling units.

3. Minimum Dimensions for Off-Street Parking:

   a) Ninety-degree parking (Figures 2.6a and 2.6b) – All parking spaces shall be a minimum of nine (9) feet in width. Each parking space adjacent to a building shall not be less than twenty (20) feet in length. Dual head in parking spaces should be a minimum of twenty (20) feet in length. Parking spaces not adjacent to a building or dual head may be eighteen (18) feet in length with two (2) feet of clear (no obstruction including landscaping, lighting, wheel stops, and/or signage) over hang between curb and sidewalk or property line. Maneuvering space shall not be less than twenty-four (24) feet.

   b) Sixty-degree angle parking (Figures 2.7a and 2.7b) – Each parking space shall be not less than nine (9) feet wide perpendicular to the parking angle nor less than twenty and one tenth (20.1) feet in length when measured at right angles to the building or parking line. Maneuvering space shall be not less than fourteen and one half (14 ½)

feet for one way traffic or twenty two (22) feet for two way traffic perpendicular to the building or parking line.

c) Forty-five degree angle parking (Figures 2.8a and 2.8b) – Each parking space shall not be less than nine (9) feet wide perpendicular to the parking angle nor less than nineteen (19) feet in length when measured at right angles to the building or parking line. Maneuvering space shall be not less than twelve (12) feet for one way traffic or twenty-one (21) feet for two-way traffic perpendicular to the building or parking line.

d) Parallel Parking – Each parking space shall not be less than nine (9) feet in width and twenty-two (22) feet in length. Maneuvering space will not be less than twenty (20) feet.

e) Handicap Space Parking – Where handicapped parking is required or installed, the design shall be as in Figure 2.9.

f) When off-street parking facilities are provided in excess of minimum amounts herein specified, or when off-street parking facilities are provided, but not required by this chapter, said off-street parking facilities shall comply with the minimum requirements for parking and maneuvering space herein specified.

g) Each parking space/stall shall be striped to the minimum dimension detailed out above in this section.

h) No dead-end parking shall be allowed for more than six (6) parking spaces. A minimum turnaround of a 15 feet wide by 64 feet long or a cul-de-sac shall be provide and striped off as “No Parking”. If there are less than six (6) parking spaces a 24 feet by 15 feet would be allowed and would need to be signed as “No Parking”.

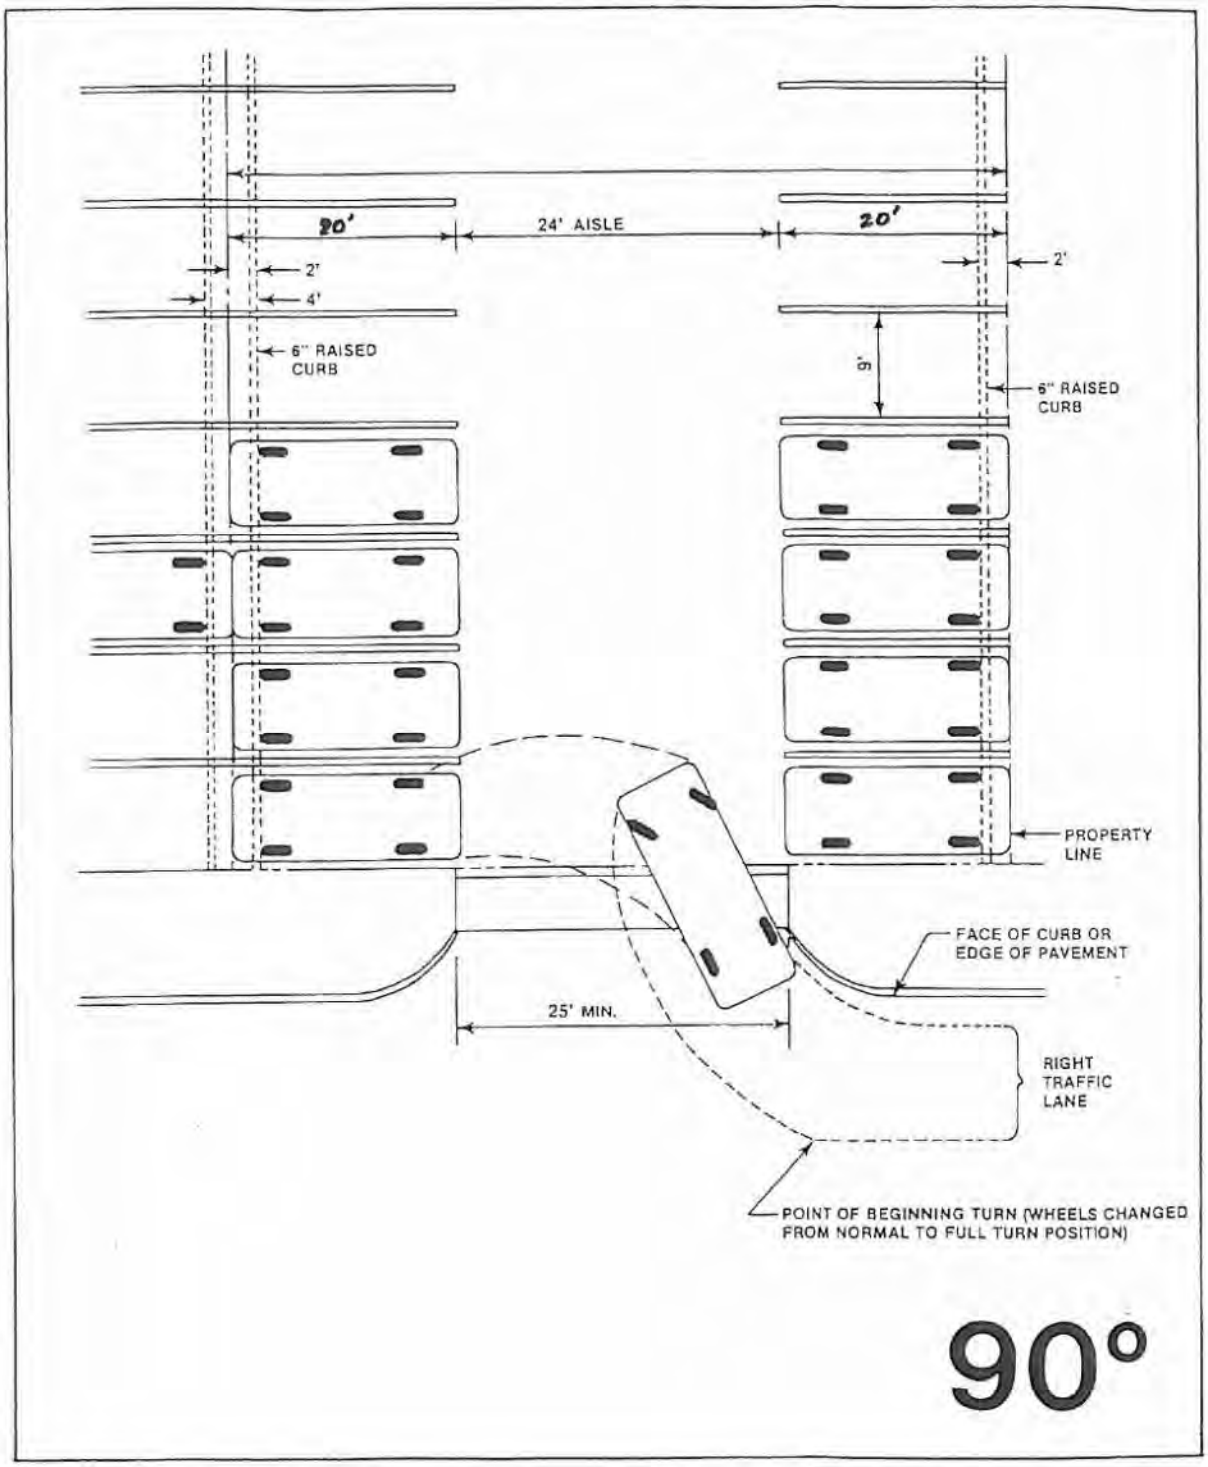

Figure 2.6a: 90° Parking – Double Row

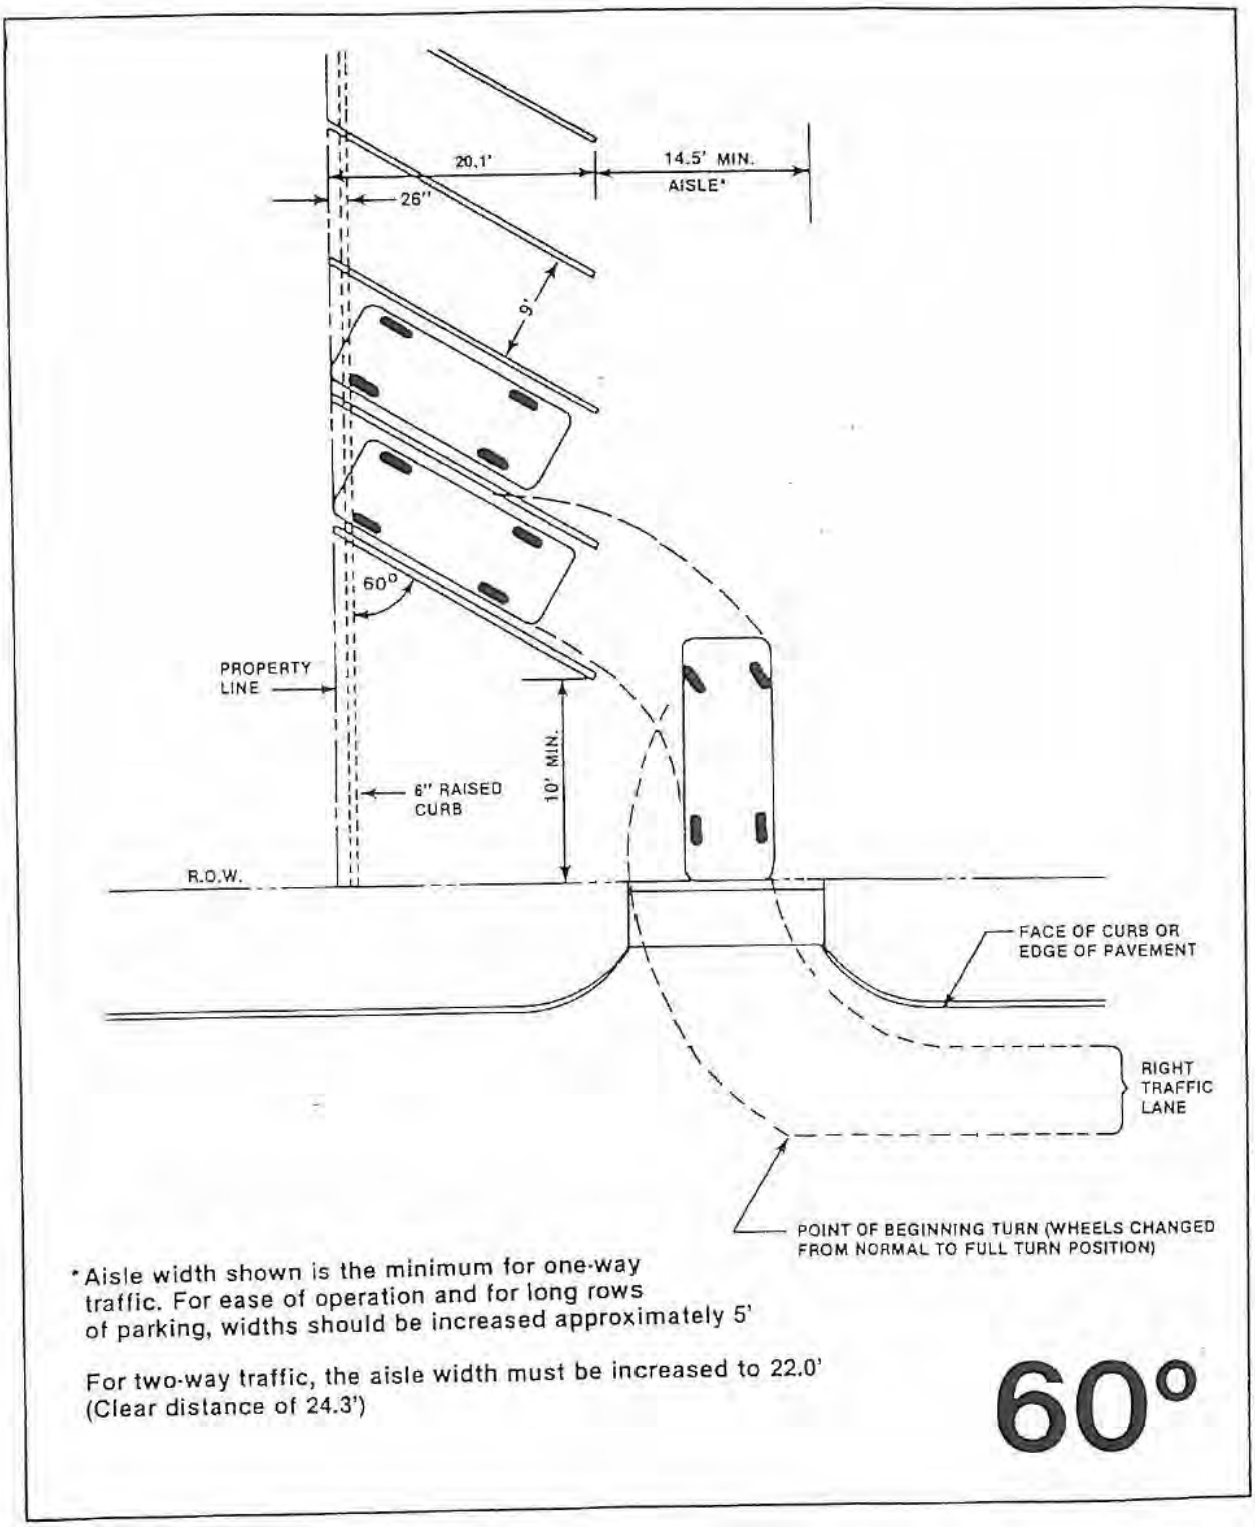

Figure 2.7b: 60° Parking Single Row

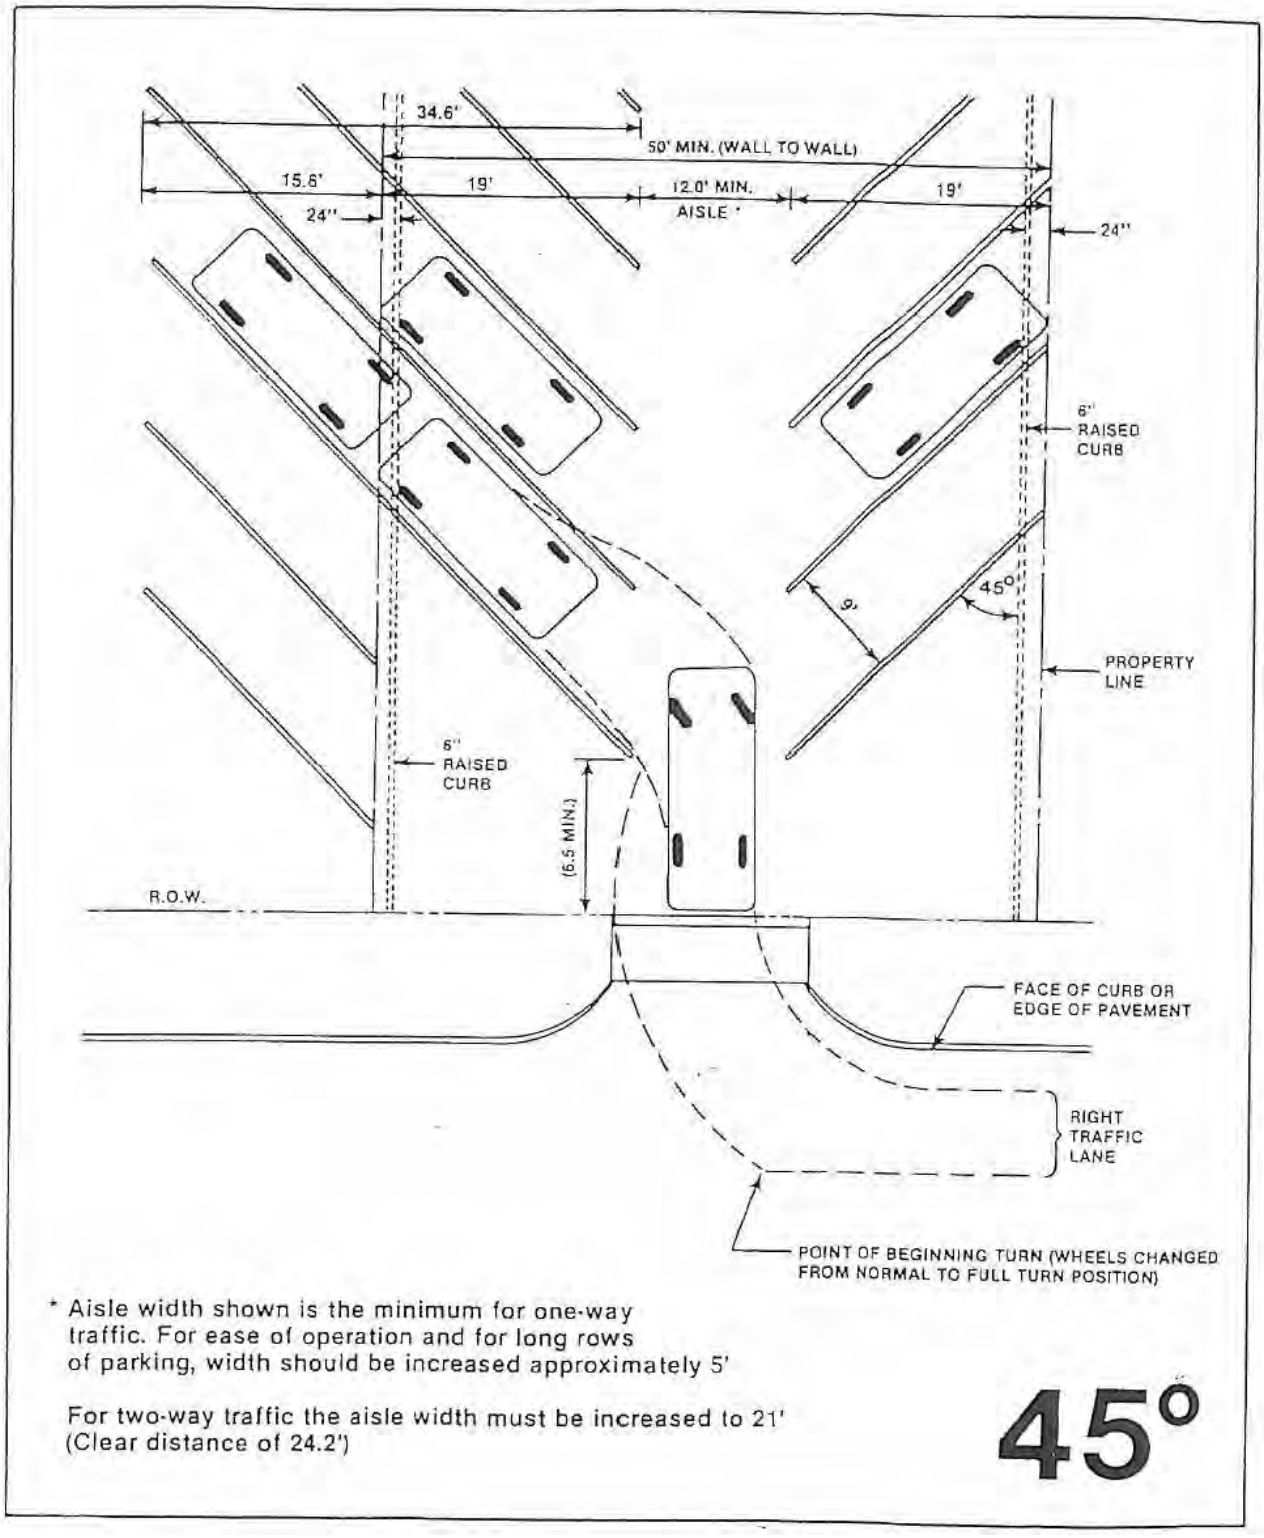

Figure 2.8a: 45° Parking - Double Row

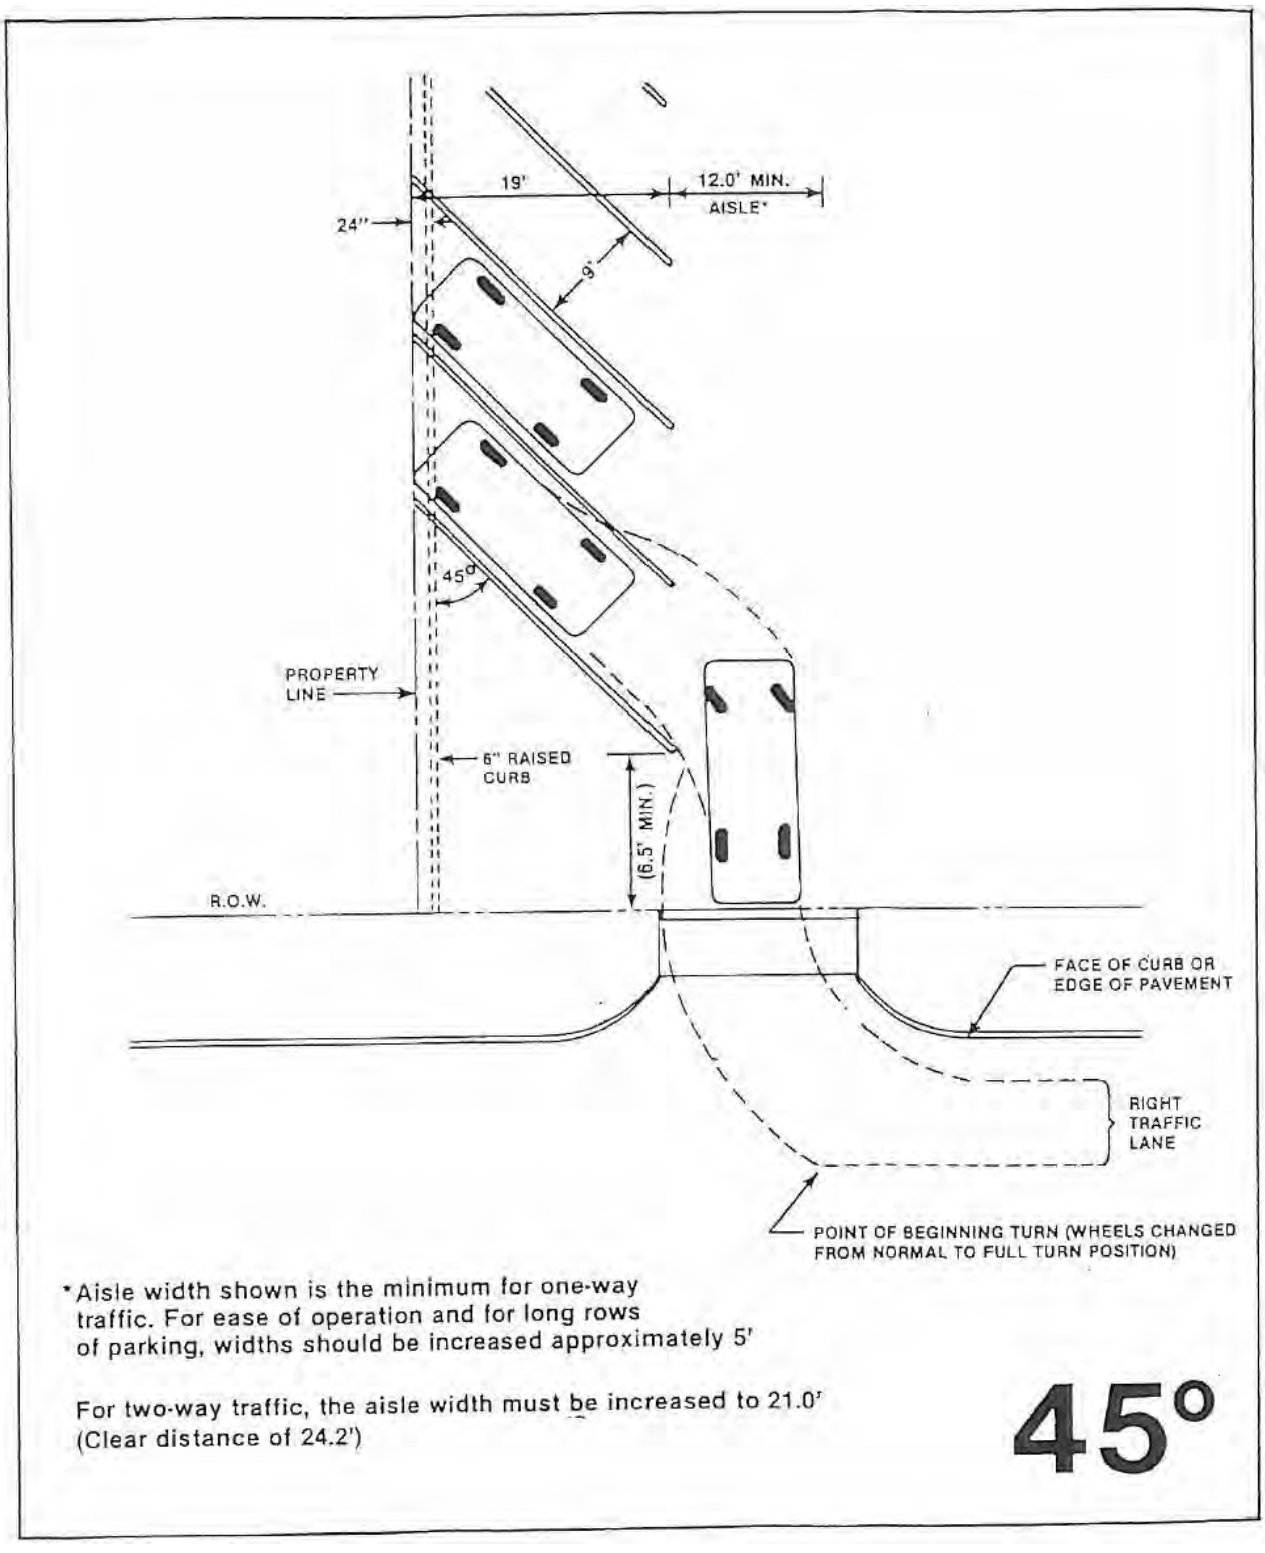

Figure 2.8b: 45° Parking – Single Row

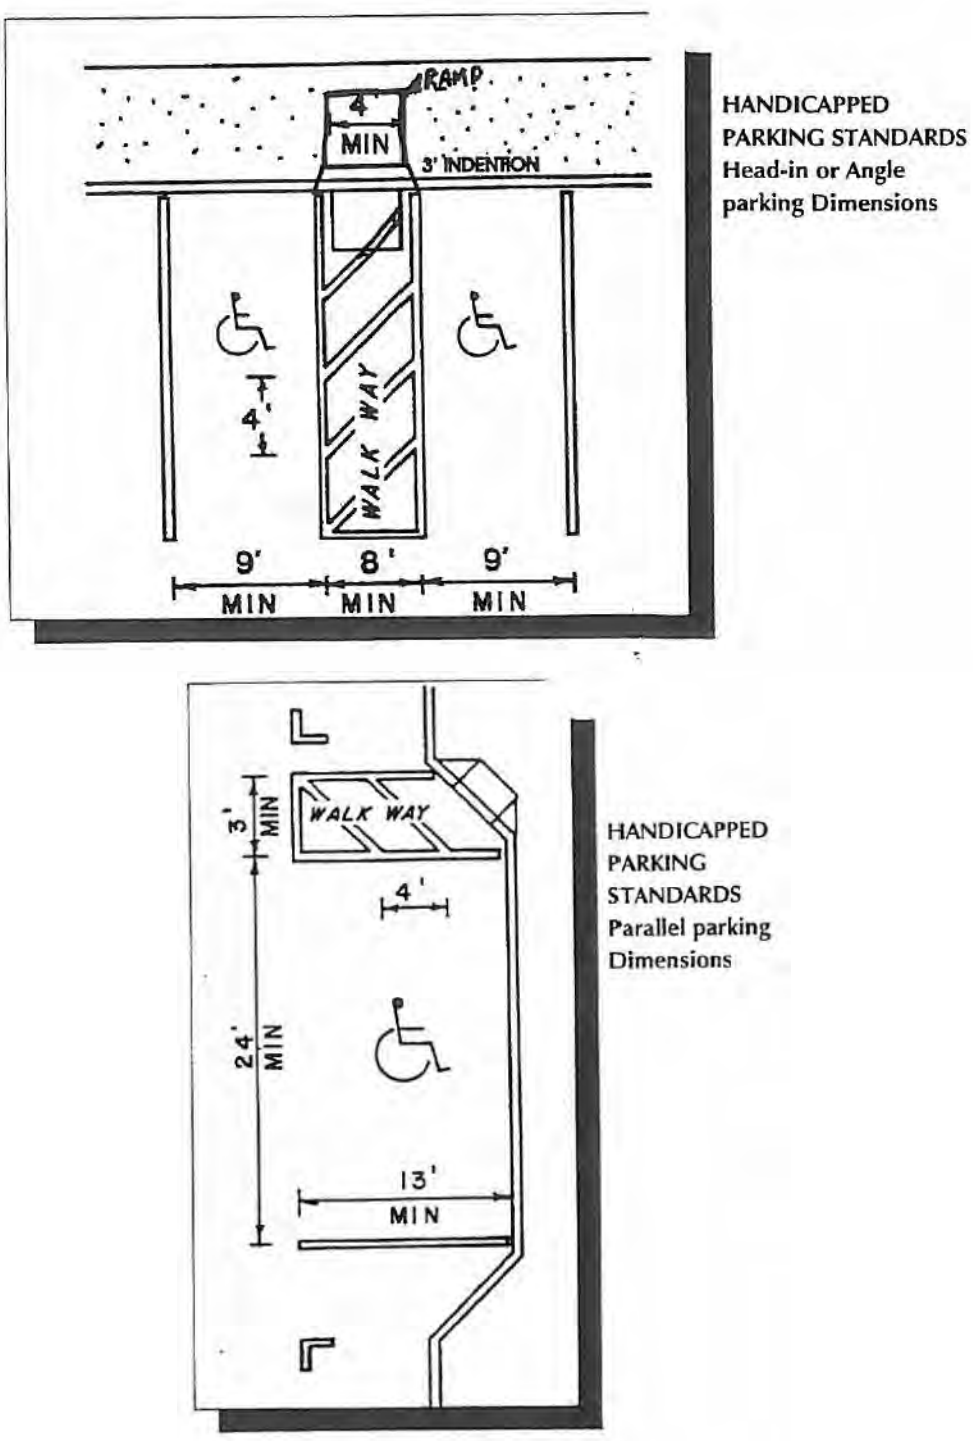

Figure 2.9: Handicap Space Parking

4. Paving Standards:

   a) Unless otherwise approved by the City Council or as specified in these standards, all parking lots shall be paved with steel reinforced concrete and designed according to City standards and specifications. The parking lanes must be clearly marked by approved paint, buttons or other material.

   b) All driveway approaches shall be constructed of steel reinforced concrete in the same strength, thickness, and reinforcing as the adjacent street and shall be curbed per City standards.

   c) All parking lot pavement and drive aisles shall be steel reinforced concrete except for existing asphalt parking lots being rehabilitated. A steel reinforced concrete or asphalt pavement (rehabilitated parking lots) design shall be provided to the City Engineer for review and approval.

   d) Industrial and commercial parking lot pavement shall be steel reinforced concrete and designed by a Professional Engineer. Pavement design shall be submitted to the City for approval.

   e) The pavement within a designated loading area shall be designed and constructed to carry the additional loading of merchandise, goods, sanitation pick-up, etc., in order to prevent any unnecessary failure in the pavement itself. The pavement design shall be included in the engineering construction plans and specifications and submitted to the City Engineer for approval. The pavement design is shall designed by a Geotechnical Engineer.

   f) Fire lane shall have a maximum running slope of ten (10) percent and a cross slope of five (5) percent. A vertical curve is required for grade breaks greater than one (1) percent.

5. Dead end parking shall be designed and constructed with a minimum length of fifteen (15) feet and width of twenty-four (24) feet turnaround space provided at the end of the dead end parking area.

6. If a portion of an existing street is removed for construction, the entire concrete panel must be removed and replaced with the same strength steel reinforced concrete and one (1”) inch thicker than the existing thickness.

7. All entrances or exits in a parking lot shall be a minimum of thirty (30) feet from the beginning point of any corner radius.

8. All entrances or exits in a parking lot shall be a minimum of twenty-four (24) feet and a maximum of forty-five (45) feet in width, unless one-way, in which

case they shall both be a minimum of twelve (12) feet, or as approved by the City Council.

9. No parking areas or parking spaces shall be allowed to pave over or utilize public right-of-way, with the exception of approved entrances and exits, unless the City Council grants an exception and/or a facilities agreement.

10. All multi-family and commercial parking areas and parking spaces shall be designed and constructed to protect adjacent residences from the direct glare of headlights of vehicles using the parking area.

11. No City street curb, alley or street pavement may be cut without a permit from the City.

12. If required, the contractor shall submit a traffic control design to the City of Rockwall Engineering Department prepared by a registered professional engineer prior to beginning of construction. The contractor shall provide signs and barricades in construction areas and comply with the Texas Department of Transportation standard of work zone traffic control. Employees exposed to public vehicular traffic, shall be provided with and wear warning vest or other suitable garments marked with or made of reflective or high visibility material. The contractor shall provide flagman when working inside an active street right-of-ways where necessary.

2.21 Traffic Impact Analysis and Mitigation

2.21.1 Purpose

The purpose of a Traffic Impact Analysis (TIA) is to assess the effects of specific development activity on the existing and planned thoroughfare system. Development activity may include, but is not limited to, rezoning, preliminary site plans, site plans, preliminary plats, driveway permits, certificates of occupancy, and Thoroughfare Plan amendments.

2.21.2 Determination of Applicability

The need for a TIA shall be determined by the City based upon the results and recommendation from a pre-development meeting. It shall be the responsibility of the applicant to demonstrate that a TIA should not be required. If a TIA is required, the level of effort for a TIA submission shall be determined based on the criteria set forth in Table 2.6.

2.21.3 Applicability of TIA Requirements

A. Zoning, Site Plan and Platting – These TIA requirements shall apply to all requests for land use changes which will establish a land use that is deemed to be more intense than the land use depicted on the Land Use

Plan contained within the Comprehensive Plan for a particular property. Applicable requests will also include zoning, site plan, and platting cases, Thoroughfare Plan amendments, and/or where deemed necessary by the City Engineer, Director of Planning and Zoning, the Planning and Zoning Commission, or the City Council. Special circumstances -- *including but not limited to development with no case history* -- may also require a TIA.

B. Development – These TIA requirements shall apply to all development requests for land uses, except single-family residential developments, which will generate over 100 total trips during the AM or PM peak hour. Applicable development requests include all development related applications. Special cases, in which site generated peak hour trip activity is different from that of the adjacent street (weekdays 7:00-9:00 a.m. and 4:00-6:00 p.m.), may require an additional separate analysis. Such circumstances may include, but are not limited to, the establishment of commercial/retail, entertainment or institutional developments or activity. The TIA requirement may be waived for a development request if a TIA was performed previously with the zoning request and the conditions listed in the report are still current.

    I. Single-Family Residential Exception – A TIA for single-family residential development will not be required if the development contains fewer than six (6) dwelling units unless special circumstances exist, as determined by the City Engineer and/or Director of Planning and Zoning. These special circumstances may include, but are not limited to, impacts to other residential developments from cut-through traffic, inadequate site accessibility, the construction or delay of construction of a thoroughfare prior to or after the anticipated date of construction resulting from a proposed development, or the street or access system not being anticipated to accommodate the expected traffic generation.

C. Depending upon the specific site characteristics of the proposed development, one or more of the following elements may also be required as part of the TIA: an accident analysis, sight distance analysis, traffic simulation, traffic signal warrant analysis, queuing analysis, right/left-turn lane analysis, access spacing analysis, link capacity analysis, and/or traffic circulation plan.

City of Rockwall
The New Horizon

Table 2.6: Criteria for Determining TIA Study Requirements

Analysis Category	Criteria	TIA Analysis Periods[1]	Study Area[4]
I	Projected site generated ADT of 750 OR Projected site generated peak hour trips of 100 per hour AND No significant modification of traffic signals or roadway geometry proposed	1. Existing year 2. Opening year[2]	1. All driveway access points, adjacent roadways, and major intersections 2. All signalized intersections on each street serving the site within ¼ mile of the site boundary
II	Projected site generated ADT of 751-2,000 OR Projected site generated peak hour trips of 101-250 per hour OR Installation or modification a traffic signal or roadway geometry proposed, regardless of project size	1. Existing year 2. Opening year[3] 3. Five years after completion	1. All driveway access points, adjacent roadways, and major intersections 2. All signalized intersections and major unsignalized intersections on each street serving the site within ½ mile of the site boundary
III	Projected site generated ADT exceeds 2,000 OR Projected site generated peak hour trips exceeds 250 per hour OR Installation or modification of two or more traffic signals, addition of travel lanes, or modification of interchange proposed, regardless of project size	1. Existing year 2. Opening year[3] 3. Five years after completion	1. All driveway access points, adjacent roadways, and major intersections 2. All signalized intersections and major unsignalized intersections on each street serving the site within 1 mile of the site boundary

1. Analysis periods shall include build and no-build scenarios. Assume full occupancy for each phase as they open.
2. Assume full build-out and occupancy.
3. Additional analysis periods relating to completion of interim phases may be considered for phased developments to support delaying construction of planned mitigations until future phases are constructed. Assume full build-out and occupancy of each particular phase
4. The City may enlarge or reduce the study area depending on the project. This is meant to provide general guidance to the developer. Land uses within the study area should include recently approved or pending development adjacent to the site.

2.21.4 Requirements for TIA Updates

A TIA shall be updated when the time or circumstances of the original study fall within the parameters presented in Table 2.7. The applicant is responsible for the preparation and submittal of appropriate documentation in order for City staff to process the zoning or development application. A TIA for site development requests must be updated if two (2) years have passed since the original submittal and/or approval, or if existing or assumed conditions have changed within the defined study area.

Table 2.7: Criteria for Determining TIA Update Requirements

Original TIA Report was based on:	Changes to the Originally Proposed Development:	
	Access Changed[1] OR Trip Generation Increased by more than 10%	Access Not Changed AND Trip Generation Increased by less than 10%
Zoning; or Preliminary Site Plan or Site Plan that is less than 2 years old	Letter Amendment Required: Identify and report only analysis conditions that have changed	Letter Documenting Change (No analysis is required)
Preliminary Site Plan or Site Plan that is more than 2 years old	Prepare New Study. Must meet all current TIA requirements	Prepare New Study. Must meet all current TIA requirements.

1. Changed access includes proposed new access or refinement of general access locations not specifically addressed in original proposed development.

2.21.5 Funding Resources

A. The Developer will be responsible for all costs related to the design, construction and implementation of all recommended mitigations that have been accepted and deemed required by the City Engineer, not otherwise funded by other government agencies. The City Engineer may require consideration of alternative mitigation options that may not have been included in the TIA.

B. The TIA may take into account the city/state/county approved traffic improvements with dedicated funding. Prior to issuance of a Certificate of Occupancy (CO) permit, the Developer shall complete any required traffic improvements approved by the City as a result of the development which have not been funded or otherwise completed by government agencies. The City may approve delaying the construction of required improvements based on the development's phasing.

2.21.6 Responsibility of TIA Preparation and Review

A. A TIA shall be prepared in accordance with all of the guidelines in this section and submitted in accordance with the Development Review Schedule set by the City. The responsibility for TIA preparation shall rest with the applicant and must be performed by a Professional Engineer (P.E.) licensed in the State of Texas with experience in traffic and transportation engineering. The final TIA report must be signed and sealed by the P.E. responsible for the analysis to be considered for review by the City. Application and review fees are due at the time of each submittal. City staff and consultants shall serve primarily in a review and advisory capacity and will only provide data to the applicant when available.

B. It shall be the responsibility of the applicant to submit two (2) printed and one (1) electronic PDF draft TIA reports and executive summaries prior to the zoning and/or development request submission. The proper number of reports, the timing for submission, and the review of these reports shall be based on standard City development review procedures. Incomplete TIAs or failure to submit a TIA prior to the submission shall delay consideration of zoning and development requests. Should it be determined during the review of any zoning and/or development plans that a TIA is required, consideration shall be deferred until the applicant submits a completed TIA, the TIA has been reviewed, and the City has approved the TIA.

C. The City and/or the City's consultant shall review the TIA and provide comments to the applicant. It shall be the responsibility of the applicant to submit two (2) printed and one (1) electronic PDF finalized TIA reports and executive summaries once all review comments have been addressed. Electronic submission may substitute for the required hard copies only with written authorization of the City Engineer.

2.21.7 TIA Standards

A. Capacity Analysis – A capacity analysis for appropriate peak periods shall be conducted for all driveways, intersections, and streets identified during the pre-development meeting. Capacity calculations shall include both near term and long-term projections. Capacity calculations must be based on the operational analysis technique contained in the most current edition of the Highway Capacity Manual (HCM). Alternative calculations must be approved by the City Engineer.

B. Design Level of Service – The minimum acceptable level of service (LOS) within the City shall be defined as LOS "D" in the peak hour for all critical movements/intersections and links. All development impacts on both thoroughfare and intersection operations must be measured against

this standard.

C. Trip Generation Resources – The City's standard for trip generation rates for various land use categories shall be those found in the latest edition of *Trip Generation Manual* published by the Institute of Transportation Engineers (ITE) or other published or recognized sources applicable to the region. Alternate trip generation rates may be accepted on a case-by-case basis if the applicant can provide current supporting data substantiating that their development significantly differs from the ITE rates. The City and/or City's consultant must approve alternative trip generation rates in writing in advance of the TIA submission.

D. Trip Reductions – Trip reductions for pass-by trips and mixed-use developments will be permitted, subject to analytical support provided by the applicant and approved by the City and/or the City's consultant on a case-by-case basis. Assumptions relative to automobile occupancy, transit mode share, or percentage of daily traffic to occur in the peak hour must be documented and will be considered subject to analytical support provided by the applicant.

E. Study Horizon Years – The TIA must evaluate the impact of the proposed development on both existing traffic conditions and future traffic conditions for the horizon year(s) as specified in Table 2.6. Horizon year(s) are defined as any analysis year beyond the existing year. These applications should take into account the Master Thoroughfare Plan or pending amendments.

F. Traffic Data Collection – Appropriate traffic counts shall be collected. These shall include weekday/weekend daily and peak-hour traffic counts at all locations as directed by the City, Weekday counts shall be taken on a typical Tuesday, Wednesday or Thursday unless other days are required/approved. Peak-hour intersection turning movement counts shall include 15-minute increments. Traffic counts used in a TIA shall be less than one (1) year old and should occur outside of holiday time periods and when public schools are in session unless otherwise approve by the City Engineer. The City Engineer may request additional counts based on specific conditions. The existing counts shall be presented in figures/exhibits for each intersection counted with original data sheets provided in the Appendix.

G. Design Standards – The TIA must evaluate site access characteristics including, access spacing requirements, left/right-turn lane requirements, visibility and sight distance requirements, as needed, relative to City of Rockwall and Texas Department of Transportation (TxDOT) requirements, as appropriate. Any TIA with access to a TxDOT facility must meet TxDOT minimum standards and requirements.

H. Traffic Signal Timing and Phasing – The analysis of all existing traffic signals shall be based on the most current signal timing plans, if available. When signal timing plans are not available the assumed signal timing shall be based on field observations, actuation/detection capabilities and corridor coordination and offsets.

2.21.8 TIA Methodology

A. Site Location/Study Area – A brief description of the size, general features, and location of the site, including a map of the site in relation to the study area and surrounding vicinity. The description should include all existing and proposed traffic control devices within the study area, posted speed limits on all existing, adjoining or impacted roads, pedestrian facilities, intersection layout, and lane usages. If applicable to the project, information may also include lane widths and right of way widths for all existing roads impacted by the development. Photographs may be included to document existing transportation conditions;

B. Existing Zoning – A description of the existing zoning for the site and adjacent property, including land area by zoning classification and density by Floor Area Ration (FAR), square footage, number of hotel rooms, and dwelling units, etc. (as applicable);

C. Existing Development – A description of any existing development on the site and adjacent to the site. If applicable, include impacts to existing development.

D. Site Access – A description or illustration of the existing and proposed site access points and associated turn lanes and/or median openings, including cross-section, lane assignment, turn restrictions, throat width, curb radii, turn-lane requirements, sight distance calculations and access spacing conditions;

E. Proposed Zoning/Site Development – A description of the proposed zoning/development for the site, including land area by zoning classification and density by FAR, square footage, number of hotel rooms, and dwelling units, etc. (as applicable); identify recently approved or pending land uses within the area;

F. Thoroughfare System – A description and/or map of existing planned/proposed thoroughfares and traffic signals for horizon year(s) within the study area;

G. Model Assumptions and Design Factors – The roadway network must be modeled as accurately as possible using field data measurements, industry standards and engineering judgement. This includes, but is not limited to, intersection/roadway segment geometries, traffic flow characteristics and traffic signal phasing and operations;

H. Existing Traffic Volumes – Recent traffic counts for the study area including pedestrian and bike volumes where appropriate;

I. Projected Traffic Volumes – Background traffic projections within the study area for the horizon year(s). Background traffic projections shall include the growth in regional traffic as well as the traffic that will be generated by the undeveloped land adjacent to the site and/or within the study area that is likely to develop by the horizon year(s), as determined by the City Engineer and/or City's Consultant. These traffic projections shall be based upon recently approved development applications, the current zoning on the undeveloped land, the City's Future Land Use Plan or the requested future land use of the development;

J. Density of Development – A table displaying the amount of development assumed for existing zoning and/or the proposed development (using gross floor area, dwelling units, occupied beds, etc., as required by the trip generation methodology);

K. Existing Site Trip Generation – A table displaying trip generation rates and total trips generated by land use category for the appropriate peak hours and on a daily basis for each phase and full development based on existing zoning (if applicable), and including all appropriate trip reductions (as approved by the City and/or City's consultant);

L. Proposed Site Trip Generation – A table displaying trip generation rates and total trips generated by land use category for the appropriate peak hours and on a daily basis for each phase and full development based on existing zoning (if applicable) and/or proposed development, and including all appropriate trip reductions (as approved by the City and/or City's consultant);

M. Net Change in Trip Generation (for rezoning cases) – Proposed trip generation minus existing trip generation (if applicable); the net increase in trips to be added to base volumes for the design year;

N. Trip Distribution and Traffic Assignment – Tables and/or figures/exhibits of trips generated by the proposed development (or net change in trips, if applicable) added to the existing and projected volumes, as appropriate, with distribution and assignment assumptions, unless computer modeling has been performed. Each step of the procedure should be clearly shown in enough detail so that all calculations can be verified;

O. Level of Service Evaluations – Capacity analyses for appropriate peak hours for both existing conditions and horizon year(s) projections for intersections, thoroughfare links, median openings and turn lanes associated with the site, as applicable. Results of the capacity analyses must be summarized in exhibits and/or tables for each analysis period

and scenario providing the level of service designation and average control delay for each intersection overall and for each major lane group as applicable. Volume-to-capacity ratio and 95th percentile queues should be provided for all movements found to operate at a deficient level of service;

P. Intersection Control Evaluations – The need for new intersection controls (i.e. traffic signals, all-way stop control) shall be based on warrants and include their impact on the performance of the transportation system;

Q. Evaluation of Proposed/Necessary Mitigation – Capacity analyses for appropriate peak hours for intersections, thoroughfare links, median openings and turn lanes associated with the site under proposed/necessary traffic mitigation measures;

R. Conclusions – Identification of all thoroughfares, driveways, intersections, and individual movements that exceed LOS D or and any operational problems likely to occur;

S. Recommendations – Identify and summarize any necessary roadway improvements and time frames for improvements to occur. Include any intersections, turn lanes, etc which will not be improved to LOS D or better and support for why improvements are not provided. Mitigation measures should be consistent with Traffic Impact Mitigation section below;

T. Other information required for proper review – As requested by the City Engineer and/or the City's consultant.

2.21.9 TIA Report Format

A. The TIA report must be prepared on 8½" x 11" sheets of paper. However, it may contain figures/exhibits on larger sheets, provided they are folded to this size. All text and map products shall be computer-based and provided in both published format and computer file format (PDF). In addition, all electronic files used as part of the traffic analysis (i.e., Synchro, HCS, Passer II/III, CORSIM, VISSIM, ARCADY, etc.) shall be provided.

B. Traffic volumes must be illustrated on prepared figures/exhibits depicting appropriate movements at each study intersection. This includes, existing and horizon year(s) (i.e. projected background traffic volumes, site generated traffic volumes, background + site generated).

C. The sections of the TIA report should be categorized according to the outline shown below:

I. Executive Summary
II. Introduction
    a. Purpose & Overview of Study
III. Existing Conditions
    a. Site Location/Study Area
    b. Existing Zoning/Development
    c. Study roads/streets and intersections
    d. Traffic Volumes
IV. Proposed Development
    a. Zoning, phasing, densities, etc.
    b. Site Trip Generation
    c. Net Change in Trip Generation (if applicable)
    d. Trip Distribution and Traffic Assignment
V. Projected Volumes
    a. Background Volumes
    b. Background + Site Volumes
VI. Analysis
    a. Level of Service Evaluations
    b. Warrant studies (as applicable)
    c. Link Capacity (as applicable)
    d. Sight Distance (as applicable)
    e. Access Spacing (as applicable)
    f. Left-turn/Right-turn Lanes (as applicable)
    g. Accident (as applicable)
    h. Queuing (as applicable)
    i. Mitigations
VII. Summary/Conclusions
VIII. Recommendations
IX. Appendices

2.21.10 Traffic Impact Mitigation

A. Mitigation of traffic impacts shall be required if the proposed development would cause a facility or traffic movement (if applicable) to exceed LOS D, or where it already exceeds LOS D and the development would contribute five percent (5%) or more of the total traffic during any projected horizon year. If mitigation is required, the applicant must only mitigate the impact of the proposed development, and would not be responsible for alleviating any deficiencies in the thoroughfare system that may occur without the proposed development.

B. Mitigation is not required if it can be shown that the traffic impacts of the project are fully mitigated ten (10) years after the final opening with any improvements that are already programmed to be implemented within five (5) years of the initial opening.

2.21.11 Administration of the TIA

Based on the results of the TIA and actions recommended by the City staff, the City's consultant, the Planning & Zoning Commission and/or the City Council, as appropriate, the City shall take one or more of the following actions:

A. Approve the zoning or development request, if the project has been determined to have no significant impact or where the impacts can be adequately mitigated;

B. Approve the development request, subject to a phasing plan;

C. Recommend study of the City Thoroughfare Plan to determine amendments required to increase capacity;

D. Recommend amendment of the Capital Improvement Program (CIP) to expedite construction of needed improvements; or

E. Deny the zoning or development request, where the impacts cannot be adequately mitigated.

2.21.12 Cost of TIA Review

The City may utilize an engineering consulting firm to assist City staff in the review of a TIA. The cost of this consultant review shall be borne by the developer, engineer, or property owner submitting the TIA. The City shall first obtain a cost estimate from the engineering consultant for the TIA review at time of the initial TIA submittal. Before the review begins, the developer, engineer, or property owner submitting the TIA shall deposit with the City funds equal to the cost estimate. The City shall disburse the funds to the consulting engineer as the review progresses. Should the consultant fees exceed the initial estimate, the developer, engineer or property owner submitting the TIA shall be informed of the shortage and a new estimate made by the consultant engineer to complete the TIA review. Additional funds will then be deposited with the City by the developer, engineer or property owner submitting the TIA to cover the estimated shortfall before the review of the study resumes. Any unused funds to be reimbursed to the developer, engineer or property owner submitting the TIA. If review process is performed by City staff, the City will submit a cost estimate for TIA review at time of the initial engineering submittal.

3. STORM DRAINAGE FACILITIES

3.1 Introduction

Drainage facilities shall be designed and constructed at such locations and of such size and dimensions to adequately serve the development and the contributing drainage area upstream of the development. The developer shall provide all the necessary easements and rights-of-ways required for drainage structures including, but not limited to, storm drains and open channels, (lined or unlined), flood detention facilities, and stormwater diversion or containment facilities (such as levees, dams, berms and stream diversions). The minimum easement widths for drainage facilities shall be per Table 3.1. For detention pond easements, water lines and wastewater lines will not be allowed in the easement. A variance to allow retaining walls in detention easement will require approval by the Planning and Zoning Commission with appeals being heard by the City Council.

Table 3.1: Drainage Easements – Minimum Width

		Minimum Easement Width (ft)
Conduit Size	18” – 48” RCP	20’
	48” – 72”RCP	25’
	Box 3’ – 4’ span, RCB	20’
	Box 5’ – 8’ span, RCB	25’
	Box 9’ – 12’ span, RCB	30’
Depth of Conduit	< 14’	20’
	14’ - 16’	25’
	17’ – 20’	30’
	21’ – 23’	35’
	> 23’	40’
Open Channel		15’ wider than top width of channel
Emergency Overflow Flume		20’
Creeks/Stream/Floodplains		Reference Erosion Hazard Setback Section
Detention Ponds		Set at 100-YR freeboard elevation. (Ref. Minimum Freeboard Requirements Section)

The design flows for the drainage system shall be calculated by the Rational Method in accordance with the requirements set forth in this document unless otherwise noted within these Standards (such as where the unit hydrograph methods are required). Curbs, inlets, manholes, etc. shall be designed and constructed in accordance to the Standard Details. Materials and construction procedures shall conform to the requirements of the Standard Specifications for Construction.

The developer shall provide plans, specifications, and design calculations for all drainage structures. All open channels that are not concrete lined shall be designed to prevent erosion (Table 3.11). The City shall specifically approve the type of methods used for prevention of erosion.

The design, size, type and location of all storm drainage facilities shall be subject to the approval of the Engineering Department. The requirements set forth herein are considered minimum requirements. **The developer and their engineers shall bear the total responsibility for the adequacy of design. The approval of the facilities by the City in no way relieves the developer and their engineer of this responsibility.**

The design factors, formulas, graphs and procedures described shall serve as means to prove that adequate conveyance of storm water and adequate flood prevention within the City is being provided. Responsibility for the actual design remains with the developers and design engineer of record. Deviation from the requirements of these standards shall require the approval of the City Engineer.

The City, as a participant in the National Flood Insurance Program (NFIP), must enforce all parts of its adopted Flood Hazard Damage Prevention and Erosion Control Ordinance, as approved by the Federal Emergency Management Agency (FEMA). Therefore, the requirements of that ordinance are adopted and included as a part of the City's Standards of Design and Construction.

The developer shall be responsible for the necessary facilities to provide drainage patterns and drainage controls such that properties within the overall watershed, whether upstream or downstream of the development, are not adversely affected by storm drainage from facilities on the development. These are outlined in the Storm Drainage Management Plan Section 3.4.

The storm drainage management plan provided as part of the final engineering drawings shall address how storm water on the proposed development and affected adjoining properties will be controlled during phased and completed development. Off-site improvements may be required to carry the additional flows caused by the proposed development. If the downstream system is insufficient to carry the proposed flow without causing potentially increased flood damages, detention will be required to release only the flow amount capable of being carried in the existing system.

Storm drainage released from the site will be discharged to a natural water course or storm sewer system of an adequate size to convey the 100-year storm runoff expected after development.

All storm drainage structures shall be constructed with a minimum of 4,200 psi concrete in 28 days with a cement content of not less than 6.5 sack per cubic yard for machine placed and not less than 7.0 sack per cubic yard for hand

place. All batch designs shall be reviewed and approved by the Engineering Department. All batch designs shall have the current date, project name, and use labeled on each design. Submit batch designs to the Engineering Department a minimum of ten (10) days prior to the projected placement date for review and approval. If pre-cast structures are being utilized, shop drawings must be submitted to the City Engineer for approval along with the batch design which is provided by the manufacturer. All drainage structures shall be double formed. No earth forms will be allowed.

3.2 Storm Drainage Design Criteria

3.2.1 Rational Method

For all drainage areas less than 160 acres, the rational method of computing runoff may be used for design of small drainage facilities (such as storm sewer systems, inlets, street gutter, and small detention facilities. The rational method is expressed by the following equation:

$$Q = CIA$$

Equation 3.1

where:

Q = The storm flow rate at a given point (cfs)
C = runoff coefficient (the ratio of rainfall to peak runoff) as indicated in Table 3.2
I = The average intensity of rainfall, for a period equal to the time of flow from the farthest point of the drainage area to the point of design and is obtained from Figure 3.1. (inches/hr)
A = The area that is contributing to the point of design (acres)

3.2.1.1 Runoff Coefficient (C)

For design of proposed drainage facilities using the Rational Method, runoff coefficients shall be based on the future land use. The runoff coefficients for different land uses should be taken from Table 3.2. A weighted runoff coefficient shall be used if different land uses are contributing to a discharge design point.

3.2.1.2 Time of Concentration

The time of concentration is defined as the longest time, without unreasonable delay, that will be required for water to flow from the upper limit of a drainage area to the point of concentration. The time of concentration to any point in a storm drainage system is a combination of the “inlet time” and the time of flow in the storm drain. The inlet time is the period of time required for water to flow over the surface of the ground to the storm drain inlet. The time of concentration for any one design point shall not exceed ten (10) minutes for storm drain designs.

Using the Rational Method for small drainage acres under average conditions, the minimum time of concentration from the upstream end of a drainage system will coincide with Table 3.3.

Table 3.2: Runoff Coefficient for Types of Land Use

TYPE OF AREA OR LAND USE	ADOPTED RUNOFF COEFFICIENT
Parks or Open Areas	0.35
Single Family Residential or Duplex	0.50
School	0.70
Apartments	0.75
Townhouse	0.80
Churches	0.80
Industrial	0.90
Commercial Business	0.90
Mercantile District	0.90
Retail	0.90
Parking Lot	0.90
Major and Minor Arterials – R.O.W.	0.90

Table 3.3: Minimum Inlet Time of Concentration

TYPE OF AREA OR LAND USE	MINIMUM INLET TIME (minutes)
Parks or Open Areas	20
Single Family Residential or Duplex	10
School	10
Apartments	10
Townhouse	10
Churches	10
Industrial	10
Commercial Business	10
Mercantile District	10
Retail	10
Parking Lot	10
Major and Minor Arterials – R.O.W.	10

Under circumstances which will produce times of concentration in excess of those shown in Table 3.3 the following NRCS TR55 methodology shall be used to determine the time of concentration (Tc). This method separates the flow through the drainage area into sheet flow, shallow concentrated flow, and open channel flow. The Tc is the sum of travel times for sheet flow, concentrated shallow flow and open channel flow. The time of concentration flow path and sheet flow path and following calculations shall be shown in the plans.

A. Sheet Flow: The maximum allowable length for sheet flow shall be no more than 100 feet, if not prior to 100 feet. Guidelines for determining the maximum allowable sheet flow length are provided in Unit Hydrograph Method Section. The T_t in minutes for sheet flow is determined using the following equation:

$$T_t = \frac{0.007(nl)^{0.8}}{(P_2)^{0.5}S^{0.4}}$$

Equation 3.2

where:
T_t = travel time, (hr)
n = Manning's roughness coefficient, (Table 3.4)
l = flow length, (ft)
P_2 = 2-year, 24-hour rainfall, (Table 3.5a)
S = land slope of hydraulic grade line (ft/ft)

Table 3.4: Sheet Flow 'n' Values

Surface Description	n (1)
Smooth surfaces (concrete, asphalt, gravel, or bare soil)	0.011
Fallow (no residue)	0.05
Cultivated soils:	
Residue cover less than 20%	0.06
Residue cover greater than 20%	0.17
Grass:	
Short Prairie Grass	0.15
Dense grasses	0.24
Bermuda grass	0.41
Range (natural)	0.13
Woods:	
Light underbrush	0.40
Dense underbrush	0.80

(1) These "n" values are only applicable for flow depths of approximately 0.1 foot or less where sheet flow occurs. For greater flow depths, typically concentrated shallow overland flow or channel flow occurs, with lower "n" values typical of those generally used in open-channel flow.

B. Shallow concentrated flow travel time is computed as:

$$t_{SC} = \frac{L_{SC}}{3600 K {S_{SC}}^{0.5}}$$

Equation 3.3

where:
t_{sc} = shallow concentrated flow time, (hr)
L_{sc} = shallow concentrated flow length, (ft)
K = 16.13 for unpaved surface, 20.32 for paved surface
S_{sc} = shallow concentrated flow slope, (ft/ft)

C. Channel Flow travel time shall be computed by dividing the channel length by the flow rate obtained from Manning's Equation. This is shown by Equation 3.4.

$$t_{ch} = \frac{L_{ch}}{3600 \frac{1.49}{n} R^{\frac{2}{3}} {S_{ch}}^{\frac{1}{2}}}$$

Equation 3.4

where:
t_{ch} = channel flow time, (hr.)
L_{ch} = channel flow length, (ft)
S_{ch} = channel flow slope, (ft/ft)
n = Manning's roughness coefficient (Table 3.11)
R = channel hydraulic radius (ft), $R = \frac{a}{p_w}$
where: a = cross sectional area (ft^2)
p_w = wetted perimeter (ft)

Since urbanization is anticipated on all drainage areas, all drainage improvements shall be designed for the case of fully developed watersheds. It is generally not practical to design improvements to gravity drainage systems in stages to match development, except in the case of unlined ditches, and then, it is essential that ultimate rights-of-way be obtained at the outset. When the watershed in question is basically undeveloped, the developer shall attempt to anticipate future fully developed conditions and storm water drainage patterns and flow characteristics when determining the time of concentration.

3.2.1.3 Rainfall Intensity (I)

The Rainfall intensity shall be taken from Figure 3.1 below for the minimum inlet time above.

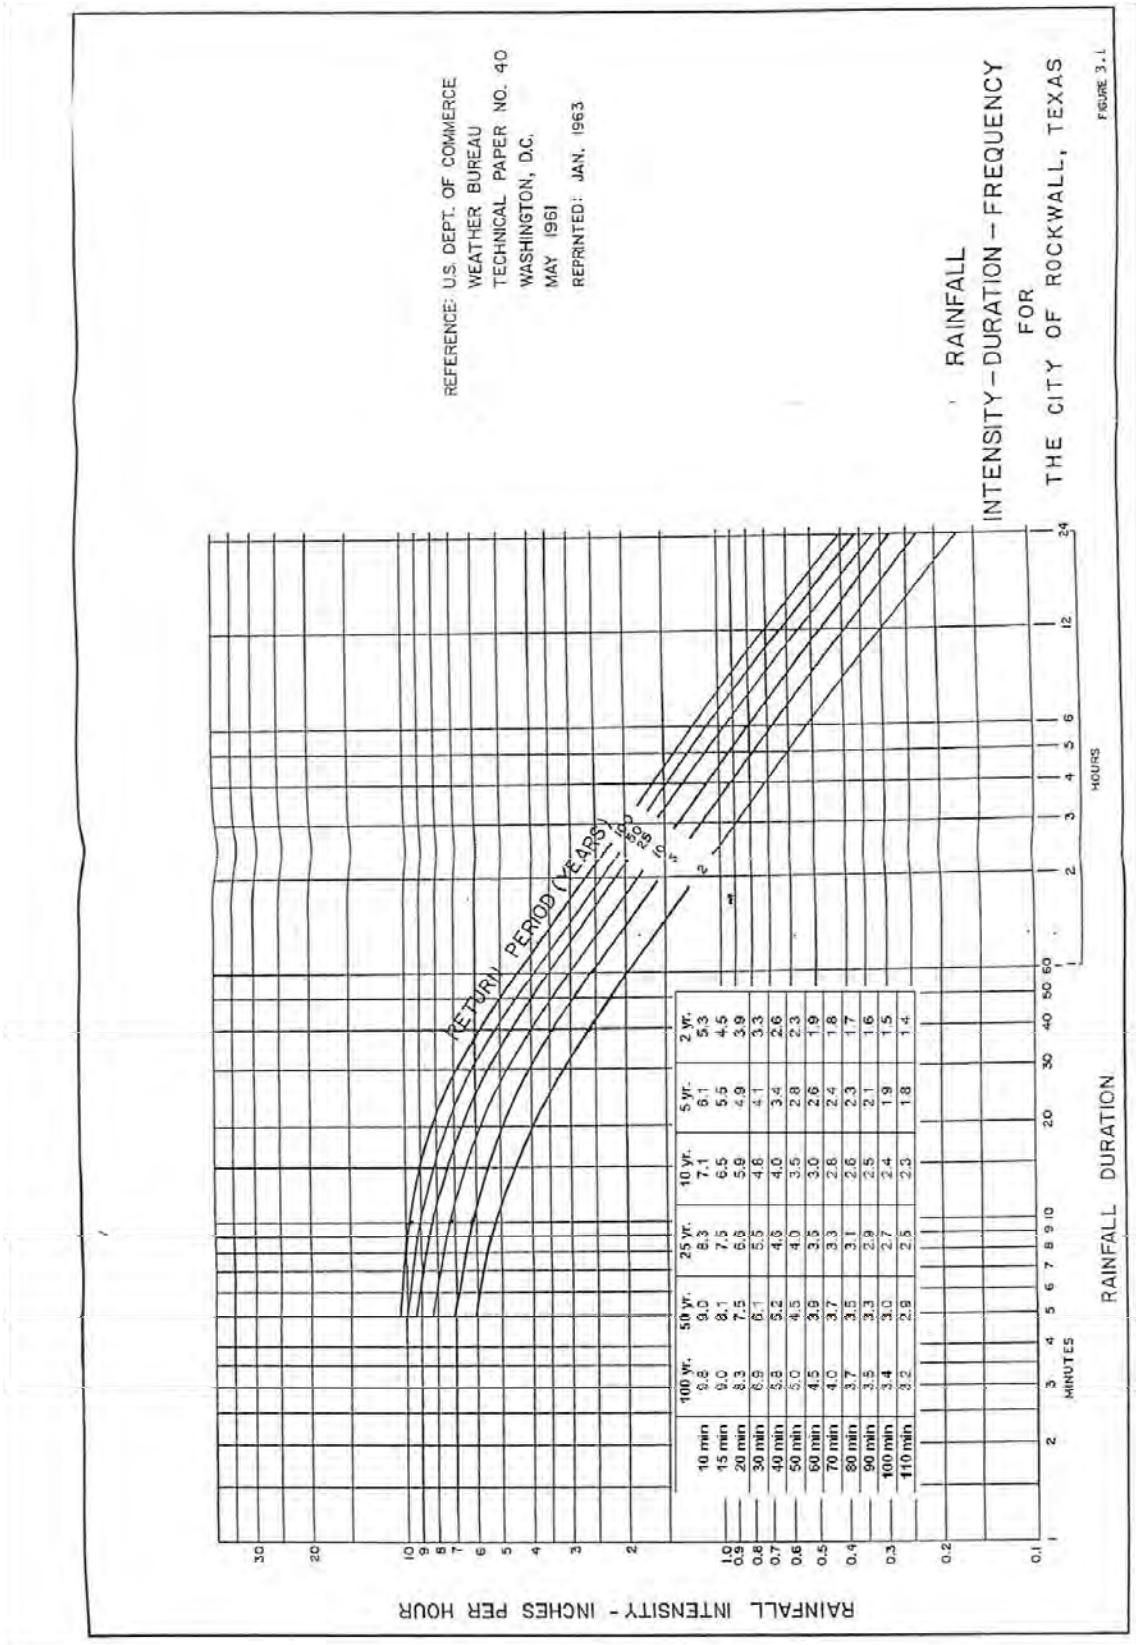

Figure 3.1: IDF Curve

3.2.2 Unit Hydrograph Method

For contributing drainage areas greater than 160 acres, the unit hydrograph method, shall be used to determine the peak storm discharge quantities. This method shall also be used for verification of adequacy of stormwater detention facilities with contributing drainages areas that are equal to or greater than 20 acres.

The City will utilize an engineering consulting firm to assist City staff in the review of a flood and detention studies that utilize the Unit Hydrograph Method. The cost of this consultant review shall be borne by the developer, engineer, or property owner submitting the study. The City shall first obtain a cost estimate from the engineering consultant for the study review at time of the initial study submittal. Before the review begins, the developer, engineer, or property owner submitting the study shall deposit with the City funds equal to the cost estimate. The City shall disburse the funds to the consulting engineer as the review progresses. Should the consultant fees exceed the initial estimate, the developer, engineer or property owner submitting the study shall be informed of the shortage and a new estimate made by the consultant engineer to complete the study review. Additional funds will then be deposited with the City by the developer, engineer or property owner submitting the study to cover the estimated shortfall before the review of the study resumes. Any unused funds to be reimbursed to the developer, engineer or property owner submitting the study. If review process is performed by City staff, the City will submit a cost estimate for study review at time of the initial engineering submittal.

The use of a unit hydrograph method shall be based upon standard and accepted engineering principles used in the profession. Acceptable methods include the Natural Resources Conservation Service (NRCS) Technical Release Number 55 (TR-55) for drainage areas 160 acres to 2,000 acres and NRCS's Technical Release Number 20 (TR-20), or the United States Army Corps of Engineers HEC-HMS models for drainage areas 160 acres or more. When the flood study involves a watershed that does not already have any available hydrology model, or in the case where conversion of an existing model to a later version hydrology model is desired, the City's preference is the latest version of HEC-HMS model available.

When the unit hydrograph method is used, a flood study report shall be prepared and provided to the City Engineer, documenting the methodology, assumptions, derivation of all data used, and results of the study. In order to maintain consistency of all hydrologic studies within the City, the following requirements/conditions shall be used when preforming the unit hydrograph method. These requirements/conditions shall be included in the plan set and the flood study report:

1. Use the NRCS 24-hour Type III Rainfall Distribution.
2. Use wet antecedent soil moisture conditions (AMC-III).
   a. Storm runoff/loss parameter calculations, such as NRCS runoff curve numbers (CN). CN values should first be computed based on average antecedent soil moisture conditions (AMC-II) to the nearest 0.1 value (CN2), based on hydrologic soil group, land cover and treatment practices. Then compute the CN3 value for AMC-III conditions, to the nearest 0.1 value, using the NRCS conversion equation as follows:

$$CN_3 = \frac{23CN_2}{10 + 0.13CN_2}$$

Equation 3.4a

3. Compute both pre-construction conditions (based on existing off-site watershed conditions) and post-construction conditions and show comparison in summary table of results.
4. In addition to No. 3 compute projected future fully developed conditions to determine design elevations and erosion protection.
5. 24-hour rainfall storm totals, (See Table 3.5a)
6. Time of Concentration (Tc) and Lag Time Calculations, computed to the nearest 0.01 hour: The lag time is generally considered to be 0.6 x Tc. The Tc calculations should include sheet flow travel time, shallow concentrated flow travel time, channel flow travel time, and travel time associated with any storm sewer system pipes, street gutter flow, and other travel times. Storm sewer pipe travel time may be derived based on design velocities and pipe flow lengths from available or proposed sewer pipe plans. General guidelines pertaining to NRCS TR-55 methodology for determining flow times for sheet flow, concentrated shallow flow, channel flow, and other flow types are included in the section above. The length of sheet flow used with the unit hydrograph method should be determined based on the following procedures to determine where sheet flow ends:
   a. Field investigations, where possible, to detect overland drainage patterns and where sheet flow transitions to other types of overland or pipe flow (such as observation of beginning of overland flow rill erosion patterns or entrance to a storm water inlet).
   b. Information from topographic maps, such as deflections in elevation contours indicating where sheet flow ends and shallow concentrated flow or channel flow may begin.
   c. For areas where previous construction has occurred, review of as-built drainage plans.
   d. High-resolution photography, which may indicate locations where overland flow begins to form shallow concentrated flow as evidenced by erosion patterns.
   e. If the length of sheet flow cannot be determined by the above procedures, or if it is determined by the above procedures to be

greater than 100 feet, the maximum length to be used shall be the lesser of 100 feet or the length computed by the following equation [as taken from the NRCS National Engineering Handbook, Part 630 – Hydrology, Chapter 15]:

$$L = \frac{100S^{0.5}}{n}$$

Equation 3.4b

where:
L = limiting sheet flow length, (ft)
S = land slope over length L, (ft/ft)
n = Manning's roughness coefficient over length L

7. When using a unit hydrograph procedure, mixing the hydrology modeling data with data based on differing procedures is not acceptable:
   a. The time of concentration should be calculated using actual travel time computations. [Do not assume a 10-minute inlet time as assumed in Rational Method].
   b. Use total storm precipitations (inches) listed in Table 3.5a. [Do not use rainfall intensities (inches/hour) or derive total storm precipitation based on the Rational Method rainfall intensities].
   c. For detention ponds with drainage areas greater than 20 acres, if a proposed pond and dam is first designed based on Modified Rational Method, but is found to be inadequate when checked with the unit hydrograph method, then it should be re-designed to safely pass the maximum required design storm using the unit hydrograph method, without flow passing over the top of the dam (and with required freeboard) and without increased discharges being passed downstream from the project site.
8. Drainage areas shall be rounded to the nearest 0.01 acre (0.000001 sq. mi.) in hydrology models, as well as for areas of land use and soil categories when computing composite runoff curve numbers.
9. Impervious areas of a drainage basin should be included within the computed composite runoff curve number calculations used in the hydrology models (instead of using a percentage of impervious area in combination with a weighted curve number in hydrology models that contain that option).
10. Stream reach hydrograph routing computations within hydrology models must be performed using a procedure that accounts for the effects of channel and floodplain storage (such as Modified Puls method), so that impacts on flood discharges due to loss of flood valley storage within the reach, whether caused by currently proposed construction or due to future development, can be determined.

11. NRCS runoff curve numbers listed in NRCS's Technical Release 55 (TR-55) for urban and residential districts are generally inappropriate for typical developments in the City of Rockwall, due to the indicated low percentage of impervious areas indicated with the values. Therefore, curve numbers typical of conditions in the City of Rockwall are included in Table 3.5b. These values should be used in most cases; however, other curve numbers for conditions not listed in Table 3.5b may be derived and used if reasonably justified and documented.
12. Options available in hydrology models to automatically compute pond spillway discharges, based on spillway or outlet type or configuration, are sometimes limited and often do not adequately represent the designed spillway. In such cases, pond water surface elevations versus discharges may need to be computed by other methods and entered into the hydrology model as user defined paired data.

Table 3.5a: Precipitation Frequency Estimates (Inches) for Rockwall, Texas

ARI* (Years)	Duration

* Urban high runoff equivalent is used only for projected fully-developed watershed conditions.
** Residential coding refers to percent impervious (for example, R60 is for 60% impervious) (For areas that fall between listed Values, Please round to the nearest coding.)
Note: Curve numbers listed above are for average antecedent moisture conditions (AMC_{II}).

3.2.3 Design Storm Frequencies

The design storm frequencies shall be the 100-year storm.

For the Rational Method the relationship between rainfall intensity, duration and frequency is set forth in Figure 3.1. These curves have been developed using Technical Paper No. 40, “Rainfall Frequency Atlas of the United States” by the U.S. Weather Bureau.

For the Unit Hydrograph Method the total rainfall for the 24-hour duration storm is used. See Table 3.5a.

3.2.4 Drainage Calculations Summary Tables

The calculations of the storm water discharge shall be provided to the City. As a minimum, the engineering plans shall include:

- Existing and Proposed Drainage Area Calculations Table using Form 3.1,
- Inlet Calculations Table using Form 3.2
- Storm Sewer Calculations Table using Form 3.3.
- Open Channel Calculations Table using Form 3.4
- Culvert Design Calculations Table using Form 3.5

Form 3.1: Drainage Area Calculations Table

Areas Drained					Weighted Runoff Coeff. C	C*A
Area ID	Total Drainage Area	Parks or Open Area (C=0.35)	Residential (C=0.5)	Comm. (C=0.9)		
	(acres)	(acres)	(acres)	(acres)	(acres)	(acres)
(1)	(2)	(3)	(4)	(5)	(6)	(7)

Time of Concentration T_C	Design Storm Frequency	Intensity I	Storm Runoff Q	Drains To/ Remarks
(min)	(yrs)	(in/hr)	(cfs)	
(8)	(9)	(10)	(11)	(12)

Instructions for Form 3.1: Drainage Area Calculation Table

Column (1)	Drainage area identification number or designation
Column (2)	Total Drainage area in acres
Column (3 to 5)	Area drained for each land use type in acres (add additional columns for different land use areas as needed) Runoff Coefficient taken from Table 3.2
Column (6)	Weighted Runoff Coefficient calculated from Columns 2 to 5
Column (7)	Product of Column (2) and Column (6)
Column (8)	Minimum inlet time of concentration taken from Table 3.3
Column (9)	Design Storm Frequency, shall be 100-yr for all areas
Column (10)	Using the time of concentration and design storm frequency, the rainfall intensity is taken from Figure 3.1
Column (11)	Solution of Equation 3.1
Column (12)	A detailed description of where the drainage area drains to including but not limited to Inlet ID, Street Location, Creek Name, Detention Pond Designation, etc.

3.2.5 Flow in Streets

Capacity of Arterials, Collectors and Residential streets shall be calculated using a straight crown: Storm water flow in streets having a straight crown shall be calculated as follows:

$$Q = \frac{0.56}{n} S_x^{\frac{5}{3}} S^{\frac{1}{2}} T^{\frac{8}{3}}$$

Equation 3.5

where:
Q = gutter flow rate, (cfs)
n = Manning's roughness coefficient; value = 0.0175
S = the longitudinal slope of the street gutter, (ft/ft)
S_x = pavement cross slope, (ft/ft)
T = ponded width, (ft)

3.2.6 Flow in Alleys

Capacity of alleys should be taken from Manning's Equation:

$$Q = \frac{1.49}{n} AR^{2/3} S^{1/2}$$

Equation 3.6

where:
Q = alley flow rate, (cfs)
n = Manning's roughness coefficient; value = 0.0175
A = cross sectional area of flow, (ft^2)
R = hydraulic radius, (ft)
S = the longitudinal slope of the alley, (ft/ft)

3.2.7 Permissible Spread of Water (Ponding Width)

3.2.7.1 General

Spread of water refers to the amount of water that may be allowed to collect in streets during a storm of specific design frequency. The following Equation 3.7, a re-arranging of Equation 3.5, shall be used to determine the ponding width "T" for straight crowned streets. (Arterials, Collectors and Residential).

$$T = 1.24\left(\frac{Qn}{{S_x}^{5/3}S^{1/2}}\right)^{\frac{8}{3}}$$

Equation 3.7

where:
Q = gutter flow rate, (cfs)
n = Manning's roughness coefficient; value = 0.0175
S = the longitudinal slope of the street gutter, (ft/ft)
S_x = pavement cross slope, (ft/ft)
T = ponded width, (ft)

In order that excess storm water will not collect in streets during a storm of the design frequency, the following spread of water values shall be used for the various types of streets. Figure 3.2 provided below shows the relationship between thoroughfare type, gutter flow capacity and street slope based on maximum permissible ponding width described in the next sub-sections.

3.2.7.2 Major and Minor Arterials (P6D & M4D) – Divided

Based on pavement cross-slope of 2.0%, the 100-year Design Frequency flow shall not exceed the elevation of the lowest top of curb. The design engineer shall verify that one lane of traffic in each direction shall remain free of ponding in the 100-year storm event.

3.2.7.3 Collector Streets – (M4U, M3U & Minor Collector)

Based on a straight cross-slope with a roof top crown of six (6) inches, the 100-year storm event flows shall not exceed the top of curb, six (6) inches.

3.2.7.4 Residential Streets

Based on a straight cross-slope with a roof top crown of six (6) inches, the 100-year storm event flows shall not exceed the top of curb, six (6) inches.

3.2.7.5 Alleys

The 100-year Design Frequency shall not exceed the capacity of the alley pavement, a depth of five (5) inches. No ponding will be allowed beyond the pavement edge. Alley paving to be warped to drain the paving toward the inlet.

3.2.7.6 Parking Lots

The 100-yr design frequency shall not exceed a depth of six (6) inches except where on pavement detention is occurring where one (1) foot in depth is permissible.

3.2.8 Inlet Design

3.2.8.1 General

Determination of the required size of the storm drain inlets will be based on the calculations called out in this section and the instructions for FORM 3.2: Inlet Design Calculations Table.

3.2.8.2 Types of Inlets

City requires the use of depressed curb inlets. A depressed curb inlet is more efficient than a non-depressed inlet because a depressed inlet induces a greater cross-flow toward the inlet allowing less water to flow past it. Also, the transition out of the depression causes a backwater effect, which further increases the capacity of the storm drain. A gutter depression for all curb inlets shall be six (6) inches, as shown in the Standard Details. Inlets shall be sized in multiplier of five (5) feet (5, 10, 15 and 20). Construction of inlets shall be in accordance with the Standard Details. Use Table 3.6 for the selection of inlets to be used within the City. No grate inlets are allowed without approval from the City Engineer.

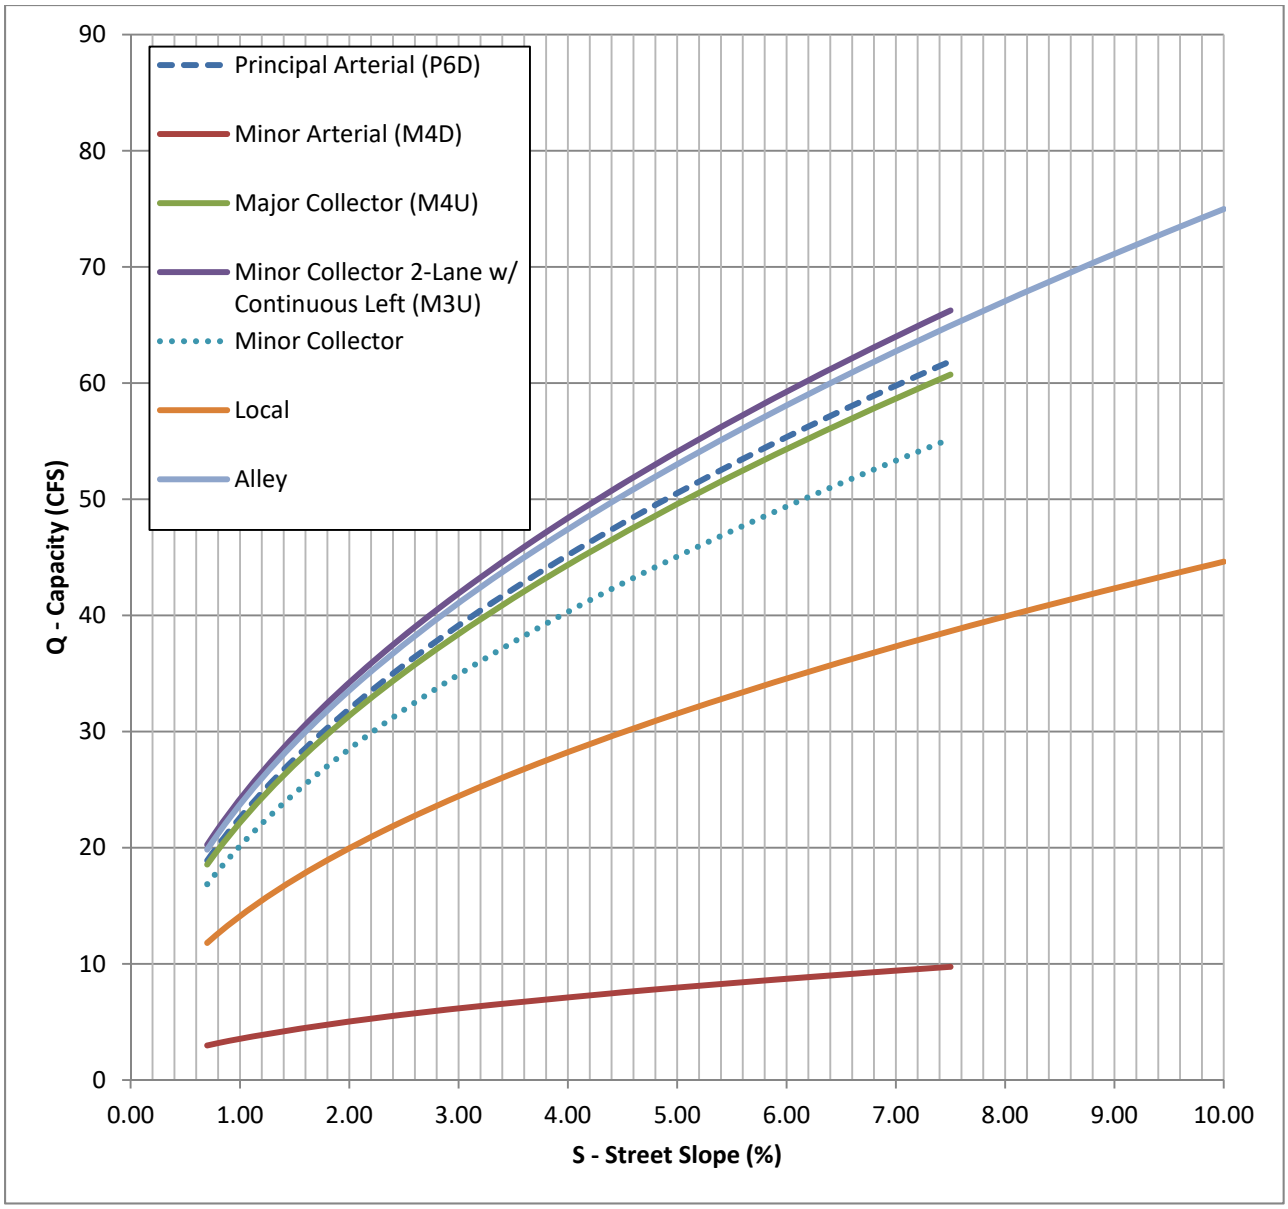

Figure 3.2: Thoroughfare Gutter Capacity based on Maximum Permissible Ponding Width

Table 3.6: Storm Drain Inlets

INLET DESCRIPTION	AVAILABLE INLET SIZES	WHERE USED	DESIGN EQUATIONS
Standard Curb Opening Inlet on Grade	5' 10' 15' 20'	Arterials (P6D & M4D) Collectors (M4U, Minor & M3U) Local (Residential) Alley	Equation 3.8 through 3.16
Standard Curb Opening Inlet at Low Point	5' 10' 15' 20'	Arterials (P6D & M4D) Collectors (M4U, Minor & M3U) Local (Residential) Alley	Equation 3.17 & 3.18

Combination Inlet at Low Grade	4' 6' 8'	Combination Inlets to be Used Where Space Behind Curb Prohibits Other Inlet Types and Alleys **City Engineer Approval Required**	
Grate Inlet	2 Grate 3 Grate 4 Grate 6 Grate	**No grate inlets are allowed without approval from the City Engineer**	
Drop Inlet	2'x2' 3'x3' 4'x4' 5'x5'	Open Channels/Area Drain	Equation 3.19 & 3.20

3.2.8.3 Location

All inlets (edge of opening) shall be a minimum of ten (10) feet from street or driveway curb return. Recessed inlets will be required to be installed at all inlet locations where the street grade is to be 6% or greater except on residential streets. At locations where depressed inlets are expected to interfere with pedestrian activity, usually at crosswalks or interior spans of the block used for parking, a depression of less than six (6) inches may be required. These locations may require additional inlet width to compensate for the reduced depression. The City will consider all variances from a standard six- (6) inch gutter on an individual basis.

A. Major and Minor Arterials (Divided): Inlets shall be located at street intersections, at low points of grade or where the gutter flow exceeds the permissible spread of water criteria. Inlets shall be located, when possible, on lesser traveled streets or alleys when grades permit. Inlets located on arterials and where street grade is 6% or greater shall be recessed in order to minimize interference of the gutter depression with travel lanes. In super-elevated sections, inlets placed against the

center medians shall have no gutter depression and shall intercept gutter flow at the point of vertical curvatures to prevent flow from crossing the arterial. Unless expressly approved by the City Engineer, storm waters will not be allowed to cross arterials on the surface in valley gutters or otherwise. All sag inlets will require a reinforced concrete emergency overflow flume. The capacity of the emergency overflow flume shall equal or exceed the 100-yr design storm flow coming to the sag point.

B. Collector Streets: Inlets shall be located at street intersections, low points of grade or where the gutter flow exceeds the permissible spread of water criteria. Inlets shall be located, when at all possible, on lesser traveled streets or alleys where grade permits. All sag inlets will require a reinforced concrete emergency overflow flume. The capacity of the emergency overflow flume shall equal or exceed the 100-yr design storm flow coming to the sag point.

C. Residential Streets: Inlets shall be located at street intersections, low points of grade or where the gutter flow exceeds the permissible spread of water criteria. All sag inlets will require a reinforced concrete emergency overflow flume unless the design engineer calculates that the street will carry the overflow above the crest of the roadway without the water surface elevation exceeding the top of curb. The capacity of the emergency overflow flume shall equal or exceed the 100-yr design storm flow coming to the sag point.

D. Alleys: Inlets shall be located before intersections with streets, alley to alley intersections, change in alley directions, low points of grade or where the gutter flow exceeds the permissible spread of water criteria. All sag inlets will require a reinforced concrete emergency overflow flume. The capacity of the emergency overflow flume shall equal or exceed the 100-yr design storm flow coming to the sag point.

E. Parking Lots: Inlets shall be located at all sag points and before ponding exceeds six (6) in depth except when on pavement detention is occurring.

3.2.8.4 Curb Inlets On-Grade

The sizing of curb inlets on-grade shall be done based on the following Equations 3.8 through 3.16 and Figure 3.3. Figures 3.4 through 3.9 are provided as reference for On-Grade Curb Inlet Capacities on the City Thoroughfares.

$$L_r = 0.6Q^{0.42}S^{0.3}\left(\frac{1}{nS_e}\right)^{0.6}$$

Equation 3.8

where:
Lr = length of curb inlet required (ft)
Q = flow rate in gutter (cfs)
S = longitudinal slope (ft./ft)
n = Manning's roughness coefficient, value = 0.0175
Se = equivalent cross slope (ft./ft.)

$$S_e = S_x + \frac{a}{W}E_0$$

Equation 3.9

where:
S_e = equivalent cross slope (ft/ft)
S_x = cross slope of the road (ft/ft)
a = gutter depression depth (ft), all inlet depressions shall be 0.50 feet (6 inches)
W = gutter depression width (ft)
standard inlets W = 2.0 ft, recessed inlets W = 3.0 ft
E_o = ratio of depression flow to total flow

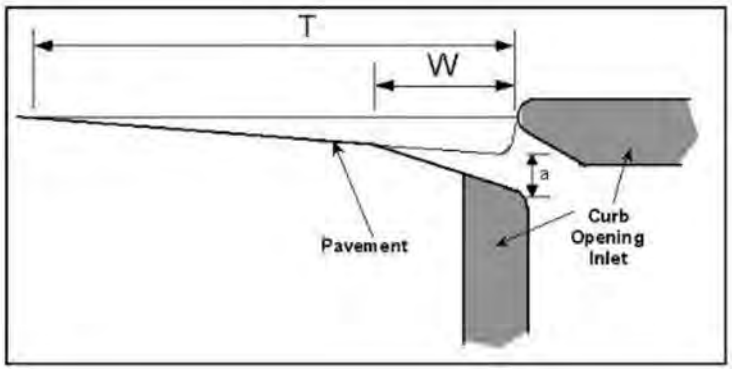

Figure 3.3: Gutter Cross-Section Diagram

$$E_0 = \frac{K_W}{K_W + K_0}$$

Equation 3.10

where:
E_0 = ratio of depression flow to total flow
K_W = conveyance of the depressed gutter section (cfs)
K_0 = conveyance of the gutter section beyond the depression (cfs)

$$K = \frac{1.486A^{5/3}}{nP^{2/3}}$$

Equation 3.11

where:
K = conveyance of cross section (cfs)
A = area of cross section (ft^2)
n = Manning's roughness coefficient, value = 0.0175
P = wetted perimeter (ft)

$$A_W = WS_X\left(T - \frac{W}{2}\right) + \frac{1}{2}aW$$

Equation 3.12

where:
A_W = area of depressed gutter section (ft^2)
W = gutter depression width (ft)
standard inlets W = 2.0 ft, recessed inlets W = 3.0 ft
S_X = cross slope (ft/ft)
T = calculated ponded width (ft)
a = gutter depression depth (ft), all inlet depressions shall be 0.50 feet (6 inches)

$$P_W = \sqrt{(WS_X + a)^2 + W^2}$$

Equation 3.13

where:
P_W = wetted perimeter of depressed gutter section (ft)
W = gutter depression width (ft)
standard inlets W = 2.0 ft, recessed inlets W = 3.0 ft
S_X = cross slope (ft./ft)
a = gutter depression depth (ft), all inlet depressions shall be 0.50 feet (6 inches)

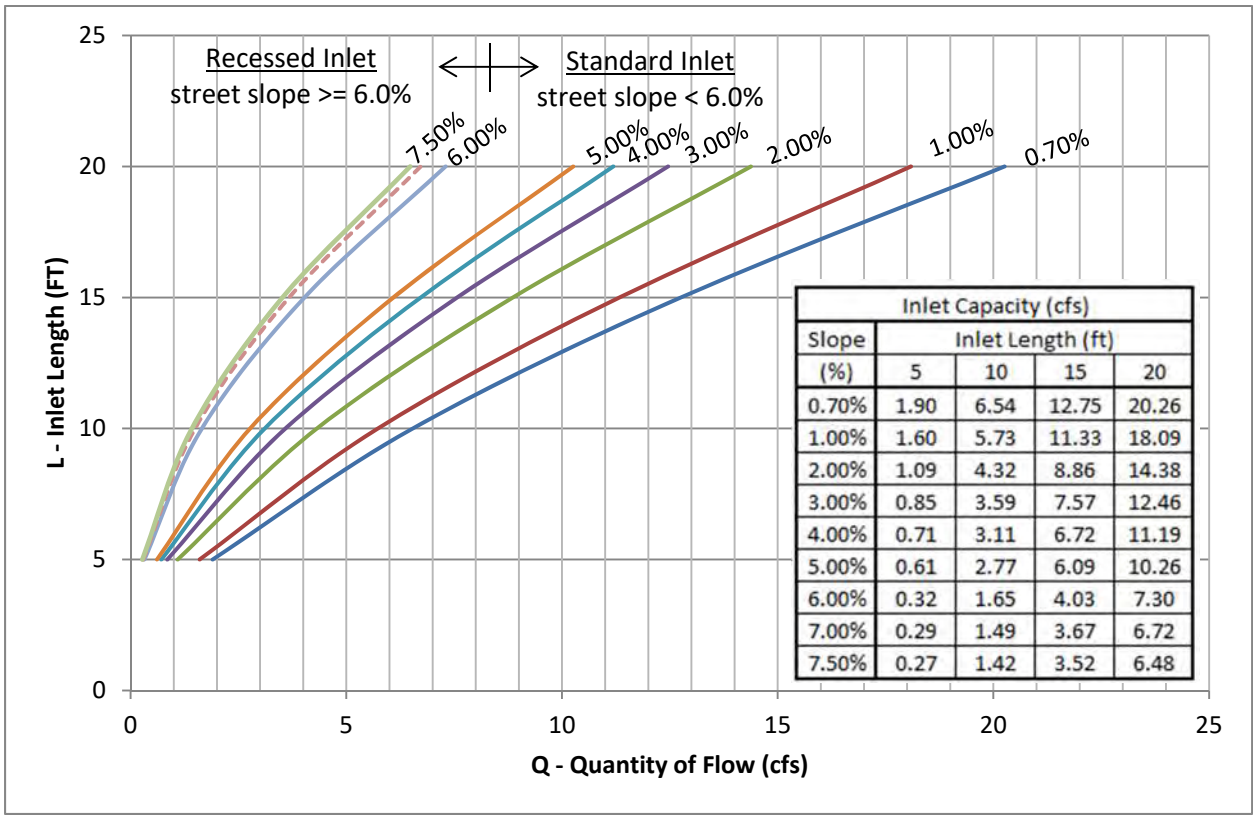
$$A_0 = \frac{S_X}{2}(T - W)^2$$

Equation 3.14

A_0 = area of gutter/road section beyond the depression width (ft^2)
S_X = cross slope (ft/ft)
W = gutter depression width (ft)
standard inlets W = 2.0 ft, recessed inlets W = 3.0 ft
T = calculated ponded width

$$P_0 = T - W$$

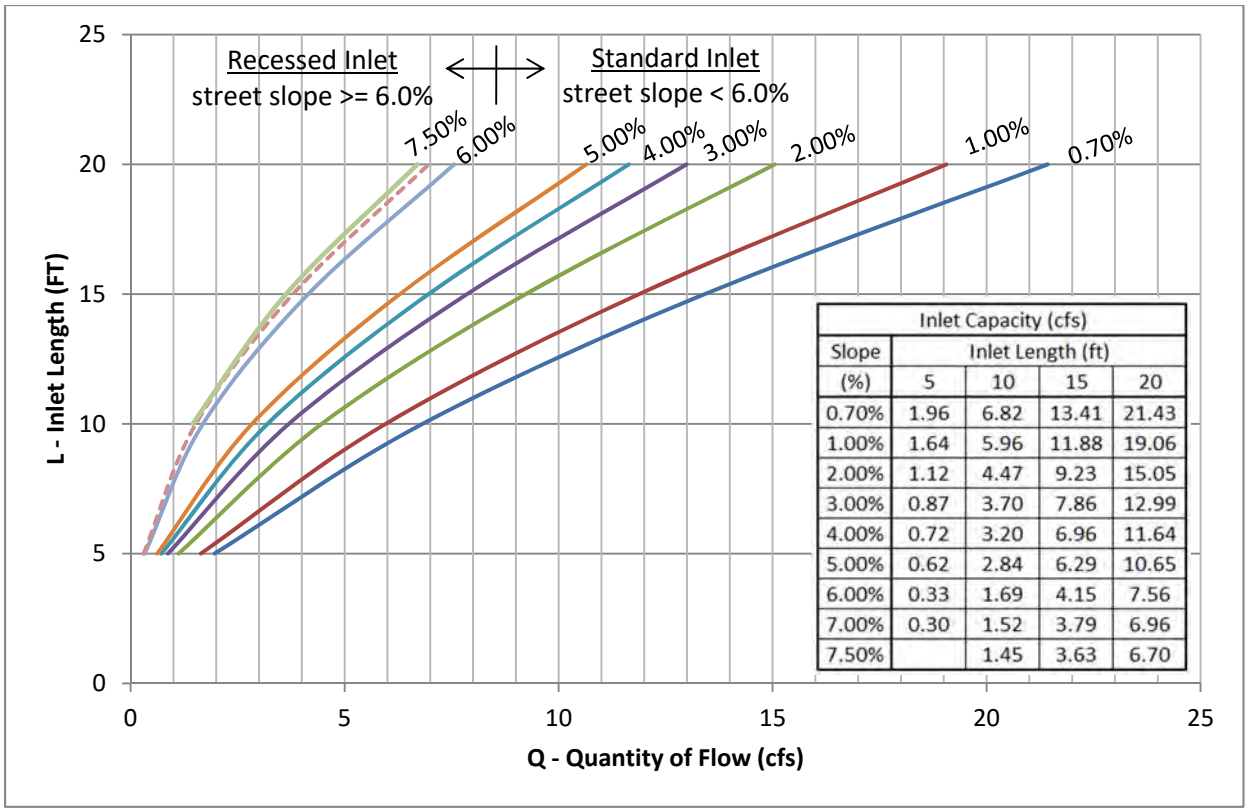
Equation 3.15



P_0 = wetted perimeter of the depressed gutter section (ft)
T = calculated ponded width (ft)
W = gutter depression width (ft)
(standard inlets W = 2.0 ft, recessed inlets W = 3.0 ft)

For determining the bypass of an curb inlet on grade use the following Equation 3.13 which factors in the ratio of the actual length of curb inlet (L_a) to the length of inlet required (L_r)

$$Q_{bypass} = Q\left(1 - \frac{L_a}{L_r}\right)^{1.8}$$



Equation 3.16

where:
Q_{bypass} = carryover discharge (cfs)
Q = total discharge (cfs)
L_a = design length of the curb opening inlet (ft)
L_r = length of curb opening inlet required to intercept the total flow (ft)

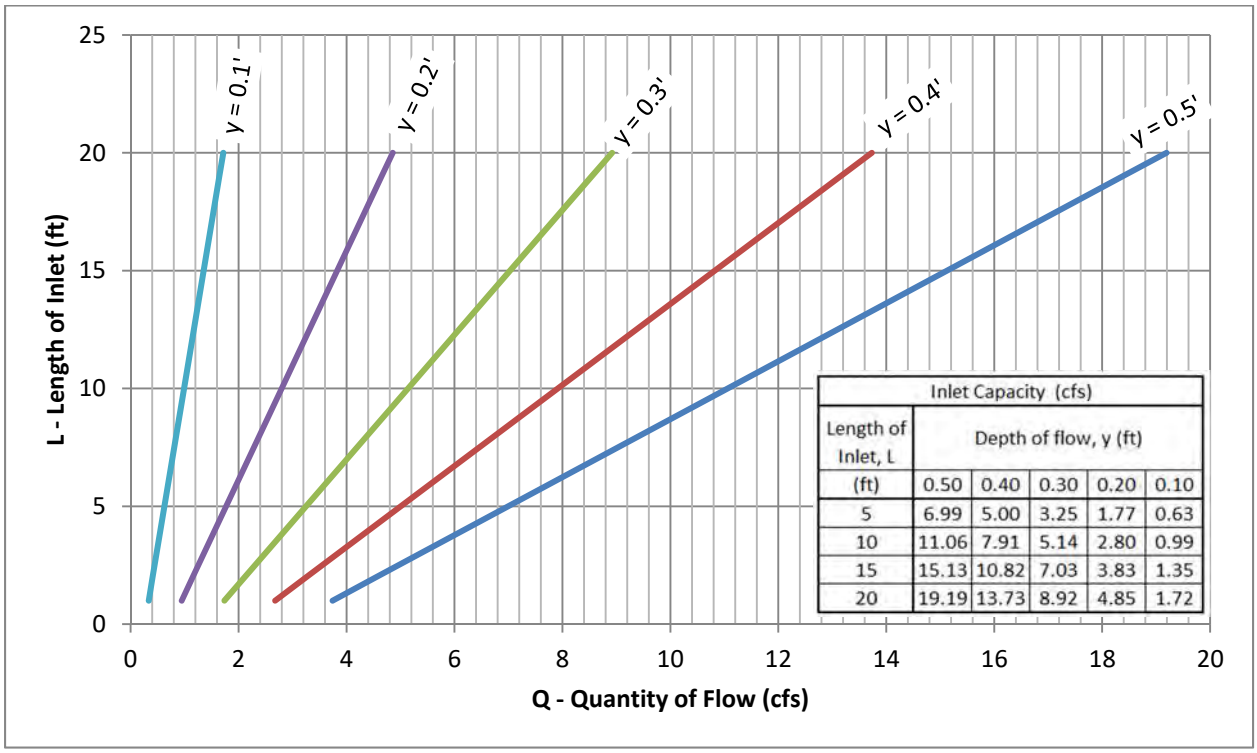
Figure 3.9: Curb Inlet Capacity On-Grade Alley

3.2.8.5 Curb Inlets at Sag/Low Point

Determining the capacity of curb inlets at sag/low point shall be taken from Equation 3.17 while the inlet operates as a weir until the water depth approaches 1.4 times the curb opening height.

$$Q = 2.3(L + 1.8W)y^{1.5}$$

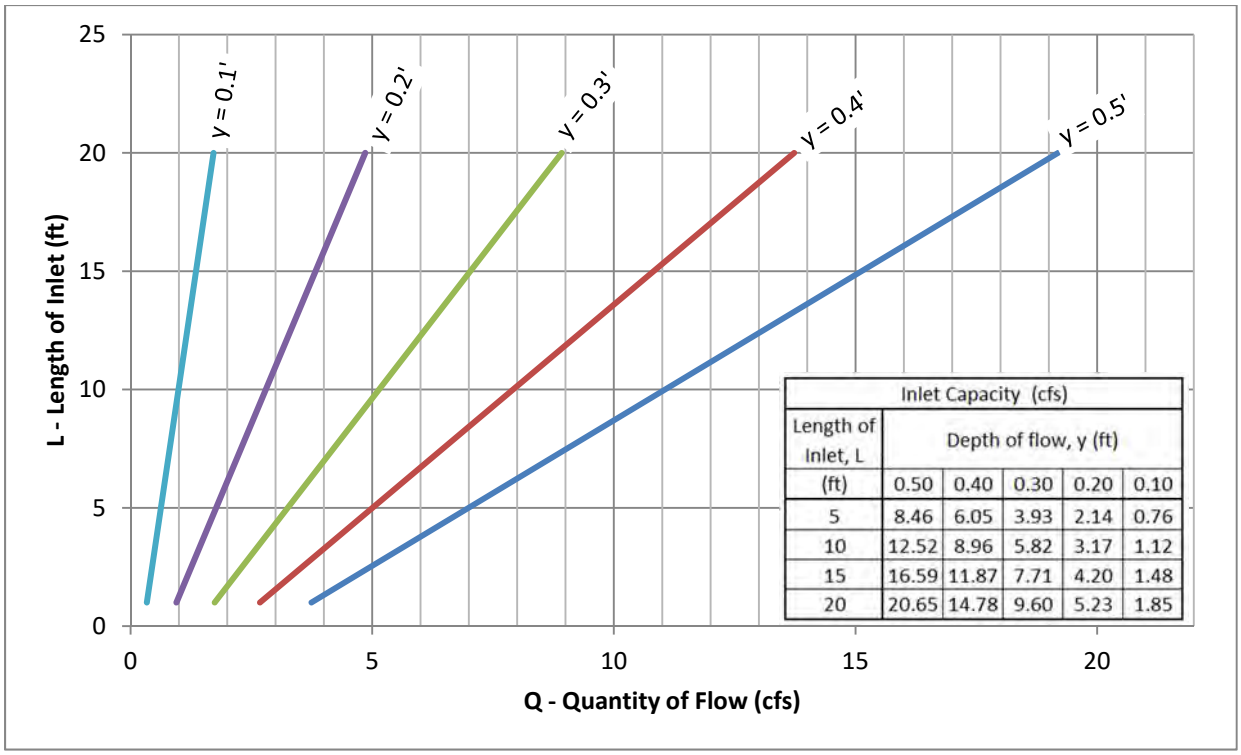
Equation 3.17



Equation 3.14 can be rearranged to find the required curb inlet length at a sag point as shown in Equation 3.18.

$$L = \frac{Q}{2.3y^{1.5}} - 1.8W$$

Equation 3.18



where:
Q = total flow reaching inlet (cfs)
y = depth of flow (ft)
L = length of curb inlet opening (ft)
W = gutter depression width (ft)
standard inlets W = 2.0 ft, recessed inlets W = 3.0 ft

Figures 3.10 through 3.11 are provided as reference for Standard and Recessed Sag Curb Inlet Capacities.

Inlet Capacity (cfs)					
Length of Inlet, L	Depth of flow, y (ft)				
(ft)	0.50	0.40	0.30	0.20	0.10
5	6.99	5.00	3.25	1.77	0.63
10	11.06	7.91	5.14	2.80	0.99
15	15.13	10.82	7.03	3.83	1.35
20	19.19	13.73	8.92	4.85	1.72

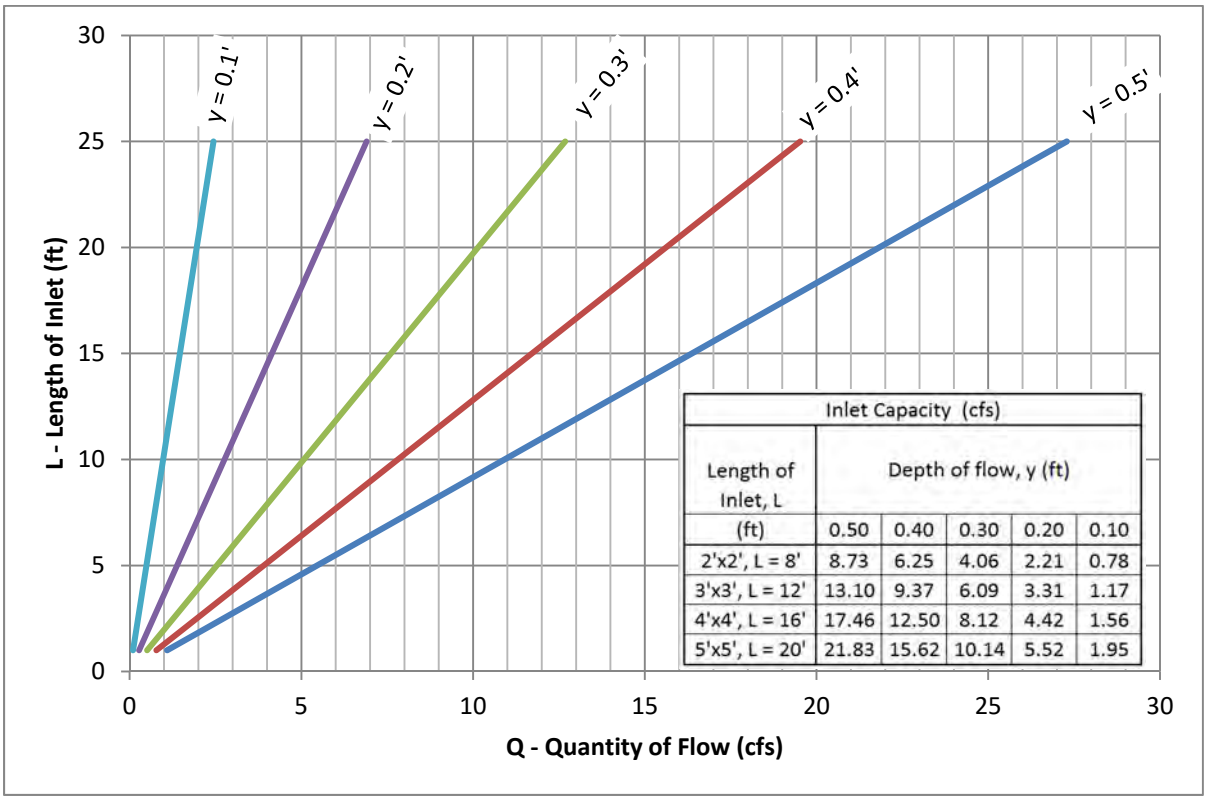
Figure 3.11: Recessed Curb Inlet Capacity Sag/Low Point

3.2.9 Drop Inlets / 'Y' Inlet Design

The capacity of drop inlets shall be taken from the Equation 3.19. All drop inlets shall be sized to have a maximum allowable head (depth of water) on the inlet to be six (6) inches.

$$Q = 3.087Ly^{3/2}$$



Equation 3.19

The equation can be rearranged to find the length of Drop Inlet opening as shown in Equation 3.20.

$$L = \frac{Q}{3.087y^{3/2}}$$

Equation 3.20

where:
Q = flow to inlet (cfs)
L = length of inlet opening (ft)
y = depth of water (head) at inlet (ft)

Inlet Capacity (cfs)					
Length of Inlet, L	Depth of flow, y (ft)				
(ft)	0.50	0.40	0.30	0.20	0.10

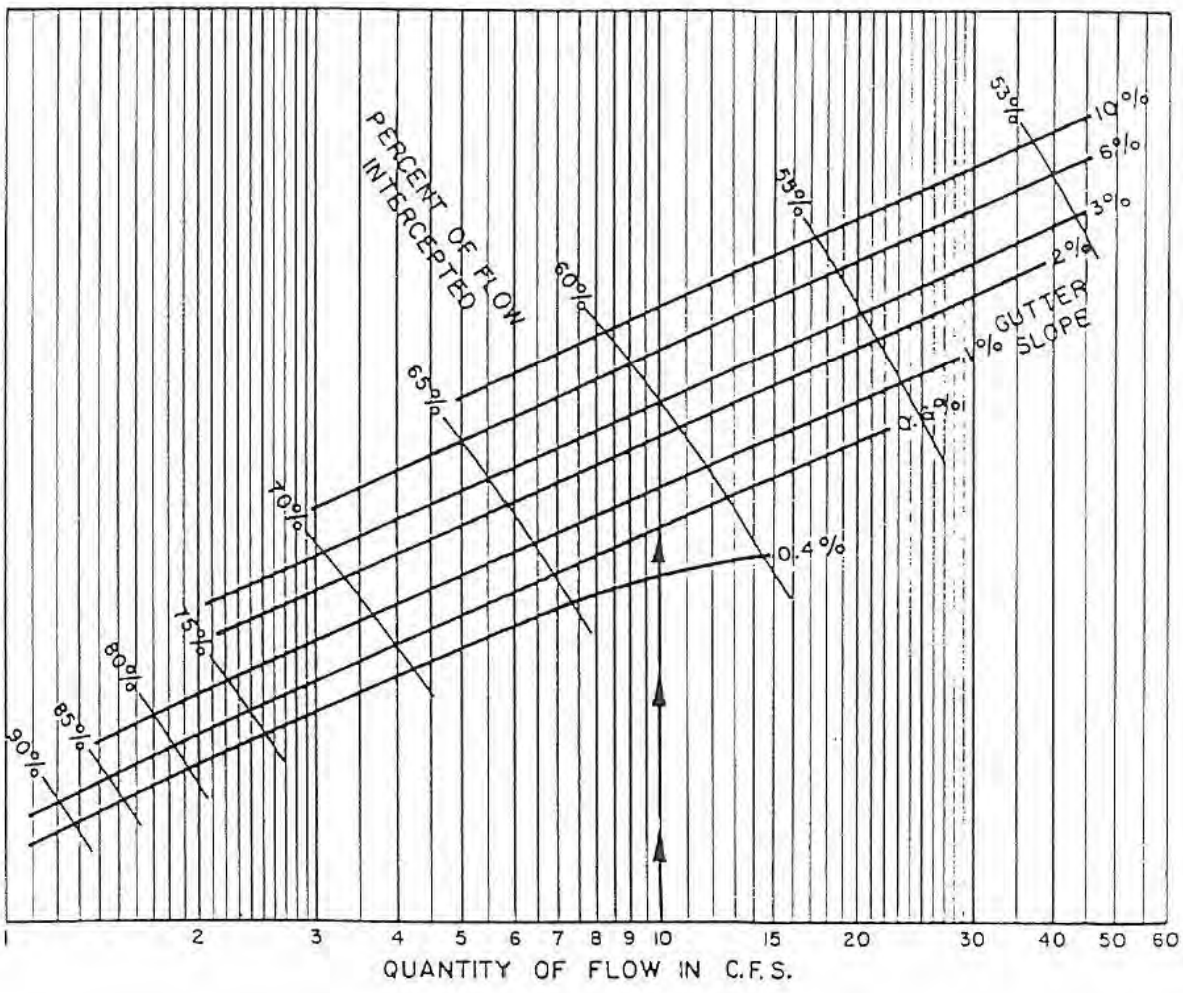
Instructions for Form 3.2: Inlet Design Calculation Table

Column (1)	Inlet number or designation, starting with the most upstream inlet.
Column (2)	Street Alignment/ Name in which the inlet is located.
Column (3)	Station along the alignment in which the inlet is located.
Column (4)	Offset distance and side (RT/LT) inlet is located.
Column (5)	Design Storm Frequency, shall be 100-yr for all inlets.
Column (6)	Runoff coefficient taken from Table 3.2.
Column (7)	Contributing drainage area ID.
Column (8)	Minimum inlet time of concentration taken from Table 3.3.
Column (9)	Using the time of concentration and design storm frequency, the rainfall intensity is taken from Figure 3.1.
Column (10)	Runoff area to inlet in acres.
Column (11)	Solution of Equation 3.1.
Column (12)	Taken from Column (39) of the upstream inlet.
Column (13)	$= Column\ (9)\left\{\begin{matrix} Column(12) + \\ \{Column(6) * Column(10)\} \end{matrix}\right\}$
Column (14)	Thoroughfare Type Taken from Section 2 Streets, (P6D, M4D, M4U, M3U, Minor Collector, Local, Alley, Parking).
Column (15)	Determined by location of inlet (On-Grade or Sag).
Column (16)	Manning's n value.
Column (17)	Street longitudinal gutter slope of the street taken in (feet/feet).
Column (18)	Street crown type on which the inlet is located.
Column (19)	Street cross-slope in feet/feet .
Column (20)	Gutter depression depth, reference Figure 3.3.
Column (21)	Gutter depression width, reference Figure 3.3.
Column (22)	Determined by the type of thoroughfare in the permissible spread width section.
Column (23)	Solution of Equation 3.7.
Column (24)	The product of Column (22) and Column (19).
Column (25)	The product of Column (23) and Column (19).
Column (26)	Solution of Equation 3.5 using the maximum allowable pond width from Column (22).
Column (27)	Solution of Equation 3.12.
Column (28)	Solution of Equation 3.13.
Column (29)	Solution of Equation 3.14.
Column (30)	Solution of Equation 3.15.
Column (31)	Solution of Equation 3.11 using Columns (27) and (28).
Column (32)	Solution of Equation 3.11 using Columns (29) and (30).
Column (33)	Solution of Equation 3.10.
Column (34)	Solution of Equation 3.9.
Column (35)	Solution of Equation 3.8 for on-grade curb inlets, Equation 3.18 for sag curb inlet, or Equation 3.20 for drop inlets.
Column (36)	Selected Inlet Size.
Column (37)	The capacity of the selected inlet size of Column (35), solution found by

	iteratively solving for capacity based on Equation 3.8 for curb inlets, Equation 3.17 for sag curb inlets, Equation 3.19 for drop inlets.
Column (38)	For on-grade inlets the solution of Equation 3.16.
Column (39)	Equal Column (38) divided by Column (9).
Column (40)	Next downstream inlet to which by the by-pass is going.
Column (41)	Special design comments are entered here.

EXAMPLE

Known:



Quantity of Flow = 10.0 c.f.s.
Gutter Slope = 0.6 %

Find:

Capacity of Two Grate Combination Inlet

Solution:

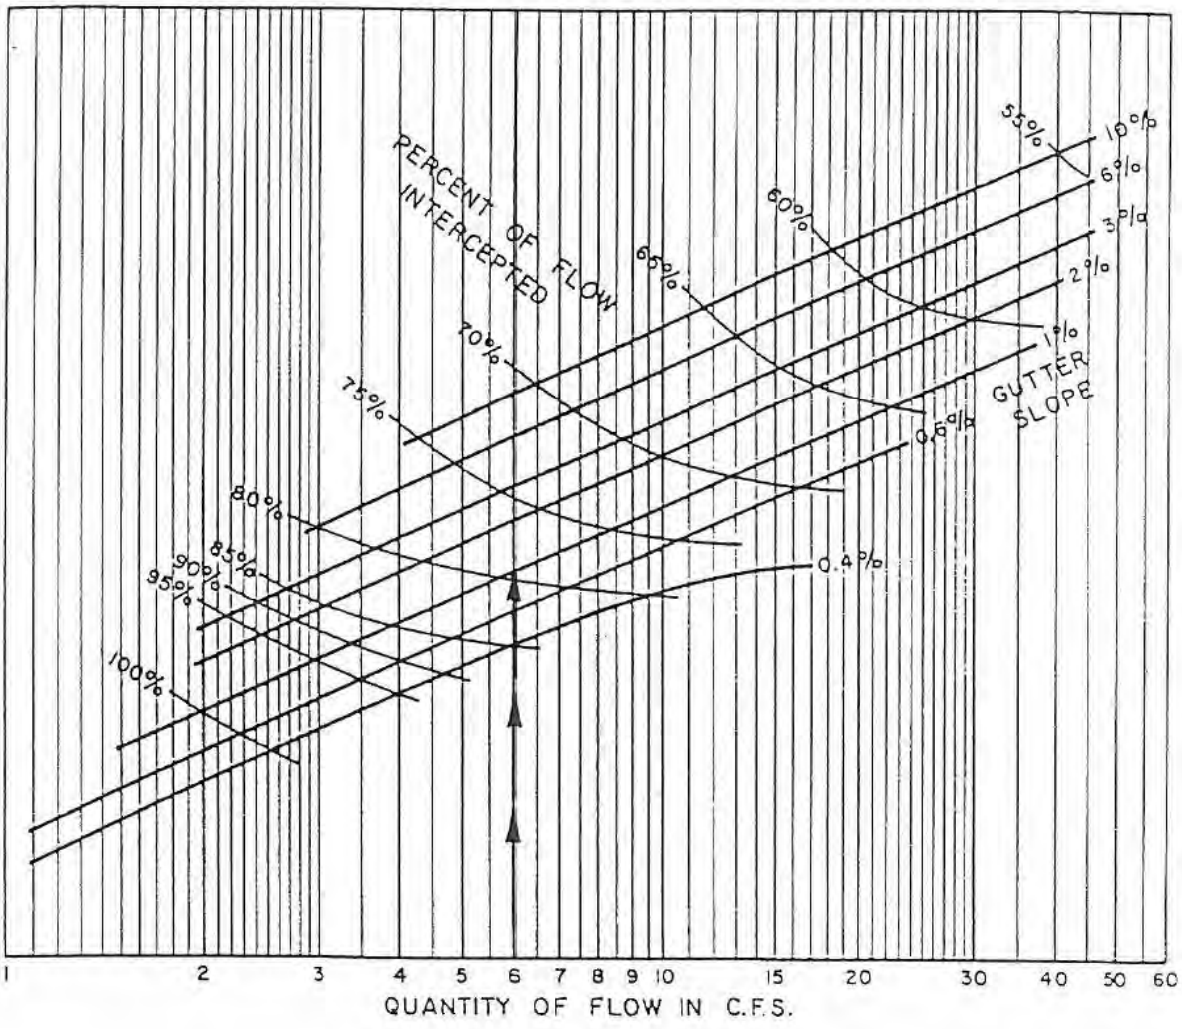
Enter Graph at 10.0 c.f.s.
Intersect Slope = 0.6 %
Read Percent of Flow Intercepted = 62 %
62 % of 10.0 c.f.s. = 6.2 c.f.s. as Capacity of Two Grate Combination Inlet
Remaining Gutter Flow = 10.0 c.f.s – 6.2 c.f.s. = 3.8 c.f.s.

TWO GRATE COMBINATION INLET CAPACITY CURVES ON GRADE

Figure 3.13: Two Grate Combination Inlet Capacity Curves on Grade

EXAMPLE

Known:



Quantity of Flow = 6.0 c.f.s.
Gutter Slope = 1.0 %

Find:

Capacity of Four Grate Combination Inlet

Solution:

Enter Graph at 6.0 c.f.s.
Intersect Slope = 1.0 %
Read Percent of Flow Intercepted = 79 %
79 % of 6.0 c.f.s. = 4.7 c.f.s.
as Capacity of Four Grate Combination Inlet
Remaining Gutter Flow =
6.0 c.f.s. – 4.7 c.f.s. = 1.3 c.f.s.

FOUR GRATE COMBINATION INLET
CAPACITY CURVES
ON GRADE

Figure 3.14: Four Grate Combination Inlet Capacity Curves on Grade

EXAMPLE

Known:

Figure 3.20: Combination Inlet Capacity Curves at Low Point

3.2.2 Flow in Storm Drain Conduits and Their Appurtenances

3.2.2.1 Hydraulic Gradient of Conduits

A storm drainage conduit must have sufficient capacity to discharge a design storm with a minimum of interruption and inconvenience to the public using streets and thoroughfares. The size of the conduit is determined by accumulating runoff from contributing inlets and calculating the slope of a hydraulic gradient from Manning's Equation:

$$S_f = \frac{Qn^2}{1.49AR^{2/3}}$$

Equation 3.21

where:
Q = flow in conduit, (cfs)
n = Manning's roughness coefficient; value = 0.013
A = cross sectional area of flow, (ft^2)
R = hydraulic radius, (ft)
S_f = hydraulic friction slope, (ft/ft)

Hydraulic gradient for the selected conduit size shall be 1.50' below gutter (2.0' below top of curb) for each contributing inlet to insure that the selected conduit will carry the design flow at an elevation below the gutter profile. As the conduit size is selected and the hydraulic gradient is plotted between each inlet pickup point, a head loss due to a change in velocity and pipe size must be incorporated in the gradient profile.

At an outfall/headwall the starting hydraulic grade line (HGL) for a conduit system shall be set to the greater of the following: the conduit soffit or the 100yr water surface elevation for the receiving channel or detention pond.

Concrete pipe conduit shall be used to carry the storm water, and flow chart, FIGURE 3.21, based on Manning's Equation may be used to determine the various hydraulic elements including the pipe size, the hydraulic gradient and the velocity. Special hydraulic calculators are also available for solution of Manning's Equation.

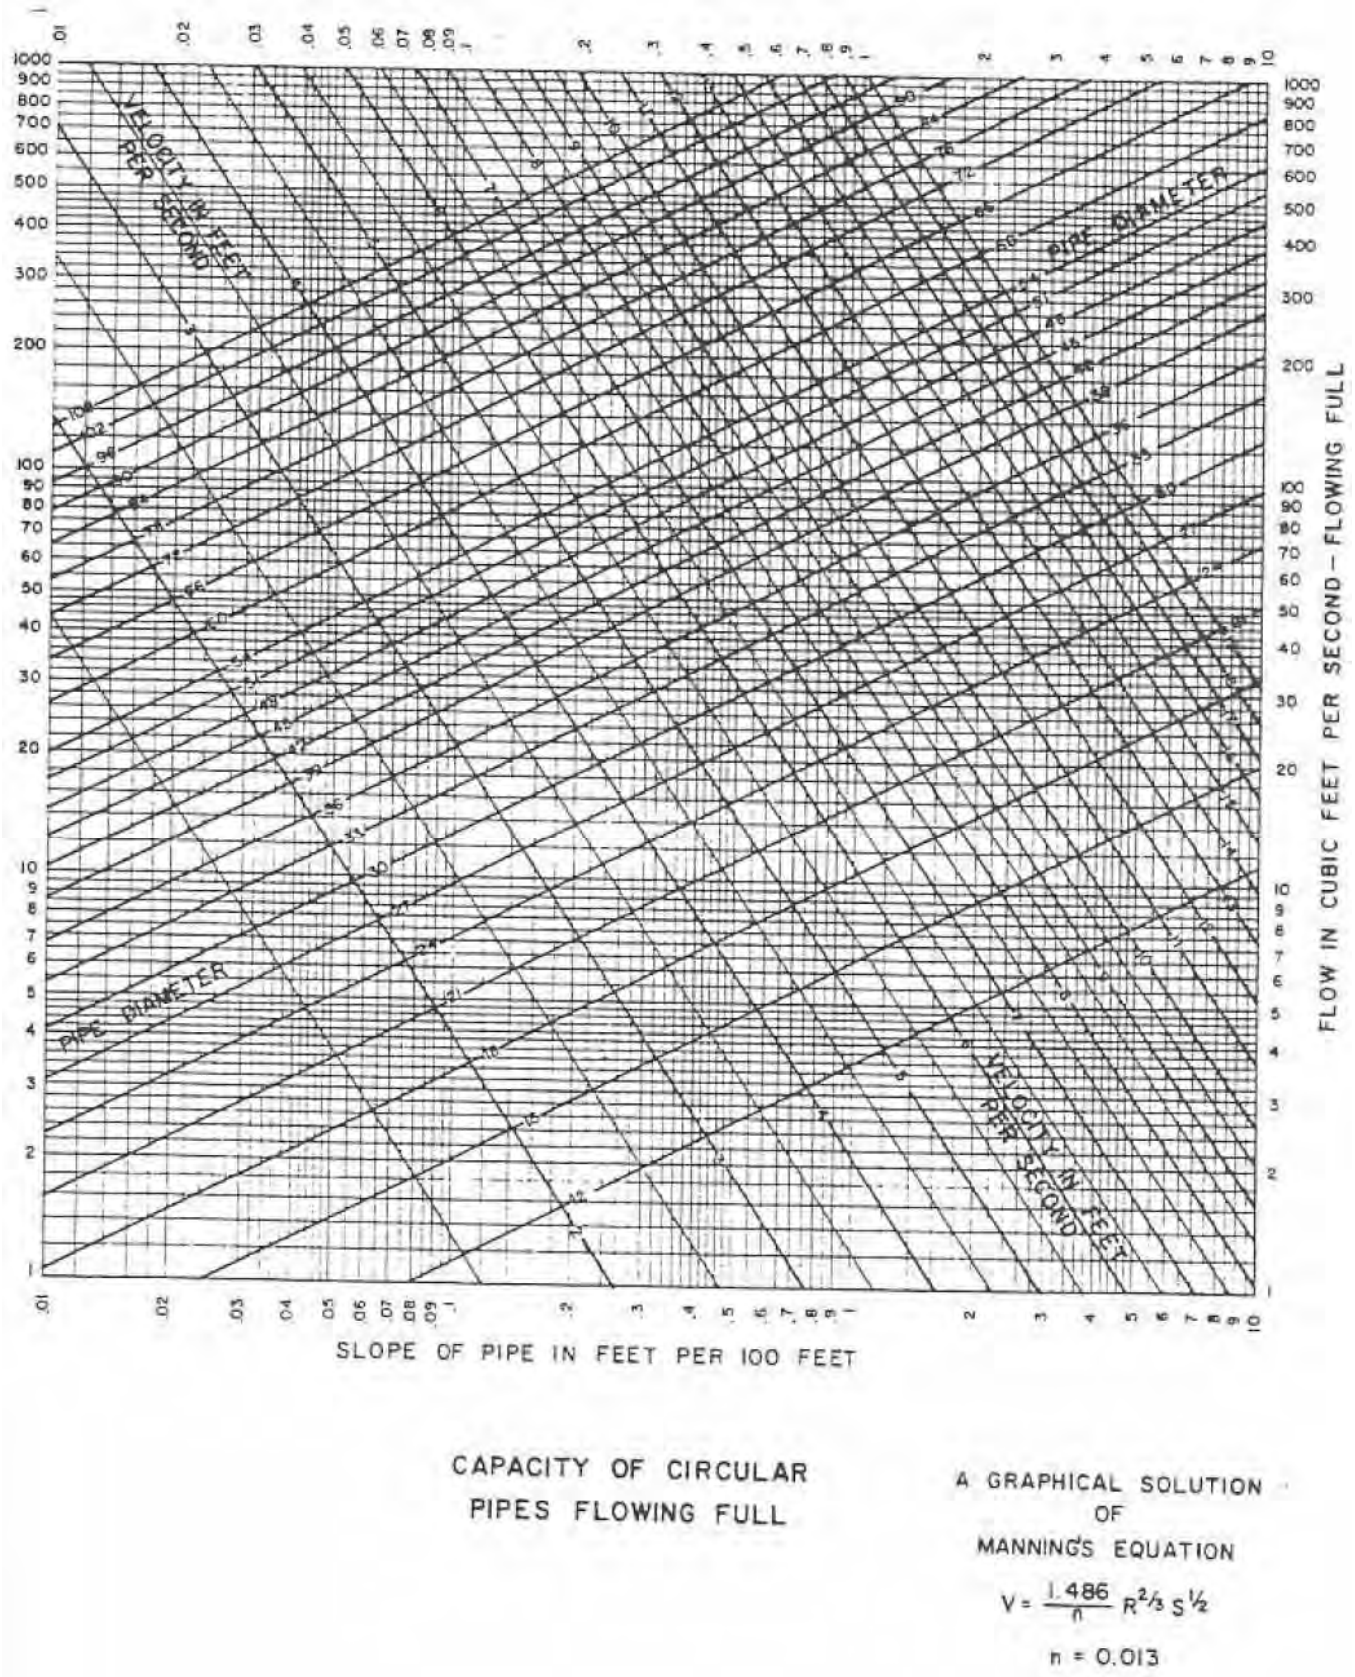

Figure 3.21: Capacity of Circular Pipes Flowing Full

The roughness coefficient 'n' for storm sewer conduit shall be 0.013.

With the hydraulic gradient established, considerable latitude is available for establishment of the conduit flow line. The inside top of the conduit must be at or below the hydraulic gradient thus allowing the conduit to be lowered where necessary. The hydraulic gradient at every inlet should be plotted directly on the construction plan profile worksheet and adjusted as necessary.

There will be hydraulic conditions, which cause the conduits to flow partially full, and where this occurs, the hydraulic gradient should be shown at the inside crown (soffit) of the conduit. This procedure will provide a means for conservatively selecting a conduit size, which will carry the flood discharge.

All public storm sewer systems shall be reinforced concrete pipe. Storm sewer pipe, with two (2) feet or less of cover, are required to be Class IV reinforced concrete pipe. All storm pipes and laterals are required to have a plan and profile on engineering plans. All flow data (Q_{100}, Q_{cap}, velocity, hydraulic slope) is required at every change in pipe size, slope and/or change in flow rate.

3.2.2.2 Minor Head Losses

When establishing the hydraulic gradeline of a storm sewer, minor head losses at points of turbulence shall be calculated and included in the computation of the hydraulic gradeline.

Entrance Losses

Entrance losses to a closed storm sewer system from an open channel or lake shall be calculated using Equation 3.22.

$$H_L = K_E \frac{{V_1}^2}{2g}$$

Equation 3.22

where:
H_L = head loss (ft)
K_E = head loss coefficient (see Table 3.7).
V_1 = velocity in the downstream conduit (ft/s)
g = the acceleration of gravity (32.3 ft/s^2)

Table 3.7: Entrance Loss Coefficients

Type of Structure and Design of Entrance	Coeff. K_E
Pipe (Concrete)	
Projecting from fill, socket end (groove-end)	0.2
Projecting from fill, square cut end	0.5
Headwall or headwall and wingwalls	
Socket end of pipe (groove-end)	0.2
Square-edge	0.5
Rounded (radius = 1/12D)	0.2
Mitered to conform to fill slope	0.7
End-section conforming to fill slope	0.5
Beveled edges, 33.7- or 45-degree bevels	0.2
Side- or slope-tapered inlet	0.2
Pipe, or Pipe-Arch, (Corrugated Metal)	
Projecting from fill (no headwall)	0.9
Headwall or headwall and wingwalls square-edge	0.5
Mitered to conform to fill slope, paved or unpaved slope	0.7
End-section conforming to fill slope	0.5
Beveled edges, 33.7- or 45-degree bevels	0.2
Side- or slope-tapered inlet	0.2
Box (Reinforced Concrete)	
Headwall parallel to embankment (no wingwalls)	
Square-edged on 3 edges	0.5
Rounded on 3 edges to radius of 1/12 barrel dimension or beveled edges on 3 sides	0.2
Wingwalls at 30- to 75-degrees to barrel	
Square-edged at crown	0.4
Crown edge rounded to radius of 1/12 barrel dimension dimension, or beveled top edge	0.2
Wingwall at 10- to 25-degrees to barrel	
Square-edged at crown	0.5
Wingwall parallel (extension of sides)	
Square-edged at crown	0.7
Side- or slope-tapered inlet	0.2

Inlet Losses

Inlet losses shall be calculated using Equation 3.23.

$$H_L = 1.25 \frac{V_{Lat}{}^2}{2g}$$

Equation 3.23

where:
H_L = head loss (ft)
V_{LAT} = velocity in the lateral (ft/s)
g = the acceleration of gravity (32.2 ft/s^2)

Expansion Losses

For pipe size expansions, head loss shall be calculated using the following Equation 3.24.

$$H_L = \left(1 - \left(\frac{D_1}{D_2}\right)^2\right)\frac{V_1{}^2}{2g}$$

Equation 3.24

Where:
H_L = head loss (ft)
V_1 = upstream velocity (ft/s)
D_1 = upstream conduit diameter (ft)
D_2 = downstream conduit diameter (ft)
g = the acceleration of gravity (32.2 ft/s^2)

Manhole and Bend Losses

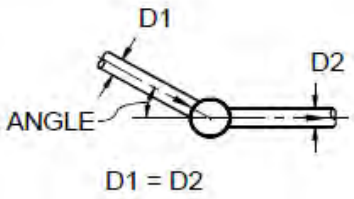
Head losses associated with manholes for pipe direction changes and bends in pipes of equal diameter shall be calculated using Equation 3.25.

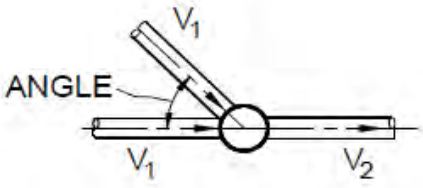
$$H_L = K_j\frac{V_2{}^2}{2g}$$

Equation 3.25

Where:
H_L = Head loss (ft)
K_j = Head loss coefficient (see Table 3.8).
V_2 = Downstream velocity (ft/s)
g = the acceleration of gravity (32.2 ft/s^2)

Junction Losses





Head losses associated with wye connections or manholes with branch laterals entering the main line shall be calculated by using Equation 3.26.

$$H_L = \frac{V_2{}^2}{2g} - K_j\frac{V_1{}^2}{2g}$$

Equation 3.26

Where:
H_L = Head loss (ft)
V_1 = Velocity in the upstream conduit (ft/s)
V_2 = Velocity in the downstream conduit (ft/s)
K_j = Head loss coefficient from Table 3.8.
g = the acceleration of gravity (32.2 ft/s^2)

3.2.2.3 Minimum Grades

Storm drains should operate with flow velocities sufficient to prevent excessive deposits of solid materials; otherwise objectionable clogging may result. The controlling velocity with regard to sediment deposition is near the bottom of the conduit and considerably less than the mean velocity of the storm. Storm drains shall be designed to have a minimum mean velocity flowing full of 2.5 feet per second (f.p.s.). Table 3.9 indicates the minimum grades for concrete pipe with "Manning's "n" = 0.013 and flowing at 2.5 f.p.s.

Table 3.9: Minimum Grades for Storm Drain Pipelines

Pipe Dia. (Inches)	Slope (foot/foot)	Pipe Dia. (Inches)	Slope (foot/foot)
18	0.0018	48	0.0005
21	0.0015	54	0.0005
24	0.0013	60	0.0004
27	0.0011	66	0.0004
30	0.0009	72	0.0003
33	0.0008	78	0.0003
36	0.0007	84	0.0003
39	0.0006	90	0.0002
42	0.0006	96	0.0002
45	0.0005	102	0.0002

3.2.2.4 Maximum Velocities

The slope of a storm sewer should also be such that excessive velocities will not damage the pipeline or drainage structures. Table 3.10 delineates the maximum desirable velocities for storm sewer.

Table 3.10: Maximum Velocities in Closed Conduits

Type of Conduit	Maximum Velocity
Culverts	15 f.p.s.
Inlet Laterals	15 f.p.s.
Storm Sewer Pipe	12.5 f.p.s.

* The maximum velocities shall be the actual velocity – full flow or partial flow.

3.2.2.5 Discharge of Storm Drain Pipe

Storm drain pipes discharging into Lake Ray Hubbard shall be set such that the top of the pipe shall be set at elevation 435.5 or otherwise approved by the City Engineer. Discharge into Lake Ray Hubbard will require approval from the City of Dallas. Pipes discharging into the lake

shall run to the lake to prevent erosion of the shoreline (City of Dallas detail, see Exhibit 3A). Where storm drain pipes discharge into water courses, the invert of the pipe shall be at the same grade as the low point of the water course and angled a maximum of sixty (60) degrees to flow downstream. Adequate grouted rock riprap or other erosion protection shall be provided. Storm sewers shall discharge into open channels at a maximum velocity of eight (8) feet per second.

3.2.2.6 Manholes

Storm drain manholes shall be located at intervals not to exceed five hundred (500) feet for all underground storm conduit systems. Manholes shall also be placed at locations where CCTV and Vac-con equipment can inspect/clean entire system without getting stuck or unable to make bends/wye connection turns. Therefore manholes shall also be placed where there is no more than one (1) bend or wye connection between manholes or inlets. Inlet and manhole lids shall be twenty-four (24) inches with locking lids.

3.2.2.7 Lateral Lines

The minimum size of reinforced concrete storm sewer line from the inlet box to the collector lines shall be eighteen (18) inches in diameter for a discharge of less than 10 cfs. Where discharge exceeds 10 cfs and/or connects to a ten (10) foot inlet, lateral lines shall be a minimum of twenty-one (21) inches in diameter.

Exhibit 3A

3.2.2.8 100-Year Flood Zones

Where the Federal Emergency Management Administration (FEMA) has defined a flood hazard area with regard to a drainage course as shown on the effective Flood Insurance Rate Maps (FIRMs), the flood hazard zone and the floodplain, floodway, cross-section lines and water surface elevations at each cross-section, if available, shall be shown on the plat and engineering plans.

3.2.2.9 Local 100-Year Flood Zones

Where flood information has not been determined for streams, creeks, channels, or impoundments located within or adjacent to a proposed development, the 100-year fully developed flood elevations and flood boundaries shall be determined by the developers' engineers. The local floodplain, cross-section lines and water surface elevations at each cross-section shall be shown on the plat and engineering plans.

3.2.2.10 Floodplain Markers

The City will provide floodplain markers to be installed by the developer which shall be placed at the property corner of each lot adjacent to the flood plain and a maximum distance apart of 300 feet along the floodplain line.

3.2.2.11 Inlet Markers

The City will provide "No Dumping, Drains to Waterway" inlet markers to be installed on each inlet by the developer.

3.2.2.12 Dumpsters

If a dumpster is to facilitate any type of food, food by-product, or oil/grease based product disposal, the dumpster site area shall drain through a private oil/water separator prior to connecting to the storm water system. All dumpster surface area must drain into a private slot or area drain to prevent any drainage from leaving the dumpster area. This private system shall discharge into a storm system and cannot discharge into a wastewater system.

3.2.2.13 Fueling Stations

If there is a fueling station on the site the storm line serving the fueling station drainage area shall have an oil/water separator installed before leaving the site. This private system shall discharge into a storm system and cannot discharge into a wastewater system.

3.2.2.14 Testing

All storm sewers and laterals shall be visually inspected by photographic means (television and DVD) at the contractor's expense prior to final acceptance by the City of Rockwall. Any sags, open joints, cracked pipes, etc. shall be repaired or removed by the contractor at the

contractor's expense. Pipes shall be cleaned prior to televising the pipe. The contractor shall furnish a DVD to the Engineering Department inspector for review.

3.2.3 Storm Sewer Design – Closed Conduit

3.2.3.1 General

To facilitate the design of closed conduit storm sewers, design will be based on the calculations called out in this section and the instructions for Form 3.3: Storm Sewer Calculations. Form 3.3 in its entirety shall be included in the plans and calculations shall be provided for each system including laterals.

Column (6)	Size of Pipe in inches
Column (7)	Span of Box Conduit
Column (8)	Rise of Box Conduit
Column (9)	Conduit Type (ex. RCP, RCB, PVC, HDPE, ….)
Column (10)	Conduit area
Column (11)	Wetted Perimeter
Column (12)	Equal to Column (10) divided by Column (11)
Column (13)	Manning's Roughness Coefficient
Column (14)	Conduit flowline elevation at the upstream end of conduit section
Column (15)	Conduit flowline elevation at the downstream end of conduit section
Column (16)	Conduit slope in feet/feet
Column (17)	The incremental drainage area ID contributing to the conduit section
Column (18)	The incremental drainage area in acres contributing to the conduit section
Column (19)	The incremental drainage area runoff coefficient contributing to the conduit section
Column (20)	Equal to Column (18) multiplied by Column (19)
Column (21)	Equal to Column (20) plus Column (21) of the upstream conduit section
Column (22)	Equal to inlet Tc if most upstream conduit section, or the sum of previous conduit section Column (22) and Column (29)
Column (23)	Design Storm Frequency shall be 100-yr
Column (24)	Shall be taken from Figure 3.1 using Columns (22) and (23)
Column (25)	Solution of Equation 3.1 using Columns (21) and (24)
Column (26)	Solution of Manning's Equation 3.6 where the conduit is flowing full (depth of flow is equal to height of conduit)
Column (27)	Yes, if Column (25) < Column (26). No, if Column (25) ≥ Column (26)
Column (28)	The actual velocity within the conduit
Column (29)	Equal to Column (4) divided by Column (28) divided by 60 sec/min
Column (30)	Solution of Equation 3.21
Column (31)	Equal to Column (4) multiplied by Column (30)
Column (32)	Upstream Hydraulic Grade Line. Equal to Column (33) plus Column (31)
Column (33)	This is the beginning hydraulic gradient of the line. It is equal to the Design HGL Column (38) for the next downstream segment, or the beginning HGL of the system.
Column (34)	Velocity Head of the incoming pipe at the wye, junction, inlet or manhole.
Column (35)	Velocity Head of the outgoing pipe (the pipe segment being analyzed) at the wye, junction, inlet or manhole.
Column (36)	Upstream junction type (ex. Inlet, 60° Wye, 30° Bend, Jct. Box, ….)

Column (37)	Taken from Tables 3.8
Column (38)	Taken for Equations 3.23 through 3.26 depending on Junction Type
Column (39)	Upstream Hydraulic Grade Line design point of the conduit segment. Column (24) plus Column (32)
Column (40)	The top of curb elevation at which the inlet is located
Column (41)	Equal to the Column (40) minus Column (39)
Column (42)	Special design comments are entered here.

3.2.4 Storm Sewer Design – Open Channels

3.2.4.1 General

All channels shall be designed to have a minimum bottom width of six (6) feet and based on a maximum flow and a minimum flow line slope of one (1) percent. Side slopes of channels shall not be steeper than one (1) foot rise to four (4) feet horizontal distance. Where slopes are steeper than 4 to 1, the slopes shall be concrete lined for slope protection. In unlined open channels, the side slopes and channel slopes shall be such that erosion is controlled and the channel is stable. Channels discharging into Lake Ray Hubbard must have City of Dallas approval and shall have inverts a minimum of two (2) feet below normal conservation pool level (435.5). Channels discharging into water courses shall have the same invert level as the water course.

The instructions for Form 3.4: Open Drainage Channel Calculations Table, have been included in this section to facilitate the hydraulic design of an open channel.

INSTRUCTIONS FOR FORM 3.4:
OPEN DRAINAGE CHANNEL CALCULATIONS

Column (1)	Downstream limit of the section of channel under consideration.
Column (2)	Upstream limit of the section of channel under consideration.
Column (3)	Type of channel as shown shall be either Type I natural unimproved channel, Type II unlined with maintenance section, (concrete pilot channel) or Type III, concrete lined channel.
Column (4)	Flow in the section of channel under consideration.
Column (5)	Roughness coefficient of the channel cross-section taken from TABLE 3.11.
Column (6)	Slope of the channel which is most often parallel to slope of the hydraulic gradient.
Column (7)	Square root of Column (6).
Column (8)	Calculation is made using the values in Columns (4), (5) and (7).
Column (9)	Assumed width of the bottom width of the channel.
Column (10)	Assumed depth of flow.
Column (11)	Assumed slope of the sides of the channel.
Column (12)	Area of flow which is calculated based on Columns (9), (10) and (11).
Column (13)	Wetter perimeter calculated from Columns (9), (10) and (11).
Column (14)	Value is calculated from Columns (12) and (13).
Column (15)	Column (14) raised to 2/3 power.
Column (16)	Product of Column (13) times Column (15).
When the value of Column (16) equals the value of Column (8) the channel has been adequately sized. When the value of Column (16) exceeds the value of Column (8) by more than five percent, the channel width or depth should be decreased and another trial section analyzed.	
Column (17)	Calculation is based on the values of Columns (4) and (12)
Column (18)	Calculation is based on Column (17)
Column (19)	Remarks concerning the channel section analyzed may be entered.

Table 3.11: Roughness Coefficients for Open Channels and Maximum Velocity

Channel Description	Roughness Coefficient Minimum	Roughness Coefficient Normal	Roughness Coefficient Maximum	Maximum Velocity
Minor Natural Streams - Type I Channel				
Moderately Well Defined Channel

3.2.5 Culvert Design

3.2.5.1 General

The design of culverts shall be sized to convey the discharge of the design flood frequency of 100-yr fully-developed watershed. The hydraulic calculations shall be entered into Form 3.5, which is further described herein. If computer modeling software is used in culvert design such as HY-8, HEC-RAS, etc. all input and output parameters shall be included in the plans, or in a certified report referenced in the plans.

Where a parallel culvert is to be placed in a roadside ditch the culvert headwalls shall start at the end of the curb return and extend beyond the return.

1. Information in the upper right of form:

- Culvert Location – This is a word description of the physical location.
- Length – The actual length of the culvert.
- Total Discharge, Q – This is the flow computed on FORM 3.1.
- Design Storm Frequency – 100-year storm
- Roughness Coefficient, n – value = 0.013.
- Maximum Discharge Velocity – Obtained from TABLE 3.12.
- Tailwater – This is the design depth of water in the downstream channel and is obtained in connection with the channel design performed on FORM 3.4.
- D.S. Channel Width – This is the bottom width of the downstream channel. The culvert should be sized to approximate this width whenever possible.
- Entrance Description – This is a listing of the actual condition as shown in the “Culvert Entrance Data” shown on the calculation sheet.
- Roadway Elevation – The elevation of the top of curb at the upstream end of culvert.
- U.S. Culvert F.L. – The flow line of the culvert at the upstream end.
- Difference – The difference in elevations of the roadway and the upstream flow line.
- Required Freeboard – The vertical distance required for safety between the upstream design water surface and the roadway elevation or such other requirements, which may occur because of particular physical conditions.
- Allowable Headwater – This is obtained by subtracting the freeboard from the difference shown immediately above.
- D.S. Culvert F.L. – The flow line elevation of the downstream end of the culvert.

- Culvert Slope, S – This is the physical slope of the structure calculated as indicated.

The instructions for FORM 3.5: Culvert Design Calculations Table have been included in this section to facilitate the hydraulic design of a culvert.

Table 3.12: Culvert Discharge Velocities

Earth (Clay)	8
Sodded Earth	8
Concrete	15
Shale	10
Rock	15

*Velocities are based on actual velocity – partial or full flow

INSTRUCTIONS FOR FORM 3.5:
CULVERT DESIGN CALCULATONS

Columns 1 through 10 deal with selection of trial culvert size and are explained as follows:	
Column 1	Total design discharge, Q, passing through the culvert divided by the allowable maximum velocity gives trial total area of culvert opening.
Column 2	Culvert width should be reasonably close to the channel bottom width, W, downstream of the culvert.
Column 3	Lower range for choosing culvert depth is trial area of culvert opening, Column 1 divided by channel width, Column 2.
Column 4	Allowable headwater obtained from upper right of sheet.
Column 5	Trial depth, D, of culvert corresponding to available standard sized and between the numerical values of Columns 3 and 4.
Columns 6, 7 and 8 are solved simultaneously based on providing a total area equivalent to the trial area of opening in Column 1.	
Column 6	Number of culvert openings.
Column 7	Inside width of one opening.
Column 8	Inside depth of one opening if culvert is box structure or diameter if culvert is pipe.
Column 9	Column 6 multiplied by Column 7 and Column 8.
Column 10	Total discharge divided by number of openings shown in Column 6.
Columns 11 through 15 (Inlet Control) and 16 through 27 (Outlet Control) deal with headwater calculations which verify hydraulics of trial culvert selected and are explained as follows.	
Column 11	Obtained from upper right of sheet.

Column 12	When the allowable headwater is equal to or less than the value in Column 8, enter Case I. When the allowable headwater is more than the value in Column 8, enter Case II.
Column 13	Column 10 divided by Column 7.
Column 14	Obtained from FIGURE 3.22 for box culverts or FIGURE 3.23 for pipe culverts.
Column 15	Column 14 multiplied by Column 8.
Column 16	Obtained from upper part of sheet.
Column 17	Obtained from FIGURE 3.24 for box culverts and FIGURE 3.25 for pipe culverts.
Column 18	Tailwater depth from upper right of sheet.
Column 19	Culvert slope, S, multiplied by culvert length, both obtained from upper right of sheet.
Column 20	Sum of Columns 17 and 18, minus Column 19.
Column 21	Obtained from FIGURE 3.24 for box culverts and FIGURE 3.25 for pipe culverts.
Column 22	Critical depth obtained from FIGURE 3.26 for box culverts and FIGURE 3.27 for pipe culverts.
Column 23	Sum of Columns 22 and 8 divided by 2.
Column 24	Tailwater depth from upper right of sheet.
Column 25	Enter the larger of the two values shown in Column 23 or Column 24.
Column 26	Previously calculated in Column 19 and may be transposed.
Column 27	The sum of Columns 21 and 25 minus Column 26.
Column 28	Enter the larger of the values from either Column 15, Column 20 or Column 27. This determines the controlling hydraulic conditions of the particular size culvert investigated.
Column 29	When the Engineer is satisfied with the hydraulic investigations of various culverts and has determined which would be the most economical selection; the description should be entered.

3.2.6 Bridge Design

A. A scour analysis shall be performed and submitted in or with the design plans.

B. For all bridges a flood study report shall be prepared and provided to the City Engineer, documenting the methodology, assumptions, derivation of all data used, and results of the study.

C. The 100-yr projected fully developed water surface elevation shall not be increased upstream or downstream of the bridge.

3.2.7 Erosion Hazard Setback

3.2.7.1 Definition and Purpose

Erosion hazard setbacks shall be determined for every stream and creek (flowing or not) in which natural channels are to be preserved. The purpose of this erosion hazard setback is to reduce the potential for any damage to a private lot, building, utilities or street right-of-way caused by the natural erosion of the creek bank and to minimize the expenditure of public funds for stream bank stabilization projects. The erosion hazard setback shall be included within the drainage easement and its own lot and block that is maintained by the property owner for the stream/creek for any property plat or re-plat.

3.2.7.2 Determination

The erosion hazard setback shall be determined by the following steps:

- Locate the toe of the natural stream bank. The toe may be located outside of the low flow channel.
- Project at a 4(H):1(V) line sloping away from the center of the creek/stream until it intersects natural ground or the new proposed elevation, whichever results in the greater setback.
- From this intersecting point continue an additional 15 feet horizontally away from bank. This shall set the limit of the erosion hazard setback.
- In certain scenarios the calculated erosion hazard setback is within the 100-yr fully developed floodplain. In these scenarios, the erosion hazard setback shall be set to 10 feet beyond the 2 foot of freeboard elevation for the 100-yr fully developed floodplain.

The typical erosion hazard setback established by steps above is shown in Figure 3.28.

Proof of determination of the above shall be included in the Engineering Plan set. It shall include the following:

- Locating and labeling of the toe of the natural stream bank. If trapezoidal in nature both toes shall be identified.
- Existing one-foot topographic contours of the entire site.
- Projected hypothetical one-foot contours representing the 4(H):1(V) line sloping away from the center of the creek/stream until it intersects natural ground or the new proposed elevation
- Show and label hypothetical projected intersecting point/top of 4:1 slope line.
- Show and label Erosion Hazard Setback (15 foot offset away from bank of intersecting point/top of 4:1 slope line)
- Show and label 100-yr fully developed floodplain.
- Show and label 2 foot freeboard line.
- Show and label 10 foot offset of the 2 foot freeboard line.
- Show and label the required Drainage Easement that encompasses the Erosion Hazard Setback and Floodplain.

3.2.7.3 Non-Permitted Structures

The following are non-permitted structures within the erosion hazard setback: building, wall, parking lot, driveway, fences, decks, swimming pools, signage, monumentation, detention structures/ponds or other structures. Water and wastewater lines shall be placed beneath the projected 4:1 slope line. The pipe shall be concrete encased when there is less than 4 foot of cover from the 4:1 slope line.

3.2.7.4 Modifications

Any modifications to the erosion hazard setback will require the following items and approval by the City Engineer:

- A geotechnical and stream geomorphological stability analysis signed and sealed by a licensed professional geotechnical engineer within the State of Te xas.
- Structural plans, calculations and report of the permanent stream bank stabilization measures signed and sealed by a licensed professional structural engineer within the State of Texas.
- Grading permit.
- Adequate access to maintain the stream bank stabilization measures indefinitely.

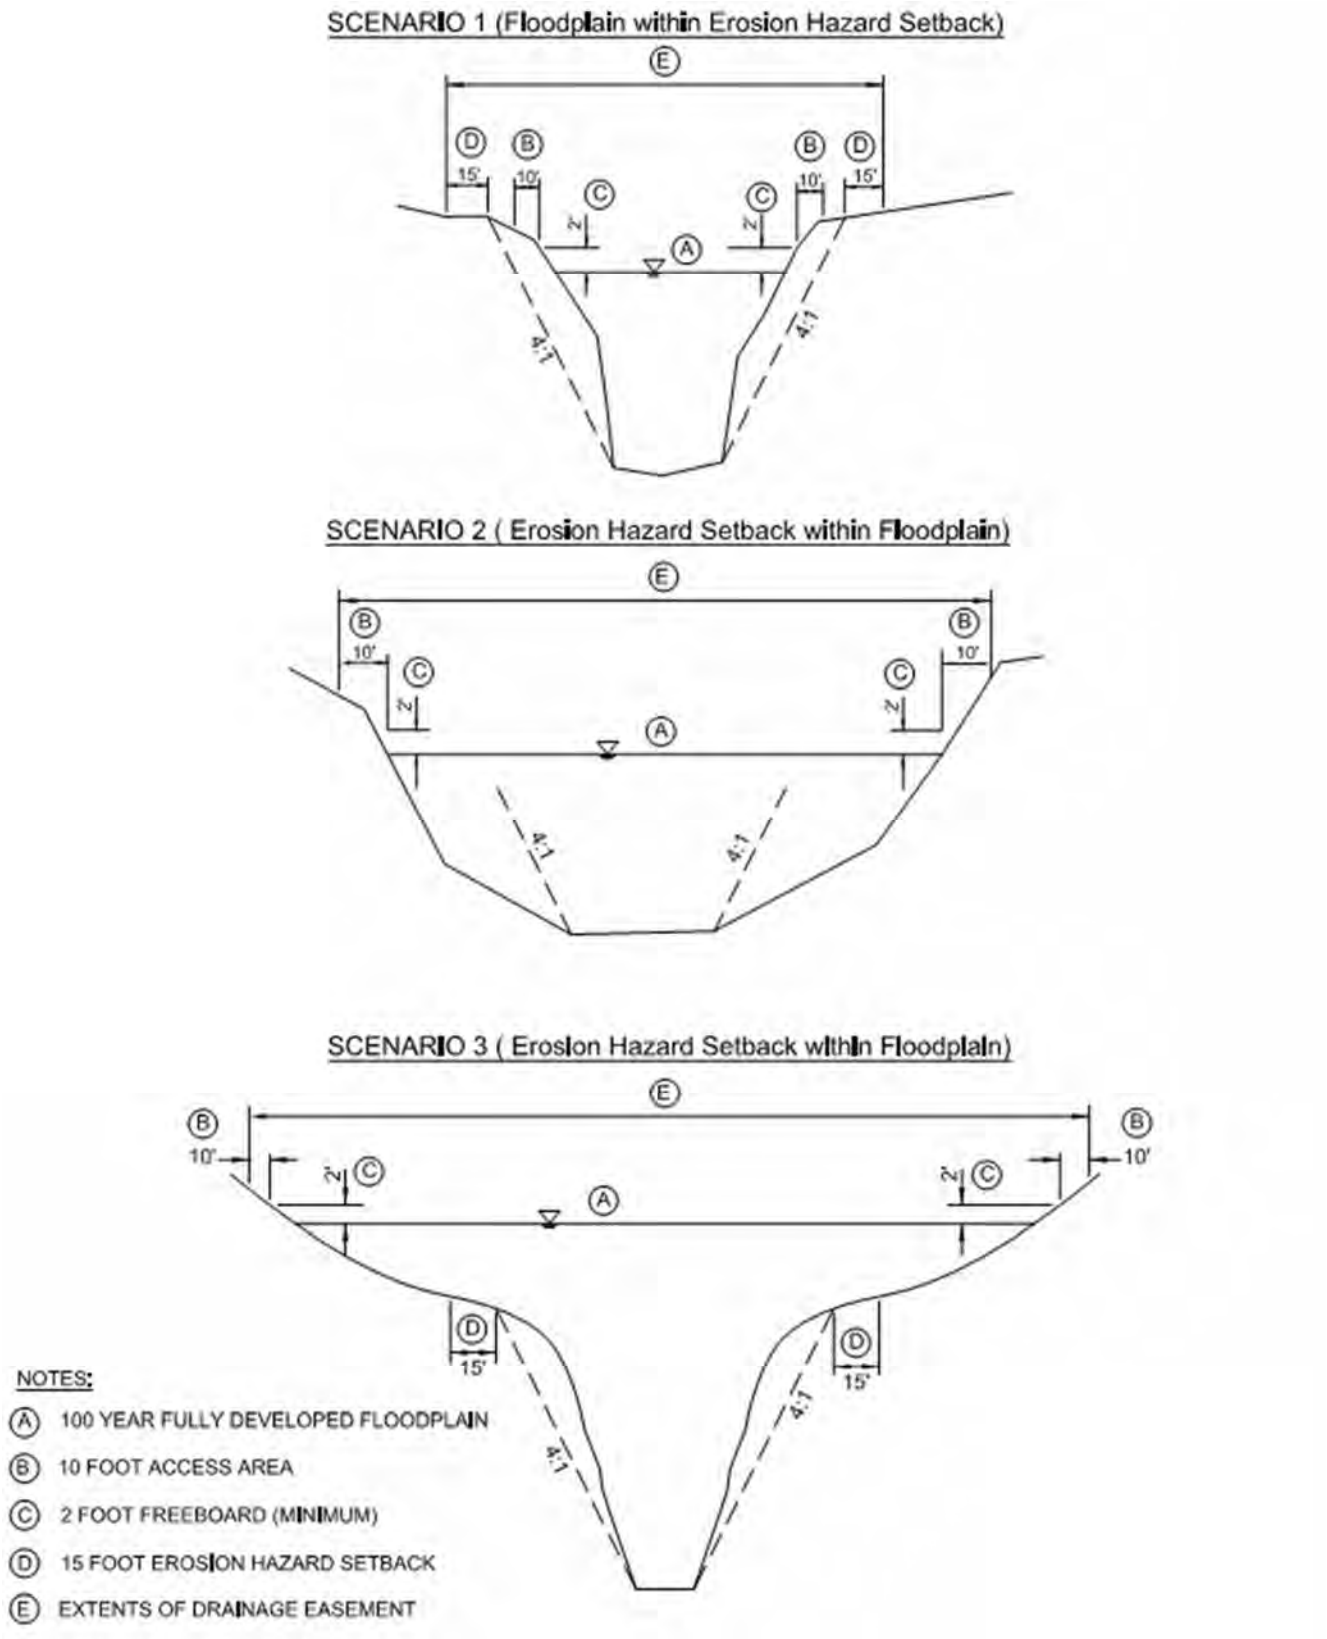

Figure 3.28: Erosion Hazard Setbacks and Drainage Easements

3.3 Minimum Freeboard Requirements

To help prevent flood damages and protect public safety, all design elevation requirements related to water surface elevations and flood elevations shall be based, at a minimum, on the 100-year flood, fully-developed watershed conditions. The difference between a minimum design elevation above the 100-year flood is commonly referred to as minimum freeboard. Table 3.13 provides a summary of absolute minimum freeboard requirements for design and construction in the City of Rockwall. However, prudent engineering in setting design elevations should be incorporated into any design. In some situations, a greater freeboard than those listed in Table 3.13 may be required by the City, at the discretion of the City Engineer, or as required by State and Federal regulations and guideline, depending of flood hazard potential in relation to property damages and public safety. The City's minimum freeboard requirements are not intended to take precedence over State and Federal regulations (except when the City's requirements exceed those set by State and Federal regulations). The minimum elevations of all flood protection levees and all dams must meet requirements of all State and Federal regulations and guidelines.

Table 3.13: Minimum Freeboard Requirements

Description	Minimum Freeboard above 100-year Flood Elevation (ft)*
Minimum Floor Elevations (including basements and sunken floor areas):	
Residential	2.0
Non-Residential (unless flood proofed; see flood damage prevention ordinance	2.0
Building Pad Elevations for Structures (at lowest adjacent structure grade)	1.0
Dams (freeboard above effective crest elevation of dam, after allowing for settlement and consolidation of embankment):	
Less than or equal to 5-ft maximum height	1.0
More than 5-ft maximum height (must meet State and Federal Requirements)	2.0
Dams with entire embankment having overflow protection (such as concrete)	1.0
Detention and Retention Ponds (freeboard along all shoreline areas around the pond):	
Per dam height:	
With Dams less than or equal to 5-ft maximum height	1.0
With Dams more than 5-ft maximum height	2.0
Incised Ponds (no dam)	1.0
Per area draining to pond:	
1 acre or less drainage area	0.0
5 acres to 1 acre drainage area	1.0
Greater than 5 acres	2.0
Flood Protection Levees, Dikes, or Walls (City Engineer Approval Required):	
Significant or High Hazard Flood Damage or Public Safety Potential	3.0
Low Hazard Flood Damage Potential or Public Safety Potential	2.0
Public Roadways, Alleys, and Parking Lots (as measured from edge of pavement/top of curb)	1.0

Channels	1.0
Bridges (as measured from lowest point of low chord)	1.0
Culverts (as measured from edge of pavement/top of curb)	1.0
Sanitary Sewer and Water Manhole Covers	2.0

*The 100-year flood elevations as determined based on discharges resulting from a fully-developed watershed. Greater freeboard may be required, at discretion of City Engineer (depending on flood hazard potential) or by State and Federal Regulations.

3.4 Detention

3.4.1 Intent

It is the City's intent to utilize detention (or detention/retention) of storm water runoff as a solution towards control of potential hazards created by storm water runoff including; reduction in the impact on downstream storm water drainage facilities; prevention of erosive conditions in water drainage ways; protection against downstream and adjacent property damage; and preservation of existing floodplains along major creeks. Detention basins may also improve water quality by allowing some sediment to settle out.

3.4.2 Where is Detention Required?

A. All non-residential development (or other redevelopment areas that will not impact the storm water flow) shall construct detention facilities.

B. Residential developments shall construct detention facilities if it is determined that the downstream system does not have adequate hydraulic capacity for the developed flow and the capacity of the downstream system cannot be increased to allow the conveyance of the developed flows.

C. All development within the Squabble Creek, Buffalo Creek and Little Buffalo Creek watersheds will construct detention facilities and provide a flood study using hydrology and hydraulic models, to prove that the proposed development will not cause any increase in peak flood discharge rates and flood elevations at all computed points downstream of the proposed development. For Squabble Creek this study shall extend downstream to Lake Ray Hubbard, for Buffalo Creek it shall extend downstream through Rockwall Lake Dam, for Little Buffalo Creek it shall extend downstream to the crossing of Horizon Road(FM 3097)..

3.4.3 Type of Detention Facilities

The following detention facilities are to be utilized for detention.

3.4.3.1 Site of ½ Acre or Less

A. Underground
B. On concrete Parking Surface (max 1-foot water depth)

3.4.3.2 Site of Greater Than ½ Acre, On-site

A. Underground

B. On concrete Parking Surface (max 1-foot water depth)
C. Detention Basin
- Side Slopes 4 to 1, or Less (no fencing allowed)
- Area to be Landscaped
- Maintained by Developer
- Additional Amenities Preferred
- Ownership Stays With Property Owner
- Dams Over 5-foot to be approved by State. Dam must meet state dam safety guidelines.

3.4.3.3 Greater Than ½ Acre, Off-site Shared

A. Detention Basin Shared with Other Developments
- May Expand Existing Pond
- No Increase in 100-year Flood Plain Elevation
- Capacity Expanded Above Existing Water Surface
- Need Engineering Study

B. Flow to Regional Detention Basin
- Regional Facility Manager (owner of facility) Must Approve Improvements
- Developer/s Funds Improvements to Regional Basin
- Developer/s Improves Storm Water Conveyance System to Basin (based on fully-developed 100-year flow)
- Dams Over 5-foot to be approved by State. Dam must meet state dam safety guidelines.
- Dam Cannot be Over 15-feet tall
- Basins with Water Retention to have Stored Water Depth of at Least 4-feet
- Need Landscaping and Amenity Features (Approved by Planning Dept.)
- Facility Manager to Assure Good Retained Water Quality
- Trash Collectors Required at Outfall Structures
- Side Slopes to be 4 to 1 or Less
- Developer/Owner Owns and Maintains Basin
- Facility Manager to Develop and Perform Maintenance Program
- Underground (preferred); Natural Open Channel (existing creek with 100-year developed capacity); Developer/s to Obtain Additional Drainage Easement for 100-year Developed Flow Area; No Concrete or Gabion Sidewalls
- Possible Pro-rata from Other Developments that Utilize Basin

C. Existing Lake
- Lake Manager Must Approve
- Developer/s Fund Improvements to Lake
- Developer/s Improves Storm Water Conveyance System to Lake (developed 100-year flow): Underground (preferred); Natural Open Channel (existing creek with developed 100-year capacity);

Developers to Obtain Additional Drainage Easement for 100-year Developed Flow Area; No Concrete or Gabion Channel Sidewalls
- Additional Storage Out of 100-year Storage

3.4.3.4 Existing Ponds

A. Developer/s Improve Existing Undesirable Detention Facilities
   - Remove Fencing Where Possible
   - Provide Concrete Flume in Bottom
   - Provide Landscaping
   - Improve Maintenance Access
   - Reconstruct with Underground System
   - Remove Pond by Conveying Storm Water Flow to Shared Detention Facility without adverse impacts to other properties.

3.4.4 Geometry, Restrictions and Appurtenances

A. Detention ponds shall have a side slope 4:1 or flatter.

B. The detention pond bottom grade shall be at a minimum of 1% slope. A 4-inch thick concrete low flow flume shall be installed from the ponds inlet structure/structures to the outfall structure.

C. All detention ponds and reserved shoreline shall have the appropriate amount of freeboard as called out in Table 3.13 – Minimum Freeboard Requirements from the 100-year water surface, based on flood inflows determined assuming fully-developed watershed conditions (without consideration of any future upstream detention), including incised ponds (without embankment/dams), or a higher design criteria if required by the State.

D. The State of Texas has jurisdiction of all dams, regardless of dam height or impoundment storage size, if they are classified by State regulations and guidelines with hazard classifications as “high – or significant-hazard”. [Reference: Texas Administrative Code, Title 30, Part 1, Chapter 299, Subchapter A, (a)(3)]. Dams with maximum height of over 5 feet must be approved by the State, unless the dam maximum height is less than 15 feet and a registered professional engineer licensed in Texas adequately shows, with an engineering study using the State of Texas Dam Safety guidelines and regulations, that a sudden breach of the dam during and a major flood event, as specified and determined by the State’s procedures, would not cause any significant increase in flooding or significant increase is flood damages as compared to a non-breach of the dam during a non-breach flood event. For dams permanently impounding water, the study should also determine the extent of additional flooding that would be caused by a sudden breach of the dam during non-flooding events. If the breach of the dam can be proven to not cause any significant flood

damages (other than to the dam embankment), then it can be proven to be classified as a "low-hazard" dam by State definition, and the dam may be exempt, at the City Engineer's discretion, from requiring State review and approval. However, regardless of whether the dam design is reviewed by the State, all dams, regardless of size, must have an emergency spillway and be designed, constructed, maintained, and operated per State Dam Safety Guidelines, including emergency action management. The maximum height of the dam, hazard classifications, and "significant" increased flooding (as related to embankment breach analyses) are determined based on the State's definitions and regulations.

E. No detention is allowed in the FEMA 100-yr and local 100-yr fully developed floodplain.

F. No detention pond is allowed with outlet elevation below a receiving stream's or channel's 100-yr fully developed flood elevation.

G. No franchise utilities (Gas, Electric, Cable, Telephone, Communications, etc.), water lines and wastewater lines (except storm systems) are allowed in detention ponds, and detention easements.

H. Underground detention systems must be a fully enclosed pipe system.

I. The detention pond shall have an emergency overflow in case the main outfall structure gets clogged. The emergency overflow shall be sized to pass the fully-developed 100-year flood at a minimum, or greater based on State Dam Safety requirements. City-approved erosion protection shall be placed along the length of the emergency overflow to the flowline of the receiving structure, creek or channel, and extended as necessary to prevent erosion of the dam structure.

J. The detention systems are to be installed and verified for design compliance along with the associated storm sewer and outfall structures and drainage channels, prior to any paving operations. All constructed detention ponds, drainage ways, and open channels shall have the sides and bottom stabilized with sod or anchored seeded matting prior to any paving construction (including building slab). The matting or sod shall be anchored at high velocity locations if deemed necessary. Erosion protection is to be placed at the pond's outflow structure along with any associated erosion BMP's noted on the erosion control plan

K. Sometimes a detention facility will be utilized by several developments, and then a pro-rata agreement/detention masterplan may be entered into with the development constructing the facility and the other developments utilizing the facility Without a pro-rata agreement/detention master plan of all parties in advance of construction of all combined developments, no

new proposed development will be allowed to take credit for any "over detention" of a previous development or the reduction of discharges from a previous development within the watershed in the determination of detention requirements.

L. Detention pond outfall structures shall be fitted with a trash rack.

3.4.5 Detention Calculations

The detention design calculations and outfall rating curves shall be included in the plans and flood study. Increased peak discharges from the detention basin are not allowed for the 5-year, 10-year, 25-year and 100-yr frequency floods based on existing off-site conditions.

3.4.5.1 Methodology

Detention facilities that have a drainage area of less than 20 acres shall be sized using the Modified Rational Method. If the drainage area is equal to or greater than 20 acres then the Unit Hydrograph Method shall be used. The Modified Rational method may be used for drainage areas more than 20 acres but the Unit Hydrograph Method must be performed as a comparison. The more conservative of the two methods shall be used to design the pond (and technical documentation of both methods should be provided to the City for review and verification of the most conservative method selected).

The following conditions shall be used when implementing the Modified Rational Method.

A. The proposed development will construct detention facilities to detain the increase in runoff between the existing 100-year flows (C-undeveloped, T_C = 20 minute) and the fully developed flows (C – depends on zoning, T_C = 10 minute). The "C" value is based on zoning, not pervious/impervious areas. Large area of dedicated open space dedicated to City can be considered by City in this value.

B. Storm rainfall intensity (in/hr) for different storm years shall be as follows:

	100 year	50 year	25 year	10 year	5 year	2 year
10 min	9.8	9.0	8.3	7.1	6.1	5.3
15 min	9.0	8.1	7.5	6.5	5.5	4.5
20 min	8.3	7.5	6.6	5.9	4.9	3.9
30 min	6.9	6.1	5.5	4.8	4.1	3.3
40 min	5.8	5.2	4.6	4.0	3.4	2.6
50 min	5.0	4.5	4.0	3.5	2.8	2.3
60 min	4.5	3.9	3.5	3.0	2.6	1.9
70 min	4.0	3.7	3.3	2.8	2.4	1.8
80 min	3.7	3.5	3.1	2.6	2.3	1.7

90 min	3.5	3.3	2.9	2.5	2.1	1.6
100 min	3.4	3.0	2.7	2.4	1.9	1.5
110 min	3.2	2.9	2.5	2.3	1.8	1.4

C. The following is an example calculation on how the Modified Rational Method is performed to determine detention volume:

MODIFIED RATIONAL METHOD DETENTION BASIN DESIGN

Given: A 10-acre site, currently agricultural use, is to be developed for townhouses. The entire area is the drainage area of the proposed detention basin.

Determine: Maximum release rate and required detention storage.

Solution:

1. Determine 100-year peak runoff rate prior to site development. This is the maximum release rate from site after development.

NOTE: Where a basin is being designed to provide detention for both its drainage area and a by-pass area; the maximum release rate is equal to the peak runoff rate prior to site development for the total of the areas minus the peak runoff rate after development for the by-pass area. This rate for the by-pass area will vary with the duration being considered.

2. Determine inflow hydrograph for storms of various durations in order to determine maximum volume required with release rate determined in Step 1.

NOTE: Incrementally increase durations by 10 minutes to determine maximum required volume. The duration with a peak inflow less than maximum release rate or where required storage is less than storage for the prior duration is the last increment.

PROCEDURE

STEP 1. Present Conditions (Agricultural)

$Q = C*I*A$
$C = 0.35$
$T_c = 20$ minutes
$I_{100} = 8.3$ in/hr
$Q_{100} = (0.35)(8.3)(10 \text{ acres}) = 29.05$ cfs (Maximum release rate)

STEP 2. Future Conditions (Townhouses)

C = 0.80
T_c = 10 minutes
I_{100} = 9.8 in/hr
Q_{100} = (0.80)(9.8)(10 acres) = 78.40 cfs

Check various duration storms:

15 minutes	I = 9.0 Q = (0.80)(9.0)(10 acres) = 72.0 cfs
20 minutes	I = 8.3 Q = (0.80)(8.3)(10 acres) = 66.4 cfs
30 minutes	I = 6.9 Q = (0.80)(6.9)(10 acres) = 55.2 cfs
40 minutes	I = 5.8 Q = (0.80)(5.8)(10 acres) = 46.4 cfs
50 minutes	I = 5.0 Q = (0.80)(5.0)(10 acres) = 40.0 cfs
60 minutes	I = 4.5 Q = (0.80)(4.5)(10 acres) = 36.0 cfs
70 minutes	I = 4.0 Q = (0.80)(4.0)(10 acres) = 32.0 cfs
80 minutes	I = 3.7 Q = (0.80)(3.7)(10 acres) = 29.6 cfs
90 minutes	I = 3.5 Q = (0.80)(3.5)(10 acres) = 28.0 cfs
100 minutes	I = 3.4 Q = (0.80)(3.4)(10 acres) = 27.2 cfs
110 minutes	I = 3.2 Q = (0.80)(3.2)(10 acres) = 25.6 cfs

Maximum Storage Volume is determined by deducting the volume of runoff released during the time of inflow from the total inflow for each storm duration.

10 min Storm	Inflow = (10)(78.4 cfs)(60 sec/min)	= 47,040 cf
	Outflow=(0.5)(20 min)(29.05 cfs)(60 sec/min)	= 17,430 cf
		= 29,610 cf
15 min Storm	Inflow = (15)(72.0 cfs)(60 sec/min)	= 64,800 cf
	Outflow = (0.5)(25 min)(29.05 cfs)(60 sec/min)	= 21,788 cf
		= 43,012 cf
20 min Storm	Inflow= (20)(66.4 cfs)(60 sec/min)	= 79,680 cf
	Outflow= (0.5)(30 min)(29.05 cfs)(60 sec/min)	= 26,145 cf
		= 53,535 cf
30 min Storm	Inflow = (30)(55.2 cfs)(60 sec/min)	= 99,360 cf
	Outflow = (0.5)(40 min)(29.05 cfs)(60 sec/min)	= 34,860 cf
		= 64,500 cf
40 min Storm	Inflow = (40)(46.4 cfs)(60 sec/min)	= 111,360 cf
	Outflow = (0.5)(50 min)(29.05 cfs)(60 sec/min)	= 43,575 cf
		= 67,785 cf
50 min Storm	Inflow = (50)(40.0 cfs)(60 sec/min)	= 120,000 cf
	Outflow = (0.5)(60 min)(29.05 cfs)(60 sec/min)	= 52,290 cf
		= 67,710 cf

60 min Storm	Inflow = (60)(36.0 cfs)(60 sec/min)	= 129,600 cf
	Outflow = (0.5)(70 min)(29.05 cfs)(60 sec/min)	= 61,005 cf
		= **68,595 cf**
70 min Storm	Inflow = (70)(32.0 cfs)(60 sec/min)	= 134,400 cf
	Outflow =(0.5)(80 min)(29.05 cfs)(60 sec/min)	= 69,720 cf
		= 64,680 cf
80 min Storm	Inflow = (80)(29.6 cfs)(60 sec/min)	= 142,080 cf
	Outflow = (0.5)(90 min)(29.05 cfs)(60 sec/min)	= 78,435 cf
		= 63,645 cf
90 min Storm	Inflow = (90)(28.0 cfs)(60 sec/min)	= 151,200 cf
	Outflow = (0.5)(100 min)(29.05 cfs)(60 sec/min)	= 87,150 cf
		= 64,050 cf
100 min Storm	Inflow = (100)(27.2 cfs)(60 sec/min)	= 163,200 cf
	Outflow = (0.5)(110 min)(29.05 cfs)(60 sec/min)	= 95,865 cf
		= 67,335 cf
110 min Storm	Inflow = (110)(25.6 cfs)(60 sec/min)	= 168,960 cf
	Outflow = (0.5)(120 min)(29.05 cfs)(60 sec/min)	= 104,580 cf
		= 64,380 cf

Maximum volume required is **68,595 cf** at the 60 min. storm duration.

3.4.5.2 Outfall Structures

Detention out fall structures shall be multi-staged and designed to detain the 5-yr, 10-yr, 25yr and 100-yr storm events without increasing the peak discharge. A chart shall be furnished by the design engineer showing the allowable flows verses the actual flows through the detention pond outflow structure for 5-yr, 10-yr, 25-yr, and 100-yr storm events.

When the design is based on the Modified Rational Method, outfall structures shall be designed in accordance to the equations established in Hydraulic Engineering Circular No. 22, Urban Drainage Design Manual (HEC-22). The Engineer shall include all calculations/ equations for the outfall structure in the plans, including each stage of the structure (5-yr, 10-yr, 25-yr, and 100-yr storm events).

When the detention pond and outfall structure is designed using a Unit Hydrograph Method (hydrology model) and a hydraulic model is being prepared (such as for a detention pond with dam located across a stream for which flood elevations will be determined), the outfall structure discharges may be determined with the hydraulic model. All

flow characteristics and conditions of the outfall structure should be adequately represented in the hydraulic model or other calculations to account for orifice flow conditions, weir flow conditions, and full-pipe and partially-full pipe flow conditions for all discharge openings, pipes, and overflow areas of both the discharge structure and the dam. The resulting discharge versus pond flood elevation data should be adequately represented in the hydrology model to ensure that the flood elevations computed with the hydrology model reasonably agree with those computed by the hydraulic model for all ranges of discharges.

City approved erosion protection shall be placed around the outfall structure and shall extend downstream the entire flow path length to the flowline of the receiving structure, creek or channel. The erosion protection shall extend to 2 feet above the 100-yr water surface elevation.

3.5 Floodplain Studies, Reclamation and Modification

All floodplain studies, reclamation, modification, flood boundary delineations and design of structures within or adjacent to creeks or streams shall meet the following guidelines set forth in this section and the most current Flood Hazard Damage Prevention and Control Ordinance.

A. The qualified professional engineer licensed in the State of Texas shall prepare a flood study report documenting all data, methodology, and assumptions used in the study. The study report shall be properly signed and sealed, and include a concluding statement certifying that the hydrologic and hydraulic study is based on standard engineering practice, that the project is constructed, or proposed to be constructed, as shown in certified engineering plans used in the study such that there will be no adverse increases in flooding or flood damages on other properties and that the project meets the requirements of all parts of the City's current Flood Hazard Damage Prevention and Control Ordinance.

B. Flood studies shall follow the general procedures set by FEMA for applying for a LOMR or CLOMR, including hydrologic and hydraulic modeling; drainage area workmap; floodplain workmap; annotated FIRM; FEMA forms; and complete technical documentation of all data used in the study, including, but not limited to, calculations of times of concentrations or lag times and calculations of other runoff parameters such as NRCS curve numbers. For hydrology models, drainage areas should be determined to the nearest 0.01 acre (0.000015 sq. mi.); times of concentration and lag times should be computed to the nearest 0.01 hour (6 min.); and NRCS composite runoff curve numbers should be computed to the nearest 0.1 value. Other requirements are contained in Unit Hydrograph Method Section of these standards. These

procedures shall be performed even for flood studies not being submitted to FEMA.

C. Floodplains and watersheds shall be modeled using standard practice engineering models that are public domain. The use of computer modeling software that is not public domain will require approval by the City Engineer. [The most recent versions of HEC-HMS and HEC-RAS are currently the City's preferred hydrology and hydraulic models for flood studies. The use of these models is highly encouraged in cases where a conversion from older models is desired or in previously-unstudied areas where new models are to be created].

D. All design elevations shall be based on computed flood elevations using flood discharges for 100-year projected fully-developed watershed conditions, including the effects of changes in storm water runoff and effects of encroachment and changes in flood valley storage caused by the proposed project.

E. All flood study models shall utilize the most current available models from the City or FEMA as base models (if available) and shall incorporate all additional modifications that have occurred since the last update of these models. Conversion of base models to newer approved digital models is allowed, as noted below.

F. Results of hydrology and floodplain hydraulic computer models shall be summarized in tabular form, to show differences in computed 100-year flood discharges and flood elevations. The computer model results to be included in the comparison tables include:

    a. The original effective base hydrology and hydraulic models, if available, as provided by the City or FEMA.

    b. Improved modeling procedures may be allowed and included, such as conversion of original models to newer versions of computer modeling software, such as conversion of HEC-2 models to HEC-RAS and conversion of TR-20 or HEC-1 models to HEC-HMS. Conversion to computer software that is not free public domain software and that is not on FEMA's approved list of computer modeling software must receive approval by the City Engineer. Results of conversion to improved modeling should be performed prior to any updates or corrections to the model data and compared in tabular form with the original base model results.

    c. Corrected hydrologic and hydraulic models (commonly referred to as "corrected effective" models by FEMA procedures) to include any improved data or needed corrections, such as new surveyed floodplain cross sections, inclusion of additional cross sections, or improved

topographic mapping, but should not include and man-made changes to the watershed or floodplain.

d. Pre-project hydrologic and hydraulic models, to update the computer models by adding man-made changes that have occurred in the watershed and floodplain since the date of the original effective base models. [If there are no updates based on man-made changes, then the "corrected effective" and "pre-project" models are the same].

e. Post-project hydrologic and hydraulic models, to include all changes that are included in the pre-project models, plus hydrologic and hydraulic characteristics that are representative of changes based on the project's proposed final completed construction. The post-project hydrology should include changes in runoff conditions related to modifications of land cover and grading, changes in times of concentration or lag times, alteration of stream channels and floodplain areas (including changes in floodplain valley storage and changes in flow velocities), changes in drainage areas and drainage patterns, and any proposed mitigation to prevent increases in flood discharges. The post-project hydraulic models should include effects to floodplain hydraulic characteristics, including changes in floodplain and channel configuration, such as encroachments, excavations, channelization, proposed hydraulic structures, clearing of areas that will be continually maintained, and changes in hydrology (flood discharges). The effects of temporary clearing of vegetation in areas that will not be maintained should not be included.

Hydrologic and hydraulic computer modeling must be provided for both existing watershed conditions (both pre-project and post-project conditions), with summary comparisons of various steps ("a" through "e", above) shown in tabular form, to include computed 100-year discharges and flood elevations. The results of hydrology and hydraulic post-project models will be compared with results of pre-project models to verify compliance of City Standards requiring no increased flooding on other properties. Additionally, hydrology and hydraulic models must be provided based on fully-developed watershed conditions with the proposed project. The results of the fully-developed condition models, will be used to determine compliance with the City's design elevation standards. When construction of a project will be in phases, the City Engineer may require flood studies to be submitted for each phase.

G. When transferring discharges computed by the hydrology models as input data entered into the hydraulic models, round-off of discharges is allowed only to the nearest one (1) cfs. All hydrology models should be set to compute discharges to the nearest one (1) cfs and flood elevations (such as in ponds) to the nearest 0.01 ft. All hydraulic models should be set to compute flood elevations to the nearest 0.01 ft. Locations of flow changes in the hydraulic

model should be carefully determined to avoid undue under-calculation of flood elevations. For example, in order to prevent unreasonable under-calculations of flood elevations along portions streams, discharges computed at sub-basin outlets along a stream should normally be used in the hydraulic model for a reasonable extended portion of the upstream floodplain reach, in order to avoid neglecting all of the lateral inflow within the upper stream reach in the hydraulic model computations.

H. The completed flood study, including detailed technical documentation; printed hydraulic and hydrological model input data and output results, digital model files (as listed in "F", above, for both existing and projected future fully-developed watershed conditions), supporting calculations, drainage area maps, floodplain boundary maps, and certification statement (as noted in "A.", above) shall be submitted to the City for review.

I. The watershed work map(s) should include the following:

a. Multiple watershed work maps may be submitted for pre-project and proposed project conditions, as long as all of the following items are provided.

b. Total watershed drainage area and sub-basin drainage delineation boundaries, including those representative of the original base hydrology model, the corrected drainage delineations (if any), and proposed project changes in drainage delineations and any added sub-basins. All sub-areas should be labeled in agreement with sub-area labels used in the hydrology models.

c. Topography overlaid on high-resolution aerial photography, with elevation contour labeling.

d. Delineation of hydrologic soil groups and land cover conditions (these may be included on a separate map, with drainage delineations).

e. Property boundaries of the tract of land where the proposed project is located, including any proposed division lines for the current and future project phases.

f. Proposed project, with proposed grading and changes in land cover.

g. Stream channel centerline flow path, with flow direction indicated.

h. Flow path used in determining times-of-concentration or lag times (both pre-project and modifications based on proposed construction).

i. Title block, legend, north arrow, and bar scale.

J. The floodplain work map(s) should include the following:

a. Multiple floodplain work maps may be submitted, as long as all of the following items are provided.

b. Floodplain cross sections, with location and orientation relative to the floodplain, with labels in agreement with the stations referenced in the hydraulic models. If the study involves a stream that has been previously studied, stream stationing should be in general agreement with stationing used in the previous study. For streams with no previous flood studies, the stream stationing should be based on channel distance upstream from the stream's point of termination (downstream location of where the stream enters a larger receiving stream or major lake (such as Lake Ray Hubbard).

c. Topography overlaid on high-resolution aerial photography, with elevation contour labeling.

d. Floodplain boundaries and flood elevations for the 100-year flood using discharges for both pre-project existing watershed conditions and modifications based on proposed project discharges.

e. Floodplain boundaries identified on the Flood Insurance Rate Maps as Special Flood Hazard Areas, and floodplain boundaries from previous studies (if available from the City) with 100-year flood elevations.

f. Floodplain boundaries and flood elevations for the 100-year flood based on projected fully-developed watershed conditions, with the proposed project.

g. Stream channel centerline (invert) with direction of flow indicated (for both pre-project and any changes in stream channel centerline based on the proposed construction).

h. Property boundaries of the tract of land where the proposed project is located, including any proposed division lines for the current and future project phases.

i. Title block, legend, north arrow, and bar scale.

K. In order for the City to maintain and update their hydrology and hydraulic computer models, after construction is completed, the developer's engineer must update and submit to the City their final certified flood study report, with hydrology and hydraulic models, along with all supporting calculations, maps,

report, AutoCAD (.dwg files), and GIS files and other exhibits to adequately represent as-built conditions. If the project has been submitted to FEMA, the updated models and revisions to flood study reports should include all modifications that were approved by FEMA.

L. The City Engineer will determine whether the proposed development will require a LOMR or CLOMR. All documentation prepared for submitting to FEMA (LOMRs/CLOMRs) will be reviewed by the City. The City will not approve the flood study prepared for a LOMR, nor sign a LOMR application form, until construction grading associated with the LOMR has been completed, certified "as-built" plans are submitted to the City, construction has been verified by onsite inspection(s), and all required Local, Federal, and State permits and approvals have been received.

M. The City will utilize an engineering consulting firm to assist City staff in the review of a flood study. The cost of this consultant review shall be borne by the developer, engineer, or property owner submitting the flood study. The City shall first obtain a cost estimate from the engineering consultant for the flood study review at time of the initial flood study submittal. Before the review begins, the developer, engineer, or property owner submitting the flood study shall deposit with the City funds equal to the cost estimate. The City shall disburse the funds to the consulting engineer as the review progresses. Should the consultant fees exceed the initial estimate, the developer, engineer or property owner submitting the flood study shall be informed of the shortage and a new estimate made by the consultant engineer to complete the flood study review. Additional funds will then be deposited with the City by the developer, engineer or property owner submitting the flood study to cover the estimated shortfall before the review of the study resumes. Any unused funds to be reimbursed to the developer, engineer or property owner submitting the flood study. If review process is performed by City staff, the City will submit a cost estimate for flood study review at time of the initial engineering submittal.

3.6 Storm Drainage Management Plan

3.6.1 General

Storm drainage facilities shall include all elements of a drainage system consisting of streets, alleys, storm drains, channels, culverts, bridges, swales and any other facility through which or over which storm water flows, all of which the City must have a right in, either in the form of a dedicated right-of-way, floodway or drainage easements.

3.6.2 Site Drainage

All new subdivisions shall provide as part of the subdivision review process a complete storm drainage management plan. This plan will include, but not be limited to, the following: a complete review of all on-site, upstream and downstream drainage within the impacted watershed; determine all on-

site and downstream drainage facility improvements due to the increased runoff from the proposed development and future upstream and downstream developments; and contain calculations necessary to determine compliance with the Standards of Design herein. Detention will be required if the downstream storm system is not capable of handling the proposed drainage flows. The plan shall be done, using current zoning conditions or land use prescribed by the City's Land Use Plan (whichever creates the greatest storm water runoff), with maximum development considered throughout the watershed. The storm drainage plan shall show all necessary improvements with flow data provided at each point of interception of water. As part of the storm drainage plan, the developer shall show a lot grading plan to direct all water to proper intersection points avoiding cross flow of water from lot to lot. All upstream discharge shall be intercepted and carried through the proper intersection points avoiding cross flow of water from lot to lot. All upstream discharge shall be intercepted and carried through the proposed development in compliance with the Standards of Design herein. All discharge from the proposed development shall be designed in accordance with the Standards of Design herein with all necessary improvements being installed by the developer to protect downstream property and adjacent properties from damage. The determination of necessary improvements to existing drainage facilities downstream of a proposed development shall be reviewed by the City Engineer for compliance and adequacy. Deviations from the City Engineer's recommendations and the Standards of Design herein may be approved through the requesting and granting of a variance by the City Council. If a storm drainage plan has been completed prior to new proposed development in question, the developer may use this plan if the City Engineer deems the existing plan is adequate.

3.6.3 Subdivision Development

All subdivision developments shall be built in complete compliance with a storm drainage plan as outlined herein. All lots shall be graded at the time of development in accordance with the plan. All grading shall not exceed a slope of 4 to 1 unless approved by the City Engineer. Approved erosion control shall be provided as part of the development construction on any or all lots within the development to protect the drainage, lot development and adjacent property.

The finish building pad for all subdivision developments shall be elevated to a minimum of 1.0 foot above the crown of the road. In no circumstance shall a building pad and finish floor of any structure be placed below street grade.

3.6.4 Construction Erosion Controls

Construction Erosion Controls shall follow the guidelines set out in NCTCOG's iSWM™ Technical Manual: Construction Controls April 2010, Revised 9/2014 or more recent revision.

In order to address the requirements of pollution reduction at construction sites, a variety of controls should be employed to reduce soil erosion, reduce sediment loss from the site, and manage construction-generated waste and construction related toxic materials. Controls consist of both temporary and permanent methods to reduce pollution from a construction site. The majority of controls address loss of soil from the site. Soil loss in the form of erosion and sediment due to storm events and wind constitute the majority of pollution generated from construction sites. Controls that address erosion and sediment are typically more site specific than waste and toxics management. Erosion and sediment controls are dependent on site slopes, drainage patterns and drainage quantities along with other site-specific conditions. Materials and waste management consists primarily of "good housekeeping" practices which are dependent on the type of construction and the quantity and type of building materials.

Control measures shall follow the control selection guide set forth in the iSWM manual. Control measures from each of the three categories; Erosion Controls, Sediment Controls and the Material and Waste Controls shall be used in the design of an Erosion Control Plan for a site. Standard details called out in Division 1000 of NCTCOG's Standard Specifications and Standard drawing shall be utilizes as well in the development of an erosion control plan.

Control Measures such are Silt Fences, Inlet Protection, rock berms, etc. shall be removed from the site once grass cover has been established. Grass cover shall be determined by the Vegetation section of these Standards.

1. Construction Entrance:

   No crushed concrete is allowed and rock must be a minimum of twelve (12) inches thick using well graded rock with minimum diameters of four (4) to six (6) inches.

2. Silt Fence:

   No wooden stakes to be allowed on any erosion control device.

3. Performance:

   Erosion from construction sites can be a significant water quality problem. Developing areas are cleared of vegetation during

construction leaving the soil exposed and susceptible to erosion. Runoff then transports eroded sediment from these areas and deposits it downstream. The accumulation of silt in streams and ponds is a form of water pollution that is unattractive and impedes drainage.

Prevention is a key aspect of erosion control. Many of the control methods presented herein can be placed in a manner that will protect highly erodible areas such as steep slopes. The prevention of erosion requires prior planning to ascertain the placement of selected control methods. The rewards of this planning will be a significant reduction in soil loss. Not only can soil loss be prevented, but eroded soil can be recovered on the construction site and used for fill.

The particulate material in construction site runoff is generally heavier and larger than particulates in urban runoff. These attributes facilitate the removal of the material whether the removal is by settling in a sediment trap or by filtration through a filter fence. Temporary sediment traps, filters and routing devices an effectively control erosion for construction sites if properly applied. These methods are even more effective when permanent management techniques are used in an effort to control temporary increases in sediment loads.

3.6.5 Lot Development

All lot developments shall include a drainage plan preventing all diversion of water from the approved path of discharge. The builder at the time of permit application shall furnish a grading plan in compliance with the appropriate chapter of the building code adopted by the City, the grading plan for the development and the storm drainage plan approved for that particular development. If the re-grading of a lot is necessary, the builder shall be required to furnish a new drainage plan indicating the diversion and rerouting of the affected storm water. When the re-grading of a lot prevents the drainage from flowing to the proper structures as designated in the drainage plan, then the builder will furnish a registered engineer's review for adequacy of existing structures to which the water is diverted. If improvements are necessary to provide for adequate drainage due to re-grading of a lot, then the improvement must be made at the builder's expense before a grading permit or other permits for construction will be issued by the City. The City Engineer will review the information submitted for compliance with the approved grading and drainage management plan. Accepted City streets are not to be used as an erosion control. No inlet protection is allowed in an accepted City street.

A. Off-Site Cost Sharing: The developer shall be fully responsible for the construction of off-site drainage improvements necessary for his subdivision and the surrounding area, unless other provisions are approved by the City Council. Provisions for reimbursement of cost in excess of those necessary to serve his subdivision, and any other provisions, shall be made a part of a facilities agreement. For any subsequent subdivision utilizing such facilities, any cost due prior developers shall be pro-rated based on the increased contribution of storm water runoff. Such pro-rated amounts shall be made a part of any subsequent agreement, collected by the City and repaid to the original developer making such improvements.

   The original developer shall provide the City with acceptable documentation of actual construction cost from which calculation of reimbursable amounts will be made for inclusion in the facilities agreement.

B. Exemptions: when a development is of two lots or less and in the City Engineer's opinion does not affect existing drainage facilities or affect the adjacent property, the City Engineer may allow the developer to waive any off-site pro-rata costs.

C. All City right-of-ways shall be sodded if disturbed. No artificial grass is allowed in any City right-of-way and/or easements.

D. Before Acceptance of Streets and Alleys silt fencing shall be placed at the back of curb/edge of all pavement.

City of Rockwall
The New Horizon

4. VEGETATION

4.1 General

All seeding, sodding and fertilizer requirements are to be done in accordance with the North Central Texas Council of Governments (NCTCOG) Standards and Specifications (Under Item 202) as modified by the City of Rockwall – Item 202

4.2 Coverage

The developer shall establish grass and maintain the seeded area, including watering, until a "Permanent Stand of Grass" is obtained at which time the project will be accepted by the City. A "Stand of Grass" shall consist of 75% to 80% coverage and a minimum of one-inch (1") in height as determined by the City. Re-seeding will be required in all washed areas and areas that don't grow.

All City right-of-ways shall be sodded if disturbed. No artificial grass is allowed in any City right-of-way and/or easements.

4.3 Planting Season

Type I Bermuda Grass – Hulled
50 lbs./acre, April through June

Type II Annual Rye Grass
40 lbs./acre, September through March

Type III Bermuda Grass – Unhulled
50 lbs./acre, January through March and July through August

A mix of seed shall be used in overlapping planting seasons.

4.4 Additional Information

For a public utility less than 10 inches in size no tree shall be planted within 5 feet of the utility and for a utility greater than or equal to 10 inches in size no tree shall be planted within 10 feet of the utility.

If trees are approved by Zoning to be within the right-of-way then a City approved root barrier will be required to be installed in order to keep roots from degrading the pavement structure.

Vegetation over two feet in height shall not be planted in any visibility easement or potential sight visibility (including medians).

5. WATER AND WASTEWATER SYSTEMS

5.1 General Requirements

The design and construction of the water and wastewater system to serve the development shall be in accordance with good engineering principles, with these Standards of Design, the Standard Specifications for Construction and the Standard Details and with the requirements of the Texas Commission on Environmental Quality (TCEQ).

All materials to be permanently incorporated for use on projects in the City of Rockwall shall be produced in the United States of America, alternate products must be approved in writing prior to installation by the City Engineer. Therefore, "Domestically produced in the United States of America" means all manufacturing processes must occur in the United States of America, to mean, in one of the 50 States, the District of Columbia, Puerto Rico or in the territories and possessions of the United States.

All on-site and off-site water and wastewater mains shall be sized and located to conform to projected demands in accordance with the current Water Master Plan and Wastewater Master Plan and the computer model with regard to the impact of each development on the existing and proposed water system. No construction shall commence prior to the approval of the plans and specifications by the City.

5.1.1 System Capacity Studies

A Water and Wastewater System Capacity Study shall be performed for all developments or re-developments that propose a change in existing land use (change in density) that does not conform to the City's current Water and Wastewater System Master Plan.

The City will utilize an engineering consulting firm to assist City staff in performing Water and Wastewater System Capacity Studies. The cost of this study, by the consultant, shall be borne by the developer, engineer, or property owner requesting the proposed change in land use. The City shall first obtain a cost estimate from the engineering consultant for the study at time of the initial submittal. Before the study begins, the developer, engineer, or property owner submitting for a change in land use shall deposit with the City funds equal to the cost estimate. The City shall disburse the funds to the consulting engineer as the study progresses. Should the consultant fees exceed the initial estimate, the developer, engineer or property owner submitting for the change in land use shall be informed of the shortage and a new estimate made by the consultant engineer to complete the study. Additional funds will then be deposited with the City by the developer, engineer or property owner to cover the estimated shortfall before the study is complete. Any unused funds to be

reimbursed to the developer, engineer or property owner submitting for a change in land use. If review process is performed by City staff, the City will submit a cost estimate for the study at time of the initial submittal.

5.1.2 Connections for Future Adjacent Developments

All development shall accommodate future adjacent and upstream/downstream developments by extending water and wastewater lines across the proposed development in order to create water and wastewater systems connectivity. This connectivity will provided for an ease of future development and limited disturbance to existing developments. These extensions of the water and wastewater facilities shall match the City's Water Master Plan and Wastewater Master Plan.

5.1.3 Easements

If a water or wastewater main is located on private property the mains shall be within an easement that conforms to the minimum width in Table 5.1.

Table 5.1: Water & Wastewater Line Easements – Minimum Width

		Minimum Easement Width (ft)
Conduit Size	<= 48" diameter	20'
	> 48" diameter	Approval City Engineer
Depth of Conduit	< 14'	20'
	14' - 16'	25'
	17' – 20'	30'
	21' – 23'	35'
	> 23'	40'

5.1.4 Separation of Water and Wastewater Lines

All water lines and wastewater lines shall be separated 10 foot horizontally and per TCEQ Rules and Regulations. Refer to the following:

- Chapter 290 - Public Drinking Water SUBCHAPTER D: RULES AND REGULATIONS FOR PUBLIC WATER SYSTEMS §§290.38 - 290.47
- Chapter 217 - Design Criteria for Domestic Wastewater Systems SUBCHAPTER C: CONVENTIONAL COLLECTION SYSTEMS §§217.51 - 217.70

For separation between storm lines, a spacing of 5 foot horizontal shall be maintained from outside dimension of storm pipe to the water or wastewater line.

5.1.5 Water and Wastewater Lines within TxDOT Right-of-Way

Water and wastewater lines within or crossing a TxDOT right-of-way shall meet the requirements of the TxDOT District Office and the TxDOT Utility Manual. Utility permits for lines within or crossing TxDOT rights-of-way shall be processed through the City's Engineering Department. TXDOT permit plan

sets shall be 11”x17” in size and signed and sealed by a licensed professional engineer with the State of Texas. Plan sets shall include all applicable TxDOT standard details and traffic control plans sheets to construct the lines.

5.1.6 Boring, Jacking and Tunneling

All water and wastewater mains to be installed in steel casing under existing roadways, railroads, and creeks and shall be installed by a method other than open cut, unless otherwise approved by the City Engineer. All boring of existing water lines mains shall be shall be by dry bore methods. All boring of water and wastewater lines shall be by dry bore methods. No wet bores will be allowed.

Steel casing thickness and diameter size shall be designed by the engineer of record for construction and maintenance of the carrier pipe per the requirements below. Raci patented casing spacers, or approved equal, shall be used. No bends and/or curves are permitted with casing pipes. Casings may also be required where deemed necessary by the City Engineer. The construction bore and receiving pit shall be located at a minimum distance of 4 feet behind the back of curb. The engineer of record shall provide a distance greater than 4 feet where there is no curb or barrier protection at the edge of pavement. Additional bore setback distances or shoring shall be required to maintain roadway integrity and the safety of construction personnel. When bore and receiving pits are located on private property, permanent water and wastewater easements for the pits will be required for the installation and future maintenance of the line.

The engineer of record shall design the pipe casing for the following loading conditions and/or applicable combinations thereof:

- Cooper's E-80 Railway loading or AASHTO HS20 loading, as applicable.
- Earth loading with the height of fill above the casing as shown on the plans as existing or finish grade whichever is greater.
- All other applicable loading conditions, including loads applied during transportation and handling.
- Max casing deflection of ½-inch from the above loading conditions.

Engineer of records shall consider the location, size, and depth of bore and receiving pits relative to existing utilities when establishing the beginning and ending stations.

Manufacturers: Paint Manufacturers for pipe casing shall be 46-465 H.B. Tnemecol – Tnemec Inc. or approved equal.

5.1.7 Crossings

5.1.7.1 Culvert Crossings

A steel encasement pipe shall be used to encase the carrier pipe with a minimum vertical clearance of two (2) feet from the bottom of the culvert and casing pipe. The encasement pipe shall be extended a minimum of five (5) feet from the outside edge of a box culvert or the outside diameter edge of the storm sewer for future maintenance of the carrier pipe. All culvert crossing shall be profiled.

5.1.7.2 Creek Crossings

Water and wastewater lines at creek crossing shall be design to go under the flowline of the crossing. The lines shall be in steel encasement pipe with a minimum vertical clearance of four (4) feet from the encasement pipe and the flowline of the creek to protect from future creek undercutting. The encasement pipe shall be extended to the creeks erosion hazard set back line for future maintenance of the carrier pipe. Where an erosion hazard set back does not exist due to a shallow creek the encasement pipe shall extend 15 feet on either side of the main channel of the creek. All creek crossings shall be profiled and shall show the erosion hazard set back line along with the projected 4(H):1(V) sloping line and 15 foot buffer from the intersecting point of the ground.

Aerial crossing of water lines are not allowed.

Aerial crossings for wastewater lines may be used only when all other alternatives have been evaluated and determined not to be feasible. Aerial crossings of wastewater lines require approval of the City Engineer. If an aerial crossing is to be installed, reference additional requirements in the Wastewater System Section.

5.1.7.3 TxDOT Highway Crossing

A steel encasement pipe shall be used to encase the carrier pipe at all TxDOT highway crossings. The crossing shall be at 90 degree (perpendicular) to the highway. All boring of water and wastewater lines shall be by dry bore methods. No wet bores will be allowed unless approved in writing by the TxDOT District Office.

5.1.7.4 Railroad Crossings

Prior to the design of any railroad crossing, the engineer of record shall contact the railroad and the appropriate regulatory agency to determine if there are any special design and/or construction requirements and shall copy the City Engineer on all correspondence with each regulatory agency.

5.2 WATER SYSTEM

5.2.1 General

All facilities shall be sufficient size to provide adequate capacity for ultimate development as called out in the latest copy of the Water Master Plan. The water mains shall be sized to meet the maximum instant domestic requirements plus an appropriate allowance for fire protection water. The design criteria for water demand shall be submitted to the City with the plans and specifications. The City reserves the right to require larger water mains than required for the proposed development in order to provide capacities for areas outside the development. The developer will be responsible to construct water mains adjacent to his property in accordance with the latest Water Master Plan or as required by the City Engineer.

5.2.2 Connections to Existing Distribution System

Preliminary discussions concerning take-off points in the water system should be conducted with the City of Rockwall Engineering Department or its designated representative prior to finalizing the preliminary designs of the water system, which will serve the development. Connections to the City's existing water system will be allowed only at locations where the City believes that sufficient quantity and pressures are available to meet the projected requirements of the development. In general, the connections to the existing water system shall be made in such a manner to keep "shut-downs" to a minimum. Preference should be given to a tapping valve connection.

In a proposed development where City water is not adjacent to the property but is accessible, the developer shall provide, at their expense, a minimum of eight (8") inch water main, an off-site water main of sufficient size to serve his development or as shown on the City's Water Master Plan, whichever is larger. The City can participate (if funds are available) or collect pro-rata for the oversize of the required line. The City participation must be approved by the City Council. The proposed development may require a loop into the existing water system in order to provide adequate water pressure. The loop will be at the developer's expense. All water main shall be extended to the property lines for future connections.

In general, the City will not approve a development, which cannot be served by extensions to the City water system. Some areas in the City are served by public water supply corporations. The Developer shall contact these public water supply corporations for notification of future development. The Developer shall still be responsible to construct water facilities that meet City requirements and as shown on the City's water master plan. The City will inspect the water facilities.

Under unusual circumstances, the City may consider approval of a private water system, which will supply an adequate quantity of potable water to every lot in a residential development. Such systems must meet the approval of the City, the TCEQ, the State Board of Insurance and other appropriate regulatory agencies. In addition, an agreement between the City and the developer must be executed whereby the City may acquire the system at such time as it can be connected into the City's owned and operated distribution network. In all cases, the engineering drawings shall show the source of water for the development.

5.2.3 Sizing of Water Mains

A. Water mains shall be sized to have maximum velocities of 7 feet per second for maximum daily demands and maximum velocities of 10 feet per second for combined maximum daily demand and fire flow demands.
B. Table 5.2 provides the water demand for residential land uses and non-residential land uses and shall apply for any development where the lot layout has not been finalized. Land uses not listed shall be classified by the land use they most nearly resemble in Table 5.2 or calculated by the engineer in accordance with the anticipated use. The engineer shall submit the maximum daily demand and the maximum hourly demand to the City Engineer for review and approval. The City reserves the right to assign a higher water usage rate, population per unit, and/or units per acre to be used for developments anticipated to generate higher than typical usage rates.
C. The engineer shall sufficiently size all water mains to provide adequate capacity for ultimate development as called out in the latest copy of the City's water master plan. For all developments, re-developments, and any type of facility tying into the City's water distribution system, the following guidelines shall be used:
    i. The engineer shall obtain the available record drawings. When record drawings are not available, field investigations and verifications shall be required prior to construction.
    ii. The standard water main sizes that shall be used are noted in the Table 5.3.
    iii. The minimum water main size to serve residential areas shall be eight inches (8") in diameter
    iv. The minimum water main size serving commercial, business, industrial, etc. shall be eight inches (8").
    v. Fire Flow Demands for all districts shall be calculated with a minimum residual pressure of 20 psi under combined fire and domestic (Maximum Daily Demand) water flow conditions and/or the latest requirement by the TCEQ. The developer shall provide facilities sufficient for fire flows in accordance with the minimum criteria set for by the City's Fire Marshal Office.
    vi. Mains are to be sized to ensure less than 1 foot of head loss per 1000 feet of water main using a Hazen Williams coefficient of C = 110 for the

Maximum Hourly Demand flow rates within the subdivision internal distribution system.

vii. Mains shall be sized to provide service to adjacent properties.

Table 5.2: Water Demand Rates

Land Use	Units Per Acre	Population per Unit	Max Day per Capita (gpcd)	Max Hour per Capita (gpcd)	Max Day per Acre (gpad)	Max Hour per Acre (gpad)
Residential						
Single Family - Low Density	3.5	2.87	350	700		
Single Family - Medium Density	8.0	2.87	350	700		
Single Family - High Density	18.0	2.87	350	700		
Townhome	4.0	2.50	350	700		
Multi Family	12.0-16.0	2.00	350	700		
Mobile Home Park	8.7	2.87	200	360		
Non-Residential						
Mixed Use / Live Work / Downtown			350	700		
Commercial Retail / Business Center					1,500	3,000
Public / Quasi-Public					1,500	2,000
Commercial Industrial					2,000	3,000
Special Commercial Corridor / Technology Employment Center					3,000	3,900
Light Manufacturing *					2,000	3,000
Heavy Manufacturing *					2,500	3,000
Schools (Elementary)			39 per student	52 per student		
Schools (Middle / High Schools / Colleges)					1,500	2,000
Hospitals			720 gpd per bed	864 gpd per bed		
Nursing Homes / Assisted Living			240 gpd per bed	288 gpd per bed		
Restaurants					1,500	3,000
Parks and Open Space					1,500	1,500
Golf Course **					1,000	1,000

* Engineer shall provide the maximum daily demand and maximum hourly demand flows and/or the number and size of water meters proposed for the particular land use for review by the City.

** Engineer shall provide the number and size of water and irrigation meters proposed for the golf course for review by the City.

Table 5.3: Standard Water Main Sizes

8 inch	12 inch	16inch	18 inch	20 inch
24 inch	30 inch	36 inch	42 inch	48 inch
54 inch	60 inch	66 inch	72 inch	-----

5.2.4 Water Mains Location/Alignment

Water pipelines shall be located in the parkways between the back of the curb and the street right-of-way. The location shall be six feet (6') from the back of curb on the north side of east-west streets and on the west side of north-south streets. When horizontal curvature is used the minimum radius of curvature shall be equal to that recommended by the pipe manufacturer.

A blue EMS Locator Pad will be located as shown in the Standard Drawings. Water mains shall have blue EMS locator pads at every two hundred fifty (250') feet, change in direction, valve, curb stop, and service connection to the main water main.

5.2.5 Depth of Cover

The minimum depth of cover for water mains are indicated in Table 5.4.

Table 5.4: Depth of Cover to Top of Pipe

Pipe Size	Minimum Depth of Cover
6 inch through 8 inch	4.0 feet
12 inch through 18 inch	5.0 feet
20 inch and larger	6.0 feet

The engineer shall consider the ultimate roadway elevations in determining the depth of cover. Additional depth of cover shall be required for future development and as directed by the City Engineer. Depths of cover greater than 8 feet shall be approved by the City Engineer.

5.2.6 Pipe Material and Embedment

Water mains shall be PVC pipe conforming to the Standard Specifications for Construction. In general, the water pipelines shall be AWWA C900-16 PVC Pipe (blue in color) for all sizes, DR 14 (PC 305) for pipeline sizes 12-inch and smaller, and DR 18 (PC 235) for 14-inch and larger water pipelines. All pipes shall be installed in embedment material as shown on the Standard Drawings and in conformance with the Standard Specifications for Construction.

5.2.7 Valves

Valves shall be installed to isolate pipe at a minimum of every other fire hydrant and on both sides of all public roadways. All gate valves shall comply with the approved list or an approved equal with resilient seat only and shall conform to and shall be installed according to the Standard Specifications for Construction.

A. Valves shall be placed in straight run sections at spacing no greater than 500 feet.
B. All valve boxes shall be encased in a concrete pad that shall be twelve inches by twelve inches by six inches (24”x24”x6”) and reinforced with No. 3 steel bars.
C. Valve extensions shall be 316 stainless steel.
D. Unless otherwise requested by the developer and approved by the City, valves shall be located in the northwest quadrant of the street intersection.
E. Valves shall be placed at or near the ends of mains in such a manner that a shutdown can be made for a future main extension without causing loss of service on the existing main. A minimum of 20 feet of main shall be installed past the valve and mechanical pipe thrust restraints shall be used to anchor it.
F. Where fire lines are connected to the water main, valves shall be installed on one side of the connection to provide the ability to isolate the main line and continue to provide water to the fire line. The fire line shall be provided with a valve at the connection with the main line.
G. Valve boxes shall be provided for buried valves. They shall be three-piece screw-type cast iron boxes of the extension type. The three pieces shall consist of the top section, bottom section, and cover.
H. Two inch square nuts that would be over 4 feet deep shall have stainless steel valve stem extensions. In these cases, the 2 inch square valve operating nut shall be no greater than 2 feet from the finish grade. Valve box extensions may be cast iron or C-900 PVC.

5.2.7.1 Gate Valves

Valves 12 inches and under shall be Resilient Wedge Gate Valves (RWGV). Valves are required to have 316 Stainless Steel hardware. Gate valves shall be located outside the paved streets and shall be six feet (6’) from back of curb of the intersecting street. In general, gate valves shall be located at street intersections (except for fire hydrant leads).

5.2.7.2 Butterfly Valves

Valves greater than 12 inches shall be flanged butterfly type spaced at a maximum of 1,000 foot intervals. All valves shall have horizontal mounted actuators with a manhole for access to the actuators.

5.2.7.3 Air Release, Air/Vacuum, and Combination Air Valves

A. Air release valves, air/vacuum, and combination air valves shall be required on 16 inch and larger water mains and as necessary for proper system operation. There are three primary functions of the valves that the engineer shall consider as follows:

i. To vent large volumes of air during filling of the line;
ii. To allow air into the pipe during emptying for maintenance and/or repairs; and,
iii. To vent small volumes of air that come out of solution during service.

B. Typically these are installed at high points where the pipeline has a vertical change in gradient. Additional installation locations may be requested by the City Engineer.
C. A fire hydrant shall be required at high points on 12 inch water mains for air relief and flushing maintenance operations. When a fire hydrant cannot be used, an air release valve may be approved by the City Engineer.

5.2.8 Fittings

Mega-lugs or approved equal shall be installed. No compaction fittings allowed. Fittings shall be ductile iron in accordance with AWWA C110 or AWWA C153. All buried metal shall be wrapped in polyethylene tube wrap.

5.2.9 Connection to existing Water Mains

5.2.9.1 Tapping Sleeves and Valves

A. Size on size tapping sleeves are not allowed. The largest allowable tapping sleeve shall be the main line size less one standard pipe size (Example: 16 inch x 12 inch, 8 inch x 6 inch, etc.). If a size on size connection is required, then a cut-in connection shall be used.
B. Connections to an existing line shall be made with full body stainless steel tapping sleeve and valve. A resilient wedge gate valve shall be flanged to the tapping sleeve.

5.2.9.2 Cut-In Connection

When connecting to an existing main, it may be required to provide a cut-in connection with a tee and valve being installed into the existing main in lieu of a tapping sleeve and valve where there is not an existing main line valve between proposed water connection locations as directed by the City Engineer. A test shut down of the existing water main(s) shall be conducted by the Water Department. The requirement for a test shut-down may be waived with approvals of the City Engineer.

5.2.10 Dead-End Mains

A. Dead-end mains shall be avoided and may only be considered when a looped or interconnected water main system is not available. The design of all water

distribution systems should include the opportunity for future looping or interconnect of any approved or proposed dead-end line.

B. All dead-end lines shall only be installed upon approval from the City Engineer and at a maximum length of 150 feet.
C. Dead-end non-residential water mains shall only have one fire hydrant or service without looping the water main.
D. Where dead-end mains are approved, the engineer shall provide flush point at the end of the dead end main.

5.2.11 Fire Hydrants

In general, fire hydrants shall be located at each street intersection and at intervals on the interior of each block.

A. Residential and Duplex
Residential and duplex areas shall have a fire hydrant at each street intersection and at four hundred foot (400') intervals on the interior of each block.

B. Multi Family
Multi-Family areas shall have a fire hydrant at each street intersection and at four hundred foot (400') intervals on the interior of each block and along fire lanes.

C. Commercial, Retail and Industrial
Commercial, retail and industrial areas shall have a fire hydrant at each street intersection and at a maximum of four hundred foot (400') intervals on the interior of each block and along fire lanes

Fire hydrants shall be installed a minimum of three feet (3') and no greater than six feet (6') behind curb of a fire lane, driveway, access, and/or street as measured from the centerline of the fire hydrant to back of curb, edge of pavement, or fire lane. All fire hydrants shall have five feet (5') of clearance around, including parking stall curbs.

The spacing of fire hydrants shall be measured along the street frontage or fire lanes. The City Fire Marshal and Engineering Department shall review all fire hydrant spacing. When a special condition exists due to land use, the Fire Marshal or City Engineer may require additional hydrants for fire protection. All existing fire flows and pressure tests shall be obtained from a private company (City does not perform this test).

Fire hydrants shall comply with the approved list or an approved equal conforming to the requirements set forth in the Standard Specifications for Construction. All fire hydrants shall be installed with a six-inch (6") gate valve on the hydrant lead. The installation shall be as set forth in the

Standard Specifications for Construction. Fire hydrants shall be painted to meet the City's requirements for color code as set forth in the Standard Specifications. In general, the fire hydrant will be reflective silver with differing cap color, which corresponds to the size of hydrant feeder line, as detailed in Approved Water Materials List in the Appendix. Fire hydrants shall be installed at the end of each dead end line. Minimum main size for a fire hydrant shall be eight inches (8") if main is fifty feet (50') or longer. Fire hydrants are not to be powder coated. Fire hydrants are to be a minimum of nineteen (19) inches to a maximum of twenty-eight (28) inches above final grade. All fire hydrants to have five (5) feet of clearance from any structure or parked vehicle. Nozzle diameter shall be two hose nozzles measuring two and one-half (2 ½) inches nominal inner diameter and one pumper nozzle measuring for and one-half (4 ½) inches nominal inner diameter. All nozzles are to have National Standard Hose Threads. The operating nut and nozzle nuts shall be 1 ½ inch pentagon-point to flat size/shape.

A. Standard fire hydrant barrel shoe depth where ever practical shall be 5 feet. The fire hydrant lead line shall be adjusted to meet the standard fire hydrant depth.
B. The connection to the main line shall include a flanged tee connected to a flange by mechanical joint gate valve. The mechanical joint shall be restrained so that the fire hydrant is anchored to the valve.
C. Specifications – Fire hydrants shall be three-way breakaway type no less than 5- 1/4 inch size. Mechanical joint connection is required.

5.2.12 Water Service Connections

Service connections shall be in accordance with the designs shown on the Standard Drawings. The materials shall comply with approved list or approved equal and shall be installed in accordance with the Standard Specifications for Construction.

A. All service pipelines shall be constructed of SDR-9 (Polytube) having a minimum size of one-inch (1"). All connections shall be compression type or approved equal.
B. Detector pads embedded in sand shall be installed above all service connections.
C. All meter boxes shall be set between the sidewalk and the back of curb. Meter box tops shall be set one-half inch to one and one-half inch (1/2" to 1 ½") above the curb, and an angle meter stop shall be set six inches (6") below the meter box top. Meter boxes shall have a one-inch (1") wide slot from five inches (5") below the top of the box to the bottom of the box on the side facing the lot for service connection.
D. A domestic and/or irrigation service connection shall not be allowed on fire hydrant leads.

E. Service saddle shall be double bronze flattened straps (no banded straps shall be allowed) with brass body. Minimum size tap shall be 1 inch diameter.
F. All meters two-inch (2") and under shall be supplied by the City and will be at developer's/contractor's expense. All meters greater than two inches shall be furnished and paid for by the developer/contractor.
G. Concrete meter vaults are required for meter sizes 3 inches and larger, meters and vaults shall be provided by the contractor. Meter vault and meter requirements are shown in the Standard Drawing section.
H. Residential Water Meters
    a. In single family residential developments, the nearest edge of the water meter box shall be a minimum of 6 inches behind the back of curb, and the water service shall be no more than 12 inches deep, covered with a meter box in place at grade. If no curb is present, the water meter shall be located at the right-of-way line, no more than 12 inches deep, covered with a meter box in place at grade. Along roadways without a curb, the water service line shall be constructed at a minimum of 24 inches below the ditch flowline. Meter boxes shall not be placed in the invert of a ditch.
    b. For multi-family, condominium and townhouse developments installation of multiple meter boxes: may only be installed at approved locations. Each service box shall service one (1) lot. Installation on multiple meters per water service will not be allowed. Only one meter per service will be allowed.
I. Non-Residential Water Meters
    a. Installation of non-residential 3-inches and larger meters will include two mainline valves, one bypass valve with chain and lock, and bypass line, all located inside the vault. Clearances between fasteners on valves, strainers, and meters to interior surfaces shall provide adequate room for maintenance.
    b. Non-residential water meters will be located in a water easement and clear of high traffic areas.
    c. Water meter vaults shall be sized according to the size of the water meter and to allow for a minimum of a 12 inch clear working area for maintenance and operation. Minimum water meter vault sizes are shown in the City of Rockwall Standard Details.
    d. Non-residential domestic irrigation meters shall have a testable double check backflow preventer at the meter.

5.2.13 Abandonment of Water Mains

A. The engineer is to note the limits and appropriate conditions for abandoning existing water mains that are being replaced. For lines being abandoned, the engineer should note and locate points of cut and plug at the junction with the line that remains in service.

B. The engineer shall make allowances to permit the existing and proposed mains to remain in service simultaneously thereby providing a means for transferring customer's services from the old main to the new main with minimum interruption. If the construction of a proposed main necessitates the abandoning of the existing main prior to the new main's placement into service, then provisions for a temporary water main with services must be addressed with the design.
C. Abandoned water lines to remain in place shall be cut and plugged and all void spaces within the abandoned line shall be filled with grout, flowable fill or an expandable permanent foam product. Valves, to be abandoned, in place shall have any extensions and the valve box removed and shall be capped in concrete.
D. Existing fire hydrants and valves located on mains being abandoned are to be removed and delivered to the Water Department.

5.3 WASTEWATER SYSTEM

5.3.1 General

All facilities shall be sufficient size to provide adequate capacity for the ultimate development. The wastewater lines shall be sized to meet the peak-day dry weather flow plus an appropriate allowance for infiltration of storm water. The minimum wastewater main size (other than service lines) for all developments shall be eight inches (8") in diameter. The design criteria and calculation shall be submitted to the City with the plans and specifications. The City reserves the right to require a wastewater main of a larger size than that required by the development in order to provide capacities for areas outside of the development. Wastewater systems shall be designed so that all wastewater mains will be gravity flow. The use of a wastewater lift station can only be allowed with written approval by the City Engineer.

Connections to substandard mains and manholes shall not be allowed. Substandard mains shall be determined by the City Engineer based on criteria including, but not limited to: size, material, condition, flow rate, capacity, etc. Offsite improvements may be necessary to provide adequate wastewater service to the site.

All wastewater mains shall be installed at a depth sufficient to permit all water mains to be above the wastewater when the water main has a minimum cover of four feet (4'). In such cases where water mains either cross or otherwise come within 10 feet (10') of a wastewater main, the wastewater main may be PVC pressure pipe with a minimum working pressure class of 150 psi or encased in concrete.

5.3.2 Ownership and Maintenance

5.3.2.1 Ownership

Ownership of wastewater systems shall conform to the following:

- Wastewater mains within right-of-way or easements shall be owned by the City. This shall include the manholes and cleanouts on those lines.
- Wastewater service laterals shall be owned by the property being serviced, from the wastewater main connection to the structure being serviced. This includes any and all manholes and cleanouts on the service lateral.

5.3.2.2 Maintenance

Maintenance of wastewater system shall conform to the following:

- Wastewater mains within right-of-way or easements shall be maintained by the City. This shall include the manholes and cleanouts on those lines.

- Wastewater service lateral shall be maintained by the property owner being served from the structure to the right-of-way line and the City shall maintain from the right-of-way line to the wastewater main.

5.3.3 Connections to Existing Wastewater Collection System

Preliminary discussion concerning entrance points in the wastewater system should be conducted with the City of Rockwall Engineering Department or its designated representative prior to finalizing the preliminary designs of the collection system to serve the development. In a proposed development where City wastewater facilities are not adjacent to the property but are accessible, the developer shall provide, at his expense, an off-site wastewater interceptor of sufficient size to serve his development and the contributing service area (using fully developed flows), or as shown on the City's Wastewater Master Plan, whichever is larger. Developers can request a pro-rata agreement for wastewater over-size above ten (10") inch to be executed with the City, where the City collects a pro-rated amount as other developments connect to the system. This money would be distributed back to the developer that constructed the over-sized system. The pro-rata agreement requires approval by City Council.

Connections to Existing Wastewater Mains – When connecting a 6 inch or larger new line to an existing wastewater main the engineer shall provide a new manhole at the point of connection. Prior to breaking into the existing line the new manhole and upstream pipe segment shall pass inspection by the City Engineer or designated representative. Connections in residential locations shall be completed after the preliminary walk through has been performed by the Engineering Department and approval is granted.

In general, the City will not approve a development which cannot be served by extensions to the City's wastewater collection system unless the development has received an approved variance granted by City Council.

5.3.4 Design Flow

All wastewater collection systems shall be designed in accordance with the current City's Wastewater Master Plan.

Where possible, all collection systems will be laid out so that all lines will be gravity flow unless approved by the City Engineer.

All wastewater collection systems must be designed to covey the peak wet weather flow from the entire service area including offsite areas through the system. The basin delineation shall be provided by using the latest LIDAR and surveyed contours. Contours shall be provided on 2 foot or less intervals.

Flow calculations must include the specifics of the average daily flows, peak factor (ratio of peak to average flows) and the allowance for inflow and infiltration.

5.3.5 Sizing Wastewater Collection Mains

5.3.5.1 General

A. The engineer shall reference the Wastewater Master plan to determine the size of wastewater mains required in order to serve the development. For all developments or re-developments that propose a change in existing land use (change in density) that does not conform to the City's current Wastewater System Master Plan a Wastewater System Capacity Study shall be performed. This shall be done as per Section 5.1.1 – System Capacity Studies.
B. The standard wastewater pipe sizes that shall be used are noted in the Table 5.5.

Table 5.5: Standard Wastewater Collection System Pipe Sizes

8 inch	10 inch	12 inch	15 inch	18 inch
21 inch	24 inch	27 inch	30 inch	33 inch
36 inch	39 inch	42 inch	48 inch	54 inch
60 inch	------	------	------	------

5.3.5.2 Average Daily Flow

A. Table 5.6 shall be used to calculate the average daily wastewater flow. The collection system shall be designed based on the peak flow calculations, plus an allowance for Inflow and Infiltration.
B. For replacement of existing sewer for additional capacity, wastewater flow data will be provided by the City Engineer and the City's wastewater modeling consultant from data generated by the City's Wastewater Master Plan computer model.
C. Wastewater mains with direct connections to service lines shall be designed to be no more than 70% full and interceptors shall be designed for 100% full.
D. Table 5.6 summarizes the residential and non-residential land use wastewater usage rates. Land uses not listed shall be classified by the land use they most nearly resemble in Table 5-8 or calculated by the engineer in accordance with the anticipated use. The engineer shall submit the average daily flow and peak flow calculations including off-site flows within the drainage basin to the City Engineer for review and approval. The City reserves the right to assign a higher wastewater usage rate and/or population per unit to be used for developments anticipated to generate higher than typical usage rates.

Table 5.6: Wastewater Per Capita and Usage Rates

Land Use	Units per Acre	Population per Unit	Average Daily Flow (gallons per person or unit /day)	Average Daily Flow per Acre (gpad)
Residential				
Single Family - Low Density	3.5	2.87	90	
Single Family - Medium Density	8.0	2.87	90	
Single Family - High Density	18.0	2.87	90	
Townhome	4.0	2.5	90	
Multi Family	12.0-16.0	2.00	80	
Mobile Home Park	8.7	2.87	150	
Non-Residential				
Mixed Use / Live Work / Downtown				800
Commercial Retail / Business Center				800
Public / Quasi-Public				1,000
Commercial Industrial				1,500
Special Commercial Corridor / Technology Employment Center				1,200
Light Manufacturing *				1,500
Heavy Manufacturing *				3,000
Schools (Elementary)			30 per student	
Schools (Middle / High Schools / Colleges)			30 per student	
Hospitals			400 per bed	
Nursing Homes / Assisted Living			300 per bed	
Restaurants			50 per seat	
Hotels			200 per room	
Parks and Open Space				0
Golf Course**				100

5.3.5.3 Peak Flow Factor

Peak flow factors are as follows:

A. For average daily flow less than 0.05 MGD – Peak Flow Factor = 5.
B. For average daily flow between 0.05 MGD and 1.0 MGD – Peak Flow Factor = 4.
C. For average daily flow between 1.0 MGD and 2.0 MGD – Peak Flow Factor = 3.5.
D. For average daily flow greater than 2.0 MGD – Peak Flow Factor = 3.

5.3.5.4 Inflow and Infiltration

After determining the peak flow amount, the engineer shall add an average daily inflow and infiltration rate of 400 gpad. The inflow and infiltration amount calculated shall be added to the peak flow calculated, with the resultant being the peak wet weather flow, the basis for design.

5.3.6 Wastewater Mains

Wastewater pipelines shall be located in the parkways between the back of the curb and the street right-of-way. The location shall be six feet (6') from the back of the curb on the south side of east-west streets and on the east side of north-south streets. A green EMS Locator Pad is to be installed at every manhole, cleanout, and service connection to the wastewater main. If a wastewater line is to be constructed greater than 10 feet in depth and services are required than a parallel line is to be constructed at a depth shallower than 10 feet. The deeper line shall be 6' from the back of curb in the pavement side and the shallower line with services shall be 6 feet from the back of curb toward the right of way.

5.3.6.1 Pipe Material

Allowable for gravity wastewater mains shall be per Table 5.7.

Table 5.7: Pipe Materials for Wastewater Gravity Mains

Pipe Size	Pipe Material
4 inch through 15 inch	Green PVC – SDR 35 (ASTM D3034) [less 10 ft cover] Green PVC – SDR 26 (ASTM D3034) [10 ft or more cover]
18 inch and Lager	Green PVC – PS 46 (ASTM F679) [less 10 ft cover] Green PVC – PS 115 (ASTM F679) [10 ft or more cover]

Pipe shall have a minimum earth cover of four (4') feet. All pipes shall be installed in embedment material as shown on the Standard Details and in conformance for the Standard Specification for Construction. Any main with less than minimum cover shall be encased in concrete and is subject to approval by the City Engineer. Depth of cover greater than 20 feet must be approved by the City Engineer. All pipelines shall be tested for infiltration.

5.3.6.2 Minimum Grades

Wastewater lines should operate with velocities of flow sufficient to prevent excessive deposits of solid materials, otherwise objectionable clogging may result. The controlling velocity with regard to sediment deposition is near the bottom of the conduit and considerably less than the mean velocity flowing full of 2.5 feet per second (f.p.s.). Table 5.8 indicates the minimum grades for wastewater pipe with a Manning's "n" = 0.013 and flowing at 2.4 f.p.s.

Table 5.8: Minimum Grades for Wastewater Pipelines

Pipe Size (Inches)	Slope (n = 0.013) (Foot/Foot)	Pipe Size (Inches)	Slope (n = 0.013) (Foot/Foot)
6	0.0050	39	0.0006
8	0.0033	42	0.0006
10	0.0025	45	0.0005
12	0.0023	48	0.0005
15	0.0023	54	0.0004
18	0.0018	60	0.0004
21	0.0015	66	0.0004
24	0.0013	72	0.0003
27	0.0011	78	0.0003
30	0.0009	84	0.0003
33	0.0008	96	0.0002
36	0.0007		

5.3.6.3 Curved Sewers

No vertical curves will be allowed. Horizontal curvature may be allowed by joint deflection or pipe flexure but not both. The Engineer must specify on the plans the method of deflection allowed and the allowable radius or joint deflection for each pipe size.

When pipe flexure is used, the minimum radius of curvature shall be equal to that recommended by the pipe manufacturer or $300*D_0$, where D_0 is the average outside diameter of the pipe in inches, whichever is greater. The Engineer shall note on the plans that when using pipe flexure, all joints are to remain fully seated.

If a joint deflection will be used to provide horizontal curvature, the allowable deflection shall be 5° or 80% of the Manufacturer's recommended maximum joint deflection, or 80% of the National Reference Standard maximum recommended joint reflection, whichever is less. When joint reflection is used, the Engineer must specify the size of mandrel used for reflection testing. The mandrel shall be sized to verify that the maximum joint deflection has not been exceeded.

Horizontal curves shall match change in street direction as near as possible.

5.3.7 Wastewater Service Laterals

Wastewater service pipelines shall be laid to each lot. The service pipelines shall be plastic pipe having a minimum diameter of four inches (4") and shall extend to the property line. Wastewater service pipelines shall be located on the lower side of each lot and as approved on the final construction plans by the City. In general, a service pipeline shall serve only one lot. Special wastewater service sizing may be required in some instances. Where water

and wastewater pipelines pass within nine feet (9') of each other, the method of construction shall be specified in order to meet TCEQ criteria. No wastewater main shall be located nearer than five feet (5') from any tree. Service lines cannot connect to wastewater mains that are over ten feet (10') deep.

Service laterals shall have a minimum horizontal separation of 10 feet downstream from the water service.

Retail and Commercial – Service lateral size shall be 6 inch minimum at a 2 percent minimum grade.

5.3.8 Manholes

In general, manholes shall be located at all intersections of wastewater pipelines, changes in grade, changes in alignment and at distances not to exceed five hundred feet (500'). All manholes will be hydrostatically or vacuum tested. For manholes that have an epoxy coating after constructed, a spark test will be required prior to acceptance. Manhole sizing shall be per Table 5.9 with a thirty inch (30") lid. If a manhole exceeds ten (10') feet in depth, increase the diameter by one (1') foot from the sizes given in Table 5.9.

Table 5.9: Minimum Manhole Sizes

Wastewater Main Size	Minimum Manhole Diameter
6", 8" and 10"	4.0 foot *
12", 15", 18", 21", 24" and 27"	5.0 foot *
30" and 36"	6.0 foot *

* Internal Drop Manholes shall be 6.0 foot minimum

Manholes shall be a minimum of 4,200 psi pre-cast concrete (minimum 6.5 sack mix) or cast-in-place (minimum 7.0 sack mix) and shall conform to Standard Details and the Standard Specifications for Construction. Existing brick manholes shall be replaced. All private manholes shall have covers with the label "Private" forged into the cover.

5.3.8.1 Internal Drop Manholes

Internal drop manholes shall be required when the inflow elevation is more than 18 inches above the outflow elevation. New internal drop manholes shall be constructed with inside drops with a 6 foot minimum diameter. Depending on the depth of the drop manhole and inside clearances between drop bowl apparatus and the manhole, the City Engineer may increase the minimum diameter above 6 feet. Drop manholes shall increase in diameter as necessary to accommodate the pipe for an internal drop connection as necessary to provide 48 inches of clear space for construction and maintenance operations. Within the manhole the inverts shall be sloped to maintain a smooth transition

through the manhole connecting all inlets and outlets. Outside drop connections will not be allowed.

5.3.8.2 Corrosion Protection

All Manholes shall have Raven Liner 405 epoxy coating, ConShield, or approved equal, shall be installed in all new manholes and in existing manholes being modified. Consheild must have terracotta color dye mixed in the precast and cast-in-place concrete. Where connections to existing manholes are made the contractor shall rehab manhole as necessary and install a 125 mil thick coating of Raven Liner 405 or approved equal. Manhole shall be replaced at the developer's/contractor's expense if it cannot be rehabilitated.

5.3.8.3 Watertight Sealed Manholes

All manholes shall be sealed if located in an area of storm water flow (paving, creek, drain way, etc.). When manholes are placed within the limits of the fully developed 100-year floodplain watertight sealed manholes (Type S) shall be used to prevent the entrance of stormwater and properly vent manhole. Manholes installed in the floodplain shall be a minimum of (60") diameter with a concentric flat top that has a rim elevation (2') above the limits of the fully developed 100-year floodplain. When allowed by the City Engineer, manholes may be below the 100-year floodplain but must be bolted and gasketed. Every third manhole shall be vented (2') feet above the fully developed 100-year floodplain elevation or 4 feet above the adjacent ground line, whichever is higher. Manhole rim shall be a minimum of 2 feet above ground line. The engineer shall obtain and provide the elevation of the fully developed 100-year floodplain.

5.3.8.4 Inflow Prevention

In order to reduce the size of wastewater system main trunk lines and reduce the cost of wastewater treatment, efforts to reducing inflow and infiltration into the wastewater collection system shall be taken. All manholes (public or private) shall be fitted with inflow prevention. The inflow prevention shall conform to the measures called out in standard detail R-5031.

5.3.9 Cleanouts

Cleanouts shall be constructed on the end of all lines. The maximum distance between a manhole and an upstream cleanout is two hundred fifty feet (250'). Cleanouts may be located at the end of the line only.

Double clean outs shall be installed for non-residential services at the right-of-way line, property line, or easement line where a public line changes to a private service.

Cleanouts shall conform to the Standard Details and the Standard Specifications for Construction.

5.3.10 Testing

All wastewater lines shall be tested for infiltration in accordance with the procedures set forth in the Standard Specifications for Construction. In general, all wastewater pipes shall be installed so that the completed wastewater will have a maximum exfiltration of one hundred fifty (150) gallons per inch of internal diameter, per mile of pipe, per 24 hours, where the maximum hydrostatic head at the centerline of the pipe does not exceed twenty-five (25) feet. All wastewater pipes shall be inspected by photographic means (television or DVD) prior to final acceptance. The contractor shall furnish a DVD to the Engineering Department Construction Inspector for review. Any sags, open joints, cracked pipes, etc. shall be repaired or removed by the contractor at the contractor's expense. A television survey will be performed as part of the final testing in the twentieth (20^{th}) month of the maintenance period. The City's representative shall be present at all testing. All expenses for this work shall be the developer's responsibility.

5.3.11 Abandoning Existing Wastewater Mains and Manholes

When an existing wastewater line is to be abandoned all services and laterals on the main to be abandoned shall connect back into the system. All existing wastewater mains that are to be abandoned shall be videotaped to determine the location of the services and laterals. A copy of the videos shall be given to the Cities Construction Inspector for review before the line is fully abandoned.

All abandoned wastewater and force main lines shall be cut and plugged and all void spaces within the abandoned line shall be filled with grout, flowable fill or an expandable permanent foam product.

Wastewater manholes shall be abandoned per Standard Drawing No. 5170.

5.3.12 Creek Crossings

Wastewater lines constructed under or over any flowing stream or semi-permanent body of water, such as a marsh or pond, shall be installed inside a separate watertight encasement pipe. Wastewater lines shall have manholes on each side of the crossing.

The engineer of record shall determine the type and limits of any special embedment, and specify the limits for specialized backfills to prevent soil erosion at the areas of trench backfill as approved by the City Engineer.

5.3.12.1 Aerial Creek Crossings

Aerial crossings for wastewater lines may be used only when all other alternatives have been evaluated and determine not to be feasible. Aerial crossings of wastewater lines require approval of the City Engineer.

Aerial crossing shall meet the following requirements:

- The design of all piers, bents, restraints, abutments, steel casing, etc. for the aerial crossing shall be performed and signed and sealed by a Professional Structural Engineer licensed in the State of Texas.
- The engineer of record shall use steel encasement pipe around all aerial carrier pipes. The carrier pipe shall be restrained or welded all around joints or be a monolithic pipe between a span section.
- The pier spacing for the aerial crossing supports must maintain adequate grade, and span the 100-year floodway.
- A span section must withstand the hydraulic forces applied by the occurrence of a 100-year flood including buoyancy. Both the aerial crossing encasement pipe and the supporting structure shall be capable of withstanding impacts from debris and water.
- A scour analysis report prepared by a geotechnical professional engineer shall be submitted to the City Engineer for review.
- A Hydrologic and Hydraulics Study of the aerial crossing shall be performed. The aerial crossing shall not increase the 100-year floodplain water surface elevations or velocities.
- Geotechnical borings at the creek crossing and report shall be prepared by a Professional Geotechnical Engineer licensed in the State of Texas.
- Wastewater lines shall have manholes on each side of the crossing.
- The upstream bent/abutment section of the aerial crossing shall be designed with a minimum 2-inch underdrain at the flowline of the embedment to collect infiltration that is travel within the upstream embedment of the aerial crossing. This shall day light at the aerial crossing current day slope to prevent erosion of the aerial crossing at the upstream end.
- The aerial crossing shall be designed to extend to the erosion hazard setback line with piers and bents.

5.3.12.2 Inverted Siphon

Inverted siphons at creek crossings for wastewater lines are not allowed.

5.4 WASTEWATER LIFT STATIONS AND FORCE MAINS

5.4.1 General

All lift station design plans and specifications shall be submitted to the City Engineer and TCEQ for review and approval prior to construction. Developments which increase the flow to existing lift stations will be subject to a pro-rata charge if sufficient capacity is available in the existing lift station or will be required to increase the capacity of the existing facility. Lift stations and force mains shall be designed and built for the upstream drainage area using a fully developed condition. This will include off-site areas if applicable. Developers are responsible for the construction of regional lift stations and force mains, per the Wastewater Master Plan. Developers can request a pro-rata agreement be executed with the City, where the City collects a pro-rated amount as other developments connect to the system. This money would be distributed back to the developer that constructed the oversized system. The pro-rata agreement requires approval by City Council.

The City will utilize an engineering consulting firm to assist City staff in the review of a report and plans for wastewater lift stations and force mains. The cost of this consultant review shall be borne by the developer, engineer, or property owner submitting the report and plans for wastewater lift stations and force mains. The City shall first obtain a cost estimate from the engineering consultant for the review at time of the initial engineering submittal. Before the review begins, the developer, engineer, or property owner submitting the report and plans for wastewater lift stations and force mains shall deposit with the City funds equal to the cost estimate. The City shall disburse the funds to the consulting engineer as the review progresses. Should the consultant fees exceed the initial estimate, the developer, engineer or property owner submitting the report and plans for wastewater lift stations and force mains shall be informed of the shortage and a new estimate made by the consultant engineer to complete the review. Additional funds will then be deposited with the City by the developer, engineer or property owner submitting the report and plans for wastewater lift stations and force mains to cover the estimated shortfall before the review resumes. Any unused funds to be reimbursed to the developer, engineer or property owner submitting the report and plans for wastewater lift stations and force mains. If review process is performed by City staff, the City will submit a cost estimate for the review at time of the initial engineering submittal.

5.4.2 Design Report and Plans

A typed lift station and force main design report shall be prepared and signed and sealed by a register professional engineer licensed in the State of Texas.

5.4.2.1 Report

The typed report shall include the following information at a minimum:

- A brief summary of project scope that includes:
  - General description of proposed development
  - General explanation on circumstances that warrant a lift station including other options considered.
  - Description of any potential phasing of lift station until sewer basin is built-out, if City Engineer approves lift station size less than fully developed conditions.
- Influent hydraulic calculations showing:
  - Area in acres of the sewer basin and the development.
  - The area of each proposed use for the development and the ultimate projected use for the basin per City Future Land Use.
  - The average design flow and the maximum peak flow for the basin and the development.
  - Elevation of the proposed lift station site.
  - The elevation of the proposed discharge point of the force main.
- Wet well volume calculations
- Force main size with proposed velocities in pipe.
- Power outage records on electric provider letterhead for power outages in area for the past 24 months.
- Opinion of probable costs for lift station, force main, and annual operating and maintenance costs.
- Ground water levels in proposed site area.
- Proposed system's effect on existing system's capacity.
- Odor control methods shall be submitted to the City Engineer for review and approval. The potential odor determination must include the estimated flows immediately following construction and throughout a system's 50-year expected life cycle.

5.4.2.2 Plans

The plan or plans submitted shall contain the following information:

- Scale
- North Arrow
- Vicinity map
- Delineation of the boundary of the proposed development and offsite areas of the sewer basin (service area) in which the development lies. Basin delineation shall be provided using NCTCOG, LIDAR or surveyed contours. Contours shall be provided on 2 foot or less intervals. USGS topo is not permissible.

- Area in acres of the development and of the sewer basin contributing to the lift station.
- Proposed use or uses for the development and service area.
- The proposed lift station location.
- The proposed force main routing.
- Delineation of the 100-year Fully Developed flood plain, FEMA 100-year flood plain and Erosion Hazard setbacks.
- The location and size of the existing collection system at the tie-in point.
- Property lines, easement lines, and right-of-way lines.

5.4.3 Site Selection

The following are the minimum criteria that shall be met for a lift station site.

The station should be located as remotely as possible from populated areas. The lift station site shall not be located within 150 feet of an existing or proposed residential dwelling and 100 feet from a residential lot.

The station shall be protected from the 100-year flood and shall be accessible during a 100-year flood. The elevation of the site shall be a minimum of 1 feet above both the Fully Developed 100-year flood plain.

The station site and its access shall be dedicated to the City as a wastewater easement. The fencing set back shall be 5 feet from the easement line to allow for a landscape and drainage buffer.

The station site shall be located so it may serve as much of the entire sewer drainage basin as possible. This may require that the station be located off-site of the development. When a station serves a larger area than the proposed development, the developer can request a pro-rata agreement with the City to be reimbursed the cost of excess capacity as other developments connect to the system.

5.4.4 Site Requirements

The lift station site shall conform to the requirements in these subsections and Typical Lift Station Site Layout - Figure 5.1.

5.4.4.1 Access

Access drive will be provided by a reinforced concrete pavement from a public street and/or dedicated access easement. Concrete shall be a minimum 8 inches thick, 3,600 psi (6.5 sack/CY) with #4 bars at 18” O.C.E.W. -reinforced concrete pavement with a minimum of 20 feet in width and 40 feet in length (within fenced area of lift station) to allow maintenance vehicles to park fully outside of the right-of-way.

When an access drive for the lift station connects to a City Thoroughfare or TxDOT designated highway a “T” shaped turnaround shall be provided with applicable turning radii. The alignment of the drive shall allow maintenance vehicles the ability to back up straight to the wet well.

Access shall be functional during a 100-year flood. All area within the lift station fencing and access drive shall be a minimum of 1 foot above the water level caused by a 100-year fully developed floodplain.

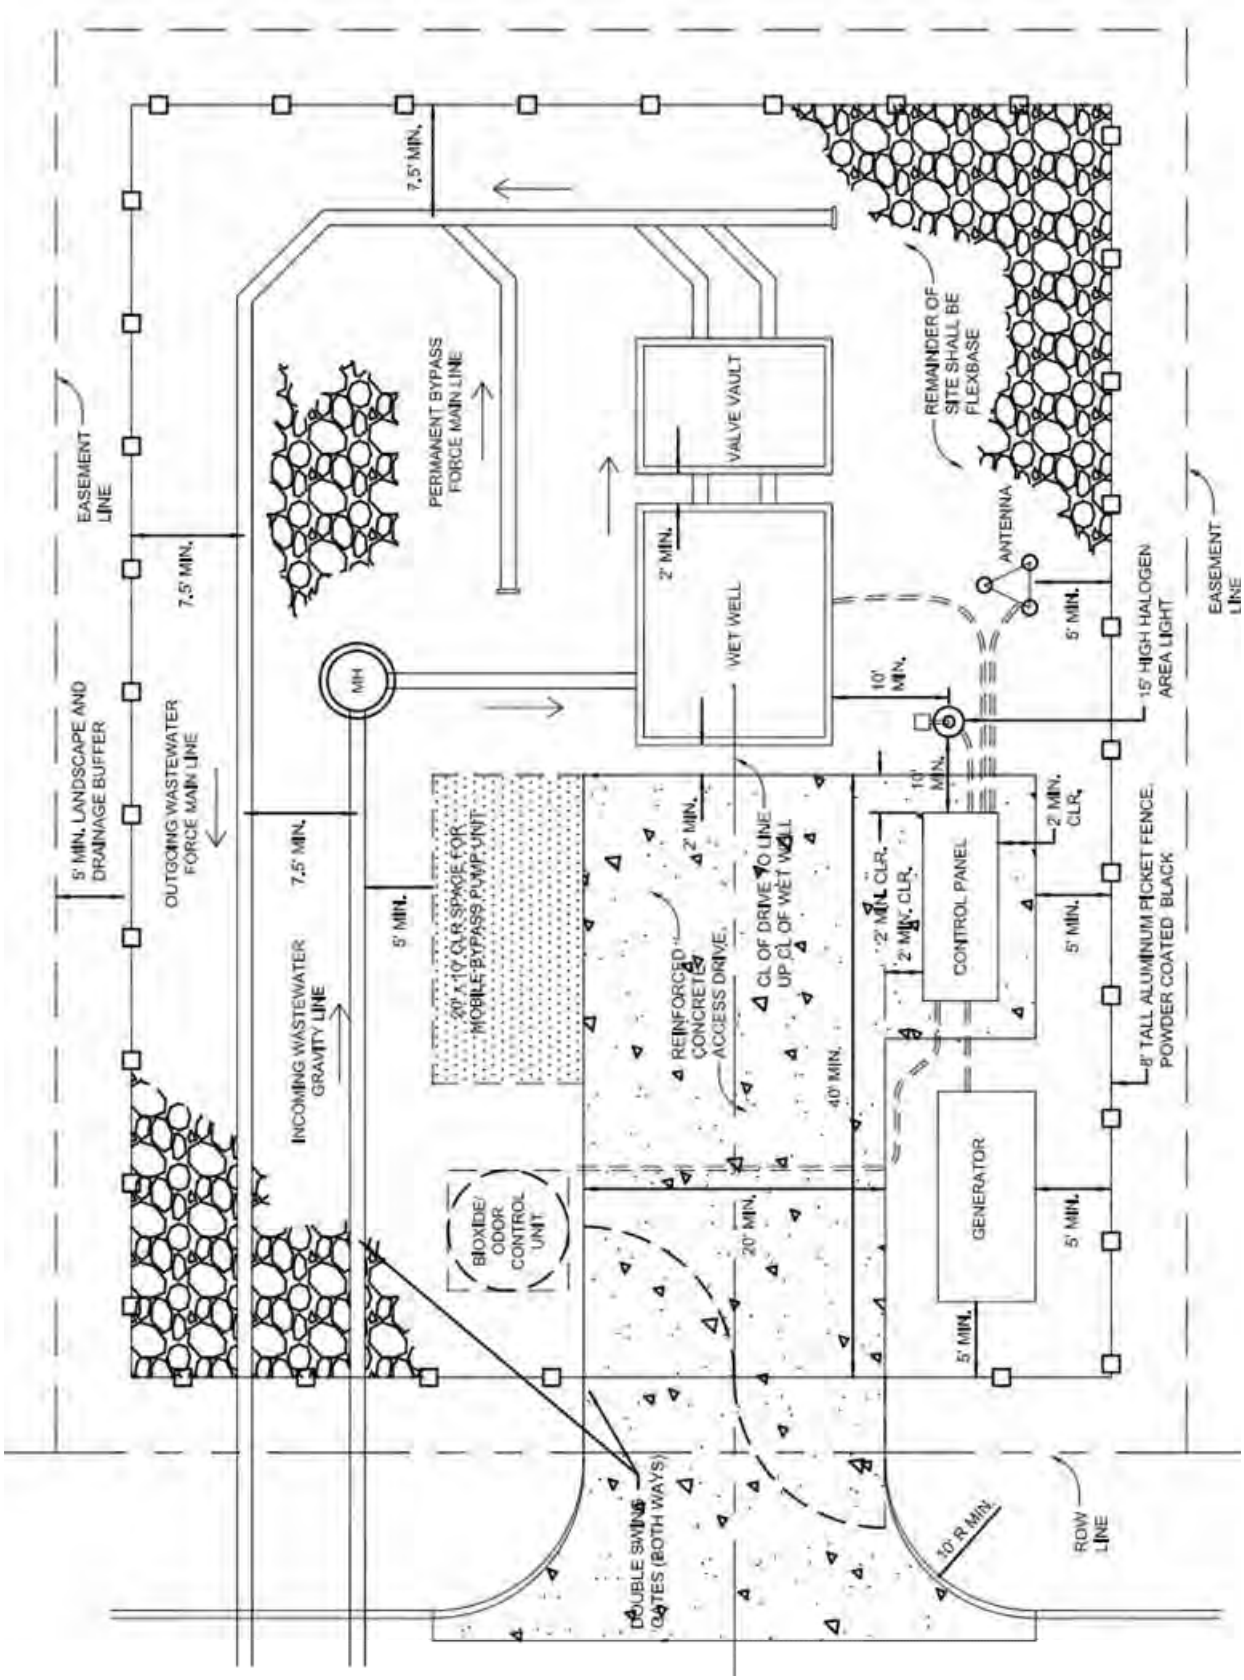

Figure 5.1: Typical Lift Station Site Layout

5.4.4.2 Security

At a minimum, security of the lift station site shall be provided by an intruder-resistant fence (IRF) to restrict access by an unauthorized person(s). The IRF shall be placed around the perimeter of the site encompassing all interior structures and appurtenances shall maintain a minimum 5 foot clearance from all lift station components and 7.5 foot off of lift station piping.

The IRF shall be a minimum of 8 feet aluminum picket fence with a 20 foot wide minimum double swing gate for access. All components shall be manufactured from aluminum extrusions having a minimum ultimate strength of 35,000 psi, using 6005 T5 alloy. The fence, post and gates shall be powder coated black with a minimum cure film thickness of 2.0 mils.

Technical Data

Pickets: The hollow pickets shall pass through the rails and are to be attached using stainless steel screws allowing the pickets to be always parallel to the terrain. Screws shall be on one side of rail only. Pickets shall be 1" square x 0.062" thick.

Horizontal Rails: Rails shall be C-Channels with ribbed reinforced side walls. Square holes shall be punched in the top of the rails to allow the pickets to pass through.

- Four rails are required.
- Heavy Industrial Rails shall be 1-5/8" x 1-5/8" with a side thickness of 0.100", top wall thickness 0.070" and bottom wall thickness of 0.062", which snaps into the top allowing all screws to be enclosed inside the rail.

Posts: Posts shall be hollow square extrusion with holes pre-punched to allow the rails from the fence sections to slide into them. All posts shall include aluminum post caps. Posts can be placed no more than 6 feet apart.

- Line Posts and End Posts are 3" square x 0.125" thick
- Gate Posts are 4" square x 0.125" thick weighing 9.00 pounds per foot

Gates: Gates shall be fabricated with 2" or 2½" square ends, 1-5/8" x 1-5/8" rails and 1" square pickets. The gate shall be a double swing gate. Gate shall match appearance of fence panel. The gate shall have a double rail that allows for hidden fasteners and no exposed cavities under the rail. Gate shall be designed and manufactured by the fence manufacturer.

- Each gate shall have a hasp for chain locking welded to the frame as detailed in the construction plans.
- Gates shall be designed and manufactured by the fence manufacturer.
- Assembled section shall be able to support 500-pounds of vertical load at the mid-point of any horizontal frame rail.

- Swing gates shall include cane-bolts for each gate panel. The cane-boll shall have a stop to hold it in the up position for operating the gate.
- Hinges shall have minimum 3/8" stainless steel pins.

Post Installation: The post shall be set 36" in the concrete footing. The gate post shall set a minimum of 48" into the concrete footing.

There should be a minimum of a 5ft landscape and drainage buffer from the easement line to the Lift Station fencing. The 5 ft buffer shall have red tip photinias place within the buffer to screen the lift station site.

5.4.4.3 Site Interior

Interior of the site that is not part of the access drive shall be a minimum 6 inches thick flex base. Site shall be graded to drain away from the station to prevent storm water inflow or infiltration into the wet well, valve vault and manholes. The wet well and valve vault top elevation shall be a minimum of 12 inches higher that interior concrete and flex base.

Control panel shall have a 2 foot minimum clear reinforced concrete working area away from face, sides and back of cabinet. Electrical and instrumentation panels shall be located where they do not obstruct vehicle access to the wet well or the dry well. They shall be placed at an elevation so that they are easily accessible.

A 15 foot high halogen area light with photometric cell on an aluminum pole shall be placed within 10 feet of wet well and control panel without obstructing daily operations.

5.4.5 Wet Well and Valve Vault Design

5.4.5.1 Wet Well Design

Wet well shall be cast in place or pre-cast watertight and gas tight walls with watertight joint meeting ASTM C478-90. Steel, HDPE and RCP are not acceptable materials. The tops may be pre-cast with the hatches built in. All wall penetrations through the wet well wall shall be gas tight. The wet well shall be hydrostatically tested to the top of the wet well for 48 hours prior to putting the lift station into service. Only losses due to evaporation will be tolerated.

Additional design requirements are as follows:

A. Orientation
- Orientation shall consider the routing of incoming sewer and force main for ease of maintenance and to minimize effluent turbulence.
- Orientation shall allow a 5 ton vehicle to pull in forwards or backwards directly to the wet well or the dry well.

- All influent gravity mains discharging into the wet well shall be located so that the invert/flowline is above the “on” setting liquid level of the pumps.

B. Level Sensors
- Level control system shall use a pressure transducer with built in surge protection for pump operation with Off and High Level Floats as back-up in case transducer fails.
- Sensors shall be provided for “All Pumps Off,” “Lead Pump On,” “Lag Pump On,” and “High Level Alarm” levels as well as additional “Lag-Lag Pump On” for lift stations with more than two pumps.
- Level Sensors shall be placed in the wet well.

C. Wet Well and Valve Vault Separation
- Wet wells and valve vaults shall be separated by a minimum of 2.0 feet.

D. Liner and Coatings
- Wet wells shall have a minimum of 10 percent sloped bottoms to thepump intakes and shall have a smooth finish to avoid excess sludge deposits.
- Wet wells shall be Con-sheild, Raven Lining or approved equal to protect against hydrogen sulfide gases.

E. Hatches
- The wet well shall have a lockable odor suppressing aluminum door with an aluminum frame and safety grate. The minimum opening size shall be 4 feet x 6 feet with 2 doors large enough to adequately maintain the wet well.
- All hatches shall have accommodations for locking above grade with 3/8” shaft padlocks provided by the City.

F. Ventilation
- The design of a wet well must reduce odor potential in a populated area or as directed by the City Engineer.
- Passive ventilation structures shall be provided and must include screening to prevent the entry of birds and insects to the wet well. An air vent pipe shall have a minimum diameter of 4 inches with outlet located 1 foot above wet well top.
- Continuous mechanical ventilation structures shall be provided with ventilation equipment providing a minimum capacity of 12 air exchanges per hour and be constructed of corrosion resistant material.

G. Cable Strain Relief – A stainless steel cable holder shall be provided for all cables in the wet well for cable strain relief purposes.

5.4.5.2 Wet Well Volume

A. Wet well volume for a submersible pump station is the volume contained above the top of the motor, or as specified by the pump manufacturer.

B. High level alarm elevation shall be a minimum of 60 inches below the top of the wet well or 48 inches below the flowline elevation of the lowest service tap, whichever elevation is lower.
   - Alarm shall be sent when both pumps are running on a duplex station or when the level is 6 inches to 12 inches over all pumps running. The City Engineer shall approve all situations and levels that need to trigger an alarm.
   - Wet well volume shall be calculated by the following method:

$$V = \frac{TQ}{4(7.48)}$$

where:
V = active volume, (cubic feet)
Q = pump capacity, (gallons per minute)
T = cycle time, (minutes)
7.48 = conversion factor, (gallons per cubic foot)

C. Pump cycle time, based on Peak Flow, must equal or exceed the criteria shown in Table 5.10.

Table 5.10: Minimum Pump Cycle Time

Pump Horsepower	Minimum Cycle Times
< 50 6 minutes	6 minutes
50-100 10 minutes	10 minutes
> 100 15 minutes	15 minutes

D. The operation cycle "T" shall not be less than 10 minutes for Average flow and not more than 60 minutes for minimum flow conditions. The operation cycle time must exceed the manufacturer's requirements.

5.4.5.3 Valve Vault

A. Valve vaults shall have sloped bottoms towards a floor drain to remove liquid build up. The floor drain line from the valve vault connecting to the wet well must prevent gas and liquids from entering valve vault.
B. The valve vault shall have a lockable aluminum door with an aluminum frame. The minimum opening size shall be 2 feet x 3 feet or large enough to adequately maintain the valve vault.

5.4.6 Pumps, Lift Station Piping, and Valves

5.4.6.1 Pumps

A. Stations shall contain a minimum of two pumps and shall be capable of handling peak flows with one pump out of service.

B. All pumps shall be explosion proof, non-clog, submersible type capable of passing a 2-1/2 inch diameter sphere or greater. Vortex impellers shall be used to prevent clogging.
C. Pumps shall be sized to operate at optimum efficiency. Minimum acceptable efficiency at the operating point will be 60 percent. The minimum required horsepower for the motor must be capable of handling the entire range as shown in the pump curve. Where necessary, a higher horsepower pump will be required to prevent any damage to the motor as a result of loss of hydraulic head situation.
D. All submersible pumps shall be equipped with an automatic flush valve attached to the pump volute using the hydraulic energy created by the pump operation to temporary suspend settled materials.
E. The pump rail system shall be MTM Sch 40 stainless steel with supports on 8 feet maximum spacing.

5.4.6.2 Pump Capacity

A. The firm pumping capacity shall be greater than the peak flow for the entire fully developed drainage basin. If the fully developed drainage basin is significantly larger than the proposed development and it is not feasible to design for this flow, the firm capacity may be designed to handle a portion of the basin with the ability to expand for the ultimate basin capacity with approval from the City Engineer.
B. The pump curves shall be selected so that during normal operating conditions the pumps will run near the best efficiency point. The curves shall not approach shut off head when the pumps are running together.
C. System head curves, pump curves, and head calculations shall be submitted. Calculations and pump curves at both minimum (all pumps off) and maximum (last normal operating pump on) static heads, and for a C value of both 100 and 140 must be provided for each pump and for the combination of pumps with modified pump curves. Head calculations shall be the sum of static head, friction head in force main and lift station piping, and a fittings head.
D. Flow calculations, system curves, and head calculations shall be shown in the construction drawings as well as in a final design report. Final design report shall include all of the preliminary design submittal requirements with the exception of the replacement of final design information.

5.4.6.3 Lift Station Piping

A. Piping inside the lift station shall be ductile iron Class 200 psi, AWWA C151-75, C171-76, or latest edition thereof. Pipe shall be centrifugally cast with rubber gasket type joint. All fittings shall be ductile iron Class 250 meeting AWWA C110-77 or latest revision for sizes 12 inches and smaller or Class150 on sizes 14 inches and larger. All pipe and fittings shall have a prime coat on the outside surface and shall have an interior lining of 40-mils nominal dry film thickness of Protecto 401

Ceramic Epoxy Lining or approved equal, applied in accordance to the manufacturer's recommendations.

B. All nut and bolt assemblies inside the wet well shall be ASTM 316 stainless steel.

C. Lift station piping shall be designed with an additional emergency by-pass pump connection, allowing the station to be operated with the primary pump(s) out of service for an extended period of time. The by-pass pump connection shall be fitted with a CamLock fitting and cap. Bypass piping shall be supported by a strut type pipe support set in a reinforced concrete pad. By-pass piping and valves shall maintain a minimum of a 24 inch clear from the ground.

5.4.6.4 Valves

(Isolation valves, check valves, and air release/vacuum valves shall be located in the valve vault)

A. Isolation Valves
- Each pump shall have one isolation valve downstream of the pump and check valve, including a discharge pressure gauge between the pump and isolation valve. Isolation valves shall be resilient seated gate valves meeting the City Standard Specifications. The discharge pressure gauge shall be a minimum of 4 inch diameter within the appropriate pressure ranges for the design.
- All external nuts and bolts shall be ASTM 316 stainless steel.

B. Check Valves
- Check valves shall be a controlled closing swing check valve with a lever and spring.
- Check valves shall be located upstream of the isolation valve.
- All external nuts and bolts shall be ASTM 316 stainless steel.

C. Air Release/Vacuum Valves
- Air release valves of a type suitable for wastewater service shall be installed along the force main where the force main would be prone to trapped air.
- The type of valve shall be air release or a combination of air release and vacuum breaker. Valves shall be fitted with blow off valves, quick disconnect coupling and hose to permit back flushing after installation without dismantling the valve.
- All external nuts and bolts shall be ASTM 316 stainless steel.
- The engineer shall determine the valve type and location. The calculations for valve type and valve sizing shall be provided to the City Engineer.
- Isolation valves for 3 inch and smaller air release valves shall be all bronze or brass. Isolation valves 4 inch and larger shall meet standard specifications for resilient wedge gate valve.
- Locations of the air release/vacuum valves shall be shown on the plan and profile sheets for the force main.

5.4.7 Force Main

5.4.7.1 General

A. Force main capacity shall be sized to meet the pump capacity. The force main shall be sized to handle the ultimate basin capacity. The force main may be designed to handle a portion of the basin with the ability to expand for the ultimate basin capacity if approved by the City Engineer. The minimum force main size shall be 4 inch diameter except for grinder pump lift stations. The minimum recommended velocity is 3 feet per second, and the velocity shall not be less than 2.5 feet per second when only the smallest pump is in operation.
B. Force main sewer pipe shall be designed to meet the working pressure requirements of the particular application. Design calculations and pipe selection shall be submitted to the City Engineer in report format.
C. A force main must be designed to abate any anticipated odor.
D. Force main pipe materials shall AWWA C900-16 PVC Pipe (green in color) for all sizes, DR 14 (PC 305) for pipeline sizes 12-inch and smaller, and DR 18 (PC 235) for 14-inch and larger wastewater pipelines.
E. For trench depths greater than 12 feet or other dead and/or live loading considerations, the engineer shall provide a pipe with the appropriate DR rating which shall exceed the minimum requirements.
F. All fittings shall be wrapped ductile iron in accordance with AWWA C110 or AWWA C153. Fittings shall have a prime coat on the outside surface and shall have an interior lining of 40-mils nominal dry film thickness of Protecto 401 Ceramic Epoxy Lining or approved equal, applied in accordance to the manufacturer's recommendations
G. All valves and fittings shall be restrained with Mega-lug or approved equal. Joint material for PVC shall conform to ASTM F471.
H. Plans shall include plan and profile for the force main.
I. Force main shall have a minimum of 4 feet of cover and be laid to standard specifications for potable waterline.
J. Force main separation and design criteria from water mains and all other utility lines shall meet the minimum requirements from TCEQ.
K. All force mains shall have green EMS locator pads at every two hundred fifty (250') feet, change in direction, valve, manhole, etc.

5.4.7.2 Embedment

A. All force main pipes shall be installed in embedment material as shown on the Standard Details and in conformance for the Standard Specification for Construction

5.4.8 Control Panel

5.4.8.1 General:

The control system shall be designed to operate the required number of pumps specified on the drawing at the power characteristics shown on the plans.

The control function shall provide for the operation of the pumps in Hand (manual) and Auto (controlled by PLC). See "24VAC Regulator System" for further information. The control shall function as described below. The equipment listed below is a guide and does not relieve the supplier from providing a system that will function as required.

5.4.8.2 Enclosure:

The enclosure shall be a NEMA 4x rated stainless steel. The enclosure shall be a wall mount type with a minimum depth of 8" sized to adequately house all the components. The door gasket shall be rubber composition with a retainer to assure a positive weatherproof seal. **The door shall operate with a single action handle that accepts a 3/8" shaft padlock** and opens a minimum of 180 degrees.

5.4.8.3 Inner Dead Front Door:

A polished aluminum dead front shall be mounted on a continuous aircraft type hinge, contain cutouts for mounted equipment, and provide protection of personnel from live internal wiring. Cutouts for breaker handles shall be provided to allow operation of breakers without entering the compartment. **No door mounted operating mechanisms allowed for breaker operation.** All control switches, indicator pilot lights, ONE general purpose GFI duplex receptacle and other operational devices shall be mounted on the external surface of the dead front. The dead front shall open a minimum of 150 degrees to allow access to equipment for maintenance. A ¾" break shall be formed around the perimeter of the dead front to provide rigidity.

5.4.8.4 Back Plate:

The back plate shall be manufactured of 12-gauge sheet steel and be finished with a primer coat and two (2) coats of baked on white enamel. All devices shall be permanently identified.

5.4.8.5 Power Distribution:

The panel power distribution shall include all necessary components and be wired with stranded copper conductors rated at a minimum of 90 degrees C.

System shall be equipped with an **Emergency Generator** with an automatic transfer switch **capable of programmable test dates and times. Inputs shall be provided to PLC to indicate Generator**

Running, Generator Alarm, and Generator Low Fuel Level OR a Stand Alone Manual Double Throw Safety Switch to allow hard wiring to a portable generator. Emergency Generator shall meet the requirements of the most recently adopted noise ordinance.

No door mounted operating mechanisms allowed for breaker operation in control panel. All conductor terminations shall be as recommended by the device manufacturer.

5.4.8.6 Circuit Breakers:

All circuit breakers shall be heavy-duty thermal magnetic or motor circuit protectors similar and equal to Square D type FAL. Each motor breaker shall be adequately sized to meet the pump motor operating characteristics and shall have a minimum of 10,000 amps interrupting capacity for 230 VAC and 14,000 amps at 480 VAC. The control circuit and the duplex receptacles shall be individually controlled by heavy-duty breakers.

Circuit breakers shall be indicating type, providing "ON-OFF-TRIP" positions of the operating handle. When the breaker is tripped automatically, the handle shall assume a middle position indicating "TRIP". Thermal magnetic breakers shall be quick-made and quick-break on both manual and automatic operation and have inverse time characteristics secured through the use of bimetallic tripping elements supplemented by a magnetic trip.

Breakers shall be designed so that an overload on one pole automatically trips and opens all legs. Field installed handled ties shall not be acceptable.

5.4.8.7 Motor Starters:

Motor starters shall be open frame, across the line; NEMA rated with individual overload protection in each leg. Motor starter contact and coil shall be replaceable from the front of the starter without being removed from its mounted position. **Overload heaters shall be solid state motor logic type** with the following features: 3 to 1 adjustment for trip current, phase loss and unbalance protection, LED power indication, ambient insensitive and self-powered, and shall have availability of electrical remote reset. Overloads shall be sized for the full load amperage draw of the pumps. Definite purpose contactors, fractional size starters and horsepower rated contactors or relays shall not be acceptable.

5.4.8.8 Transformers:

Control transformers shall provide the 120 VAC and/or 24 VAC for control circuits. Transformers shall be fused on the primary and secondary circuits. The secondary shall be grounded.

5.4.8.9 Lightning-Transient Protection:

A lightning-transient protector with tell-tale warning lights on each phase to indicate loss of protection on the individual phases shall be provided. The device shall be solid state with a response time of less than 5 nanoseconds withstanding surge capacity of 6500 amperes. Unit shall be instant recovery, long life and have no holdover currents.

5.4.8.10 Phase Monitor:

A line voltage rated, adjustable phase monitor shall be installed to sense low voltage, loss of power, reversed phasing and loss of a phase. Control circuit shall de-energize upon sensing any of the faults and shall automatically restore service upon return to normal power.

5.4.8.11 Alarm System:

The alarm light shall be a weatherproof, shatterproof, red light fixture with 500 lumens minimum to indicate alarm conditions. The alarm light shall be turned on by the alarm level.

The alarm light shall be mounted on the exterior of the cabinet. The alarm horn shall provide an audio signal of not less than 90 db at 10 feet. An **alarm silence switch** shall be **mounted on the exterior of the cabinet** and deactivate the alarm horn; however, the alarm light shall flash until the alarm condition ceases to exist. **An Input shall be provided to PLC to indicate High Wet Well Condition.**

5.4.8.12 24 VAC Regulator System:

SCADA:
Equipment for SCADA shall consisting of a **PLC, Radio, Antenna, etc**. to operate the system. Control cabinet **components shall be installed when the panel is built**.

Engineer shall contact the Pump Department at 972-771-7730 for current requirements for SCADA system and contact for Cities current SCADA supplier.

The control system shall provide for both automatic and manual control and alternation of the pumps to maintain a pumped down condition of the wet well.

Wet well levels shall be sensed by a pressure transducer. **Float regulators shall be installed as back up for HIGH and LOW levels only.** The transducer shall sense the “OFF”, “LEAD”, “LAG”, and “HIGH” levels as given on the plans. As the level in the wet well raises the lead pump, as determined by the alternator, shall start and pump the station to the “OFF” position. In the event the incoming flow exceeds the capacity of

the lead pump, the lag pump shall start and both pumps shall run to the off level. If the wet well level continues to rise, high well alarm functions shall be activated. The alternator shall switch when the off level is reached.

All inputs and outputs shall be wired to a terminal strip at bottom of cabinet.

5.4.8.13 Ancillary Equipment:

HOA Switches: A three position HOA switch shall be provided on the inner dead front for each pump. **Inputs shall be provided to PLC to indicate position of HOA.**

Run Indicators: A run pilot indicator shall be provided on the inner dead front. All indicator lights shall be push to test. **Inputs shall be provided to PLC to indicate pump running.**

Elapsed Time: Elapse time meter shall be mounted on the dead front door.

Cabinet Temperature Control: The cabinet shall be equipped with a panel heater controlled by a thermostat and a vent fan controlled by a thermostat.

Receptacles: One duplex receptacle located on inner dead front door for general purpose use. This receptacle shall be of the ground fault type, 120volt, and protected by a 20 amp breaker. A second single receptacle shall be located on the back panel to provide power for UPS back up system. This receptacle shall be 120 volt and protected by a separate 20 amp breaker.

UPS Back Up System: Will provided **120 Volt power** to SCADA communication equipment and all low voltage power transformers. This must be installed in the control panel. UPS shall be APC 650VA 120 Volt or equivalent.

The System must be able to transmit all alarms and wet well levels when on backup power.

Motor Protection: A control and status module shall sense either motor over temperature or seal leakage, and shall turn off the pump, lock out the pump, and send an alarm. **Inputs shall be provided to PLC to indicate Pump Fail, Seal Fail and Temp Fail individually for each pump.**

5.4.8.14 Miscellaneous:

Panel Racks:
Posts supporting racks shall be **3" minimum rigid conduit capped** and **bolted directly to channel framework supporting the panels.**

Panels shall have a **"rain shield" structure using ¼" minimum aluminum plating** providing a **solid back plate** behind panels **continuous to overhead plate** to protect panel from rain. Provide lighting mounted on structure with switch mounted on exterior of panel to light up panel area.
Contact City of Rockwall at 972-771-7730 for location of existing type structure.

Each pump must have its own conduit for power cord and a separate conduit for all float wires.

Drawings: Control panel schematic drawings shall be submitted for approval with the submittal plans.
Final control panel wire schematic drawings including a list of all legends (2 sets total) shall be provided. One set shall be encapsulated in Mylar and attached to the inside of the front door of the control cabinet. A second set shall be delivered to the City of Rockwall Wastewater Department.

Panel Markings: All component parts in the control panel shall be permanently marked and identified as they are indicated on the drawing. Marking shall be on the back plate adjacent to the component. All control conductors shall be identified with wire markers as close as practical to each end of conductors.

Panel Wiring: All wiring in panel shall maintain a **minimum of 1 1/2"** spacing between components and wire ways.

Testing: All panels shall be tested to the power requirements as shown on the plans to assure proper operation of all the components. Each control function shall be activated to check for proper operation and indication.

Guarantee: All equipment shall be guaranteed for a period of three (3) years from date of acceptance. The guarantee is effective against all defects in workmanship and/or defective components. The warranty is limited to replacement or repair of the defective equipment.

6. MISCELLANEOUS REQUIREMENTS

6.1 Grading

The backfill material shall be placed in layers not to exceed eight (8) inches loose thickness. The moisture content shall be uniform and near the optimum moisture content for the material. In cases, where the materials being placed do not have the proper moisture, the material shall be dried out or additional moisture shall be added by satisfactory methods such that the additional water is distributed uniformly throughout the material being placed. The layers of the backfill shall be reduced in thickness when satisfactory compaction cannot be obtained with the equipment being used. In all cases a density of not less than ninety-five (95) percent of the standard proctor density must be obtained. The contractor shall arrange for the necessary laboratory testing, at their expense, to determine the density of the material. All franchise utility companies (phone, gas, electrical, cable, internet, and any utility that isn't supplied by the City) working within the right-of-ways of streets or alleys shall also comply with the above noted specifications with laboratory testing results provided to the City of Rockwall. Easement locations under pavement shall also have a density control backfill to ninety-five (95) percent of the standard proctor density. All densities are to be within the acceptable moisture range of (-2 to +4) percent of optimum moisture unless otherwise approved by the City Engineer.

A sheeps-foot roller shall be utilized for compaction of all fill material. Mechanical tamping is allowed for trench backfill.

It shall be the responsibility of the Developer to adjust all City and franchise utilities the final grades of the development.

All slopes should be a maximum of 4:1 and a minimum of 1%. In locations where a 4:1 slope is not possible, retaining walls, gabion baskets, concrete slope protection or other approved retaining methods may be required. Retaining methods must be approved by the City Engineer.

At the beginning of the project the Developer will provide offset stakes at intervals of fifty (50) feet. The stakes will be offset from the back of the outside curb, a convenient distance to permit all operations, to be completed without disturbing these stakes. Information that shall be included on the stakes includes the station number, offset distance from back of curb, and elevations of hub. It will be the contractors responsibility to maintain these stakes, and use the information for all other horizontal and vertical control required. The contractor will set all forms using the data shown on the approved plans.

6.2 Grading, Fill, Excavation and Earthwork Permit

A grading, fill, excavation and earthwork permit shall be obtained prior to stockpiling or filling property within the City limits. No filling in drainage swales, creeks, wetlands, etc. is allowed without a flood study approval. Erosion protection shall be installed around stockpiled or stored material until grass is established. If fill is placed for use other than stockpiling or storage, a grading plan shall be prepared by a Professional Engineer and submitted with the grading, fill, excavation and earthwork permit. Temporary stockpiles have a maximum time limit of six (6) months. Densities shall be taken and proper compaction techniques used when placing the fill. In all cases a Professional Engineer shall certify that the proposed fill location is not within a stream or creek (flowing or not) flood plain. If the City Engineer determines the fill is to be placed near a creek or stream or possible drainage way, the 100-year floodplain shall be staked by a registered surveyor.

An early fill, excavation and earthwork permit will not be issued to any development or re-development projects that are in actively being reviewed by the Engineering Department. Grading for the parcels/development will only be released after final construction plan release by the Engineering Department.

The City of Rockwall requires that the design engineer provide a letter of concurrence. The letter is to verify that the drainage patterns, grade to drains locations, detention systems including outfall structures, detention pond volume, pad elevations, and drainage structures located within the project scope were installed to the general elevations as shown on the approved plans. The letter shall also verify that the project was constructed to meet the approved design requirements or is within acceptable design tolerances (max 0.2 feet for residential pad elevations). The design engineer or their designated representative shall direct all survey work necessary to verify elevations and design compliance. The letter of concurrence is to have the seal and signature of the design engineer.

6.3 Private Utility Construction

6.3.1 Trench Backfill – City Right-of-Way

1. No concrete streets shall be open cut by utility companies without City approval. Utilities crossing concrete streets shall be tunneled or bored.

2. Asphalt streets may be open cut. Backfill above utilities shall be concrete stabilized sand or cement. The asphalt pavement shall be repaired per City detail.

3. All trench backfill is to be compacted to 95% Standard Proctor Density within City rights-of-ways. The compaction may be obtained by mechanical tamping, rolling, etc. No water jetting is allowed. In the parkway, the backfill material may be from the excavated trench, except

no rocks larger than two inches (2") shall be used. Material from rock or shale excavation cannot be used. The contractor for the utility company or the utility company shall furnish density reports from a materials testing company verifying the densities. Densities shall be taken at each twelve-inch (12") lift at a maximum spacing of 150 feet. The moisture content shall be uniform and near the optimum moisture content for the material. In cases, where the materials being placed do not have the proper moisture, the material shall be dried out or additional moisture shall be added by satisfactory methods such that the additional water is distributed uniformly throughout the material being placed.

6.3.2 Parkway Cleanup

The contractor for the utility company or utility company shall remove any rocks or excess trench material from the parkway and replace any disturbed areas with grass sod.

6.4 Additional Permits or Approvals

Developer or developer's representative is responsible for obtaining any other approvals or permits needed for their development, for example: TCEQ, TXDOT, City of Dallas, FEMA, USACOE etc. prior to start of construction. Copies of the permits/approvals shall be furnished to the City.

6.5 Retaining Walls

A. Retaining walls or concrete slope protection shall be installed where lot slope is greater than 4:1.

B. No railroad tie retaining walls shall be constructed in public or private property.

C. No retaining walls including the footing shall be placed in the right-of-way, easements or overlapping property lines.

D. All retaining walls shall be stone, masonry or reinforced concrete with a stone face or form liner. No smooth concrete retaining walls to be installed.

E. Retaining walls three feet (3') and higher shall be designed and inspected by a professional licensed engineer in the State of Texas. Property lines and right-of-ways shall be noted on the wall plans. The City requires a verification letter (signed/sealed) from the design engineer stating that the retaining walls installed with the site/subdivision were inspected by the engineer or their designated representative and that the walls were installed to the engineered design and general construction standards. The

verification letter shall be delivered to the Engineering Department prior to the project acceptance by the City.

F. Retaining walls over 30" in height that have sidewalk, trail or other walking surface on the top side of the wall will require railing.

G. Traffic rated guard rail or barrier will be required when roadway, parking lot or alley is within 10 feet of a retaining wall that is over 30" in height.

H. Gabion retaining walls may be used only with City Engineer's approval for walls less than three feet (3') along drainage ways.

I. All retaining walls shall be placed according to offset hubs set by certified professional surveyors noting grade cuts, wall elevations and stop points for each wall end. Wall locations and elevations shall match those shown on the approved site grading plans.

6.6 Maintenance Bonds

The City requires ten (10%) percent-two (2) year maintenance bond for paving, paving improvements, water systems, wastewater systems, storm sewer systems including detention systems, and associated fixtures and structures which are located within the right-of-ways or defined easements. The two (2) year maintenance bond is to state "from date of City acceptance" as the starting time.

A review of the site shall be conducted at twenty (20) months into the two (2) year maintenance period. The design engineer or their designated representative shall be present to walk the site with the City of Rockwall Engineering Inspection personnel.

6.7 Construction

6.7.1 Preliminary Site Preparation

Site Preparation - The below noted site preparation items are to be in place, inspected and approved by the City, prior to the start of any clearing, grubbing or grading operations.

1. Protected trees which are designated to remain on site - are to be identified, tagged and banded with bright orange or red bands.

2. Protected trees which are designated to be removed from the site are to be identified tagged and banded with blue bands or blue paint markings.

3. Tree identification tags – are to consist of metal tags which have the tree identification number stenciled or stamped or engraved on the tag. The

numbers used to identify the protected trees shall correspond to the tree identification number noted on the approved treescape plans.

4. Protected Tree - Barrier Fencing:

   - o Chain link barrier fencing – shall be placed around the drip lines of the individual protected trees or groups of protected trees, which are designated to remain at the site if they are located within 10-feet of any cut/fill grading location.

   - o Plastic mesh barrier fencing - shall be placed around the drip lines of individual protected trees or groups of protected trees, which are located over 10-feet or more outside a cut/fill grading location.

5. Silt fence along with construction entrance and any other designated erosion BMP's must be installed and inspected. No silt fencing may be installed at the site until the trees have been identified, banded, tagged, fenced and inspected by the City.

6. Portable toilet facilities will be required on all construction sites or as otherwise deemed necessary by the City of Rockwall. It is essential that adequate on-site restroom facilities be available for all construction workers. It will be the responsibility of the contractor to install and maintain the facilities through the completion of the project. These facilities must be on site and verified prior to moving personnel on site and before construction can begin.

7. Portable trash receptacle is to remain on the job site through the course of construction. The site is to remain free of construction litter and debris. Construction workers shall place all lunch trash in the "trash containers" immediately after lunch. Trash receptacle must be on site and verified prior to moving personnel on site and before construction can begin.

8. Construction Site Working Hours and Noise Control Signage – Construction and construction related activities are limited to the hours of 7:00 am to 7:00 pm Monday through Friday and 8:00 am to 7:00 pm on Saturday. No Sunday construction allowed. The City of Rockwall requires that a sign be posted at each Commercial/Residential development construction site. The sign must be installed at the site and verified prior to moving personnel on site and before construction can begin. The construction related activities are to include but not be limited to the following:

   - o Maintenance, servicing and fueling of construction equipment.
   - o The delivery of construction related materials and/or construction equipment.

At locations where compliance to Ordinance 05-45 is not being observed, the City of Rockwall may issue written orders to stop work or further regulate the site construction work hours. The City may also issue citations if it is determined that a violation of the construction ordinance exist.

(Construction Site Sign - Example)

Ordinance # 05-45
Construction Site Working Hours and Noise Control

City Ordinance – No. 05-45 limits construction and construction related activities to the hours of 7:00 a.m. - 7:00 p.m. Monday through Friday, and 8:00 a.m. - 7:00 p.m. on Saturday. (No Sunday construction allowed).

ORDENANZA #05-45
HORAS DE TRABAJO EN EL SITIO DE CONSTRUCCION Y EL CONTROL DE RUIDO

La Ordenanza de la Ciudad – No. 05-45 limita la construcción y las actividades relacionadas con la construcción a las horas de 7:00 a.m. – 7:00 p.m. de Lunes a Viernes, y de 8:00 a.m. – 7:00 p.m. los Sábados. (No se permitirá construcción los Domingo).

Noise Ordinance Sign
(Sign Size – 3' wide x 2' tall)

6.7.2 Inspection Scheduling

It is the responsibility of the contractor to schedule inspections prior to construction. Inspections may be scheduled and coordinated in the field or by cell phone directly with the Engineering Department Construction Inspector. Inspection of construction and verification of compliance to plans and specifications shall be conducted by the City of Rockwall Engineering Construction Inspector. The general contractor shall notify all of his construction contractors of this requirement. Items to be inspected must be sufficiently ready for inspection at the time of your requested inspection appointment as inspector's time is limited. Failure to be ready for inspections may result in inspection rescheduling to the following day. No development will be accepted by the City of Rockwall until all construction has been approved by the City of Rockwall inspectors.

1. Saturday Inspections: The contractor will be charged a minimum 2 hours inspection charge for all Saturday inspections. All Saturday inspections must be scheduled in writing to the Engineering Department by noon on the Thursday before the inspection date. A signed Saturday Engineering Inspection Request form must be emailed to the City Engineer and

Construction Inspector Supervisor. Approval/disapproval will be emailed back to the requesting contractor with the Saturday inspector's information. All cancellations must be given verbally and in writing to the Saturday inspector no later than 8 am on day of inspection. Two hours of overtime inspection will be charged to the contractor if no cancellation is given prior to the inspector arriving at the project site. Contractor must sign Engineering Inspector's Report of Overtime form to finalize the inspection. No acceptance and/or certification of occupancy will be given until all overtime engineering inspection fees are paid in full.

2. Before/After Weekday Hours Inspections: Contractor will be charged on 15 minute intervals for any before/after hour's inspections. Contractor must sign Engineering Inspector's Report of Overtime form to finalize the inspection. No acceptance and/or certification of occupancy will be given until all overtime engineering inspection fees are paid in full.

6.7.3 Vertical Above Slab Construction Permit

No vertical (above slab) construction will be allowed until such time as the following minimum site requirements have been addressed at the site and a vertical above slab construction permit has been issued. Minimum requirements for vertical construction are subject to but not necessarily limited to the below noted items:

- Fire lane pavement is installed, tested, and approved for use
- Fire lane pavement is painted and marked to Fire Department specifications
- Water lines for the site are installed, tested, and approved for use
- All fire hydrants are installed and approved for use
- Fire hydrant nozzles and bonnets are painted as per line size color code
- Reflective fire hydrant locator buttons are in place at hydrant pavement locations
- Fire hydrants are flow tested to verify flow at designated hydrant locations
- Fire hydrant nozzle diameters, proper height above final grade, and clearance are verified and approved
- Silt fence is placed above the fire lane if it is deemed necessary at positive flow areas
- Exterior building materials are approved by the Planning and Zoning Department.

6.7.4 Disposal of Excess Materials

The contractor shall properly dispose of all excess material by removing from the job site all the brush, trash, debris, etc. upon completion of construction. All material shall be properly disposed.

6.7.5 Construction Site Safety

Construction site safety measures are to be in place at all construction projects located within the City of Rockwall. All necessary measures required to ensure that safe work zones exist for the protection of construction workers and general public living in or near such construction zones. Construction zones shall comply with work zone traffic control specifications and requirements. Occupational Health and Safety Administration requirements and regulations must be in compliance. Temporary construction fencing is to be places around open trenches, pits, or other locations deemed necessary by the City of Rockwall. Any miscellaneous items that may pose direct or potential hazard to workers or the general public that is known by the contractor or brought to the attention of the contractor shall be addressed immediately.

It is the responsibility of the contractor(s) to establish and maintain construction site safety measures. However, the City of Rockwall will temporarily suspend work at a construction site if it is deemed necessary due to unsafe or hazardous conditions until such conditions have been corrected.

In each circumstance where it is deemed that proper safety measures are not being followed, a warning will be issued by the engineering construction inspector. Construction may be temporarily suspended if deemed necessary until items responsible for issuance of the safety warning have been properly addressed. Issuance of three (3) or more safety warnings will require that the designated construction be suspended until such time that a safety meeting is scheduled with contractor personnel along with City of Rockwall representatives to discuss the appropriate measures to correct the identified problems and determine any further possible actions which may be necessary.

City of Rockwall
The New Horizon

7. Special Provisions to the NCTCOG's Standard Specifications for Public Works Construction Standards

All work included as a part of this contract shall be performed in accordance with the Standard Specifications for Public Works Construction, North Central Texas, November 2017, Fifth Edition, except where noted otherwise in the City of Rockwall's Supplemental Special Provisions, the Special Conditions included in the Specifications and Contract Documents.

The North Central Texas Standard Specifications shall be modified and clarified by the addition to the following requirements to the various items. Except when specifically stated, none of the requirements of the North Central Texas Standard Specifications shall be deleted.

7.1 Division 100 General Provisions

NOTE: The ***(1)*** symbol specifies that this item is also covered in the City of Rockwall's "Special Provisions" to the "Standard Specifications for Public Works Construction, North Central Texas". These Special Provisions are additional and modify the "Standard Specification"

ITEM 103 AWARD AND EXECUTION CONTRACT

103.2 Award of Contract

Delete Item 103.2 in its entirety and substitute therefore the following:

It is the intention of the Owner to award a contract for the work included in this project on the basis of the lowest acceptable bid submitted by a qualified bidder, as determined by the Owner.

Within five (5) working days after the bid opening, the low bidder shall submit such evidence as the Owner may require establishing the bidder's qualifications to satisfactorily perform the work included in this project. Information that may be required shall include the following:

(1) Current Financial Statement.
(2) Letter of Auditor's opinion.
(3) Previous years Balance Sheet, Income Statement and Change of Financial Position.
(4) List of projects that have been satisfactorily completed by the Bidder that are of the same general type as included in this contract, together with names, addresses and phone numbers or persons familiar with this work.
(5) Other information that may be pertinent to the Bidder's Qualifications.

Should the bidder fail to produce evidence satisfactory to the Owner on any of the foregoing points he may be disqualified and the work awarded to the next bidder so qualifying.

The Owner will notify the successful bidder, in writing, within sixty (60) days after the date of receiving bids, of the acceptance of the proposal. The Contractor or Contractors shall complete execution of the required bonds and Contract within ten (10) days of such notice.

103.4 Insurance

Add the following sub-item:

103.4.6 Bonds and Insurance

103.4.6.1 Performance, Payment and Other Bonds

Contractor shall furnish Performance and Payment Bonds as security for the faithful performance and payment of all his obligations under the Contract Documents. These Bonds shall be, at all times, in amounts equal to the total Contract Price, and in such form as set forth in the Contract Documents and with such corporate sureties as are licensed to conduct business in the state where the Project is located and are named in the current list of "Surety Companies Acceptable on Federal Bonds" as published in the Federal Register by the Audit Staff Bureau of Accounts, U.S. Treasury Department. The Performance and Payment Bonds shall be expanded to include any extension of the Contract Period of total Price.

If the surety on any Bond furnished by Contractor is declared bankrupt or becomes insolvent or its right to do business in terminated in any state where any part of the Project is located in revoked, Contractor shall within five (5) days thereafter substitute another Bond and surety, both of which may be acceptable to the City.

103.4.6.2 Additional Bonds and Insurance

Prior to delivery of the executed Contract by City to the Contractor, City may require CONTRACTOR to furnish such other Bonds and such additional insurance in such form and with such sureties or insurers as the City may require.

ITEM 105 CONTROL OF WORK

105.1 Contract of Documents

105.1.1 Priority of Contract Documents

Change the first sentence of Item 105.1.1 to read:

In case of conflict between contract documents, priority of interpretation shall be in the following order: signed agreement, performance and payment bonds, addenda, special conditions, project (or contract) drawings and specifications, City of Rockwall Special Provisions to the Standard Specifications for Public Works Construction – North Central Texas, standard drawings, advertisement for bids, contractor's bid proposal and bid form.

105.1.3 Contract Drawings and Specifications

Add the following:

In general, the number of copies of the plans and specifications furnished to the Contractor shall be limited to five (5). Additional copies may be obtained at cost of reproduction.

105.2 Workmanship, Warranties and Guarantees

105.2.2 Special Warranty

Add the following:

The Contractor shall provide a Maintenance Bond in the amount of ten percent (10%) of the total amount of the contract guaranteeing the work in accordance with the plans and specifications for a period of two (2) years after acceptance by the City of Rockwall. This bond shall provide for repair and/or

replacement of all defects due to faulty material and workmanship that appear within a period of two (2) years from the date of completion and acceptance of the improvements by the City of Rockwall.

105.3 Shop Drawings, Product Data and Samples

Add the following:

Review of Shop Drawings by the Engineer shall be of the sole purpose of determining the sufficiency of the said drawings or schedules to result in finished improvements in conformance with the plans and specifications, and shall not relieve the Contractor of his duty as an independent contractor. It being understood and agreed that the Engineer does not assume any duty to pass upon the propriety or adequacy of such drawings or schedules or any means or methods reflected thereby in relation to the safety of either person or property during the contractors performance hereunder.

105.4 Construction Stakes

Add the following to the first paragraph:

The Contractor shall be required to utilize the control monuments provided in the plans to set horizontal and vertical control and construction staking with the contractor's own surveyor.

105.5 Means and Methods of Construction

Add the following:

105.5.1 Water for Construction

The Contactor shall make the necessary arrangements for securing and transporting all water required in the construction, including water required for mixing of concrete, sprinkling, testing, flushing, flooding or jetting. The Contactor shall provide water as required at his own expenses.

Any party requesting the use of a temporary meter on a fire hydrant in the City of Rockwall shall execute an agreement with the City of Rockwall and shall deposit with the City of Rockwall the amount required by ordinance. Such deposit shall be returned upon payment of all charges for water use, and upon return of the meter, fittings, and wrench in their original condition.

Stationary meters shall be locked to fire hydrants at all times. Installation, set up and service fees shall be in the amounts established by ordinance.

It shall be unlawful for any person to open or close any fire hydrant used to obtain water for any purpose with any tool or device other than a standard accepted fire hydrant wrench, which can be supplied by the City of Rockwall.

All stationary fire hydrant meters shall be read monthly at their location in the field. All mobile fire hydrant meters are to be brought to the Utility Maintenance Department, Rockwall, Texas, between the 1st and 10th of each month to be read.

Temporary fire hydrant meters shall be read monthly by representatives of the City of Rockwall, and bills rendered at the current rates for all consumption. Customers using such meters shall comply with the written procedures implemented by the City with regard to making the meters

available to be read by representatives of the Rockwall Water Department. It shall be unlawful for any person to fail to make such meter available to be read by representatives of the Rockwall Utilities Department, as required by written procedures issued by the City.

Upon conviction of violation of the above requirements punishment shall be by fine not to exceed Two Hundred Dollars ($200.00). Each day on which a violation exists shall constitute a separate offense.

105.7 Owner's Representatives

Add the following:

105.7.3 Observation of Work by Engineer

The Engineer shall make periodic visits to the site to familiarize himself/herself generally with the progress of the executed work and to determine if such work generally meets the essential performance and design features and the technical and functional engineering requirements of the Contract Documents; provided and except, however, that the Engineer shall not be responsible for making any detailed, exhaustive, comprehensive or continuous on-site inspection of the quality or quantity of the work or be in any way responsible, directly or indirectly, for the construction means, methods, techniques, sequences, quality, procedures, programs, safety precautions or lack of same incident thereto or in connection therewith. Notwithstanding any other provision of this agreement or any other Contract Document, the Engineer shall not be in any way responsible or liable for any acts, errors, omissions or negligence of the Contractor, any subcontractor or any of the Contractor's or subcontractor's agents, servants or employees or any other person, firm or corporation performing or attempting to perform any of the work.

105.10 Acceptance

Add the following:

Once the work is satisfactory to the City of Rockwall and in accordance with the plans, specifications, contract documents, and the City has received; the Contractor's Affidavit of Final Payment and Release, Maintenance Bond, and Contractor's redlines/markups plans of actual work performed by the Contractor will the City issue a certificate of acceptance.

ITEM 107 LEGAL RELATIONS AND CONTRACT RESPONSIBILITIES

107.3 Indemnification

Delete Item 107.2 in its entirety and substitute therefore the following:

The Contractor and his sureties shall indemnify, defend and save harmless the OWNER and all of its officers, agents and employees, ENGINEER and all of its officers and employees from all suits, actions or claims of any character, name and description brought for or on account of any injuries, including death or damages received or sustained by any person, persons or property on account of the operations of the Contractor, his agents, employees or subcontractors; or on account

of any negligent act or fault of the Contractor, his agents, employees or subcontractors in the execution of said contract; or on account of the failure of the Contractor to provide the necessary barricades, warning lights or signs; and shall be required to pay any judgment, with cost, which may be obtained against the Owner or Engineer growing out of such injury, including death or damage.

107.14 Equal Employment Opportunity
Delete Item 107.14.5 Reports in this item in its entirety.

107.15 State and Local Sales and use Taxes
Delete in its entirety and substitute therefore the following;

Recent legislation has removed the sales tax exemption previously provided by Section 151.311 of the Tax Code covering tangible personal property purchased by a contractor for use in the performance of a contract for the improvement of City–owned realty.

It is still possible, however, for a contractor to make tax-free purchases of tangible personal property that will be incorporated into and become part of a City construction project through the use of a “separated contract” with the City. A “separated contract” is one, which separates charges for materials from charges for labor. Under such a contract, the contractor becomes a “seller” of those materials, which are incorporated into the project, such as bricks, lumber, concrete, paint, etc. The contractor issues a resale certificate in lieu of paying the sales tax at the time such items are purchased. The contractor then receives an exemption certificate from the City for those materials. (This procedure may not be used, however, for materials, which do not become a part of the finished product. For example, equipment rentals, form materials, etc. are not considered as becoming “incorporated” into the project.)

Utilization of this “separated contract” approach eliminates the need for bidders to figure in sales tax for materials, which are to be incorporated into the project. Bid items, which contain non-taxable materials, are identified in the Bid Schedule or this project. The successful bidder will be required to complete a Contract Form provided by the Owner identifying and separating non-taxable materials from the labor and taxable materials which are not incorporated into the finished project. The completed contractor form will be used to develop the “separated contract” and will determine the extent of the tax exemption.

107.17 Compliance with Laws
Add the following sub item:

107.17.2 Antitrust

The Contractor hereby assigns to the Owner any and all claims for over-charges associated with this contract which arise under the Antitrust Laws of the United States, 15 U.S.C.A. Section 1, et seq., (1973).

Add the following sub item:

107.17.3 Wage Rate

All employees of the Contractor on the work to be performed under this contract shall be paid the prevailing wage scale in this locality for work of a

similar character, and in no event less than the rates shown in the Special conditions to the Specifications.

107.20 Protection of Work and Persons and Property

107.20.2 Protection of Persons and Property

Add the following:

The Contractor shall at all times exercise reasonable precautions for the safety of employees and others on or near the work and shall comply with all applicable provisions of Federal, State, and Municipal Safety laws and building and construction codes. All machinery equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America except where incompatible with Federal, State and Municipal laws or regulations. The Contractor shall provide such machinery, guards, safe walkways, ladders, bridges, gangplanks and other safety devices. The safety precautions actually taken and their adequacy shall be the sole responsibility of the Contractor, acting at his discretion as an independent contractor.

Add the following sub item:

107.20.4 Small Claims for Damages or Injury

If any person files a claim against the OWNER or CONTRACTOR for personal injury or property damage resulting from, arising out of, or caused by the operations of the Contactor, or any work within the limits of the project, the Contractor must either submit to the Owner a duly executed full release within thirty (30) days from the date of written claim, or immediately report the claim to his liability insurance carrier for their action in adjusting the claim. If the Contractor fails to comply with this provision within the stipulated time limit, it will be Automatically deemed that the Contractor has appointed the Owner as its irrevocable Attorney in Fact authorizing the Owner to report the claim directly with the liability insurance carrier. This provision is in and of itself a Power of Attorney from the Contractor to the Owner which authorizes the Owner to take said action on behalf of the Contactor without the necessity of the execution of any other document. If the Contractor fails to comply with the provisions of this item the Owner, at its own discretion, may terminate this contract or take any other actions it deems appropriate. Any payment or portion thereof due the Contractor, whether it is a final payment, progress payment, payment out of retainage or refund payment may be withheld by the Owner as is authorized by item 109.4. Bankruptcy, insolvency or denial of liability by the insurance carrier shall not exonerate the Contractor from liability.

ITEM 109 MEASUREMENT AND PAYMENT

109.5 Monthly Estimate, Partial Payments, Retainage, Final Inspection, Acceptance and Final Payment

109.5.2 Retainage

Add the following:

(4) On projects where the contract price, at the time of execution, is greater than $400,000.00 the Owner may retain 10 percent of the amount due the Contractor, with the retainage above 5 percent deposited in an interest bearing account and interest earned on such 5 percent retained funds shall be paid to the Contractor upon completion of the contract.

109.5.3 Final Inspection and Acceptance

Add the following:

Within ten (10) days after the Contractor has given the Engineer written notice that the work has been completed, or substantially completed, the Engineer and the Owner shall inspect the work and within said time, if the work be found to be completed or substantially completed in accordance with the Contract Documents, the Engineer shall issue to the Owner and the Contractor his Certificate of Completion, and there upon it shall be the duty of the Owner within ten (10) days to insure a Certificate of acceptance of the work to the Contractor or to advise the Contractor in writing of the reason for non-acceptance.

Definition of Substantially Complete: The date of substantial completion of a project or specified area of a project is the date when the construction is sufficiently completed, in accordance with the contract documents, as modified by any change order agreed to by the parties, so that the Owner can occupy or utilize the project or specified area of the project for the use for which it was intended.

7.2 Division 200 Site Protection & Preparation

NOTE: The ***(1)*** symbol specifies that this item is also covered in the City of Rockwall's "Special Provisions" to the "Standard Specifications for Public Works Construction, North Central Texas". These Special Provisions are additional and modify the "Standard Specification"

(1)	204.6.	Seeding Turf-grass
	204.7.	Rejection

ITEM 201 TEMPORARY EROSION, SEDIMENTATION, AND WATER POLLUTION PREVENTION AND CONTROL

202.5. Silt Fence

202.5.2. Materials

202.5.2.2. Posts

Delete the last sentence in its entirety and replace with the following:

No wood stakes shall be allowed.

202.11. Stabilized Construction Exit

202.11.2. Materials

202.11.2.1 Stone

Delete the following subsection in its entirety and replace with the following:

Stone material shall consist of 4 to 6-inch minimum course aggregate riprap and shall be place in a layer 12-inch thick. No crushed concrete shall be allowed.

ITEM 203 SITE PREPERATION

203.2. Unclassified Street Excavation

203.2.3. General

Add to the following as the third paragraph:

Unless otherwise approved in writing by the City of Rockwall, where excavation to grade established in the field by the Owner terminates in loose or solid rock, the Contractor shall excavate 6 inches below the required subgrade elevations for the entire roadbed width and shall backfill with suitable selected materials as indicated on the plans. Suitable selected material shall include lime treated subgrade or a base material having a plasticity index not

greater than 12. Payment for such work will be made under the items of unclassified street excavation, lime treated subgrade and hydrated lime. The 6-inch lime treated subgrade or base shall be compacted to 95% standard proctor density.

ITEM 204 LANDSCAPING

204.2. Topsoil

204.2.3. Construction Methods

Add the following:

A minimum of four (4) inches of topsoil shall be provided on all major thoroughfare medians and rights-of-way and on all earthen channel slopes to the lines and grades established by the construction plans. This will be material imported from off site. The City will approve material prior to placement.

204.6 Seeding Turfgrass

204.6.1. General

Add the following:

The Contractor shall maintain the seeded areas including watering until a "Stand of Grass" is obtained. A "Permanent Stand of Grass" shall consist of **75% to 80%** coverage, a minimum of one (1) inch in height. Re-seeding will be required in washed areas.

204.6.3. Planting Season and Application Rate

Delete the mixture, rate, and planting dates in Table 204.6.3.(a) Seeding Turfgrass and substitute:

Type I: Bermuda Grass - Hulled
50 lbs/acre April - June

Type II: Annual Rye Grass
40 lbs/acre September - March

Type III Bermuda Grass - Unhulled
January - March/July - August - 50 lbs/acre

A mix of seed shall be used in overlapping seasons.

City of Rockwall
The New Horizon

7.3 Division 300 Roadway Construction

NOTE: The ***(1)*** symbol specifies that this item is also covered in the City of Rockwall's "Special Provisions" to the "Standard Specifications for Public Works Construction, North Central Texas". These Special Provisions are additional and modify the "Standard Specification"

Table 8.3: Revisions to NCTCOG's Division 300 Roadway Construction

(1)	305.3.	Concrete Medians
	305.4.	Reinforced Concrete Headers

ITEM 301. SUBGRADE, SUBBASE AND BASE PREPERATION

301.2 Lime Treatment

Add the following sentences:

Quick Lime shall not be used in the construction of roadway work in the City. Dry hydrated lime shall not be used for treating subgrade or base material unless specified on the plans

301.2.1. Materials

301.2.1.2. Quicklime

301.2.1.2.1. General

Add to the beginning of the first paragraph:

Quicklime (dry) shall not be used in the City without written approval from the City.

301.2.3. Lime Treatment Construction Methods

301.2.3.3. General Construction

301.2.3.3.1. Treatment for Materials in Place

Add the following:

Prior to final compaction of subgrade, samples of the subgrade material shall be collected by a testing laboratory approved by the City, and laboratory tests made to determine the amount of lime required.

The application rate for hydrated lime shall be selected to obtain at least the optimum lime percentage indicated by test method ASTM C977-83a, Appendix XI; however, not less than 27 lbs. per S.Y. shall be applied. A Geotechnical Engineer's report reflecting the recommended application rate and including supporting test data shall be submitted in writing to the City, for approval prior to beginning any lime treatment. Laboratory test may be waived provided a minimum of 36 lbs. per S.Y. is applied. Testing shall look for sulfates to see if Lime Treatment will cause and adverse effect on the subgrade.

301.2.3.7. Maintenance

Add the following to the first paragraph:

The lime treated subgrade shall be moist cured until covered by other base or pavement up to fourteen (14) days after final compaction.

After 14 days without covering an application of 0.10 to 0.20 gallons per square yard emulsified asphalt shall be applied at the Contractor's expense. Reapplication of emulsified asphalt may be required if lime treated subgrade is not covered shortly after first application. Lime treated subgrade may be covered by other base or pavement when density of 95% of maximum at optimum moisture content is obtained.

301.3 Portland Cement Treatment

Add the following:

Portland cement modification of subgrade soils is not approved in Rockwall. Subgrade soils means natural ground or embankment encountered in the construction.

301.5 Flexible Subbase or Base (Crushed Stone/Concrete)

301.5.1. Material

301.5.1.1. General

Add the sentence:

No local limestone material shall be used as flexible base (crushed limestone) on Rockwall paving projects, unless otherwise shown on the plans.

301.5.1.2 Tests and Physical Requirements

After the first sentence add the sentence:

Samples of crushed limestone shall be submitted to the engineer testing laboratory employed by the City for testing and conformance with the specifications.

ITEM 303 PORTLAND CEMENT PAVEMENT

303.2. Portland Cement Concrete Pavement Materials

303.2.1. Aggregates for Portland Cement Concrete

303.2.1.3. Coarse Aggregates

Gradation: Add the sentence: For Rockwall paving projects, the coarse aggregate's gradation shall meet the requirements of Size No. 4 shown in the table.

303.3 Mix Design and Mixing Concrete for Pavement

303.3.5. Mixing and Delivery

303.3.5.3. Central Mixing Plant

Add the following:

When a fly ash admixture is used with Type I cement in the production of portland cement concrete, separate silos shall be provided for fly ash and cement and provisions shall be made for individual measurements.

303.5 Construction Methods

303.5.6.Finishing

Delete 303.5.6. and add the following:

The finished concrete pavement construction under these specifications is expected to meet certain quality standards for surface of the concrete including the durability, texture, riding surface and appearance. The surface must be durable, firm, dense and well bonded to the aggregate to maintain an appearance and texture which is satisfactory to the Owner. Concrete pavement having a poor surface which has spalled (exposed aggregate) due to poor quality paste, high water-cement ratio, over-vibration, improper curing, extreme weather or any other reason, or does not have a satisfactory riding surface shall be removed and replaced at the Contractor's expense. It is extremely important that the pavement have a good rideable surface, free from undulations and rough joints. The City Engineer shall determine the acceptability of the pavement.

303.5.6.1. Machine Finishing

Machine finishing of pavement shall include the use of power-driven spreaders, reciprocating type power-driven vibrators, power-driven transverse strike-off, and screed.

The concrete pavement shall be consolidated by a reciprocating type mechanical vibrator. As soon as the concrete has been spread between the forms, the mechanical vibrator shall be operated to consolidate the concrete and remove all voids. Hand manipulated vibrators shall be used for areas not covered by the mechanical vibratory unit.

The transverse finishing machine shall first be operated to compact and finish the pavement to the required section and grade, without surface voids. The machine shall be operated over each area as many times and at such intervals as directed. At least two trips will be required and the last trip over a given area shall be a continuous run of not less than 40 feet. After completion of finishing with the transverse finishing machine a transverse drag float may be used.

After the floating has been completed and the excess water removed, but while the concrete is still plastic, the surface of the concrete shall be tested for trueness with an approved 10-foot steel straightedge furnished by the Contractor. The straightedge shall be operated from the side of the pavement, placed parallel to the pavement centerline and passed across the slab to reveal any high sports or depressions. The straightedge shall be advanced along the pavement in successive stages of not more than one-half its length. Practically perfect contact of the straightedge with surface will be required, and the pavement shall be leveled to this condition, in order to insure conformity with the surface test required below after the pavement has fully hardened and to insure a smooth rideable surface. Any correction of the surface required shall be accomplished by adding

concrete if required and by operating the longitudinal float over the area. The surface test with the straightedge shall then be repeated.

After completion of the straightedge testing and surface correction the surface of the pavement shall be finished by an approved method. Methods available for pavement surface finish including a burlap drag finish, a broom finish or a belt finish. Unless otherwise shown on the plans, the pavement surface shall be finished with the burlap drag.

303.5.6.1.1. Burlap Drag Finish

If the surface texture is to be a drag finish, a drag shall be used; it shall consist of a seamless strip of damp burlap or cotton fabric, and it shall produce a uniform surface of gritty texture after dragging it longitudinally along the full width of pavement. For pavement 16 feet or more in width, the drag shall be mounted on a bridge which travels on the forms. The diameter of the drag shall be such that a strip of burlap or fabric at least 3 feet wide is in contact with the full width of pavement surface while the drag is used. The drag shall consist of not less than two layers of burlap with the bottom layer approximately 6 inches wider than the upper layer. The drag shall be maintained in such a condition that the resultant surface is of uniform appearance and reasonably free from gravels over 1/16-inch in depth. Drags shall be maintained clean and free from encrusted mortar. Drags that cannot be cleaned shall be discarded and new drags substituted.

303.5.6.1.2. Broom Finish

If the surface texture is to be broom finished, it shall be applied when the water sheen has practically disappeared. The broom shall be drawn from the center to the edge of the pavement with adjacent strokes slightly overlapping. The broom operation shall be so executed that the corrugation produced in the surface shall be uniform in appearance and not more than 1/16-inch in depth. Brooming shall be completed before the concrete is in such condition that the surface will be torn or unduly roughened by the operation. The surface thus finished shall be free from rough and porous areas, irregularities, and depressions resulting from improper handling of the broom. Brooms shall be of the quality, size, and construction and shall be operated to produce a surface finish meeting the approval of the Owner. Subject to the approval of the Owner, the Contractor may be permitted to substitute mechanical brooming in lieu of the manual brooming as herein described.

303.5.6.1.3. Belt Finish

If the surface texture is to be belt finish, when straightedging is completed and after sheen has practically disappeared and just before the concrete becomes non-plastic,

the surface shall be belted with a 2-ply canvas belt not less than 8 inches wide and at least 3 feet longer than the pavement width. Hand belts shall have suitable handles to permit controlled, uniform manipulation. The belt shall be operated with short strokes transverse to the centerline and with a rapid advance parallel to the centerline.

303.5.6.2. Hand Finishing

Hand finishing of concrete pavement will be permitted in areas where it is not practical or possible to construct with finishing machines. These areas include, but are not limited to, intersections, left turn lanes, crossovers, transition areas and where the pavement width is not uniform. In all hand finished areas, one-half (1/2) extra sack of cement per cubic yard of concrete shall be used in the mix. In hand finished areas, the concrete shall be struck off with an approved strike-off screed to such elevation that when consolidated and finished the surface of the pavement shall conform to the required section and grade. The strike template shall be moved forward with a combined transverse and longitudinal motion in the direction the work is progressing, maintaining a slight excess of material in front of the cutting edge. The concrete shall then be tamped with an approved tamping template to compact the concrete thoroughly and eliminate surface voids and the surface screeded to required section. After completion of a strike-off, consolidation and transverse screeding, a hand-operated longitudinal float shall be operated to test and level the surface to the required grade.

Workmen shall operate the float from approved bridges riding on the forms and spanning the pavement. The longitudinal float shall be held in contact with the surface and parallel to the centerline and operated with short longitudinal strokes while being passed from one side of the pavement to the other. If contact with the pavement is not made at all points, additional concrete shall be placed, if required, and screeded, and the float shall be used to produce a satisfactory surface. Care shall be exercised to keep the ends of the float from digging into the surface of the pavement. After a section has been smoothed so that the float maintains contact with the surface at all points in being passed from one side to the other, the bridges may be moved forward half the length of the float and the operation repeated. Other operations and surfaces tests shall be as required for machine finishing.

303.5.6.3. Edging at Forms and Joints

After the final finish, but before the concrete has taken its initial set, the edges of the pavement along each side of each slab, and on each side of transverse expansion joints, formed joints, transverse construction joints, and emergency construction joints shall be worked with an approved tool and rounded to the radius required by the plans. A well-defined and continuous radius shall be produced and a smooth,

dense mortar finish obtained. The surface of the slab shall not be unduly disturbed by tilting of the tool during use.

At all joints, any tool marks appearing on the slap adjacent to the joints shall be eliminated by brooming the surface. In doing this, the rounding of the edge shall not be disturbed. All concrete on top of the joint filler shall be completely removed.

All joints shall be tested with a straightedge before the concrete has set, and correction shall be made if one side of the joint is higher than the other or if they are higher or lower than the adjacent slabs.

303.8 Pavement Testing and Elevation

303.8.2. Pavement Thickness Test

Delete in its entirety and substitute therefore the following:

Upon completion of the work and before final acceptance and final payment shall be made, pavement thickness tests shall be made by the Contractor. Tests shall be made at 400-foot spacings along the length of the pavement. In the event a deficiency in the thickness of pavement is revealed, two (2) subsequent sets necessary to isolate the deficiency shall be made - one at a jointed section prior to the deficient station and one at a jointed section following the deficient station. Additional tests shall be obtained as necessary, at jointed section intervals to isolate the deficient area. Removal and replacement of concrete shall extend to joint boundaries, the full width of pavement section. If the average thickness of pavement in a particular section is less than called for on the plans, the pavement section shall be removed and replaced with the correct thickness, extending to joint boundaries, the full width of the pavement section, at the Contractor's entire expense. No additional payment over the contract unit price shall be made for any pavement of a thickness exceeding that required on the plans.

303.8.3. Pavement Strength Test

303.8.3.1 For Standard Classes of Concrete

Revise the first paragraph to read:

During the progress of the work, the Inspector or a commercial laboratory shall cast test cylinders or beams to maintain a check on the strengths of the concrete being placed. Add the following sentence and table: A table titled "PAVEMENT STRENGTH REQUIREMENTS", is provided showing the required pavement thickness, 7-day strength, 28-day strength, minimum cement factor and maximum slump for each street type to be constructed in Rockwall.

Add to the 5th paragraph:

Test cores shall be obtained within ten (10) working days after the 28-day test results have been provided by the commercial laboratory. All test cores shall be obtained by a commercial laboratory, at the Contractors expense. One (1) core shall be obtained in the immediate area of the deficiency and two (2) additional cores shall be obtained - one at a jointed section prior to the deficient station and one

at a jointed section following the deficient station. Additional cores shall be obtained as necessary, at jointed section intervals to isolate the deficient area. Removal and replacement of concrete shall extend to joint boundaries, the full width of pavement section.

Amend the second sentence of the 7th paragraph to read:

"Pavement not meeting the minimum specified 28-day strength after cores have been tested shall be removed and replaced at the Contractor's expense."

Delete the table 303.8.3.1.(a) and the paragraph below it.

Add the following table:

Pavement Strength Requirements

Street Type	Minimum Thick-ness (inches)	Compr. 7-Day (psi)	Strength 28-Day (psi)	Minimum Cement (sacks / CY)		Slump (inches)
				Machine placed	Hand Placed	
* Arterial	10”	2,500	3,600	6.0	6.5	3” to 5”
* Collector	8”	2,500	3,600	6.0	6.5	3” to 5”
Residential	6”	2,500	3,600	6.0	6.5	3” to 5”
Alley	7”-5”-7”	2,500	3,600	6.0	6.5	3” to 5”
Fire Lane	6”	2,500	3,600	6.0	6.5	3” to 5”
Driveways	6”	2,500	3,600	6.0	6.5	3” to 5”
Barrier Free Ramps	5”	2,500	3,600	N/A	6.5	3” to 5”
Sidewalks	4”	2,100	3,000	N/A	5.5	3” to 5”
Parking Lot/ Drive Aisles	5”	2,100	3,000	5.0	5.5	3” to 5”
Dumpster Pads	7”	2,500	3,600	6.0	6.5	3” to 5”

* Paving section designs for arterials and collectors shall be based off 30 year projected traffic volumes and geotechnical analysis/report. (Paving section design shall include but not limited to the following: pavement thickness, reinforcing size and spacing, pavement strength, subgrade thickness, subgrade treatment type (lime or cement))

ITEM 304 PAVING UNITS

304.1. Solid Concrete Interlocking Paving Units

304.1.2. Materials

304.1.2.2. Base

Delete in its entirety and replace with the following:

The base shall be constructed of 3,600 psi reinforced concrete meeting the requirements of Item 303 of the Standard Specifications.

#4 reinforcing bars shall be placed 18 inches on center, both ways, in all concrete.

304.1.3. Construction Methods

304.1.3.3. Construction Procedures

304.1.3.3.3 Paving Units and Joints

Delete paragraph two in its entirety and replace with the following:

Joints between paving units shall have a spacing of (1/8”).

304.1.4. Measurement and Payment

Delete in its entirety and replace with the following:

Interlocking Concrete Paving Stone shall be measured and paid for by the square foot of stone, sand and concrete base furnished and installed, which price shall include all labor, including excavation, materials, equipment, tools and incidentals necessary to complete the work. No separate payment shall be made for 6" concrete base or washed sand. Payment for removal and disposal of existing concrete median pavement, if required, shall be made by the square foot. Payment shall include all labor, equipment, materials, tools, and incidentals necessary to complete the work.

ITEM 305. MISCELLANEOUS ROADWAY CONSTRUCTION

305.1. Concrete Curb and Gutter

305.1.3. Construction Methods

305.1.3.2. Reinforcing Steel

The third sentence, first paragraph shall be revised to read:

All bars at splices shall be lapped a minimum of 30 diameters of the bar or 12-inches, whichever is greater.

305.2 Concrete Sidewalks, Driveway Approaches, and Barrier Free Ramps

305.2.2. Materials

305.2.2.2. Reinforcement

Revise the first sentence to read:

Driveway approaches and walk reinforcing shall be No. 3 bars on 24-inch centers.

305.2.3. Construction Methods

305.2.3.1. General

Add to end of first paragraph:

The drive approach shall have a minimum thickness equal to the thickness of the adjacent street or 6 inches, whichever is greater.

305.2.3.7. Joints

Revise second sentence to read:

Expansion joints shall be placed in the sidewalk at 20-foot intervals or as otherwise specified by the Owner.

305.3. Concrete Medians

Delete in entirety.

ITEM 501.UNDERGROUND CONDUIT MATERIALS

501.4 Concrete Pressure Pipe and Fittings

Add the following:

C302 Reinforced Concrete Pressure Pipe, Non Cylinder Type, for Water and Other Liquids, and C300 Reinforced Concrete Pressure Pipe, Steel Cylinder Type, for

Water and Other Liquids are not approved for use in the City, unless otherwise shown in the plans or approved in writing. Reinforced concrete cylinder pipe in sizes 16 inches through 21 inches shall be Bar-Wrapped Concrete Cylinder Pipe AWWA Type C303. For pipe 42 inches in diameter and above the pipe shall be Prestressed Concrete Pressure Pipe, Steel Cylinder Type, AWWA Type C301. Between 24 inches and 36 inches the pipe furnished may be either type. All pipe shall be designed to withstand the working pressure and external load as shown in the plans.

501.5 Reinforced Concrete Wastewater Pipe With Rubber Gasket Joints

501.5.1. General

Add the following:

All reinforced concrete pipe used in the sanitary sewer system shall conform to ASTM Designation C76 and shall be of the Thick Wall Pipe design with aggregates consisting of limestone aggregate in the proportion of at least 75 percent by weight of the total aggregates, unless otherwise provided in the Special Conditions to the Specifications.

501.7 Ductile-Iron Pressure Pipe and Fittings

501.7.1. General

Add the following:

Minimum design thickness for all Ductile-Iron Pipe installed shall be Class 51 on sizes 12 inches and smaller, and Class 52 on sizes 14 inches and larger.

501.9 Steel Pipe and Fittings

501.9.3. Pipe and Fitting Requirements

Substitute the second to last sentence with the following:

All steel pipe to be furnished for this project shall be designed in accordance with AWWA M11 for the most critical application of internal pressures and external loads. The following design conditions shall apply:

Internal Pressure (Design to account for working and surge together)

1) Working Pressure of 200 psi
2) Surge allowance of 250 psi

External Loading for Buried Pipe

1) External loads shall be comprised of the weight of the backfill together with live and impact loads. Earth loads shall be calculated based on ditch and positive projecting conduit. The earth load for the pipe design shall be the greater of the above two conditions.
2) External live loads shall be at least equivalent to AASHTO HS-20 loading.
3) Modulus of soil reaction (E') < 1000 psi
4) Unit weight of fill (w) > 120 pcf
5) Deflection lag factor (D1) (1.0)
6) Bedding constant (K) = 0.100
7) hw = h = depth of cover above top of pipe

8) Maximum deflection in percent of pipe diameter shall be as determined by AWWA M11, latest edition, as calculated using moment of inertia of steel cross section of pipe wall. Moment of inertia of cement mortar shall not be included in calculation of maximum deflection.

Available Deflections

Mortar-lined and coated = 2 percent of pipe diameter

Maximum Working Stress

The maximum combined stress based on working pressure shall be no greater than 50 percent of the minimum yield strength or 18,000 psi, whichever is less.

The maximum combined stress based on test pressure shall be no greater than 75 percent of the minimum yield strength or 24,000 psi, whichever is less.

501.9.4. Joints

Add the following:

In general, pipe joints shall be as follows, as indicated on the Drawings or as specified.

1) Flanged joints shall be provided as a minimum at all flanged valves, meters and other equipment.
   a. Flanges: Unless otherwise noted, flanges shall conform to the requirements of AWWA C207, Table D, E or F as required.
   b. Flange Bolts and Nuts: Shall be furnished in size and numbers stipulated in AWWA C207. Unless otherwise indicated, bolts shall be carbon steel to meet the requirements of ASTM Designation A307, Grade B for regular joints.
2) Restrained Lap-Welded slip joints (expanded bell) with a single fillet weld.
3) Carnegie-Shape Rubber Gasket Joint: Bell and spigot rubber gasket joint will be furnished with the bell end of the pipe mechanically expanded to the required internal diameter and the spigot end furnished as a sized Carnegie shape welded to the opposite end of the pipe. The expanded bell and Carnegie spigot shall be designed such that when the pipe is laid and jointed, it will be self centered, and the O-ring rubber gasket will be enclosed tightly on all four sides and confined under compression adequate to ensure watertightness. Gaskets to be full-face for use with flat face flanges and ring type for use with raised face flanges. Gasket material for water service pipe shall be cloth inserted rubber sheet, 1/8-inch thick or red rubber, ASTM D1330, Grade 1. Gasket material for air piping shall be as above, but of EPDM.
4) Mechanical Couplings: Mechanical couplings designed to provide a stress relieving flexible joint shall consist of a cylindrical sleeve, two gaskets, two follower rings and a set of bolts and nuts.
   a. Sleeves: Manufactured of ASTM A53 steel for sizes 10-inches and smaller. ASTM A36 steel for sizes 12-inches and larger. Minimum sleeve length shall be five inches for pipe 12-inches and smaller,

7-inches for pipe 14-inches through 24-inches, and 10-inches for pipe larger than 24-inches.

b. Follower Rings: Ductile Iron ASTM A536 or AISI C1020 Steel.
c. Bolts and Nuts: High strength low alloy steel with heavy semi-finished hexagon nuts.
d. Gaskets: Shall be of synthetic rubber suitable for operating conditions.
e. Shop Finish: Manufacturer's standard unless otherwise noted.
f. Manufacturer: Baker 200, Dresser Style 39, Rockwell Series 411 or approved equal.

501.14 Polyvinyl Chlorine (PVC) Water Pipe

Add the following:

All PVC water pipelines shall be AWWA C900-16 PVC Pipe (blue in color), DR 14 (PC 305) for pipeline sizes 12-inch and smaller, and DR 18 (PC 235) for 14-inch and larger water pipelines. All PVC water pipe shall be extruded PVC pipe of the rubber gasket type joint and shall be furnished in 20-foot nominal laying lengths.

All fittings shall be ductile-iron of bell and spigot or mechanical joint, Class 250, in accordance with AWWA Specification C 110, C 111 or C 153 (Compact), and shall be tar coated on the outside surface and shall have an interior cement lining with seal coat per AWWA Specification C104, unless otherwise shown in the plans.

502 APPURTENANCES

502.1 Manholes

502.1.1. Manhole Materials

502.1.1.1. Precast Reinforced Manhole Sections

502.1.1.1.1. Joints

Add the following:

All sanitary sewer manholes installed in the City of Rockwall, shall have "O" ring joints conforming with ASTM Designation C443

502.1.4. Manhole Construction

502.1.4.1. Manhole Types and Requirements

502.1.4.1.1. Cast-In-Place Concrete Manholes

Add the following:

502.1.4.1.1.1. Forms

Manholes shall be constructed in place in accordance with the details shown in the plans and using forms as market by Improved Construction Methods, Inc., Jacksonville, Arkansas or Symons Corp., DePlaines, Illinois, or an approved equal.

502.1.4.1.1.2. Base

The base shall be cast monolithically with the rest of the manhole. The invert and flow channel shall be formed during or immediately after the placing of the

concrete and trowel-finished as soon as the concrete has set sufficiently. The concrete must set for 24 hours before any pipe inside the manhole is trimmed. Concrete shall be minimum 4200 psi.

The base concrete shall be 4200 psi, maximum slump 4 inches vibrated or tamped on undisturbed bearing. The base shall have a minimum diameter or width of at least 1'-0" greater than the outside diameter of the manhole, and a minimum thickness including the area under the pipe as follows:

0' to 12' manhole…….	12"
12’ to 20' manhole……..	15"
20' and above…….	18"

502.1.4.1.1.3. Invert

All invert channels shall be smooth and accurately shaped to a semi-circular bottom conforming to the inside of the adjacent sewer section. Inverts shall be formed directly in the concrete of the manhole base or may be constructed by laying full section sewer pipe through the manhole and breaking out the top half after the base is constructed. Inverts shall extend up at least half of the diameter of the pipe. Changes in the direction of the sewer and entering branches shall have a true curve of as large a radius as the size of the manhole will permit. Where the pipe is laid through the manhole, the invert shall be finished to 1/4-inch below the center of the pipe. The pipe shall be trimmed down to 1/4-inch below the surface of the invert, and the edges of the pipe along the invert and at the walls of the manhole shall be plastered and brush-finished. Plaster shall be 2-parts of masonry sand to 1-part of Portland cement, or an approved non-shrink grout.

502.1.4.1.1.4. Manhole Barrel Section

The vertical forms, wall spaces, and placing cone must be carefully positioned and firmly clamped in place before any placement is made. The wall spacers must be located 90 degrees from each other. The manhole shall be cast of 4200 psi concrete with a maximum slump of 4 inches. The first placement shall consist of approximately 1/2 yard of concrete evenly around the walls and vibrated until there is a minimum slump of 60 degrees from the bottom of the forms to the bearing surface both inside and outside of the manhole. When this is complete and before additional concrete is added, the concrete must be carefully vibrated on each side of each pipe. Additional concrete must be deposited in evenly distributed layers of

about 18 inches with each layer vibrated to bond it to the preceding layer. The wall spacers must be raised as the placements are made with the area from which the spacer is withdrawn being carefully vibrated. Excessive vibration is to be avoided. A maximum of 2% calcium chloride may be added to the concrete, at the Contractor's option, to speed the set. The forms may be removed as soon as the concrete has sufficiently set (approximately 2 hours after placement depending on field conditions).

Form marks and offsets up to 1-inch will be permitted on the outside surface of the manhole. Form marks and offsets up to 1/2-inch will be permitted inside the manhole. All offsets on the inside surface of the manhole will be smoothed and plastered so there is no projection or irregularity capable of scratching a worker or catching and holding water or solid materials. Honeycomb will be plastered with a mortar consisting of 3 parts of masonry sand and 1-part Portland cement upon removal of the forms. Manholes deemed to be structurally unsound shall be replaced.

502.1.4.1.1.5. Backfilling

Will be performed evenly and carefully around the manhole 24 hours or more after the placement of concrete is completed and shall conform to these specifications.

502.1.4.1.1.6. Cold Joints:

Should circumstances make a cold joint necessary, a formed groove or reinforcing dowels will be required in the top of the first placement for shear protection. Immediately before the second placement is made, the surface of the cold joint shall be thoroughly cleaned and wetted with a 1-1/2 inch layer of mortar (2 parts sand and 1-part cement) being deposited on the surface. Cold joints below the natural water table or in the bottom 4 feet of the manhole shall include an approved waterstop material. Waterstops shall be heavy duty polyvinyl conforming to Corps of Engineers Specification CRD-572, latest edition, as manufactured by Servicised Products Division of W.R. Grace and Co.; B.F. Goodrich Company; Electrovert, Inc.; W.R. Meadows, Inc.; or approved equal.

502.3 Fire Hydrants

302.3.1. Materials

Delete all parts of Item 502.3.1 in its entirety except sub items 502.3.1.3, 502.3.1.4., 502.3.1.10, and 502.3.1.14.

Add the following:

All fire hydrants furnished shall conform strictly with the latest specification C-502 of the American Water Works Association Standards for dry barrel fire hydrants and must comply with the following supplementary details and changes or addition.

a) Inlet Connection:

Unless otherwise specified the inlet connection shall be a six (6) inch standard mechanical joint complete with all joint accessories. The inlet shoe shall be cast of the same or stronger metal than the lower barrel to prevent impact damage of the shoe. The interior of the shoe, including the lower valve plate and/or cap nut shall have a protective epoxy coating of at least 4 mils applied in the shop. If a cap nut is utilized it must be locked in place with a stainless steel lock washer or similar non-corrosive device and all machined surfaces must be protected from water intrusion to prevent corrosion and assure ease of field teardown or maintenance.

b) Main Valve:

The main valve shall be reversible compression type, closing with the pressure and shall be not less than 5-1/4" in diameter. Composition of the main valve shall be molded rubber or neoprene having a durometer hardness of 90 ± 5 and shall be not less than 1" thick to protect against hydrant chatter and give long term durability.

c) Outlet Nozzles:

All hydrants shall be "three way", equipped with two hose nozzles and one pumper nozzle.

d) Diameter Outlet Nozzles:

The hydrant shall have two hose nozzles, two and one-half (2-1/2") inches nominal I.D., and one pumper nozzle four and one-half (4-1/2") inches nominal I.D. with Natural Standard Hose Threads.

e) Nozzle Attachment:

All nozzles shall be mechanically connected into the barrel and have "O" Ring pressure seals to provide a positive seal between nozzles and hydrant barrel. A suitable nozzle lock shall be provided and shall be stainless steel or bronze. Nozzles shall not be caulked in.

Nozzle caps shall be furnished with pentagon nut the same size as the operating nut. They shall be furnished with interior rubber gaskets that will seat against bronze nozzles. All caps shall be secured to hydrant barrel by heavy duty non-kinking chains with a chain loop on each cap that permits free turning of the cap, for speed and ease of removal by fire fighters.

f) Operating Nut:

The operating nut shall be non-rising, pentagonal shape, measuring 1-1/4" at the top and 1-1/2" at the base from point to flat. Pentagon shall have a depth of at least one and one-quarter inch (1-1/4"). The hydrant shall be constructed in such a manner that the operating nut, "O" Rings and washers can be removed and replaced

without removing the bonnet. All bearing surfaces of the operating nut shall be bronze.

g) Holddown Nut:

Holddown nut must have integral weather seal. Resilient seal between holddown nut and operating nut shall prevent debris entry to protect operating nut from damage.

h) Lubrication Reservoir:

The hydrant shall have a completely "O" Ring sealed oil reservoir with a minimum of two (2) "O" Ring pressure seals to prevent contamination of the oil around the operating parts of the hydrant. The oil reservoir shall be cast in such a manner that all operating parts shall be repairable without removal of the bonnet to facilitate repairs and shall be of a design that all bearing surfaces and threaded parts will be automatically lubricated upon each operation of the hydrant. If bearing surfaces are not lubricated, the design shall keep operating friction to a minimum. A high wear resistant thermoset plastic anti-friction washer shall be in place above the thrust collar to minimize operation torque and facilitate long term ease of operation. The operating threads must be sealed against contact with water to all times regardless of open or closed position of main valve. The hydrant shall have the capability of field personnel to visually check oil level and add additional oil if needed. Filler and inspection plug shall be recessed or flush type.

i) Traffic Feature:

Hydrants shall be "traffic model" having upper and lower barrel joined approximately two inches (2") above the ground line by a breakable "swivel" flange providing 360 degree rotation of the upper barrel for nozzle positioning and must be capable of rotating barrel with line pressure on. The ground line shall not be less than eighteen inches (18") below the centerline of the lowest nozzle and shall be clearly marked in a permanent manner on the lower barrel. A breakable stainless steel stem coupling shall join the two-piece stem adjacent to the ground line flange. Screws, clevis pins, fasteners or bolts used in the coupling shall be Series 300 stainless steel. The weakened portion of the stem coupling shall be located to divert pressure from the stem coupling directly to the upper and lower stems when torque is applied in seat ring removal.

Design of the coupling shall be such that when the coupling is broken, no part of the coupling will shatter or come loose and fall into hydrant and the break will not occur through the pins or bolts holding the coupling to the stem.

j) Drain Valve Assembly:

Hydrants shall be equipped with two drain valves which drain the barrel when the hydrant is closed and seal shut when the hydrant is in the open position. The upper valve plate, seat ring and drain ring (shoe bushing) must be bronze and work in conjunction to form an all bronze drainway. Upper valve plate if not bronze, must be epoxy coated.

The bronze seat ring shall be a minimum 5-1/4" inside diameter and shall thread into a bronze drain ring forming an all bronze drainway with two (2) drain outlets for double protection against drain clogging and corrosive damage. All bronze components shall have less than 16% zinc alloy, Grade A to give high corrosion resistance as recommended in Section 2.1, Table I of American Water Works Association Standard C-502. Seat ring seals shall be "O" Rings. Hydrant shall be designed so that during opening and closing operation(s), water pressure force flushes the drain valve and drain openings to prevent clogging, thus allowing barrel drainage.

k) Repair:

All internal operating parts shall be removable from above ground level with a lightweight stem wrench.

l) Provisions for Extension:

All hydrants shall be capable of being extended to accommodate future grade changes without excavation. Extension of the hydrant shall be made by adding at the groundline flange a new coupling and stem section equal to the length of the extension. This must facilitate easy field grade adjustment.

Stem extensions made by adding new section of stem to the threaded section of the stem at the top of the hydrant will not be accepted.

Extension kits must be available from manufacturer in six-inch (6") increments.

m) Pressure Loss and Working Pressure

Pressure loss through one (1) four and one-half inch (4-1/2") nozzle at 1000 GPM shall not be more than 5.0 psi.

n) Nuts and Bolts

Body Bolts, studs and nuts shall be 316 stainless steel.

Add the following:

502.3.4. Paint and Protective Coatings

All fire hydrants furnished under these specifications shall have paint and protective coatings applied at the factory or in the field as specified herein.

a) Factory Coating:

All hydrants shall be cleaned at the factory by shot blasting and shall be painted above the groundline (at the factory) with two (2) coats of neutral orange rust-prohibitive primer which shall be compatible with the finished coating.

All continuously wetted ferrous metal surfaces in the hydrant shoe shall be protected with a two-part thermoset epoxy coating to a nominal thickness of 4 mils of corrosion protection and shall be of a color that is easily identified as an epoxy coating. All other exposed exterior surfaces below ground level shall be coated with asphalt varnish as specified in American Water Works Association Standard C-502, Section 4.2 or as otherwise outlined in these specifications. All

remaining interior surfaces above the main valve, except machined surfaces such as the threaded portion of the operating stem or nut, shall be coated with asphalt varnish.

The thermoset epoxy coating shall be a two-part epoxy and shall function as a physical, chemical and electrical barrier between the base metal to which it is applied and the surroundings. The coating shall be non-toxic and shall not impart taste to water. The coating must be formulated from materials deemed acceptable per the Food & Drug Administration Document Title 21 of the Federal Regulations of Food Additives, Section 121.2514 entitled Resins & Polymeric Coatings. The coating shall have a satin finish and shall be suitable for field overcoating and touch-up with the same coating material without sanding or special surface preparation, or application of heat in excess of room temperatures.

b) Field Coatings:

All hydrants shall be field painted at the time the Contractor is instructed by the Public Works Inspector and shall be painted above ground with two (2) coats of aluminum paint, Mobil 11-A-19 or Tnemec 2-color, Tnemec-Gloss or approved equal according to the following color schedule:

Water Main Size	Bonnet and Caps Color
6”	Silver
8”	Blue
10” & Larger	Yellow

Add the following:

502.3.5. Experience and Certification

Fire hydrants, furnished under these specifications, shall be manufactured by a firm that has been producing hydrants of this general type continuously for the past five (5) years. Each company or manufacturer supplying hydrants under these specifications shall have on file, at the City of Rockwall, approved records of experience and detailed drawings of the proposed hydrants. Drawings shall cover the specific hydrant to be furnished for installation in the City and shall show all dimensions including metal thickness, construction details and materials used in all parts of the hydrant together with ASTM Designation and structural properties of these materials.

For ease of identification, all hydrants shall have "City of Rockwall, Texas" stenciled on the lower barrel. This stencil shall be applied at the factory. The manufacturer shall furnish to the City of Rockwall, a Certification that the fire hydrant complies with the specifications without any exceptions. This certification shall apply to specific hydrants being installed within the City water distribution system. The certification shall state (1) the number of hydrants covered by the certification, (2) the Addition where hydrants are being installed or the Project Name and (3) name of Contractor installing hydrants.

The City may require the Manufacturer, Supplier or Contractor to dismantle hydrants at any time to determine compliance with these specifications. Location of any hydrant within the City system, installed after adoption of these specifications, that does not meet the specifications completely shall be cause for prohibiting the future use of any hydrants from the same manufacturer.

502.5 Fittings

502.5.1. Brass Stops, Cocks and Fittings for Water Works Service

Add the following:

502.5.1.2. Physicals

All pressure holding components of brass stops or fittings shall be certifiably pressure tested before assembly as specified herein, including meter coupling tailpieces, flared nuts, compression nuts, etc.

502.5.1.3. Design Features of Stop and Cocks

The stem end of the key, prestaked key nut and the "D" washer shall be so designed that they turn in unison and if tightened to the failure point, the stem will not break causing the key to blow out.

Corporation, curb and angle stop bodies shall be of one-piece construction to provide optimum resistance to installation, operating and earth-load stresses. The operating head and checks of these stops shall be integrally cast with the plug or cap of the stop for maximum resistance to torque feature.

Angle valves shall have a lockwing and shall be "O" ring sealed at the top of the key to prevent leakage during operation and to act as a secondary protection against external top leakage. Meter swivel nuts shall be of the saddle nut construction to support the meter during installation. Inlet flare and compression parts for angle valves shall be field interchangeable on 3/4-inch and 1-inch sizes to make repairs easier and more economical.

502.5.1.4. Design Features of Fittings

Add the following to the third paragraph of this item:

Flare joints shall have curved metal to metal seating surfaces and flare nuts shall meet the following overall minimum length to insure that the flare nut will give adequate pipe support to this type of joint.

Flare Nut - Minimum	Overall Length
¾”……	1-1/2"
1"……..	2"
1-1/2"……..	3"
2"……..	3-1/2"

Add the following to the sixth paragraph of this item:

All stops and fitting joints shall be of the compression type for copper pipe unless otherwise noted. Compression coupling nuts shall be designed to "bottom out" on a machined shoulder on the fitting to

provide a visual check for proper assembly and eliminate field judgment errors of the installation. The coupling nut shall house the compression gasket in a smooth machined area and shall be internally coated with a fluorocarbon (Teflon) lubricant to prevent gasket damage and reduce installation torques. The compression gasket shall be a heavy armored gasket to provide electrical continuity through the fitting and prevent gasket cold flow and shall house a concave hardened stainless steel overlapping gripper band that is automatically activated and set by shouldering out the fitting properly.

Minimum pullout (or tensile strength) required of these fittings after installation to protect against earthloads are as follows:

3/4 "	2,000 lbs.
1"	3,000 lbs.
1-1/2"	3,500 lbs.
2"	4,000 lbs.

All outlet threads on compression connections shall be compatible with the City's present drilling and tapping machine equipment.

502.6 Valves

502.6.1. Metal-Seated Gate Valves for Ordinary Water Works Service

502.6.1.2. Bonnet Bolting

Delete in its entirety and replace with the following:

Body Bolts, studs and nuts shall be 316 stainless steel.

502.6.2. Resilient-Seated Gate Valves for Ordinary Water Works Service

502.6.2.1. General Description

Add the following:

Unless otherwise approved in writing, all Gate Valves for direct buried service in the City's distribution system, 6 inches through 12 inches in diameter, shall be Resilient Seated Gate Valves that conform strictly with the latest specification C-509 of the American Water Works Association Standards and must comply with the following supplementary details, changes or additions. Gate valves shall be iron body designed for a working pressure of 250 psi. All valves shall be hydrostatically tested at 200 psi and shell tested at 500 psi. Any leakage during testing shall be cause for rejection. For ease of repair the body, bonnet and stuffing box shall be flanged together with ASTM Grade B bolts and nuts. Each valve shall have the maker's initials, pressure rating, and year in which manufactured cast in the body.

502.6.2.2. Bonnet Bolting

Delete in its entirety and replace with the following:

Body Bolts, studs and nuts shall be 316 stainless steel.

502.6.2.5. Valve Stem and Nuts

Add the following:

Stems shall be machined from manganese bronze rod with an integral forged thrust collar machined to size. The stems shall be non-rising and equipped for nut operation, which shall be opened by turning to the left. The seals shall consist of two "O" rings above and one "O" ring below the thrust collar. An anti-friction washer shall be located above and below the thrust collar for operating torque. The stem nut shall be ASTM B-62 bronze.

502.6.2.17. Resilient Wedge

Add the following:

The wedge shall be cast iron, fully encapsulated in molded rubber complying with ASTM D2000. Wedge must have molded wedge guides preventing the disc from tilting downstream during operation. Protective guide cap bearings made of polymer bearing material to provide a bearing interface between the wedge guide and valve interior.

502.6.2.18. Paint and Protective Coatings:

Add the following:

All valves furnished under these specifications shall be painted on the exterior as specified in AWWA C-509 with asphalt varnish.

All ferrous metal surfaces in the internal part of the valve shall be protected with a fusion epoxy coating to a nominal thickness of 10 mils for corrosion protection and shall be of a color that is easily identified as an epoxy coating.

The proguard fusion epoxy coating shall fully comply with AWWA C550 and certified NSF 61. The coating shall be non-toxic and shall not impart taste to water. The coating must be formulated from materials deemed acceptable per the Food & Drug Administration Document Title 21 of the Federal Regulations of Food Additives, Section 121.2514 entitled Resins and Polymeric Coatings. The coating shall have a satin finish and shall be suitable for field overcoating and touchup with the same coating material without sanding or special surface preparation, or application of heat in excess of room temperature.

502.6.2.19. Experience and Certification

Add the following:

Valves, furnished under these specifications, shall be manufactured by a firm that has been producing valves of this general type continuously for the past five (5) years. Each company or manufacturer supplying valves under these specifications shall have on file, with the City of Rockwall, approved records of experience and detailed drawings of the proposed valves. Drawings shall cover the specific valve to be furnished for installation and shall show all dimensions including metal thickness, construction details and materials used in all parts of the valve together with ASTM Designation and Structural properties of these materials.

The manufacturer shall furnish to the City of Rockwall, a Certification that the valve complies with the specifications without any

exceptions. This certification shall apply to specific valves being installed within the City water distribution system. The certification shall state (1) the number of valves covered by the certifications, (2) the Addition where valves are being installed or the Project Name, and (3) name of Contractor installing valves.

The City may require the Manufacturer, Supplier or Contractor to dismantle valves at any time to determine compliance with these specifications. Location of any valve within the City system, installed after adoption of these specifications, that does not meet the specifications completely shall be cause for prohibiting the future use of any valves from the same manufacturer.

502.6.2.20. Tapping Sleeves:

Add the following:

The materials for tapping sleeve bodies shall be cast-iron or ductile-iron in accordance with AWWA Standard C110 (ANSI 21.10), in two sections, or halves to be bolted together with high-strength, corrosion resistant, low alloy steel bolts conforming to AWWA Standard C111 (ANSI 21.11).

Cast iron and ductile-iron sleeve shall be mechanical joint, or as specified, or dimensions to secure proper fit on the type and class of pipe on which they are to be used. Each sleeve shall be furnished with a 3/8-inch test opening so that tests can be made prior to tapping. Opening shall be provided with a 3/8-inch bronze plug.

502.6.5. Butterfly Valves

Add the following:

All Butterfly Valves for installation underground in the City's distribution system 16 inches through 48 inches shall be in accordance with this specification.

All butterfly valves furnished shall conform strictly with the latest specification C-504 of the American Water Works Association Standard for rubber-seated butterfly valves and must comply with the following supplementary details and changes or addition.

a) Body:

The body shall be cast-iron ASTM A126, Class B and shall have face to face dimensions in accordance with AWWA Standards for short body, Class 150-B. All butterfly valves shall have a floating body seat ring to compensate for change in direction of flow to assure bottle-tight seal in either direction.

b) Shaft:

Valve shafts shall be an 18-8, Type 316 stainless steel. Valve disc and shaft shall be standard self adjusting Chevron “V” type packing. Shaft seals shall be of a design allowing replacement without removing the valve shaft.

c) Disc and Seat:

The valve disc shall be cast iron ASTM A126, Class B. The valve seat shall be Buna-N located on the valve body. Valves 20” and smaller

shall have a bonded seat that meets test procedures in ASTM D429, Method B. Valves 24" and larger shall be retained in the valve body by mechanical means without the use of metal retainers or other devices located in the flow stream.

d) Operator:

Butterfly valve operators shall be of the traveling nut design. All operators shall have adjustable mechanical stop limiting devices to prevent over travel of the disc. The operator shall have a mechanical stop which will withstand an input torque of 450 Ft. lbs. against the stop. The traveling nut shall engage alignment grooves in the housing.

e) Operation:

Unless otherwise shown in the plans, all valves shall open counter clockwise.

f) Valve Ends:

Valve ends shall be Mechanical Joint End, or Flanged Ends. Mechanical joint valves shall come complete with bolts, nuts, gaskets and glands. It shall be the responsibility of the Contractor to coordinate the ends of the adjoining pipe with the type valve end he/she proposes to use.

g) Testing:

All valves seats shall be tested at 150 psi as described in AWWA C-504 and in addition shall have a shell test of 300 psi. Any leakage shall be cause for rejection.

h) Paint and Protective Coatings:

All butterfly valves furnished under these specifications shall be painted on exterior as specified in AWWA C-504, with asphalt varnish.

All ferrous metal surfaces in the internal part of the valve shall be protected with a two-part thermoset epoxy coating to a nominal thickness of 4 mils for corrosion protection and shall be of a color that is easily identified as an epoxy coating. This shall be applied in shop.

The thermoset epoxy coating shall be a two-part epoxy and shall function as a physical, chemical and electrical barrier between the base metal to which it is applied and the surroundings. The coating shall be non-toxic and shall not impart taste to water. The coating must be formulated from materials deemed acceptable per the Food & Drug Administration Document Title 21 of the Federal Regulations of Food Additives, Section 121.2514 entitled Resins & Polymeric Coatings. The coating shall have a satin finish and shall be suitable for field overcoating and touchup with the same coating material without sanding or special surface preparation, or application of heat in excess of room temperatures.

i) Experience and Certification:

Butterfly valves, furnished under these specifications, shall be manufactured by a firm that has been producing valves of this general type continuously for the past five (5) years. Each company or manufacturer supplying valves under these specifications shall have on

file, at the City of Rockwall, approved records of experience and detailed drawings of the proposed valves. Drawings shall cover the specific valve to be furnished for installation in the City of Rockwall and shall show all dimensions including metal thickness, construction details and materials used in all parts of the valve together with ASTM Designation and structural properties of these materials.

The manufacturer shall furnish to the City, a Certification that the valve complies with the specifications without any exceptions. This certification shall apply to specific valve being installed with the City water distribution system. The certification shall state (1) the number of valves covered by the certification, (2) the Addition where valves are being installed or the Project Name and (3) name of Contractor installing valves.

The City may require the Manufacturer, Supplier or Contractor to dismantle valves at any time to determine compliance with these specifications. Location of any valve with the City system, installed after adoption of these specifications, that does not meet the specifications completely shall be cause for prohibiting the future use of any valves from the same manufacturer.

ITEM 504. OPEN CUT – BACKFILL

504.2 Materials

504.2.2. Pipe Bedding Material for Storm, Water and Sanitary Sewer Mains

Add the following:

Unless otherwise indicated, storm sewer pipe shall be bedded with Class "C" bedding in accordance with the details shown on the plans.

504.2.2.1. Crushed Stone Embedment

Add the following:

Where stone is called out for pipe embedment, Standard Crushed Rock-Aggregate, Grade 4, shall be used unless otherwise approved in writing.

504.3. Excavation and Foundation

Add the Following:

504.3.1 Excavation

Add the following:

Prior to start of excavation the Contractor shall remove and stockpile the Topsoil and protect the Topsoil from contamination during construction.

504.5 Embedment

Add the following:

Rock Cuttings or Sand will not be permitted in the pipe bedding for sanitary sewer or water lines in the City of Rockwall.

504.5.2. Embedment Classes

504.5.2.9. Class "C" Embedment

Replace the last sentence in its entirety with the following sentence:

Density shall be at least 95% of maximum density under paving, 90% of maximum density elsewhere, as determined by ASTM D698.

504.5.2.15. Class "H" Embedment

Class "H" Embedment shall be used on the P.V.C. Sanitary Sewer Pipe installed within the City of Rockwall.

On PVC Pipe 18 inches through 27 inches in diameter the crushed stone shall be brought up in uniform layers to a point nine inches over the top of the pipe when compacted.

504.6. Final Backfill

Add the following:

After the trench has been refilled, topsoil shall be replaced to the extent that rock, excavated from the trench, will be completely covered and the area is returned to its original condition, except that in cultivated areas a minimum of 12 inches of top soil shall be replaced.

504.6.1. Excavated Material

Add the following:

The material used in the backfill shall be pulverized to the extent necessary to produce a free flowing material free of clay balls larger than 6-inch diameter.

506. OPEN CUT - WATER CONDUIT INSTALLATION

506.3. Laying Water Conduit

Add the following:

Valves for installation in the City's distribution system shall be installed by direct burial as shown on the standard detail sheets and shall be provided with valve boxes for operation of the valve.

506.5 Hydrostatic Test

Delete first paragraph and table and replace with:

All hydrostatic tests shall be maintained over a period of not less than four hours.

"Before being accepted, all ductile iron, C-900 PVC or concrete cylinder water mains shall be tested with a hydraulic test pressure of not less than four hours. Concrete pressure pipe shall be tested with a hydraulic test pressure of 120 percent of the design pressure. Steel pressure pipe shall be tested with a hydraulic test pressure not to exceed 150 percent and not less than 120 percent of the designed working pressure. The rate of leakage of all pipe tested shall not exceed the amounts shown in the tables titled "Hydrostatic Test-C-900 PVC, Steel or Ductile Iron Water Mains" or "Hydrostatic Test-Concrete Cylinder Water Mains". Water lines of material in combination shall be tested for the type of pipe (material) with the least stringent hydraulic test pressure and maintained over a period of not less than four hours."

Maximum allowable water loss in 4 hours at 180 pounds per square inch of pressure for a rate of 50 gallons per inch diameter of pipe per mile over a 24-hour period

EQUATION THE ABOVE CHART IS BASED ON:

$$Maximum\ Loss\ (Gal.) = 50\ \times Diameter\ of\ Pipe\ (inches) \times \frac{L.F.\ of\ Pipe}{5280\ Pipe} \times \frac{4}{24}$$

507 OPEN CUT – WASTEWATER CONDUIT INSTALLATION

507.5. Tests and Inspections

507.5.2. Television Inspection

Add the following to this section:

All sanitary sewer pipe construction in this contract shall be visually inspected by photographic means (television and video taped) prior to final acceptance by the Owner. No separate measurement or payment shall be provided for the video inspection. All labor, materials and equipment required are subsidiary to the appropriate bid items as established in the Proposal and Bid Schedule.

ITEM 508 OPEN CUT – STORM WATER CONDUIT INSTALLATION

Add the following:

508.8 Inspection

All storm sewers shall be visually inspected by photographic means (television and video taped) , at Contractor's expense, prior to final acceptance by the City. Any sags, open joints, cracked pipes, etc. shall be repaired or removed by the Contractor at Contractor's expense. Pipes will be cleaned prior to televising the pipe. The contractor shall furnish a DVD formatted video to the City.

ITEM 509 CROSSINGS

509.5. Creek and River Crossings

Add the following:

509.5.1. Aerial Crossings

509.5.1.1. General

Piers for aerial crossings will be drilled piers and columns of the diameter shown on the plans. Piers shall be founded at least 6'-0" into firm gray limestone and 8'-0" into undisturbed material, unless otherwise directed by the Owner.

Materials and workmanship required to construct piers and cap shall conform to Reinforced Concrete Structures, of the specifications. Concrete of piers shall be Class A, 3000 psi.

Anchor straps and bolts shall be installed as shown on the plans, and shall be hot dipped galvanized after fabrication.

After installing the aerial crossing, including the junction collars with the main sewer pipe, an approved coal tar mastic jointing compound shall be installed the full inside circumference of the pipe at each joint to produce a smooth surface with no sharp flow transitions.

509.5.1.2. Steel Pipe

Steel pipe used of Aerial Crossings shall be of the diameter and wall thickness shown on the plans and shall be line pipe manufactured in accordance with the following specifications:

1) AWWA C200-75 Mill Type Steel Water Pipe, Grade B
2) ASTM A139, Grade B

Pipe shall be designed for a clear span as shown on the plans. Couplings shall be Dresser Type 38, or approved equal and shall be located as shown on the plans. Bolts shall be stainless steel or galvanized.

The steel pipe sizes shown on the plans are the nominal diameters of the minimum size steel pipe which may be furnished and installed. Pipe of a larger size may be furnished at the Contractor's option, but no extra payment will be allowed. If larger pipe is utilized, it shall be set so as to retain the flow lines designated on the plans.

All steel pipe shall receive an interior shop-applied Liquid Epoxy Coating System in conformance with AWWA C-210, latest revision.

509.5.1.3. Exterior Painting

Exterior painting for aerial crossings shall conform to Item 804.2.

All surface prepared in the field shall be inspected by the City of Rockwall for adequate surface preparation as defined above prior to application of paint coating. All surfaces to be painted in the field shall have their readiness for painting approved by the City of Rockwall before work is started.

Paint shall be applied to all ferrous material part of the aerial crossing including but not limited to pipe, couplings, straps, nuts, bolts, etc.

509.5.1.3.1. Paints

Paints for aerial crossings shall be:

1) TNEMEC Series 66, or Mobile 78 Series, or Koppers 200 HB, 5.0 mil dry film thickness each coat.
2) TNEMEC Series 66, or Mobile 78 Series, or Koppers 200 HB, 6.0 mil dry film thickness each coat.

Approved material of other manufacturers which are equivalent in all respects to the brands named above, may be substituted upon approval. All paint applied must be by the same manufacturer. The color on the final coat shall be selected by the City of Rockwall.

509.5.1.4. Measurement of Payment

Aerial crossings will be measured for payment per each between the limits shown on the plans and will be paid for at the lump sum bid price for each crossing in the Bid Schedule.

Concrete piers and collars to the elevations shown in the plans will be measured and paid for in the lump sum price for aerial crossings. Payment in vertical feet for additional depth of reinforced concrete piers as approved by the City of Rockwall, shall be as provided in the Proposal and Bid Schedule.

Payment of the unit or lump sum prices shall be full compensation for furnishing all labor, supervisions, materials, tools, equipment, and incidentals, and for performing all work necessary in construction the aerial crossings and piers, including excavation, dewatering, backfilling, disposal of surplus material, painting, testing,

concrete encasement, hauling, transportation costs, disposal costs, salvaging, and any other work required in accordance with the Plans and Specifications.

7.6 Division 600 Conduit & Appurtenance Rehabilitation

NOTE: The ***(1)*** symbol specifies that this item is also covered in the City of Rockwall's "Special Provisions" to the "Standard Specifications for Public Works Construction, North Central Texas". These Special Provisions are additional and modify the "Standard Specification"

801 BARRIERS, WARNING & DETOUR SIGNS, AND FENCES

801.1. Barriers and Warning And Detour Signs

Add the Following

Reflectorized marking for guard rail and other traffic control used shall meet the requirements of 3M Scotchlite Brand Reflective Sheeting Grade, Series 2800, 3800 or 5800, or equal. The marking shall conform to U.S. Department of Transportation, Federal Highway Administration, STANDARD SPECIFICATIONS FOR CONSTRUCTION OF ROADS AND BRIDGES ON FEDERAL HIGHWAY PROJECTS, 1979 FP-79, Type III A, Sections 633.36 and 718.01 and Federal Supply Service, General Services Administration, LS-300 C, SHEETING AND TAPE REFLECTIVE NON-EXPOSED LENS, Reflectivity 2, Class 4.

801.2. Metal Beam Guard Fence

Add the following:

Reflectorized Marking shall be applied to metal beam guardrail at locations shown on the plans. To apply properly, the following equipment and accessories are recommended:

a. Heat Activated Adhesive

(1) Heat lamp vacuum applicator with temperature control.

(2) Remove protective liner from adhesive and place glossy side of liner over the sign face. Sheeting and liner may require perforation to aid in air evaluation.

b. Pressure Sensitive Adhesive

(1) 48" Interstate Squeeze Roll Applicator.

(2) Hand application. To obtain maximum initial adhesion use firm pressure with 2" (5 cm) rubber roller or plastic squeeze. Multiple, heavy overlapping strokes should be used. Resqueeze all edges.

801.5. Wire Fencing

801.5.2. Material

Add the following:

801.5.2.1. Wire Fencing Fabric:

All chain link fencing shall be No. 9 gage copper bearing open-hearth steel wire.

801.5.2.2. Posts

801.5.2.2.1 Metal Posts

All posts shall be heavily galvanized by the hot-dip process after fabrication and shall be fitted with watertight malleable iron caps. All posts shall be of the following size and shape:

801.5.2.2.2. Line Posts

"H" Section hot rolled weighing not less than 4.10 pounds per linear foot or 3-1/2-inch O.D. pipe weighing not less than 3.65 pounds per linear foot.

801.5.2.2.3. Terminal Posts

Three inch (3") steel pipe weighing not less than 5.79 pounds per linear foot.

801.5.2.2.4. Gate Posts

Four inch (4") O.D. steel pipe weighing not less than 9.11 pounds per linear foot.

801.5.2.3. Rails, Gates, Braces and Fittings

Shall be 1-5/8 inch steel pipe weighing not less than 2.27 pounds per linear foot.

ITEM 803 SLOPE AND CHANNEL PROTECTION

803.2. Gabion Structures

803.2.2. Materials

803.2.2.1. Baskets

Add the sentence:

All wire used, including tie and connecting wire, shall be certified by Mill Test Reports showing compliance with specification requirements.

803.2.2.2. Stone

Add the following:

Facing stone shall be hand selected, large stone and shall be selected for best appearance. Facing stone shall be an off-white color and prior to laying the stone, samples shall be delivered to the site and shall be approved by the Engineer for gradation and appearance.

803.2.3. Gabion Construction

803.2.3.1. Geotextile Filter Layer

Add the following:

High strength permeable barrier fabric for use as a filter media, shall be placed along the earth side of the Gabion Structures. The permeable barrier fabric to be used shall be TREVIRA S1115 as manufactured by Hoechst Fibers Industries, Spartenburg, South Carolina; MIRAFI 140 Fabric, produced by Fiber Industries, Inc.; Bidim

U-14 as distributed by Quline Corporation, Houston, Texas, or approved equal.

803.3. Riprap

803.3.2. Riprap Materials

803.3.2.2. Stone

803.3.2.2.1. Types

Broken Concrete.

Delete this sub-section and replace with the following wording:

Broken concrete shall not be used for riprap.

ITEM 804 PAINTING AND OTHER PROTECTIVE TREATMENTS, PAVEMENT MARKINGS

804.2 Painting and Marking

804.2.3. Preparing Structures for Paint

804.2.3.1.Descaling, Cleaning and Preparation of Surfaces

Add the following:

Prior to painting concrete or masonry screening walls the concrete must be thoroughly cured and dry for proper adhesion of paint. Preparation of work shall include either of the following:

(1) The concert surface shall be thoroughly washed with a solution of one (1) gallon Muriatic Acid to ten (10) gallons H_2O (Caution: Always add acid to H_2O rather than H_2O to acid). Rinse thoroughly with clear water and paint while damp.

(2) Treatment of surface with masonry conditioner such as a clear alkali-resistant soya alkyd binder type sealer or as recommended by paint manufacturer.

804.2.5. Painting New Structures

804.2.5.5. Finish Coats

Add the following:

On masonry walls which are painted, the total dry film thickness shall be 6 mils (2 coats applied at 8 mils wet and spreading rate = 200 square feet per gallon based on 36% $\pm$ 2% Volume Solids). The thickness shall be tested using a Wet Film Thickness Gage.

804.2.6. Cleaning and Painting Existing Structures

Add the following:

Masonry walls which require repainting shall be sand blasted or cleaned with a power brush, removing all mastic, powdery, thick layered, peeling or heavily chalked old paint. Spot prime all bare areas with Masonry Conditioner. If old paint is a cement-based paint, apply Masonry Conditioner to entire surface and apply 2 coats of paint in accordance with 8.9.3 (k) above.

City of Rockwall
The New Horizon

ITEM 805 ELECTRICAL COMPONENTS AND CONDUIT

805.3. Material

Add the following:

In the City of Rockwall, conduit for street lighting shall be 2 inch PVC pipe and for traffic control shall be 3-inch PVC pipe, meeting the requirements of Item 2.10, Electrical Components.

Add the following:

805.3.7. Pull Box.

All pull boxes shall be #36 supplied by Traffic Signal Equipment Company, Fort Worth, Texas or approved equal. Boxes shall be approximately 10 1/2"x17"x12" and shall be furnished with a concrete cover.

805.4 Conduit Construction Methods

Revise first sentence, third paragraph to read as follows:

All conduit shall be placed a minimum of thirty-six (36) inches below finish grade. Conduit in median shall be placed a minimum of thirty-six (36) inches below inside of curb as shown on plans.

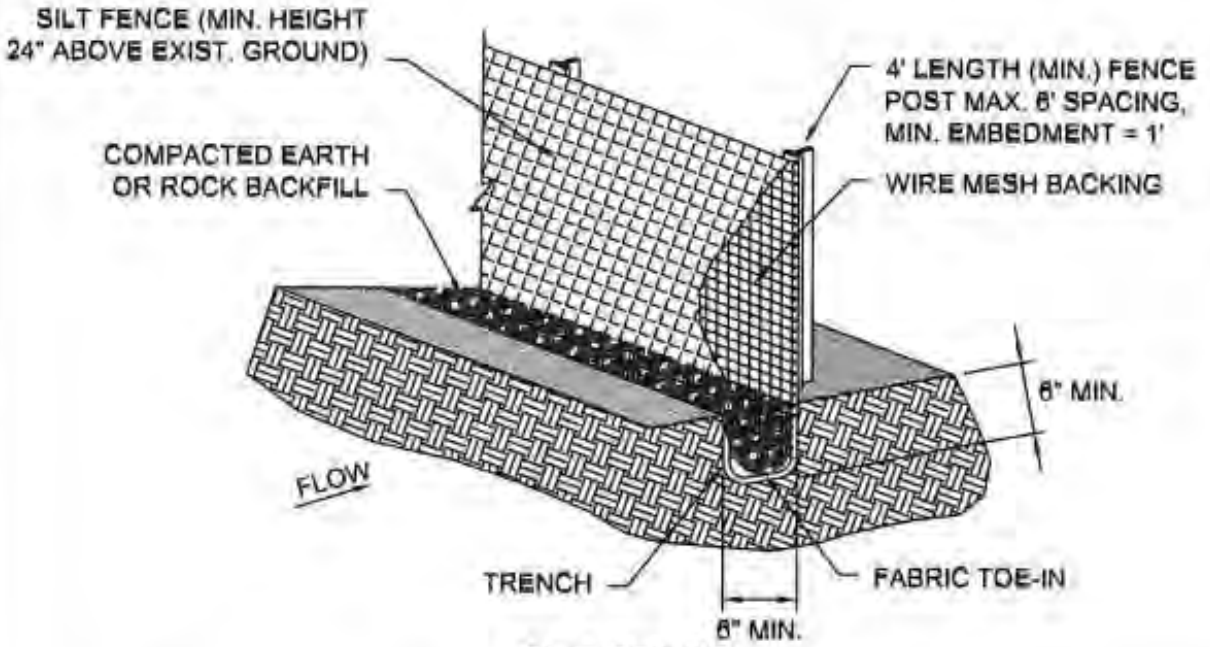
City of Rockwall
The New Horizon

8. Special Provisions to the NCTCOG's Standard Drawings for Public Works Construction Standards

All work within the City of Rockwall shall conform to the standard drawings called out within this section. The City of Rockwall's Standard Drawing for Construction shall conform to Section II – Standard Drawings for North Central Texas Council of Governments Standard Specifications and Standard Drawings, November 2004, Fifth Edition.

The North Central Texas Standard Drawings shall be modified and clarified by the deletion, revision, and/or addition of the following drawings. Except when specifically stated, none of the standard drawings of the North Central Texas Standard Specifications shall be deleted.

8.1 Division 1000 Erosion and Sediment Control



NOTE: *(1) Deleted NCTCOG Drawing*
(2) Revised NCTGOG Drawing (see revisions below)
(3) Added Rockwall Standard Drawing (see drawing below)

SILT FENCE

POST MUST BE METAL, NO WOODED STAKES ALLOWED.

STONE OVERFLOW STRUCTURE

SILT FENCE	CITY OF ROCKWALL	STANDARD SPECIFICATION REFERENCE 202.5 *	
		DATE Mar. 2018	STANDARD DRAWING NO. R-1020A

SILT FENCE GENERAL NOTES:

1. POSTS WHICH SUPPORT THE SILT FENCE SHALL BE INSTALLED ON A SLIGHT ANGLE TOWARD THE ANTICIPATED RUNOFF SOURCE. POST MUST BE EMBEDDED A MINIMUM OF ONE FOOT.

2. THE TOE OF THE SILT FENCE SHALL BE TRENCHED IN WITH A SPADE OR MECHANICAL TRENCHER, SO THAT THE DOWNSLOPE FACE OF THE TRENCH IS FLAT AND PERPENDICULAR TO THE LINE OF FLOW. WHERE FENCE CANNOT BE TRENCHED IN (e.g. PAVEMENT), WEIGHT FABRIC FLAP WITH ROCK ON UPHILL SIDE TO PREVENT FLOW FROM SEEPING UNDER FENCE.

3. THE TRENCH MUST BE A MINIMUM OF 6 INCHES DEEP AND 6 INCHES WIDE TO ALLOW FOR THE SILT FENCE FABRIC TO BE LAID IN THE GROUND AND BACKFILLED WITH COMPACTED MATERIAL.

4. SILT FENCE SHOULD BE SECURELY FASTENED TO EACH SUPPORT POST OR TO WIRE BACKING, WHICH IN TURN IS ATTACHED TO THE FENCE POST. THERE SHALL BE A 3 FOOT OVERLAP, SECURELY FASTENED WHERE ENDS OF FABRIC MEET.

5. INSPECTION SHALL BE AS SPECIFIED IN THE SWPPP. REPAIR OR REPLACEMENT SHALL BE MADE PROMPTLY AS NEEDED.

6. SILT FENCE SHALL BE REMOVED WHEN FINAL STABILIZATION IS ACHIEVED OR ANOTHER EROSION OR SEDIMENT CONTROL DEVICE IS EMPLOYED.

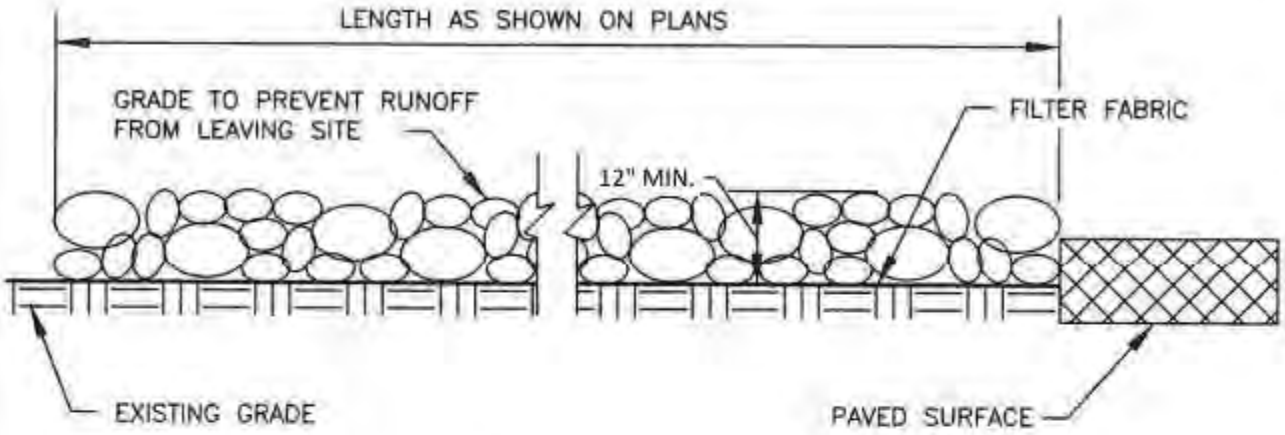
7. ACCUMULATED SILT SHALL BE REMOVED WHEN IT REACHES A DEPTH OF HALF THE HEIGHT OF THE FENCE. THE SILT SHALL BE DISPOSED OF AT AN APPROVED SITE AND IN SUCH A MANNER AS TO NOT CONTRIBUTE TO ADDITIONAL SILTATION.

8. FILTER STONE SHALL BE WRAPPED IN FILTER FABRIC AND BURIED SIX (6") INCHES MINIMUM.

SILT FENCE	CITY OF ROCKWALL	STANDARD SPECIFICATION REFERENCE: 202.5 *	
		DATE: Mar. 2018	STANDARD DRAWING NO.: R-1020B

ROCK CHECK DAM GENERAL NOTES:

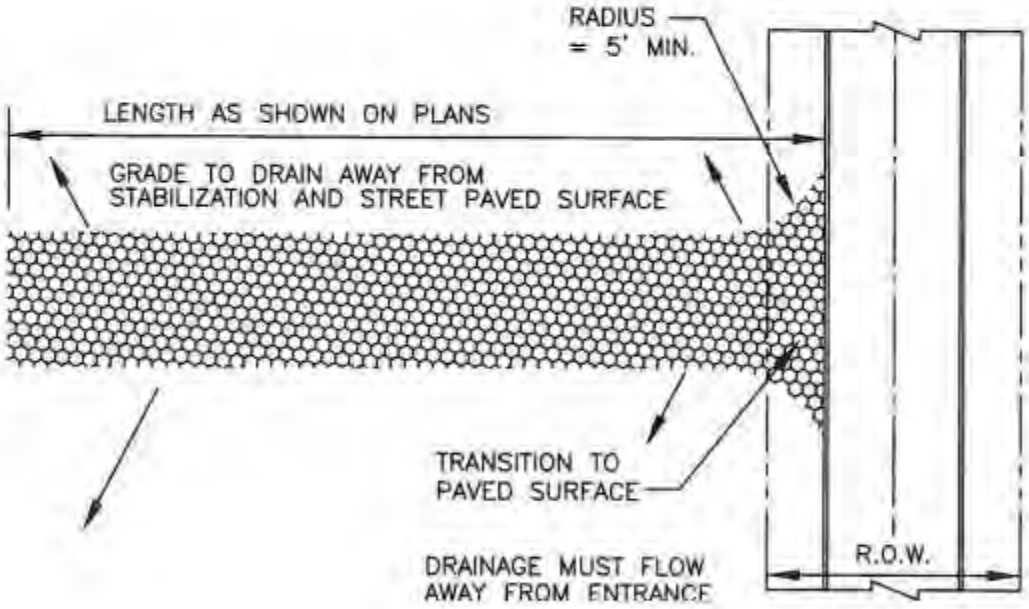
1. STONE SHALL BE WELL GRADED WITH SIZE RANGE FROM 1½ TO 3½ INCHES IN DIAMETER DEPENDING ON EXPECTED FLOWS.



2. THE CHECK DAM SHALL BE INSPECTED AS SPECIFIED IN THE SWPPP AND SHALL BE REPLACED WHEN THE STRUCTURE CEASES TO FUNCTION AS INTENDED DUE TO SILT ACCUMULATION AMONG THE ROCKS, WASHOUT, CONSTRUCTION TRAFFIC DAMAGE, ETC.

3. WHEN SILT REACHES A DEPTH EQUAL TO ONE-THIRD OF THE HEIGHT OF THE CHECK DAM OR ONE FOOT, WHICHEVER IS LESS, THE SILT SHALL BE REMOVED AND DISPOSED OF PROPERLY.

4. WHEN THE SITE HAS ACHIEVED FINAL STABILIZATION OR ANOTHER EROSION OR SEDIMENT CONTROL DEVICE IS EMPLOYED, THE CHECK DAM AND ACCUMULATED SILT SHALL BE REMOVED AND DISPOSED OF IN AN APPROVED MANNER.



5. FILTER STONE SHALL BE WRAPPED IN APPROPRIATE SIZED WIRE MESH TO CONTAIN STONE AND BURIED SIX (6") INCHES MINIMUM.

STABILIZED CONSTRUCTION ENTRANCE	CITY OF ROCKWALL	STANDARD SPECIFICATION REFERENCE 202.11*	
		DATE Mar. 2018	STANDARD DRAWING NO. R-1070A

STABILIZED CONSTRUCTION ENTRANCE GENERAL NOTES:

1. STONE SHALL BE 4 TO 6 INCH DIAMETER COARSE AGGREGATE.

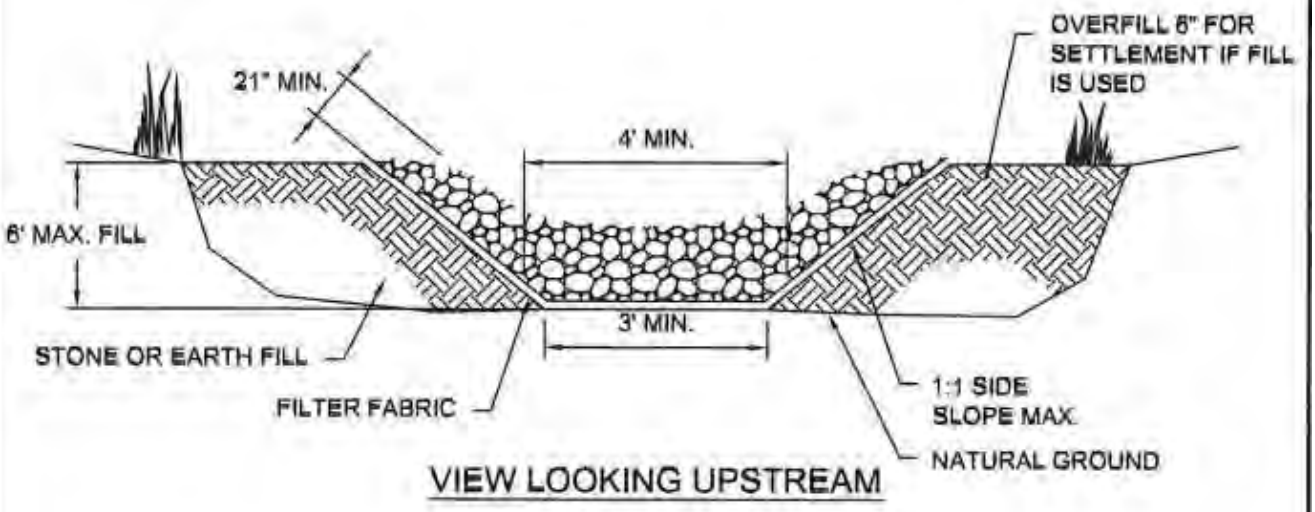
2. MINIMUM LENGTH SHALL BE 50 FEET AND WIDITH SHALL BE 20 FEET.

3. THE THICKNESS SHALL NOT BE LESS THAN 12 INCHES.

4. THE WIDTH SHALL BE NO LESS THAN THE FULL WIDTH OF ALL POINTS OF INGRESS OR EGRESS.

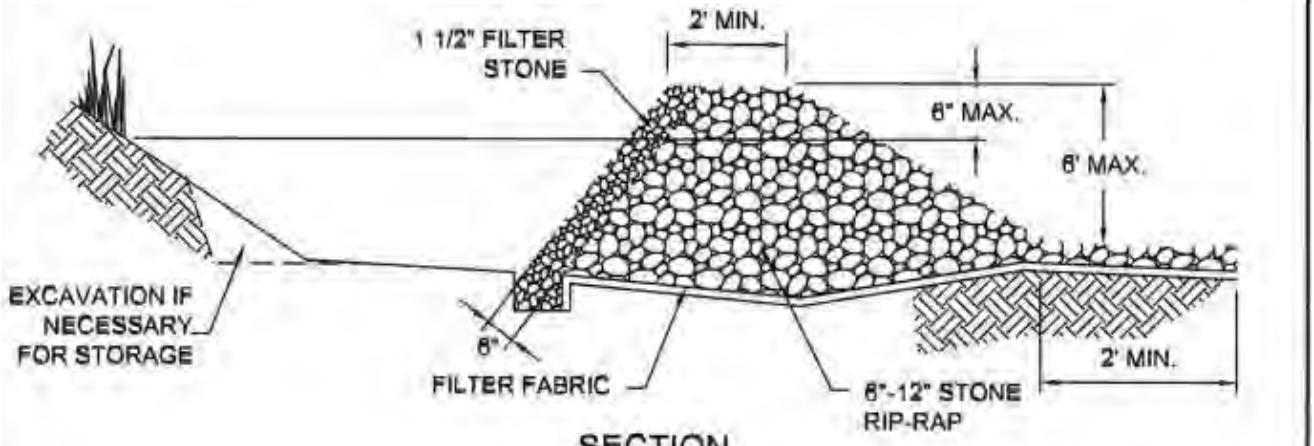
5. WHEN NECESSARY, VEHICLES SHALL BE CLEANED TO REMOVE SEDIMENT PRIOR TO ENTRANCE ONTO A PUBLIC ROADWAY. WHEN WASHING IS REQUIRED, IT SHALL BE DONE ON AN AREA STABILIZED WITH CRUSHED STONE WITH DRAINAGE FLOWING AWAY FROM BOTH THE STREET AND THE STABILIZED ENTRANCE. ALL SEDIMENT SHALL BE PREVENTED FROM ENTERING ANY STORM DRAIN, DITCH OR WATERCOURSE USING APPROVED METHODS.

6. THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PAVED SURFACES. THIS MAY REQUIRE PERIODIC TOP DRESSING WITH ADDITIONAL STONE AS CONDITIONS DEMAND. ALL SEDIMENT SPILLED, DROPPED, WASHED, OR TRACKED ONTO PAVED SURFACES MUST BE REMOVED IMMEDIATELY.



7. THE ENTRANCE MUST BE PROPERLY GRADED OR INCORPORATE A DRAINAGE SWALE TO PREVENT RUNOFF FROM LEAVING THE CONSTRUCTION SITE.

8. PREVENT SHORTCUTTING OF THE FULL LENGTH OF THE CONSTRUCTION ENTRANCE BY INSTALLING BARRIERS AS NECESSARY.



9. INSPECTION SHALL BE AS SPECIFIED IN THE SWPPP.

10. NO CRUSHED OR RECYCLED CONCRETE ALLOWED.

PROWAG = Public Rights-of-Way Accessibility Guidelines

W –

The following is a typical detail for a directional curb ramp on a standard residential street and does not fit all scenarios in the City of Rockwall. It shall be the responsibility of the design consultant and contractor to ensure that all ramps constructed meet current ADA requirements.

NOTES: All newly constructed sidewalks, curb ramps and crosswalks installed within City of Rockwall public rights-of-way shall be considered a pedestrian access route and shall conform to the most current "Draft" Guidelines for Public Rights-of-Way created by the United States Access Board.

1. SEE DETAIL R-2125B FOR RAMP FEATURE DESCRIPTIONS
2. SEE DETAIL R-2125C FOR SECTIONS X-X AND Y-Y
3. SEE DETAIL R-2125D FOR ADDITIONAL NOTES

DIRECTIONAL CURB RAMP	CITY OF ROCKWALL	DATE	DRAWING NO.
		MAR. '17	R-2125A

A. Detectable Warning Devices (DWD) shall be pre-manufactured cast-in-place truncated dome plates installed to the manufacturer's specifications, and shall meet all ADA requirements. No Brick Pavers allowed. Color to be approved by the City. DWD shall be 24 inches in length for the full width of the street connection starting at the back of curb. A maximum 2-inch border shall be allowed on the sides of the DWD for proper installation.

B. Also known as "Clear Space" per ADA PROWAG, the City requires a minimum landing space of 5-foot by 5-foot at the bottom of every ramp. This landing space shall have a cross slope in both directions that does not exceed 2.0% and shall be wholly outside the parallel vehicular travel path.

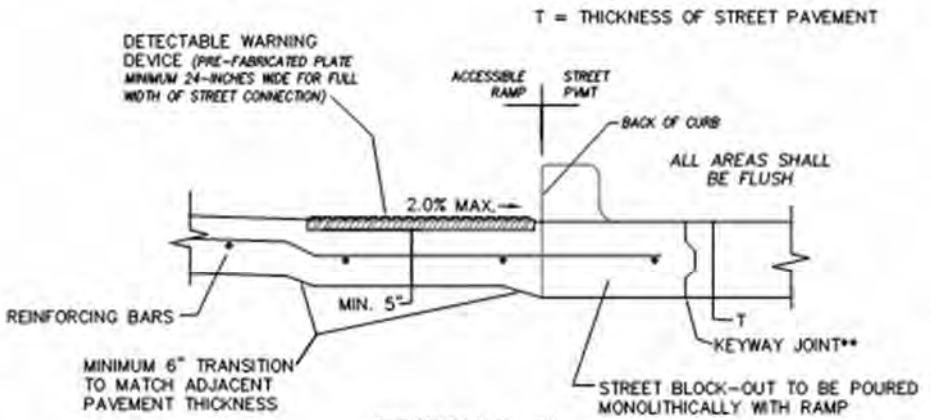
C. The ramp component of the directional curb ramp shall have a continuous longitudinal slope more than 5% and less than 8.3%. The ramp shall also have a cross slope of no more than 2.0%. Length of ramp can vary, but shall not exceed 15 feet to achieve desired elevation change.

D. Also known as "Turning Space" per ADA PROWAG, a minimum landing space of 5-foot by 5-foot shall be at the top of every ramp. This landing (turning) space shall have a cross slope in both directions that does not exceed 2.0%. Landing must match width of sidewalk and length shall be the same distance ("Squared" Landing).

E. All curb ramps shall have grade breaks at the top and bottom that are perpendicular to the direction of the ramp run. Where the ends of the bottom grade break are less than or equal to 5 feet, the DWD shall be placed within the ramp at the bottom grade break. Where either end of the bottom grade break is greater than 5 feet, the DWD shall be placed behind the back of the curb.

F. Paving contractor shall leave block out with a keyway joint installed, minimum of 18 inches measured from back of curb. Block out shall be poured monolithically with Curb Ramp. Concrete shall tie to street paving with a keyway joint per NCTCOG detail 2050. No curb shall be constructed where a DWD is provided. The curb on either side shall have a typical 5 foot taper to transition from the standard 6-inch curb height to be flush with ramp.

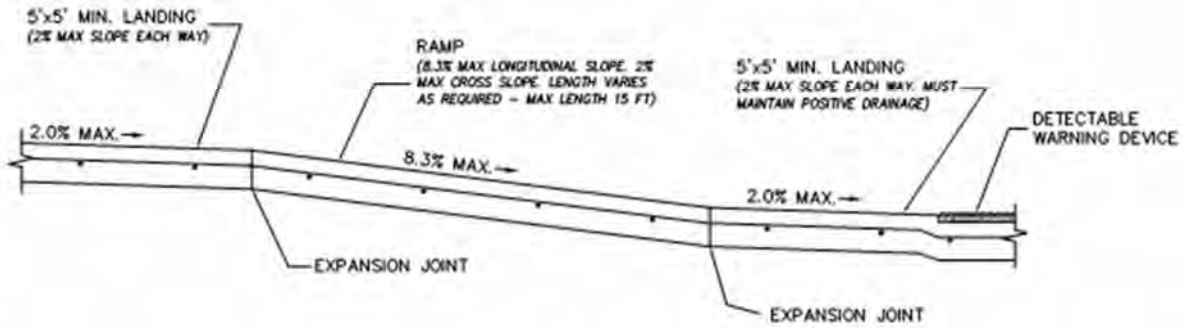
G. All work associated with accessible routes shall be installed flush with all features to minimize vertical surface discontinuities. Each segment along accessible route shall be flush with no more (zero tolerance) than a ¼-inch grade separation (elevation difference), or ½-inch grade separation if beveled (bevel slope shall not be steeper than 50%).



H. A sidewalk header shall be constructed at ends of all work performed.

I. Street crossings shall adhere to same guidelines as other accessible routes within public right-of-way, and shall be for the full width of the in-line accessible route. Cross slope shall not exceed 2%*. New street construction shall incorporate all ADA design requirements. It shall be the responsibility of the Design Professional and Contractor to ensure all street crossings meet the requirements of PROWAG. Street alterations on existing streets to bring to compliance shall be at the City Engineer's discretion.

J. All curbs constructed as part of an ADA Ramp shall match City curb standards.



** See PROWAG special design considerations when street crossing has no stop or yield condition.*

**KEYWAY JOINT FOR NEW CONSTRUCTION. STREET CONNECTION SHALL BE LONGITUDINAL BUTT JOINT FOR CONNECTIONS TO EXISTING ROADWAYS.

SECTION Y-Y
N.T.S.

NOTE: ALL SIDEWALK CURB RAMPS WILL BE 3,600 PSI (6.5 SACK/CY) CONCRETE.

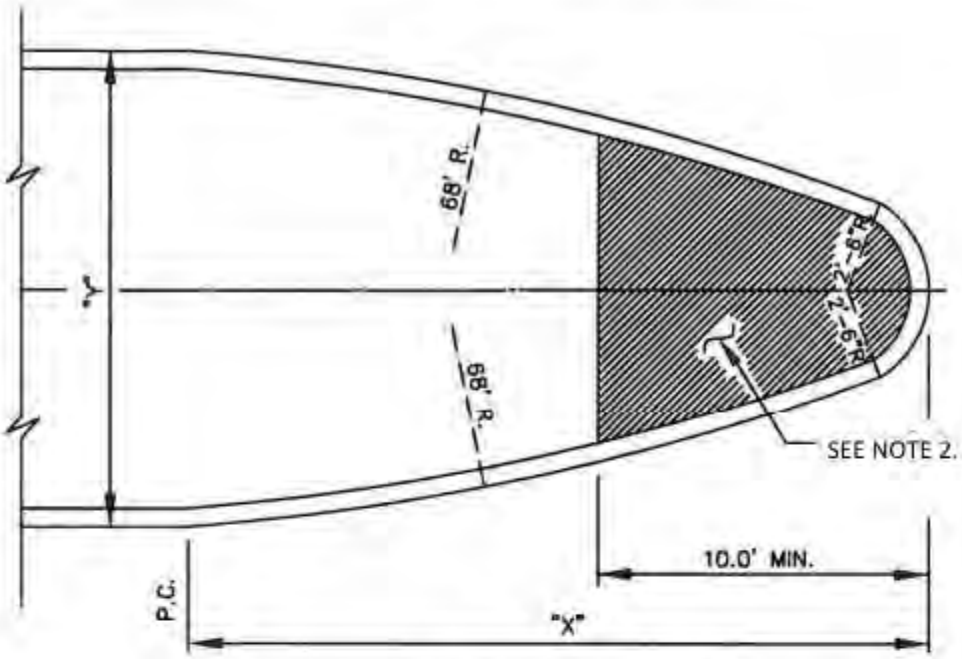
DIRECTIONAL CURB RAMP	CITY OF ROCKWALL	
		DATE: MAR. '17 / DRAWING NO.: R-2125C

PEDESTRIAN ACCESSIBILITY (WITHIN PUBLIC R.O.W.)

All newly constructed sidewalks, curb ramps and crosswalks installed within City of Rockwall public rights-of-way shall be considered a pedestrian access route and shall conform to the most current Guidelines for Public Rights-of-Way created by the United States Access Board.

CURB RAMPS

1. All slopes shown are MAXIMUM ALLOWABLE. Lesser slopes that will still drain properly should be used. Adjust curb ramp length or grade of approach sidewalks as directed.
2. Landings shall be 5'x 5' minimum with a maximum 2% slope in the transverse and longitudinal directions..
3. Clear space at the bottom of curb ramps shall be a minimum of 5'x 5' wholly contained within the crosswalk and wholly outside the parallel vehicular travel path.
4. Maximum allowable cross slope on sidewalk and curb ramp surfaces is 2%.
5. Additional information on curb ramp location, design, light reflective value and texture may be found in the most current edition of the Texas Accessibility Standards (TAS) and 16 TAC 68.102. Federal guidelines shall supersede any conflicts.
6. Crosswalk dimensions, crosswalk markings and stop bar locations shall be as shown elsewhere in the plans. At intersections where crosswalk markings are not required, curb ramps and accessible routes shall align with theoretical crosswalks unless otherwise directed.
7. Handrails are not required on curb ramps.
8. Provide a flush transition where the curb ramps connect to the street.
9. Accessible routes are considered "ramps" when longitudinal slopes are between 5% and 8.3% (maximum allowable). Sidewalks under 5% longitudinal slope are deemed accessible routes and must follow all applicable guidelines.



DETECTABLE WARNING DEVICE

10. Curb ramps must contain a detectable warning surface that consists of raised truncated domes complying with Section 705 of the TAS. The surface must contrast visually with adjoining surfaces. Furnish and install an approved cast-in-place dark red detectable warning surface material adjacent to uncolored concrete, unless specified elsewhere in the plans.
11. Detectable Warning Materials shall be truncated dome plates in the color approved by the City. Install products in accordance with manufacturer's specifications.
12. Detectable warning surfaces must be slip resistant and not allow water to accumulate.
13. Detectable warning surfaces shall be a minimum of 24" in depth in the direction of pedestrian travel, and extend the full width of the curb ramp or landing where the pedestrian access route enters the street.
14. Detectable warning surfaces shall be located so that the edge nearest the curb line is at the back of curb. When placed on the ramp, align the rows of domes to be perpendicular to the grade break between the ramp run and the street. Where detectable warning surfaces are provided on a surface with a slope that is less than 5 percent, dome orientation is less critical. Detectable warning surfaces may be curved along the corner radius.

SIDEWALKS

15. Provide clear ground space at operable parts, including pedestrian push buttons. Operable parts shall be placed within one or more reach ranges specified in TAS 308.
16. Place traffic signal or illumination poles, ground boxes, controller boxes, signs, drainage facilities and other items so as not to obstruct the pedestrian access route or clear ground space.
17. Street grades and cross slopes shall be as shown elsewhere in the plans.
18. Changes in level greater than 1/4 inch are not permitted (1/2 inch with bevel).
19. The least possible grade should be used to maximize accessibility. The running slope of sidewalks and crosswalks within the public right of way may follow the grade of the parallel roadway. Where a continuous grade greater than 5% must be provided, handrails may be desirable to improve accessibility. Handrails may also be needed to protect pedestrians from potentially hazardous conditions. If provided, handrails shall comply with TAS 505.
20. Handrail extensions shall not protrude into the usable landing area or into intersecting pedestrian routes.

2. ILSNS UP TO 6' IN LENGTH MAY BE PLACED ON A 7' ILSN CLAMP-ON ARM. ILSNS UP TO 8' IN LENGTH MAY BE PLACED ON A 9' ILSN CAMP-ON ARM.
3. LETTERING SIZE AND SPACING BETWEEN THE VARIOUS SIGN ELEMENTS SHALL FOLLOW THE CURRENT VERSION OF THE *STANDARD HIGHWAY SIGN DESIGNS FOR TEXAS* MANUAL FOR D3-1.
   A. DESIRED LETTER HEIGHT FOR STREET NAME SIGNS SHALL BE 12" FOR UPPER CASE LETTERS. STREET NAME LETTER HEIGHT MAY BE REDUCED TO 10" TO REDUCE THE SIZE OF THE SIGN AS NEEDED.
4. THE CITY LOGO HEIGHT SHALL MATCH MAXIMUM TEXT SIZE HEIGHT ON SIGN LEGEND. THE LOGO SHALL BE PLACED ON THE LEFT SIDE OF EACH SIDE OF THE SIGN ON A WHITE BACKGROUND.
5. THE ILSN LEGEND MAY BE COMPOSED OF ONE LINE OR TWO LINES OF TEXT. CONTRACTOR TO VERIFY WITH CITY BEFORE SUBMITTING SHOP DRAWINGS FOR SIGNS WITH TWO LINES OF TEXT.
6. SIGNS SHALL BE EDGELIT LED ILLUMINATED
7. FACE COLOR/MATERIAL: GREEN EC FILM OVER HIGH-INTENSITY TRANSLUCENT REFLECTIVE WHITE SHEETING ON UV LEXAN.
8. FRAME WIDTH TO BE PROVIDED BY MANUFACTURER.
9. SIGN BODIES AND DOORS ARE TO BE POWDER COATED GLOSSY BLACK.
10. SIGNS SHALL BE SINGLE SIDED EXCEPT UNDER THE FOLLOWING CONDITION:
    SIGN SHALL BE DOUBLE SIDED IF BOTH APPROACHES FACING THE SIGN ARE UNDIVIDED(NO MEDIAN).
11. SIGNS SHALL BE TOP MOUNTED USING STANDARD TXDOT DETAILS.
12. ILSN SHALL BE MOUNTED ON A STANDARD TXDOT ILSN CLAMP-ON ARM UNLESS OTHERWISE DIRECTED IN THE PLANS
13. ILSN SHALL BE FULLY GASKETED AND WATERTIGHT.
14. TRAFFIC SIGNAL POLE SHALL BE AT LEAST 24' HEIGHT. (SEE TXDOT TRAFFIC SIGNAL POLE STANDARDS)
15. A SEPARATE PHOTOCELL FOR ILSN/120 VOLT CIRCUIT WILL BE REQUIRED.
16. TWO #8 XHHW CONDUCTORS SHALL BE INSTALLED FROM SERVICE TO TERMINAL BLOCK OF EACH POLE WITH ILSN UNLESS OTHERWISE SHOWN IN THE PLANS. (CONDUCTORS FROM SERVICE TO TERMINAL BLOCK OF EACH POLE SHALL BE PAID FOR SEPARATELY FROM THE ILSN PAY ITEM.)
    A. DAISY CHAIN ALL ILSNS UNLESS OTHERWISE DIRECTED IN THE PLANS.
17. TWO # 12 XHHW CONDUCTORS SHALL BE INSTALLED FROM TERMINAL BLOCK OF POLE TO ILSN UNLESS OTHERWISE SHOWN IN THE PLANS. (CONDUCTORS FROM THE TERMINAL BLOCK OF EACH POLE TO ILSN SHALL BE PAID FOR SEPARATELY FROM THE ILSN PAY ITEM.)
18. CONTRACTOR TO SUBMIT SHOP DRAWINGS OF THE LED ILSNS TO CITY OF ROCKWALL FOR APPROVAL PRIOR TO FABRICATION.
19. CONTRACTOR SHALL BE RESPONSIBLE FOR ALL EQUIPMENT NECESSARY TO INSTALL THE ILSN SIGN.
20. ALL ISLNS SHALL FOLLOW ALL RULES AND GUIDELINES AS SPECIFIED IN THE MOST RECENT EDITIONS OF THE *STANDARD HIGHWAY SIGN DESIGNS FOR TEXAS* AND THE *TEXAS MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES*. SHOULD ANY CONFLICTS BETWEEN THE ABOVE NOTES AND THESE DOCUMENTS, THESE DOCUMENTS SHALL GOVERN.

NOTE:
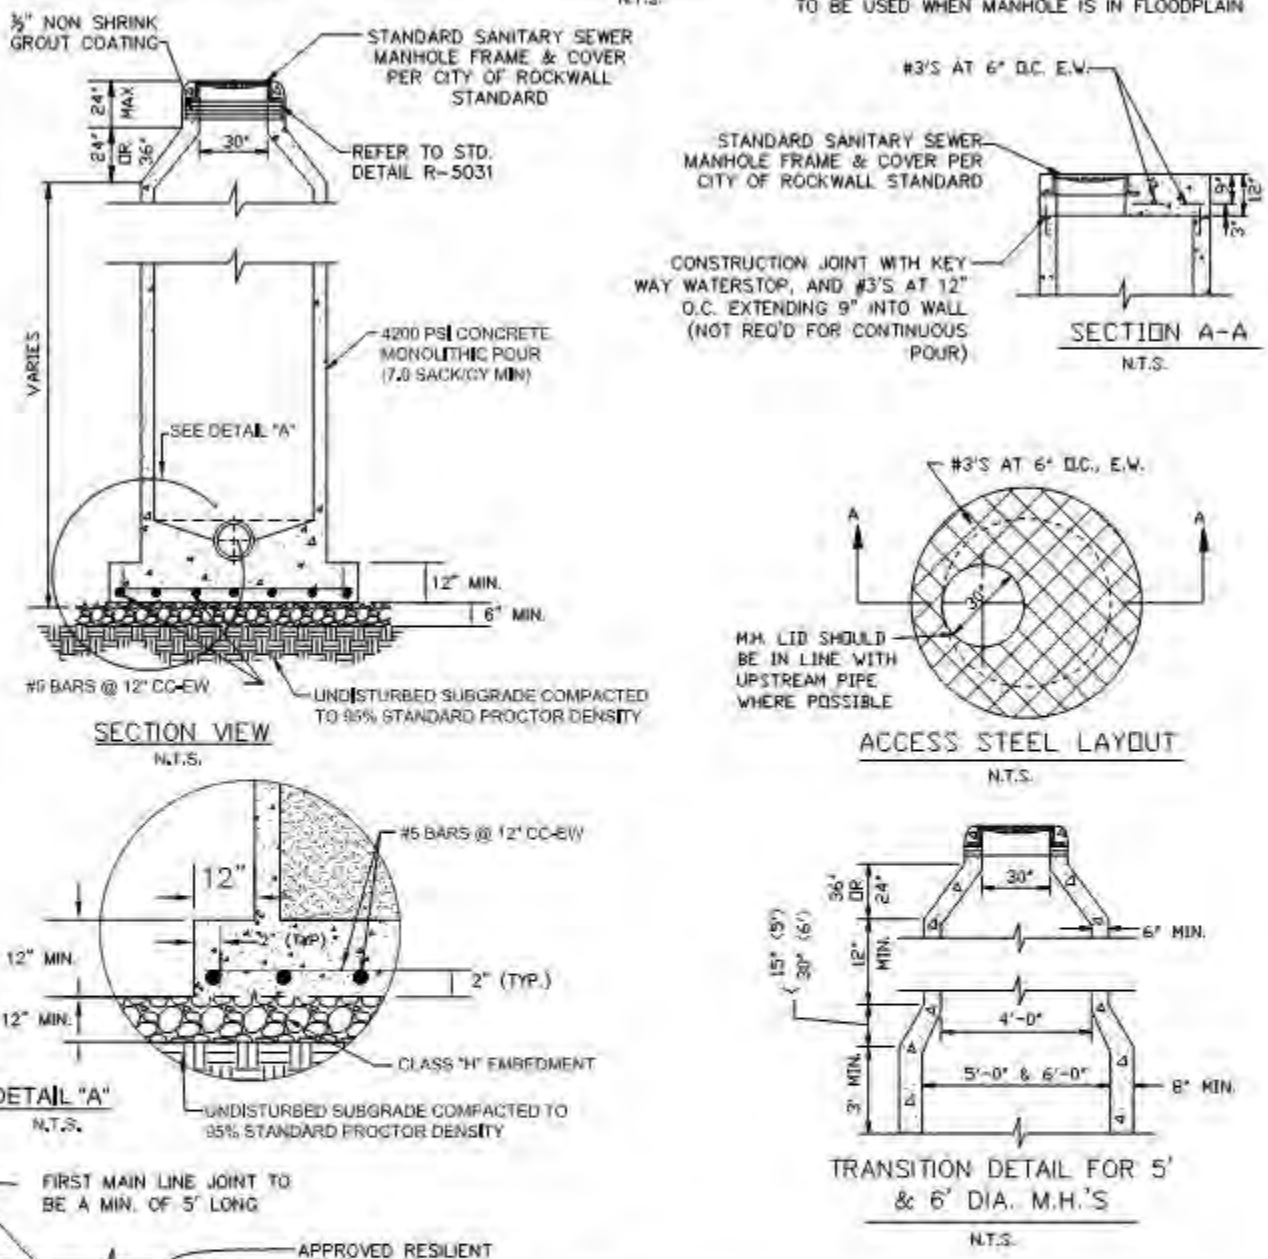
THIS DETAIL FOR USE ONLY WHEN NEW MAIN WILL NOT MATE WITH EXISTING MAIN JOINT DUE TO DIFFERENT DIMENSIONS OR MATERIALS AND A MANHOLE IS NOT REQUIRED.

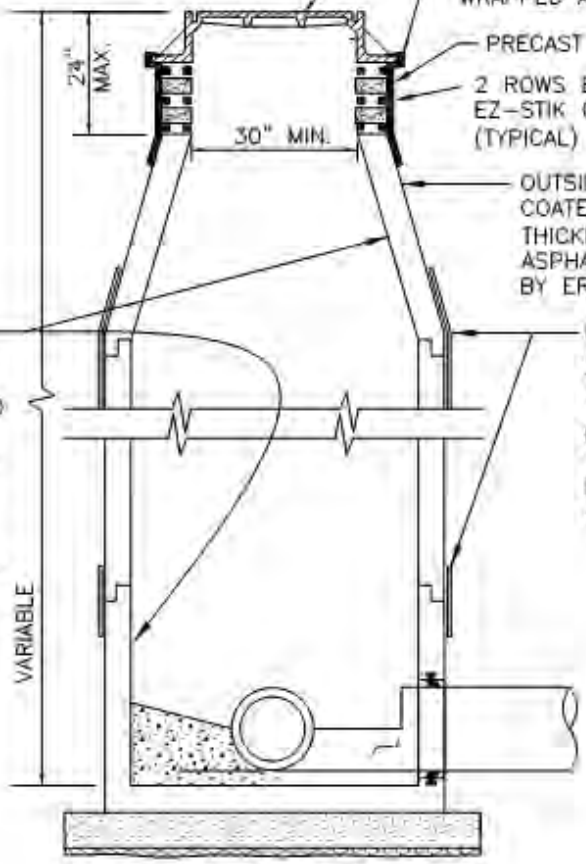


WASTEWATER MAIN TIE-IN	CITY OF ROCKWALL	STANDARD SPECIFICATION REFERENCE 502.10	
AT CLEANOUT OR M.H. STUBOUT		DATE Mar. 2018	STANDARD DRAWING NO. R-5010

NOTES:

1. FIRST MAIN LINE JOINT TO BE A MIN. OF 5' LONG.
2. IF FALSE M.H. ARE REQUIRED, THEY SHALL BE CONSTRUCTED, INSTALLED AND REMOVED PER STD. DWG. NO. 5100.
3. M.H.'S LOCATED OUTSIDE OF PAVING SHALL BE CONSTRUCTED WITH A CONCRETE MOW STRIP PER STD. DWG. NO. R-7005.
4. REFER TO STD. DWG. NO. R-5031 FOR INFLOW PROTECTION AT MANHOLE GRADE RINGS, MANHOLE JOINTS AND ON OUTSIDE OF STRUCTURE.
5. REFER TO STD. DWG. NO. R-5032 FOR CORROSION PROTECTION.
6. CONCRETE SHALL BE 4,200 PSI (7.0 SACK/CY) 28 DAY STRENGTH.
7. REINFORCING SHALL MEET OR EXCEED ASTM C478 REQUIREMENTS.
8. INSTALL GREEN EMS DISK AT ALL MANHOLES.
9. LIP TO BE PRECAST.

WASTEWATER MANHOLE	CITY OF ROCKWALL		
PRECAST		DATE AUG '19	DRAWING NO. R-5020



NOTES:

1. IF FALSE M.H. BOTTOMS ARE REQUIRED THEY SHALL BE CONSTRUCTED, INSTALLED AND REMOVED PER STD. DWG. NO. 5100
2. M.H.'S LOCATED OUTSIDE OF PAVING SHALL BE CONSTRUCTED WITH A CONCRETE MOW STRIP PER STANDARD DETAIL R-7005.
3. REFER TO STD. DWG. NO. R-5031 FOR INFLOW PROTECTION AT MANHOLE GRADE RINGS AND ON THE OUTSIDE OF MANHOLE STRUCTURE.
4. CAST IN PLACE BASE MUST BE A MINIMUM 12" THICK WITH #5 BARS @ 12" OC-EW (EACH WAY) AND SHALL EXTEND 1' BEYOND MANHOLE.
6. CONCRETE SHALL BE 4,200 PSI (7.0 SACK/CY) 28 DAY STRENGTH.
7. REINFORCING SHALL MEET OR EXCEED ASTM C478 REQUIREMENTS.
8. INSTALL GREEN EMS DISK AT ALL MANHOLES.

WASTEWATER MANHOLE	CITY OF ROCKWALL	
CAST-IN-PLACE		DATE: AUG '19 / DRAWING NO.: R-5030

CORROSION PROTECTION ⇦ ⇨ INFLOW PREVENTION

STANDARD SANITARY SEWER MANHOLE FRAME & COVER PER CITY OF ROCKWALL STANDARD

THE OUTSIDE OF THE JOINTS AND ADJUSTMENT RINGS NEED TO BE WRAPPED AS NOTED ON THIS DETAIL.

PRECAST ADJUSTING RINGS

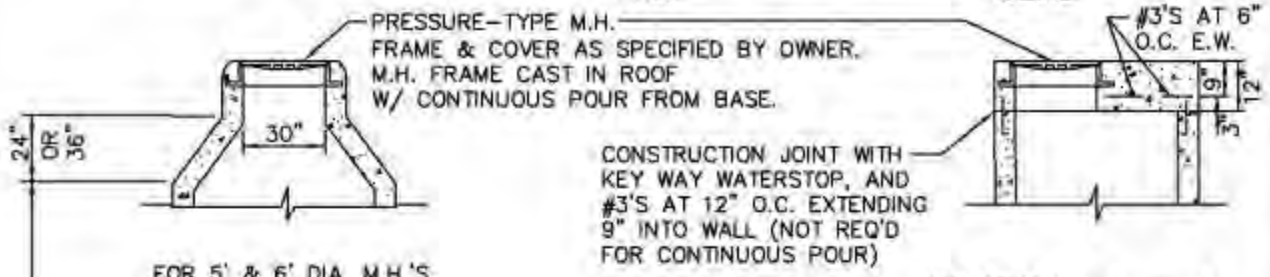
2 ROWS BITUMASTIC JOINT SEALANT, EZ-STIK OR APPROVED EQUAL (TYPICAL)

OUTSIDE OF MANHOLE TO BE COATED WITH 62.5 MILS WET FILM THICKNESS (WFT) ERTECH 2100 ASPHALT EMULSION MANUFACTURED BY ERTECH OR APPROVED EQUAL

MANHOLES SHALL HAVE CORROSION PROTECTION APPLIED TO ALL MANHOLES. CORROSION PROTECTION SHALL BE CONSHEILD (TERRA COTTA COLOR), RAVEN 405 LINER OR APPROVED EQUAL. COATING SHALL BE APPLIED TO ALL EXPOSED CONCRETE AND GROUTED SURFACES. SURFACE PREPARATION PRIOR TO MATERIAL APPLICATION SHALL FOLLOW MANUFACTURERS RECOMMENDATIONS.

MANHOLE JOINTS SHALL BE WRAPPED WITH A HEAT SHRINK THERMO PLASTIC MATERIAL "WRAPIDSEAL" MANUFACTURED BY CANUSA COATING SYSTEMS, "GATOR WRAP" MANUFACTURED BY SEALING SYSTEMS, INC. OR APPROVED EQUAL.

ELEVATION
N.T.S.



INFLOW PREVENTION NOTES:
1. REQUIRED ON ALL SANITARY SEWER MANHOLES AND LIFT STATION WET WELLS AND VALVE VAULTS.

CORROSION PREVENTION NOTES:
1. TO CORROSION PROTECTIVE COATING PROCESS, PRESSURE WASH AND CLEAN STRUCTURE. FILL BUG HOLES, JOINTS, HONEYCOMBS AND AROUND PIPE PENETRATIONS WITH A CEMENTITOUS REPAIR MATERIAL (CRM) AS NEEDED. USE STRONG SEAL MS2C MANUFACTURED BY THE STRONG COMPANY, INC. OR APPROVED EQUAL. THEN APPLY A MINIMUM OF 125 MILS ($\frac{1}{8}$ INCH) THICKNESS OF A POLYURETHANE COATING MATERIAL (EXISTING MANHOLES REQUIRE A MINIMUM OF 250 MILS THICKNESS OF POLYURETANE COATING MATERIAL). FOR THE POLYURETHANE COATING MATERIAL USE RAVEN 405 LINER OR APPROVED EQUAL.
2. ADDITIONAL CLEANING, PREPARATION, AND REPAIR METHODS MAY BE REQUIRED FOR EXISTING MANHOLES DEPENDING ON CONDITION ASSESSMENT OF THE MANHOLE. CONTACT ENGINEERING DIVISION FOR ADDITIONAL SPECIFICATIONS.
3. SPARK TESTING IS REQUIRED FOR COATINGS. COST FOR TESTING IS SUBSIDIARY TO OTHER BID ITEMS. CITY INSPECTOR TO BE PRESENT FOR SPARK TESTING. CONTRACTOR TO PROVIDE WRITTEN SPARK TEST RESULTS TO CITY.
4. EXISTING BRICK MANHOLES SHALL BE REPLACED.
5. REQUIRED ON ALL WASTEWATER MANHOLES AND LIFT STATION WET WELLS.

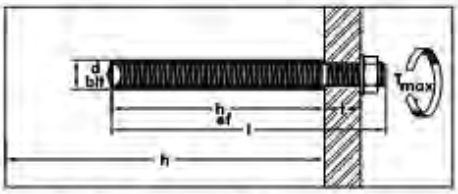
HVA ADHESIVE CAPSULE ANCHOR

A. DRILL HOLES WITH ANSI B212.15 MATCHED TOLERANCE CARBIDE TIPPED DRILL BITS WITH DRILL IN ROTO-HAMMER MODE OR USE A MATCHED TOLERANCE DIAMOND CORE DRILL BIT OF DIAMETER SPECIFIED BY HILTI.
B. DRILLED HOLE SPECIFICATIONS (DIAMETER & DEPTH) SHALL COMPLY WITH HILTI SPECIFICATION OR ICC ESR 1582.
C. ALLOWABLE LOADS MAY BE INCREASED BY 33-1/3% FOR SHORT-TERM WIND OR SEISMIC LOAD RESISTANCE (W ICC ESR 1682 UNLESS NOT PERMITTED BY THE APPLICABLE BUILDING CODE.
D. WHEN CONDUCTED, PROOF TEST ANCHORS IN THE FIELD TO 150-200% OF HILTI PUBLISHED ALLOWABLE TENSION LOAD UNLESS NOTED OTHERWISE IN A PROOF TEST LOAD TABLE. TORQUE TESTING IS NOT PERMITTED.
E. ANCHORS SHALL BE TIGHTENED WITH A CALIBRATED TORQUE WRENCH. USE OF AN IMPACT WRENCH IS NOT PERMITTED.
F. CONTACT HILTI TECHNICAL SUPPORT AT 1-800-879-8000 FOR INSTALLATION INSTRUCTIONS IN SUBMERGED WATER CONDITIONS.
G. CONTACT HILTI TECHNICAL SUPPORT AT 1-800-879-8000 FOR ADDITIONAL ASSISTANCE WITH HVA ADHESIVE ANCHOR INSTALLATIONS.
H. INSTALLATION INSTRUCTIONS:

*1. FOR HVA ADHESIVE CAPSULES WITH H.A.S. THREADED RODS:

1. DRILL ANCHOR HOLE WITH A CARBIDE BIT (SEE NOTE 1 ABOVE), TO SPECIFIED EMBEDMENT DEPTH.
2. CLEAN HOLE WITH COMPRESSED AIR OR BLOW OUT PUMP. INSERT NOZZLE TO BOTTOM OF HOLE.
3. IF USING MATCHED TOLERANCE CORE BIT, REMOVE STANDING WATER FROM HOLE.
4. INSERT APPROPRIATE HVU CAPSULE INTO HOLE WITH POINTED END FIRST. CAPSULE LENGTH IS LONGER THAN STANDARD EMBEDMENT AND WILL PROTRUDE FROM HOLE. DO NOT CUT OFF ANY PART OF THE HVU CAPSULE.
5. THREAD NUT ONTO ROD.
6. PLACE A WASHER ON FIRST NUT AND THREAD BLACK SETTING NUT DOWN ON WASHER.
7. TIGHTEN NUTS TOGETHER SO THAT BLACK SETTING WASHER IS AT TOP OF ROD.
8. INSERT SQUARE DRIVE SHAFT INTO HAMMER DRILL AND ATTACH PROPER IMPACT SOCKET.
9. WITH HAMMER DRILL ON ROTARY HAMMER, ENGAGE TOP NUT OF HAS ROD ASSEMBLY AND ROTOHAMMER ROD THROUGH CAPSULE(S) INTO THE HOLE. STOP DRILL ROTATION IMMEDIATELY UPON REACHING BOTTOM OF HOLE.
10. DO NOT DISTURB OR LOAD ANCHOR BEFORE CURING TIME ELAPSES.



HVA INSTALLATION SPECIFICATION TABLE FOR H.A.S. RODS

DETAILS / HAS Rod Size			3/8	1/2	5/8	3/4	7/8	1	1-1/4

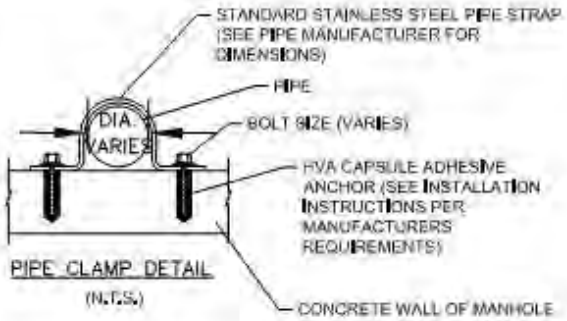
	h_1 of < h_{nom}	in.	$1.0h_{ef}+2$	$1.0h_{ef}+2$	$1.0h_{ef}+2$	$1.0h_{ef}+2$	$1.0h_{ef}+2$	$1.0h_{ef}+2\ 1/4$	$1.0h_{ef}+2$
Recommended HILTI Rotary Hammer Drill			TE-5,15, 15M,25	TE-15M,25,55,75		TE-55, 75		TE-75	

For SI: 1 inch = 25.4mm, 1ft-lb = 1.4 Nm.

Curing Time Table (Approximate)



Approx. Curing Time	Base Material Temperature
20 Minutes	ABOVE 68° F/20° C
30 Minutes	50° F/10° C
1 Hour	32° F/0° C
5 Hour	23° F/-5° C

HILTI HVA ADHESIVE CAPSULE ANCHOR
OR APPROVED EQUAL

INSTALLATION INSTRUCTIONS:

1. SET THE DRILL DEPTH GAUGE AND DRILL A HOLE TO THE REQUIRED HOLE DEPTH. IMPORTANT: CLEAN OUT DUST AND DEBRIS. USE COMPRESSED AIR OR VACUUM AT BOTTOM OF THE HOLE. WHEN USING THE HILTI MATCHED TOLERANCE DIAMOND CORE BIT, IMMEDIATELY REMOVE STANDING WATER.
2. INSERT APPROPRIATE DIAMETER HVU ADHESIVE CAPSULE INTO PRE-DRILLED HOLE IN BASE MATERIAL. NOTE: THE BEST METHOD FOR SETTING MULTIPLE CAPSULES IS TO CRUSH THE FIRST CAPSULES(S) INTO THE HOLE AND THEN INSERT THE NEXT CAPSULE. DO NOT CUT OFF CAPSULES PARTIALLY PROTRUDING FROM THE HOLE.
3. CAPSULE LENGTH IS LONGER THAN STANDARD EMBED. DEPTH AND WILL PROTRUDE FROM THE HOLE.
4. THREAD A H.A.S. NUT ON THE H.A.S. ROD. PLACE A WASHER ON TOP OF THE FIRST NUT AND THEN THREAD A BLACK SETTING NUT DOWN ON TOP OF THE WASHER. TIGHTEN THE TWO NUTS TOGETHER "LOCKING" THE WASHER BETWEEN THEM. THE TOP NUT SHOULD BE FLUSH WITH THE TOP OF THE ROD.
5. INSERT A SQUARE DRIVE SHAFT INTO THE HAMMER DRILL AND ATTACH THE PROPER IMPACT SOCKET. AT THE ROTARY HAMMER DRILL SETTING, ENGAGE THE TOP NUT OF THE HAS ROD ASSEMBLY WITH THE SOCKET AND DRIVE THE ROD DOWN THROUGH THE CAPSULE(S). STOP DRILL ROTATION IMMEDIATELY UPON REACHING BOTTOM OF HOLE.
6. DO NOT DISTURB OR LOAD THE SET ANCHOR BEFORE THE SPECIFIED CURING TIME ELPASES.

GENERAL NOTES:

1. IN GENERAL, REINFORCING STEEL SHALL BE #4 BARS ON 12" CENTERS BOTH WAYS FOR GUTTER, BOTTOM SLAB ENDS, FRONT AND BACK WALLS, AND #4 BARS ON 6" CENTERS BOTH WAYS FOR TOP SLAB. AN ADDITIONAL #6 BAR SHALL BE PLACED IN THE FRONT EDGE OF THE TOP SLAB IN THE INLETS AND ADDITIONAL REINFORCING STEEL SHALL BE PLACED AROUND MANHOLES AS SHOWN.
2. ALL REINFORCING STEEL SHALL BE GRADE 60.
3. ALL CONCRETE STRUCTURES SHALL BE CLASS F (4200psi, MIN. 7.0 SACK CEMENT). ALL EXPOSED CORNERS SHALL BE CHAMFERED 3/4".
4. ALL REINFORCING STEEL SHALL HAVE A MINIMUM COVER OF 2" TO THE CENTERS OF THE BARS.
5. 10'-0" OF EXISTING CURB AND GUTTER UPSTREAM AND 10'-0" OF EXISTING CURB AND GUTTER DOWNSTREAM SHALL BE REMOVED AND REPOURED INTEGRALLY WITH EACH INLET.
6. ALL BACK FILLING SHALL BE PERFORMED BY MECHANICAL TAMPING TO 95% STANDARD PROCTOR DENSITY
7. NO FLY ASH IS ALLOWED IN CONCRETE STRUCTURES.

Engineering Plan Review Check List

Item Description
Administrative Items
Engineering Plan Submission Application with submittal checklist
Engineering-Plan Review Checklist
Four Complete Copies of Engineering Plans Initial Submittal; Three Complete Copies of Engineering Plans Re-Submittal; Two additional sets each submittal is proposed lift station.
Markups from Previous Submittals, if subsequent submittal
Annotated Review Comments, if applicable
Two copies of any Study or Report Completed in Support of the Project
Submission of Required Fire Flows Form to Fire Marshal
Submission of Fire Hydrant Flow Form to Fire Marshal
Floodplain Administrator Development Permit Application
Storm Drainage Management Plan
TxDOT preliminary letter of approval for Drive Approach Connections
TxDOT permits obtained
Franchised Utility Approval Obtained (specify)
Other Agency or Land Owner Approval Obtained (specify)
Corps of Engineers (COE) Wetland Permit Obtained (if applicable) or letter of determination
Federal Emergency Management Agency (FEMA) Letter of Map Revision (LOMR)
Other Agreements (explain)
Studies - If Required
Geotechnical Report
Federal Emergency Management Agency (FEMA) Letter of Map Revision (LOMR) Flood Study
Wetland Determination
Lift Station Report
Hydraulic Study Submitted
Water Study Submitted
Sanitary Sewer Capacity Study Submitted
Traffic Impact Analysis
Flood Study (100 year-fully developed) (Local or FEMA)
Sight Visibility Determination for easements
All Sheets
Sheet Size 24" x 36"
Title Block with Subdivision Name, Project Name and Sheet Description
Revision Block - Filled Out
North Arrow

City of Rockwall
The New Horizon

Item Description
Vertical and Horizontal Scale Listed and Accurate
Benchmarks Listed and Described
Legend of All Drawing Symbols and Line Types Used
Engineer's Seal, Signature and Date per Texas Engineering Practices Act
Responsibility Note Required on All Sheets except site plan and standard details: "ALL RESPONSIBILITY FOR ADEQUACY OF DESIGN REMAINS WITH THE DESIGN ENGINEER. THE CITY OF ROCKWALL, IN REVIEWING AND RELEASING PLANS FOR CONSTRUCTION, ASSUMES NO RESPONSIBILITY FOR ADEQUACY OR ACCURACY OF DESIGN."
Provide Key Map for Large Projects Showing Sheet Locations
Clear Drafting with Proper Line Weights for Ease of Reading
No Overlapping Text
Drafting at Adequate Scale to Obtain Ease of Reading and Scanning
Cover Sheet
Project Name
Official Plat Name as Assigned by the Planning and Zoning Department (including Block & Lot)
Official Project Address Assigned by the City Planning and Zoning Department
Mapsco Grid Reference
Month and Year of Probable Start of Project Construction
Revision Table
Engineer Contact Information (Name, Address, Phone Number, email address)
Owner Contact Information (Name, Address, Phone Number, email address)
Sheet Index - List ALL sheets included in plan set including details
Location Map with North Arrow
Side Bar - Plat Subdivision Name & Project Name
Title of type of sheet (i.e. Grading, Utility, Water,….)
Approved Site Plan
Approved Site Plan
Approved Landscape/Treescape Plan
Approved Landscape and Treescape Plan
Proposed Final Plat
Plat Included
Correct Plat Name
Plat Closure Calculations (Sealed by Registered Surveyor or Engineer)
GPS Grid Coordinates Shown for the Property Corners Properly Into City Monumentation System (x, y coordinates on 2 property corners)
Location map
Street Names with Right-of-Ways Widths Identified

City of Rockwall
The New Horizon

Item Description
Benchmark (if near drainage feature or flood zone)
Basis of bearing
Metes and Bounds of Tract
Adjacent Land Ownership Information
List Corners Found or Set
Property Pins Shown for tracts across ROW with verification of existing ROW Widths
Building Setback Lines Shown
Recording Volume and Page Information for all separate easements and ROW dedications within platted area or adjacent tracts
100-Year Floodplain for Fully Developed Conditions showing cross sections and elevations
Minimum Finished Floor Elevations Shown (if near drainage feature or flood zone)
Drainage & Drainage Maintenance Easements Shown and annotated
Required Utility Easements Shown (20' minimum width) and annotated
Access Easements Shown and annotated
ROW. Dedication Shown and annotated
ROW Corner Clips and annotated
All Existing easements (on-site) shown and annotated
Visibility Easements Shown and annotated
Surveyor Seal, Signature and Date
Demolition Plan
All existing topographic features including but not limited to: pavement, curbs sidewalks, barrier-free-ramps, light poles, driveways, storm sewer inlets, manholes, junction boxes headwalls retaining walls, fences , mailboxes landscape planters, trees, etc.
All wet utilities (water lines, wastewater lines and storm sewer) including sizes
All franchise utilities (electric, cable, communications, gas, etc.)
Pavement removals with full depth pavement sawcut locations
Water line, wastewater line and storm sewer removals
Dimensional Control & Paving Plan
Lot Boundary with Dimensions and Bearings
Street Names Shown
Existing ROW
ROW. Dedication and ROW Corner Clips Shown with Dimensions
Verification of public rights-of-way width ("variable width" is not acceptable) (When Required)
Visibility Easements Shown as Required by City Code
Building Setback Lines Shown
Dimensions (thickness, width, length, radius) for all paved areas (parking areas, driveways, fire lanes, turn lanes, drive aisles, sidewalks, etc)
Driveways Location, Spacing and Width Meet City Code and TxDOT Requirements

Item Description
Driveways- Width, Radius, Distance to Adjacent Drives, Alignment with other Drives Across Street Shown
Fire Lane - Width, Radius & Distance from Building Shown and Detailed including turn-arounds and dead-ends
All Pavement Thickness, Concrete Strength, Reinforcing, Subgrade Detailed Per City Requirements
Location of Fire Sprinkler Fire Department Connection (FDC) Shown
Location of Electrical Transformers Shown
Dumpster Location, Access and Construction Requirements Met and approved by Planning and Zoning Department (Backing Distance and Maneuver - Accessible by SU-30 Turning Template)
All Existing and Proposed Utility and Drainage Easements Shown
Existing and Required Access Easements Shown
Screening Wall Location, Foundation, Height, Start/End of Wall
Retaining Wall Location, Foundation, Height, Start/End of Wall
Existing and Required Sidewalks and Trails Shown with Dimensions
Show Location of Required ADA Ramps
Limits of 100-Year Ultimate Flood Plain Shown (FEMA and local)
Note Identifying Reference for 100-Year Floodplain and WSE Information with cross section with elevations
New/Relocating Left Turn Lane and/or deceleration lanes complies with City and TxDOT Requirements (Spacing, Length, Construction)
Existing and Proposed Infrastructure within Median Modifications Shown (Trees, Street Lights, Conduit, Irrigation, pavers, etc)
Street Lighting and Street Sign Plan
Roadway Paving Plan and Profile
Street Name and Cross Street Names
Block, Lot, and Address Labels
All existing and proposed easements
Dimensions labels of roadway width, ROW width, sidewalk widths, curb return radius, etc.
Show and label all storm sewer inlets with roadway stationing
Legend showing type of pavements, thickness, strength, reinforcing, etc.
Roadway centerline stationing every 100 ft, al labels for all Start, PC, PT, PI, PRC, etc.
Driveway centerline stationing location off roadway
Label Cross-slope (At cross-slope transitions the cross-slope shall be labeled every 25 ft and at critical design points)
Show and Label Proposed Profile station and elevation (All Slopes, VPI, PI, Vertical Curves, LP, HP, K, e, PC, PT,VPRC, etc.)
Show and Label Existing ground Centerline, Left ROW, Right ROW, and any other critical profiles
Show in Profile an Major Utility Crossing (Culverts, Water/Wastewater Transmission Lines, Gas Transmission Lines, Electric and Communication Duct Banks)
Existing and Proposed Ground lines elevation in profile every 50 ft
100-Year floodplain line and WSEL

City of Rockwall
The New Horizon

Item Description
Cross-Sections
Cross sections shall be provided for all Arterial and Collector Roadways
Cross-Sections shall be taken every 50 feet, driveway centerline, intersecting streets, and other critical points or features.
Include Existing and Proposed ROW lines
Existing Ground Line
Proposed Pavement thickness, and subgrade depths, and sidewalks
Proposed Slopes
Cross-sections at Driveways shall have all slope and VC Labeled
Grading Plan
Benchmarks
Exist Lot Lines & Corners (lot lines screened if being changed)
Proposed Lot Lines
Existing (screened) & Proposed ROW
Street Names Shown
Drainage Easements for Drainage Features and Structures Shown
Existing & Proposed Improvements (paving and building footprints)
Minimum Finished Floor (FF) Elevations for Structures meet Requirements of Drainage Ordinance
Minimum Finished Floor (FF) Elevation Shown for each Structure
Existing & Proposed Contours for Site and Minimum of 50' Beyond Property Lines (with appropriate contour interval) with all ponds and waterways labeled
Existing & Proposed Spot Elev. Showing Grade; High & Low Points; Swales, Inverts & Ridges with Flow Arrows
Label Lot Area and Disturbed Land Area
Adjacent Property Improvements Within Minimum 25' of site
Existing & Proposed On-site and Off-site Drainage Features (Design Info Shown)
Maximum Cross Slope 4H:1V (H=Horizontal, V=Vertical) Min Running Slope 1% for unpaved areas
Ditches Adjacent to Site Cleared, Cleaned & Regraded (only with permission from property owner)
Positive Overflow Routes with elevations (All public roads that have a sag require an overflow route)
Lot grading to be above street elevation (Residential Only)
Limits of 100-Year Ultimate Floodplain Shown
Ultimate (Fully Developed) 100-Year Floodplain Water Surface Elevations (WSE's) shown on cross sections
Note Identifying Reference for 100-Year Floodplain and WSE Information
Cross sections to scale with hydraulic calculations
Location of Cross-Sections With Stationing Shown
Cut or Fill Areas shown on Cross-Sections

Item Description
Existing and Proposed Retaining Walls with Top & Bottom Spot Elevations and calculations as required
No Residential Cross Lot Drainage
Grading Plan Matches Drainage Area Map
Does Grading Plan Address Impacts to Adjacent Properties Requiring Easements or Letters of Permission
All Detention Areas with Flumes with Elevations and Side Slopes Labeled
Retaining Wall Plan and Profiles
Label Beginning and Ending of Wall
Label Top of Wall, Bottom of Wall, Bottom of Footing
Railing type and limits
Detailed Structural Sections for each differing section type
Flume locations shown in plan and sections (no water allowed to overtop retaining walls)
Show locations of all Water, Sanitary Sewer, Storm Sewer, Franchise Utility Crossings in Plan
Show locations of all Water, Sanitary Sewer, Storm Sewer, Franchise Utility Crossings in Profile along with elevations
Profile Existing Natural Ground Line, Proposed Ground Line at Bottom and Top of Wall
Drainage Area Map
Existing Drainage Area Map (Pre-Project Conditions), Proposed Drainage Area Map (Current proposed phase of development conditions) and Ultimate Drainage Area Map (Built-out conditions of development)
Storm Drainage Analysis and design shall comply with the Drainage Ordinance and the Flood Hazard Damage Prevention and Control Ordinance.
Existing and Proposed Drainage System and Structures Shown (pipe, inlets, etc)
Current Zoning or Anticipated Ultimate Development Shown and Correct For Off-Site Areas
Ensure Site Drainage is Collected on Site
Design for a Ultimate (Fully Developed) 100 Year Storm Event
Design showing Elevation Contours for the Entire Off-Site Drainage Basin and 50' beyond Property
Design with most recent surveyed Contour Information
Drainage Area Map shows Subbasins For Each Collection Point and Inlet
Each Drainage Area has ID, Q100, Acres and Direction of Flow to the Outfall Shown
Each Outfall labeled with an Identification, direction of flow and Total Flow
Drainage Direction Arrows for Both On-site and Off-site Drainage Basins
Indicate all Sags and Crests With Flow Arrows
City Standard Drainage Area Map Calculation Table for Current and Future Conditions With Outfall Summary Included
I - Values Meet City Requirements
C - Values Meet City Requirements (based on Zoning)
Time of Concentration Values Used Meet City Requirements
Q - Calculated Flow in cfs

Item Description
Provide a Subtotal for each Major Drainage Line
Drainage Area Map & Calculations for all Offsite Drainage
Limits of 100-Year Ultimate Floodplain Shown
Ultimate (Fully Developed) 100-Year Floodplain Water Surface Elevations (WSE's) shown (FEMA and local)
Note Identifying Reference for 100 Year Floodplain and WSE Information (FEMA and local)
Show Limits of Each Plan Sheet (Tile)
Show Detention
Show Existing Drainage Areas (lighter line type)
Label where each drainage area drains (inlet number, swale, etc.)
Storm Drainage Plans and Profiles *(Storm Drainage Structures including Pipe, Inlets, Etc.)*
Benchmark Location and Elevation
Flood Study / FEMA FIRM Map Reference Information Listed by Note
Storm Sewer Alignment Logical, Sharp Bends Eliminated
Collecting On-Site Drainage with Storm Sewer/Inlets
Profile Given for all Storm Sewer Mains and Laterals (shall be along the centerline of pipe)
Pipe Size, Material and Class Identified on Plan and Profile
Hydraulic Grade Line Shown on all Storm Sewer Profiles for Mains/Laterals, in both full and partial flow conduit conditions
Hydraulic Grade Line Elevations labeled on Storm Sewer Profiles at every change in flow, change in pipe size, horizontal bend, vertical bend, wye, manhole, inlet, headwall, etc.
Other Hydraulic Info Shown on Storm Sewer Profiles for all Mains/Laterals (Q100, Qcap, Velocity, V2/2g) on every conduit section between every junction and/or increase in flow
Vertical and Horizontal Alignment and Slope Shown for all Mains/Laterals on Plan and Profile
Hydraulic Grade Line Meets City Design Requirements
Starting Hydraulic Grade Line Calculations/Assumptions Listed
Starting Hydraulic Grade Line Meets City Design Requirements
Pipe Velocity Within Ordinance Requirements and Limitations
Elevation Information on Plan View (Flowlines, Top-of-Curb, Hgl or 100 yr water surface (partial flow) at every inlet, etc) Matches Profile View
Show Crossings of Existing and Proposed Water and Sanitary Sewer on Storm Sewer Profile
Note minimum Cover for Pipes and Culverts
Drainage System Reviewed for Constructability - Depth and Clearance From Streets, Structures, Other Utilities (dimensions)
Inlet Capacity Calculations Provided In City Standard Tabular Form
Inlets Placed to Capture Runoff Before It Enters Street or Major Thoroughfare
Storm Sewer Calculations Provided In City Standard Tabular Form
If Street Drainage, Calculations Showing Curb & Street Capacity
If Street Drainage, Show Nearest Inlet & all Upstream Drainage
Inlet Construction Layout Information Shown (Top of Curb, Flowline, Throat Elevation, Type, Size, Hgl, Q100, Etc)

Item Description
Storm Sewer Inlet Location, Size, Type, and Construction Detail Per City Requirements
Storm Sewer Manhole Location, Size, Type, and Construction Detail Per City Requirements
Outfall, Headwall, and Other Structure Location, Type, Velocity and Erosion/Scouring Protection Per City Standards
Positive Overflow Route Through Site with grades
Sag Points Identified and Paved Positive Overflow Designed
Outfall/Headwall Locations No Greater Than 1' Above Creek Flowline and Pointed Down Stream
Outfalls Discharge into Existing Drainage Features or Provide Easements as Required
Outfall Velocity Meets City Requirements
Outfall Protection / Energy Dissipation When Required
Appropriate Details are Included for Structures, Junction Boxes, Headwalls and Inlets (if different than NCTCOG 4th Ed. or City details)
Connection Details Provided for Non-Standard Connections
Limits of 100-Year Ultimate Floodplain Shown (FEMA and local)
Ultimate (Fully Developed) 100-Year Floodplain Water Surface Elevations (WSE's) shown (FEMA and local)
Note Identifying Reference for 100 Year Floodplain and WSE Information
Drainage Easements for Drainage Features and Structures Shown (15' minimum width)
Storm Drainage Plans and Profiles *(Ditches, Swales, and Open Channels)*
Direction of Flow Indicated for Ditches, Swales and Open Channels
Ditches, Swales and Open Channels have 100 year Ultimate Water Surface Shown on Profile (min 1% Running Slope)
Ditches, Swales and Open Channels have 100 year Ultimate Water Surface Shown on Cross Sections
Ditches, Swales and Open Channels Armored with Approved Material in Areas Where Average & Localized Velocities are Above 6 fps
Ditches, Swales and Open Channels can Carry 100-year Ultimate Storm with required Freeboard
Ditches, Swales and Open Channels Hydraulic Information Shown On Plans
Ditches, Swales and Open Channels Hydraulic Information Shown On Plans Matches Hydraulic Report or Flood Study Submitted
Ditches, Swales and Open Channels Side Slopes Less Than 4H:1V for Grassed/Un-Armored Sections
Ditch, Swale and Open Channel Width, Depth, Running and Side Slopes and Capacity Per City Requirements
Drainage Easements for Drainage Features and Structures Shown
Storm Drainage Plans *(Detention and Ponds)*
Required Detention Shown
Detention Calculation Shown and Correct
Outfall discharge curves for required storm events
Detention/Retention Pond Location, Size, Depth, Capacity, and Material Per City Requirements, 100 year Water Surface Elevations
Provide Access and Structures that Contribute to Long Term Maintenance of Detention Pond

Item Description
Drainage Easements for Drainage Features and Structures Shown (15' minimum width)
Provide chart showing flow allowable vs. flow actual for Q_5, Q_{10}, Q_{25}, and Q_{100}
Utility Plans *(Water & Wastewater)*
Water
Water Main Sized In Compliance with Water System Master Plan
Water Mains Provided to Front Property Along all Street Frontages or Otherwise Extended to Serve Adjacent Properties
Water Main Extension Required By Code Shown
Water Mains Looped to Provide Circulating and Redundant Feed
Water Main Size, Material and Class Called Out
Existing Water Mains and Valves Shown; Show Valves on both sides of Tap in Case Area Needs to be Isolated
Existing & Proposed Fire Hydrants Shown
Utility Easements for Water Mains Shown
Proposed and Existing Fire Lanes Shown
Fire Hydrant Spacing Meets Requirements of Adopted International Fire Code (IFC)
Fire Sprinkler Fire Department Connection (FDC) Location Shown
Water Main Fittings, Valves, etc Identified
Water Mains 16" and Larger Profiled
All Water Main Bores Profiled
All Crossings Identified on Appropriate Profile
Bore complies with Bore and Utility Crossing General Design Standards and TxDOT Standards if in TxDOT ROW
Existing Water Meters Shown
Proposed Water Meters Shown (Both Domestic and Irrigation)
Domestic and Irrigation Water Meters on Looped/Circulating Main
All Water Meters on Separate Service - No Water Meter "Bullheads" or Manifolds Allowed
Water Meters Location, Preferred to be in Unpaved Area
Water Meter Sizes Identified
Appropriate Double Check/Backflow Prevention Shown on Private Side of All Meters
Water System Reviewed for Constructability and Maintenance - Depth and Clearance From Streets, Structures, Other Utilities (Dimensions)
Water Mains Identified as Either Public or Private with Lines of Demarcation
Utility Crossings Shown in All Profiles and Bore Profiles including Franchise Utilities and Street Light Utilities
If Fire Sprinkler Line is Shown, Add Note to Plans to Indicated the Requirement for Separate Permit from the Fire Department and label min 10-foot separation distance from all other utilities
Wastewater
Wastewater Mains Provided to Front Property or Otherwise Extended to Serve Upstream Property
Existing Wastewater Mains, Manholes, Cleanouts and Services Shown

Item Description
Proposed Wastewater Mains, Manholes, Cleanouts and Services Shown
Sanitary Sewer Mains Profiled along centerline of pipe
Bore complies with Bore and Utility Crossing General Design Standards and TxDOT Standards if in TxDOT ROW
Wastewater Main Size, Material and Class Identified on Plan and Profile
Wastewater Main Depth, Slope, Service Locations, Cleanouts and Manholes shown in all Profiles
Wastewater Rim, Flow Line In & Flow Line Out Elevations for All Manholes (min 2% drop between manhole flow-in and flow-out)
Utility Crossings Shown in All Profiles and Bore Profiles including Franchise Utilities and Street Light Utilities
Wastewater System Reviewed for Constructability and Maintainability - Depth and Clearance From Streets, Structures, Other Utilities (Dimensions)
All Existing and Proposed Public and Private Easements and Rights of Way Shown
Wastewater Mains Identified as Either Public or Private with Lines of Demarcation and Private Utility Note
Private Utility Note: "ALL WASTEWATER WORK DESIGNATED AS “PRIVATE” IN THIS SET OF PLANS SHALL BE INSTALLED IN ACCORDANCE WITH THE INTERNATIONAL PLUMBING CODE, PERMITTED AND INSPECTED BY THE CITY BUILDING INSPECTION DEPARTMENT AND INSTALLED BY A LICENSED PLUMBER."
Lift Station
Lift Station Report
Dimension and Site Plans
Grading Plan
Force Main Plan and Profile
Landscape Plan
Electrical and Control Plans
Detail Sheets
Erosion Control *(For Sites Greater 1- Acre or Larger)* / SWP3 *(If Required by TCEQ Regulations)*
Owners Name , Address & Phone No.
Developers Name Address & Phone No.
Engineers Name Address & Phone No.
Site Acreage Listed
Disturbed Acreage Listed (Acres)
Limits of Construction and Disturbed Areas Shown
Existing Ground Contours, Drainage Features and Structures
100-Yr Flood Plain with Elevations (FEMA and local)
Limits of Trees/Shrubs to Remain
Grades to Match Grading Plan
Proposed Storm Drainage, Structures & Pavement
Borrow & Spoil Area Identified

Item Description
BMP Locations, details, Calculations, and Maintenance Schedule
Sediment Basin, required if disturbed area greater than 10 acres
Standard Details
All Standard Details that are required for construction from Standard Specifications for Public Works Construction, North Central Texas, Fifth Edition, or the City of Rockwall Standards of Design and Construction shall be included in all plan sets.
TXDOT Details
Include all Pertinent Details called out in plans

City of Rockwall
The New Horizon

APPENDIX B – Approved Water Materials List

City of Rockwall
The New Horizon

Approved Water Materials List

All materials on this list do not require separate submittals. All materials must be new and in good condition.

Fire Hydrants

- Mueller "Super Centurion 250-A423"
- American Darling "B-84B-5"
- Waterous "Pacer WB67"
- Clow "Medallion"
- M&H "Model 129 & 929"
- WaterMaster 5CD250

Valves (all bolts, nuts and washers for valves to be type 316 stainless steel)

- Mueller Resilient Seat
- Mueller Resilient Wedge
- Mueller Butterfly
- American Darling Resilient Wedge
- American Darling Butterfly
- U.S. Pipe & Foundry "Metro-Seal" Resilient Wedge
- American Flow Control – Series 2500 Resilient Wedge Valve
- Clow Resilient Wedge
- Pratt Butterfly
- American AVK Resilient Seated Gate Valve Series 25, 4"-12"

Valves – Air Release / Combination Air & Vacuum

- Vent-O-Mat 025 RBX 2521 – 1"
- Vent-O-Mat 050 RBX 2521 – 2"

Tapping Sleeves and Valves (all bolts, nuts and washers to be type 316 stainless steel)

- All require ¾" NPT brass test plug.

Sleeves (all bolts, nuts and washers to be type 316 stainless steel)

- Mueller H-304 Stainless Steel Tapping Sleeve w/Stainless Steel Flange
- Tyler Traverse Tapping Sleeve
- Clow Traverse Tapping Sleeve
- Dresser Style 630 Heavy Stainless Steel Tapping Sleeve
- PowerSeal Model 3490 Stainless Steel Tapping Sleeve
- Ford All Stainless Tapping Sleeve Style FTSS
- Ford All Stainless Tapping Sleeve Style FTSS-MJ
- Smith-Blair 665 Stainless Steel Tapping Sleeve with Stainless Steel Flange
  Smith-Blair 665MJ Stainless Steel Tapping Sleeve with Stainless Steel Flange
  Romac Industries, SST III

Service Saddles

Service Saddles (for PVC, DI or CI)				
Size/Manufacturer	Mueller	Jones	Ford	A.Y. McDonald
¾-inch, 2 Strap	BR-2B, BR-2S	J-979, J-969	202B, 202BS	3825, 3845
1-inch, 2 Strap	BR-2B, BR-2S	J-979, J-969	202B, 202BS	3825, 3845
1 ½ -inch, 2 Strap	BR-2B, BR-2S	J-979, J-969	202B, 202BS	3825, 3845
2-inch, 2 Strap	BR-2B, BR-2S	J-979, J-969	202B, 202BS	3825, 3845

All of the above service saddles are to be cc thread. Saddles must be supplied with stainless steel bolt/nut/washer, with the exception of a double strap bronze saddle.

Restraint (Retainer) Glands (all bolts, nuts and washers to be type 316 stainless steel)

- Uni-Flange Series 1400 for 4" thru 12" (Ductile Iron)
- Uni-Flange Series 1500 for 4" thru 12" (C900 PVC)
- EBAA Iron 1100 Series Megalug (Ductile Iron)
- EBAA Iron 2000PV Series Megalug (C900 PVC)
- Stargrip Series 4000 (C900 PVC)
- Stargrip Series 3000 (Ductile Iron)
- Sigma – One Lok (C900/905 PVC)
- Tyler Union Field Lock (Ductile Iron)
- Tyler Union Tufgrip 1000 (Ductile Iron)
- Tyler Union Tufgrip 2000 (PVC)

Restraint (Internal Joint Restrained) (all bolts, nuts and washers to be type 316 stainless steel)

- Eagle LOC 900 for 4" thru 12" C900 DR14 PVC Pipe
- Diamond Lok-21 for 4" thru 12" C900 DR14 PVC Pipe

Corporation Valve (Stops)

Corporation Valves				
Size/Manufacturer	Mueller	Jones	Ford	A.Y. McDonald
¾-inch	B-25008	J-1937-SG	FB-1000-3-Q	4701BQ

2-inch	B-24276	J-1975W-SG	BFA43-777-WQ	4602BQ 2

Ductile Iron Fittings (Compact Only -C153)

- American Pipe
- Tyler Pipe Products
- Clow Products
- Star Pipe Products (tees, bends & anchor nipples)
- Sigma/Nappco Products (tees, bends & anchor nipples)
- Griffin Pipe Products

Valve Stacks and Boxes

- Bass & Hays adjustable valve box Model No. 2436S

Fire Hydrant Paint

Main Size	Color	Paint
6”	Silver – Top & Bottom	Sherwin Williams Silver-Brite Heavy Duty Rust Resistant Aluminum Paint B59S11
8”	Safety Blue Top – Aluminum Bottom	Sherwin Williams Heavy Duty Rust Resistant Aluminum Paint-Safety Blue B54T104
10” or larger	Yellow Top – Aluminum Bottom	Sherwin Williams Heavy Duty Rust Resistant Aluminum Paint-Safety Yellow B54Y37

Meter Boxes

< 1 inch Service	DFW1814F-1BA DFW Plastics, Inc Not Traffic Rated
1-1/2-inch, 2-inch Service	DFW2818F-1BA DFW Plastics, Inc Not Traffic Rated
Traffic Rated Meter Box	DFW65C-14-10BA DFW65C-1BA - Can DFW65C-Overlay-Lid DFW Plastics
Lids	DFW 18-AMRL-lid E Series

City of Rockwall
The New Horizon

APPENDIX C – Approved Wastewater Materials List

City of Rockwall
The New Horizon

Approved Wastewater Materials List

Note: All specified materials on this list do not require separate submittals. All materials must be new and in good condition.

Wastewater Main and Service Pipe (Gravity Flow Only)

- ASTM D3034 SDR-35 PVC 4" to 15" Diameter (Green in color)
- ASTM D3034 SDR-26 PVC 18" to 30" Diameter and for any wastewater installed 10' and deeper (Green in color)
- ASTM D3262 Fiberglass Sewer Pipe 18" to 54" and ASTM 4161 Fiberglass Fittings (must submit thickness design for wall thickness calculations) Approved Manufactures for Fiberglass Pipe and fitting are Hobas Pipe, US Composite Pipe South and Ameron International.

Manhole Pipe Connectors

- Link-Seal
- A-LOC
- KOR-N-SEAL – 306 Series By National Pollution Control Systems Inc.
- PS (Press-Seal) – PSX: Direct Drive

Wastewater Manhole Lids and Rings

- Pamrex with Lock
- East Jordan Iron Works 30" ERGO XL with Camlock Security closing device, MPIC Pick slot, elastomer T-Gasket in lid and infiltration plugs at the hinges. – Product No. 00148026L01
- East Jordan Iron Works 24" ERGO with Camlock Security closing device, MPIC Pick slot, elastomer T-Gasket in lid and infiltration plugs at the hinges – Product No. NPR10-1213A (for retrofit work only).

Manhole Coatings (No dark colors allowed)

- Raven 405 (125 mils thick)-light blue colored only
- ConShield-terra cotta colored only (must be spark tested per NACE International Standard)

Geotextile Material (installed under precast manholes)

- Mirafi 140N
- Geotex 401

Manhole Grade Rings

- HDPE Adjustment Rings by Ladtech Inc.
- ARPRO Expanded Polypropylene, ASTM D3575, by Cretex Seals
- East Jordan Iron Works Infra-Riser.

Pre-Cast Manhole Gaskets

- Hanson – CR 097
- Hydroconduit – Profile

Manhole Chimney Seals and Ring & Cover Sealing Systems

- Cretex with stainless steel self locking bands. (interior & exterior)
- Riser Wrap by PSI

Manhole Drop Bowl

- Reliner / Duran Inc., Inside Drop Bowl with Stainless Steel anchor assemblies
- Approved Equal

Cleanout

- Bass & Hays 404 Lateral Cleanout with lid and gasket
- Bass & Hays 339 Wastewater Cleanout Boot

Double Cleanout Meter Box

- Bass & Hays 3-LID2 (Sewer)
- Approved Equal

Threaded Anchor

- Hilti – KB3-SS304 5/8" anchor bolts or equal
- Stainless Steel all thread 5/8" (embedded min 4-1/2" into cone with a epoxy or Wedge-it)
- Simpson Strong Tie – Strong-Bolt 5/8"

Force Main Pipe

- AWWA C-905 pipe, green colored

Air Release Valve

- Vent-O-Mat Anti-Shock Air Release and Vacuum Break Valves
- Approved Equal

Isolation Gate Valve

- American-Series 2500 2"-12" Resilient Wedge Gate Valves with Flanged Ends
- Approved Equal

All exposed Stainless Steel Bolts and Nuts must be coated with approved anti-seize compound: Permatex Nickel Anti-Seize or approved equal.

Materials not on this list will need to be submitted for review

City of Rockwall
The New Horizon

APPENDIX D – Example Checklist for Final Acceptance (Residential and Commercial)

City of Rockwall
The New Horizon

EXAMPLE – CHECKLIST FOR FINAL ACCEPTANCE (RESIDENTIAL)

(DATE)

(ENGINEER'S NAME)
(ENGINEERING COMPANY)
(ADDRESS)
(CITY, TX ZIP)

Re. *(PROJECT NAME)* – Checklist for final acceptance

Dear *(ENGINEER'S NAME)*,

The following items are to be completed at the above mentioned site to bring the project into compliance with City specifications and to meet specific project requirements. The listed items are items identified during the walkover of the site and are to be addressed prior to final acceptance of the project. The City will conduct daily site visits (during daily rounds) at the project until completion of the noted items. A copy of this list will also be directed to the developer/owner and general contractor. The below listed items are to be directed to the appropriate responsible parties for completion.

-Required Documentation-

1. The City of Rockwall requires that the design engineer provide a letter of concurrence. The letter is to verify that the drainage flow patterns, grade to drain locations, pad elevations, and drainage structures, including the volume of the surface and/or subsurface detention system and detention outlet structure located at the project were installed to the general elevations as shown on the approved plans. The letter shall also verify that the project was constructed to meet the approved design requirements or is within acceptable design tolerances. **The Design Engineer or his designated representative shall direct all "survey-work"** necessary to **verify** elevations and design compliance. The letter of concurrence is to have the **seal and signature** of the design engineer.

Example of Letter of Concurrence verbiage which will not be accepted by the City:

"A representative of this company visited the site and has visually verified to the best of the engineer's professional opinion, knowledge and belief, the final grading and site drainage comply with the City approved plans and details".

Example of Letter of Concurrence verbiage which will be accepted by the City:

"A representative of this company visited the site and has visually verified to the best of the engineer's professional opinion, knowledge and belief, that based on my observations along with survey work conducted at the site, the final grading, site drainage, and detention outfall with required volume comply with the City approved plans and details".

2. The Design Engineer shall furnish a digital file of the project formatted in Auto Cad 14, or 2000 format or newer **and** Adobe Acrobat (pdf.) format with a CD-ROM. The disk shall include a full set of plans along with any landscaping, wall plans, and details sheets.

- Submit 1-set of blue line drawings of the "Record Drawings" containing copies of all sheets. The blue line copy will be reviewed by the construction inspector **PRIOR** to producing the "Record Drawing" disk. This will allow any revisions to be addressed prior to producing the disk.

Record Drawing Disk drawings shall have the Design Engineers seal, signature and must be stamped and dated as "Record Drawings" or "As Built Drawings" on all sheets.

The City of Rockwall will not accept any Record Drawing disk drawings which include a disclaimer with the like or similar verbiage. A disclaimer shall not directly or indirectly state or indicate that the design engineer or the design engineers, surveyor/surveyors did not verify or grades after construction, or that the Record Drawings were based solely on information provided by the construction contractor/contractors. Any Record Drawings which include like or similar disclaimer verbiage will not be accepted by the City of Rockwall.

Example of Acceptable Disclaimer:

To the best of our knowledge Smith Engineering, Inc., hereby states that this plan is As-Built. This information provided is based on surveying at the site and information provided by the contractor.

3. 4% Engineering Inspection Fee (Final As-Built Adjustments) – Prior to the start of construction at the project, engineering inspection fees for the project were established. The preliminary inspection fee amounts were based upon the projected contract quantity and unit price amounts which were submitted to the City. A fee based on 4% of the projected quantity cost was paid to the City. The final fee amounts are to be adjusted if necessary to match the unit quantity and unit price amounts based on the as-built contract unit quantity amounts. Please provide a copy of the as-built quantity amounts with total amounts for each item. The as built amounts should be noted or stamped as "as-built contract quantity and unit price amounts". The engineering inspection fee charged by the City will be adjusted to match these amounts if necessary. The City is to receive payment on the adjusted cost amounts prior to project acceptance. As-built contract **unit quantity and unit price** amounts for the pavement, drive approaches, sidewalks, barrier free ramps, wastewater, storm sewer, drainage structures (including underground detention), water lines, along with all associated fixtures which are located within the defined right-of-ways and easements of the project.

4. All weekday and weekend overtime engineering inspections fees are to be paid.

5. Flood study review fees to be paid if there is an excess due over the initial review fee. If all of the initial fees were not utilized for the flood study review, those monies will be refunded.

6. Gas and Electric facilities are to be installed at the site and be ready to provide service to each lot. A letter of installation verification and operation will be required from electric and gas project managers and will need to be directed to the City of Rockwall prior to project acceptance or any early lot releases. The letter may be from the above noted parties or their designated representatives.

7. Storm Sewer Outfall Coordinates - It is now necessary to tie down all the storm sewer outfall pipes to our state plane Coordinate System. The design engineer will be required to provide the following coordinate information which is to be submitted in letterform showing the x, y, and z coordinates at the end of all storm sewer outfalls of the project.

8. The City of Rockwall – Elevation Survey Monuments which are to be installed at the project shall be tied to the City of Rockwall monument coordinates both horizontally and vertically. The information shall be transferred to the City of Rockwall. **Elevations and monument locations are to be shown on the as built mylars on both the paving plans and the storm sewer plans and shall also be submitted to the City in letter-form.** The monuments are to be supplied by the City of Rockwall and installed by the utility contractor. The monument locations are as follows:

   A. *(LOCATION)*
   B. *(LOCATION)*

9. Right-of-way Compaction and Density Reports – Final grade densities are to be conducted at approximately each 500 – foot intervals on both sides of each street in the general fill areas of the right-of-ways. Full Depth trench densities are to be taken at all utility trenching locations where trenching operations consisted of cutting trench 10-inches wide or wider. All final grade right-of-way and easement compaction density tests are to be a minimum of 95% of the standard proctor density. Copies of the compaction tests performed for the developer's contractors as well as by the franchise utility company's contractors shall be provided to the City prior to project acceptance.

10. Maintenance bonds are to be submitted to the City of Rockwall for the paving and utilities installed at the project. The bonds shall be **two-year** 10% maintenance bonds to cover maintenance, for a two-year timeline starting from the **"Date of City of Rockwall's Acceptance"** for the project. There is to be no date in the starting timeline only the above wording.

    A. The utility bond shall cover the following utility systems and their associated fixtures.

       - Water
       - Wastewater
       - Storm sewer (including detention systems)

    B. The paving bond shall cover the following:

       - Street Pavement.
       - Driveway Approaches
       - Side walks.
       - Barrier free ramps.

11. Engineered Retaining Wall Inspection & Letter of Concurrence – The City requires the design engineer for any retaining wall which is three-feet in height or taller, to periodically inspect, or make arrangements for his designated representative to periodically inspect the retaining wall/walls during the construction process. The design engineer is to submit letter of concurrence for the retaining wall/walls to the City prior to project acceptance. The letter shall contain the **seal and signature** of the retaining wall design engineer.

12. City Council approved and owner signed final/replat plat mylars and tax certificates to be submitted to Planning Department for filing.

- Site Items -

1. Site Working Hours and Noise Control Signage **- Ordinance No. 05-45 –** signs are to be placed at all

entrances, which provides an access entry way into the subdivision. The signs are to note allowed hours of construction as mandated by the City Ordinance. The signs must be installed prior to project acceptance or prior to the start of any early lot release construction. The signs may be placed in the City right-of-way provided that it is not placed within the 30-feet visibility easement clips, which are located at all street intersections. Each posted sign shall contain the following ordinance work-hours information and contain both the English and the Spanish version of the ordinance. The face of the sign shall be a minimum of 4-feet wide by 3-feet tall with the sign post being approximately 4-feet tall when measured from the top of the ground to the bottom of the sign face. The maximum height of the sign shall not exceed a height of 7-feet, 6 inches when measured from the top of the ground to the top of the sign. The sign face shall consist of a white background with blue or black lettering. The letters shall be of sufficient size so as to be readily visible to all vehicular traffic entering the subdivision.

City of Rockwall - Ordinance

Ordinance # 05-45
Construction Site Working Hours and Noise Control

City Ordinance – No. 05-45 limits construction and construction related activities to the hours of 7:00 a.m. - 7:00 p.m. Monday through Friday, and 8:00 a.m. - 7:00 p.m. on Saturday. (No Sunday construction allowed).

ORDENANZA # 05-45
HORAS DE TRABAJO EN EL SITIO DE CONSTRUCCION Y EL CONTROL DE RUIDO

La Ordenanza de la Ciudad – No. 05-45 limita la construcción y las actividades relacionadas con la construcción a las horas de 7:00 a.m. – 7:00 p.m. de Lunes a Viernes, y de 8:00 a.m. – 7:00 p.m. los Sábados. (No se permitirá construcción los Domingo).

(Sign size to be approximately 4-feet wide x 3-feet tall)

2. The maximum slope allowed by the City will be a 4:1 slope, however this slope will only be allowed when it is not possible or feasible to achieve a slope of 4:1 or less. Retaining walls or other City approved retaining methods will be required where it is not possible or feasible to comply with the 4:1 maximum slope requirement. All slopes are to be compacted to 95% of the standard proctor density.

3. Install floodway monument markers. The City will furnish the marker cap, which is to be set in concrete as directed by the City of Rockwall. The developers designated representative shall install the marker prior to project acceptance. Monument installation shall meet City of Rockwall specifications.

   A. **The monument marker location is to be shown on the Record Drawing Mylar's on the grading plan.**

B. The City of Rockwall will furnish the marker cap.

C. Install "No Dumping, Drains to Waterway" inlet markers to be installed on each inlet by the developer

4. Street Address Marker Blocks – shall be painted on the curbs in the center of each lot and comply with the City of Rockwall specifications. The street address markers are to be installed at each lot in the subdivision. The markers shall be located at the center of the lot on the face of the street curb. The address markers shall have a Forest green background with **reflective** white numbers. The number size shall be four-inches in height. The background of the address marker shall be eighteen-inches in length and be located from the top of the curb to the gutter flow line. The address marks shall show the full numerical portion of the address of the lot.

5. Interior Erosion Protection – install reinforced silt fencing which complies with (NCTCOG) standard drawing (1020A) Third Addition. Silt fencing is to be installed at the back of the street pavement curbs and at 1-foot off the outside pavement edge of the alleys. The silt fence should contain the entire perimeter of the disturbed lot areas.

6. When installing the silt fence at the street (back of curb) and alley (edge of paving) locations take care to address the following issues:

   A. Allow for a clearance radius of 5-feet around each hydrant.

   B. Block the silt fence around and to the backside of each water meter.

   C. When placing the silt fence at an alley intersection be sure to transition the silt fence to allow a turning radius for vehicles.

   D. Do place the silt fence within the sight visibility easements which are located at the street and alley intersections.

7. Maintain existing or install additional construction site erosion BMP's as necessary, to stabilize the disturbed soil or contain silt migration.

8. All street and alley parkways and right-of-way locations are to be graded so as to obtain a 2% grade (1/4-inch per foot) slope. All parkways and right-of-way locations are to have positive drainage flow towards the street or alley to the right-of-way. The transitional grading from the right-of-way to the existing natural grade is to match the approved grading plans.

9. Final Site Grading – all grading is to be completed and verified to meet the approved grading plans. All graded areas including slopes are to be brought to a final grade surface that is smooth and uniform being relatively free of erosion washouts, tire ruts, dirt clods, silt deposits, etc, care should be taken to re-grade any rough surface areas prior to the application of grass seed, sod or erosion matting.

10. Remove and dispose any miscellaneous construction related debris, trash rocks etc from the job-site and properly dispose.

11. Rout and seal all miscellaneous random cracks which are located in the street and alley locations.

12. Provide the construction inspector with electronic copies of all testing reports for the project. These

shall include but not be limited to soils reports, utility densities, utility videos along with supporting documents, subgrade test reports and all concrete related reports for utilities and paving.

13. Conduct a video survey of the public sanitary and storm lines to the construction inspector assigned to the project. Videos shall be taken after the franchise utilities on the project have been completed.

14. Complete the installation of all barrier free ramps.

15. Construct all sidewalks that are located in the common open areas.

16. Clean and sweep all roadways to remove all of the dirt and debris that has accumulated during construction.

17. Random Pavement Depth Checks – random depth core test are to be conducted at various street and alley locations, as directed by the engineering inspector. The location of the test and the number of test necessary will be left to the discretion of the engineering inspector.

18. Complete the landscaping per the approved landscaping plans.

19. Fire hydrants are required to have a nozzle height of 19-inches to 28-inches above the final grade elevation. Hydrant nozzles that do not meet this specification are to be raised or lowered as necessary to obtain compliance.

20. All fire hydrants are to have a clearance radius of 5-feet in all directions. No structures, traffic bollards, silt fencing, landscaping etc, are to be placed within the clearance area.

21. Paint all fire hydrants located at the site to City specifications. A minimum of two coats of aluminum paint, Mobile 11-A-19 or Tnemec 2-color Tnemec-Gloss or approved equal are to be applied to each hydrant. The fire hydrant body shall be painted silver. The hydrant nozzle and bonnet are to be painted to comply with the following line size color code. The color indicating the line size shall be as follows:

    A. Solid silver for 6-inch water mains.

    B. Blue for 8-inch lines water mains.

    C. Yellow for 10-inch water mains and above.

22. Water Valve and Waste Water Manhole Curb Cut Marks – The pavement curbs are to be marked at all water valve and waste water manhole locations. The curb cut marks are to be sawn into the pavement curb. The curb cut marks are to consist of the following :

    A. Valves – place a (V) mark on the curb to note the valve locations, (blue paint for general, white paint for stub outs or dead ends, and red paint for fire hydrants and or fire lines).

    B. Manholes – place a (M-H) mark on the pavement curb to indicate manhole locations (green paint).

    C. Curb stops – place a (I) mark on the pavement curb to indicate curb stop locations (blue paint).

City of Rockwall
The New Horizon

D. Cleanouts – place a (II) mark on the pavement curb to indicate sewer clean out locations (green paint).

23. Seal and vacuum test all manholes. All manholes which require grade adjustments are to be re-tested.

24. Perform a television camera inspection of all sanitary sewer and storm sewers, along with the associated storm sewer laterals. Copies of the inspection tapes which are to be on a thumb drive or DVD format are to be submitted to *Engineering Inspector* with the City of Rockwall Engineering Department. Videos shall be taken after the franchise utilities on the project have been completed. Also forward the results of all air and mandrel test to *Engineering Inspector*.

25. The lift station is to be operational and approved for use, by the design engineer and the City of Rockwall.

26. Install guard rail at all locations as noted on the approved plans.

27. Ryan Miller - Director of Planning and Zoning or his designated representative shall conduct an inspection of the landscaping and project screening upon completion.

28. Information (Future Item) – Twenty-Month Maintenance Review – The City of Rockwall requires a twenty-month maintenance review of every project. This review is to be conducted at twenty-months into the two-year maintenance warranty. The Design Engineer or his designated representative along with the contractors designated representatives shall be present to perform a walkover of the project with the City of Rockwall. A second T.V. camera of sanitary sewer main shall be done at this time with a thumb drive or DVD formatted copy provided to the City of Rockwall

29. Grass is to be established in all disturbed areas. Grass shall be at least 1'' in height with 75%-80% coverage of all disturbed areas.

For additional information, regarding this check list or site work status please contact – *Engineering Inspector* who is the designated Construction Inspector for the site-work on this project for the City of Rockwall, regarding this list. Project acceptance is subject to but not necessarily limited to the above listed punch list items. *Engineering Inspector* may be reached at telephone no. 972-771-7746.

Sincerely,

Engineering Inspector
Construction Inspector
City of Rockwall Engineering Department

City of Rockwall
The New Horizon

EXAMPLE – CHECKLIST FOR FINAL ACCEPTANCE (COMMERCIAL)

(DATE)

(ENGINEER'S NAME)
(ENGINEERING COMPANY)
(ADDRESS)
(CITY, TX ZIP)

Re: *(PROJECT NAME)* – Checklist for final acceptance

Dear *(ENGINEER'S NAME)*,

The following items are to be completed at the above mentioned site to bring the project into compliance with City specifications and to meet specific project requirements. The listed items are items identified during the walkover of the site and are to be addressed prior to final acceptance of the project. The City will conduct daily site visits (during daily rounds) at the project until completion of the noted items. A copy of this list will also be directed to the developer/owner and general contractor. The below listed items are to be directed to the appropriate responsible parties for completion.

-Required Documentation-

1. The City of Rockwall requires that the design engineer provide a letter of concurrence. The letter is to verify that the drainage flow patterns, grade to drain locations and drainage structures, including the volume of the surface and/or subsurface detention system and detention outlet structure located at the project were installed to the general elevations as shown on the approved plans. The letter shall also verify that the project was constructed to meet the approved design requirements or is within acceptable design tolerances. **The Design Engineer or his designated representative shall direct all "survey-work"** necessary to **verify** elevations and design compliance. The letter of concurrence is to have the **seal and signature** of the design engineer.

Example of Letter of Concurrence verbiage which will not be accepted by the City:

"A representative of this company visited the site and has visually verified to the best of the engineer's professional opinion, knowledge and belief, the final grading and site drainage comply with the City approved plans and details".

Example of Letter of Concurrence verbiage which will be accepted by the City:

"A representative of this company visited the site and has visually verified to the best of the engineer's professional opinion, knowledge and belief, that based on my observations along with survey work conducted at the site, the final grading, site drainage, and detention outfall with required volume comply with the City approved plans and details".

2. The Design Engineer shall furnish a digital file of the project formatted in Auto Cad 14, or 2000 format or newer **and** Adobe Acrobat (pdf.) format with a CD-ROM. The disk shall include a full set of plans along with any landscaping, wall plans, and details sheets.

City of Rockwall
The New Horizon

- Submit 1-set of blue line drawings of the "Record Drawings" containing copies of all sheets. The blue line copy will be reviewed by the construction inspector **PRIOR** to producing the "Record Drawing" disk. This will allow any revisions to be addressed prior to producing the disk.

Record Drawing Disk drawings shall have the Design Engineers seal, signature and must be stamped and dated as "Record Drawings" or "As Built Drawings" on all sheets.

The City of Rockwall will not accept any Record Drawing disk drawings which include a disclaimer with the like or similar verbiage. A disclaimer shall not directly or indirectly state or indicate that the design engineer or the design engineers, surveyor/surveyors did not verify or grades after construction, or that the Record Drawings were based solely on information provided by the construction contractor/contractors. Any Record Drawings which include like or similar disclaimer verbiage will not be accepted by the City of Rockwall.

Example of Acceptable Disclaimer:

To the best of our knowledge Smith Engineering, Inc., hereby states that this plan is As-Built. This information provided is based on surveying at the site and information provided by the contractor.

3. 4% Engineering Inspection Fee (Final As-Built Adjustments) – Prior to the start of construction at the project, engineering inspection fees for the project were established. The preliminary inspection fee amounts were based upon the projected contract quantity and unit price amounts which were submitted to the City. A fee based on 4% of the projected quantity cost was paid to the City. The final fee amounts are to be adjusted if necessary to match the unit quantity and unit price amounts based on the as-built contract unit quantity amounts. Please provide a copy of the as-built quantity amounts with total amounts for each item. The as built amounts should be noted or stamped as "as-built contract quantity and unit price amounts". The engineering inspection fee charged by the City will be adjusted to match these amounts if necessary. The City is to receive payment on the adjusted cost amounts prior to project acceptance. As-built contract **unit quantity and unit price** amounts for the pavement (including fire lane if applicable), drive approaches, sidewalks, barrier free ramps, wastewater, storm sewer, drainage structures (including underground detention), water lines, along with all associated fixtures which are located within the defined right-of-ways and easements of the project.

4. All weekday and weekend overtime engineering inspections fees are to be paid.

5. Flood study review fees to be paid if there is an excess due over the initial review fee. If all of the initial fees were not utilized for the flood study review, those monies will be refunded.

6. Storm Sewer Outfall Coordinates - It is now necessary to tie down all the storm sewer outfall pipes to our state plane Coordinate System. The design engineer will be required to provide the following coordinate information which is to be submitted in letterform showing the x, y, and z coordinates at the end of all storm sewer outfalls of the project.

7. Maintenance bonds are to be submitted to the City of Rockwall for the paving and utilities installed at the project. The bonds shall be **two-year** 10% maintenance bonds to cover maintenance, for a two-year timeline starting from the **"Date of City of Rockwall's Acceptance"** for the project. There is to be no date in the starting timeline only the above wording.

A. The utility bond shall cover the following utility systems and their associated fixtures.
   - Water
   - Wastewater
   - Storm sewer (including detention systems)

B. The paving bond shall cover the following:
   - Street Pavement.
   - Driveway Approaches
   - Fire Lane.
   - Side walks.
   - Barrier free ramps.

8. Engineered Retaining Wall Inspection & Letter of Concurrence – The City requires the design engineer for any retaining wall which is three-feet in height or taller, to periodically inspect, or make arrangements for his designated representative to periodically inspect the retaining wall/walls during the construction process. The design engineer is to submit letter of concurrence for the retaining wall/walls to the City prior to project acceptance. The letter shall contain the **seal and signature** of the retaining wall design engineer.

9. City Council approved and owner signed final/replat plat mylars and tax certificates to be submitted to Planning Department for filing.

- Site Items -

1. Grass is to be established at all of the disturbed areas. The grass is to be maintained until such time that a general coverage density of 75-80% of the disturbed area has been established with a minimum grass stand height of one-inch.

2. Maintain existing or install additional construction site erosion BMP's as necessary, to stabilize the disturbed soil or contain silt migration.

3. All fire lanes are to be sawn and crack sealed. All miscellaneous random cracks are to be routed and sealed. All expansion joints are to be sealed in the fire lane.

4. The fire lane is to be re-painted where necessary if there are locations where the fire lane is scuffed or is flaking. The locations which require re-painting shall be sandblasted, prior to re-painting.

5. Wipe the inside ring and cover of the sanitary sewer manhole, using "Non-Shrink" grout and seal if necessary.

6. Repair all gouges, cracks, and other deformities on the curbs.

7. Adjust meter cans and valve stacks to final grade elevation.

8. Adjust fire hydrants to grade. All fire hydrants must have the operating nut between 19 and 28 inches above the final grade elevation around them.

9. All fire hydrants are to have a clearance radius of 5-feet in all directions. No structures, traffic bollards, barricades, guardrail, landscaping etc, are to be placed within the clearance area.

10. All valve stacks located outside of paving are to have a 2'x2' four inch thick reinforced concrete pad

around them.

11. Water Valve and Waste Water manhole curb cut marks- The pavement curbs are to be marked at all water valve and waste water manhole locations. The curb cut marks are to be sawn into the pavement curb. The curb cut marks are to consist of the following:

    A. Valves - Place a (V) mark on the curb to note the valve locations, (blue paint for general, white paint for sub outs or dead ends, and red paint for fire hydrants and or fire lines).

    B. Curb stops – Place a (I) mark on the pavement curb to indicate curb stop locations, (blue paint).

    C. Clean outs – Place a (II) mark on the pavement curb to indicate sewer clean-out locations, (green paint).

12. Cut an invert in the sanitary sewer connection into the existing manhole at station 0+00, and re-seal the bottom of the manhole.

13. Clean mud from concrete flume in detention pond.

14. Install floodway monument markers. The City will furnish the marker cap, which is to be set in concrete as directed by the City of Rockwall. The developers designated representative shall install the marker prior to project acceptance. Monument installation shall meet City of Rockwall specifications.

    A. **The monument marker location is to be shown on the Record Drawing Mylar's on the grading plan.**

    B. The City of Rockwall will furnish the marker cap.

    C. Install "No Dumping, Drains to Waterway" inlet markers to be installed on each inlet by the developer

15. All parking lot and handicap striping along with all associated signs must be installed.

16. All construction related trash material and miscellaneous debris is to be removed from the site and properly disposed.

17. Maximum slopes allowed by the City of Rockwall shall be a 3:1 slope. All slope areas which exceed the above noted slope requirements are to be re-graded or retained unless otherwise approved by the City Engineer. All slopes are to be graded so as to achieve the most gradual slope possible, unless otherwise noted on the approved construction plans.

18. Final Grading – re-establish all drainage swales, as necessary to achieve conformance to the drainage patterns shown on the approved grading plans. Grade to drain any locations which may hold water or obstruct approved drainage flow patterns. All graded areas, including slopes are to be brought to a final grade surface that is smooth and uniform being relatively free of erosion washouts, tire ruts, dirt clods, silt deposits etc, care should be taken to re-grade any rough surface areas prior to the application of erosion matting or grass seeding.

19. All required landscaping is to be installed at the site and comply with the approved landscape plan.

City of Rockwall
The New Horizon

The site landscaping is to be inspected by Ryan Miller- Director of Planning and Zoning, or his designated representative prior to project acceptance.

For additional information, regarding this check list or site work status please contact – *(Inspector's Name)*, who is the designated Construction Inspector for the site-work on this project for the City of Rockwall, regarding this list. Project acceptance is subject to but not necessarily limited to the above listed punch list items. *(Inspector's Name)* may be reached at telephone no. 972-771-7746.

Sincerely,

Construction Inspector
City of Rockwall, Engineering Department

Table of Contents

Agenda 5

Consider approval of the minutes from the October 21, 2019 regular city council meeting, and take any action necessary.

10/21 Mins 9

Blank Page 19

Z2019-021 - Consider a request by Pat Atkins of KPA Consulting, Inc. on behalf of the owners Gwen Reed, Saddle Star South Holdings, LLC, and CDT Rockwall/2017, LLC for the approval of an ordinance for a zoning amendment to Planned Development District 79 (PD-79) [Ordinance No. 16-39] for the purpose of amending the development standards and concept plan on a 70.408-acre tract of land identified as Tracts 1, 1-03, 1-5 & 2-03 of the P. B. Harrison Survey, Abstract No. 97, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 79 (PD-79) for Single-Family 8.4 (SF-8.4) District land uses, situated within the SH-205 By-Pass Overlay (SH-205 BY-OV) District, located on the north side of John King Boulevard south of Featherstone Drive, and take any action necessary (2nd Reading).

Ord (2nd Reading) 20

Blank Page 33

Z2019-024 - Consider a request by Adam Buczek of Stone Creek Balance, LTD for the approval of an ordinance for a zoning amendment to Planned Development District 70 (PD-70) for the purpose of changing the number of hard-edged retention ponds required for the residential subdivision being a ~336.00-acre tract of land identified as the Stone Creek Subdivision and being situated within the W. T. Deweese Survey, Abstract No. 71 and the S. King Survey, Abstract No 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for Single-Family 10 (SF-10) District land uses, situated within the North SH-205 Overlay (N. SH-205 OV) and SH-205 By-Pass Overlay (SH-205 BY-OV) Districts, generally located at the southeast corner of the intersection of FM-552 and SH-205 [N. Goliad Street], and take any action necessary (2nd Reading).

Ord (2nd Reading) 34

Blank Page 54

Consider approval of an ordinance amending the Rockwall Code of Ordinances in Chapter 38. Subdivisions; Article I. In General; Sec. 38-23 Standards for Design of Developments within Subdivisions Adopted to reflect updates to these standards, and take any action necessary. [2nd reading]

Memo 55

Ord (2nd Reading) 56

Blank Page 59

P2019-039 - Consider a request by Steven Homeyer of Homeyer Engineering, Inc. on behalf of Julia McKinney for the approval of a replat for Lot 8, Block A, Ellis Centre Phase 2 Addition being a 1.21-acre parcel of land identified as Lot 4, Block A, Ellis Centre Phase 2 Addition, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, located west of the intersection of Alpha Drive and Sigma Court, and take any action necessary.

P2019-039 . . . 60
Blank Page . . . 64

P2019-041 - Consider a request by David Raines for the approval of a replat for Lot 35, Block A, Chandler's Landing, Phase 18, Section 2 being a 0.19-acre tract of land identified as Lot 12, Block A, Chandler's Landing, Phase 18, Section 2, City of Rockwall, Rockwall County, Texas, zoned Planned Development 8 (PD-8) District for single family land uses, addressed as 5808 Constellation Circle, and take any action necessary.

P2019-041 . . . 65
Blank Page . . . 69

Consider approval of a resolution terminating American United Life Insurance Company of Indianapolis, Indiana, a OneAmerica Company, as the city's 457(b) plan administrator's agent, and instead appointing International City Management Association Retirement Corporation (ICMA-RC) as investment advisory with respect to the City of Rockwall's 457(b) Plan, and take any action necessary.

Memo_457b Plan Switch . . . 70
Resolution . . . 71
Blank Page . . . 72

Consider approval of the professional engineering services contract for Birkhoff, Hendricks & Carter, L.L.P. to perform the engineering design services for the Squabble Creek Lift Station Wastewater Sludge Grinders project in an amount not to exceed $34,790.00, to funded by the Wastewater Operations Budget, and take any action necessary.

Memo . . . 73
Contract . . . 74
Blank Page . . . 89

Consider awarding a bid to WPI and authorizing the City Manager to execute a contract for on site fixed generators at three lift stations totaling $229,380 to be funded out of the Water and Sewer Fund, Sewer Operations Budget, and take any action necessary.

Memo . . . 90
Blank Page . . . 91

Consider approval of a purchase from the Debt Service fund for two (fire truck) pumpers in lieu of issuing debt in the amount of $1,250,633, and take any action necessary.

FIRETRUCK Lone Star pumper . . . 92

AGENDA

ROCKWALL CITY COUNCIL REGULAR MEETING

Monday, November 04, 2019 - 5:00 PM

City Hall Council Chambers - 385 S. Goliad St., Rockwall, TX 75087

I. CALL PUBLIC MEETING TO ORDER

II. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding lease of real property in the vicinity of the downtown, pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
2. Discussion regarding employee personnel policies pursuant to Section §551.071 (Consultation with Attorney)
3. Discussion regarding reappointment(s) to the Rockwall Economic Development Corporation (REDC) Board pursuant to Section 551.074 (Personnel Matters)
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

III. ADJOURN EXECUTIVE SESSION

IV. RECONVENE PUBLIC MEETING (6:00 P.M.)

V. INVOCATION AND PLEDGE OF ALLEGIANCE – COUNCILMEMBER TROWBRIDGE

VI. OPEN FORUM

VII. TAKE ANY ACTION AS A RESULT OF EXECUTIVE SESSION

VIII. CONSENT AGENDA

p.9 1. Consider approval of the minutes from the October 21, 2019 regular city council meeting, and take any action necessary.

p.20 2. **Z2019-021** - Consider a request by Pat Atkins of KPA Consulting, Inc. on behalf of the owners Gwen Reed, Saddle Star South Holdings, LLC, and CDT Rockwall/2017, LLC for the approval of an **ordinance** for a zoning amendment to Planned Development District 79 (PD-79) [Ordinance No. 16-39] for the purpose of amending the development standards and concept plan on a 70.408-acre tract of land identified as Tracts 1, 1-03, 1-5 & 2-03 of the P. B. Harrison Survey, Abstract No. 97, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 79 (PD-79) for Single-Family 8.4 (SF-8.4) District land uses, situated within the SH-205 By-Pass Overlay (SH-205 BY-OV) District, located on the north side of John King Boulevard south of Featherstone Drive, and take any action necessary **(2nd Reading).**

p.34 3. **Z2019-024** - Consider a request by Adam Buczek of Stone Creek Balance, LTD for the approval of an **ordinance** for a zoning amendment to Planned Development District 70 (PD-70) for the purpose of changing the number of hard-edged retention ponds required for the residential subdivision being a ~336.00-acre tract of land identified as the Stone Creek Subdivision and being situated within the W. T. Deweese Survey, Abstract No. 71 and the S. King Survey, Abstract No 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for Single-Family 10 (SF-10) District land uses, situated within the North SH-205 Overlay (N. SH-205 OV) and SH-205 By-Pass Overlay (SH-205 BY-OV) Districts, generally located at the southeast corner of the intersection of FM-552 and SH-205 [N. Goliad Street], and take any action necessary **(2nd Reading).**

p.55 4. Consider approval of an **ordinance** amending the Rockwall Code of Ordinances in Chapter 38. Subdivisions; Article I. In General; Sec. 38-23 Standards for Design of Developments within Subdivisions Adopted to reflect updates to these standards, and take any action necessary. **[2nd reading]**

p.60 5. **P2019-039** - Consider a request by Steven Homeyer of Homeyer Engineering, Inc. on behalf of Julia McKinney for the approval of a replat for Lot 8, Block A, Ellis Centre Phase 2 Addition being a 1.21-acre parcel of land identified as Lot 4, Block A, Ellis Centre Phase 2 Addition, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, located west of the intersection of Alpha Drive and Sigma Court, and take any action necessary.

p.65 6. **P2019-041** - Consider a request by David Raines for the approval of a replat for Lot 35, Block A, Chandler's Landing, Phase 18, Section 2 being a 0.19-acre tract of land identified as Lot 12, Block A, Chandler's Landing, Phase 18, Section 2, City of Rockwall, Rockwall County, Texas, zoned Planned Development 8 (PD-8) District for single family land uses, addressed as 5808 Constellation Circle, and take any action necessary.

p.70 7. Consider approval of a resolution terminating American United Life Insurance Company of Indianapolis, Indiana, a OneAmerica Company, as the city's 457(b) plan administrator's agent, and instead appointing International City Management Association Retirement Corporation (ICMA-RC) as investment advisory with respect to the City of Rockwall's 457(b) Plan, and take any action necessary.

p.73 8. Consider authorizing the City Manager to execute a professional engineering services contract for Birkhoff, Hendricks & Carter, L.L.P. to perform the engineering design services for the Squabble Creek Lift Station Wastewater Sludge Grinders project in an amount not to exceed $34,790.00, to be funded by the Wastewater Operations Budget, and take any action necessary.

p.90 9. Consider awarding a bid to WPI and authorizing the City Manager to execute a contract for on site fixed generators at three lift stations totaling $229,380 to be funded out of the Water and Sewer Fund, Sewer Operations Budget, and take any action necessary.

p.92 10. Consider approval of a purchase from the Debt Service fund for two (fire truck) pumpers in lieu of issuing debt, in the amount of $1,250,633, and take any action necessary.

IX. APPOINTMENT ITEMS

p.94 1. Appointment with Melody Mayer of Renew Fence & Construction to hear request and discuss and consider the possibility of changing the city's regulations pertaining to residential retaining walls, including material and height restrictions, and take any action necessary.

p.97 2. Appointment with Brad Helmer of Heritage Christian Academy to provide an update on the progress of their capital campaign in accordance with the requirements of Specific Use Permit No. S-200 (Ordinance No. 19-02).

p.102 3. Appointment with Scott Mommer of Lars, Anderson & Associates, Inc. on behalf of the Home Depot to discuss amending the Unified Development Code (UDC) to allow the "Rental, Sales, and Service of Heavy Machinery and Equipment" land use in the Commercial (C) District by a Specific Use Permit (SUP), and take any action necessary.

X. PUBLIC HEARING ITEMS

p.110 1. **Z2019-022** - Hold a public hearing to discuss and consider a request by Marty Wright for the approval of an **ordinance** for a Specific Use Permit (SUP) allowing an accessory building on a one (1) acre tract of land identified as Lot 10, Block B, Saddlebrook Estates #2 Addition, City of Rockwall, Rockwall County, Texas, zoned Single-Family 16 (SF-16) District, addressed as 2340 Saddlebrook Lane, and take any action necessary **(1st Reading).**

p.148 2. Hold a public hearing to discuss and consider imposing a moratorium on accepting and reviewing subdivision plats for commercial and residential property situated within the City's Extraterritorial Jurisdiction (ETJ), and take any action necessary.

XI. ACTION ITEMS

p.157 1. **MIS2019-001** - Discuss and consider approval of an **ordinance** adopting updated impact fees for water, wastewater, and roadway facilities by updating the land use assumptions and capital improvement plans for such facilities, establishing updated service areas for such facilities, providing definitions, providing for collection and assessment, and take any action necessary. **(2nd Reading)**

p.288 2. Discuss and consider the revised median openings for Texas Department of Transportation (TXDOT) roadway FM 552, and take any action necessary.

p.291 3. Discuss and consider appointments to fill vacancies on the city's Airport Advisory Board, Historic Preservation Advisory Board, and Park Board, and take any action necessary.

XII. CITY MANAGER'S REPORT, DEPARTMENTAL REPORTS AND RELATED DISCUSSIONS PERTAINING TO CURRENT CITY ACTIVITIES, UPCOMING MEETINGS, FUTURE LEGISLATIVE ACTIVITIES, AND OTHER RELATED MATTERS.

1. Departmental Reports

p.293 Building Inspection Monthly Report - September 2019

p.307 Finance Department Report - September 2019

2. **City Manager's Report**

XIII. EXECUTIVE SESSION

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding lease of real property in the vicinity of the downtown, pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
2. Discussion regarding employee personnel policies pursuant to Section §551.071 (Consultation with Attorney)
3. Discussion regarding reappointment(s) to the Rockwall Economic Development Corporation (REDC) Board pursuant to Section 551.074 (Personnel Matters)
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

XIV. RECONVENE PUBLIC MEETING & TAKE ANY ACTION AS RESULT OF EXECUTIVE SESSION

XV. ADJOURNMENT

This facility is wheelchair accessible and accessible parking spaces are available. Request for accommodations or interpretive services must be made 48 hours prior to this meeting. Please contact the City Secretary's Office at (972) 771-7700 or FAX (972) 771-7727 for further information.

The City of Rockwall City Council reserves the right to adjourn into executive session at any time to discuss any of the matters listed on the agenda above, as authorized by Texas Government Code § 551.071 (Consultation with Attorney) § 551.072 (Deliberations about Real Property) § 551.074 (Personnel Matters) and § 551.087 (Economic Development)

I, Kristy Cole, City Secretary for the City of Rockwall, Texas, do hereby certify that this Agenda was posted at City Hall, in a place readily accessible to the general public at all times, on the 1st day of November, 2019 at 4:00 p.m. and remained so posted for at least 72 continuous hours preceding the scheduled time of said meeting.

_____ _____

Kristy Cole, City Secretary
or Margaret Delaney, Asst. to the City Sect.

Date Removed

MINUTES

ROCKWALL CITY COUNCIL REGULAR MEETING
Monday, October 21, 2019 - 5:00 PM
City Hall Council Chambers - 385 S. Goliad St., Rockwall, TX 75087

I. CALL PUBLIC MEETING TO ORDER

Mayor Pruitt called the meeting to order at 5:00 p.m. Present were Mayor Jim Pruitt, Mayor Pro Tem Dana Macalik and Council Members Patrick Trowbridge, John Hohenshelt, Kevin Fowler and Trace Johannesen. Also present were Assistant City Manager Joey Boyd, Assistant City Manager Mary Smith, and City Attorney Frank Garza. Councilmember Bennie Daniels and City Manager Rick Crowley were absent from the entire meeting.

Mayor Pruitt read the below listed discussion items into the record before recessing the public meeting to go into Executive Session (at 5:01 p.m.).

II. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discuss the Texas State Soil and Water Conservation Board Dam Improvement Program. Section 551.071 (Consultation with Attorney).
2. Discuss contract negotiations with wholesale utility customers pursuant to Section 551.071 (Consultation with Attorney).
3. Discussion regarding TXDOT program for exchange of right-of-way pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
4. Discussion regarding legal issues pertaining to potential annexation/development in the Extraterritorial Jurisdiction (ETJ) pursuant to Section §551.071 (Attorney/Client Consultation).
5. Discussion regarding possible sale/purchase/lease of real property in the vicinity of downtown, pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
6. Discussion regarding sale/exchange of real property in the vicinity of John King Boulevard pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
7. Discussion regarding appointments to city regulatory boards, commissions, and committees - specifically the Board of Adjustments - pursuant to Section 551.074 (Personnel Matters)
8. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

III. ADJOURN EXECUTIVE SESSION

Council adjourned from Executive Session at 5:52 p.m.

IV. RECONVENE PUBLIC MEETING (6:00 P.M.)

Mayor Pruitt reconvened the public meeting at 6:00 p.m.

V. INVOCATION AND PLEDGE OF ALLEGIANCE – COUNCILMEMBER JOHANNESEN

Councilmember Johannesen delivered the invocation and led the Pledge of Allegiance.

VI. PROCLAMATIONS

1. Domestic Violence Awareness Month

Connie Pettitt, Executive Director of Women in Need, Inc., came forth.

2. First Presbyterian Church of Rockwall Day

Cheryl Taylor of First Presbyterian Church of Rockwall came forth. Mayor Pruitt then read and presented her the proclamation, in recognition of the church's 165th year anniversary.

3. National Community Planning Month

Ryan Miller, Planning Director and members of the city's Comprehensive Planning Advisory Committee (CPAC) came forth. Mayor Pruitt then read and presented this proclamation in celebration of National Community Planning Month.

4. Texas Chamber of Commerce Week

Darby Burkey from the Rockwall Chamber came forth at this time. Mayor Pruitt then read and presented her with this proclamation.

VII. OPEN FORUM

Carolyn Francisco
272 Victory Lane
Rockwall, TX 75032

Mrs. Francisco came forth and thanked the Council for their recent approval of a hotel occupancy tax funding (HOT funding) request on behalf of the Rockwall County Historical Foundation.

Mr. Nicholas Grant
1569 E. Old Quail Run Road
Rockwall, TX

Mr. Grant came forth and generally expressed concerns pertaining to the 'roadway swap' with TXDOT pertaining to SH-205 / John King Boulevard.

Kim Cook
2830 Stoney Hollow Lane
Rockwall, TX

Mrs. Cook came forth and shared that she has some concerns about the city's water system. She knows that there have been some improvements to pipelines and other improvements; however, she would like some additional explanation about what funds are going towards and why residents' water bills are so high. She thanked Councilman Trowbridge for placing an item on tonight's agenda to discuss city water.

There being no one else wishing to come forth and speak, Mayor Pruitt then closed Open Forum.

VIII. TAKE ANY ACTION AS A RESULT OF EXECUTIVE SESSION

Mayor Pro Tem Macalik made a motion to move forward with the 380 real estate agreement on real property in the vicinity of downtown. Councilman Trowbridge seconded the motion, which passed unanimously of those present (6 ayes with 1 absence (Daniels).

Mayor Pro Tem Macalik made a motion to direct staff to negotiate the sale or exchange of real property in the vicinity of John King Blvd. Councilman Hohenshelt seconded the motion, which passed by a vote of 6 ayes with 1 absence (Daniels).

Macalik moved to reappoint to the Board of Adjustments David Lowrey, Stuart Smith, and Shannon Bennett for an additional term (through August of 2021) and newly appoint Kevin Hadawi to replace Peter Flores (for a term to expire in August of 2021). Councilmember Trowbridge seconded the motion, which passed by a vote of 6 ayes with 1 absence (Daniels).

Regarding the Historic Preservation Advisory Board, Councilman Trowbridge moved to reappoint Carolyn Francisco and Jay Odom to serve an additional term (thru Aug. 2021) and newly appoint Brad Adams to replace Mike Mishler, whose term has expired, through August 2021.

IX. CONSENT AGENDA

1. Consider approval of the minutes from the October 7, 2019 regular city council meeting, and take any action necessary.
2. Consider approving cooperative purchasing agreement with the City of Cleburne and authorizing the City Manager to execute the Interlocal Cooperative Agreement, and take any action necessary.
3. Consider approving cooperative purchasing agreement with the City of Royse City and authorizing the City Manager to execute the Interlocal Cooperative Agreement, and take any action necessary.
4. Consider awarding a bid to Musco Sports Lighting and authorizing the City Manager to execute a Purchase Order for adding lights at the Myers Park Pickle Ball Court in the amount of $42,612 to be funded out of General Fund Reserves, and take any action necessary.
5. Consider awarding a bid to Caldwell Country Chevrolet and Rockdale Country Ford and authorizing the City Manager to execute Purchase Orders for new 2020 model vehicles in the amount of $301,502 to be funded out of General Fund Reserves and Water Sewer Fund, and take any action necessary.
6. Consider authorizing the City Manager to execute a maintenance and services agreement with RLC Controls, Inc. for the 2020 fiscal year to provide maintenance and service for Supervisory Control and Data Acquisition computer systems (SCADA) for the Water, Wastewater, and Street Divisions of Public Works, to be funded by the 2019-2020 budget, and take any action necessary.

Councilmember Trowbridge moved to approve the entire Consent Agenda (#s 1, 2, 3, 4, 5, and 6). Councilman Johannesen seconded the motion, which passed by a vote of 6 ayes with 1 absent (Daniels).

X. APPOINTMENT ITEMS

1. Appointment with the Planning and Zoning Chairman to discuss and answer any questions regarding cases on the agenda and related issues and take any action necessary.

Jerry Welch with the city's Planning & Zoning Commission came forth and briefed the Council on recommendations of the Commission, relative to planning-related items on tonight's meeting agenda. Following brief questions and answers, Council took no action pertaining to this particular agenda item.

XI. PUBLIC HEARING ITEMS

1. **MIS2019-001** - Hold a public hearing to discuss and consider approval of an **ordinance** adopting updated impact fees for water, wastewater, and roadway facilities by updating the land use assumptions and capital improvement plans for such facilities, establishing updated service areas for such facilities, providing definitions, providing for collection and assessment, and take any action necessary. **(1st Reading)**

Planning Director Ryan Miller introduced Eddie Haas with Freese and Nichols, the city's consultant pertaining to this matter. Mr. Haas came forth and delivered a detailed briefing to Council on the study pertaining to the impact fee analysis and associated impact fee calculations. In summary, the city's Capital Improvements Advisory Committee (CIAC) (with is the Planning & Zoning Commission) has recommended a review of benchmark city data, an increase of 25% to the current collection rate, carrying that rate for all roadway service areas and maintaining one collection rate for all land use types.

Another representative from Freese and Nichols then came forth and presented to Council an overview of the water and wastewater impact fees study / analysis and associated recommendation for the impact fee calculations.

Mr. Chaney with Birkhoff, Hendricks and Carter came forth and briefed Council on the wastewater impact fees analysis and associated recommendation for the impact fee calculation.

Following Mr. Haas' presentation, Mayor Pruitt opened the public hearing, asking if anyone would like to come forth and speak at this time.

Bob Wacker
309 Featherstone
Rockwall, TX 75087

Mr. Wacker came forth and expressed concern about there not currently being sufficient impact fees to pay off the bonds for John King Blvd. He shared that he has calculated that his water bill will go out 29% in the next three years, and his wastewater bill will go up by about 70%. Staff indicated that this topic is concerning impact fees, not individual water / wastewater bills.

There being no one else wishing to come forth and speak during the public hearing, Mayor Pruitt then closed the public hearing.

Councilmember Trowbridge clarified his understanding that impact fees are related to outside developer contributions funding city roadway, water and wastewater improvements, essentially having developers bear the cost burden.

Councilmember Johannesen moved to approve the ordinance for MIS2019-001 as written. Following additional comments, Councilmember Trowbridge seconded the motion.

Councilmember Hohenshelt moved to amend the main motion on the floor to set the rate within the ordinance at 350. Councilmember Trowbridge seconded the amendment to the motion, which passed by a vote of 4 ayes with 2 against (Macalik and Pruitt).

The amended ordinance was read as follows:

CITY OF ROCKWALL
ORDINANCE NO. 19-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE MUNICIPAL CODE OF ORDINANCES OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING ARTICLE III, *IMPACT FEE REGULATIONS*, OF CHAPTER 38, *SUBDIVISIONS*, FOR THE PURPOSE OF AMENDING THE IMPACT FEES FOR WATER, WASTEWATER, AND ROADWAY FACILITIES BY UPDATING THE LAND USE ASSUMPTIONS AND CAPITAL IMPROVEMENTS PLAN FOR SAID FACILITIES; ESTABLISHING UPDATED SERVICE AREAS FOR SUCH FACILITIES; PROVIDING FOR DEFINITIONS; PROVIDING FOR COLLECTION AND ASSESSMENT; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR REMEDIES; PROVIDING FOR CONFLICTS; AND PROVIDING FOR AN EFFECTIVE DATE.

The vote on the amended motion failed by a vote of 3 ayes, 3 nays (Macalik, Pruitt and Fowler), and 1 absence (Daniels).

Councilmember Fowler moved to accept the impact fee study, as presented and recommended by the CIAC. Mayor Pro Tem Macalik seconded the motion. Following brief discussion, the motion passed by a vote of 5 ayes, 2 nays (Trowbridge and Pruitt), and 1 absence (Daniels).

Mayor Pruitt called for a break and recessed the meeting at 7:44 p.m.

Mayor Pruitt called the meeting back to order at 7:54 p.m.

2. **Z2019-021** - Hold a public hearing to discuss and consider a request by Pat Atkins of KPA Consulting, Inc. on behalf of the owners Gwen Reed, Saddle Star South Holdings, LLC, and CDT Rockwall/2017, LLC for the approval of an **ordinance** for a zoning amendment to Planned Development District 79 (PD-79) [Ordinance No. 16-39] for the purpose of amending the development standards and concept plan on a 70.408-acre tract of land identified as Tracts 1, 1-03, 1-5 & 2-03 of the P. B. Harrison Survey, Abstract No. 97, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 79 (PD-79) for Single-Family 8.4 (SF-8.4) District land uses, situated within the SH-205 By-Pass Overlay (SH-205 BY-OV) District, located on the north side of John King Boulevard south of Featherstone Drive, and take any action necessary **(1st Reading).**

Planning Director Ryan Miller provided background information pertaining to this agenda item. Notices were sent out to property owners located within 500' of the subject property (only those w/in the city limits). One response has been received back in opposition of the request. The P&Z Commission has unanimously recommended approval of this request.

Pat Atkins
Saddlestar Land Development, Inc.
3076 Hays Lane
Rockwall, TX

Mr. Atkins came forth and provided a brief overview of his request to Council.

Mayor Pruitt opened the public hearing, asking if anyone would like to come forth and speak at this time. There being no one indicating such, he then closed the public hearing.

Councilman Trowbridge moved to approve Z2019-021. Councilmember Hohenshelt seconded the motion. The ordinance was read as follows:

CITY OF ROCKWALL
ORDINANCE NO. 19-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, SO AS TO FURTHER AMEND PLANNED DEVELOPMENT DISTRICT 79 (PD-79) [*ORDINANCE NO. 16-39*] FOR THE PURPOSE OF AMENDING THE DEVELOPMENT STANDARDS AND CONCEPT PLAN ON A 70.408-ACRE TRACT OF LAND, ZONED PLANNED DEVELOPMENT DISTRICT 79 (PD-79) FOR SINGLE FAMILY 8.4 (SF-8.4) DISTRICT LAND USES, BEING IDENTIFIED AS TRACTS 1, 1-03, 1-5 & 2-03 OF THE P. B. HARRISON SURVEY, ABSTRACT NO. 97, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

The motion passed by a vote of 6 ayes with 1 absence (Daniels).

3. **Z2019-022** - Hold a public hearing to discuss and consider a request by Marty Wright for the approval of an **ordinance** for a Specific Use Permit (SUP) allowing an accessory building on a one (1) acre tract of land identified as Lot 10, Block B, Saddlebrook Estates #2 Addition, City of Rockwall, Rockwall County, Texas, zoned Single-Family 16 (SF-16) District, addressed as 2340 Saddlebrook Lane, and take any action necessary **(1st Reading).**

Indication was given that the applicant would like to postpone action on this item until the Nov. 4, 2019 city council meeting. Since the case was advertised for public hearing this evening, Mayor Pruitt opened the public hearing, asking if anyone would like to come forth and speak at this time. There being no one indicating such, the mayor then closed the public hearing.

Councilman Trowbridge then moved to accept the applicant's request to postpone action on this item until the November 4 city council meeting. Councilmember Hohenshelt seconded the motion, which passed by a vote of 6 ayes with one absence (Daniels).

4. **Z2019-024** - Hold a public hearing to discuss and consider a request by Adam Buczek of Stone Creek Balance, LTD for the approval of an **ordinance** for a zoning amendment to Planned Development District 70 (PD-70) for the purpose of changing the number of hard-edged

retention ponds required for the residential subdivision being a ~336.00-acre tract of land identified as the Stone Creek Subdivision and being situated within the W. T. Deweese Survey, Abstract No. 71 and the S. King Survey, Abstract No 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for Single-Family 10 (SF-10) District land uses, situated within the North SH-205 Overlay (N. SH-205 OV) and SH-205 By-Pass Overlay (SH-205 BY-OV) Districts, generally located at the southeast corner of the intersection of FM-552 and SH-205 [N. Goliad Street], and take any action necessary **(1st Reading).**

Planning Director Ryan Miller provided background information pertaining to this agenda item. 928 notices were sent out to residents and property owners located within 500' of the subject property. Thus far, 27 notices have been received back in favor and 12 have been received back in opposition. Also, the P&Z has voted 5-2 to recommend approval of this request.

Adam Buczek
Skorburg Co.
8214 Westchester drive, Suite 710
Dallas, TX 75225

Mr. Buczek came forth and briefed the Council on the nature of his request, showing an extensive Power Point presentation.

Mayor Pruitt opened the public hearing, asking if anyone would like to come forth and speak at this time.

Michael Podina
802 York Drive
Rockwall, TX 75087

Mr. Podina shared that he and his wife live directly across the street from an existing pond (on York). He shared that he and his wife moved in about two years ago, and – at that time – if was looking significantly better than it does currently. Also, algae is taking over, snakes are getting bad, and nutria are beginning to multiply, and they carry diseases. He does not feel that it is necessary for Stone Creek to have an additional pond, and he agrees that it will be better for the HOA and homeowners for there to NOT be any additional ponds. The maintenance of the neighborhood and the existing ponds is currently lacking.

Bob Wacker
309 Featherstone
Rockwall, TX 75087

He believes Stone Creek has enough ponds already. Cattails, weeds and snakes have taken over the main entrance pond. He went on to show photographs of each of the existing ponds within the neighborhood, providing details regarding if each one does or does not have a hard edge and fountain. He believes that everyone, in general, agrees that additional ponds are not needed. Mr. Wacker went on to indicate that he agrees with Mr. Buczek, the developer, and he supports what is being requested this evening.

Nick Grant
1569 Old E. Quail Run Rd.
Rockwall, TX

Mr. Grant suggested that the developer provide to the HOA the cost of hardscaping the pond.

There being no one else wishing to come forth and speak, Mayor Pruitt then closed the public hearing.

Councilman Johannesen shared that he lives in Stone Creek, and his home backs up to one of the ponds within the subdivision. He provided various comments pertaining to the existing York Pond, which is an Army Corps. Of Engineers Pond.

Councilman Johannesen moved to approve Z2019-024. Mayor Pro Tem Macalik seconded the motion, which – following brief questions and answers – passed by a vote of 6 ayes with 1 absence (Daniels).

XII. ACTION ITEMS

1. Discuss and consider a request for a variance from the sign separation requirement for a new monument sign to be located at 1306 Summer Lee Drive, and take any action necessary.

Building Official Jeffrey Widmer came forth and briefed the Council on the nature of this variance request. He generally explained that there are limited options for placement of the sign, and that is why the applicant is requesting a variance.

Zeke Bullock
Barnett Signs
4250 Action Drive
Mesquite, TX 75150

Mike Fisher
244 Harvest Ridge
Rockwall, TX

Mr. Bullock and Fisher came forth and introduced themselves, indicating they are happy to answer any questions of Council.

Councilman Hohenshelt moved to grant the variance request on the sign. Councilman Johannesen seconded the motion, which passed by a vote of 6 ayes with 1 absence (Daniels).

2. Discuss and consider (re)appointments to the city's Airport Advisory Board, Historic Preservation Advisory Board, and Park Board, and take any action necessary.

Council addressed this item, along with Ex. Session action above.

3. Discuss and consider trends in water consumption, and take any action necessary.

Councilmember Trowbridge shared with the council a spreadsheet that he's created to evaluate water usage (total gallons, daily average, maximum day, etc.) and what the average Rockwall citizen uses and what his / her fees are like as a result of their consumption. The point of his presentation, in part, was to point out that variances in water bills are cyclical, and they are especially more expensive in the summer months. Following Trowbridge's comments, Mrs. Smith shared that it will cost at least $3.5 million to convert the remainder of the city to "smart meters" (radio read meters). Currently, about 40% of the city is operating on radio-read meters. The city annually budgets for trading out a certain number of old meters for smart meters. This year, about 2k meters out of 16k will be changed out. So,

in approximately five years, just about all – if not all - of the city should be operating on the new, radio read (smart) meters. Council took no action pertaining to this agenda item.

4. Discuss and consider appointing a Comprehensive Plan Advisory Committee (CPAC) to assist staff in the annual update to the Comprehensive Plan, and take any action necessary.

Mayor Pruitt moved to approve the resolution. Councilman Trowbridge seconded the motion, which passed by a vote of 6 ayes with 1 absent (Daniels).

5. Discuss and consider approval of an **ordinance** amending the Rockwall Code of Ordinances in Chapter 38. Subdivisions; Article I. In General; Sec. 38-23 Standards for Design of Developments within Subdivisions Adopted to reflect the 2016 update to these standards, and take any action necessary. **[1st reading]**

Councilman Hohenshelt moved to approve the ordinance as presented. Councilman Trowbridge seconded the motion. The ordinance was read as follows:

CITY OF ROCKWALL

ORDINANCE NO. 19-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE ROCKWALL CODE OF ORDINANCES IN CHAPTER 38. SUBDIVISIONS; ARTICLE I. IN GENERAL; SECTION 38-23 STANDARDS FOR DESIGN OF DEVELOPMENTS WITHIN SUBDIVISIONS ADOPTED; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

The motion passed unanimously of those present (Daniels absent).

XIII. Executive Session

The City of Rockwall City Council will Recess into Executive Session to discuss the following matters as authorized by Chapter 551 of the Texas Government Code:

1. Discuss the Texas State Soil and Water Conservation Board Dam Improvement Program. Section 551.071 (Consultation with Attorney).
2. Discuss contract negotiations with wholesale utility customers pursuant to Section 551.071 (Consultation with Attorney).
3. Discussion regarding TXDOT program for exchange of right-of-way pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
4. Discussion regarding legal issues pertaining to potential annexation/development in the Extraterritorial Jurisdiction (ETJ) pursuant to Section §551.071 (Attorney/Client Consultation).
5. Discussion regarding possible sale/purchase/lease of real property in the vicinity of downtown, pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).

6. Discussion regarding sale/exchange of real property in the vicinity of John King Boulevard pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
7. Discussion regarding appointments to city regulatory boards, commissions, and committees - specifically the Board of Adjustments - pursuant to Section 551.074 (Personnel Matters)
8. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

XIV. Reconvene Public Meeting & Take Any Action as Result of Executive Session

Council did not reconvene in Executive Session following the close of the public meeting agenda.

XV. Adjournment

Mayor Pruitt adjourned the meeting at 8:58 p.m.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 4th DAY OF NOVEMBER, 2019.

CITY OF ROCKWALL

ORDINANCE NO. 19-40

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, SO AS TO FURTHER AMEND PLANNED DEVELOPMENT DISTRICT 79 (PD-79) [*ORDINANCE NO. 16-39*] FOR THE PURPOSE OF AMENDING THE DEVELOPMENT STANDARDS AND CONCEPT PLAN ON A 70.408-ACRE TRACT OF LAND, ZONED PLANNED DEVELOPMENT DISTRICT 79 (PD-79) FOR SINGLE FAMILY 8.4 (SF-8.4) DISTRICT LAND USES, BEING IDENTIFIED AS TRACTS 1, 1-03, 1-5 & 2-03 OF THE P. B. HARRISON SURVEY, ABSTRACT NO. 97, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has received a request by Pat Atkins of KPA Consulting, Inc. on behalf of the owners Gwen Reed, Saddle Star South Holdings, LLC, and CDT Rockwall/2017, LLC for the purpose of amending Planned Development District 79 (PD-79) [*Ordinance No. 16-39*] in order to change the development standards and concept plan for a 70.408-acre tract of land identified as Tracts 1, 1-03, 1-5 & 2-03 of the P. B. Harrison Survey, Abstract No. 97, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 79 (PD-79) for Single Family 8.4 (SF-8.4) District land uses, situated within the SH-205 By-Pass Overlay (SH-205 BY OV) District, generally located east of the intersection of Featherstone Drive and John King Boulevard, and more fully described in *Exhibit 'A'* of this ordinance, which hereinafter shall be referred to as the *Subject Property* and incorporated by reference herein; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the affected area, and in the vicinity thereof, and the governing body in the exercise of its legislative discretion, has concluded that Planned Development District 79 [*Ordinance No. 16-39*] and the Unified Development Code [*Ordinance No. 04-38*] should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

Section 1. That the approval of this ordinance shall supersede all requirements stipulated in *Ordinance No. 16-39*;

Section 2. That the *Subject Property* shall be used only in the manner and for the purposes authorized by this Planned Development District Ordinance and the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall as heretofore amended, as amended herein by granting this zoning change, and as maybe amended in the future;

Section 3. That development of the *Subject Property* shall generally be in accordance with the *Planned Development Concept Plan*, described in *Exhibit 'B'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'B'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

Section 4. That development of the *Subject Property* shall generally be in accordance with the *Development Standards*, described in *Exhibit 'C'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'C'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

Section 5. That development of the *Subject Property* shall be in conformance with the schedule listed below (*except as set forth below with regard to simultaneous processing and approvals*).

(a) The procedures set forth in the City's subdivision regulations on the date this ordinance is approved by the City, as amended by this ordinance (*including Subsections 5(b) through 5(g) below*), shall be the exclusive procedures applicable to the subdivision and platting of the *Subject Property*.

(b) The following plans and plats shall be required in the order listed below (*except as set forth below with regard to simultaneous processing and approvals*). The City Council shall act on an application for an *Open Space Master Plan* in accordance with the time period specified in *Section 212.009* of the *Texas Local Government Code*.

(1) Open Space Master Plan
(2) Master Plat
(3) PD Site Plan
(4) Preliminary Plat
(5) Final Plat

(c) *Open Space Master Plan.* An *Open Space Master Plan* for the *Subject Property*, prepared in accordance with this ordinance and consistent with the *Planned Development Concept Plan*, and shall be considered for approval by the City Council following recommendation of the Parks and Recreation Board.

(d) *Master Plat.* A *Master Plat* for the *Subject Property* shall be submitted and shall identify the proposed timing of each phase of the proposed development. A *Master Plat* application may be processed by the City concurrently with a *Open Space Master Plan* for the development.

(e) *PD Site Plan.* A *PD Site Plan* covering all of the *Subject Property* shall be submitted and shall identify all site/landscape/hardscape plan(s) for all open space, neighborhood parks, trail systems, street buffers and entry features. A *PD Site Plan* application may be processed by the City concurrently with a *Preliminary Plat* application for the development.

(f) *Preliminary Plat.* A *Preliminary Plat* covering all of the *Subject Property* shall be submitted and shall include a *Treescape Plan*. A *Preliminary Plat* application may be processed by the City concurrently with a *PD Site Plan* application for the development.

(g) *Final Plat.* Prior to the issuance of any building permits, a *Final Plat*, conforming to the *Preliminary Plat*, for all of the *Subject Property* shall be submitted for approval.

Section 6. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars* ($2,000.00) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

Section 7. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

Section 8. The standards in this ordinance shall control in the event of a conflict between this ordinance and any provision of the Unified Development Code or any provision of the City Code, ordinance, resolution, rule, regulation, or procedure that provides a specific standard that is different from and inconsistent with this ordinance. References to zoning district regulations or other standards in the Unified Development Code (including references to the *Unified Development Code*), and references to overlay districts, in this ordinance or any of the Exhibits hereto are those in effect on the date this ordinance was passed and approved by the City Council of the City of Rockwall, Texas;

Section 9. That this ordinance shall take effect immediately from and after its passage and the publication of the caption of said ordinance as the law in such cases provides;

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF NOVEMBER, 2019.

Exhibit 'A':
Legal Description and Survey

TRACT 1:

BEING 44.292 acres of land situated in the P. B. Harrison Survey, Abstract No. 97, Rockwall County, Texas, and being part of two tracts of land, the "*First Tract*" being a called 32.5 acres and the "*Second Tract*" being a called 32 acres, described in a Special Warranty Deed to R & R Hance Investments, LP., recorded as Instrument No. 2008-00396963 and in Volume 5433, Page 49 of the Deed Records of Rockwall County, Texas (DRRCT), SAVE AND EXCEPT the called "Parcel 16 (Parts 1 and 2)" conveyed to the City of Rockwall, recorded as Instrument No. 2007-00380919 and in Vol u me 5124, Page 210 (DRRCT), and being more particularly described as follows:

BEGINNING at a 1/2" capped iron rod stamped, "6081," found for corner in the northeasterly right-of-way line of John King Boulevard (120' right-of-way) at the com mon north corner of said "Part 1" of Parcel 16 and called "Parcel 15" conveyed to the City of Rockwall, recorded as Instrument No. 2009-00424601 and in Volume 5951, Page 84 (DRRCT), said point also being in the common line of said "First Tract" and a called 29.185 acre tract of land conveyed to Gideon Grove Ltd., recorded as Instrument No. 20150000014609 of the Official Public Records of Rockwall County, Texas;

THENCE North 72°06'44" West along the common northeasterly line of said John King Boulevard and said Part 1, a distance of 1,126.56 feet to a point for corner at the beginning of a tangent curve to the right, having a radius of 1,140.00 feet and a chord which bears North 44° 02' 06" West, a distance of 1,073.12-feet;

THENCE in the northwesterly direction along said curve to the right, and last mentioned common line, through a central angle of 56°09'19", an arc distance of 1,117.31-feet to a 1/2" iron rod with a yellow cap stamped, "RPLS 3963," set for corner at the end of said curve and at the most northerly corner of said Part 1;

THENCE North 00°38'27" West continuing along the east right-of-way line of said John King Boulevard, a distance of 261.96 feet to a "PK" nail set for corner at the southwest corner of said Part 2;

THENCE North 89°38'44" East along the south line of said Part 2, a distance of 50.00 feet to a 1/2" iron rod with a yellow cap found for the southeast corner thereof;

THENCE North 00°38'27" West along the east line of said Part 2, a distance of 40.00 feet to a 1/2" iron rod with a yellow cap found for the northeast corner thereof in the north line of said Second Tract and being in the south line of a tract of land conveyed to Randy and Gwen Reed, recorded in Volume 260, Page 1 (DRRCT);

THENCE North 89°38'05" East along the common line of last mentioned tracts, at 1,051.89 feet passing a 1/2" iron rod found for the southeast corner of said Reed tract com mon to the southwest corner of Park Ridge Estates, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 390 of the Plat Records of Rockwall County, Texas (PRRCT), and continuing along the north line of said Second Tract and the south line of said Park Ridge Estates, a total distance of 1,736.25 feet to a 3/8" iron rod found for the com mon east corner thereof, and being in the west line of Block A of Windmill Valley Subdivision, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 157 (PRRCT);

THENCE South 01°17'27" East along the common line of said Second Tract and said Block A, a distance of 669.75 feet to a 1/2" iron rod found for the southwest corner of said Block A, and being the northwest corner of said 29.185 acre tract;

THENCE South 01°30'45" East along the west line of said 29.185-acre tract and partially along the east lines of said First Tract and said Second Tract, a distance of 761.52 feet to the PLACE OF BEGINNING and Containing 44.292 acres, or 1,929,345 square feet, of land.

TRACT 2:

BEING 11.121 acres of land situated in the P. B. Harrison Survey, Abstract No. 97, Rockwall County, Texas, and being all of a called 11.126 acre tract of land described in a Warranty Deed with Vendor's Lien to Randy Reed and wife, Gwen Reed, recorded in Volume 260, Page 1 of the Deed Records of Rockwall County, Texas (DRRCT), and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner near the edge of an asphalt surface in the east margin of Hays Road, said point being the common west corner of said Reed tract and a tract of land conveyed to Stephen L. Branch and Judy C. Branch, recorded in Volume 234, Page 527 (DRRCT);

THENCE North 89°26'12" East along the common line of last mentioned tracts, a distance of 1,092.52-feet to a 1/2" iron rod found for the common east corner thereof, and being in the west line of Park Ridge Estates, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 390 of the Plat Records of Rockwall County, Texas (PRRCT);

THENCE South 00°30'07" East along the common line of said Reed tract and said Park Ridge Estates, a distance of 446.60 feet to a 1/2" iron rod found for the common south corner thereof, and being in the north line of a called 32 acre tract described, in a Special Warranty Deed to R & R Hance Investments, L.P., as "*Second Tract*," recorded as Instrument No. 2008-00396963 and in Volume 5433, Page 49 (DRRCT);

THENCE South 89°38'05" West along the common line of said Second Tract and said Reed tract, a distance of 1,086.19-feet to a 1/2" iron rod found at the southwest corner of said Reed tract and being in the east margin of said Hays Road;

THENCE North 01°19'17" West along the west line of said Reed tract and the east line of said Hays Road, a distance of 442.88-feet to the PLACE OF BEGINNING and Containing 11.121-acres, or 484,450 square feet, of land.

TRACT 3:

BEING 14.955 acres of land situated in the P.B. Harrison Survey, Abstract No. 97, Rockwall County, Texas, and all of a called 15.00 acre tract of land described in a Warranty Deed to Steve L. Branch and wife Judy C. Branch, recorded in Volume 234, Page 527 of the Deed Records of Rockwall County, Texas (DRRCT), and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner in the original Hays Road at the common west corner of said 15.00 acre tract and a tract of land described in a deed to Randy and Gwen Reed, recorded in Volume 260, Page 1 (DRRCT);

THENCE North 01°10'15" West, continuing along and within Hays Road and with the west line of said 15.00 acre Branch tract, a distance of 596.15 feet, to a 1/2" iron rod found for corner at the northwest corner thereof, common to the southwest corner of a called 15.00 acre tract of land described in a deed to Gerald Glen Cox and wife Rosalba Cox, recorded in Volume 3295 Page 9, (DRRCT);

THENCE North 89°26'26" East, along the common line of last mentioned tracts, a distance of 1,099.11 feet, to a point for corner at the common east corner thereof, and also being in the west line of Park Ridge Estates, an addition to the City of Rockwall, according to the Plat thereof recorded in Cabinet A, Page 390 of the Plat Records of Rockwall County, Texas (PRRCT), from which a 1/2" iron rod with a yellow cap stamped "5034" bears South 68°26'26" West, a distance of 0.18 feet;

THENCE South 00°32'13" East, along the common line of said Branch tract and said Park Ridge Estates, a distance of 596.04 feet, to a 1/2" iron rod found for corner at the southeast corner thereof, common to the northeast corner of said Reed tract;

THENCE South 89°26'12" West, along the common line of last mentioned tracts, a distance of 1,092.52 feet to PLACE OF BEGINNING and Containing 653,191 square feet, or 14.995 acres of land.

Exhibit 'B':
Concept Plan

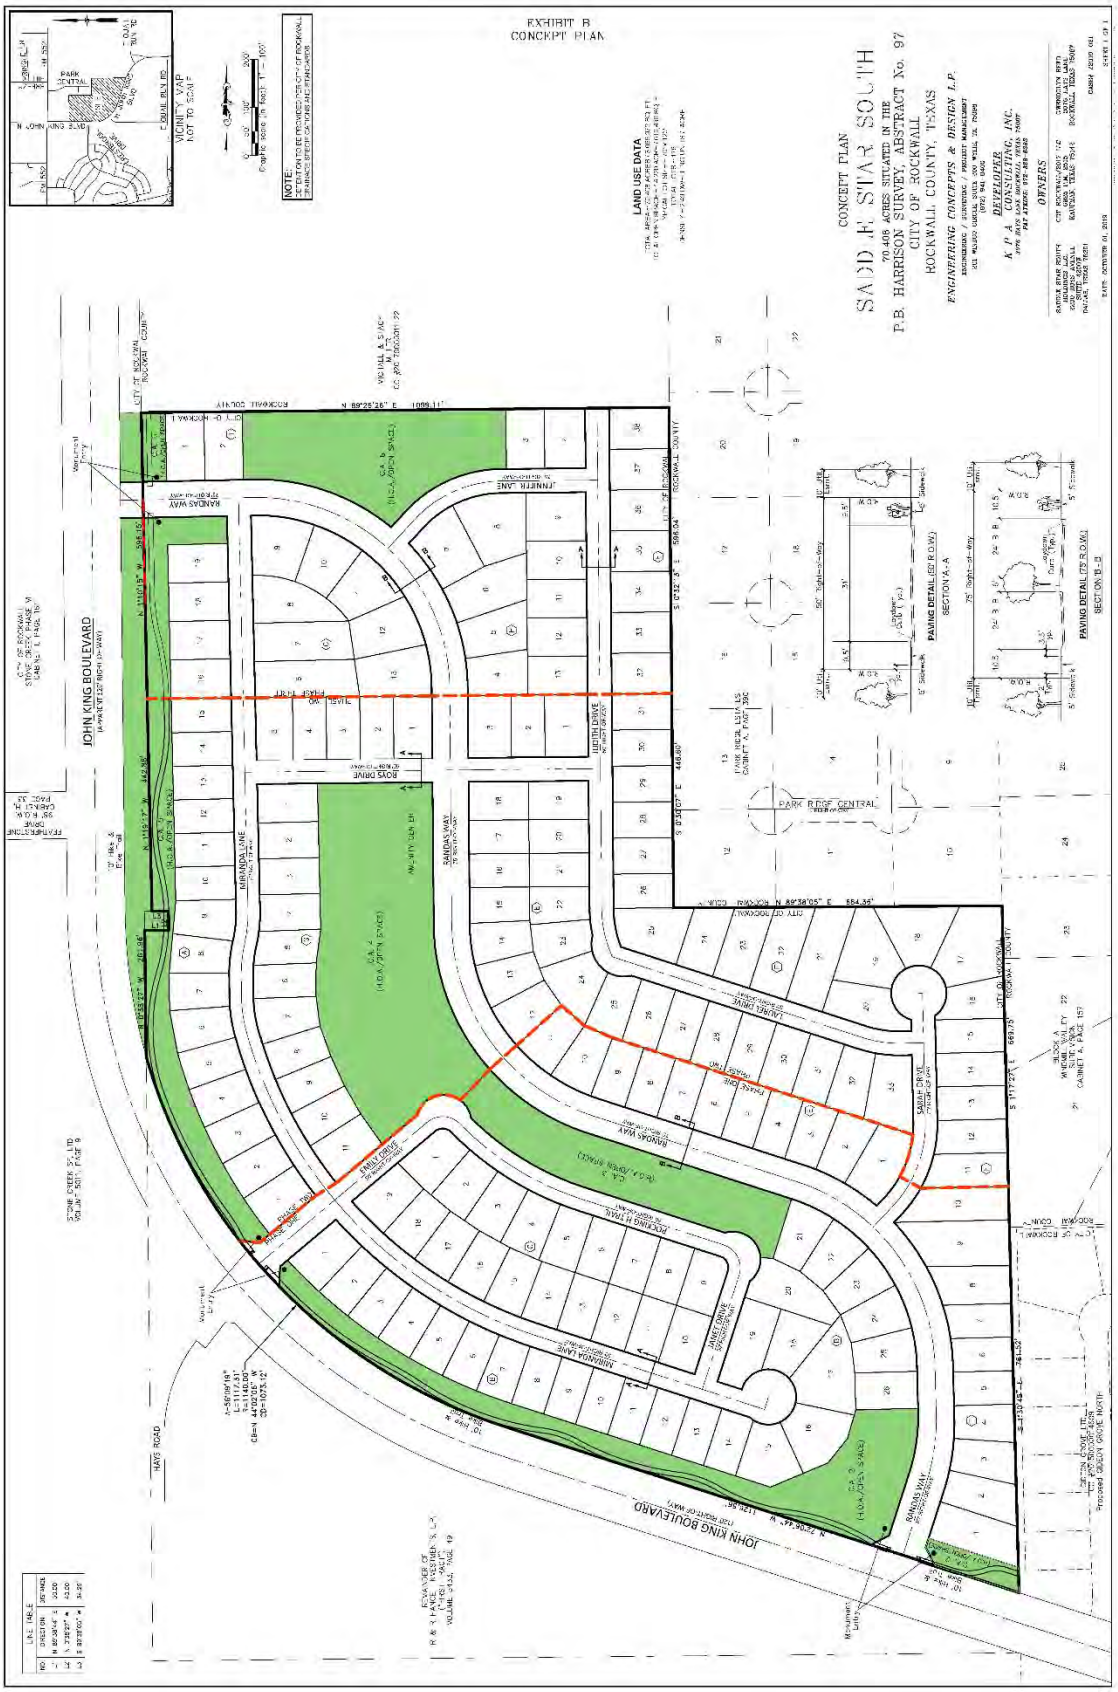

Exhibit 'C':
Development Standards

Development Standards.

1. *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, only those uses permitted within the Single Family 8.4 (SF-8.4) District, as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC), are allowed on the *Subject Property*.

2. *Lot Composition and Layout.* The lot layout and composition shall generally conform to the *Concept Plan* depicted in *Exhibit 'B'* and stated in *Table 1*, which is as follows:

Table 1: Lot Composition

Lot Type	*Minimum Lot Size (FT)*	*Minimum Lot Size (SF)*	*Dwelling Units (#)*	*Dwelling Units (%)*
A	70' x 125'	8,750 SF	143	78.41%
B	80' x 125'	10,000 SF	33	21.59%
		Maximum Permitted Units:	*176*	*100.00%*

3. *Density and Dimensional Requirements.* Unless specifically provided by this Planned Development ordinance, the development standards stipulated by the Single Family 8.4 (SF-8.4) District, as specified by Article V, *District Development Standards*, of the Unified Development Code are applicable to all development on the *Subject Property.* The maximum permissible density for the *Subject Property* shall not exceed *2.50* dwelling units per gross acre of land; however, in no case should the proposed development exceed *176* units. All lots shall conform to the standards depicted in *Table 2*, which is as follows:

Table 2: Lot Dimensional Requirements

Lot Type >	*A*	*B*
Minimum Lot Width [1]	70'	80'
Minimum Lot Depth	125'	125'
Minimum Lot Area	8,750 SF	10,000 SF
Minimum Front Yard Setback [2] & [5]	20'	20'
Minimum Side Yard Setback	5'	5'
Minimum Side Yard Setback (Adjacent to a Street) [2] & [5]	10'	10'
Minimum Length of Driveway Pavement	25'	25'
Maximum Height [3]	30'	30'
Minimum Rear Yard Setback [4]	20'	20'
Minimum Area/Dwelling Unit (SF)	2,700 SF	2,700 SF
Maximum Lot Coverage	65%	65%
Permitted Encroachment into Required Setbacks [5]	Allowed	Allowed

General Notes:

[1]: The minimum lot width shall be measured at the *Front Yard Building Setback*.

[2]: The location of the *Front Yard Building Setback* as measured from the front property line.

[3]: The *Maximum Height* shall be measured to the eave or top plate (whichever is greater) of the single-family home.

[4]: As measured from the rear yard property line.

[5]: Sunrooms, porches, stoops, bay windows, balconies, masonry clad chimneys, eaves and similar architectural features may encroach beyond the *Front Yard Building Setback* by up to ten (10) feet for any property; however, the encroachment shall not exceed five (5) feet on *Side Yard Setbacks (Adjacent to a Street)* and shall not encroach into public right-of-way [a *Sunroom* is an enclosed room no more than 15-feet in width that has glass on at least 50% of each of the encroaching faces].

4. *Building Standards.* All development shall adhere to the following building standards:

(a) *Masonry Requirement.* The minimum masonry requirement for the exterior façades of all buildings shall be 90%. For the purposes of this ordinance, the masonry requirement shall be limited to full width brick, natural stone, and cast stone. Cementaceous fiberboard horizontal lap-siding (*e.g. HardiBoard or Hardy Plank*) and, stucco (*i.e. three [3] part stucco or a comparable -- to be determined by staff*) may be used for up to 50% of the masonry requirement; however, stucco (*i.e. three [3] part stucco or a comparable -- to be determined by staff*) shall be permitted through a Specific Use Permit (SUP) only.

(b) *Roof Pitch.* A minimum of an *8:12* roof pitch is required on all structures with the exception of sunrooms and porches, which shall have a minimum of a *4:12* roof pitch.

(c) *Garage Orientation.* A minimum of 50% of the garages for the *Type A* lots and 100% of the *Type B* lots shall be oriented in a *traditional swing* (*or j-swing*) configuration. The remainder of garages maybe configured in a front entry configuration with a minimum setback of 20-feet (*i.e. allowing the garage to be flush with the front façade of the primary structure*). In this case the front façade of the primary structure does not include a permitted encroachment (*e.g. a porch, sunroom, etcetera*) allowed in *Table 2* above. All garage configurations that are not front entry shall meet the requirements of Article VI, *Parking and Loading*, of the Unified Development Code.

5. *Anti-Monotony Restrictions.* The development shall adhere to the *Anti-Monotony Matrix* depicted in *Table 3* below (*for spacing requirements see the illustration below*).

Table 3 : Anti-Monotony Matrix

Lot Type	*Minimum Lot Size*	*Elevation Features*
A	70' x 125'	(1), (2), (3), (4)
B	80' x 125'	(1), (2), (3), (4)

(1) Identical brick blends or paint colors may not occur on adjacent (*side-by-side*) properties along any block face without at least five (5) intervening homes of differing materials on the same side of the street beginning with the adjacent property and six (6) intervening homes of differing materials on the opposite side of the street.

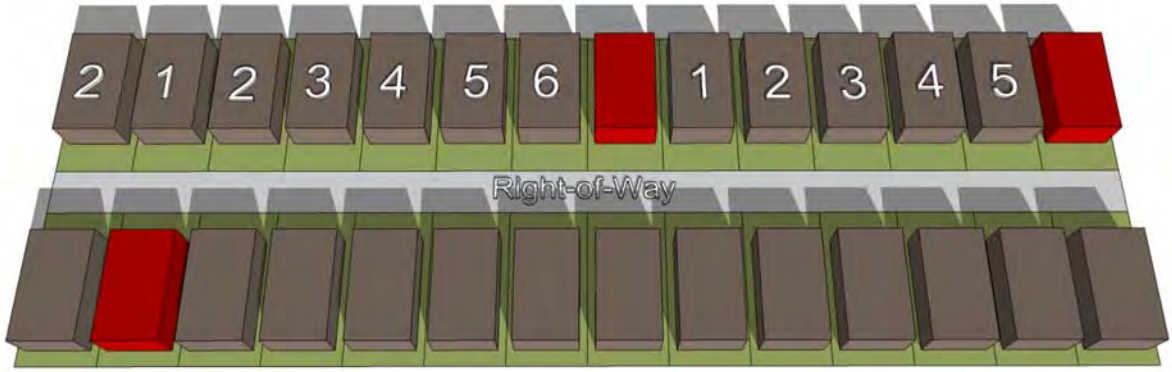
(2) Front building elevations shall not repeat along any block face without at least five (5) intervening homes of differing appearance on the same side of the street and six (6) intervening homes of differing appearance on the opposite side of the street. The rear elevation of homes backing to open spaces or on John King Boulevard shall not repeat without at least five (5) intervening homes of differing appearance. Homes are considered to have a differing appearance if any of the following two (2) items deviate:

(a) Number of Stories
(b) Permitted Encroachment Type and Layout
(c) Roof Type and Layout
(d) Articulation of the Front Façade

(3) Permitted encroachments (*i.e. porch and sunroom*) elevations shall not repeat or be the same along any block face without at least five (5) intervening homes of sufficient dissimilarity on the same side of the street beginning with the home adjacent to the subject property and six (6) intervening homes beginning with the home on the opposite side of the street.

(4) Each phase of the subdivision will allow for a maximum of four (4) compatible roof colors, and all roof shingles shall be an architectural or dimensional shingle (*3-Tab Roofing Shingles are prohibited*).

Illustration 1: Properties line up on the opposite side of the street. Where RED is the subject property.



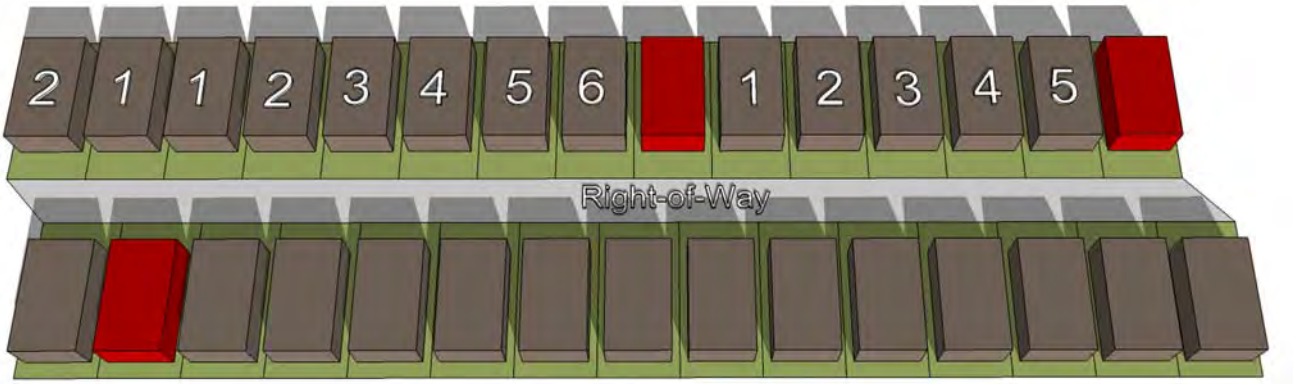


Illustration 2: Properties do not line up on opposite side of the street. Where RED is the subject property.

6. *Fencing Standards.* All individual residential fencing and walls shall be architecturally compatible with the design, materials and colors of the primary structure on the same lot, and meet the following standards:

(a) Wood Fences. All wood fences shall be constructed of a standard fencing material (*minimum of ½" thickness or better; spruce fencing will not be allowed*), and use fasteners that are hot dipped galvanized or stainless steel. Wood fences facing onto a street shall be painted and/or stained and sealed with all pickets being placed on the *public side* facing the street. All wood fences shall be smooth-finished, free of burs and splinters, and be a maximum of six (6) feet in height.

(b) Wrought Iron/Tubular Steel. Lots located along the perimeter of roadways, abutting open spaces, greenbelts and parks shall be required to install a wrought iron or tubular steel fence. Wrought iron/tubular steel fences can be a maximum of six (6) feet in height.

(c) Corner Lots. Corner lots fences (*i.e. adjacent to the street*) shall provide masonry columns at 45-feet off center spacing that begins at the rear of the property line. A maximum of six (6) foot solid *board-on-board panel* fence constructed utilizing cedar

fencing shall be allowed between the masonry columns along the side and/or rear lot adjacent to a street. In addition, the fencing shall be setback from the side property line adjacent to a street a minimum of five (5) feet. The property owner shall be required to maintain both sides of the fence.

(d) Solid Fences (including Wood Fences). All solid fences shall incorporate a decorative top rail or cap detailing into the design of the fence.

7. Landscape and Hardscape Standards.

(1) *Landscape.* Landscaping shall be reviewed and approved with the PD Site Plan. All *Canopy/Shade Trees* planted within this development shall be a minimum of four (4) caliper inches in size and all *Accent/Ornamental/Under-Story Trees* shall be a minimum of four (4) feet in total height. The following tree species are approved for planting within this subdivision:

(a) Canopy/Shade Trees. Bald Cyprus, Cedar Elm, Texas Red Oak, Homestead Elm, Lace Bark Elm, Alle Elm, Chinese Pistachio, Shumard Oak, Sycamore, and Burr Oak.

(b) Accent/Ornamental/Under-Story Trees. Texas Redbud, Eve's Necklace, Mexican Plum, Downy Hawthorn, Crepe Myrtle, Texas Mountain Laurel, Vitex, and Desert Willow.

(2) *Landscape Buffers.* All landscape buffers and plantings located within the buffers shall be maintained by the Homeowner's Association (HOA).

(a) Landscape Buffer and Sidewalks (John King Boulevard). A minimum of a 50-foot landscape buffer shall be provided along the frontage of John King Boulevard (*outside of and beyond any required right-of-way dedication*), and shall incorporate ground cover, a *built-up* berm and shrubbery along the entire length of the frontage. Berms and shrubbery shall have a minimum height of 30-inches and a maximum height of 48-inches. In addition, three (3) canopy trees and four (4) accent trees shall be planted per 100-feet of linear frontage. The developer shall also be responsible for the construction of a ten (10) foot curvilinear sidewalk situated within the 50-foot landscape buffer adjacent to John King Boulevard.

(3) *Streetscape Landscaping.* Prior to the issuance of a Certificate of Occupancy (CO), all residential, single family lots situated within the proposed subdivision shall be landscaped with canopy trees from the list stipulated by *Section 7(1)* of this ordinance in the following sizes and proportions:

(i) Two (2), three (3) inch trees measured six (6) inches above the root ball shall be planted in the front yard of an interior lot.

(ii) Two (2), three (3) inch trees measured six (6) inches above the root ball shall be planted in the front yard of a corner lot and two (2), three (3) inch caliper trees shall be planted in the side yard facing the street.

Note: For the purposes of this section only [i.e. Section 7(3)], the term "front yard" includes the area within the dedicated right-of-way for a parkway immediately adjoining the front yard of the lot.

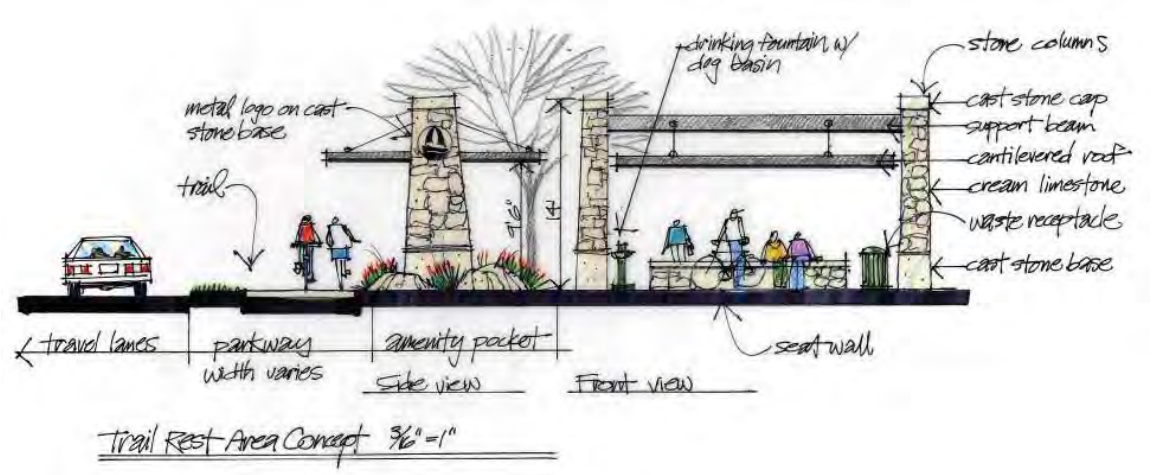
(4) *Irrigation Requirements*. Irrigation shall be installed for all required landscaping located within common areas, landscape buffers and/or open space. Irrigation installed in these areas shall be designed by a Texas licensed irrigator or landscape architect and shall be maintained by the Homeowner's Association.

(5) *Hardscape.* Hardscape plans indicating the location of all sidewalks and trails shall be reviewed and approved with the PD Site Plan.

8. *Street.* All streets (*excluding drives, fire lanes and private parking areas*) shall be built according to City street standards.

9. *Lighting.* Light poles shall not exceed 20-feet in total height (*i.e. base and lighting standard*). All fixtures shall be directed downward and be positioned to contain all light within the development area.

10. *Sidewalks.* At a maximum, all sidewalks adjacent to a street shall begin two (2) feet behind the right-of-way line and be five (5) feet in overall width.



11. *Buried Utilities.* New distribution power-lines required to serve the *Subject Property* shall be placed underground, whether such lines are located internally or along the perimeter of the *Subject Property*, unless otherwise authorized by the City Council. Temporary power-lines constructed across undeveloped portions of the *Subject Property* to facilitate development phasing and looping may be allowed above ground, but shall not be considered *existing lines* at the time the area is developed, and if they are to become permanent facilities, such lines shall be placed underground pursuant to this paragraph. Franchise utilities shall be placed within a ten (10) foot public utility easement behind the sidewalk, between the home and the property line.

12. *Open Space.* The development shall consist of a minimum of *20%* open space (*or 14.082-acres*), and generally conform to the *Concept Plan* contained in *Exhibit 'B'* of this ordinance. All open space areas shall be maintained by the Homeowner's Association (HOA).

Continued on Next Page …

13. *Trail Rest Area.* The developer shall be responsible for the construction of a *Trail Rest Area* that generally conforms to the rest area depicted in *Figure 1* (*below*).

Figure 1: *Trail Rest Area Concept*

14. *Neighborhood Signage.* Permanent subdivision identification signage shall be permitted at all major entry points for the proposed subdivision. Final design and location of any entry features shall be reviewed and approved with the *PD Site Plan*.

15. *Homeowner's Association (HOA)*. A Homeowner's Association shall be created to enforce the restrictions established in accordance with the requirements of Section 38-15 of the Subdivision Regulations contained within the Municipal Code of Ordinances of the City of Rockwall. The HOA shall also maintain all neighborhood parks, trails, open space and common areas, irrigation, landscaping, screening fences associated with this development.

16. *Variances*. The variance procedures and standards for approval that are set forth in the Unified Development Code shall apply to any application for variances to this ordinance.

CITY OF ROCKWALL

ORDINANCE NO. 19-41

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING PLANNED DEVELOPMENT DISTRICT 70 (PD-70) AND THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING THE DEVELOPMENT STANDARDS APPROVED WITH ORDINANCE NO. 09-44, BEING A 395.075-ACRE TRACT OF LAND SITUATED IN THE W. T. DEWEESE SURVEY, ABSTRACT NO. 71 AND THE S. KING SURVEY, ABSTRACT NO. 131, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has received a request by Adam Buczek of Stone Creek Balance, LTD for the approval of a zoning amendment to Planned Development District 70 (PD-70) for the purpose of changing the number of hard-edged retention ponds required for the Stone Creek Subdivision being a 395.075-acre tract of land situated in the W. T. DeWeese Survey, Abstract No. 71 and the S. King Survey, Abstract No. 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for General Retail (GR) District and Single Family 10 (SF-10) District land uses, located at the southwest corner of FM-552 and N. Goliad Street (*SH-205*), and more fully described in *Exhibit 'A'* of this ordinance, which hereinafter shall be referred to as the *Subject Property* and incorporated by reference herein; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the affected area, and in the vicinity thereof, and the governing body in the exercise of its legislative discretion, has concluded that Planned Development District 70 [*Ordinance No.'s 07-13, 09-44 & 11-35*] and the Unified Development Code [*Ordinance No. 04-38*] should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

Section 1. That the approval of this ordinance shall supersede all requirements stipulated in *Ordinance No.'s 07-13, 09-44 & 11-35*;

Section 2. That the *Subject Property* shall be used only in the manner and for the purposes authorized by this Planned Development District Ordinance and the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall as heretofore amended, as amended herein by granting this zoning change, and as maybe amended in the future;

Section 3. That development of the *Subject Property* shall generally be in accordance with the *Planned Development Concept Plan*, contained in *Exhibit 'B'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'B'*, which is deemed hereby to be a

condition of approval of the amended zoning classification for the *Subject Property*;

Section 4. That development of the *Subject Property* shall generally be in accordance with the *Development Standards*, contained in *Exhibit 'C'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'C'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

Section 5. A PD Development Plan must be approved for the areas designated as *Retail* on the *Concept Plan* contained in *Exhibit 'B'*; however, the *PD Development Plan* application may be processed by the City of Rockwall concurrently with a preliminary plat application and *PD Site Plan* application.

Section 6. That the official zoning map of the City of Rockwall shall be corrected to reflect the changes in zoning as described herein.

Section 7. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars* (*$2,000.00*) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

Section 8. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

Section 9. The standards in this ordinance shall control in the event of a conflict between this ordinance and any provision of the Unified Development Code or any provision of the City Code, ordinance, resolution, rule, regulation, or procedure that provides a specific standard that is different from and inconsistent with this ordinance. References to zoning district regulations or other standards in the Unified Development Code (including references to the *Unified Development Code*), and references to overlay districts, in this ordinance or any of the Exhibits hereto are those in effect on the date this ordinance was passed and approved by the City Council of the City of Rockwall, Texas;

Section 10. That this ordinance shall take effect immediately from and after its passage.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF NOVEMBER, 2019.

Exhibit 'A':
Legal Description

LEGAL DESCRIPTION

Being a 395.075-Acre tract of land situated in the W. T. DeWeese Survey, Abstract No. 71 and the S. King Survey, Abstract No. 131, City of Rockwall, Rockwall County, Texas and being all of a called 385.075-acre tract of land conveyed to W. W. Caruth Jr. by Deed recorded in *Volume 54, Page 22* Deed Records, Rockwall County, Texas (DRRCT) and also being all of a called 2.25-acre tract of land conveyed to Soden H. Harris and wife Adrine V. Harris by deed recorded in *Volume 50, Page 375* (DRRCT) being more particularly described by metes and bounds as follows:

BEGINNING at a ½-inch iron pipe found for a northeast corner of aforesaid 392.938-acre tract and being the northwest corner of Rockwall Middle School No. 4 Addition to the County of Rockwall by plat recorded in *Cabinet F, Page 67*, Plat Records, Rockwall County, Texas and being on the south right-of-way line of FM-552 (a variable width right-of-way).

THENCE South 00 Degrees 35 Minutes 35 Seconds East along a east line of aforesaid 392.938-acre tract and the common west line of aforesaid Rockwall Middle School No. 4 Addition a distance of 1,270.02-feet to a ½-inch capped iron rod found for the inside corner of said 382-938-acre tract and the southwest corner of said Rockwall Middle School No. 4 Addition.

THENCE North 69 Degrees 25 Minutes 13 Seconds East along a north line of aforesaid 392.938-acre tract and the common south line of aforesaid Rockwall Middle School No. 4 Addition a distance of 1,331.00-feet to a PK Nail set for a northeast corner of said 392.938-acre tract in the approximate centerline of Hayes Road (a variable width prescriptive right-of-way) and being on the west line of a called 15.00-acre tract of land conveyed to Steve L. Branch and wife Judy C. Branch by deed recorded in *Volume 234, Page 527 D*eed Records, Rockwall County, Texas a ½-inch capped iron rod found bears North 87 Degrees 58 Minutes 03 Seconds a distance of 22.82-feet.

THENCE South 00 Degrees 35 Minutes 35 Seconds East along the east line of aforesaid 392.938-acre tract and the approximate centerline of aforesaid Hayes Road and the west line of aforesaid 15.00-acre tract and the west line of a called 11.126-acre tract of land conveyed to Leon A. Smith by deed recorded in *Volume 160, Page 1,* Deed Records, Rockwall County, Texas and the west line of a called 32.00-acre and 35.5-acre tracts of land conveyed to Roy Lee Hance by deed recorded in *Volume 68, Page 73*, Deed Records, Rockwall County, Texas, a distance of 3,980.56-feet to a PK Nail set for the southeast corner of said 392.938-acre tract and being on the north line of a called 38.639-acre tract of land conveyed to Roy L. Hance and wife, Randa B. Hance by deed recorded in *Volume 91, Page 107* Deed Records, Rockwall County, Texas.

THENCE along the south line of aforesaid 392.938-acre tract and the common north line of aforesaid 30.033-acre tract and the north line of Quail Run Valley No. 2 an addition to the City of Rockwall by plat recorded in *Cabinet E, Page 185*, Plat Records, Rockwall County, Texas and the north line of Quail Run Valley, No. 1 an addition to the City of Rockwall by Plat Recorded in *Cabinet E, Page 57,* Plat Records, Rockwall County, Texas the following courses and distances:

South 89 Degrees 34 Minutes 36 Seconds West a distance of 2,364.65-Feet to a 5/8-inch iron rod with a yellow plastic cap stamped *Carter Burgress* set for corner.

South 88 Degrees 24 Minutes 39 Seconds West a distance of 650.72-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgress* set for a southwest corner of aforesaid 392.938-acre tract.

THENCE North 54 Degrees 44 Minutes 21 Seconds West a distance of 165.14-feet to a ½-inch iron pipe found for corner on the east right-of-way of State Highway 205 (a 100-foot right-of-way).

THENCE along the west line of aforesaid 392.938-acre tract and the common east right-of-way of aforesaid State Highway 205 the following courses and distances:

North 14 Degrees 18 Minutes 45 Seconds West a distance of 1,942.08-feet to a 5/8 inch iron rod with a

yellow plastic cap stamped *Carter Burgess* set for corner and the beginning of a tangent curve to the right having a central angle of 10 Degrees 15 Minutes 35 Seconds a radius of 5,380.00-feet. A chord bearing of North 69 Degrees 11 Minutes 27 Seconds West and a chord length of 1,015.74-feet.

Along said tangent curve to the right an arc length of 1,017.09-feet to a concrete right-of-way monument found for corner.

North 04 Degrees 03 Minutes 51 Seconds West a distance of 379.29-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner, a concrete right-of-way monument found bears South 00 Degrees 29 Minutes 25 Seconds West a distance of 4.10-feet and being the beginning of a tangent curve to the right having a central angle of 03 Degrees 07 Minutes 00 Seconds a radius of 5,580.00-feet a cord bearing of North 02 Degrees 30 Minutes 27 Seconds West and a chord length of 305.93-feet.

Along said tangent curve to the right an arc length of 305.97-feet, to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner a concrete right-of-way monument found bears South 02 Degrees 45 Minutes 01 Seconds East a distance of 3.95-feet.

North 00 Degrees 56 Minutes 57 Seconds West a Distance of 1,499.13-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner a concrete right-of-way monument found bears South 10 Degrees 54 Minutes 38 Seconds East, a distance of 5.48-feet.

North 44 Degrees 58 Minutes 31 Seconds East a distance of 85.41-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner at the intersection of the east right-of-way of aforesaid State Highway 205 and the south right-of-way of aforesaid FM-552 a concrete right-of-way monument found bears South 83 Degrees 49 Minutes 06 Seconds West a distance of 16.86-feet.

THENCE along the north line of aforesaid 392.938-acre tract and the common south right-of-way of aforesaid FM-552 the following courses and distances:

North 89 Degrees 09 Minutes 25 Seconds East a distance of 1,890.00-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner.

South 00 Degrees 50 Minutes 35 Seconds East, a distance of 10.00-feet to a 5/8 inch iron rod with a yellow plastic cap stamped *Carter Burgess* set for corner.

North 89 Degrees 09 Minutes 25 Seconds East a distance of 521.43-feet to the *Point of Beginning* and containing 395.075-acres of land, more or less.

Exhibit 'B':
Concept Plan

Exhibit 'C':
PD Development Standards

A. GENERAL REQUIREMENTS

1. *Uses Allowed.* The following uses are permitted for the *Subject Property*.

    a. *Residential Uses*. Uses permitted of right or by Specific Use Permit (SUP) for the Single Family 10 (SF-10) District, as set forth in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance 04-38*], shall be allowed for areas designated for single-family (*i.e. labeled as 50's, 60's, 70's, 80's & 100's*) on the *Concept Plan*, subject to approval of a Specific Use Permit (SUP) if required by the Single Family 10 (SF-10) District regulations.

    b. *Non-residential uses*. Non-residential uses shall be allowed only within the area designated as retail on the approved *Concept Plan* for the district, and are limited to those uses permitted of right or by special use permit for the General Retail (GR) District subject to approval of a *PD Development Plan* and *PD Site Plan* in accordance with the Planned Development District regulations contained in Section 2 of Article X, *Planned Development Regulations*. of the Unified Development Code [*Ordinance No. 04-38*], and subject to approval of a Specific Use Permit (SUP) if required by the General Retail (GR) District regulations; provided, however, that the following uses are expressly prohibited:

    ☑ Animal Hospital/Clinic
    ☑ Animal Boarding/Kennel without Outside Pens
    ☑ Convent or Monastery
    ☑ Hotel or Motel
    ☑ Hotel, Residence
    ☑ Cemetery/Mausoleum
    ☑ Mortuary of Funeral Chapel
    ☑ Social Service Provider
    ☑ Billiard Parlor or Pool Hall
    ☑ Carnival, Circus, or Amusement Ride
    ☑ Commercial Amusement/Recreation (*Outside*)
    ☑ Gun Club, Skeet or Target Range (*Indoor*)
    ☑ Astrologer, Hypnotist, or Psychic Art and Science
    ☑ Garden Supply/Plant Nursery
    ☑ Night Club, Discotheque, or Dance Hall
    ☑ Secondhand Dealer
    ☑ Auto Repair Garage (*Minor*)
    ☑ Car Wash, Self Service*
    ☑ Service Station*
    ☑ Mining and Extraction (*Sand, Gravel, Oil & Other*)
    ☑ Helipad
    ☑ Railroad Yard or Shop
    ☑ Transit Passenger Facility

    ** Not including a convenience store with an accessory car wash use or more than two (2) gas pumps, which accessory uses are permitted by SUP.*

    The following additional use shall be permitted of right in the PD District:

    ☑ Grocery Store with a maximum building area of eighty thousand (80,000) square feet.

    c. *Design of Non-Residential Uses.* The retail areas shall be designed to be pedestrian-oriented and easily accessible to adjacent residential neighborhoods. Additionally, the retail area shall be designed and constructed to be integrated with adjacent uses, not separated from them by screening walls or other physical barriers. This will be

accomplished by creating paths from adjacent development into the retail area and through the use of landscaping buffers, building design and other urban design elements to create compatibility with the surrounding residential neighborhood.

d. *Density and Lot Composition*. No more than 918 single-family residential dwelling units may be constructed within the *Subject Property*. Except as provided in subsection (e), single-family residential units shall be allocated by product type in accordance with the following table:

Table 1: Lot Composition

Lot Type	Lot Size Minimum	Lot SF Minimum	Driveway Access	Total Units	Total Dwelling Units (%)
A	50' x 120'	6,000	Front	180	19.6%
B	60' x 120'	7,200	Front	521	56.8%
C	70' x 120'	8,400	Front	36	03.9%
D	80' x 125'	10,000	Front	134	14.6%
E	100' x 200'	20,000	Front	47	05.1%
AVERAGE LOT SIZE:		8,000 SF			
			MAXIMUM ALLOWED TOTAL UNITS:	918	100%

e. *Variation in lot composition.* The allocation of single-family dwellings among lot types may deviate from that in subsection (d), provided that the maximum allowed total dwelling units does not exceed 918 units, the average lot size for the development is not less than 8,000 square feet, and the following rules are met:

(1) Lot types 'A', 'B', & 'C' may increase not more than 5% in aggregate number.

(2) Lot type 'D' shall not be decreased below 124 lots of the total lots developed on the *Subject Property*.

(3) Lot type 'E' shall not be decreased below 47 lots of the total lots developed on the *Subject Property*.

2. *Development Standards Applicable.*

(1) *Residential uses*. Except as may be modified by these *PD Development Standards*, areas designated for single-family (*i.e. labeled as 50's, 60's, 70's, 80's & 100's*) shall be subject to the development standards for the Single Family 10 (SF-10) District, as set forth in Subsection 3.07 of Article V, *District Development Standards*, of the Unified Development Code (UDC), to the development standards stipulated for the North SH-205 Overlay (N SH-205 OV) and the SH-205 Bypass Overlay (205 BY-OV) Districts, and to all supplemental standards contained in the Unified Development Code in effect on the effective date of this ordinance.

(2) *Non-residential uses.* Except as may be modified by these *PD Development Standards*, areas designed for *Retail* land uses shall be subject to the development standards for the General Retail (GR) District, as set forth in Subsection 4.04 of Article V, *District Development Standards*, of the Unified Development Code (UDC), to the development standards stipulated for the North SH-205 Overlay (N SH-205 OV) and the SH-205 Bypass Overlay (205 BY-OV) Districts, and to all supplemental standards

contained in the Unified Development Code in effect on the effective date of this ordinance.

3. *Homeowner's Association (HOA).* A *Homeowner's Association* (*HOA*) shall be formed and duly incorporated in the State of Texas for the *Subject Property*. Membership shall be mandatory for the owner of each residential lot within these areas of the *Subject Property*. This HOA shall be established to ensure the proper maintenance of all common areas for which the HOA is either the owner or is the party designated as responsible for maintenance. The bylaws of this HOA shall establish a system of payment of dues, a system of enforcement of its rules and regulations; and an explanation of the responsibility of each member with regard to the common areas. The bylaws shall be submitted to the Director of Planning for review and approval, not to be unreasonably withheld, for conformity with this paragraph prior to the initial transfer to the HOA of ownership of any real property.

4. *Architectural Review.* All developments within the PD District shall be reviewed by an Architectural Review Committee (ARC) for the *Subject Property*, which will be composed of *Developer* representatives, throughout the completion of development. The ARC shall remain in effect until all new construction has concluded. City of Rockwall building permits shall not be issued prior to ARC approval. Certification of ARC approval shall be submitted with each building permit application, which shall comply with all anti-monotony standards as described in *Section B.4.*, *Anti-Monotony Features* of this document.

B. SPECIAL DEVELOPMENT STANDARDS

1. Dimensional Standards for Residential Uses.

Table 2: Lot Type Matrix

Lot Types	A	B	C	D	E
Maximum Building Height	36'	36'	36'	36'	36'
Minimum Air Conditioned Square Footage	1,800	2,200	2,400	2,600 [2]	3,000
Minimum Front Yard Building Setback	15'	20'	20'	20'	25'
Minimum Rear Yard Building Setback	10'	10'	15'	15'	15'
Minimum Side Yard (*Interior*)	5'	5'	5'	6'	7'
Minimum Side Yard Adjacent to a Street	15'	15'	15'	15'	15'
Minimum Distance of Driveway (*from Property Line*)	*N/A*	20'	20'	20'	25'
Minimum Lot Area (*Square Feet*)	6,000	7,200	8,400	10,000	20,000
Minimum Lot Frontage [1]	50'	60'	70'	80'	100'

NNotes:

[1]: *Lots fronting onto curvilinear streets, cul-de-sacs and eyebrows may be reduced by twenty percent (20%) in lot width measured at the front property line provided that the lot width will be met at the front building*

line. Additionally, the lot depth on lots fronting onto curvilinear streets, cul-de-sacs and eyebrows may be reduced by up to 10 percent (10%) but shall meet the minimum lot size for each lot type as referenced within Table 1.

[2]: A maximum of 20% of the lots may have homes not less than 2,500 sq. ft.

2. Development Standards for Residential Uses by Lot Product/Type

a. Detached Single Family Lot Type A

Development Standards	
Minimum Lot Size	6,000 SF
Minimum Lot Width (@ Front Building Line)	50'
Minimum Lot Depth	110'
Minimum Lot Width (Corner Lot)	55'
Minimum Side Yard Setback	5'
Minimum Front Yard Building Setback	15'
Minimum Rear Yard Building Setback	10'
Minimum Air Conditioned Square Footage	1,800 SF
Minimum Roof Pitch	8:12 Except for 4:12 on Porch Roofs
Minimum Masonry Requirement [*Brick, Stone, Cultured Stone, 3-Part Stucco, cementitious siding with color palette*]	80%
Garage Orientation	Garages will be allowed to be accessed from the street; however, a minimum driveway length of 20-foot must be provided.
Maximum Lot Coverage	75%

b. Detached Single Family Lot Type B

Development Standards	
Minimum Lot Size	7,200 SF
Minimum Lot Width (@ Front Building Line)	60'
Minimum Lot Depth	110'
Minimum Lot Width (Corner Lot)	65'
Minimum Side Yard Setback	5'
Minimum Front Yard Building Setback	20'
Minimum Rear Yard Building Setback	10'
Minimum Air Conditioned Square Footage	2,200 SF
Minimum Roof Pitch	8:12 Except for 4:12 on Porch Roofs
Minimum Masonry Requirement [*Brick, Stone, Cultured Stone, 3-Part Stucco*]	80%
Garage Orientation	Garages will be allowed to have the garage accessed from the street using traditional "swing" or "J" drives. A second single garage door facing street is permitted behind (width) of double garage door in "swing" or "J" configuration only. A minimum of 33% of Type 'B' lots shall have 3 car garages.
Maximum Lot Coverage	65%

c. Detached Single Family Lot Type C

Development Standards	
Minimum Lot Size	8,400 SF
Minimum Lot Width (@ Front Building Line)	70'

Minimum Lot Depth	120'
Minimum Lot Width (Corner Lot)	75'
Minimum Side Yard Setback	6'
Minimum Front Yard Building Setback	20'
Minimum Rear Yard Building Setback	10'
Minimum Air Conditioned Square Footage	2,400 SF
Minimum Roof Pitch	8:12 Except for 4:12 on Porch Roofs
Minimum Masonry Requirement [*Brick, Stone, Cultured Stone, 3-Part Stucco*]	80%
Garage Orientation	Garages will be allowed to have the garage accessed from the street using traditional "swing" or "J" drives. A second single garage door facing street is permitted behind (width) of double garage door in "swing" or "J" configuration only. A minimum of 33% of Type 'C' lots shall have 3 car garages.
Maximum Lot Coverage	65%

d. *Detached Single Family Lot Type D*

Development Standards	
Minimum Lot Size	10,000 SF
Minimum Lot Width (@ Front Building Line)	80'
Minimum Lot Depth	125'
Minimum Lot Width (Corner Lot)	85'
Minimum Side Yard Setback	6'
Minimum Front Yard Building Setback	20'
Minimum Rear Yard Building Setback	15'
Minimum Air Conditioned Square Footage	2,600 SF [1]
Minimum Roof Pitch	8:12 Except for 4:12 on Porch Roofs
Minimum Masonry Requirement [*Brick, Stone, Cultured Stone, 3-Part Stucco*]	80%
Garage Orientation	Traditional "swing" or "J" drive required. A second single garage door facing street is permitted behind (width) of double garage door in "swing" or "J" configuration only. A minimum of 80% of Type 'D' lots shall have 3 car garages.
Maximum Lot Coverage	65%

Notes:
[1]: *A maximum of 20% of the lots may have homes not less than 2,500 SF.*

e. Detached Single Family Lot Type E

Development Standards	
Minimum Lot Size	20,000 SF
Minimum Lot Width (@ Front Building Line)	100'
Minimum Lot Depth	175'
Minimum Lot Width (Corner Lot)	100'
Minimum Side Yard Setback	7'
Minimum Front Yard Building Setback	25'
Minimum Rear Yard Building Setback	15'
Minimum Air Conditioned Square Footage	3,000 SF
Minimum Roof Pitch	8:12 Except for 4:12 on Porch Roofs
Minimum Masonry Requirement [*Brick, Stone, Cultured Stone, 3-Part Stucco*]	80%
Garage Orientation	Traditional "swing" or "J" drive required. A second single garage door facing street is

	permitted behind (width) of double garage door in "swing" or "J" configuration only. A minimum of 80% of Type 'E' lots shall have 3 car garages.
Maximum Lot Coverage	70%

3. *Fencing.*

   a. *Residential uses.* All individual residential fencing shall be cedar standard fencing material (minimum ½" thickness) or better (spruce fencing will not be allowed). All cedar pickets shall be placed on the "public side" facing the street, alley or neighboring property. Tubular steel fencing is also acceptable for individual residential fencing, and shall be *required* on lots located along perimeter roadways, and/or abutting open spaces, greenbelts and parks. Corner lot fencing (adjacent to the street) shall provide masonry columns at 45-feet off center spacing that begins at the rear property line corner and terminates ten (10') feet behind the front yard building setback line. A maximum six (6') foot solid board on board "panel" cedar fencing shall be allowed between the masonry columns along the side and/or rear yard lot adjacent to a street. In addition, the fencing shall be setback from the side property line adjacent to a street a minimum of five (5') feet. The property owner shall maintain that portion of the property outside the fence. Fencing shall be consistent with the language described above and *Figure 1* below.

Figure 1: *Fence Example.*

4. *Anti-Monotony Features.* Lot types shall incorporate the following elevation features.

Table 3 : Anti-Monotony Matrix

Lot Type	Lot Size (Approx.)	Elevation Features
A	50' x 120'	i, iii, iv
B	60' x 120'	ii, iii, iv
C	70' x 120'	ii, iii, iv
D	80' x 125'	ii, iii, iv
E	100' x 200'	ii, iii, iv

i. Exterior facade must be composed of eighty percent (80%) masonry (brick, stone, cultured stone, three-part stucco, cementitious siding). Identical brick blends may not occur to adjacent (side-by-side) properties. Elevations shall not repeat along the fronting or siding streetscape without at least three (3) intervening homes of sufficient dissimilarity (to be determined by the ARC) on the same side of the street or two (2) intervening homes on the opposite side of the street. All chimneys shall be constructed of masonry materials, excluding cementitious siding.

ii. Exterior facade must be composed of eighty percent (80%) masonry (brick, stone, cultured stone, three-part stucco). Identical brick blends may not occur to adjacent (side-by-side) properties. Elevations shall not repeat along the fronting or siding streetscape without at least four (4) intervening homes of sufficient dissimilarity (to be determined by the ARC) on the same side of the street and (2) intervening homes on the opposite side of the street). The rear elevation of homes backing to open spaces or thoroughfares shall not repeat without at least two (2) intervening homes of sufficient dissimilarity (to be determined by the ARC). All chimneys shall be constructed of masonry materials, excluding cementitious siding.

iii. Minimum of 8:12 roof pitch, except for 4:12 roof pitches on porches. For each phase, a maximum of four compatible roof colors may be used. Dimensional shingles shall be used. Crown molding will be installed in all living and family rooms, unless vaulted or pop-up ceilings are utilized. No Formica counters in kitchens and bathrooms, no blown acoustic ceilings. No vinyl flooring will be used in kitchens and bathrooms.

iv. If the garage is accessed from the street a traditional "swing" or "J" drive will be used. Second single garage door facing street is permitted behind (width) of double garage door in "swing" or "J" configuration only.

5. *Streetscape Landscape.* Prior to issuance of a Certificate of Occupancy, yards for all single-family lots on the *Subject Property* shall be landscaped with large canopy trees.

(1) Two minimum three (3) inch trees measured six (6) inches above the root ball shall be planted in the front yard of an interior lot.

(2) Two minimum three (3) inch trees measured six (6) inches above the root ball shall be planted in the front yard of a corner lot and two additional trees of same caliper shall be planted in the side yard facing the street.

(3) For purposes of this section only, the term "front yard" includes the area within the dedicated right-of-way for a parkway immediately adjoining the front yard of the lot for properties in the areas identified as *Residential* on the *Concept Plan* in *Exhibit B* of this ordinance.

6. *Master Design Guidelines.* Additional design guidelines specific to each phase of development that shall apply to all single-family dwellings units within that phase of development, shall be submitted to the City prior to issuance of any building permits for that portion of the development.

C. STANDARDS FOR DISTRICT DESIGN AND CONNECTIVITY

1. *Streetscape Standards for Collectors & Non-Fronting Thoroughfares.* All streets, excluding drives, fire lanes and private parking areas, shall be built according to City of Rockwall street standards as modified by *Street Buffer Strip Elevation and Street Cross-Section Elevations* below in *Figure 2*.

Figure 2: Illustration on next page

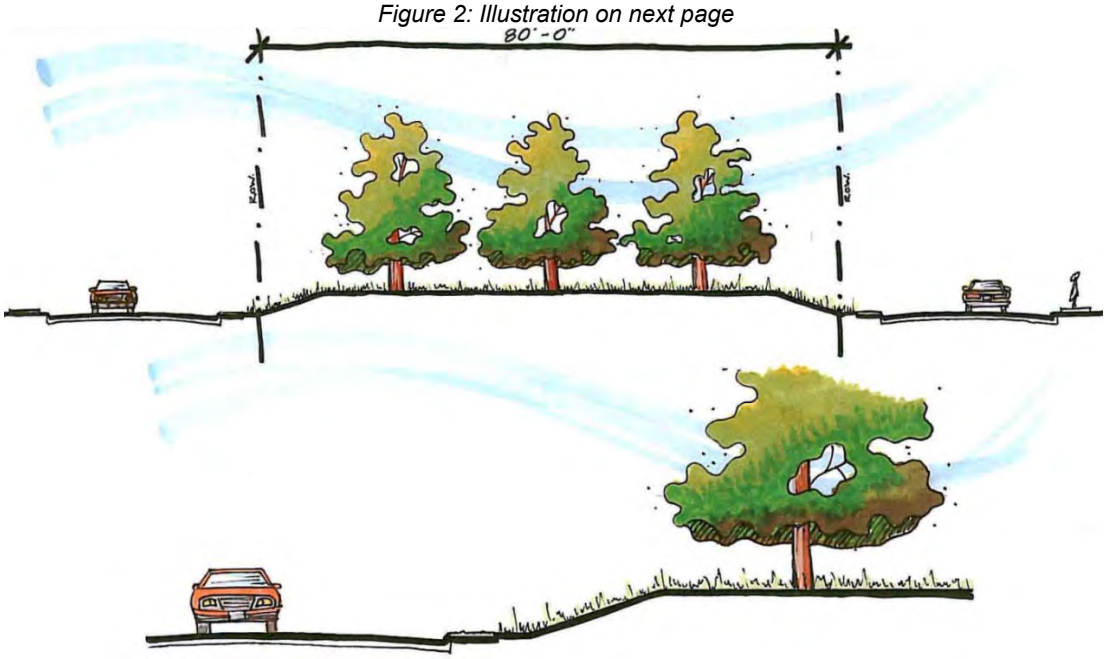

Figure 2: *Street Buffer Strip Elevation and Street Cross-Section Elevations.*

a. *Buffer-Strip for the North SH-205 Overlay (N. SH-205 OV) District.* The landscape buffer strip shall be as described in Section E, *Landscape Standards*, of Article V, *District Development Standards*, of the Unified Development Code (UDC), and be a minimum width of 60-feet as illustrated below in *Figures 3 & 4* and as indicated on the PD Concept Plan. Sidewalks and Hike & Bike Trails are to be placed according to city requirements and as set forth in the *Open Space Master Plan* for the District.

b. *Buffer-Strip for the SH-205 By-Pass Overlay (SH-205 BY-OV) District.* The landscape buffer strip shall be as described in Section E, *Landscape Standards*, of Article V, *District Development Standards*, of the Unified Development Code (UDC), and be a minimum width of 50-feet as illustrated below in *Figures 3 & 4* and as indicated on the PD Concept Plan. Sidewalks and Hike & Bike Trails are to be placed according to city requirements and as set forth in the *Open Space Master Plan* for the District.

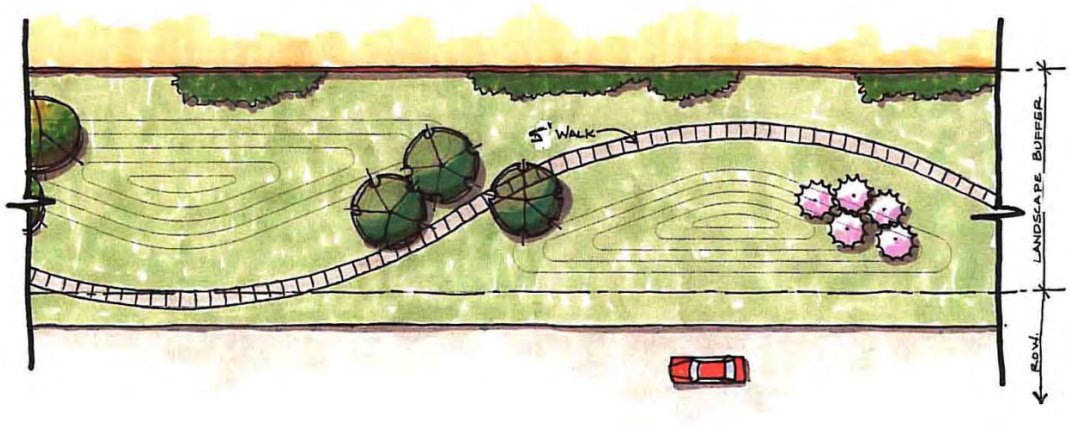

Figure 3: *Landscape Buffer Plan*

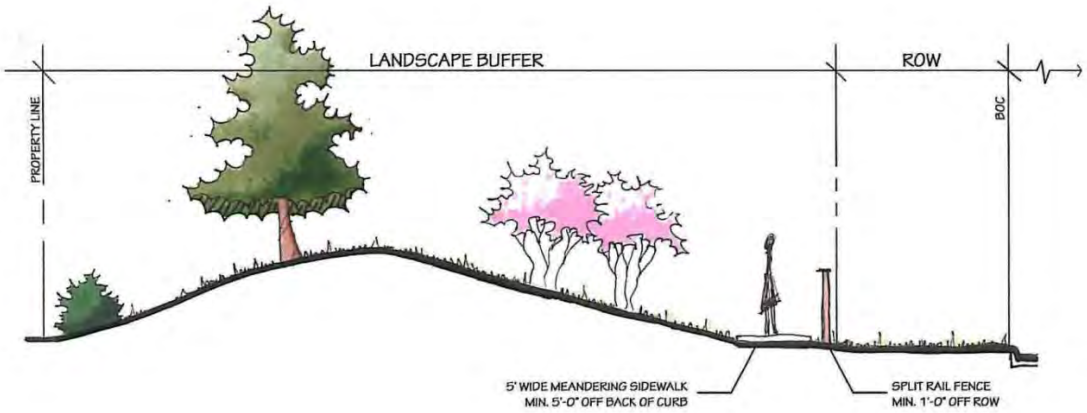

Figure 4: *Landscape Buffer Cross Section*

c. *Buffer-Strip (Outside of Overlay Districts).* The landscape buffer strip shall be a minimum of ten (10) feet on Hays Road and Quail Run Road. Sidewalks and Hike & Bike Trails are to be placed according to city requirements and as set forth in the *Open Space Master Plan* for the District.

d. *Irrigation.* Any irrigation installed in landscape areas and public parks must be designed by a Texas licensed irrigator or landscape architect.

e. *HOA Maintained Fencing.* The Homeowner's Association (HOA) will maintain all common area and perimeter fencing surrounding the *Subject Property*. Such perimeter fencing shall be composed of a six (6) foot tall tubular steel fencing with masonry entry features or such other fencing as may be approved by the City at the time of platting. Perimeter screening may also be accomplished by earthen berms landscaped with living screening. Property owners will maintain all fences constructed on private property.

f. *Curvilinear Walks. Curvilinear Walks* are to be a minimum of five (5) feet in width and a maximum of six (6) feet in width (*i.e. Hike & Bike Trails*) consistent with the approved *Open Space Master Plan*. *Collector Streets*, with or without center medians, may incorporate sidewalks six (6) feet in width adjacent to or within the *front yard* landscape easements. *Curvilinear Walks* may meander within the

parkway and common areas; however, the edge of the walk shall be no closer than four (4) feet from the back-of-curb.

g. *Medians.* Any proposed median openings shall meet the City standards at the time of *PD Site Plan* approval.

2. *Lighting.* Light poles shall not exceed 20-feet in height, and all light fixtures shall direct light downward and be contained within the *Subject Property*.

3. *Sidewalks.* At a minimum, sidewalks located on streets shall begin four (4) feet behind the back of curb and shall be five (5) feet in overall width.

4. *Curbing.* Within *Lot Types A & B*, *roll-up-curbing* may be incorporated in an effort to minimize frequent curb cuts and maximize streetscape continuity. These *roll-up-curbs* shall be approved by the City of Rockwall Engineering Department with the approval of the final plat application.

5. *Buried Utilities.* New distribution power-lines required to serve the *Subject Property* shall be placed underground, whether such lines are located internally or along the perimeter of the *Subject Property*, unless otherwise authorized by the City Council. New transmission power-lines, or distribution lines of a size not typically or cost effectively placed underground (*i.e. 3-phase lines*), or additional lines that are added to existing poles, may be above ground, if located along the perimeter of the *Subject Property*, except along the SH-205 By-Pass (*i.e. John King Boulevard*). Additionally, if such above ground lines are installed along the perimeter of the *Subject Property* and adjacent to non-residential uses, then the lines shall be installed behind the non-residential buildings where the installation is possible. The *Developer* shall not be required to re-locate existing overhead power-lines along the perimeter of the *Subject Property*. Temporary power-lines constructed across undeveloped portions of the *Subject Property* to facilitate development phasing and looping may be allowed above ground, but shall not be considered *existing lines* at the time the area is developed, and if they are to become permanent facilities, such lines shall be placed underground pursuant to this paragraph.

6. *Parks and Open Space.* Allowing inclusion of approximately 50% of the school sites and floodplain shown on the *Concept Plan* and approximately 20.0% of the land on the *Subject Property* shall constitute open space, which is hereby deemed sufficient if supported by the following standards and conditions.

a. The *Subject Property* shall contain not less than 79-acres of open space including approximately 26.6-acres of floodplain as shown on *Exhibit B* of this ordinance.

b. Allowable open space may include but is not limited to public or private parks, trails, natural areas, buffers, traffic circle medians, entry features, common areas (*including any HOA recreation center or similar facilities*) and other features depicted on the *Concept Plan*, as set forth in the *Open Space Master Plan* prepared in accordance with subparagraph (c) below. Street right-of-way will not be included as open space. At least 80% of the single-family dwellings within the development shall be located within 800-feet of a public or private open space. In order to qualify, such open space must be at least one (1) continuous acre in area, not including roadway buffers less than 50-feet in width.

c. The *Developer* shall prepare the *Open Space Master Plan* to be consistent with the approved *Concept Plan*. The purpose of an *Open Space Master Plan* is to supplement the *Concept Plan* by providing an additional level of detail for public and private open space areas. The *Open Space Master Plan* shall identify the locations of and improvements to public parks, school sites and other public and private open space or common areas, taking into consideration the proximity of single-family dwellings, as required by subparagraph (a), and shall illustrate an integral system of trail improvements that, together with intervening land held by other property owners or the City, is designed to connect residential areas, schools and retail areas within the *Subject Property* to parks and open space within the *Subject Property* and that provides for continuation and connection of the trail system to off-site parks and open space, in accordance with the City's *Master Park and Recreation Plan*. The *Open Space Master Plan* shall clearly differentiate public parks from private facilities and common lands to be maintained by the HOA. The locations of public parks, school sites and other public and private open space or common areas shown on the *Open Space Master Plan* shall be in conformance with the *Concept Plan*, except as otherwise provided in Section 7 of Article II of the *Capital Facilities Agreement* pertaining to school sites. The *Open Space Master Plan* shall include a phasing plan for construction of all trails and parks, and common open space and facilities. The *Open Space Master Plan* shall be considered for approval if it complies with this section, the applicable City regulations, the *Concept Plan*, and generally accepted park-planning practices.

d. The District shall contain not less than 7.8 acres of land to be used as public or private parkland. A minimum of 7.8 contiguous acres shall be dedicated to the City in accordance with the City's *Neighborhood Parkland Dedication Ordinance* on approval of the final plat for the first phase of the development. This dedication shall include the dedication of a five (5) foot wide parcel to connect the *City Park* within the *Subject Property* to the existing City property to the east of the middle school. The remaining area will be retained as a private park within the *District*. Park improvements shall be constructed in accordance with the approved *Open Space Master Plan*. The site plan incorporating the design of park improvements and hike /bike trail improvements shall be considered for approval with the final plat for the phase of the development containing such improvements. Performance of the obligations in this subparagraph shall be deemed to fully satisfy the City's *Neighborhood Parkland Dedication Ordinance* regarding land dedication. At the time of recordation of final plats for each phase, *Developer* shall pay park improvement fees to the City. These fees shall be held in an escrow account until the commencement of *Phase 3*, at which time the *Developer* shall inform the City if the *Developer* wishes to use the escrowed fees as well as future fees to construct park improvements. Said improvements shall be approved by *Parks Director*, approval not to be unreasonably withheld, and invoices for improvements shall be submitted to *Parks Director* for approval. Performance of the obligations in this subparagraph shall be deemed to fully satisfy the City's *Neighborhood Parkland Dedication Ordinance* regarding park development fees, provided that park improvements are installed at a value equal or exceeding the value of park improvement fees for the entire *District* applicable at that time, or improvement fees are paid. Thereafter, the *Developer* shall not be responsible for additional parkland dedication or park development fees associated with the *Subject*

Property, except as otherwise may be provided in a *Capital Facilities Agreement* approved by the City.

The *Developer* shall provide retention ponds in the locations depicted on the *Concept Plan* in *Exhibit 'B'* of this ordinance. Hardedges and fountain features shall be incorporated into *Ponds 1 & 2*, *Pond 3* shall incorporate a natural edge, and *Pond 4* shall incorporate a fountain feature and a natural edge. All retention pond hardedges shall be similar to the hardedge shown in *Figure 5* below.

Figure 5: *Retention Pond with Hardedge.*

7. *Signage.* Permanent subdivision identification signage shall be permitted at all major entry points, in general conformance to the signage elevations and plan shown below in *Figures 6 & 7*. Final design of entry features to be determined with the Planned Development Site Plan.

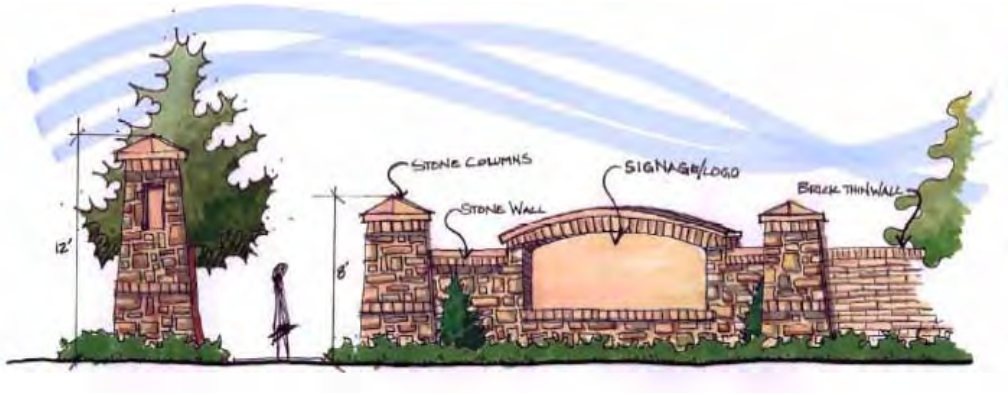

Figure 6: *Main Entry Subdivision Signage Elevations*

Figure 7: *Main Entry Subdivision Signage Plan*

8. *Variances.* The variance procedures and standards for approval set forth in the Unified Development Code (UDC) shall apply to any application for variance(s) to this ordinance.

9. *Amenity Center.* Developer shall construct an amenity center in approximate size and detail as shown below in *Figure 8*.

Figure 8: *Amenity Center*

10. *Trees.* All trees planted within the District shall be a minimum three (3) inch caliper in size as measured six (6) inches above the root ball.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Honorable Mayor and City Council Members**

Cc: **Rick Crowley, City Manager**

FROM: **Kristy Cole, City Secretary/Assistant to the City Manager**

DATE: **October 30, 2019**

SUBJECT: **2nd reading of Ord. re: "Standards for Design of Developments w/in Subdivisions"**

In the interest of saving space within the Nov. 4 meeting packet, I am omitting "EXHIBIT A" as an attachment within the packet, as it is over 400 pages long. Council did, however, receive the attachment (the actual "Standards") at both a previous work session and at the Oct. 21 meeting. Staff will be available to answer any questions Council may have concerning this Consent Agenda item, if necessary.

CITY OF ROCKWALL

ORDINANCE NO. 19-42

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE ROCKWALL CODE OF ORDINANCES IN CHAPTER 38. SUBDIVISIONS; ARTICLE I. IN GENERAL; SECTION 38-23 STANDARDS FOR DESIGN OF DEVELOPMENTS WITHIN SUBDIVISIONS ADOPTED; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the governing body of the City of Rockwall, in the exercise of its legislative discretion, has concluded that the "Standards for Design of Development Within Subdivisions" should be updated in order to reflect certain amendments.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:

Section 1. Chapter 38. "Subdivisions;" Article I. "In General;" Section 38-23 "Standards for Design of Developments Within Subdivisions Adopted" of the Code of Ordinances is hereby amended so as to delete subsection "c" in its entirety and replace it with a new subsection "c" which shall hereafter read as follows:

~~(c) The October 2016 updated of the Standards for Design and Construction are adopted replacing the Standards of Design, Standard Construction Specifications, dated August 2003, a copy of which is on file for public inspection in the city secretary's office~~

(c) The October 2019 updated of the Standards for Design and Construction are adopted replacing the Standards of Design, Standard Construction Specifications, dated October 2016, a copy of which is on file for public inspection in the city secretary's office.

Section 2. Chapter 38. "Subdivisions;" Article I. "In General;" Section 38-23 "Standards for Design of Developments Within Subdivisions Adopted" of the Code of Ordinances is hereby amended so as to delete subsection "d" in its entirety and replace it with a new subsection "d" which shall hereafter read as follows:

~~(d) The Public Works Construction Standards and Specifications, North Central Texas, 4th Edition, October 2004 as amended by the City of Rockwall are adopted replacing the Standard Specifications for Public Works Construction, North Central Texas, 3rd Edition, 1998.~~

(d) The Public Works Construction Standards and Specifications, North Central Texas, 5th Edition, November 2017 as amended by the City of Rockwall are adopted replacing the Standard Specifications for Public Works Construction, North Central Texas, 4th Edition, 2004.

Section 3. A new, 2019 version of the city's "Standards for Design of Developments Within Subdivisions Adopted" is hereby adopted as reflected in **"Exhibit A"** of this ordinance, a copy of which shall be kept on file for public inspection within the city secretary's office.

Section 4. Any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of Two Thousand Dollars ($2,000.00) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

Section 5. If any section or provision of this ordinance or the application of that section or provision to any person, firm, corporation, situation or circumstance is for any reason judged invalid, the adjudication shall not affect any other section or provision of this ordinance or the application of any other section or provision to any other person, firm, corporation, situation or circumstance, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions of this ordinance shall remain in full force and effect.

Section 6. This ordinance shall be cumulative of all other ordinances of the City and shall not repeal any of the provisions of those ordinances except in those instances where the provisions of those ordinances are specifically repealed or those in direct conflict with the provisions of this ordinance.

Section 7. This ordinance shall take effect immediately from and after its passage and approval and the publication of the caption of said ordinance as the law in such cases provides, and it is so ordained.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF NOVEMBER, 2019.

Jim Pruitt, Mayor

ATTEST:

Kristy Cole, City Secretary

APPROVED AS TO FORM:

Frank Garza, City Attorney

CITY OF ROCKWALL

CITY COUNCIL CASE MEMO

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
DATE:	November 4, 2019
APPLICANT:	Steven Homeyer; *Homeyer Engineering, Inc.*
CASE NUMBER:	P2019-039; *Lot 8, Block A, Ellis Centre, Phase Two Addition*

SUMMARY

Consider a request by Steven Homeyer of Homeyer Engineering, Inc. on behalf of Julia McKinney for the approval of a replat for Lot 8, Block A, Ellis Centre Phase 2 Addition being a 1.21-acre parcel of land identified as Lot 4, Block A, Ellis Centre Phase 2 Addition, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, located west of the intersection of Alpha Drive and Sigma Court, and take any action necessary.

PLAT INFORMATION

☑ The applicant is requesting the approval of a replat for a 1.21-acre parcel of land [i.e. *Lot 8, Block A, Ellis Centre, Phase 2 Addition*] that will establish firelane, public access, utility, and detention easements for the purpose of developing the *subject property*. The *subject property* is zoned Light Industrial (LI) District and is addressed as 1920 Alpha Drive.

☑ On May 17, 2019, Steven Homeyer of Homeyer Engineering, Inc. submitted a site plan [*i.e. Case No. SP2019-017*] proposing the construction of a ~6,042 SF single-story, animal boarding/kennel facility. On June 11, 2019, the Planning and Zoning Commission approved the site plan and all exceptions requested.

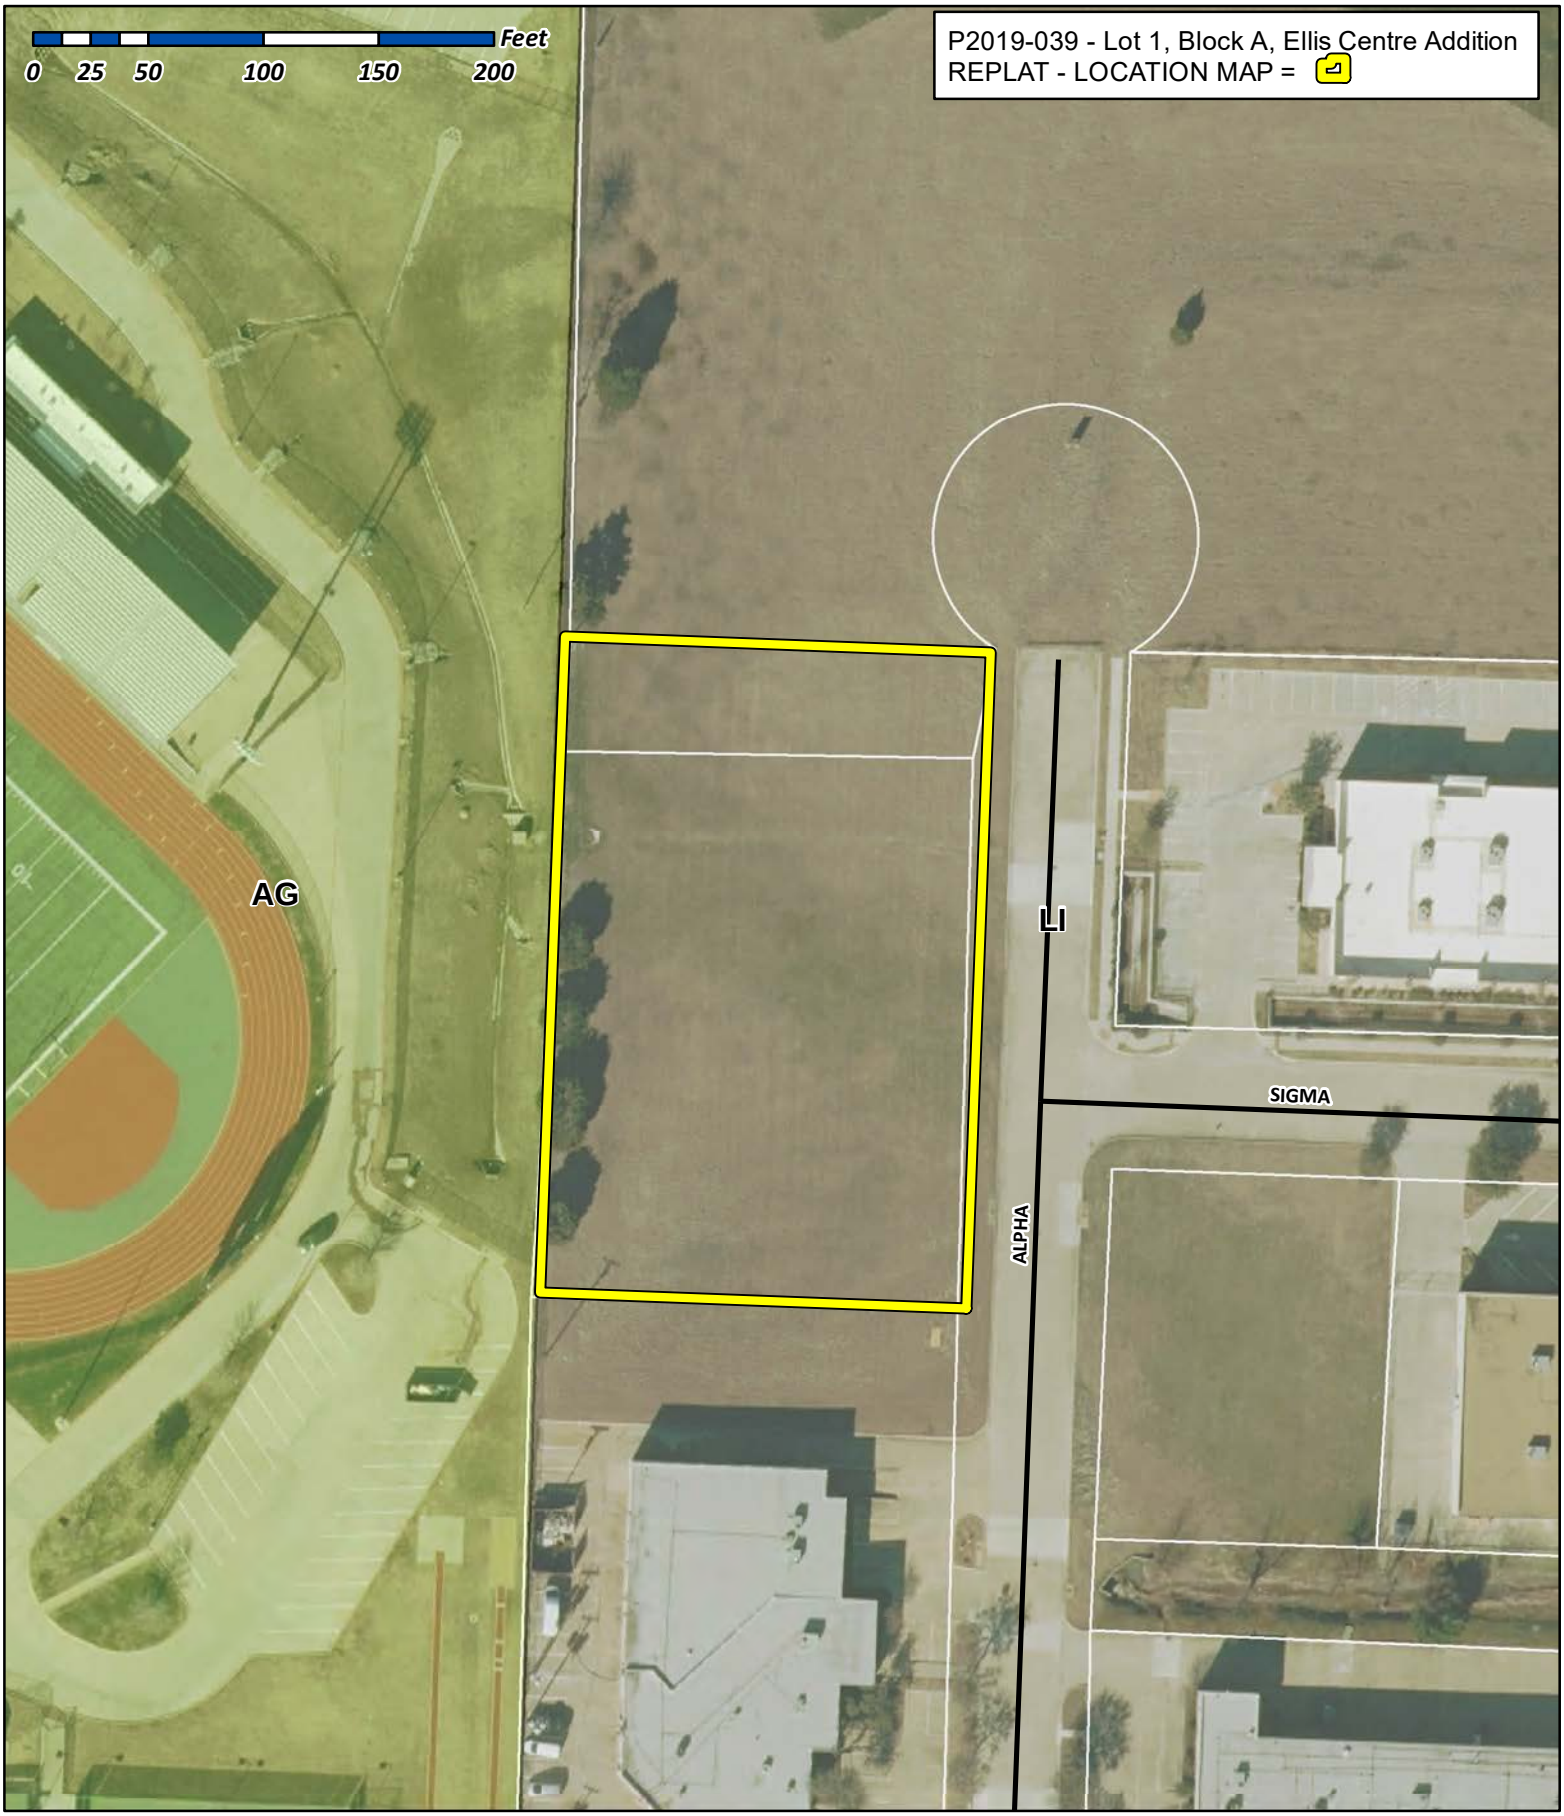
☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat -- *conforming to the requirements for replats as stated in the Subdivision Ordinance in the Municipal Code of Ordinances* -- is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.

☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Conditions of Approval* section below.

☑ With the exception of the items listed in the *Conditions of Approval* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the *Municipal Code of Ordinances*.

CONDITIONS OF APPROVAL

If the Planning and Zoning Commission chooses to recommend approval of the replat for *Lot 8, Block A, Ellis Centre, Phase 2 Addition,* staff would propose the following conditions of approval:



(1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;

(2) Any construction resulting from the approval of this plat shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall

Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

CONDITIONS OF APPROVAL

On October 29, 2019, the Planning and Zoning Commission approved a motion to recommend approval of the replat by a vote of 7-0.

VICINITY MAP
(NOT TO SCALE)

GENERAL NOTES

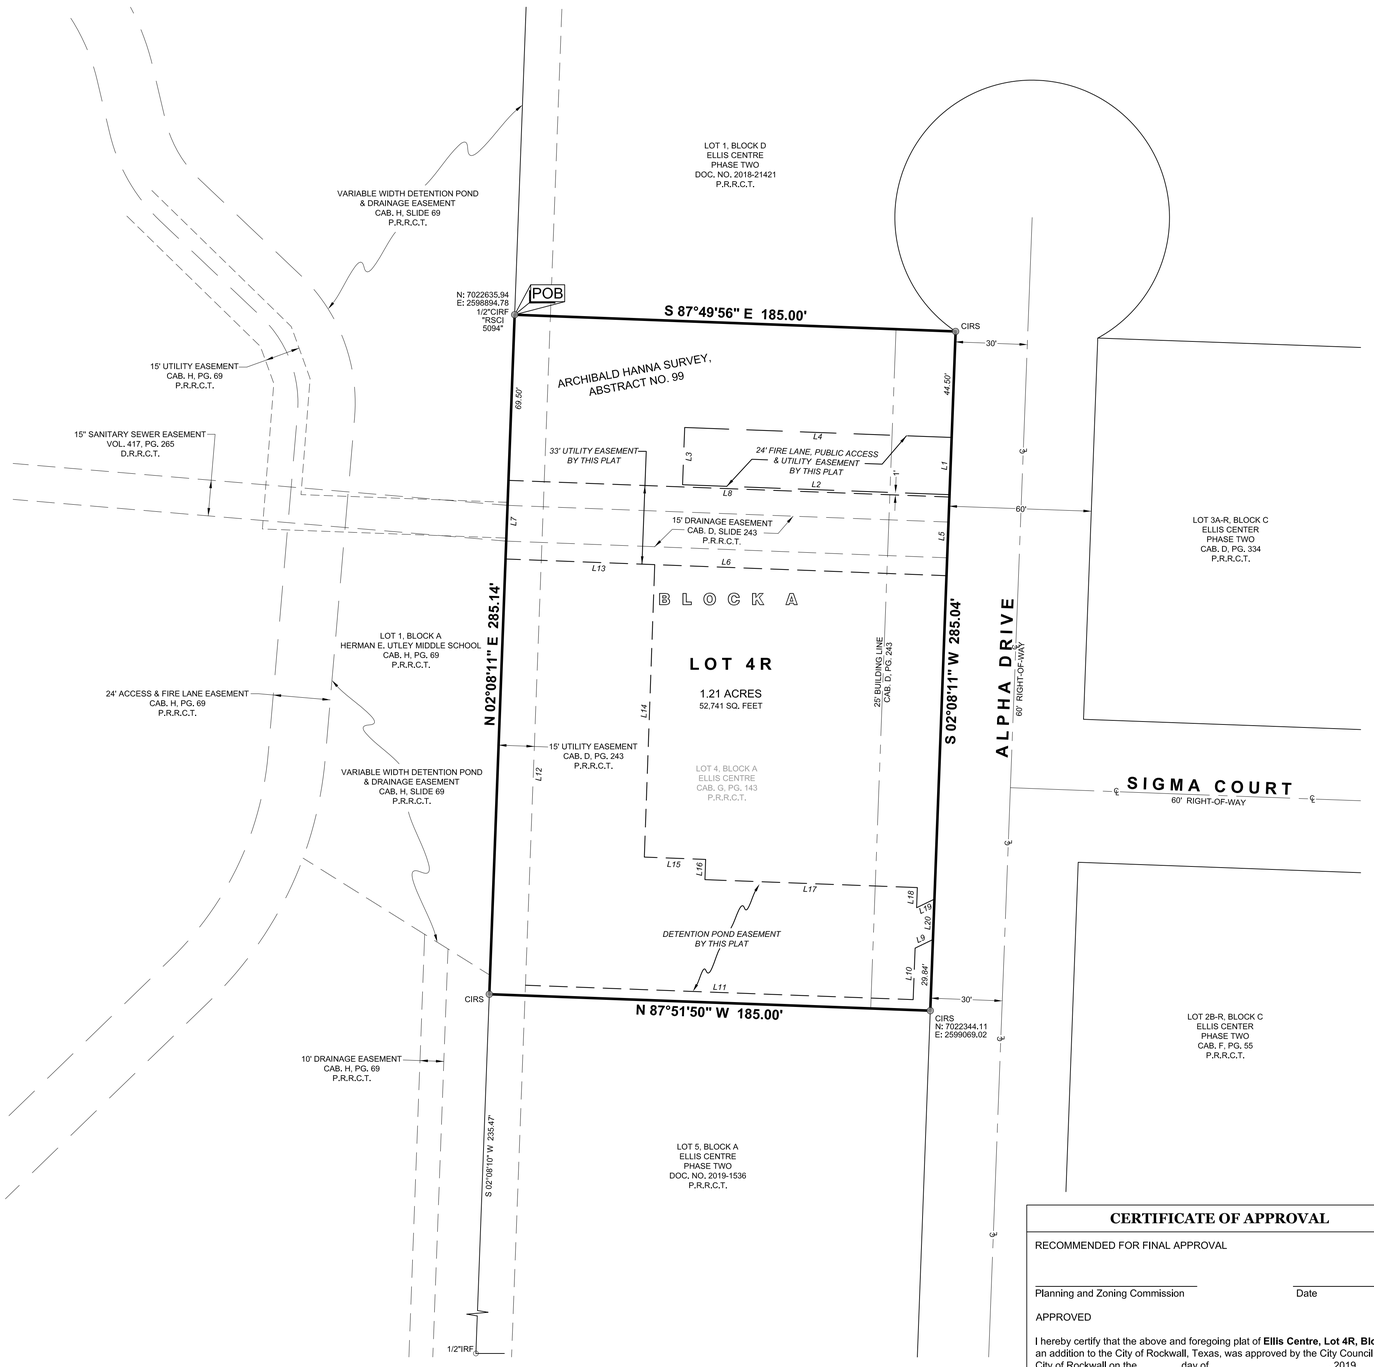
1.) The purpose of this plat is to dedicate easements for site development.

2.) This property is located in "Non-shaded Zone X" and "Zone AE" according to the F.E.M.A. Flood Insurance Rate Map dated September 26, 2008 as shown on Map Number 48397C0040L.

3.) The grid coordinates shown on this plat are based on GPS observations utilizing the AllTerra RTKNET Cooperative network. NAD 83(2011) State Plane Coordinate System (Texas North Central Zone - 4202).

4.) Selling a portion of this addition by metes and bounds is a violation of City Ordinance and State Law, and is subject to fines and/or withholding of utilities and building permits.

5.) All interior property corners are marked with a 1/2-inch iron rod with a green plastic cap stamped "EAGLE SURVEYING" unless noted otherwise.



6.) The bearings shown on this plat are based on GPS observations utilizing the AllTerra RTKNET Cooperative network. NAD 83(2011) Datum.

7.) Property owner is responsible for repair, replacement, and maintenance off all detention and drainage systems in easements on-site.

CERTIFICATE OF APPROVAL

RECOMMENDED FOR FINAL APPROVAL

Planning and Zoning Commission — Date

APPROVED

I hereby certify that the above and foregoing plat of **Ellis Centre, Lot 4R, Block A**, an addition to the City of Rockwall, Texas, was approved by the City Council of the City of Rockwall on the _____ day of _____, 2019.

This approval shall be invalid unless the approved plat for such addition is recorded in the office of the County Clerk of Rockwall, Texas, within one hundred eighty (180) days from the said date of final approval.

Said addition shall be subject to all the requirements of the Subdivision Regulations of the City of Rockwall.

WITNESS OUR HANDS, this _____ day of _____, 2019.

Mayor, City of Rockwall — City Secretary, City of Rockwall

City Engineer — Date

OWNER'S CERTIFICATE & DEDICATION

STATE OF TEXAS §
COUNTY OF ROCKWALL §

WHEREAS, **CANINE PROPERTIES, LLC**, is the owner of a 1.21 acre tract of land situated in the ARCHIBALD HANNA SURVEY, ABSTRACT NUMBER 99, City of Rockwall, Rockwall County, Texas, being all of Lot 4, Block A of Ellis Centre, an addition to the City of Rockwall, Texas, recorded in Cabinet G, Page 143, Plat Records of Rockwall County, Texas, and being conveyed by General Warranty Deed to Canine Properties, LLC, recorded in Document Number 20190000012843, Official Public Records of Rockwall County, Texas, and being more particularly described by metes and bounds as follows:

BEGINNING at a 1/2-inch iron rod with plastic cap stamped "RSCI 5094" found at the Northwest corner of said Lot 4, Block A, being in the East line of Lot 1, Block A of Herman E. Utley Middle School, an addition to the City of Rockwall, Texas, recorded in Cabinet H, Page 69, Plat Records of Rockwall County, Texas, and being at the Southwest corner of Lot 1, Block D of Ellis Centre, Phase Two, an addition to the City of Rockwall, Texas, recorded in Document Number 2018-21421, Plat Records of Rockwall County, Texas;

THENCE South 87°49'56" East, with the North line of said Lot 4, Block A and the common South line of said Lot 1, Block D, a distance of 185.00 feet to a 1/2-inch iron rod with green plastic cap stamped "EAGLE SURVEYING" set at the Northeast corner of said Lot 4, Block A, and being in the West right-of-way line of Alpha Drive (a 60-foot right-of-way);

THENCE South 02°08'11" West, with the East line of said Lot 4, Block A and the West right-of-way line of said Alpha Drive, a distance of 285.04 feet to a 1/2-inch iron rod with green plastic cap stamped "EAGLE SURVEYING" set at the Southeast corner of said Lot 4, Block A and being at the Northeast corner of Lot 5, Block A of said Ellis Centre, an addition to the City of Rockwall, Texas, recorded in Document Number 2019-1536, Plat Records of Rockwall County, Texas;

THENCE North 87°51'50" West, with the South line of said Lot 4, Block A and the common North line of said Lot 5, Block A, a distance of 185.00 feet to a 1/2-inch iron rod with green plastic cap stamped "EAGLE SURVEYING" set at the Southwest corner of said Lot 4, Block A, being at the Northwest corner of said Lot 5, Block A and being in the East line of said Lot 1, Block A;

THENCE North 02°08'11" East, with the West line of said Lot 4, Block A and the common East line of said Lot 1, Block A, a distance of 285.14 feet to the **POINT OF BEGINNING**, and containing 1.21 acres of land, more or less.

NOW THEREFORE KNOW ALL MEN BY THESE PRESENTS:

THAT, **CANINE PROPERTIES, LLC,** does hereby adopt this plat, designating herein described property as **ELLIS CENTRE, LOT 4R, BLOCK A,** an addition to the City of Rockwall, Rockwall County, Texas, and does hereby dedicate to public use forever all streets, alleys, parks, watercourses, drains, easements and public places thereon shown for the purpose and consideration therein expressed. No buildings, fences, trees, shrubs or other improvements or growths shall be constructed or placed upon, over or across the drainage and utility easements as shown. Said drainage and utility easements being hereby reserved for the mutual use and accommodation of all public utilities desiring to use same. All and any public utility shall have the right to remove and keep removed all or parts of any buildings, fences, trees, shrubs or other improvements or growths which may in any way endanger or interfere with the construction, maintenance, or efficiency of its respective system on the drainage and utility easement and all public utilities shall at all times have the full right of ingress and egress to or from and upon the said drainage and utility easements for the purpose of constructing, reconstructing, inspecting, patrolling, maintaining and adding to or removing all or parts of its respective systems without the necessity at any time of procuring the permission of anyone.

CITY OF ROCKWALL

CITY COUNCIL CASE MEMO

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
DATE:	November 4, 2019
APPLICANT:	David Rains
CASE NUMBER:	P2019-041; *Lot 35, Block A, Chandler's Landing, Phase 18, Section 2*

SUMMARY

Consider a request by David Raines for the approval of a replat for Lot 35, Block A, Chandler's Landing, Phase 18, Section 2 being a 0.19-acre tract of land identified as Lot 12, Block A, Chandler's Landing, Phase 18, Section 2, City of Rockwall, Rockwall County, Texas, zoned Planned Development 8 (PD-8) District for single-family land uses, addressed as 5808 Constellation Circle, and take any action necessary.

PLAT INFORMATION

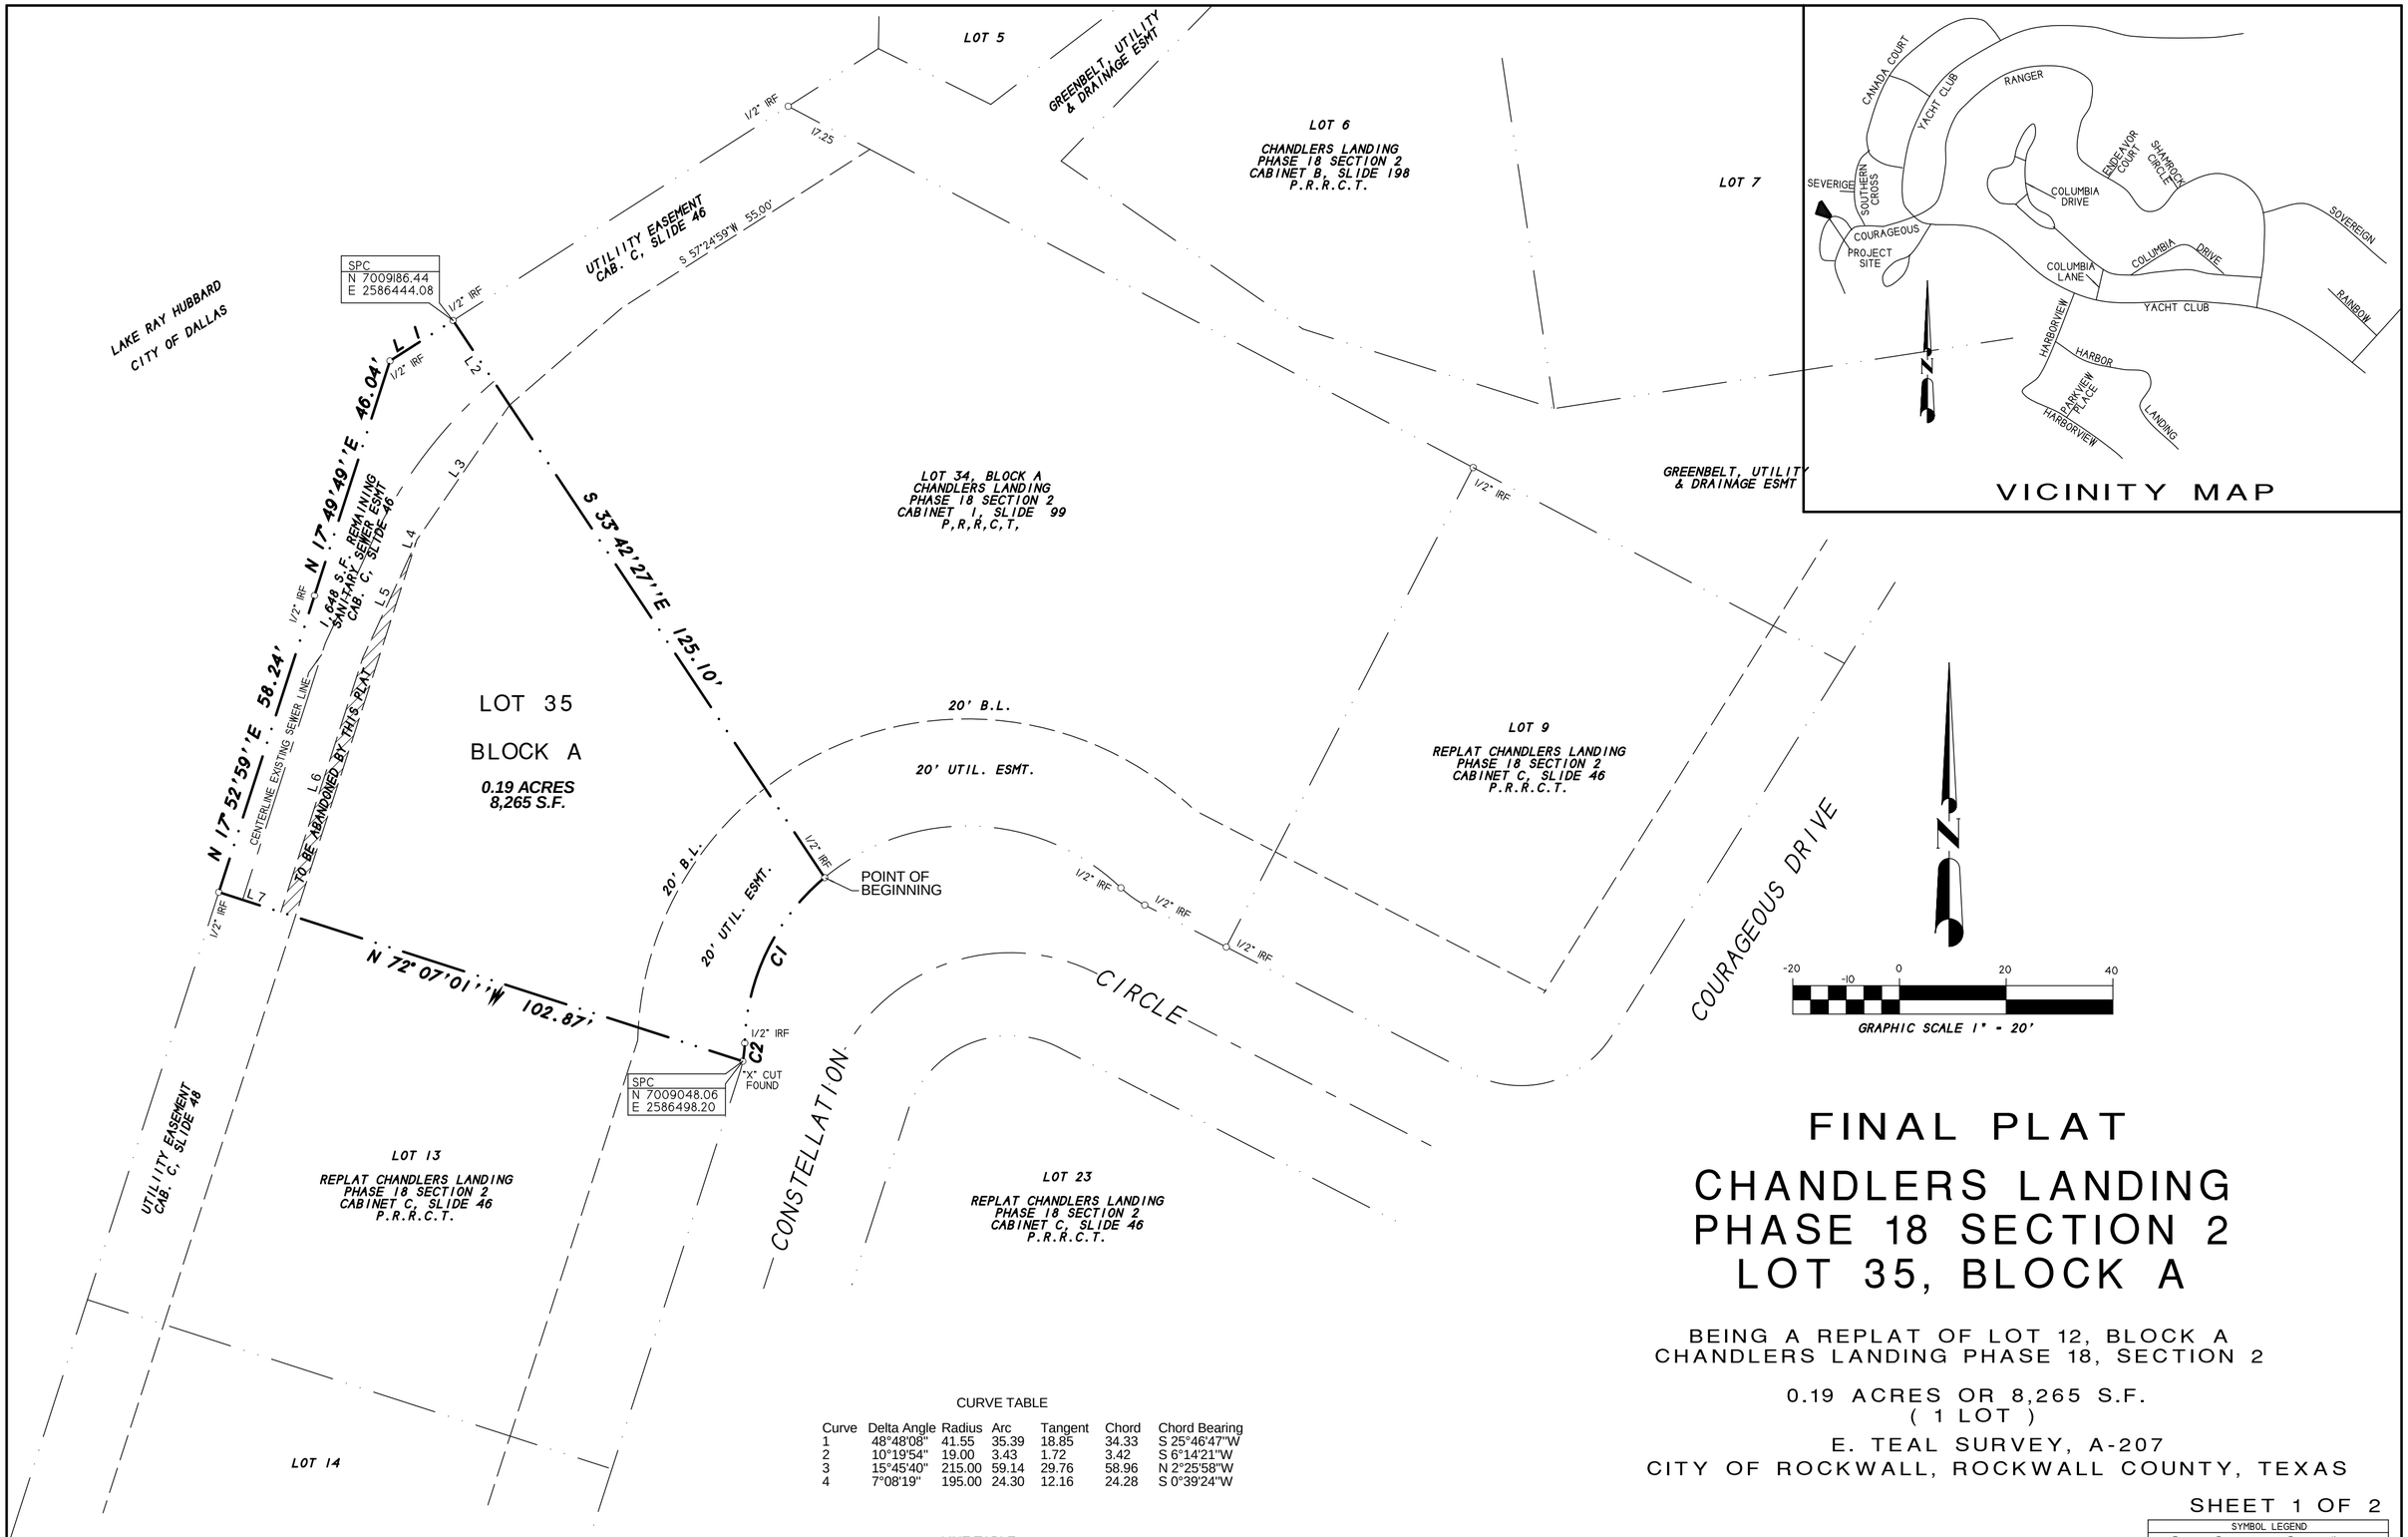
- ☑ The applicant is requesting to replat one (1) lot (*i.e. Lot 12, Block A, Chandler's Landing, Phase 18, Section 2 Addition*) into Lot 35, Block A, Chandler's Landing Phase 18, Section 2 for the purpose of abandoning a portion of a sanitary sewer easement.
- ☑ The subject property was annexed in 1973 [*Ordinance No. 73-42*], is zoned as Planned Development District 8 (PD-8) for single-family land uses, and is addressed as 5808 Constellation Circle.
- ☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat -- *conforming to the requirements for final plats as stipulated by the Subdivision Ordinance in the Municipal Code of Ordinances* -- is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.
- ☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Conditions of Approval* section below.
- ☑ With the exception of the items listed in the *Conditions of Approval* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the Municipal Code of Ordinances.

CONDITIONS OF APPROVAL

If the City Council chooses to approve the replat for *Lot 35, Block A, Chandler's Landing, Phase 18, Section 2*, staff would propose the following conditions of approval:

(1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;

(2) Any construction resulting from the approval of this plat shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.



PLANNING AND ZONING COMMISSION

On October 29, 2019, the Planning and Zoning Commission's motion to recommend approval of the applicant's request with staff's conditions of approval passed by a vote of 7-0.

OWNER'S CERTIFICATE
(Public Dedication)

WHEREAS, DAVID RAINS, BEING the Owner of a tract of land in the County of Rockwall, State of Texas, said tract being described as follows:

BEING all of Lot 12, Block A, REPLAT CHANDLERS LANDING, PHASE 18, SECTION 2 an Addition to the City of Rockwall, Rockwall County, Texas, according to the Plat thereof recorded in Cabinet C, Slide 46, of the Plat Records of Rockwall County, Texas, and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner in the curving right-of-way line of Constellation Circle, a variable width right-of-way, said point being at the east corner of said Lot 12 and the southwest corner of said Lot 34, Block A;

THENCE in a southwesterly direction along a curve to the left having a central angle of 48 deg. 48 min. 08 sec., a radius of 41.55 feet, a tangent of 18.85 feet, a chord of S. 25 deg. 46 min. 47 sec. W., 34.33 feet, along said right-of-way line, an arc distance of 35.39 feet to a 1/2" iron rod found for corner;

THENCE in a southwesterly direction along a curve to the right having a central angle of 10 deg. 19 min. 54 sec., a radius of 19.00 feet, a tangent of 1.72 feet, a chord of S. 06 deg. 14 min. 21 sec. W., 3.42 feet, along said right-of-way line, an arc distance of 3.43 feet to an "X" found chiseled in concrete for corner at the southeast corner of Lot 12 and northeast corner of Lot 13;

THENCE N. 72 deg. 07 min. 01 sec. W. along the northeast boundary line of Lot 13, a distance of 102.87 feet to a 1/2" iron rod found for corner in the take line of the City of Dallas for Lake Ray Hubbard and being the northwest corner of said Lot 13;

THENCE N. 17 deg. 52 min. 59 sec. E. along said take line and the northwest line of Lot 12, a distance of 58.24 feet to a 1/2" iron rod found for corner;

THENCE N. 17 deg. 49 min. 49 sec. E. along said take line and the northwest line of Lot 12, a distance of 46.04 feet to a 1/2" iron rod found for corner;

THENCE N. 57 deg. 24 min. 55 sec. E. along said take line and north line of Lot 12, a distance of 14.00 feet to a 1/2" iron rod found for corner at the north corner of Lot 12 and the northwest corner of Lot 34;

THENCE S. 33 deg. 42 min. 27 sec. E. a distance of 125.10 feet to the POINT OF BEGINNING and containing 8,265 square feet or 0.19 acres of land.

NOW, THEREFORE, KNOW ALL MEN BY THESE PRESENTS:

STATE OF TEXAS
COUNTY OF ROCKWALL

We the undersigned owner of the land shown on this plat, and designated herein as CHANDLERS LANDING, PHASE 18, SECTION 2, LOT 35, BLOCK A, an Addition to the City of Rockwall, Texas, and whose name is subscribed hereto, hereby dedicate to the use of the public forever all streets, alleys, parks, water courses, easements and public places thereon shown on the purpose and consideration therein expressed. I further certify that all other parties who have a mortgage or lien interest in the subdivision have been notified and signed this plat.

We understand and do hereby reserve the easement strips shown on this plat for the purposes stated and for the mutual use and accommodation of all utilities desiring to use or using same.

We also understand the following;

1. No buildings shall be constructed or placed upon, over, or across the utility easements as described herein.

2. Any public utility shall have the right to remove and keep removed all or part of any buildings, fences, trees, shrubs, or other growths or improvements which in any way endanger or interfere with construction, maintenance or efficiency of th eir respective system on any of these easement strips; and any public utility shall at all times have the right of ingress or egress to, from and upon the said easement strips for purpose of construction, reconstruction, inspecting, patrolling, maint aining, and either adding to or removing all or part of their respective system without the necessity of, at any time, procuring the permission of anyone.

3. The City of Rockwall will not be responsible for any claims of any nature resulting from or occasioned by the establishment of grade of streets in the subdivision.

4. The developer and subdivision engineer shall bear total responsibility for storm drain improvements.

5. The developer shall be responsible for the necessary facilities to provide drainage patterns and drainage controls such that properties within the drainage area are not adversely affected by storm drainage from the development.

6. No house dwelling unit, or other structure shall be constructed on any lot in this addition by the owner or any other person until the developer and/or owner has complied with all requirements of the Subdivision Regulations of the City of Rockwall regarding improvements with respect to the entire block on the street or streets on which property abuts, including the actual installation of streets with the required base and paving, curb and gutter, water and sewer, drainage structures, sto rm structures, storm sewers, and alleys, all according to the specifications of the City of Rockwall; or

Until an escrow deposit, sufficient to pay for the cost of such improvements, as determined by the city's engineer and/or city administrator, computed on a private commercial rate basis, has been made with the city secretary, accompanied by an agreement signed by the developer and/or owner, authorizing the city to make such improvements at prevailing private commercial rates, or have the same made by a contractor and pay for the same out of the escrow deposit, should the developer an d/or owner fail or refuse to install the required improvements within the time stated in such written agreement, but in no case shall the City be obligated to make such improvements itself. Such deposit may be used by the owner and/or developer as p rogress payments as the work progresses in making such improvements by making certified requisitions to the city secretary, supported by evidence of work done; or

Until the developer and/or owner files a corporate surety bond with the city secretary in a sum equal to the cost of such improvements for the designated area, guaranteeing the installation thereof within the time stated in the bond, which time shall be fixed by the city council of the City of Rockwall.

We further acknowledge that the dedications and/or exaction's made herein are proportional to the impact of the subdivision upon the public services required in order that the development will comport with the present and future growth needs of the City; I, my successors and assigns hereby waive any claim, damage, or cause of action that we may have as a result of the dedication of exaction's made herein.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

Cc: **Cheryl Dunlop, Director of Administrative Services (HR)**

FROM: **Shawn Yerks, Organizational Development & Training Administrator**

DATE: **October 30, 2019**

SUBJECT: **City of Rockwall's 457(b) Plan**

Human Resources is proposing to change the City of Rockwall's 457 Deferred Compensation Plan provider to ICMA-RC. For more than 45 years, ICMA-RC has focused exclusively on helping public sector employees build a financial security toward a well-deserved retirement. Their knowledge of local and state government deferred compensation and defined contribution plans makes the City's job easier, and ensures that participants are on track to build retirement security.

ICMA-RC is a non-profit organization focused on serving with a consistent, demonstrated focus on quality services and high retention rates, which are among the highest of any public sector retirement plan provider.

In addition, ICMA-RC has local representatives focused on educating participants and engaging them to make informed decisions about their retirement goals. This is done through their comprehensive, targeted participant education program using a combination of on-site training, financial planning services, and mobile and online services to help employees understand and fully utilize their retirement plan benefit.

We believe this proposed change will be beneficial to the City and its employees. This mutually beneficial partnership will ease the administrative burden and help the City better serve its employees by actively engaging them in retirement programs, to realize their retirement goals.

CITY OF ROCKWALL, TEXAS

RESOLUTION NO. 19-24

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, TERMINATING AMERICAN UNITED LIFE INSURANCE COMPANY OF INDIANAPOLIS, INDIANA, A ONEAMERICA COMPANY AS THE CITY OF ROCKWALL 457(b) PLAN ADMINISTRATOR'S AGENT; APPOINTING INTERNATIONAL CITY MANAGEMENT ASSOCIATION RETIREMENT CORPORATION (ICMA-RC) AS INVESTMENT ADVISOR, WITH RESPECT TO THE CITY OF ROCKWALL 457(b) PLAN; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the **CITY OF ROCKWALL** (the "City") sponsors the **City of Rockwall 457(b) Plan** (the "Plan") for the benefit of its employees, which is intended to be qualified under Section 401(a), 403(b) or 457 of the Internal Revenue Code of 1986 (the "Code") and its related trust to be tax exempt under section 501(a) of the Code; and

WHEREAS, the City currently engages Fiduciary Consulting Group, Inc. as a professional independent fiduciary for the Plan to undertake fiduciary responsibility for the administration and management of the Plan; and

WHEREAS, the City recently received recommendations from Fiduciary Consulting Group, Inc. to move the City's 457 Plan away from OneAmerica as the Plan Administrator's Agent to ICMA-RC as the preferred provider of the City's 457 Plan; and

WHEREAS, the City believes it is prudent to appoint ICMA-RC as the Administrator of the Plan and to act as investment advisor to Vantage Trust Company, LLC, the Trustee of Vantage Trust, in place of Reliance Trust.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS THAT:

Section 1. American United Life Insurance Company of Indianapolis, Indiana, a OneAmerica Company**,** is hereby terminated as the Plan Administrator's Agent of the City of Rockwall 457(b) Plan; and

Section 2. ICMA-RC is hereby appointed as Administrator of the Plan with respect to the City of Rockwall 457(b) Plan; and

Section 3. This change in the Administrator of the Plan designation is considered to have been in effect as of October 3, 2019, and it is so resolved.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 4TH DAY OF NOVEMBER, 2019.

72

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E, Public Works Director/City Engineer**

DATE: **October 30, 2019**

SUBJECT: **Squabble Creek Lift Station Wastewater Sludge Grinders Project**

Squabble Creek Lift Station is the largest lift station in the City of Rockwall's wastewater collection system. This lift station currently receives around 3 million gallons per day. The Squabble Creek Lift Station consists of submersible pumps that have the ability to pass 3 to 4 inch solids. A modern day challenge with wastewater is the introduction of "flushables" such as disposable wipes, diapers, etc. into the City's collection system. These "flushables" do not degrade when they enter the collection system. As disposables travel through the system, they tend to cling together and form long strands that are called rags. These rags tend to clog submersible pumps.

When clogged, there is the chance of a Sanitary Sewer Overflow (SSO) into Squabble Creek which flows to Lake Ray Hubbard. An overflow from a lift station this size would be a very costly and an environmental burden on the City. The operating and maintenance costs related to these modern day 'flushables" has become of concern to the City's Public Works Department. The proposed wastewater sludge grinders will chop the rags and other large debris into small squares that can be passed through the submersible pumps. This reduces the down-time of the lift station and the possibility of overflows if the pumps are down. The cutters will also extend the life of the pump impellers.

Staff requests City Council consider approving the professional engineering services contract for Birkhoff, Hendricks & Carter, L.L.P. to perform the engineering design services for the Squabble Creek Lift Station Wastewater Sludge Grinders project in an amount not to exceed $34,790.00, to be paid for out of Water and Sanitary Sewer Funds, and take any action necessary.

STATE OF TEXAS ♦
♦
COUNTY OF ROCKWALL ♦

PROFESSIONAL ENGINEERING SERVICES CONTRACT

This Agreement is made and entered into in Rockwall County, Texas, between City of Rockwall, Texas ("CITY"), a municipal corporation and political subdivision of the State of Texas, acting by and through its City Manager and Birkhoff, Hendricks and Carter, L.L.P., ("ENGINEER"), located at 11910 Greenville Avenue, Suite 600, Dallas, Texas, Engineers duly licensed and practicing under the laws of the State of Texas.

WHEREAS, CITY desires to engage Engineer as an independent contractor to render certain technical and professional services necessary for performing:

PROFESSIONAL ENGINEERING SERVICES for the Squabble Creek Lift Station Wastewater Sludge Grinders project.

NOW, THEREFORE, for and in consideration of the mutual covenants and agreements contained herein, the Parties hereby agree as follows:

1. Scope of Work

Engineer agrees to perform professional engineering services as specifically defined in this Contract as Attachment "A" and as authorized by CITY. Specifically, Engineer shall perform Professional services as requested by CITY and defined in Attachment "A".

The Parties by mutual agreement through contract amendments may provide for additional technical and professional services to be performed under the basic general terms and conditions of this Contract. CITY reserves the right to enter into another agreement with other engineering firms to provide the same or similar professional services during the term of this Contract for different projects.

2. Compensation & Term of Agreement

Cost for such services will be an amount not to exceed Thirty-Four Thousand Seven-Hundred Ninety dollars ($34,790.00) and billed in accordance with the payment schedule provided in Attachment "B". Engineer is not authorized to perform any work beyond the limited not to exceed amount without authorized written approval by CITY.

The term of this Agreement shall commence upon execution of this agreement and follow the schedule described in Attachment "C". In the event of termination, Engineer will assist the CITY in arranging a smooth transition process. However, Engineer's obligation to provide services to the CITY will cease upon the effective date of termination, unless otherwise agreed in writing.

3. Method of Payment

CITY shall pay Engineer its fees based on the presentation by Engineer to CITY of a correct monthly statement for all the amounts earned under the Contract together with reasonable supporting documentation verifying the accuracy of the fees and expenses. CITY shall then pay Engineer its fee within thirty (30) days after presentation of the accurate monthly statement by Engineer to CITY. CITY is a State sales and use tax exempt political subdivision of the State of Texas. All records supporting payment shall be kept in the offices of Engineer for a period of not less than three (3) years and shall be made available to CITY for inspection, audit or copying upon reasonable request.

4. Engineer's Standard of Care

Engineer shall provide its services under this Contract with the same degree of care, skill and diligence as is ordinarily provided by a professional Engineer under similar circumstances for a similar project. Engineer represents that it has the capability, experience, available personnel, and means required to perform the services contemplated by this Contract. Services will be performed using personnel and equipment qualified and/or suitable to perform the work requested by the CITY. CITY retains the right to report to Engineer any unsatisfactory performance of Engineer personnel for appropriate corrective action. Engineer shall comply with applicable federal, state, and local laws in connection with any work performed hereunder.

Engineer will seek written CITY approval to accept any contract or perform any services for any person, entity, or business working on this project. CITY may waive this potential conflict, but such waiver is at CITY's sole discretion and its decision shall be final.

5. Ownership of Documents

As part of the total compensation which CITY has agreed to pay Engineer for the professional services to be rendered under this Contract, Engineer agrees that hard copies of all finished and unfinished documents, data, studies, surveys, drawings, specifications, field notes, maps, models, photographs, preliminary reports, reports, bid packet/construction contract documents/advertisement for bids incorporating any CITY standard provisions provided by Engineer, will remain the property of the CITY. Engineer will furnish CITY with paper and electronic copies, to the extent they are available, of all of the foregoing to facilitate coordination, however, ownership of the underlying work product shall remain the intellectual property of the Engineer. Engineer shall have the right to use such work products for Engineer's purposes. However, such documents are not intended to be suitable for reuse by CITY or others on extension of the Project or on any other project. Any reuse without the express written consent of the Engineer will be at re-user's sole risk and without liability or legal exposure to the Engineer, and CITY to the extent allowed by law, shall hold harmless the Engineer from all claims, damages, losses, expenses, and costs, including attorneys' fees arising out of or resulting from the reuse of said documents without the Engineer's consent. The granting of such consent will entitle the Engineer to further compensation at rates to be agreed upon by CITY and the Engineer. The above notwithstanding, Engineer shall retain all rights in its standard drawing details, designs, specifications, databases, computer software and any other proprietary and intellectual property information provided pursuant to this Contract, whether or not such proprietary information was modified during the course of providing the services.

6. Insurance

A. Engineer agrees to maintain Worker's Compensation and Employer's Liability Insurance to cover all of its own personnel engaged in performing services for CITY under this Contract in at least the following amounts:

Workmen's Compensation – Statutory
Employer's Liability – $100,000
Bodily Injury by Disease - $500,000 (policy limits)
Bodily Injury by Disease - $100,000 (each employee)

B. Engineer also agrees to maintain Commercial General Liability, Business Automobile Liability, and Umbrella Liability Insurance covering claims against Engineer for damages resulting from bodily injury, death or property damages from accidents arising in the course of work performed under this Contract in not less than the following amounts:

$2,000,000 General aggregate limit

$1,000,000 each occurrence sub-limit for all bodily injury or property damage incurred all in one occurrence

$1,000,000 each occurrence sub-limit for Personal Injury and Advertising

C. Engineer shall add CITY, its City Council members and employees, as an additional insureds on all required insurance policies, except worker's compensation, employer's liability and errors and omissions insurance. The Commercial General Liability Policy and Umbrella Liability Policy shall be of an "occurrence" type policy.

D. Engineer shall furnish CITY with an Insurance Certificate on the date this Contract is executed and accepted by CITY, which confirms that all above required insurance policies are in full force and effect.

E. Engineer agrees to maintain errors and omissions professional liability insurance in the amount of not less than one million dollars ($1,000,000) annual aggregate, on a claims made basis, as long as reasonably available under standard policies.

7. INDEMNIFICATION

ENGINEER SHALL INDEMNIFY AND SAVE HARMLESS THE CITY AND ITS CITY COUNCIL MEMBERS AND EMPLOYEES FROM SUITS, ACTIONS, LOSSES, DAMAGES, CLAIMS, OR LIABILITY, INCLUDING WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, ALL EXPENSES OF LITIGATION, COURT COSTS, AND REASONABLE ATTORNEY'S FEES FOR INJURY OR DEATH TO ANY PERSON, OR INJURY TO ANY PROPERTY, RECEIVED OR SUSTAINED BY ANY PERSON OR PERSONS OR PROPERTY, TO THE EXTENT CAUSED BY THE NEGLIGENT ACTS OF ENGINEER OR ITS AGENTS OR EMPLOYEES, IN THE EXECUTION OF PERFORMANCE OF THIS CONTRACT.

ENGINEER'S TOTAL LIABILITY TO CITY FOR ANY LOSS OR DAMAGES FROM CLAIMS ARISING OUT OF, OR IN CONNECTION WITH, THIS CONTRACT FROM ANY CAUSE INCLUDING ENGINEER'S STRICT LIABILITY, BREACH OF CONTRACT, OR PROFESSIONAL NEGLIGENCE, ERRORS AND OMISSIONS SHALL NOT EXCEED ONE MILLION DOLLARS ($1,000,000). NEITHER PARTY TO THIS AGREEMENT SHALL BE LIABLE TO THE OTHER PARTY OR ANY THIRD PARTY CLAIMING THROUGH THE OTHER RESPECTIVE PARTY, FOR ANY SPECIAL, INCIDENTAL, INDIRECT, PUNITIVE, LIQUIDATED, DELAY OR CONSEQUENTIAL DAMAGES OF ANY KIND INCLUDING BUT NOT LIMITED TO LOST PROFITS OR USE OF PROPERTY, FACILITIES OR RESOURCES, THAT MAY RESULT FROM THIS AGREEMENT, OR OUT OF ANY GOODS OR SERVICES FURNISHED HEREUNDER.

8. Addresses for Notices and Communications

ENGINEER
Matt Hickey, P.E.
Partner
Birkhoff, Hendricks & Carter, L.L.P.
11910 Greenville Ave., #600
Dallas, Texas 75243

All notices and communications under this Contract shall be mailed or delivered to **CITY** and **Engineer** at the above addresses.

9. Successors and Assigns

CITY and Engineer each binds itself and its successors, executors, administrators and assigns to the other parties of this Contract and to the successors, executors, administrators and assigns of such other parties, in respect to all covenants of this Contract. Except as noted in the first part of this Paragraph, neither CITY nor Engineer shall assign, sublet or transfer its interest in this Contract without the written consent of the other. Nothing herein shall be construed as creating any personal liability on the part of any officer, council member, employee or agent of any public body which is a party hereto.

10. Termination for Convenience of the Parties

Engineer and CITY may terminate this Contract for their convenience at any time by giving at least thirty (30) days notice in writing to each other. If the Contract is terminated by CITY and/or Engineer as provided herein, Engineer will be paid for the Work provided and expenses incurred up to the termination date, if such final compensation is approved by CITY, in its sole discretion. If this Contract is terminated due to the fault of Engineer, Paragraph 10 hereof, relative to Termination for Cause, shall apply.

11. Changes

CITY may, from time to time, request changes in the Scope of Work of **Engineer** to be performed hereunder. Such changes, including any increase or decrease in the amount of **Engineer's** compensation, or time for performance, which are mutually agreed upon by and between **CITY** and **Engineer**, shall be incorporated in written amendments to this Contract. Any subsequent contract amendments shall be executed by the City Manager or other authorized representative as designated by the City Manager or City Council.

Any alterations, additions or deletions to the terms of this Contract, including the scope of work, shall be by amendment **in writing** executed by both CITY and Engineer.

13. Reports and Information

Engineer, at such times and in such forms as **CITY** may reasonably require, and as specified in the Scope of Work or in additional Contract Amendments shall furnish **CITY** periodic reports pertaining to the Work or services undertaken pursuant to this Contract, the cost and obligations incurred, or to be incurred in connection therewith, and any other matter covered by this Contract.

14. Entire Agreement

This Contract and its Attachments and any future Contract Amendments constitute the entire agreement and supersede all prior agreements and understandings between the parties concerning the subject matter of this Contract.

15. Waiver

The failure on the part of either party herein at any time to require the performance by the other party, of any portion of this Contract, shall not be deemed a waiver of, or in any way affect that party's rights to enforce such provision, or any other provision. Any waiver by any party herein of any provision hereof, shall not be taken or held to be a waiver of any other provision hereof, or any other breach hereof.

16. Severability

The invalidity or unenforceability of any provision of this Contract shall not affect the validity or enforceability of any other provision of this Contract.

17. Survival

Any and all representations, conditions and warranties made by Engineer under this Contract are of the essence of this Contract and shall survive the execution, delivery and termination of it.

18. Governing Powers and Law

Both Parties agree and understand that the City does not waive or surrender any of its governmental powers by execution of this Agreement. To that end, the parties further understand that this agreement shall not be considered a contract for goods or services under Texas Local Government Code, Section 271.151 and Contractor waives any right or entitlement granted said provisions. This Contract is governed by the laws of the State of Texas and all obligations of the parties under this Contract are performable in Rockwall County, Texas.

19. Attorney's Fees

If it is necessary for either Party herein to file a cause of action at law or in equity against the other Party due to: (a) a breach of this Contract by the other Party and/or (b) any intentional and/or negligent act or omission by the other Party arising out of this Contract, the non-breaching or non-negligent Party shall be entitled to reasonable attorney's fees and costs, and any necessary disbursements, in addition to any other relief to which it is legally entitled.

20. State or Federal Laws

This Contract is subject to all applicable federal and state laws, statutes, codes, and any applicable permits, ordinances, rules, orders and regulations of any local, state or federal government authority having or asserting jurisdiction, but nothing contained herein shall be construed as a waiver of any right to question or contest any such law, ordinance, order, rule or regulation in any forum having jurisdiction.

ATTACHMENT "A"
Squabble Creek Lift Station Wastewater Sludge Grinders
For
City of Rockwall

Scope of Services

Project Understanding:

The City of Rockwall (City) desires to engage the services of Birkhoff, Hendricks and Carter (Consultant) to provide engineering design, bidding and construction administration services for the installation of four submersible wastewater sludge grinders at the Squabble Creek Lift Station. The grinders are to be installed in combinations of two into the two 8-foot diameter manholes upstream of the Squabble Creek Lift Station wet well inlet pipe. The existing 8-ft diameter manhole cones, ring and covers will be replaced to a flat top section capable of allowing for hatches to open above the grinder units along with the installation of rails to lift and lower the units in and out of the manholes. Electrical design will include mounting the grinder control panels in the existing Squabble Creek Lift Station electrical room along with power and SCADA conduits from the manholes to the electrical room.

It is our understanding the design phase will occur in the 2019/2020 fiscal year and bidding and construction may occur in the 2020/2021 fiscal year.

PART I BASIC SERVICES

A Design Phase:

1. Conduct project kickoff meeting with Consultant Project Manager and City Staff.
2. Prepare cover sheet, location map and sheet index.
3. Prepare site plan at a Scale of not less than 1-inch = 20-feet showing existing manholes and lift station wet wells, piping and valves.
4. Prepare existing manhole sections based on the Squabble Lift Station shop drawings for the exiting manholes
5. Prepare structural details to modify 8-foot dimeter manhole tops. Structural design to be completed by Ronald A. Roberts Associates, Inc. (Texas Firm 511).
6. Obtain wastewater sludge grinder support rack and grinder details from manufacturer if available and include the details in the plans, if available.
7. Prepare electrical site plan at a scale of not less than 1-inch = 20-feet. Electrical plans to include a one line diagram and details.
8. Complete a quantity take off and prepare proposal and bid schedule.
9. Prepare Technical Specifications for the wastewater sludge grinders.

10. Preparation of specifications and contract documents utilizing the City of Rockwall standard specifications as the basis of the documents. Contract Documents will include the following:

    (a) City of Rockwall standard construction contract forms
    (b) Rockwall Notice to bidders
    (c) Rockwall Special instructions to bidders
    (d) Bid Schedule
    (e) Rockwall Standard construction contract
    (f) Performance bond
    (g) Payment bond
    (h) Maintenance bond
    (i) Certificate of insurance
    (j) Rockwall General conditions
    (k) Rockwall Special conditions
    (l) Technical specifications

11. Develop opinion of probable construction cost at 90% and 100% milestones.
12. Submit two sets of 11-inch X 17-inch 90% construction plans and specifications to the City for review and comment.
13. Revise construction plans and specifications from the City's 90% review comments.
14. Submit two 11-inch X 17-inch 100% final construction plans for bidding

B Bidding Phase:

1. The City will handle all notices to publish in the newspaper. The Engineer will upload to Civcastusa.com (online service) non-modifiable copies of the Engineer's sealed, signed and dated plan sheets and specifications. In the event that the electronic copies are modified, the original file at Birkhoff, Hendricks & Carter, LLP's office will govern in all cases.
2. The Engineer will prepare addenda to answer questions of the plans and specifications. The Engineer will provide the City with sealed, signed and dated addenda. The Engineer will upload the addenda to Civcastusa.com (online service) to respond to all questions. Questions must be submitted by potential bidders a minimum of 72-hours before the bid opening. All addenda shall be posted a minimum of 24-hours before the bid opening.
3. Attend Pre-Bid Meeting, if requested by City.

4. Obtain experience record and references from the lowest bidder. Check references of apparent low bidder. Formulate opinion from information received and provide a letter of recommendation for award of a construction contract.

C Construction Phase:

1. Attend the Pre-Construction Conference. City will prepare agenda.
2. Attend coordination meetings with contractor, quality control personnel, and City representatives as required to discuss strategy, problem areas, progress, and other coordination matters (Two meetings are included).
3. Review shop drawings and submittal information which the Contractor submits. This review is for the benefit of the Owner and covers only general conformance with information given by the Contract Documents. The contractor is to review and stamp their approval on submittals prior to submitting to the Engineer. Review by the Engineer does not relieve the Contractor of any responsibilities, safety measures or the necessity to construct a complete and workable facility in accordance with the Contract Documents. Review of shop drawings will be completed by review of electronic PDF files provided by the Contractor to the Engineer's email system.
4. Provide written responses to requests for information or clarification to City or Contractor.
5. Prepare and process routine change orders for this project as they pertain to the original scope of work.
6. Prepare monthly pay request from information obtained from Contractor and/or City Inspector, if requested by the City.
7. Accompany the City during their final inspection of the project.
8. Recommend final acceptance of work based on information from the on-site representative.

PART II ADDITIONAL SERVICES

For the following scope items defined as additional services are those anticipated to be necessary to facilitate design of the project. These services will be performed on an as-need basis and invoiced based on effort and expenses incurred.

Design Surveys:

A. Topographic and Design Survey:

1. Establish horizontal control points temporary vertical control benchmarks in the vicinity of the proposed improvements.
2. Perform field survey to identify and locate existing lift station wet well, valve vault, electrical room, horizontal and vertical location of manholes, valves, and new topographic features recently constructed with the Squabble Creek Lift Station and Permanent Bypass projects.

B. Reproduction:

1. Provide four 11-inch X 17-inch plan sets during design for City reviews. For construction:

(a)Half Size 11 X 17 Plans (15 Total)

- 7 - City (File, Engineering, Inspector, Sub-Inspector, Water, Wastewater, Streets/Drainage)
- 4 - Franchise Utilities (AT&T, Atmos, TXU/Oncor, Charter)
- 3 – Contractor / Subcontractors
- 1 – Testing Lab.

(b) Full Size 22 X 34 Plans (5 Total)

- 2 - City (File and Inspector)
- 3 – Contractor / Subcontractors

(c)Specification Books (7 Total)

- 3 – City (Engineering Project Manager, Inspector and Sub Inspector)
- 3 – Contractor / Subcontractors
- 1 – Testing Lab

C. Record Drawings:

Utilizing City's on-site representative and Contractor construction record information, Engineer will prepare one set of reproducible 11-inch X 17-inch record drawings and provide an electronic copy in PDF format on a CD for City records. Engineer will include a tabular inventory of the storm sewer and inlets installed for City records.

PART III EXCLUSIONS

The intent of this scope of services is to include only the services specifically listed herein and none others. Services specifically excluded from this scope of services include, but are not necessarily limited to the following:

A. Certification that work is in accordance with plans and specifications.
B. Consulting services by others not included in Scope of Services.
C. Contractor's means and methods.
D. Environmental impact statements and assessments.
E. Fees for permits.
F. Fees for publicly advertising the construction project.
G. Fiduciary responsibility to the Client.
H. On-site construction safety precautions, programs and responsibility (Contractor's responsibility).
I. Phasing of Contractor's work.
J. Preliminary engineering report.
K. Revisions and/or change orders as a result of revisions after completion of original design (unless to correct error on plans).
L. Trench safety designs.

ATTACHMENT "B"

Payment Schedule

Compensation for Basic Services in Part I shall be on a lump sum basis. The tabulation below establishes the not to exceed amount for each category of contract service:

	Task	Fee
	PART 1 - BASIC SERVICES	
A.	Design Phase	$ 16,750.00
B.	Bidding Phase	$3,900.00
C.	Construction Administration Phase	$ 9,850.00
	Basic Services Subtotal:	**$ 30,500.00**
Compensation for special services under Additional Services shall be on an hourly basis of salary cost times a multiplier of 2.4 for time expended on the task. Field survey crew shall be based on $170.00 per hour, inclusive of all equipment rentals and software licensing; plus, mileage charge at the IRS established rate. Expenses shall be at invoice cost times a multiplier of 1.15.		
	PART II - ADDITIONAL SERVICES	
A.	Design Surveys	$ 1,050.00
B.	Reproduction of Construction plans & Specifications	$ 2,000.00
C.	Record drawings	$ 1,240.00
	Additional Services Subtotal*	**$4,290.00**
	Project Total*	**$ 34,790.00**

Fees that are Lump Sum for each task and will be invoiced monthly based upon the overall percentage of services performed.

ATTACHMENT "C"

Project Schedule

Complete Field Surveys	1 Week from Notice to Proceed
Submit 90% Plans to City for Review	2 Months from Notice to Proceed
Receive 90% Review Comments from City	2 Weeks from Submittal
Complete 100% (Final) Plans & Specifications	1 Month from City Return of 90%

Note: This schedule will be converted to dates once the City provides a Notice to proceed

ATTACHMENT "D"

Sub-Consultants

The Sub-Consultants anticipated for the work included in the scope of services for this project are as follows.

Structural Design:

Ronald A Roberts Associates, Inc.
Mr. Andrew Lloret, P.E.
Chief Structural Engineer
2948 N. Stemmons Freeway
Dallas, Texas 75247
Office: 214-637-6299

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: **Richard Crowley, City Manager**

FROM: **Lea Ann Ewing, Purchasing Agent**

DATE: **October 29, 2019**

SUBJECT: **Purchase of onsite fixed generators at three Lift Stations**

Approved in the Sewer Operating budget is the purchase of fixed generators for stand-by power at Northshore, Lakeview Summit and Williams lift stations. The Generac generators are available for purchase from WPI (Waukesha-Pearce) including installation for a total amount of $229,380 through the Buy Board purchasing cooperative contract #577-18. Budget of $259,700 is adequate to cover the cost of this project.

As a member and participant in the BuyBoard cooperative program, the City has met all formal bidding requirements pertaining to the purchase and install of these new generators.

For Council consideration is this generator bid award to WPI for $229,380 and authorize the City Manager to execute a contract for this project.

91

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Richard Crowley, City Manager**

FROM: **Mary Smith, Assistant City Manager**

DATE: **November 1, 2019**

SUBJECT: **Purchase of New Fire Apparatus**

Briefly discussed during the 2020 budget work session on August 27th was the arrival of our two new Fire Pumpers. In the FY18 budget Council approved the purchase of one pumper and in the FY19 budget approved a second pumper. We originally budgeted $1,365,000 for the two trucks and were able to get them at state contract pricing which brought the total down to $1,250,633. The pumpers replace a 1999 and a 2007 model truck and the trucks have taken more than one year to build.

We originally anticipated issuing debt amortized over 10 years to finalize the purchase of the pumpers. As we discussed during the budget process we have accumulated a fund balance in the debt service fund well in excess of our financial policies. We would propose to amend the FY2020 budget to provide for payment of these two pumpers from the debt service fund rather than issue new debt.

The Debt Service fund balance is projected to be $4,979,357 by the end of the fiscal year. This is more than 49% of our annual debt service payments and will still be 36% of our annual payments if the payment is approved by Council.

Cole, Kristy

From: Melody Mayer <melody@renewfence.com>
Sent: Wednesday, October 30, 2019 9:25 AM
To: Cole, Kristy
Subject: City Council Agenda

Good-morning Kristi,

My name is Melody Mayer I would like to get on the City Councils upcoming agenda to discuss the possibility of changing the rules as it relates to residential retaining walls the material and height restrictions. I am a contractor and would like to discuss why I feel the rules should be adjusted to accept wood. Please let me know what all you need from me to proceed.

Best regards,

Melody Mayer

Rockwall City Council

Subject: Retaining wall located at 506 Shoretrail Dr., Rockwall

My name is Jeff Shellito. I have filed for a code compliance inspection with the Rockwall Building Inspections office against the resident at 506 Shoretrail Dr. for improper construction of a retaining wall.

The city codes are a necessity for now and our future. We need to maintain these standards that our current and past city officials have set forth.

If this structure is approved:

1. Home owners and contractors will see this and start duplicating this in other parts of the city. Can you say yes to this home owner and no to another?

2. What will be the next code violation? The use of railroad ties?

3. This approval would be a step back for Rockwall and its residents. Let's protect our current and our future home owners.

Thank you,

Jeff Shellito

CITY OF ROCKWALL

CITY COUNCIL MEMORANDUM

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller, Director of Planning and Zoning
DATE:	November 4, 2019
SUBJECT:	Appointment with Scott Mommer, PE on Behalf of the Home Depot

Scott Mommer of Lars Anderson & Associates, Inc. is requesting that the *Land Use Schedule* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) be amended to allow the *Rental, Sales, and Service of Heavy Machinery and Equipment* land use with a Specific Use Permit (SUP) in a Commercial (C) District. This request is in response to staff's comments regarding a submitted site plan [*Case No. SP2019-036*], which proposed expanding an existing hardware store (*i.e. Home Depot*) to add a *Tool Rental Center*. When communicating with the applicant before the submittal, staff was under the impression that the expansion would only operate as a tool rental center (*i.e. power drills, saws, electric sanders*), which is permitted *by-right* in a Commercial (C) District; however, while reviewing the submitted site plan staff noticed that the proposed plan included an outside storage area and a *Rental, Sales, and Service of Heavy Machinery and Equipment* component in conjunction with the *Tool Rental Center*. Based on this, staff notified the applicant that the *Rental, Sales, and Service of Heavy Machinery* land use is not a permitted land use within the Commercial (C) District. In response to this, the applicant requested that the use be allowed in a Commercial (C) District on a *case-by-case* basis (*i.e. through a Specific Use Permit [SUP]*).

Should the City Council choose to direct staff to make changes to the ordinance, staff would proceed based on the following schedule:

Planning and Zoning Work Session: November 26, 2019
Planning and Zoning Public Hearing: December 10, 2019
City Council Public Hearing/First Reading: December 16, 2019
City Council Public Hearing/Second Reading: January 6, 2019

Should the City Council ultimately grant the requested amendment, staff should point out that the applicant would not be permitted to provide the proposed *Rental, Sales, and Service of Heavy Machinery and Equipment* land use on-site until a Specific Use Permit (SUP) is approved by the City Council pending a recommendation from the Planning and Zoning Commission. Approval of a Specific Use Permit (SUP) would be a separate discretionary process. In the attached packet staff has placed a copy of the applicant's request.

RE: Home Depot – Amended Site Plan – Tool Rental Center (TRC) & THD Rental Equipment
765 E-I30, Rockwall, TX 75087

Korey,

On behalf of Home Depot, our Firm is submitting for an Amended Site Plan to Permit a proposed Tool Rental Center (TRC) and THD Rental Equipment Display. The general operations for the TRC is the rental of tools associated with general construction, which could range from a drill to a larger power equipment. This operation is utilized by both our general customers and contractors. In conjunction with the TRC, Home Depot is requesting to utilize approximately 10 parking stalls identified on the proposed Site Plan to store and display compact power rental equipment that can be rented through the TRC. Such equipment are items like small trailers, see the attached file for a list of example compact power equipment. It should be noted that the HD Rental equipment is owned and operated by Home Depot and there are no Third-Party Entities involved with this accessory use. In addition, no service, repairs, or maintenance or done on THD Rental equipment at the store, as Home Depot owns various locations where they are serviced by Home Depot at their maintenance facility throughout the region.

Attached you will find the following submittal items:

- Application signed by Home Depot
- Four (4) full size (24” x 36”) proposed Site Plan
- Four (4) full size (24” x 36”) proposed Building Elevation/Colored Rendering
- Check # 1238 for $100.00

In advance, we greatly appreciate the City’s review of the proposed project and feel free to contact me with any questions by email at smommer@larsandersen.com or by cell at 559-978-7060.

Sincerely,
LARS ANDERSEN & ASSOCIATES, INC.

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
DATE:	October 21, 2019
APPLICANT:	Marty Wright
CASE NUMBER:	Z2019-022; *Specific Use Permit (SUP) for a Detached Garage*

SUMMARY At the request of the applicant, this item was postponed at the 10/21 mtg. until 11/04.

Hold a public hearing to discuss and consider a request by Marty Wright for the approval of a Specific Use Permit (SUP) for a detached garage on a one (1) acre tract of land identified as Lot 10, Block B, Saddlebrook Estates #2 Addition, City of Rockwall, Rockwall County, Texas, zoned Single-Family 16 (SF-16) District, addressed as 2340 Saddlebrook Lane, and take any action necessary.

BACKGROUND

The subject property was annexed in 1999 [*Ordinance No. 99-33*], is zoned Single-Family 16 (SF-16) District, and is addressed as 2340 Saddlebrook Lane. On November 11, 2001, the City Council approved a change in zoning [*Case No. PZ2008-102; Ordinance No. 01-102*], from an Agricultural (AG) District to a Single-Family 16 (SF-16) District for the Saddlebrook Estates #2 Addition. On October 21, 2002, the City Council approved a replat [*Case No. PZ2002-71-01*] for the Saddlebrook Estates #2 Addition.

PURPOSE

The applicant is requesting approval of a Specific Use Permit (SUP) to allow a detached garage that exceeds the maximum allowable size for a property in a Single-Family 16 (SF-16) District.

ADJACENT LAND USES AND ACCESS

The subject property is located at 2340 Saddlebrook Lane. The land uses adjacent to the subject property are as follows:

North: Directly north of the subject property there are several single-family homes located within the Saddlebrook Estates #2 Addition, followed by the corporate limits of the City of Rockwall. These homes are zoned Single-Family 16 (SF-16) District. Beyond this is E. Quail Run Road, which is identified as a M4U (*major collector, four [4] lane, undivided roadway*) on the City's Master Thoroughfare Plan. Following this, there is a large vacant tract of land zoned Agricultural (AG) District.

South: Directly south of the subject property, are several single-family homes within the Saddlebrook Estates #2 Addition, which are zoned Single-Family 16 (SF-16) District, followed by the corporate limits of the City of Rockwall. Beyond this is FM-1141, which is identified as a M4D (*major collector, four [4] lane, divided roadway*) on the City's Master Thoroughfare Plan.

East: Directly east of the subject property there are several single-family homes within the Saddlebrook Estates #2 Addition, which are zoned Single-Family 16 (SF-16) District. Beyond this is FM-1141, which is identified as a M4D (*major collector, four [4] lane, divided roadway*) on the City's Master Thoroughfare Plan and delineates the corporate limits of the City of Rockwall.

West: Directly west of the subject property are several single-family homes within the Saddlebrook Estates #2 Addition, which are zoned Single-Family 16 (SF-16) District. Beyond this are several single-family homes zoned Agricultural (AG) District followed by John King Boulevard, which is identified as a P6D (*principle arterial, six [6] lane, divided roadway*) on the City's Master Thoroughfare Plan.

CHARACTERISTICS OF THE REQUEST

The applicant is requesting approval of a Specific Use Permit (SUP) for a detached garage that exceeds the maximum allowable size for properties located within a Single-Family 16 (SF-16) District. Currently situated on the subject property, there is a 3,397 SF brick single-family home and a 216 SF accessory building that is clad with wood. The proposed building will be situated behind the main structure, will be 13' 8" in height, and will be constructed of metal. The building will include a 24' x 40' (*i.e. 960 SF*) detached garage and a 6' x 40' (*i.e. 240 SF*) porch that will be on the front of the building. The total footprint of the building will be 1,200 SF (*i.e. 35% of the size of the home*). The porch will incorporate windows with shutters, double walk-in doors, and wooden posts. The applicant has stated that the purpose of the porch is to blend the building with the neighborhood by incorporating architectural elements that are typically seen on a single-family home. The building will have two (2) roll-up doors located on each of the side façades (*i.e. north and south façades*) and the applicant has stated that detached garage will be utilized to store several antique vehicles. The existing 12' x 18' (*i.e. 216 SF*) accessory building will be relocated and will be situated adjacent to the northern side façade of the proposed detached garage. The applicant has provided a site plan and proposed building elevations to be reviewed by the Planning and Zoning Commission and the City Council.

CONFORMANCE WITH THE CITY'S CODES

According to Subsection 7.04, *Accessory Structure Development Standards*, of Section 7, *District Development Standards*, of Article V, *District Development Standards*, of the Unified Development Code (UDC), in a Single-Family 16 (SF-16) District a detached garage is permitted provided that it is no larger than 625 SF. The detached garage shall include a minimum of one (1) garage bay door large enough to accommodate a standard size motor vehicle and shall be architecturally compatible with the primary structure. In this case, the proposed detached garage is 960 SF and the porch is 240 SF (*i.e. a total building footprint of 1,200 SF*), which exceeds the maximum allowable size of a detached garage. Although the proposed building exceeds the maximum allowable size, the applicant has provided additional architectural elements (*i.e. the front porch, windows and shutters, and the double walk-in doors*) on the building in order for the building to be consistent with the main structure. Additionally, the proposed building incorporates two (2) roll-up doors that are large enough to accommodate a standard passenger vehicle. Based on the proposed design of the building, the applicant's request appears to be in conformance with the requirements stipulated by the Unified Development Code (UDC) with regard to detached garages; however, the Planning and Zoning Commission and City Council are tasked with determining if the proposed building is architecturally compatible with the primary structure.

STAFF ANALYSIS

When looking at the applicant's request, it was observed that a large majority of property owners *(i.e. 26 of the 44 homes or roughly 60%*) currently have a detached garage and/or accessory building on their properties. Of the existing accessory buildings within the Saddlebrook Estates #2 Addition, several are roughly the same size or larger than (*i.e. 900-1,300 SF*) the proposed detached garage. It should be noted that most of the accessory buildings that are visible from the street utilize exterior materials similar to the main structure (*i.e. a combination of brick and cementitious lap siding*). Staff was able to determine that 30 building permits have been for accessory buildings within the Saddlebrook Estates #2 Addition and 27 of the permits are still active (*i.e. not expired, voided, or withdrawn*). A vast majority of the permits were issued between 2002 (*i.e. shortly after this area was annexed*) and 2009. In this case, the proposed detached garage is larger than the maximum allowable

detached garage; however, the design of the structure (*i.e. inclusion of a front entryway door, windows, shutters, and front porch*) appears to be architecturally compatible with the main house and would resemble a residential building. The building will sit more than 100-feet from the front property line and be approximately four (4)-feet higher than the street. Due to this, visibility of the garage bay doors will be limited from the front property line. Should the detached garage be visible from of the front of the property, the garage would likely resemble the existing detached garages on the surrounding properties (*i.e. the bay doors would be visible from the street*). Given that a majority of the surrounding homes have a detached garage, an accessory building, and/or a portable building approval of this request does not appear to negatively impact the subject property or surrounding properties. Staff should note, approval of a Specific Use Permit (SUP) is a discretionary decision for the City Council, pending a recommendation from the Planning and Zoning Commission. Should this request be approved, a total of two (2) accessory buildings will be located on the subject property.

NOTIFICATIONS

On September 20, 2019, staff sent 30 notices to all residents/property owners within 500-feet of the subject property. There are no Homeowner's Associations (HOA's)/Neighborhood Associations located within 1,500-feet of the subject property and are participating in the Neighborhood Notification Program. At the time this report was written, staff had received four (4) emails and one (1) notice in favor and one (1) email in opposition of this request.

CONDITIONS OF APPROVAL

If the City Council chooses to approve the applicant's request then staff would propose the following conditions of approval:

(1) The following conditions pertain to the operation of a *detached garage* on the *Subject Property* and conformance to these conditions are required for continued operations:

  (a) The detached garage shall generally conform to the concept plan and the conceptual building elevations depicted in *Exhibits 'B'* & *'C'* of the attached ordinance;

  (b) The detached garage shall not exceed a maximum size of 1,200 SF;

  (c) The detached garage shall not exceed an overall height of 15-feet;

  (d) The subject property shall not have more than two (2) accessory buildings;

(2) Any construction resulting from the approval of this zoning change shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION

On October 8, 2019, the Planning and Zoning Commission's motion to recommend denial of the applicant's request was approved by a vote of 7-0. According to Section 2.03(G), *Protest of a Zoning Change*, of Article XI, *Development Applications and Review Procedures*, of the Unified Development Code (UDC), "(i)f such change [*zoning change or Specific Use Permit (SUP)*] is recommended for denial by the Planning and Zoning Commission, such zoning change or Specific Use Permit (SUP) shall require a supermajority vote (*i.e. a three-forths vote of those members present*), with a minimum of four (4) votes in the affirmative required for approval."

NOTICE OF PUBLIC HEARING
CITY OF ROCKWALL, PLANNING & ZONING DEPARTMENT

PHONE: (972) 771-7745
EMAIL: PLANNING@ROCKWALL.COM

To Whom It May Concern:

You are hereby notified that the City of Rockwall Planning and Zoning Commission and City Council will consider the following application:

Case No. Z2019-022: SUP for Accessory Building

Hold a public hearing to discuss and consider a request by Marty Wright for the approval of a Specific Use Permit (SUP) for an accessory building on a one (1) acre tract of land identified as Lot 10, Block B, Saddlebrook Estates #2 Addition, City of Rockwall, Rockwall County, Texas, zoned Single-Family 16 (SF-16) District, addressed as 2340 Saddlebrook Lane, and take any action necessary.

For the purpose of considering the effects of such a request, the Planning and Zoning Commission will hold a public hearing on **Tuesday, 10/8/2019 at 6:00 p.m.,** and the City Council will hold a public hearing on **Monday, 10/21/2019 at 6:00 p.m.** These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street.

As an interested property owner, you are invited to attend these meetings. If you prefer to express your thoughts in writing please return the form to:

Korey Brooks
Rockwall Planning and Zoning Dept.
385 S. Goliad Street
Rockwall, TX 75087

You may also email your comments to the Planning Department at planning@rockwall.com. If you choose to email the Planning Department please include your name and address for identification purposes.

Your comments must be received by **10/21/2019** to ensure they are included in the information provided to the City Council.

Sincerely,

Ryan Miller, AICP
Director of Planning & Zoning

Subject: Case No. Z2019-022

This is in regards to the above SUP request for 2340 Saddlebrook Lane.

First of all, we are 100% in favor of the request to build an accessory building in excess of 900 square feet which we assume is the reason for the SUP.

We know from building our own workshop in 2006 that at that time, the city required that the exterior cladding contains the same materials, excluding glass, as found on the main structure which in our case meant that we needed to brick the accessory building. I can think of at least 7 accessory buildings in Saddlebrook Estates that have been built and all of them comply with this requirement. From looking at the request and viewing the renderings, it appears that this structure is a 100% steel building.

Is this SUP just for the structure being greater than 900 square feet?

Is there an additional variance being applied for not using the same cladding material as the main residence?

Has the Rockwall UDC changed since 2006 that allows for a metal accessory building not allowed previously?

We know that bricking an accessory building is more expensive than not, but up to this point everyone in our neighborhood has had to comply. And honestly it has kept the neighborhood looking much better than if we had all built metal buildings.

Thanks for any clarification you can provide,

Kevin & Debbie Berger

Our names are Willard and Peggy Thomas and we are in favor of the request for the zoning change. It is our belief that the inhabitants of the home will build an appropriate structure for our neighborhood, as their home is one of the nicest ones in the neighborhood and so very well-kept thank you very much.

Case No. Z2019-022
I am in favor of the request for SUP for Accessory Building to 2340 Saddlebrook Lane.

I also request that the Council consider the advantages of a Steel Building over conventional construction of wood and brick.
I have attached 2 sites that I have found listing the advantages.

Eco-friendly
Lower Cost
More efficient
Durability - Little to no maintenance
Noncombustible material - **lower risk of fire**
Insurance discounts
Increased resale value

PLEASE RETURN THE BELOW FORM

Case No. Z2019-022: SUP for Accessory Building

Please place a check mark on the appropriate line below:

☑ I am in favor of the request for the reasons listed below.

☐ I am opposed to the request for the reasons listed below.

While I recognize the fact that no one wants their neighborhood to become a warehouse district, I think Mr. Wright's request should be approved. If anyone will keep it looking nice, he will. He and his wife and son are always out doing yard work & landscaping. Best yard in the neighborhood! I'm sure it will be done tastefully to fit in and maintained to look great.

Bradley and Susan Jones
2352 Saddlebrook Lane
Rockwall, TX 75087

We are opposed to the request for the reasons listed below:

The size and construction type are not compatible with the neighborhood. We are considering building a detached garage and research indicates that the structure needs to be built with the same materials as the house…not a metal building. Also, the addition of a building that size would start to crowd the lot and not be consistent with the rest of the neighborhood. For these two reasons, I believe the construction of this structure would decrease home values in the future and lead potentially lead to other requests of this nature.

Regards, Brad Jones

Planning and zoning:

The situs address is 2340 Saddlebrook Ln. Rockwall, Texas 75087. We hope to build a storage building on our property. The property is 1 acre and currently has our home, pool, cabana, accessory building and all fence is wrought iron and a 8 foot wood fence on the east side that belongs to my neighbor.

What we plan to do is move our current accessory building to the north end of the property and add a storage building just of south of that structure. The proposed storage building will have a slab 30x40. The structure will include 24x40 of storage and a 6x40 porch on the west side. All windows and walk-in doors will be on the porch side and it will include overhead roll up door on the north and south end of the building. Maximun height will be 13 foot 8 inches. Colors will be Sandstone, Brown and wainscot trim on the bottom. No plumbing will be added and electricity will be added at a later time. A 90 foot driveway will be added to meet up with the proposed building at a later time.

We have a building quote from Eversafe Buildings for a total of $14,245.52 not including the slab. Eversafe has also included the concrete slab recommendations, which I have included in this packet. The slab cost is estimated to be approx. $9600.00, for a total project cost of approx. $23,850.00.

In our neighborhood we have other projects that also went past the maximum square footage and one having a second floor and going well above the 15-foot maximum height requirement.

Our use of this building to store several antique cars. The reason for the porch was my wife's idea.

I have included:

Site map of my property indicating proposed building site and feet between borders

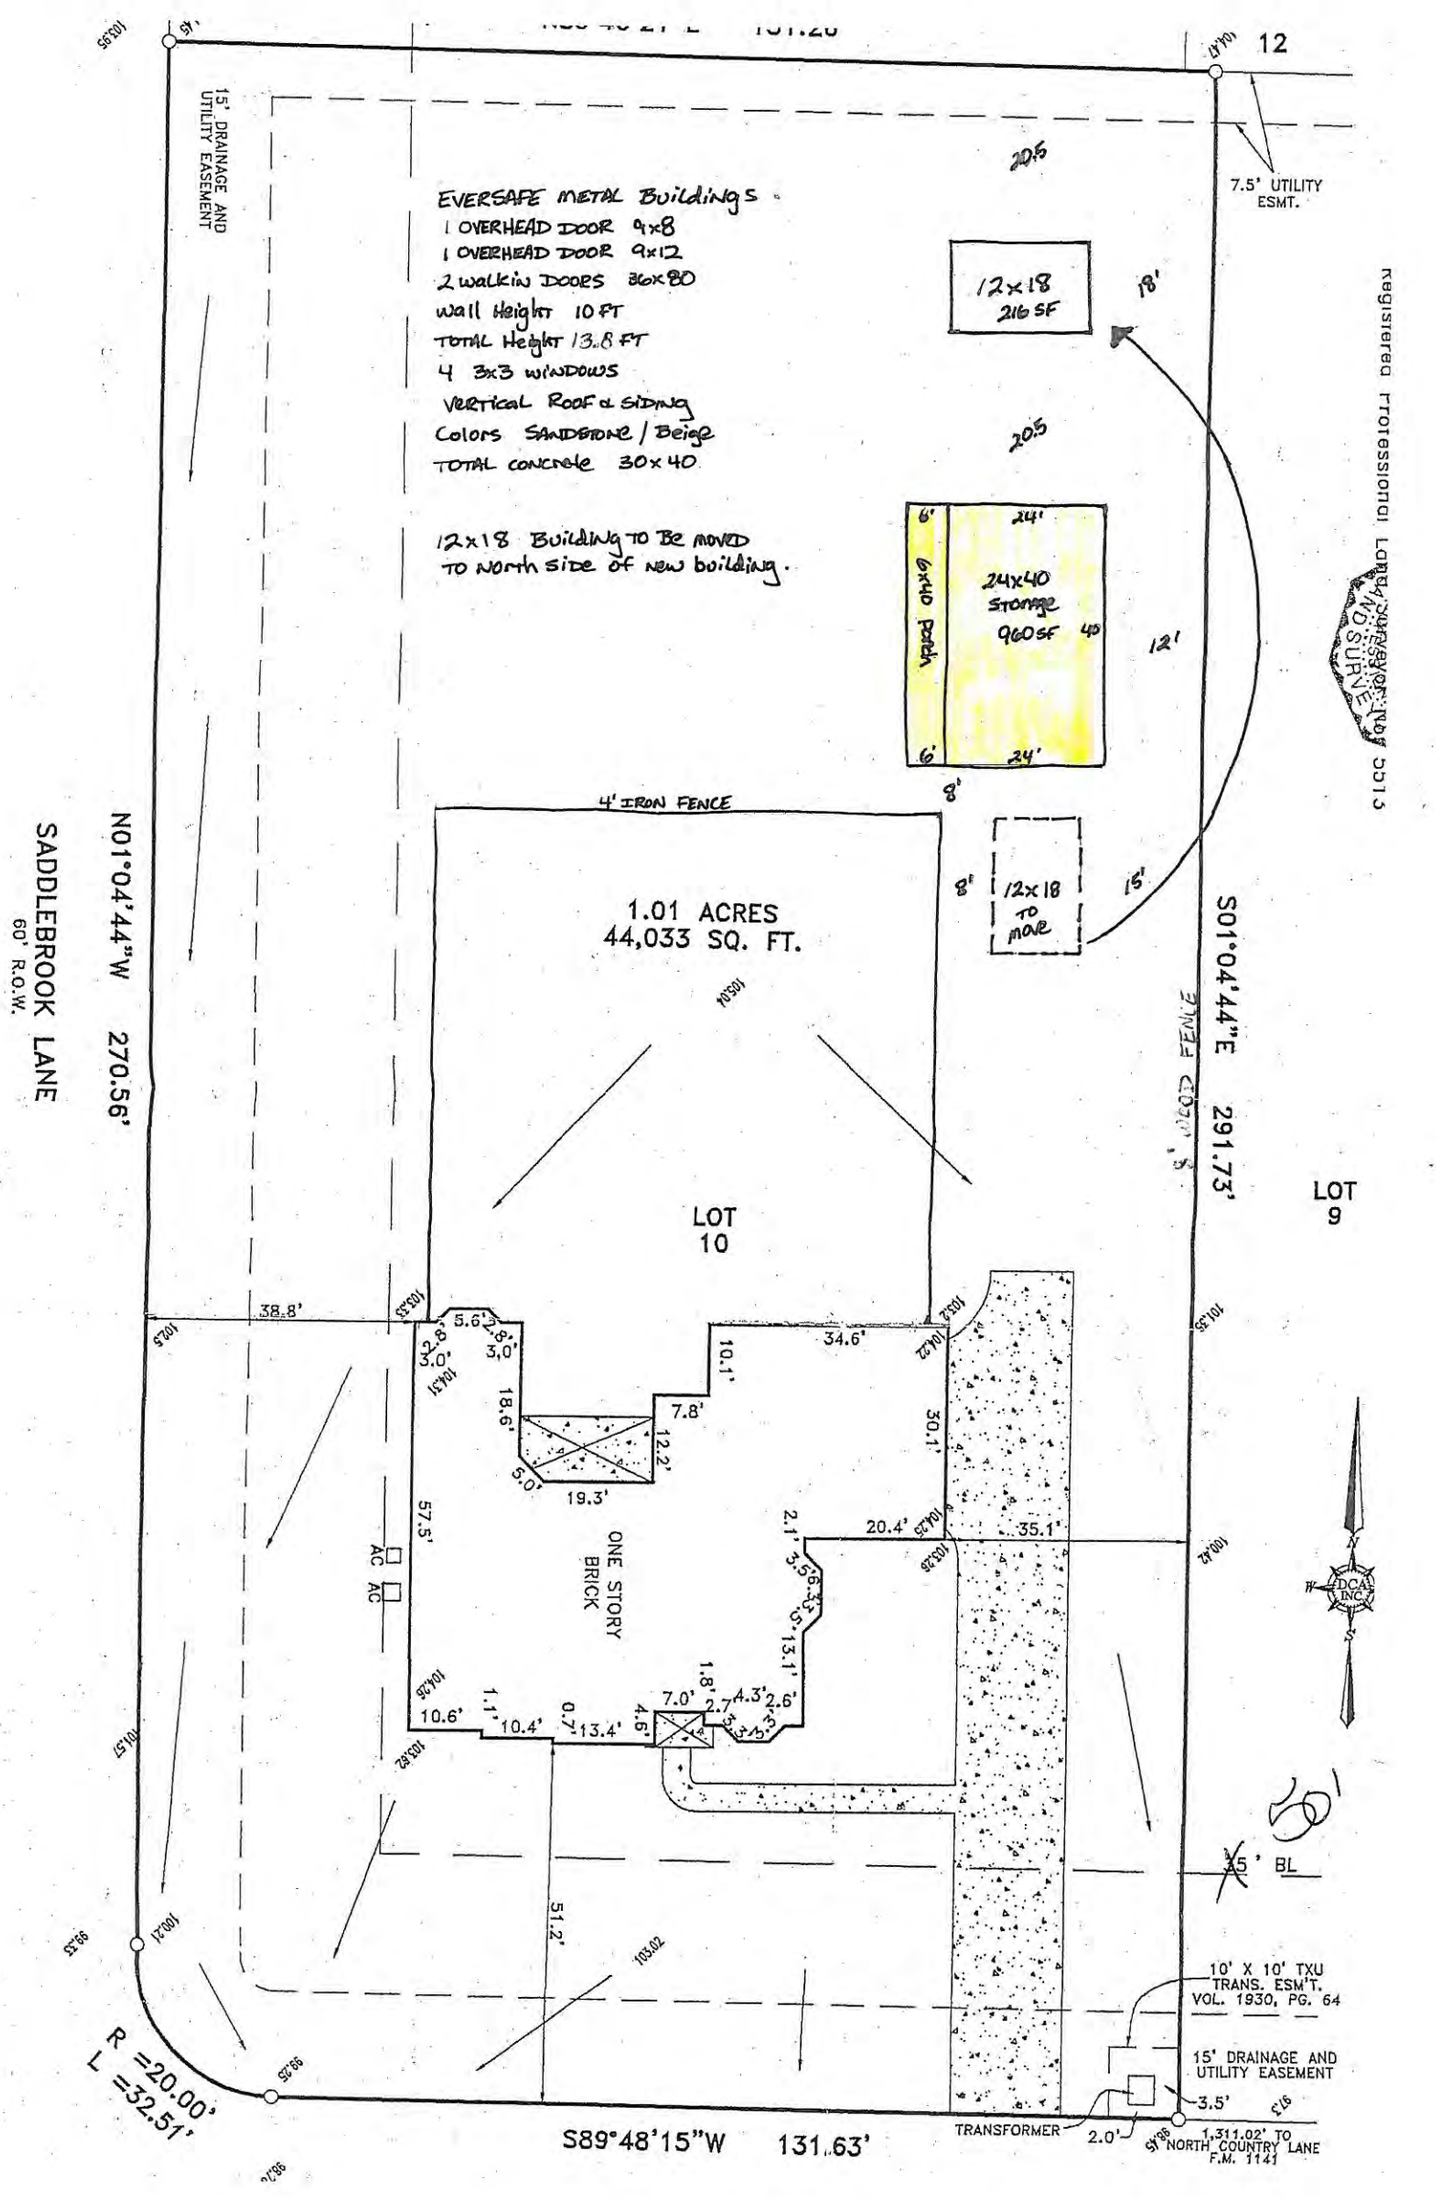
Building quote

Recommendation of concrete slab

3D models of proposed storage building

Two photos of current accessory building to be moved

Two photos of proposed site of building



If you need any other information, please call me or email anytime.

Thanks for your time,

Marty and Debra Wright

Building Colors

Eversafe Steel Buildings offers a variety of standard colors for your steel building. You can select from 13 different colors for the roof, the sides and the trim. Make your choices from the selections below:

*Colors shown represent finish colors as accurately as possible, however color may vary slightly on actual building. Due to monitor and screen variations on different devices, digital depictions of colors may vary. Not all colors are available in every state and colors may vary by state. Non-standard colors, color matching and two-tone wall color wainscoting available in certain states. Please ask your representative for details.

Concrete Specifications

From: Bob Fuerstenau (bfuerstenau@eversafebuildings.com)

To: mwright-1@att.net

Date: Friday, September 6, 2019, 10:41 AM CDT

Marty,

The concrete slab that we recommend should be/have:

- 4" thick ***(minimum)*** w/ a 12"x12" continuous footer
- same exact dimensions as your building frame (e.g. 24'x35')**
- 2,500 PSI concrete ***(minimum)***
- two #5 rebar continuous
- NO wet-set anchors (anchors will be provided at installation)

**If pulling a permit using our generic engineer-stamped drawings, foundation should be 5 5/8" wider than the building frame with a ¾" step down all around.

This e-mail is strictly for the purposes of budgeting and obtaining estimates. Please do not use the information herein as sole guidelines for pouring concrete slab.

Let me know if you have any questions or concerns.

Sincerely,

Bob Fuerstenau

CITY OF ROCKWALL

ORDINANCE NO. 19-XX

SPECIFIC USE PERMIT NO. S-XXX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE (UDC) [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, ROCKWALL COUNTY TEXAS, AS PREVIOUSLY AMENDED, SO AS TO GRANT A SPECIFIC USE PERMIT (SUP) TO ALLOW A *DETACHED GARAGE BUILDING* THAT EXCEEDS THE MAXIMUM ALLOWABLE SIZE ON A ONE (1)-ACRE PARCEL OF LAND, IDENTIFIED AS LOT 10, BLOCK B, SADDLEBROOK ESTATES #2 ADDITION, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS; AND MORE SPECIFICALLY DESCRIBED IN *EXHIBIT 'A'* OF THIS ORDINANCE; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has received a request from Marty Wright for the approval of a Specific Use Permit (SUP) to allow a *detached garage* that exceeds the maximum allowable size on a one (1)-acre parcel of land being described as Lot 10, Block B, Saddlebrook Estates #2 Addition, City of Rockwall, Rockwall County, Texas, zoned Single-Family 16 (SF-16) District, addressed as 2340 Saddlebrook Lane, and being more specifically depicted in *Exhibit 'A'* of this ordinance, which herein after shall be referred to as the *Subject Property* and incorporated by reference herein; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall, in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall, have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally, and to all persons interested in and situated in the affected area and in the vicinity thereof, the governing body in the exercise of its legislative discretion has concluded that the Unified Development Code (UDC) [*Ordinance No. 04-38*] of the City of Rockwall should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED** by the City Council of the City of Rockwall, Texas;

SECTION 1. That the Unified Development Code (UDC) [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended so as to grant a Specific Use Permit (SUP) allowing a *detached garage* as stipulated by Subsection 7.04, *Accessory Structure Development Standards,* of Section 7, *District Development Standards*, of Article V, *District Development Standards*, the Unified Development Code (UDC) [*Ordinance No. 04-38*] on the *Subject Property*; and,

SECTION 2. That the Specific Use Permit (SUP) shall be subject to the requirements set forth in Subsection 7.04, *Accessory Structure Development Standards*, of Section 7, *District Development Standards,* of Article V, *District Development Standards*, of the Unified

EXHIBIT A ORD. 19-XX

Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended and as may be amended in the future, and shall be subject to the following:

2.1 OPERATIONAL CONDITIONS

The following conditions pertain to the operation of a *detached garage* on the *Subject Property* and conformance to these conditions are required for continued operations:

1) The detached garage shall generally conform to the concept plan and the conceptual building elevations depicted in *Exhibits 'B'* & *'C'* of this ordinance;

2) The detached garage shall not exceed a maximum size of 1,200 SF;

3) The detached garage shall not exceed an overall height of 15-feet;

4) The subject property shall not have more than two (2) accessory buildings;

2.2 COMPLIANCE

Approval of this ordinance in accordance with Subsection 2.05, City *Council Action*, of Article XI, *Zoning Related Applications,* of the Unified Development Code (UDC) will require compliance to the following:

1) Upon obtaining a building permit, should the homeowner fail to meet the minimum operational requirements set forth herein and outline in the Unified Development Code (UDC), the City Council may (*after proper notice*) initiate proceedings to revoke the Specific Use Permit (SUP) in accordance with Section 2.02.D(3) of Article XI, *Zoning Related Applications*, of the Unified Development Code (UDC).

SECTION 3. That the official zoning map of the City be corrected to reflect the changes in zoning described herein.

SECTION 4. That all ordinances of the City of Rockwall in conflict with the provisions of this ordinance be, and the same are hereby repealed to the extent of that conflict.

SECTION 5. Any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *TWO THOUSAND DOLLARS ($2,000.00)* for each offence and each and every day such offense shall continue shall be deemed to constitute a separate offense.

SECTION 6. If any section or provision of this ordinance or the application of that section or provision to any person, firm, corporation, situation or circumstance is for any reason judged invalid, the adjudication shall not affect any other section or provision of this ordinance or the application of any other section or provision to any other person, firm, corporation, situation or circumstance, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions of this ordinance shall remain in full force and effect.

SECTION 7. That this ordinance shall take effect immediately from and after its passage.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF NOVEMBER, 2019.

CITY OF ROCKWALL

PLANNING AND ZONING COMMISSION MEMORANDUM

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller, *Director of Planning and Zoning*
DATE:	October 29, 2019
SUBJECT:	Temporary Moratorium on the Acceptance and Processing of Subdivision Plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ)

In conformance with Chapter 242 of the Texas Local Government Code (TLGC), the City of Rockwall and Rockwall County entered into an *Interlocal Agreement* on November 12, 2013 requiring the City of Rockwall to process and review subdivision plats within the City's Extraterritorial Jurisdiction (ETJ). The City was required to enforce its *Subdivision Regulations* and the *Unified Regulations*, which were contained in the *Interlocal Agreement* as *Exhibit 'A'*. On October 22, 2019, the Rockwall County Commissioner's Court approved a motion to notify all cities in Rockwall County that the interlocal agreements would need to be amended to account for changes in the *Subdivision Regulations* of Rockwall County, which would affect the *Unified Regulations* contained in the *Interlocal Agreement* agreed to be enforced in the City's Extraterritorial Jurisdiction (ETJ). This motion was in response to the County's work with their consultant -- *Freese & Nichols, Inc.* -- on revising their *Subdivision Regulations*, and based on a lawsuit challenging certain requirements contained in the current County *Subdivision Regulations* and which are also contained in *Unified Regulations* of the *Interlocal Agreement* between Rockwall and Rockwall County and which are required to be enforced by the City.

As the City Council is aware, subdivision plats are an important way that the City ensures that proper public facilities, infrastructure, drainage, and fire protection are being provided to support development of property in the City's Extraterritorial Jurisdiction (ETJ); and, with the uncertainty of how the changes to the *Unified Regulations* will impact the review criteria contained in the *Interlocal Agreement*, the City of Rockwall is proposing to impose a moratorium on the acceptance and processing of subdivision plats for residential and commercial property in the City's Extraterritorial Jurisdiction (ETJ). The power to invoke a moratorium is granted to the City by Chapter 212, *Municipal Regulation of Subdivisions and Property Development*, of the Texas Local Government Code. This section of the code lays out the specific procedures for imposing a moratorium, and staff has included a memorandum prepared by the City Attorney outlining the circumstances and procedures involved with imposing a moratorium. The attached draft ordinance would impose a moratorium of 90-days on commercial development and 120-days on residential development, which would allow staff to work with the County to prepare a revised *Interlocal Agreement* without undermining the effectiveness of the revised review criteria by approving applications that may or may not meet this new criterion. The moratorium is not expected to be in place for the entire duration allowed under the law, just until the new *Unified Regulations* are adopted by the County and agreed to by the City.

Until the new *Unified Regulations* are adopted, it is clear that applying the existing development ordinances and/or regulations, that have been stricken down by the court, is inadequate to prevent any new development from possibly causing the overcapacity of infrastructure or being detrimental to the public's health, safety, and general welfare in the City's Extraterritorial Jurisdiction (ETJ).

A calendar for the proposed temporary moratorium is as follows:

- ✓ *October 25, 2019*: 1st Notice of Public Hearing Published in the Dallas Morning News
- ✓ *October 29, 2019*: Planning and Zoning Commission Public Hearing
- ✓ *October 31, 2019*: 2nd Notice of Public Hearing Published in the Dallas Morning News
- ✓ *November 1, 2019*: Temporary Moratorium Take Effect
- ✓ *November 4, 2019*: City Council Public Hearing and 1st Reading of the Ordinance
- ✓ *November 5, 2019*: Agenda Posted for Special City Council Meeting
- ✓ *November 8, 2019*: Special City Council Meeting, 2nd Reading of the Ordinance, and the Effective Date of the Moratorium
- ✓ *February 6, 2020*: Expiration of the Commercial Moratorium
- ✓ *March 7, 2020*: Expiration of the Residential Moratorium

At the Planning and Zoning Commission meeting on *October 29, 2019*, the Planning and Zoning Commission held a public hearing and approved a motion to recommend approval of the moratorium by a vote of 7-0. At the meeting on *November 4, 2019*, the City Council will need to hold a public hearing on the moratorium before acting on the moratorium ordinance.

MEMORANDUM

TO: Rick Crowley, City Manager

COPY: Ryan Miller, Director of Planning and Development

FROM: Frank J. Garza, City Attorney

DATE: October 21, 2019, 2019

Re: Moratorium of Development

There is a process under state law that allows a city to adopt a moratorium on development; however, before the City can approve a moratorium, it must follow very precise procedures that are outlined in Chapter 212 of the Texas Local Government Code.

The state law on moratoriums was adopted by the Texas Legislature in 2001 but was significantly amended in 2005 making it more difficult for cities to adopt a moratorium on development. Under Section 212.133 of the Texas Local Government Code, **a city may not adopt a moratorium unless it complies with strict notice and hearing procedures and makes written findings required by law**. Specifically, state law requires the following steps before a developmental moratorium can be adopted:

Public Hearing and Notice Requirements

Section 212.134 of the Texas Local Government Code

- Before a moratorium on property development may be imposed, the city must conduct two public hearings, one before the Planning and Zoning Commission and one before the City Council.
- The city must publish notice of the time and place of the hearings in a newspaper of general circulation on the **fourth day before the date of each hearing**. (Requires daily newspaper).
- A public hearing must provide residents and individuals affected by the proposed moratorium an opportunity to be heard.
- On the fifth business day after the date a notice is published, **a temporary moratorium takes effect**. During the period of the temporary moratorium, the city may stop accepting permits, authorizations, and approvals necessary for the subdivision of, site planning of, or construction on real property.
- Within 12 days after the date of the Council public hearing, the city shall make a final determination on the imposition of a moratorium. Before an ordinance adopting a moratorium may be imposed, the ordinance must be given at least two readings by the City Council. The readings must be separated by at least four days. If the City fails to adopt an ordinance within the period required by law, an ordinance imposing a moratorium may not be adopted, and the temporary moratorium expires.

Written Findings Requirement

Section 212.135 of the Texas Local Government Code

City must issue written findings that include evidence demonstrating the estimated capacity of **existing essential public facilities is insufficient to support new property development**. City must identify the following:

- Any essential public facilities currently operating near, at, or beyond capacity. Essential public facilities is defined by state law as **water, sewer, drainage facilities or street improvements**;
- The portion of that capacity committed to the development subject to the moratorium; and
- Evidence demonstrating that the moratorium is reasonably limited to areas of the city or ETJ where a shortage of essential public facilities would otherwise occur; and property that has not been approved for development because of the lack of existing essential public facilities.

A moratorium that is not based on a shortage of essential public facilities is justified only by **demonstrating a significant need for other public facilities**, including police and fire facilities. A significant need for public facilities is established if the failure to provide those public facilities would be detrimental to the health, safety, and welfare of the residents of the City. Written findings must be issued by the City which includes:

- Evidence demonstrating that applying existing development ordinances or regulations is inadequate to prevent the new development from causing the overcapacity of municipal infrastructure or being detrimental to the public health, safety, and welfare in an affected geographical area;
- Evidence demonstrating that alternative methods of achieving the objectives of the moratorium are unsatisfactory; and
- Evidence demonstrating that the city has a **Council approved** plan and time schedule for achieving the objectives of the moratorium.

If the City were to adopt a moratorium after complying with the above stated procedures, the moratorium would **not apply to any existing developments that were submitted to the City prior to the temporary moratorium going into effect.** Once the moratorium goes into effect, the duration cannot exceed 120 days unless extended by holding an additional public hearing and making additional written findings as to why the moratorium should be extended. Moreover, state law also requires the city to allow for a waiver process for any applicant who wishes to proceed with development once the moratorium is adopted.

CITY OF ROCKWALL

ORDINANCE NO. 19-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ENACTING A TEMPORARY MORATORIUM STAYING THE ACCEPTANCE AND PROCESSING OF SUBDIVISION PLAT APPLICATIONS IN THE CITY OF ROCKWALL'S EXTRATERRITORIAL JURISDICTION; PROVIDING FOR FINDINGS OF FACT; PROVIDING FOR DEFINITIONS; PROVDING FOR APPLICABILITY, PURPOSE, ENACTMENT, DURATION, EXTENSION, EXCEPTIONS AND EXEMPTIONS, DETERMINATION, AND APPEALS; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR REMEDIES; PROVIDING FOR CONFLICTS; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, in conformance with Chapter 242, *Authority of Municipality and County to Regulate Subdivisions In and Outside Municipality's Extraterritorial Jurisdiction*, of the Texas Local Government Code the City of Rockwall has entered into an agreement (the *Interlocal Agreement*) with Rockwall County for the processing and review of subdivision plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ); and

WHEREAS, *Exhibit 'A'*, *Unified Regulations for Review of Plats in ETJ of City of Rockwall*, of the *Interlocal Agreement* provides the review criteria for subdivision plats in the Extraterritorial Jurisdiction (ETJ); and

WHEREAS, in accordance with the *Terms of Agreement* of the *Interlocal Agreement*, Rockwall County notified the City of Rockwall in writing on October 23, 2019 requesting to make changes to *Exhibit 'A'* of the *Interlocal Agreement* for the purpose of addressing changes in the *Subdivision Regulations* of Rockwall County; and

WHEREAS, the City of Rockwall finds that subdivision plats are a necessary mechanism to ensure that proper public facilities, infrastructure, drainage, and fire protection can be provided to support future development within the City's Extraterritorial Jurisdiction (ETJ), and to protect the health, safety, natural environment, quality of life, and general welfare of Rockwall County residents; and

WHEREAS, the City of Rockwall finds that the issues identified by Rockwall County contained in the *Interlocal Agreement* leave the City without sufficient review criteria to effectively review subdivision plats for property in the City's Extraterritorial Jurisdiction (ETJ), and that the agreement no longer adequately addresses the subdivision of land and the provision of adequate public facilities needed by citizens of Rockwall County; and

WHEREAS, in order for the City of Rockwall and Rockwall County to have adequate and reasonable time to review, evaluate, and revise and approve the *Interlocal Agreement*, and to consider the impact of the review criteria for subdivision plats -- *contained in Exhibit 'A' of the agreement* -- on the provision of adequate public facilities, infrastructure, drainage, and fire protection for future developments within the City's Extraterritorial Jurisdiction (ETJ), the City intends on imposing a temporary moratorium lasting for a period of 90-days for commercial property and 120-days for residential property, during which no applications for subdivision plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ) will be accepted; and

WHEREAS, the purpose of prohibiting subdivision plat applications for commercial and residential property in the City's Extraterritorial Jurisdiction (ETJ) during this temporary moratorium is to preserve the *status quo*, facilitate thoughtful and consistent planning, avoid exploitation of the delays inherent in the municipal legislative process, and prevent applications from undermining the effectiveness of the revised review criteria by submitting a subdivision plat to avoid the application of new -- *and possibly more restrictive -- Interlocal Agreement*.

DRAFT 10.28.19

WHEREAS, in recognition of the importance of subdivision plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ) to property owners in this area, the City desires to implement this moratorium for a stated and fixed time period, and to include an exception and exemption clause -- *in accordance with Subchapter E of Chapter 212 of the Texas Local Government Code* -- to facilitate subdivision plat approval in cases of necessity and undue hardship; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the City Council of the City of Rockwall, in compliance with the laws of the State of Texas have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all persons interested in and situated in the affected area and in the vicinity thereof, the City Council in the exercise of its legislative discretion has concluded that a moratorium on residential and commercial development for property in the City's Extraterritorial Jurisdiction (ETJ) is necessary and in the interest of good governance, and ultimately in the best interest of the City of Rockwall;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:

SECTION 1. ***Findings of Fact.*** The foregoing recitals are incorporated into this ordinance by reference as legislative findings of fact as if expressly set forth herein.

SECTION 2. ***Definitions.*** As used in this ordinance, the following terms are defined. Any term appearing in this ordinance that is not specifically defined below shall have the meanings provided in the Municipal Code of Ordinances for the City of Rockwall, or if not defined in this document then the common meaning of the word shall apply.

(1) *Commercial Property.* Commercial property is defined as any property that is being platted for the purpose of authorizing any land use other than single-family or agricultural land uses (*e.g. multi-family, industrial, commercial, etc.*).

(2) *Proper Public Facilities.* Unless otherwise indicated in this ordinance, proper public facilities shall be defined as meaning water, wastewater or sewer, drainage facilities, street improvements, and fire and police protection.

(3) *Residential Property.* Residential property is defined as any property that is being platted for the purpose of authorizing single-family and agricultural land uses.

SECTION 3. ***Applicability.*** The City of Rockwall hereby enacts this ordinance in order to impose a temporary moratorium on the acceptance and processing of subdivision plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ).

SECTION 4. ***Purpose.*** This temporary moratorium is being enacted to allow the City of Rockwall and Rockwall County to evaluate the *Interlocal Agreement* and to update the review criteria for subdivision plats contained in *Exhibit 'A'* of the agreement.

SECTION 5. ***Enactment.*** The City of Rockwall hereby enacts this ordinance implementing a temporary moratorium on the City of Rockwall acceptance, review, and approval of subdivision plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ).

SECTION 6. ***Duration.*** The initial duration of this temporary moratorium shall be for a period not to exceed 90-days for commercial properties and not to exceed 120-days for residential properties after the approval and adoption of this ordinance, or the repeal of this ordinance by the City Council of the City of Rockwall, whichever occurs first.

SECTION 7. ***Exceptions and Exemptions.*** The following projects shall be considered for exceptions and exemptions from the moratorium:

(1) Exceptions.

DRAFT ORDINANCE 04.2019

(A) *No Impact Projects.* The temporary moratorium implemented by this ordinance does not apply to subdivision plat applications proposing to assemble or subdivide residential property into two (2) or less lots where each lot is a minimum of 1½-acres gross area and has a minimum of 150-feet of frontage on a public right-of-way.

(B) *Ongoing Projects.* The temporary moratorium implemented by this ordinance does not apply to any commercial or residential property that has an active subdivision plat application with the City of Rockwall or Rockwall County that has not expired in accordance with the rules and requirements of Rockwall County, the City of Rockwall, or the Texas Local Government Code.

(C) *Vested Projects.* The temporary moratorium implemented by this ordinance does not apply to any commercial or residential property that are vested under Chapter 245, *Issuance of Local Permits*, of the Texas Local Government Code. Property owners asserting vested rights shall submit an application claiming an exception to this temporary moratorium to the Planning and Zoning Department of the City of Rockwall for review in accordance with the requirements of the current *Interlocal Agreement*.

(2) *Exemptions.* Any property owner who does not assert rights under Chapter 245, *Issuance of Local Permits*, of the Texas Local Government Code, but who seeks authorization to proceed with a subdivision plat outside of the exceptions listed in this ordinance and during the temporary moratorium can request the following alternative forms of approval:

(A) *212 Development Agreement.* Property owners with a negotiated approval granted by the City Council that provides for construction standards, platting and development rules pursuant to Subchapter G, *Agreement Governing Certain Land in a Municipality's Extraterritorial Jurisdiction*, Chapter 212, *Regulations of Subdivisions*, of the Texas Local Government Code may apply for an exemption from the temporary moratorium.

SECTION 8. ***Determination and Appeals.***

(1) *Determinations.* The Director of Planning and Zoning or his/her designee shall make all initial determinations regarding the status of all projects seeking to submit a subdivision plat application during this temporary moratorium concerning the status of a project as provided for above in the *Exceptions and Exemptions* section of this ordinance.

(2) *Appeals.* Property owners seeking to challenge a determination made by the Director of Planning and Zoning may appeal that initial determination to the City Manager. Secondary determinations of the City Manager may be appealed to the City Council. The City Council's decision shall be final.

(3) Exemptions. The decision to approve an *Exemption* as provided for above in the *Exceptions and Exemptions* section of this ordinance shall rest solely with the City Council.

SECTION 9. ***Ordinances Cumulative.*** All ordinances of the City of Rockwall in conflict with the provisions of this ordinance be, and the same are hereby superseded to the extent of that conflict.

SECTION 10. ***Severability.*** If any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Subdivision Regulations of the City of Rockwall, Texas, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable.

SECTION 11. ***Effective Date.*** This ordinance shall take effect immediately.

CITY OF ROCKWALL

CITY COUNCIL MEMORANDUM

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller, *Director of Planning and Zoning*
DATE:	November 4, 2019
SUBJECT:	MIS2019-001; *Water, Wastewater, and Roadway Impact Fee Study*

On October 21, 2019, the City Council voted to approve the impact fee update by a vote of 4-2, with Mayor Pruitt and Councilman Trowbridge dissent and Councilman Daniels absent. This will be the second reading of the ordinance.

CITY OF ROCKWALL

ORDINANCE NO. 19-43

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE MUNICIPAL CODE OF ORDINANCES OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING ARTICLE III, *IMPACT FEE REGULATIONS*, OF CHAPTER 38, *SUBDIVISIONS*, FOR THE PURPOSE OF AMENDING THE IMPACT FEES FOR WATER, WASTEWATER, AND ROADWAY FACILITIES BY UPDATING THE LAND USE ASSUMPTIONS AND CAPITAL IMPROVEMENTS PLAN FOR SAID FACILITIES; ESTABLISHING UPDATED SERVICE AREAS FOR SUCH FACILITIES; PROVIDING FOR DEFINITIONS; PROVIDING FOR COLLECTION AND ASSESSMENT; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR REMEDIES; PROVIDING FOR CONFLICTS; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City of Rockwall adopted its impact fee program for roadway impact fees by *Ordinance No. 08-21*, and its impact fee program for water and wastewater impact fees by *Ordinance No. 90-22*; and

WHEREAS, the City of Rockwall has prepared studies updating its land use assumptions (*see Exhibit 'B'*), capital improvements plan (*see Exhibits 'C' & 'D'*) and impact fees for water, wastewater, and roadway facilities and associated service areas and equivalency tables; and

WHEREAS, the City of Rockwall has recalculated the maximum impact fee for water, wastewater, and roadway facilities that may be assessed against new development based on such land use assumptions and capital improvements plan; and

WHEREAS, a public hearing, following written endorsement of the impact fee update study by the Capital Improvements Advisory Committee (CIAC) [*Planning & Zoning Commission*], was held before the City Council and testimony was taken on *October 21, 2019*, to consider proposed amendments to land use assumptions, capital improvements plan and impact fees for water, wastewater, and roadway facilities and associated service areas and equivalency tables, and corresponding changes to rates of assessment and collection for impact fees; and

WHEREAS, the City published notice of such public hearing in a newspaper of general circulation within the City in accordance with the requirements of Chapter 395 of the Texas Local Government Code; and

WHEREAS, the City Council finds that the collection of impact fees for new developments at revised rates in order to fund water, wastewater, and roadway improvements to serve such developments substantially furthers the public health, safety and general welfare; and

WHEREAS, the City Council finds that changes to the land use assumptions, capital improvements plan and impact fee assessment and collection rates are fully warranted, as presented in the impact fee update studies prepared by the City's engineering consultants; and

WHEREAS, the City Council further finds that the collection rates for water, wastewater, and roadway impact fees are reasonable and further the public health, safety and general welfare;

WHEREAS, the City Council further finds that the collection rates for water, wastewater, and roadway facilities are substantially less than the City's actually costs of mitigating the impacts from new development on the City's water, wastewater, and roadway systems;

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

SECTION 1. ***Municipal Code of Ordinances.*** *Sections 38-360 & 38-361* of Chapter 38, *Subdivisions*,

of the City of Rockwall's Municipal Code of Ordinances are hereby repealed in their entirety replaced with the provisions contained in *Exhibit 'A'* of this ordinance; and

SECTION 2. ***Land Use Assumptions.*** The land use assumptions for water, wastewater, and roadway impact fees are hereby updated and amended, as set forth in *Exhibit 'B': Land Use Assumptions for Impact Fees* of this ordinance, which herein after shall be referred to as *Exhibit 'B'*, and incorporated herein by reference; and

SECTION 3. ***Service Areas.*** The service areas for roadway impact fees hereby is updated and amended as depicted in *Figure 3: Roadway Service Area* of *Exhibit 'B'* of this ordinance, and the service areas for water and wastewater impact fees hereby are updated and amended as depicted in *Figure 4: Water/Wastewater Service Area* of *Exhibit 'B'* of this ordinance.

SECTION 4. ***Capital Improvements Plans.*** The capital improvements plan for roadway impact fees hereby is updated and amended as set forth in *Exhibit 'C': 2019 Update of Roadway Impact Fees* of this ordinance -- *which herein after shall be referred to as Exhibit 'C', and incorporated herein by reference* --, and the capital improvements plan for water and wastewater impact fees hereby are updated and amended, as set forth in *Exhibit 'D': 2019-2029 Water & Wastewater Impact Fee Update* of this ordinance -- *which herein after shall be referred to as Exhibit 'D', and incorporated herein by reference* --; and

SECTION 5. ***Land Use Equivalency Tables.*** The land use equivalency table that converts land uses into the total service units for roadway impact fees hereby is updated and amended as set forth in *Table 3: Land-Use Vehicle Mile Equivalency Table* of *Exhibit 'C'* of this ordinance; and, the land use equivalency table that coverts land uses into number of living unit equivalents (*service units*) for water and wastewater impact fees, hereby is updated and amended, as set forth in *Table No. 22: Maximum Assessable Water & Wastewater Impact Fee* of *Exhibit 'D'* of this ordinance.

SECTION 6. ***Impact Fee Assessment.*** The amount of the roadway impact fees to be assessed per roadway service area hereby is established as set forth in *Schedule 1* of *Section 361.(a)(1)* of *Exhibit 'A'* of this ordinance, and the amount of the water and wastewater impact fees to be assessed per living unit equivalent hereby is established as set forth in *Schedule 1* of *Section 361.(b)(1)* of *Exhibit 'A'* of this ordinance.

SECTION 7. ***Impact Fee Collection.*** The amount of the roadway impact fees to be collected per roadway service area hereby is established as set forth in *Schedule 2* of *Section 361.(a)(2)* of *Exhibit 'A'* of this ordinance, and the water and wastewater impact fees to be collected per living unit equivalent hereby is established as set forth in *Schedule 2* of *Section 361.(b)(2)* of *Exhibit 'A'* of this ordinance.

SECTION 8. ***Ordinances Cumulative.*** All ordinances of the City of Rockwall in conflict with the provisions of this ordinance be, and the same are hereby superseded to the extent of that conflict.

SECTION 9. ***Severability.*** If any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Subdivision Regulations of the City of Rockwall, Texas, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable.

SECTION 10. ***Effective Date.*** This ordinance shall take effect immediately.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF NOVEMBER, 2019.

1st Reading: *October 21, 2019*

2nd Reading: *November 4, 2019*

DRAFT ORDINANCE 11.04.2019

SECTION 38-360: LAND USE ASSUMPTIONS REPORT

See *Ordinance No. 19-43* for the 2019 Land Use Assumptions Report.

SECTION 38-361: SCHEDULES FOR IMPACT FEES

(a) *Roadway Impact Fees.*

(1) *Schedule 1: Roadway Impact Fee Assessment*. The following schedule is for roadway impact fee assessment.

Service Area	Cost Per Service Unit
1	$2,272.00
2	$4,398.00
3	$784.00
4	$2,612.00

(2) *Schedule 1: Roadway Impact Fee Collection*. The following schedule is for roadway impact fee collection.

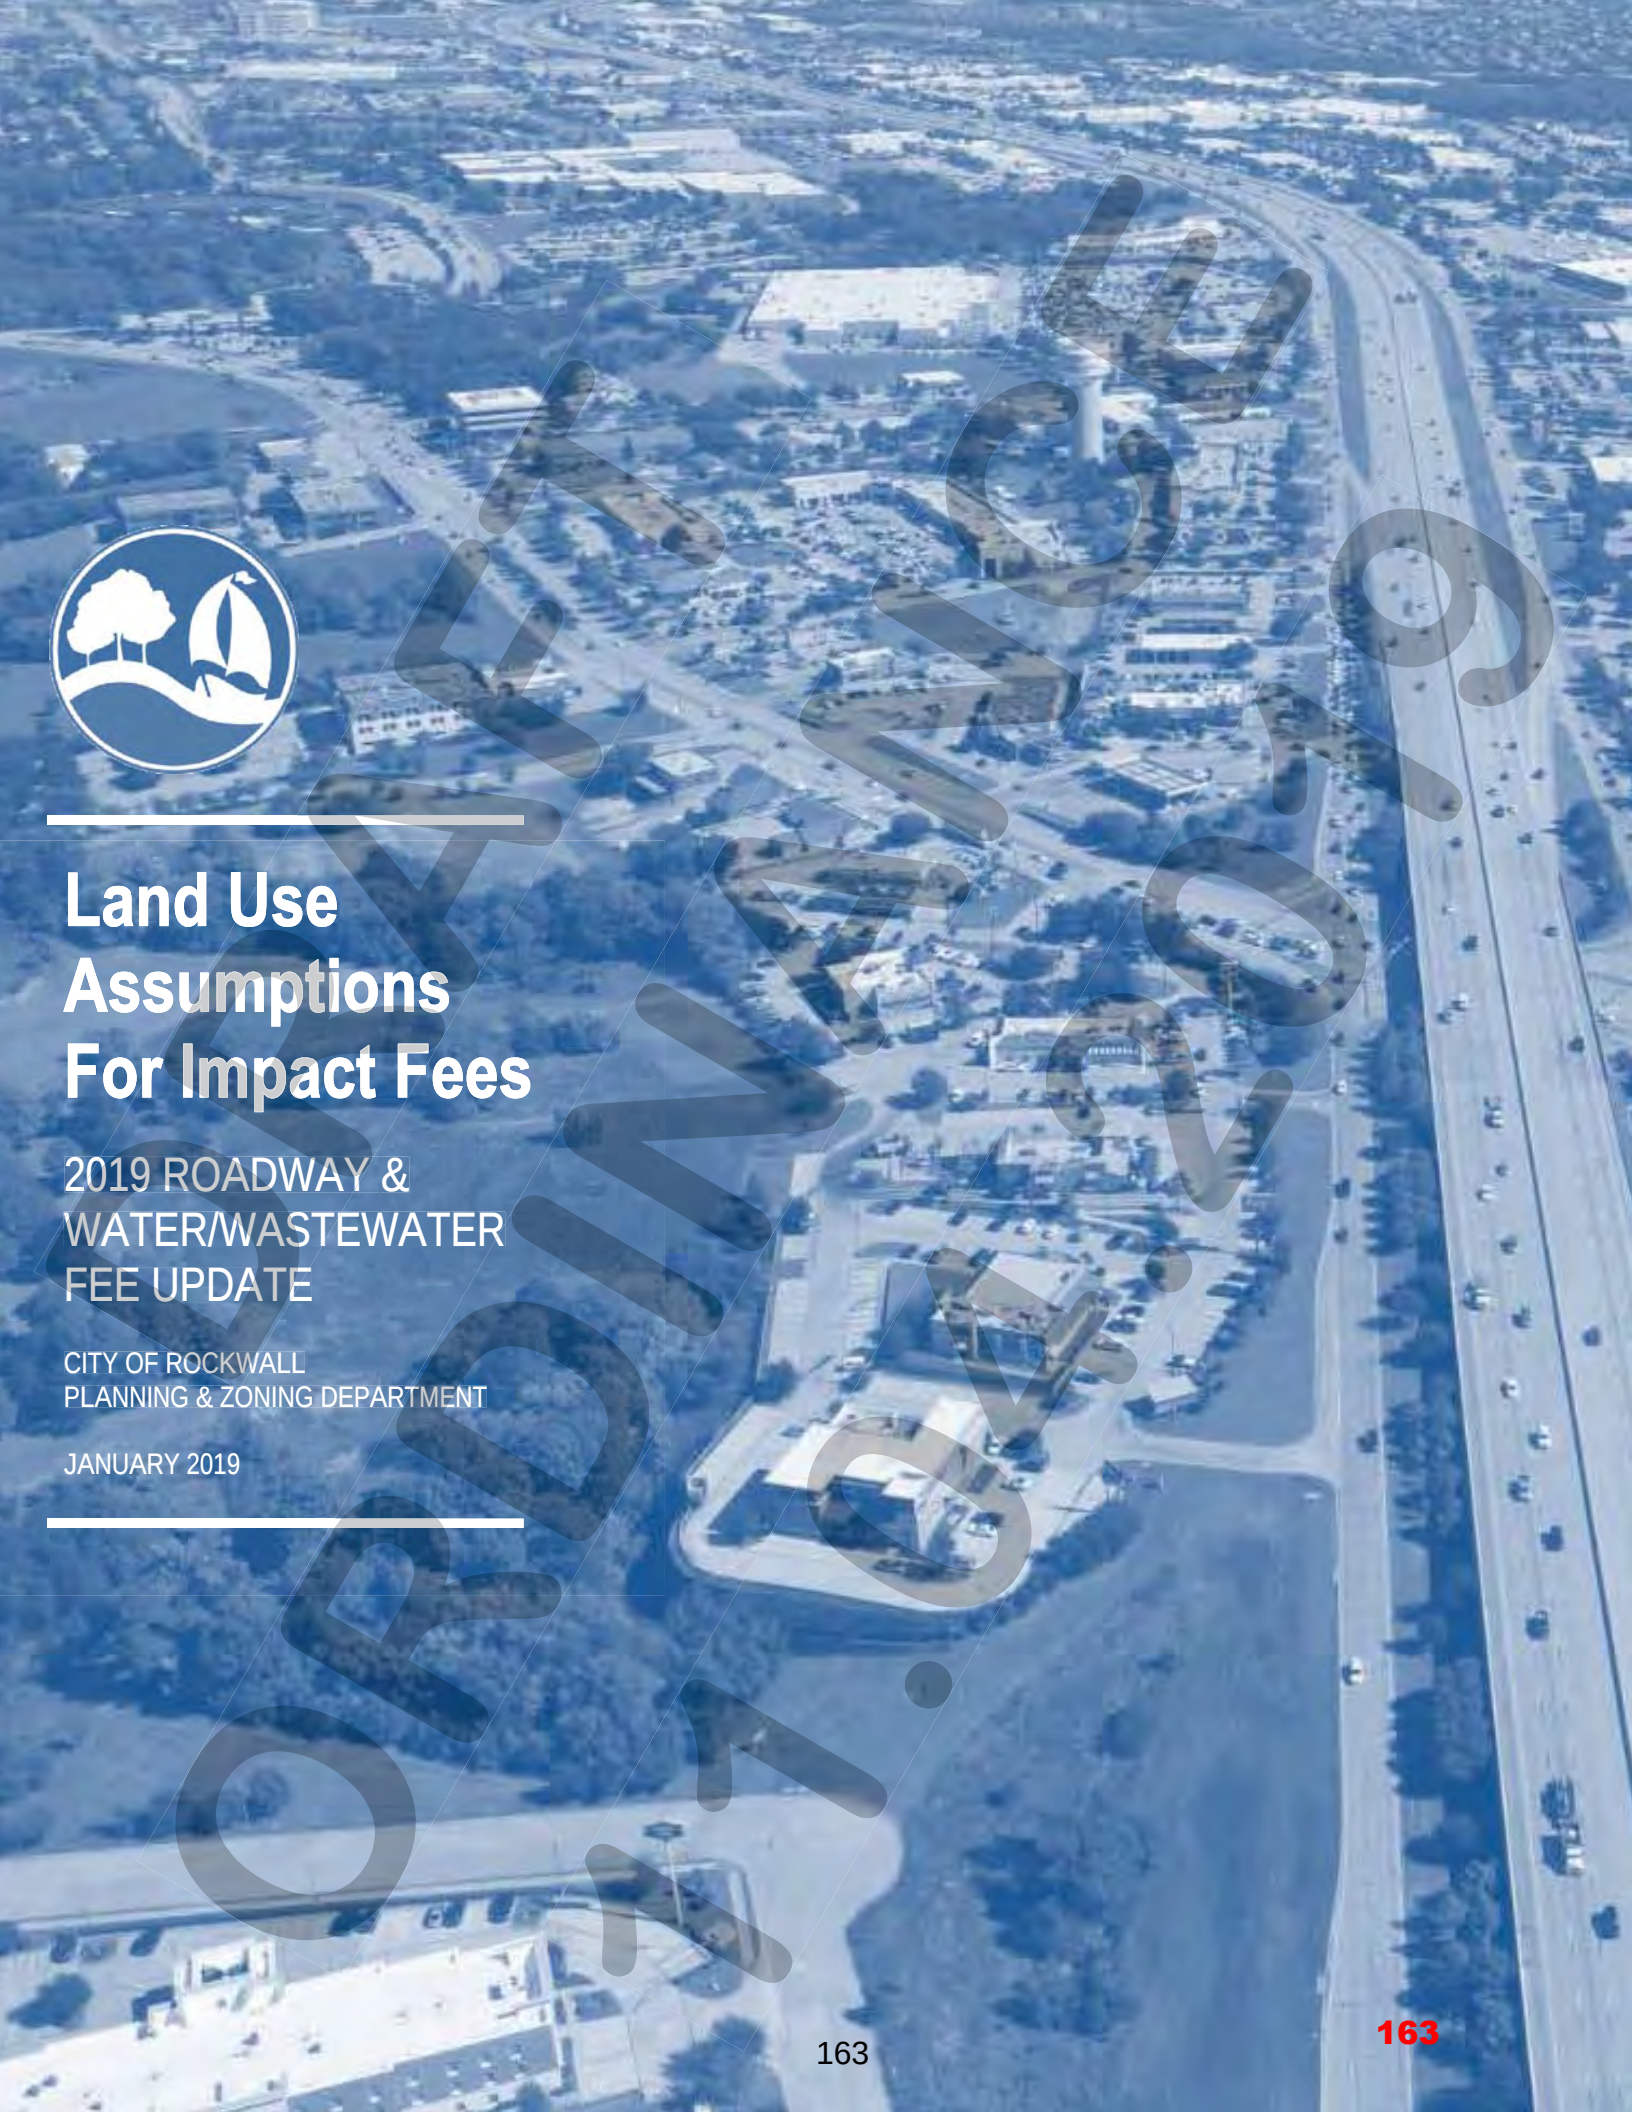
Service Area	Cost Per Service Unit
1	$320.00
2	$320.00
3	$320.00
4	$320.00

(b) *Water & Wastewater Impact Fees.*

(1) *Schedule 1: Maximum Water & Wastewater Impact Fees*. The following schedule is the maximum impact fees per single-family/living unit equivalent for water and wastewater facilities. The below impact fees per service unit depicted in each column also apply to new developments that were unplatted and which did not require platting at the time of development within the period listed.

	Land Platted or Replatted between 07/16/1990 & 06/02/2008 [1]	Land Platted or Replatted between 06/02/2008 & 10/20/2014	Land Platted or Replatted between 10/20/2014 & 11/04/2019	Land Platted after 11/04/2019
Water (per SFLUE)	$848.00	$4,229.03	$3,111.05	$3,139.04
Wastewater (per SFLUE)	$3,340.00	$783.49	$2,472.58	$4,820.01

Notes:
[1]: For nonresidential uses, assessment was expressed as SFLUEs per acre: 2.11 SFLUE/acre for water impact fees and 2.17 SFLUE/acre for wastewater impact fees, within the period listed.



(2) *Schedule 2: Impact Fees to be Paid Per Service Unit for Water and Wastewater Facilities.*

	Per Living Unit Equivalent (5/8" Water Meter)
Water Facilities	$1,569.52
Wastewater Facilities	$2,410.00

FORWARD

What are *Impact Fees? Impact Fees* are charges that are imposed by local governments against new development for the purpose of generating revenue for or to recoup the cost of capital facilities (*i.e. infrastructure*) that are necessitated by and attributable to new development. These fees are generally implemented to reduce the economic burden of a municipality and its taxpayers when addressing the need for adequate capital improvements to accommodate growth. Impact fees are typically paid to a municipality in advance of the completion of a particular development project, and are based on a defined methodology and calculation that is derived from the cost of the facility and the scope/impact of the development.

PURPOSE

Chapter 395, *Financing Capital Improvements Required by New Development in Municipalities, Counties, and Certain Other Local Governments*, of the Texas Local Government Code outlines the process for adopting and updating impact fees for political subdivisions. On October 20, 2014, the City of Rockwall adopted roadway and water/wastewater impact fees through *Ordinance No. 14-47*. According to the statutory requirements stipulated by the Texas Local Government Code impact fees are required to be updated at a minimum of every five (5) years [*§395.052*].

In approaching an update to existing impact fees it is important for a city to assess its growth and employment potential, and establish land use assumptions that will guide development for a ten (10) year planning period (*i.e. 2019-2029*) [*§395.001(5)*]. These land use assumptions form the basis for the preparation of the *Impact Fee Capital Improvement Plan* for water, wastewater, and roadway facilities.

In order to determine the need and timing of capital improvements to serve future development, a rational estimate of the future growth of the City is required. The purpose of this report is to formulate growth and employment projections based upon assumptions pertaining to the type, location, quantity and timing of future development within the City, and to establish and document the methodology used for preparing these land use assumptions.

ELEMENTS OF THE LAND USE ASSUMPTIONS REPORT

This report contains the following components:

- *Methodology*: This component of the report contains the systematic and theoretical analysis of the methods and principals used to prepare the projections and land use assumptions contain within this report.
- *Data Collection Zones and Service Areas*: This component provides an explanation of the data collection zones (*i.e. Land Use Districts established in the OURHometown 2040 Comprehensive Plan*) and the Roadway, Water and Wastewater Impact Fee Service Areas for capital facilities.
- *Base Year Data*: This component provides information on population, housing and employment in the City of Rockwall as of January 1, 2019 for each capital facility service area.
- *Ten-Year Growth Projections*: This component provides assumptions with respect to the population, housing and employment data for the City of Rockwall in ten (10) years (*i.e. 2029*). This information is broken out by the capital facility service area.
- *Build Out Analysis:* This component provides projections for population, housing and employment under the assumption that the City and its Extraterritorial Jurisdiction (ETJ) are developed to their carrying capacity, or their *Built Out*.
- *Summary*: This component provides a synopsis of the land use assumptions contained within this report.
- *Appendices:* This component contains information that was important in deriving the population, housing and employment projections for 2019-2029.

DRAFT 1.04.2019

METHODOLOGY

Building off the base year and build out projections contained in the OURHometown Vision 2040 Comprehensive Plan, and the growth assumptions and capital improvement needs estimated to support future growth, it is possible to develop an impact fee structure that fairly allocates improvement cost to growing areas of the City with relation to the growths' potential impact on the entire infrastructure system. The data contained in this report has been formulated using reasonable and generally accepted planning principles.

These land use assumptions and future growth projections take into consideration several factors influencing development patterns, including:

- The character, type, density and quantity of existing development.
- The current zoning patterns as documented on the City's zoning map and the anticipated future land uses as established in the OURHometown Vision 2040 Comprehensive Plan, which contains the City's Future Land Use Plan.
- The availability of land and infrastructure to support future expansion of development.
- The current and historical growth trends of both population and employment within the City.
- The location and configuration of vacant parcels of land and their ability to support development.
- The growth of employment utilizing previously established and generally accepted data from ESRI's ArcGIS *Business Analyst*.
- Local knowledge concerning future development projects or anticipated development within the city.

LAND USE ASSUMPTIONS REPORT METHODOLOGY

The following is the general methodology that was used for the preparation of this report:

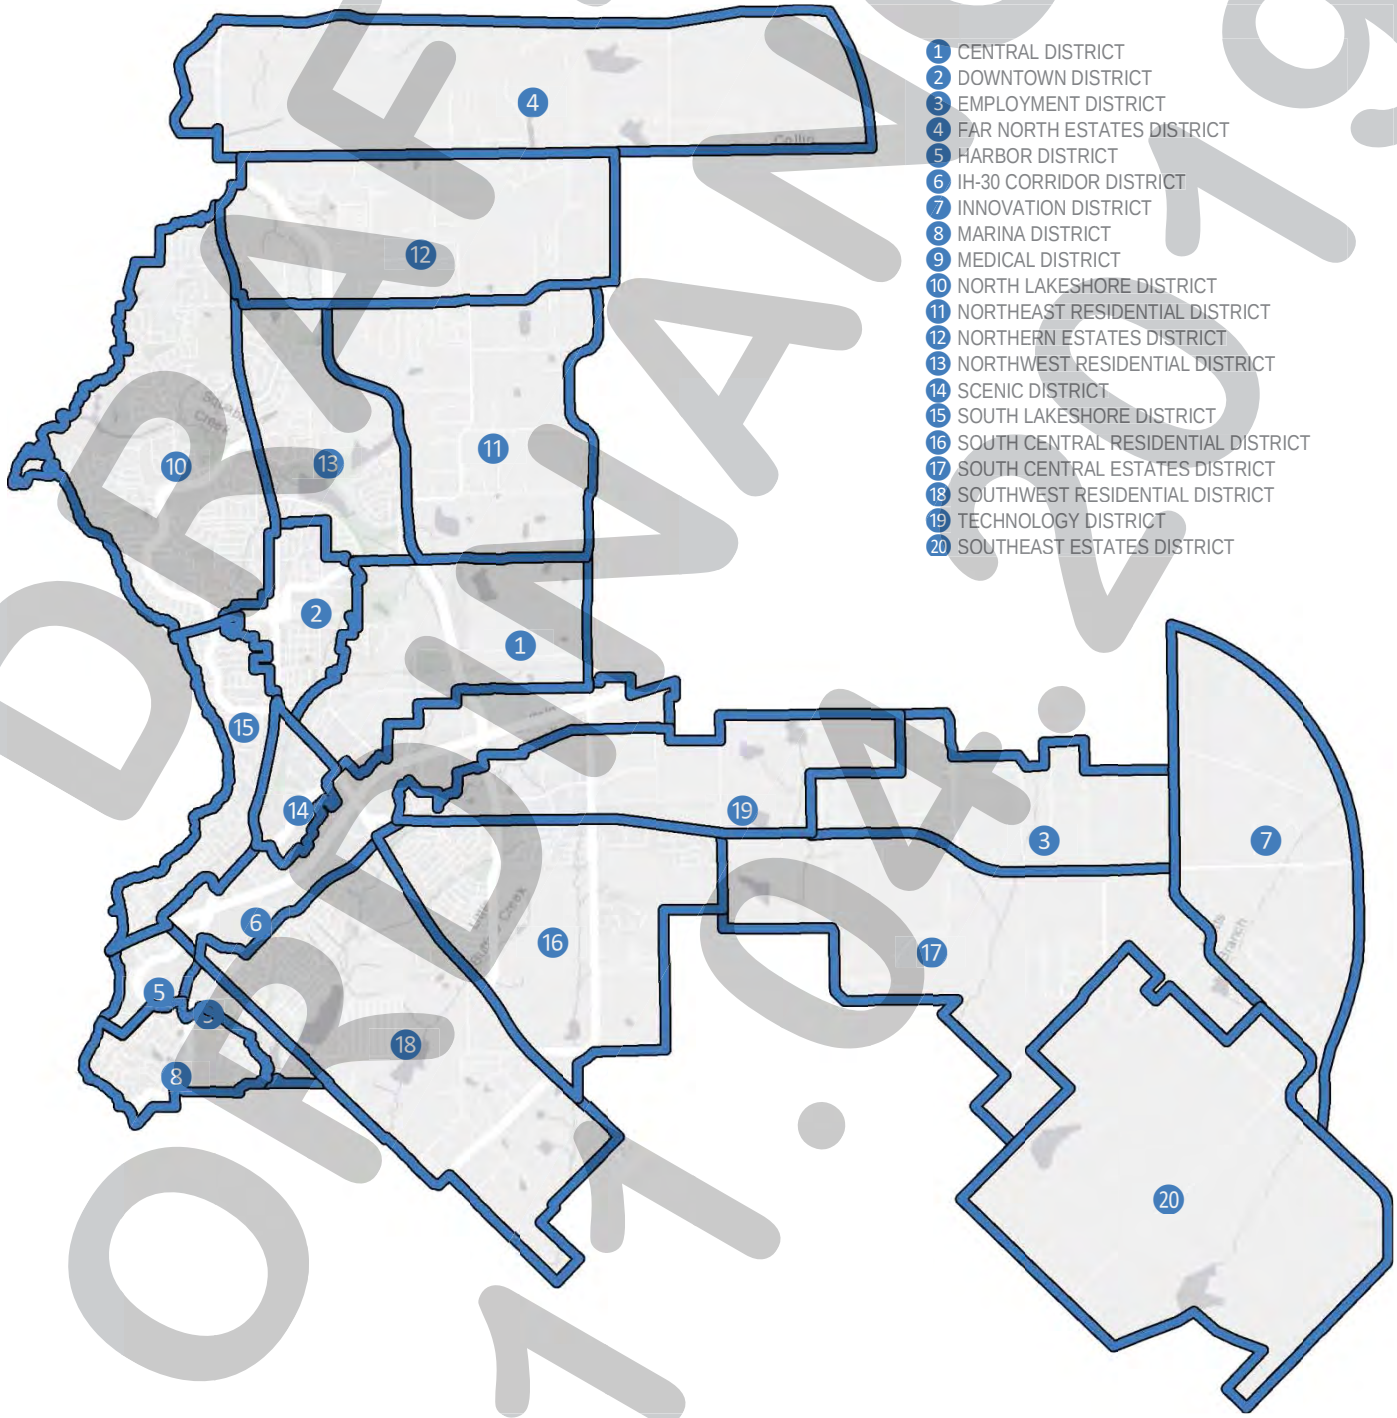
(1) Population, housing and employment data was collected from the United States Census Bureau, North Central Texas Council of Governments (*NCTCOG*), the City of Rockwall's Geographic Information Systems (GIS) Division, the City of Rockwall's Building Inspection Department and other acceptable sources. This information was then analyzed and used to provide base information for all service areas from which projections could be extrapolated [see *Service Areas and Data Collection Zones*].

(2) The base year (*i.e. January 1, 2019*) estimates for housing, population and employment were calculated based on the information collected [see *Base Year Data*].

(3) From the base year and the information gathered from various sources a growth rate was established by examining recent growth trends experienced by the City over the last ten (10) years. This growth rate was then applied to each of the impact fee service areas to project the base year data over the ten (10) year planning period (*i.e. 2019-2029*) [see *Ten Year Growth Assumptions*].

(4) After the projections for housing, population and employment were prepared for the ten (10) year planning period, city staff made adjustments to account for known or anticipated development activity within the planning periods. In making these adjustments city staff took into consideration the recommendations made within the newly adopted OURHometown Vision 2040 Comprehensive Plan, existing public works data, and demographic information provided by the GIS Division and the Building Inspections Department.

(5) Finally, the City's *Build Out* projections for housing, population and employment were calculated by establishing the City's carrying capacity in terms of developable acres and projecting population forward using the previously established Compound Annual Growth Rate (CAGR) to establish a *Build Out Year*. The housing and employment information were then projected to the *Build Out Year* [see *Build Out Projections*].



DRAFT ORDINANCE 1.04.020

DATA COLLECTION ZONES AND SERVICE AREAS

DATA COLLECTION ZONES

The *Data Collection Zones* used for this study were taken from the OURHometown Vision 2040 Comprehensive Plan, which breaks the City down into 20 *Land Use Districts* (*see Figure 1*). These districts were created as a way of breaking down the overall *Future Land Use Plan* to create strategies to help manage growth and land uses in the future. They were also intended to be used as a tool by the City's various boards, commissions and the City Council when contemplating policy changes that could affect certain areas of the City.

FIGURE 1: DATA COLLECTION ZONES
NOTE: The Data Collection Zones are the Land Use Districts contained in the OURHometown Vision 2040 Comprehensive Plan.

DRAFT ORDINANCE 1.04.19

SERVICE AREAS

The Texas Local Government Code (TLGC) requires that service areas be established within the corporate boundaries of a political subdivision for the purpose of ensuring that capital improvements service the areas generating need. The boundaries for impact fees are defined as follows:

- *Roadway Impact Fees* refers to a service area that is limited to the corporate boundaries of a political subdivision or city, and cannot extend into the Extraterritorial Jurisdiction (ETJ) or for a distance exceeding more than six (6) miles. The City of Rockwall is divided into four (4) service areas that are depicted in *Figure 3*.

- *Water and Wastewater Impact Fees* refers to a service area that includes a city's corporate boundaries and Extraterritorial Jurisdiction (ETJ), which is depicted in *Figure 2*. This service area is depicted in *Figure 4*.

SUMMARY OF DATA

As opposed to the databases calculated in 2007 and 2013 -- *which utilized Traffic Survey Zones (TSZ) as the data collection zones* -- the current database utilizes the following geographic areas:

- *Land Use Districts from the OURHometown Vision 2040 Comprehensive Plan.* These geographic areas better conformed to the City's corporate boundaries, and were drafted with the OURHometown Vision 2040 Comprehensive Plan as the geographic regions intended to be used for all future long-range planning/data collection exercises.

- *Service Areas.* The Service Areas correlate to the Water, Wastewater and Roadway Service Areas identified in *Figures 3 & 4*. As previously stated, the corporate boundaries of the City of Rockwall serve as the limits for the Roadway Service Areas and the Water and Waste Water Service Areas include the corporate boundaries and the Extraterritorial Jurisdiction (ETJ) of the City.

Additionally, all databases and projections utilized the following variables:

- *Households (2019).* The *Residential Address Point* feature class in the City's Geographic Information Systems (GIS) software includes all residential addresses (i.e. *single-family, duplex, multi-family, group home/quarters, etc.*) existing as of January 1, 2019. The total number of residential address points (*i.e. households*) was queried from this layer to establish the base years' numbers.

FIGURE 2: CITY OF ROCKWALL CITY LIMITS AND EXTRATERRITORIAL JURISDICTION (ETJ)
NOTE: The City Limits of Rockwall are depicted in RED. The Extraterritorial Jurisdiction (ETJ) is depicted in BLUE.

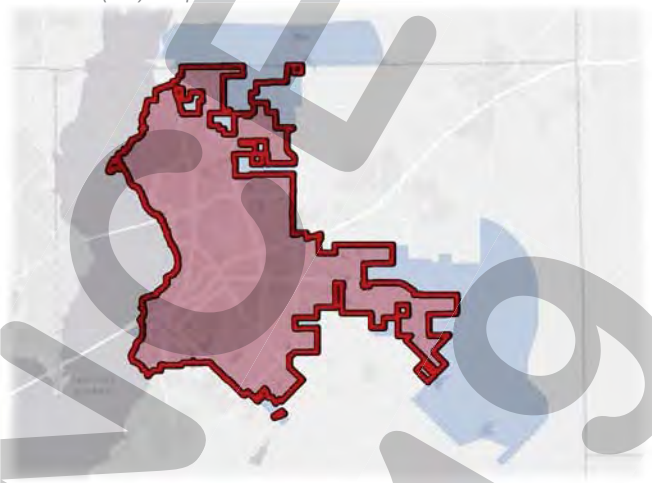


FIGURE 3: ROADWAY SERVICE AREAS
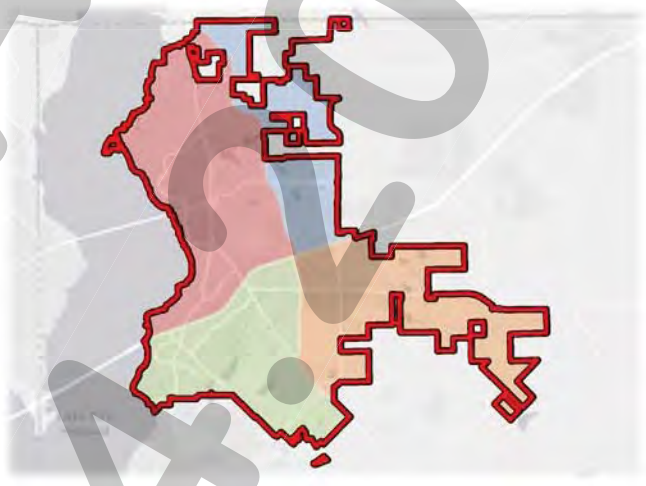
This is the derived service area structure for roadway facilities. These service areas conform to the current city limits of the City of Rockwall and are divided by John King Boulevard and Interstate Highway 30.
NOTE: RED: Service Area 1; BLUE: Service Area 2; GREEN: Service Area 3; YELLOW: Service Area 4



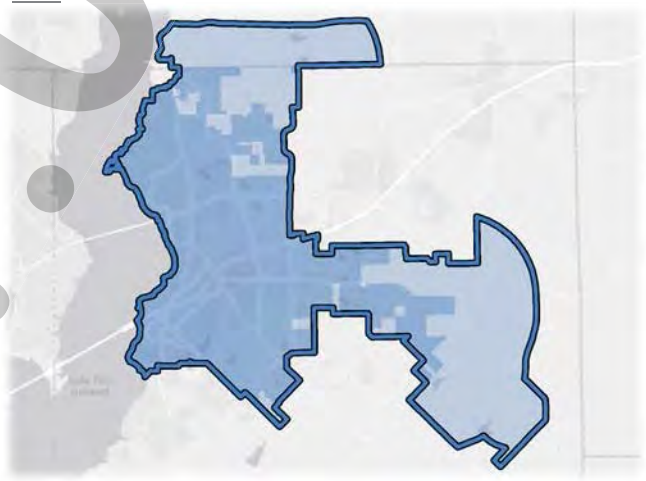


FIGURE 4: WATER/WASTE WATER SERVICE AREAS

DRAFT NOT FOR ORDINANCE

- *Households (2029).* This is the projected household data by service area for the year 2029, which represents a ten (10) year growth projection. This information was derived by staff using the stated databases and proper projection techniques.
- *Population (2019)*. This is the existing population for the base year (i.e. *2019*). This information was calculated utilizing the number of households existing as of January 1, 2019, the occupancy, rate and the average household size as established by the United States Census Bureau for each Census Block.
- *Population (2029)*. This is the projected population by service area for the year 2029, which represents a ten (10) year growth projection. This information was derived by staff using the stated databases and proper projection techniques.
- *Employment (2019).* Employment data was aggregated to three (3) employment sectors, which include *Basic*, *Retail* and *Service* as provided by the Business Analyst tool available from ESRI (*the City's provider for its geospatial database software*). These service sectors serve as the basis for non-residential trip generation. The following is a summary of these employment sectors followed by corresponding North American Industry Classification System (NAICS) code:
    - *Basic.* Land use activities that produce goods and services such as those that are exported outside the local economy. These include manufacturing, construction, transportation, wholesale trade, warehousing and other industrial uses (NAICS Code: *#210000 - #422999*).
    - *Retail.* Land use activities that provide for the retail sale of goods that primarily serve households and whose location choice is oriented toward the residential sector. These include uses such as grocery stores, restaurants, etc. (NAICS Code: *#440000 - #454390*).
    - *Service.* Land use activities that provide personal and professional services. These include such uses as financial, insurance, government, and other professional and administrative offices (NAICS Code *#520000 - #928199*).
- *Employment (2029).* The projected employment data was aggregated to three (3) employment sectors, which include *Basic*, *Retail* and *Service* as provided by the Business Analyst tool available from ESRI. These service sectors were then projected by service area to the year 2029, which represents a ten (10) year growth projection. This information was derived by staff using the stated databases and proper projection techniques.

DRAFT ORDINANCE 1.04.2019

BASE YEAR DATA

This section documents the methods used to derive the base year data for the City of Rockwall as of January 1, 2019. This *benchmark* information provides data for the corporate limits and Extraterritorial Jurisdiction (ETJ) of the City, and creates a starting point in which to extrapolate the ten (10) year growth projections that are depicted in the following section (*see Ten-Year Growth Projections*). This information was initially developed with the OURHometown Vision 2040 Comprehensive Plan, but has been updated to include the additional growth that has taken place since the original numbers were derived and the numbers for January 1, 2019.

HOUSEHOLDS

Utilizing the City's Geographic Information System (GIS) software, the residential addresses for each data collection zone (*i.e. Land Use Districts*) were queried. This provided the raw housing data that was then reviewed to remove any vacant lots or anomalies in the data set. Based on this process, the City of Rockwall was shown to have 16,690 households inside the City's corporate limits and 1,700 households in the City's Extraterritorial Jurisdiction (ETJ) as of January 1, 2019. The total number of households is 18,390. Staff should note that this query included all residential housing types (*i.e. multi-family, single-family, and group homes*) from the data sets.

POPULATION

The City of Rockwall generally uses the North Central Texas Council of Government's (NCTCOG) population estimates as the City's official population; however, for the purposes of this planning study it was necessary to calculate a baseline population that was specific to January 1, 2019. This was also necessary in order to estimate the population of the City's Extraterritorial Jurisdiction (ETJ).

To calculate the population as of January 1, 2019, the City's Geographic Information Systems (GIS) Division utilized the following formula to derive the population estimate for each of the data collection zones:

$$\sum_{d=1}^{20} POP = ((a * o) * f)$$

Where:

POP = Population as of January 1, 2019
d = Land Use District
a = Number of Residential Address Points in Each District
o = Occupancy Rate [per U.S. Census Bureau]
f = Density Factor per Census Block [U.S. Census Bureau]

Using this methodology the base year population as of January 1, 2019 was established to be 44,575 residents inside the corporate limits and 5,041 people residing in the Extraterritorial Jurisdiction (ETJ).

EMPLOYMENT

The base employment data was calculated using ArcGIS *Business Analyst*, which is software that provides location-based market information. Utilizing this tool, the City's Geographic Information Systems (GIS) Division was able to query employment and business information relating to each data collection zone (*i.e. Land Use District*). This information was then broken down into one (1) of the three (3) employment categories (*i.e. Basic, Service, or Retail*). Based on the analysis, the City's corporate limits were shown to have a total employment of 24,083 jobs on January 1, 2019. Of the total employment 2,505 jobs were classified as *Basic*, 12,403 jobs were classified as *Service*, and 9,175 jobs were classified as *Retail*. The Extraterritorial Jurisdiction (ETJ) was shown to have an additional 643 jobs, with 535 jobs being classified as *Service* and 108 jobs being classified as *Retail*. In addition, the GIS Division calculated the total non-residential building square footages (*i.e. improvements*) relating to all of these employment types at ~14,444,596 SF inside the City's corporate boundaries and Extraterritorial Jurisdiction (ETJ), with ~3,209,401 SF being classified as *Basic*, ~5,374,068 SF being classified as *Service*, and ~5,861,127 SF being classified as *Retail*. The total non-residential square footage of land area 139,424,433.67 (or 3,200.74-acres), with 11,967,581.81 SF being classified as *Basic*, 58,451,896.18 SF being classified as *Service*, and 69,004,955.68 SF being classified as *Retail*.

DRAFT
ORDINANCE
11.04.19

TEN-YEAR GROWTH PROJECTIONS

GROWTH ASSUMPTIONS

In this planning study, growth is characterized in two (2) forms: 1) Population (*i.e. residential land use*), and 2) Employment (*i.e. non-residential land use*). To calculate a reasonable growth rate for population and employment it was necessary for staff to make a series of assumptions on which to base the ten (10) year growth projections. These assumptions are summarized as follows:

- Future growth identified within this study will conform to the *Future Land Use Plan* depicted in the OURHometown Vision 2040 Comprehensive Plan.
- Infrastructure will continue to be development driven, and the City will continue to be able to finance any other necessary improvements needed to accommodate future growth.
- School facilities will continue to be sufficient to accommodate any increases in population.
- Densities will generally conform to the land classifications and *District Strategies* identified within the OURHometown Vision 2040 Comprehensive Plan, and as depicted on the Future Land Use Map.
- The residential and non-residential carrying capacity for the City or its *build out* will occur simultaneously.

The ten (10) year projections for population are based on the growth rate, which was previously discussed and staff's consideration of past development trends. The ten (10) year projections for employment are based on the overall carrying capacity for non-residential development compared to the current non-residential development in the City. *Tables 1 & 2* detail the ten (10) year projections for households, population and employment for the service areas associated with roadway and water/wastewater impact fees.

POPULATION GROWTH RATE ANALYSIS

The City of Rockwall has experienced steady residential population growth (*see Figure 5*) over the last 18-years and -- *with the City being ~48.29% vacant and taking into account the City's current availability of water and wastewater infrastructure* -- staff anticipates that the population growth will continue to be fairly steady. It should be noted, however, that the City has seen a slight decline in the population growth percentage over the last five (5) years. From 2000 to 2018, the population growth percentage was 5.08%, but when looking at the last five (5) years this number drops to 1.79% (*see Table 3*).

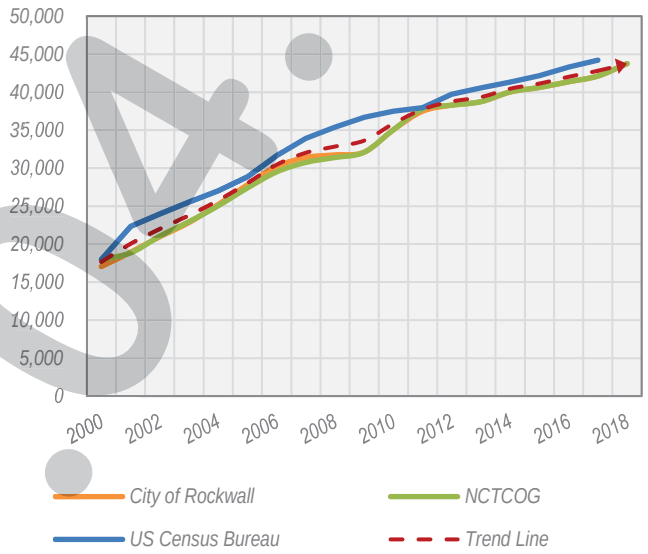

TABLE 1: SUMMARY OF TEN-YEAR GROWTH (ALL ROADWAY SERVICE AREAS)

	2019	2029	Increase
Households	16,690	22,135	24.60%
Population	44,575	59,898	25.58%
Total Employment	24,083	32,366	25.59%
Basic	2,505	3,367	25.60%
Service	12,403	16,669	25.59%
Retail	9,175	12,330	25.59%

TABLE 2: SUMMARY OF TEN-YEAR GROWTH (WATER/WASTE WATER SERVICE AREA)

	2019	2029	Increase
Households	18,390	26,609	30.89%
Population	49,616	73,228	32.24%
Total Employment	25,369	34,065	25.53%
Basic	2,505	3,367	25.60%
Service	13,473	18,082	25.49%
Retail	9,391	12,616	25.56%

FIGURE 5: POPULATION BY AGENCY, 2000-2018

To calculate the ten (10) year population projections, City staff utilized the *Compound Annual Growth Rate (CAGR)* method. CAGR allows for a general assessment of growth when considering periodic increases and decreases in residential

DRAFT 10.4.19

population growths that coincide with changing economic conditions. The formula for CAGR is as follows:

$$CAGR = \left(\frac{x}{y}\right)^{\left(\frac{1}{n}\right)} - 1$$

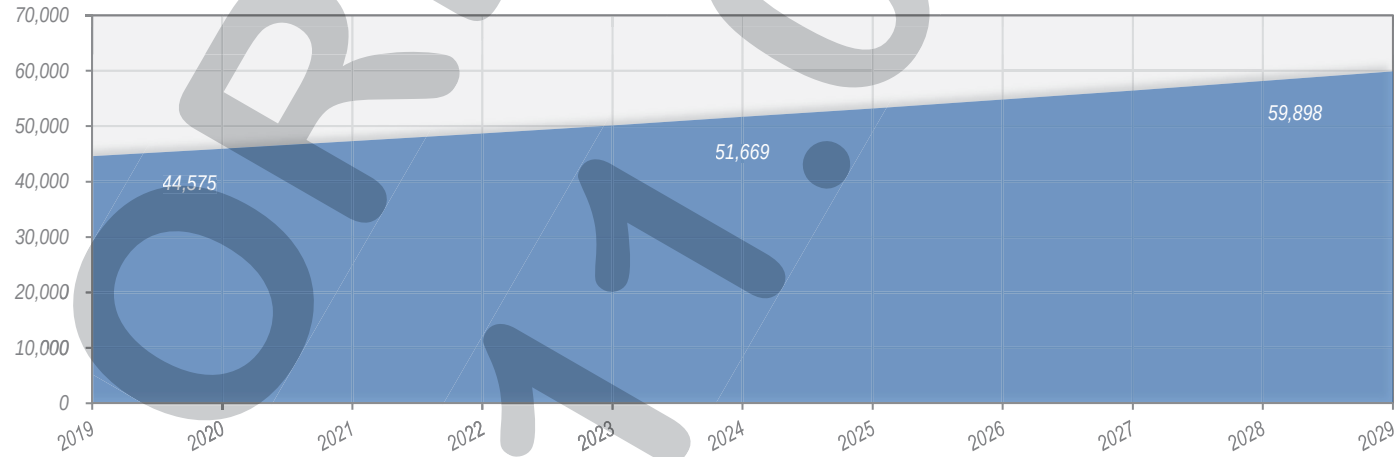
Where:
CAGR = Compound Annual Growth Rate
x = End Value
y = Beginning Value
n = Number of Years

In 2007, a CAGR of four (4) percent was used to calculate the ten (10) year population projections; however, based on the five (5) year annual growth rate and the number depicted in *Table 3*, staff utilized a more conservative three (3) percent annual growth rate. In assessing the past growth rates, staff used several sources including the North Central Texas Council of Governments (NCTCOG), the U.S. Census Bureau, and the City of Rockwall. Based on a three (3) percent CAGR, the following chart shows the anticipated population growth over the next ten (10) years:

TABLE 4: TEN (10) YEAR POPULATION GROWTH
This table shows the projected ten (10) year population growth at a three (3) percent Compound Annual Growth Rate (CAGR).

Year	Population
2019	44,575
2020	45,907
2021	47,284
2022	48,703
2023	50,164
2024	51,669
2025	53,219
2026	54,815
2027	56,460
2028	58,154
2029	59,898

TABLE 3: CITY OF ROCKWALL GROWTH RATES



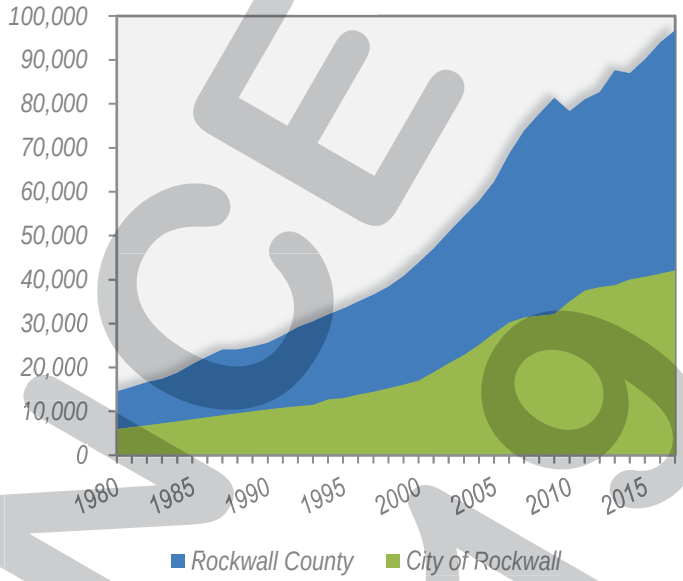
Data Source	Growth Rate
2014 – 2017 US Census	1.70%
2010 – 2017 US Census	2.08%
2000 – 2017 US Census	5.13%
2014 – 2018 Single Family Permits	1.82%
2010 – 2018 Single Family Permits	4.80%
2000 – 2018 Single Family Permits	-2.93%
Future Growth Projection	3.0%

PROJECTED POPULATION FOR 2029

Utilizing the three (3) percent Compound Annual Growth Rate (CAGR) established in the previous section, staff projects that the population for the City will be 59,898 in 2029 (*see Table 4 and Figure 6*). This estimate does appear to be consistent with trends that have been observed at the county and regional level (*see Figure 7 for a comparison of the City's population growth versus the County's population growth*). Although, the growth rate has slowed over the last five (5) years this is seen as a temporary trend and not a sign indicative of the City's future growth trend.

In determining this population projection, staff observed how this projection would relate to the City's projected building permits, and the additional population added to the City on an annual basis (*see Table 5*). Taking this into consideration, the estimated average annual building permits anticipated over this time period is approximately 522. This represents a decrease of approximately 121 permits annually from the estimates completed in 2014. This estimate -- *while still likely high in some years due to shifts in market demand* -- is a more conservative estimate than what was used in 2014. It should be noted that this estimate takes into consideration the type of development likely to occur in a given area (*i.e. single-family or multi-family*).

FIGURE 6: TEN (10) YEAR POPULATION GROWTH
This chart shows the projected ten (10) year population growth at a three (3) percent Compound Annual Growth Rate (CAGR).



DRAFT ORDINANCE

TABLE 5: PROJECTED BUILDING PERMITS

Year	Population	New Residents	New Building Permits
2019	44,575	825	294
2020	45,907	1,332	474
2021	47,284	1,377	490
2022	48,703	1,419	505
2023	50,164	1,461	520
2024	51,669	1,505	536
2025	53,219	1,550	552
2026	54,815	1,597	568
2027	56,460	1,644	585
2028	58,154	1,694	603
2029	59,898	1,745	621
Average Number of Annual Permits:			522

FIGURE 7: CITY POPULATION VS COUNTY POPULATION, 1980-2017

PROJECTED EMPLOYMENT FOR 2029

Employment data for the year 2029 was calculated by taking the information established in the base year analysis -- *which was obtained through the ArcGIS Business Analyst tool* -- and the corresponding ratio of employment to population, and extrapolating this information out to January 1, 2029. These estimates are summarized in Appendix C, *Employment Breakdown by Roadway Service Area*, and Appendix D, *Employment Breakdown by Water/Wastewater Service Area*.

DRAFT ORDINANCE 11.04.2019

BUILD OUT ANALYSIS

A *Build Out Projection* for a city (also referred to as the city's *Carrying Capacity*) is an estimate of the location and density of all potential development, employment and population that a city can support within its future corporate boundaries.

ESTABLISHING HOUSEHOLDS AND POPULATION AT THE CITY'S BUILD OUT

As part of the newly adopted OURHometown Vision 2040 Comprehensive Plan, City staff calculated the number of households and residents at *Build Out*. In establishing the City's households and population at *Build Out* staff made the following assumptions:

- All vacant or undeveloped land within the City's corporate boundaries will develop with the maximum density permitted for the current zoning per the Unified Development Code (UDC).
- All Agricultural (AG) District property is assumed to be vacant or undeveloped and will develop at the maximum density permitted in accordance to the property's' designation on the Future Land Use Map contained in the OURHometown Vision 2040 Comprehensive Plan.
- All property within the Extraterritorial Jurisdiction (ETJ) is assumed to be vacant and will be developed in conformance with the Future Land Use Map at the maximum density permitted by the OURHometown Vision 2040 Comprehensive Plan.
- The City's ETJ is fixed and will not increase in the future.

Taking these assumptions into consideration, staff utilized Geographical Information Systems (GIS) software to calculate all the undeveloped land within the city's corporate boundaries, including the ETJ. Once calculated the acreages were broken down by land use and multiplied by the maximum density permitted for each of the land uses as established within the Unified Development Code (UDC) and the Comprehensive Plan. These totals were then multiplied by the average people per household [*i.e. 2.81 per the US Census Bureau*] to establish the unadjusted population at *Build Out*. Staff then reviewed the projected densities coupled with current land use patterns, and adjusted the numbers to account for known or anticipated development activity. Based on the final *Build Out* population (*i.e. 149,525*), staff projected the population forward using the previously established three (3) percent Compound Annual Growth Rate (CAGR) [*see the Ten-Year Growth Assumptions section*] until the build out population was reached (*see Table 6*). This established a build out year of 2060. The following formula lays out the methodology used to calculate these numbers:

TABLE 6: PROJECTED POPULATION @ 3% COMPOUND ANNUAL GROWTH (CAGR)

Year	Population	New Residents
2018	43,750	1,630
2019	44,570	820
2020	45,907	1,337
2021	47,284	1,377
2022	48,703	1,419
2023	50,164	1,461
2024	51,669	1,505
2025	53,219	1,550
2026	54,815	1,597
2027	56,460	1,644
2028	58,154	1,694
2029	59,898	1,745
2030	61,695	1,797
2031	63,546	1,851
2032	65,453	1,906
2033	67,416	1,964
2034	69,439	2,022
2035	71,522	2,083
2036	73,667	2,146
2037	75,877	2,210
2038	78,154	2,276
2039	80,498	2,345
2040	82,913	2,415
2041	85,401	2,487
2042	87,963	2,562
2043	90,602	2,639
2044	93,320	2,718
2045	96,119	2,800
2046	99,003	2,884
2047	101,973	2,970
2048	105,032	3,059
2049	108,183	3,151
2050	111,429	3,245
2051	114,771	3,343
2052	118,215	3,443
2053	121,761	3,546
2054	125,414	3,653
2055	129,176	3,762
2056	133,052	3,875
2057	137,043	3,992
2058	141,154	4,111
2059	145,389	4,235
2060	149,751	*BO:* 149,525

DRAFT 10.4.2019

$$BO = P + CP + EP$$

$$CP = (\sum[(LU_1 xD_1) \dots (LU_x\, xD_x)]\,)x\ AHS$$

$$EP = (LDR\ x\ 2.5) + (MDR\ x\ 3.5) + (HDR\ x\ 5)$$

Where:

BO = Build Out Population
P = Population as of January 1, 2019
CP = Population of Vacant or Undeveloped Land in the City Limits
EP = Population of Vacant or Undeveloped Land in the ETJ
LU = Vacant Available Land Inside the City Limits for a Land Use
D = Maximum Density Permitted for a Land Use per UDC
AHS = Average Household Size [2.81185 per US Census Bureau]
LDR = Low Density Residential Acreage Available in ETJ
MDR = Medium Density Residential Acreage Available in ETJ
HDR = High Density Residential Acreage Available in ETJ

ESTABLISHING EMPLOYMENT AT THE CITY'S BUILD OUT

To calculate employment at *Build Out*, staff utilized the employment numbers calculated with the base year analysis, and -- *based on the estimated current year population* -- calculated ratios between employment and population for the City and its Extraterritorial Jurisdiction (ETJ). These ratios were then used to extrapolate the number of employees for basic, service and retail sectors for the ten (10) year and build out projections.

DRAFT ORDINANCE 11.04.2019

SUMMARY

The following is a summary of staff's findings when preparing the *Land Use Assumption Report* in preparation for the update of the Roadway, Water and Wastewater Impact Fees for 2019:

- The average annual growth rate as calculated by staff is three (3) percent. This growth rate was established based on data from the US Census, North Texas Council of Governments (NCTCOG), the City and County of Rockwall. Using this growth rate staff projected the following population numbers:
  - The population of the City of Rockwall as of January 1, 2019 was 44,691. This is expected to increase by 25.39% in the next ten (10) years to an estimated 59,898 by January 1, 2029.
  - The population for the City of Rockwall and its Extraterritorial Jurisdiction (ETJ) as of January 1, 2019 was 49,743. This is expected to increase by 32.07% in the next ten (10) years to an estimated 73,228 by January 1, 2029.
- The estimated employment for the City of Rockwall as of January 1, 2019 was 24,083 jobs, with another 1,286 jobs existing within its Extraterritorial Jurisdiction (ETJ). Staff estimates this number to climb to 32,366 jobs within the current city limits, and another 1,699 jobs within the current Extraterritorial Jurisdiction (ETJ) by January 1, 2029.
- Staff has established that there are currently 8,204.17 undeveloped acres of land within the city limits. This represents ~48.29% of the current land in the City. Additionally, the City of Rockwall has access to another 14,083.24-acres of land within its current Extraterritorial Jurisdiction (ETJ). Approximately 75.11% (10,577.67-acres) of the land within this area is vacant.
- According to staff's estimate, the City of Rockwall is expected to be built out in the year 2060, with a total population of 149,525.

DRAFT ORDINANCE 11.04.2019

Chapter 1: Introduction

Shrinking funds available for transportation improvements on city thoroughfares limit many cities from upgrading infrastructure to meet increasing travel demands. To meet the needs of new growth, many cities collect "impact fees" from new development to help fund transportation improvements necessitated by such development. What is unique about impact fees is that they often finance roadway improvements that are considered "offsite" to new development. However, when considering the traffic implications created by new development on the roadway system, impact fees provide a means by which infrastructure may keep pace with new development.

Texas initially authorized the use of impact fees with the 1987 legislature. Now codified in Chapter 395 of the Texas Local Government Codes, the legislation authorizes cities to collect fees from new developments to finance new construction or expansion of capital improvements such as water treatment and distribution facilities, storm and wastewater facilities, and transportation facilities. The law stipulates that all fees collected from new development must not exceed the maximum amount calculated by the methodology described therein.

The law also mandates that impact fee systems be updated periodically to ensure that an appropriate cost per service unit is calculated commensurate with an impact fee capital improvements program. The law also mandates that as new transportation improvements are completed, actual costs are inserted into the cost per service unit calculation to reflect a more accurate reading of service area costs as opposed to estimated costs that were established at the onset of the impact fee system. Finally, new capital improvement projects may be added to the program, subject to meeting eligibility requirements.

In September 2001, Chapter 395 was amended which revised called for several technical and administrative changes of impact fee systems including:

- Expansion of the permissible service area structure for roadway facilities from three to six miles;
- A credit for the portion of ad valorem tax revenues generated by improvements over the program period, or the credit equal to 50% of the total projected cost of implementing the capital improvements plan;
- A city's share of costs on the federal or Texas highway system, including matching funds and costs related to utility line relocation, the establishment of curbs and gutters, sidewalks, drainage appurtenances, and rights-of-way;
- Increase in the time period of update of impact fee land use assumptions and capital improvements plan from a three to five-year period;
- Changes in compliance requirements as they relate to annual reporting; and
- Consolidation of the land use assumptions and capital improvements plan hearings.

The implementation and administration of roadway impact fee systems offers several advantages to both a city and new development among which include: 1) a systematic, structured approach to assessment of fees, 2) a clear, equitable distribution of costs associated with the impact of new development, 3) the ability to pool funds for project initiation within a service area, 4) assurance that fees collected will be spent in the area where new development is occurring, 5) up-front knowledge of fees to be imposed, 6)

DRAFT ORDINANCE NO. 20-09

credits for developer participation, and 7) ability for developers to demonstrate that, pursuant to city guidelines, specific unit equivalencies (service unit generation) may be different from those presented in the land use equivalency table.

Recognizing the need to provide adequate facilities and desiring to have equitable funding of transportation improvements, the City of Rockwall embarked in the development of a roadway impact fee system in January 2008 and is updating the program to comply with legislative requirements identified in Chapter 395. The program was updated in 2013. This update amends the roadway capital improvements program based on updated land use assumptions as well as, input by the designated impact fee Capital Improvements Advisory Committee. To assist with this study, the City of Rockwall retained Freese and Nichols, Inc. to update the roadway impact fee system.

Study Methodology

To update the roadway impact fee for the City of Rockwall, a series of work tasks were undertaken and are described below:

1. Meetings were held with the City of Rockwall Staff and the Capital Improvement Advisory Committee to discuss the approach and roadway methodology to be used in the study update.

2. Impact fee service areas were reviewed and amended for any city annexations. Roadway service areas are contained to the current city limits.

3. The vehicle-mile of travel (VMT) during the PM peak hour was retained as the unit of measure for the roadway impact fee system.

4. A roadway conditions inventory was conducted on Rockwall thoroughfares for lane geometries, roadway classifications and segment lengths. New arterial and/or collector streets not previously assessed were added to the program database.

5. The existing roadway network was evaluated based on traffic volume count data collected May 2019, to determine roadway capacity, current utilization, and if any capacity deficiencies exist within each impact fee service area.

6. Projected 10-year growth, in terms of vehicle-miles of demand, was calculated for the service areas based on updated land use assumptions (projections of population and employment growth) prepared by Rockwall City Staff in June 2019 and supplemented with the updated land use equivalency table. The Land Use Assumptions for Impact Fees report was reviewed and approved by the Capital Improvements Advisory Committee (CIAC) prior to development of VMT growth projections and capital improvements plan (CIP) update.

7. The existing impact fee CIP was evaluated with updated traffic count data to ensure that excess capacity remained within each impact fee project for retention in the system. The analysis of the existing impact fee CIP revealed excess capacity and therefore could remain in the impact fee program.

DRAFT
ORDINANCE
11.04.2019

8. A roadway impact fee CIP was reviewed and amended relative to projected growth from the updated land use assumptions, analysis of existing system deficiencies, likelihood of project initiation over the short-term, the Rockwall Comprehensive Plan, and input by the CIAC and City Staff. The CIP was amended for John King Boulevard to include portions of the roadway that were previously out of the city and the addition of several new projects to the program.

9. Roadway costs associated with construction, engineering, right-of-way, and project financing for recoupment projects were provided by the City. Cost estimates for new projects were prepared by Freese and Nichols. Costs for study updates are eligible for recovery and were included in the total project cost. Roadway cost data was compiled and distributed by service area.

10. The cost of capacity supplied, cost attributable to new development and the maximum cost per service unit was calculated for each service area. A credit of 50% was applied to the overall cost of the capital improvements program for use in the calculation of the cost per service unit.

11. This report was prepared to document the procedures, findings, and conclusions of the study.

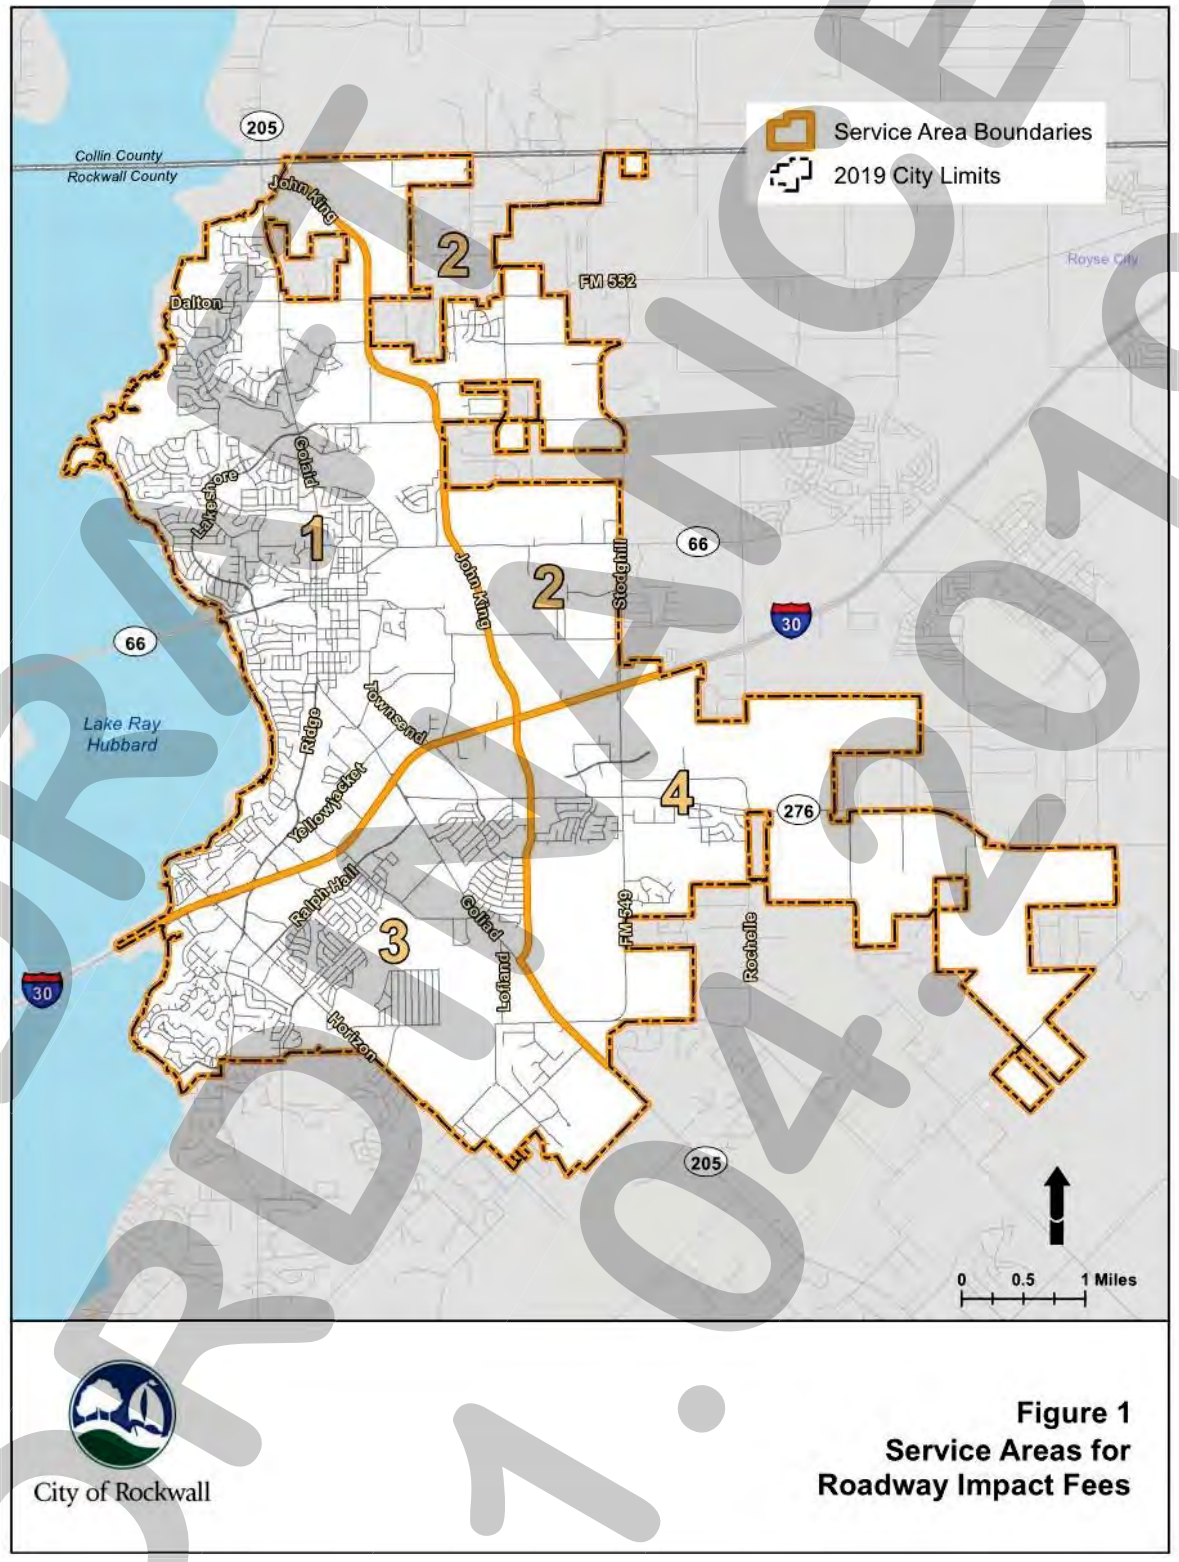
Organization of Report

This report describes the background information, analysis, and findings of the study in six parts, with a chapter devoted to each:

- Roadway Impact Fee Service Areas (Chapter 2)
- Roadway Impact Fee Service Units (Chapter 3)
- Existing Conditions Analysis (Chapter 4)
- Projected Conditions Analysis (Chapter 5)
- Calculation of Impact Fees (Chapter 6)
- Conclusion (Chapter 7)

DRAFT ORDINANCE 11.04.2019

Chapter 2: Roadway Impact Fee Service Areas



Chapter 395 requires that service areas be defined for impact fees to ensure that facility improvements are in proximity to the area that is generating the need. Legislation mandates that roadway service areas be limited to a six-mile maximum and must be located within the current city limits. Roadway service areas are different from other impact fee service areas, which can include the city limits and Extra-Territorial Jurisdiction (ETJ). This is primarily because roadway systems are "open" to both local and regional use as opposed to a defined limit of service that is provided with water and wastewater systems. The result is that new development can only be assessed an impact fee based on the cost of necessary capital improvements within that service area.

The service area structure was developed using the criteria defined in Chapter 395 as it relates to conformance with city limits and the six-mile boundary limits. Other considerations included use of physical or natural features, potential roadway projects and their relation to undeveloped areas of the community, and the planning areas used in long-range plan efforts (for consideration of service area expansion due to possible annexation).

Four service areas were initially developed for the program in 2007 and have been retained in each of the program updates and are generally delineated by John King Boulevard and IH-30. Changes to the service area structure include city annexations on the northern and southern sector of the city. The service area structure for Rockwall is illustrated in **Figure 1**.

DRAFT ORDINANCE 11.04.2019

Figure 1: Service Areas for Roadway Impact Fees

DRAFT ORDINANCE 11.04.2019

Chapter 3: Roadway Impact Fee Service Units

An important aspect of the impact fee system is the determination of the proper service unit to be used to calculate and assess impact fees for new developments. As defined in Chapter 395, "Service unit means a standardized measure of consumption, use, generation, or discharge attributable to an individual unit of development in accordance with generally accepted engineering or planning standards for a particular category of capital improvements or facility expansions."

To determine the roadway impact fee for a development, the service unit must accurately identify the impact that the development will have on the transportation system serving the development. This impact is a combination of the number of new trips generated by the development, the peaking characteristics of the land-use(s) within the development, and the length of each new trip on the transportation system.

The correct service unit must also reflect the supply, which is provided by the roadway system, and the demand placed on the system during the time in which peak, or design, conditions are present on the system. Transportation facilities are designed and constructed to accommodate volumes expected to occur during the peak hours (design hours). These volumes typically occur during the morning (AM) and evening (PM) rush hours as motorists travel to and from work.

The vehicle-mile was retained as the service unit for calculating and assessing transportation impact fees in Rockwall. The vehicle-mile as a service unit establishes a way to relate the intensity of land development to the demand on the system with published trip generation data. It also recognizes state legislation requirements with regards to trip length.

The PM peak hour was retained as the time period for assessing impacts because the greatest demand for roadway capacity occurs during this hour. Roadways are sized to meet this demand, and roadway capacity can more easily be defined on an hourly basis. Traffic volume data collected in May 2019 was used as the basis for the system update.

Service Units

Service units create a link between supply (roadway projects) and demand (development). Both can be expressed as a combination of the number of vehicles traveling during the peak hour and the distance traveled by these vehicles in miles.

Service Unit Supply

For roadway capital projects improvement, the number of service units provided during the peak hour is simply the product of the capacity of the roadway in one hour and the length of the project. For example:

> Given a four-lane divided roadway project with a 600 vehicle per hour per lane capacity and a length of two miles, the number of service units provided is:
>
> *600 vehicles per hour per lane x 4 lanes x 2 miles = 4,800 vehicle-miles*

DRAFT ORDINANCE 1.04.2019

Service Unit Demand

The demand placed on the system can be expressed in a similar manner. For example, a development generating 100 vehicle trips in the PM peak hour with an average trip length of two miles would generate:

100 vehicle-trips x 2 miles/trip = 200 vehicle-miles

Likewise, the existing demand placed on the roadway network is calculated in the same manner with a known traffic volume (peak hour roadway tube counts) on a street and a given segment length.

Service Units for New Development

An important objective in the development of the impact fee system is the development of a specific service unit equivalency for individual developments. The vehicle-miles generated by a new development are a function of the trip generation and average trip length characteristics of that development. The following describes the process used to develop the vehicle-equivalency table, which relates land use types and sizes to the resulting vehicle-miles of demand created by that development.

Travel characteristics were reviewed and deemed to be similar in nature to the previous system update, and therefore no changes were made to the resultant land use equivalency table.

Trip Generation

Trip generation information for the PM peak hour was based on data published in the Tenth Edition of *Trip Generation* by the Institute of Transportation Engineers (ITE). *Trip Generation* is a reference publication that contains travel characteristics of over 160 land uses across the nation and is based on empirical data gathered from over 4,600 studies that were reported to the Institute by public agencies, developers and consulting firms. Data contained in this publication is generally accepted for use in studies by transportation engineers throughout the nation. Data not available was drawn from other published information. Rates were established for specific land use types within the broader categories of residential, office, commercial, industrial and institutional land uses. Within each of the land use categories, a rate was also established for any land uses not specifically identified.

Adjustments

The actual "traffic impact" of a specific site for impact fee purposes is based on the amount of traffic added to the street system as a result of new development. To accurately estimate new trips generated, adjustments must be made to trip generation rates and equations to account for pass-by and diverted trips. The added traffic is adjusted so that each development is assigned only for a portion of trips associated with a specific development and thus reducing the possibility of over-counting by counting only primary trips generated. Trip generation rates were reduced by percentages presented in **Table 1** to isolate the primary trip purpose.

Pass-by trips are those trips that are already on a route for a different purpose and simply stop at a development on that route. For example, a stop at a convenience store on the way home from the office is a pass-by trip for the convenience store. A pass-by trip does not create an additional burden on the street system and therefore should not be counted in the assessment of impact fees of a convenience store.

DRAFT ORDINANCE No. 19-04

A diverted trip is a similar situation, except that a diversion is made from the regular route to make an interim stop. For example, a trip from work to home using Ridge Road (from IH-30) would be a diverted trip if the travel path were changed Yellow Jacket and Goliad for the purpose of stopping at a retail site. On a system-wide basis, this trip places a slightly additional burden on the street system but in many cases, this burden is minimal.

Table 1 contains the documented estimates of trip rate adjustments used in determining the appropriate rate to use in the impact fee calculation process. Adjustments were based on studies documented in the ITE trip generation manual.

The resulting recommended trip rates are illustrated as part of Table 3 Land Use/Vehicle Mile Equivalency Table illustrated later in this chapter. Rates were developed in lieu of equations to simplify the assessment of impact fees by the City and likewise, the estimation of impact fees by persons who may be required to pay an impact fee in conjunction with a development project.

A local study may also be conducted to confirm rates in *Trip Generation* or change rates to reflect local conditions. In such cases, a minimum of three sites should be counted. Selected sites should be isolated in nature with driveways that specifically serve the development and not other land uses. The results should be plotted on the scatter diagram of the selected land use contained in *Trip Generation* for comparison purposes. It is recommended that no change be approved unless the results show a variation of at least fifteen percent across the range of sample sizes surveyed. *Trip Generation* was used as the primary source of information for this study.

Trip Length

Trip lengths (in miles) are used in conjunction with site trip generation to estimate vehicle-miles of travel. Trip length data was based on information generated in the 1995 North Central Texas Council of Governments (NCTCOG) Workplace Survey and the National Workplace Survey. These travel characteristics were applied to Rockwall to determine average trips lengths for common land use types.

Table 2 summarizes the derived average trip lengths for major land use categories. These trip lengths represent the average distance that a vehicle will travel between an origin and destination of which either the origin or destination contains the land-use category identified below. Data compiled by the Workplace Survey represents the best available information on trip lengths for this area.

DRAFT ORDINANCE 1.04.2019

Adjustments

The assessment of an individual development's impact fee is based on the premise that each vehicle-trip has an origin and a destination and that the development end should pay for one-half of the cost necessary to complete each trip. Thus, the development is charged only for a portion of the vehicle-trip associated with that development.

To prevent double charging, and to fairly attribute the demand placed on the system to each trip end location, the trip length was adjusted to remove travel on the federal roadway system and then divided by two to reflect half of the vehicle trip to and from the development. Data from the NCTCOG travel forecast model was used to compare vehicle-miles of travel (VMT) by roadway functional class. Data revealed 43% of travel to use the federal system and thus the average trip length was reduced by this percentage to reflect localized travel on city streets (reflected in column 2). The average trip length, localized trip length, and adjustment for one-half trip length are illustrated in column 3 of Table 2. Where specific land uses were considered to exhibit different trip length characteristics than those identified in Table 3, engineering judgment was used to estimate the average trip length. Finally, as the service area structure was based on a six-mile boundary, those land uses that exhibited trip lengths greater than six miles were limited to this threshold.

Service Unit Equivalency Table

The result of combining the trip generation and trip length information is an equivalency table which establishes the service unit rate for various land uses. These service unit rates are based on an appropriate development unit for each land use. For example, a dwelling unit is the basis for residential uses, while 1,000 gross square feet of floor area is the basis for office, commercial, and retail uses. Other less common land uses are based on appropriate independent variables.

Separate rates have been established for specific land uses within the broader categories of residential, commercial, industrial and institutional to reflect the differences between land uses within the categories. However, even with these specific land use types, information is not available for every conceivable land use, so limitations do exist.

The updated equivalency table is illustrated in **Table 3**. Table 3 is reflective of adjusted trip rates (detailed in Table 1) and trip lengths (Table 2).

DRAFT ORDINANCE 1.04.2019

Chapter 4: Existing Conditions Analysis

Chapter 395 identifies specific requirements necessary in the capital improvements plan for impact fees. The existing conditions, including defining the existing roadway system, and analysis of the total capacity, the level of current usage, and commitments for usage of the existing roadway, are required as part of the capital improvements plan. This chapter discusses the existing conditions.

Existing Conditions

An inventory of the collector and arterial roadway facilities within the city limits was conducted to determine existing conditions throughout Rockwall. This analysis determines the capacity provided by the existing roadway system, the demand currently placed on the system, and the potential existence of deficiencies on the system. Updated data for the inventory was obtained from traffic volume counts conducted by the City and field reconnaissance of current roadway sections.

The roadways were divided into segments based on volume changes, major intersections, service area boundaries, and capacity changes. For each roadway segment, the length, number of lanes, cross-section, and PM peak hour volume data were obtained. Lane capacities were assigned to each segment based on functional street classification, associated roadway lane capacities and the present number of lanes. Lane capacities used in the analysis are shown in **Table 4.**

Table 4: Roadway Facility Vehicle-Mile Lane Capacities

Roadway Facility	Designation	Hourly Vehicle-Mile Capacity per Lane Mile of Roadway Facility
Divided Arterial	DA	600
Divided Collector	DC	500
Undivided Arterial	UA	575
Undivided Collector	UC	475
Special Arterial (with two-way left turn lane)	SA	450

Roadway hourly volume capacities are based on information reflecting Level-of-Service "C" operation, as identified in the transportation element of the Rockwall Comprehensive Plan.

Existing Volumes

Existing directional PM peak hour volumes were obtained from automated traffic counts conducted in May 2019 by the City. Automated traffic counts at 25 separate locations were collected on major roadways (as identified in the Thoroughfare Plan as arterial or collector status) throughout Rockwall. To minimize the total number of counts, data was collected at locations where traffic volumes would typify link volumes on the major segments within the immediate area. For segments not counted, existing volumes were used, or estimates were developed based on data from adjoining roadway counts.

Data was compiled for roadway segments throughout the city and entered into the database for use in calculations. A summary of volumes by roadway segment is included in **Appendix D** as part of the existing capital improvements database.

DRAFT OF ORDINANCE 14.04.2019

Vehicle-Miles of Existing Capacity Supply

An analysis of the total capacity for each service area was performed. For each roadway segment, the existing vehicle-miles of capacity supplied were calculated using the following equation:

Vehicle-Miles of Capacity = Link capacity per peak hour per lane x Number of lanes x Length of segment (miles)

A summary of the current capacity available on the roadway system is shown in **Table 5**. It is important to note that the roadway capacity depicted in Table 5 is system-wide for most major roadways and not restricted to those roadways proposed in the impact fee capital improvements plan. Directional calculations of capacity were performed separately. For a detailed listing of vehicle-miles of capacity by roadway segment, refer to Appendix D.

Vehicle-Miles of Existing Demand

The level of current usage in terms of vehicle-miles was calculated for each roadway segment. The vehicle-miles of existing demand were calculated by the following equation:

Vehicle-Miles of Demand = PM peak hour volume x Length of segment (miles)

Table 5 also lists total vehicle-miles of demand. Appendix D includes a detailed listing of vehicle-miles of demand by directional roadway segment.

Vehicle-Miles of Existing Excess Capacity and Deficiencies

For each roadway segment, the existing vehicle-miles of excess capacity and/or deficiencies were calculated. Each direction was evaluated to determine if vehicle demands exceeded the available capacity. If demand exceeded capacity in one or both directions, the deficiency is deducted from the supply associated with the impact fee capital improvement plan. A summary of peak hour excess capacity and deficiencies are shown in **Table 6**. A detailed listing of the existing excess capacity and deficiencies by roadway segment is also located in Appendix D.

Total	31,085	2,871

DRAFT ORDINANCE 11.04.2019

Chapter 5: Projected Conditions Analysis

Chapter 395 requires a description of all capital improvements or facility expansions and their costs necessitated by and attributable to new development within the service area. This chapter describes the projected growth, vehicle-miles of new demand, capital improvements program, vehicle-miles of new capacity supplied, and costs of the roadway improvements.

Projected Growth

The projected growth for each transportation service area is represented by the increase in the number of new vehicle-miles generated over the 10-year planning period. The basis for the calculation of new demand is the population and employment projections that were prepared as part of a technical report entitled Land Use Assumptions for Roadway Impact Fees by the Rockwall Planning Department in June 2019. Estimates of population and employment were prepared for the years 2019 and 2029.

Population data was provided in terms of the number of dwelling units, households and persons. Employment data is aggregated into three sectors of employees: basic, service and retail. These employment sectors serve as the typical components used in the traffic forecast modeling process. The employment grouping also correlate with the North American Industrial Classification (NAIC) system and include: basic employment (NAIC 210000-422999) generally encompasses the industrial and manufacturing uses; service employment (NAIC 520000-928199) encompasses government, office and professional uses; and retail employment (NAIC 440000-454390) generally includes commercial and retail use.

Projected Vehicle-Miles of New Demand

Projected vehicle-miles of demand were calculated based on the growth expected to occur during the 10-year planning period and the service unit generation for each of the population and employment data components (basic, service and retail). Separate calculations were performed for each data component and were then aggregated for the service area. Vehicle-miles of demand for population growth were based on dwelling units, and vehicle-miles of demand for employment were based on the number of employees and estimates of square footage per employee.

Land Use Equivalency for 10-Year Demand Estimate

Information extracted from the NCTCOG regional travel demand model, used for development of the Mobility 2040, provides information on average trip lengths for the residential and the three types of land uses. These are : 3.12 vehicle-miles per dwelling unit for residential, 1.77 vehicle-miles per thousand square feet for Basic and Retail employment, and 3.92 vehicle-miles per thousand square feet for Service employment.

Table 7 lists the projected vehicle-miles of demand over the 10-year planning period for Rockwall. **Appendix C** contains the projected demand calculation worksheet.

Capital Improvements Program

Evaluation of Current Impact Fee CIP

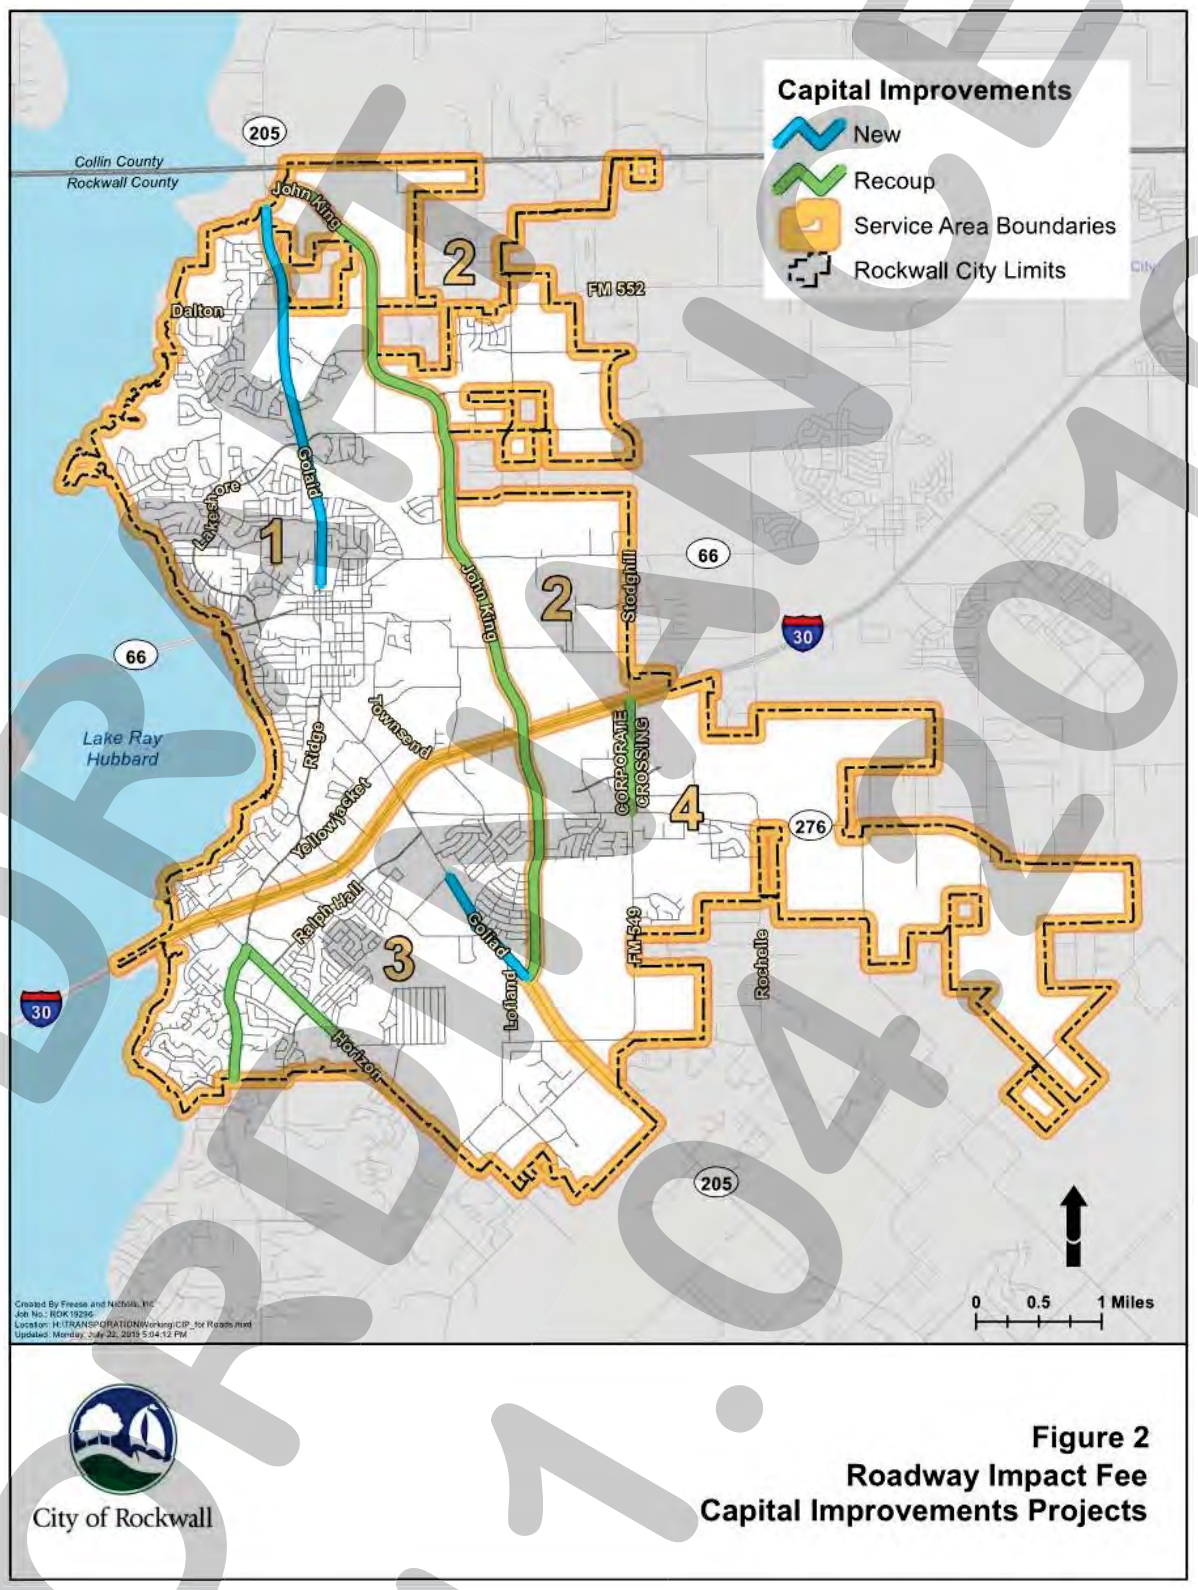
At the outset of the update process, capacity of the CIP was evaluated to ensure that excess capacity remained in previously approved impact fee projects. Chapter 395 mandates that only CIP projects with excess capacity are eligible for consideration. The initial impact fee program contained only one project, John King Boulevard, which extended from the northern city limit to Goliad Street (SH205) just north of FM549. Traffic volume count data collected at several locations within this corridor was used to determine if excess capacity remains on this project. The analysis revealed all segments of John King Boulevard to contain excess capacity and therefore can be retained in the program.

New Impact Fee CIP – Recoupment & Future Projects

Recoupment Projects:

John King Boulevard was the lone project identified for the initial impact fee program in 2008 and 2013 update. At the time the impact fee system was initiated, not all portions of this roadway in the north were within the city limits. The segment between FM552 and SH205 was within the county and not eligible for impact fee consideration. With annexations in 2013, additional portions of the facility were included in the program.

Three of the added projects were recently implemented and are considered recoupment. Traffic counts were also conducted on these three to assess whether excess capacity remains in these projects.



Future Projects:

Two new CIP projects are future projects planned for implementation within the next 10 years. Costs estimates for new project segments were prepared by Freese and Nichols.

Actual costs for project recoupment were provided by City Staff. **Figure 2** illustrates the location of this capital improvement in relation to the city and associated service areas. Project costs were broken into general categories of construction, engineering, right-of-way and finance (debt service). The breakout of costs among the various service areas are listed in **Table 8**. The cost of the impact fee program is $145.9 million. When considering the state mandated credit (50%), the cost eligible for impact fee consideration totals $72.9 million. The impact fee CIP also includes the cost of two five-year updates estimated at $40,000 each.

Projected Vehicle-Miles Capacity Available for New Growth

The vehicle-miles of new capacity supply were calculated similar to the vehicle-miles of existing capacity supplied. The equation used was:

Vehicle-Miles of New Capacity Supplied = Link capacity per peak hour per lane x Num. of lanes within Service Area x Length of segment (miles)

Vehicle-miles of new supply provided by the CIP are listed in **Table 9**. While the project has not been built, there are system deficiencies (by service area) that have been removed from the total supply to properly account for new "net" availability. Table 9 depicts net availability of supply by the CIP. **Appendix E** details capacity calculations provided by the CIP program.

Table 9: Vehicle-Miles of New Capacity Supplied

Service Area	Vehicle-Miles of New Capacity Supplied	Vehicle-Miles of Net New Capacity Supplied
1	13,836	5,869
2	6,096	3,114
3	11,489	4,476
4	4,751	2,405
Total	36,172	15,864

Cost of Roadway Improvements

The total and net cost to implement the roadway improvements plan projects by service area is shown in **Table 10**. If traffic exists on proposed CIP project roadways or there are any deficiencies present in each respective service area, the total system cost is adjusted to reflect the net capacity being made available by the impact fee program. In other words, only the unused portion of the CIP and its associated costs are considered eligible. A detailed listing by project segment in each service area can be found in **Appendix F**. **Appendix G** details system costs by service area.

Table 10: Summary of Roadway Improvements Plan Cost Analysis

Service Area	Actual Cost of Proposed Impact Fee Program	Adjusted Cost (50% Credit) of Proposed Impact Fee Program
1	$73,550,103	$36,775,052
2	$31,656,236	$15,828,118
3	$26,175,186	$13,087,593
4	$14,519,597	$7,259,799
Total	$145,901,123	$72,950,562

State law is specific in identifying that only the portion of the CIP necessitated and attributable to new development is eligible for cost recovery. For example, if only 60% of the net service units supplied by the CIP are needed in the next 10 years, only 60% of the cost (credited at 50% per legislative requirements) may be considered in the calculation of fees. All the capacity provided by the impact fee CIP will be necessitated to address future growth over the 10-year planning period. The cost attributable to new

DRAFT ORDINANCE 04-2019

growth is $31.9 million and represents the citywide cost to implement projects on the impact fee program. **Table 11** depicts CIP costs attributable to new growth by service area.

Table 11: Capital Improvements Plan Costs Attributable to New Development

Service Area	Adjusted Cost (50% Credit) of Net New Capacity	Adjusted Cost (50% Credit) Attributable to New Growth
1	$15,598,596	$15,598,596
2	$8,084,777	$8,084,777
3	$5,098,520	$5,098,520
4	$3,675,714	$3,675,714
Total	$31,993,304	$31,993,304

DRAFT OF ORDINANCE 11.04.2019

Chapter 6: Calculation of Impact Fees

This chapter discusses the calculation of the cost per service unit and the calculation of roadway impact fees. The transportation impact fee will vary by the land use, service area, and size of the development. Examples are included to better illustrate the method by which the transportation impact fees are calculated.

Cost Per Service Unit

The cost per service unit is calculated by dividing the cost of the CIP necessitated and attributable to new demand (net cost) by the projected service units of growth over the 10-year planning period.

Generally, the cost per service unit varies by service area because of variations in cost of CIP, projected growth and the number of service units necessitated by new growth between zones. Where net capacity supplied is greater than demand, the cost per service unit is simply the cost of the net capacity divided by the number of service units provided. In this case, only the portion of the CIP necessitated by new development is used in the calculation. If the net capacity supplied is *less* than projected new demand, then the cost per service unit is calculated by dividing the total cost of net supply by the portion of new demand attributable and necessary by development. The result is generally a decrease in the cost per service unit, because such cost is spread over the larger number of service units of growth.

Table 12 lists the results of the cost per service unit calculation by service area. The actual cost per service unit reflects the true burden to the City for the implementation of the roadway capital improvements program. As per state law, a credit for the portion of ad-valorem tax revenues generated by improvements over the program period, or a credit equal to 50% of the total projected cost of implementing the capital improvements plan must be given. Based on this analysis, the maximum collection rate reflects the maximum amount per service unit that can be charged to follow the state statute. **Appendix G** details the maximum fee per service unit calculation for each service area.

Table 12: Cost Per Service Unit Summary

Service Area	Actual Cost Per Service Unit	Maximum Fee per Service Unit (50% Credit)
1	$2,272.00	$1,136.00
2	$4,398.00	$2,199.00
3	$784.00	$392.00
4	$2,612.00	$1,306.00
Total	$1,926.00	$963.00

DRAFT ORDINANCE 11.04.2019

Calculation of Roadway Impact Fees

The calculation of roadway impact fees for new development involves a two-step process. Step one is the calculation of the total number of service units that will be generated by the development. Step two is the calculation of the impact fee due by the new development.

Step 1: Determine number of service units (vehicle-miles) generated by the development using the equivalency table.

No. of Development Units	x	Vehicle-miles per development unit	=	Development's Vehicle-miles

Step 2: Calculate the impact fee based on the fee per service unit for the service area where the development is located.

Development's Vehicle-miles	x	Fee per vehicle-mile	=	Impact Fee due from Development

Examples: The following fees would be assessed to new developments in Service Area 3 if the cost per service unit were retained at the current collection rate $256.00 (adopted in 2008, retained in 2013).

Single-Family Dwelling

1 dwelling unit x 3.12 vehicle-miles/dwelling unit = 3.12 vehicle-miles
3.12 vehicle-miles x $256.00 /vehicle-mile = $798.72

20,000 square foot (s.f.) Office Building

20 (1,000 s.f. units) x 3.92 vehicle-miles/1,000 s.f. units = 78.40 vehicle-miles
78.40 vehicle-miles x $256.00 /vehicle-mile = $20,070.40

100,000 s.f. Retail Center

100 (1,000 s.f. units) x 1.77 vehicle-miles/1,000 s.f. units = 177.00 vehicle-miles
177.00 vehicle-miles x $256.00 /vehicle-mile = 45,312.00

200,000 s.f. Industrial Development

200 (1,000 s.f. units) x 1.77 vehicle-miles/1,000 s.f. units = 354.00 vehicle-miles
354.00 vehicle-miles x $256.00 /vehicle-mile = $90,624.00.

DRAFT ORDINANCE 11.04.2019

Chapter 7: Conclusions

Chapter 395 authorizes the assessment and collection of impact fees in Texas for transportation related capital improvements that must be met in order to assess and collect impact fees. This study was conducted to fulfill the requirements of Chapter 395 in developing a transportation-related impact fee for the City of Rockwall.

Three service areas were created for Rockwall. This service area structure was configured so that no point is greater than the six-mile maximum set forth by law. The six-mile limit ensures that roadway improvements are near the development paying the fees that it serves.

Vehicle-miles of travel in the PM peak hour are used as the service unit for calculating and assessing impact fees. Vehicle-miles establish a relationship between the intensity of land development and the demand on the roadway system using published trip generation data and average trip length. The PM peak hour is used as the time period for assessment because typically the greatest demand for roadway capacity occurs during this hour. Additionally, roadways are sized to meet this demand and roadway capacity can more accurately be defined on an hourly basis.

The service units (vehicle-miles) for new development are a function of trip generation and the average trip length for specific land uses. Trip generation information was based on data published by the Institute of Transportation Engineers as reported in the initial study. Where appropriate, trip generation rates were adjusted to reflect the primary trip purpose. This ensures that new development is assigned for the portion of trips associated with that specific development. Average trip length data was based on information compiled by NCTCOG and based on data from a NCTCOG Workplace Survey, statistics from the US Census Bureau National Workplace Survey and tailored to Rockwall.

The result of combining trip generation and trip length information is an equivalency table that establishes a service unit rate for various land uses. Separate rates were established for specific land uses within the broader categories of residential, community, industrial and institutional uses.

An analysis of existing conditions revealed that the current roadway system provides over 74,952 vehicle-miles of capacity. The existing demand placed on the system was determined to be 46,738 vehicle-miles. Evaluation of the existing roadway system found 2,871 vehicle-miles of deficiencies on the existing roadway network.

Projected growth, in terms of vehicle-miles over the 10-year planning period, was based on population and employment data that was prepared in the Land Use Assumptions for Roadway Impact Fees dated August 2019 by the City Planning Department. Based on this growth, the projected vehicle-miles of demand calculated to be 33,222.

Rockwall City Staff identified the roadway impact fee capital improvements program for the 10-year planning period. Projects eligible for this CIP include arterial and collector streets that have been designated on the officially adopted Thoroughfare Plan of the City. Developer funded roadways are not eligible for inclusion in calculating impact fees. Projects totaling $145.9 million, was identified for impact fee consideration based on need, projected growth, project affordability and achievability, financial

DRAFT ORDINANCE 1.0A 2019

considerations, jurisdictional issues, the Thoroughfare Plan, and staff recommendation. The credited (50%) cost attributable to new growth is $72.94 million and represents 100% of the net capacity made available for development by impact fee roadway projects. The recommended CIP program will provide 15,864 vehicle-miles of new net capacity.

The *actual* cost per service unit was calculated to be between $784.00 and $4,398.00 and was based on the total cost of net capacity supplied by the CIP and the demand attributable to new development over the 10-year planning period. State legislation requires that a credit for the portion of ad-valorem tax revenues generated by improvements over the program period, or a credit equal to 50% of the total projected cost of implementing a roadway impact fee capital improvements program be given. Based on a 50% credit, the cost per service unit ranges between $392.00 and $2,199.00.

The determination of fees due from new development is based upon the size of development, its associated service unit generation (equivalency table) and the cost per service unit derived or adopted for each service area.

APPENDICES

DRAFT ORDINANCE 11.04.2019

City of Rockwall

DRAFT ORDINANCE 11.04.2019

A. Roadway Impact Fee Definitions

ROADWAY IMPACT FEE DEFINITIONS

Average Trip Length - the average actual travel distance between two points. The average trip length by specific land use varies.

Diverted Trip - similar to pass-by trip, but a diversion is made from the regular route to make an interim stop.

Impact Fee - a charge or assessment imposed by a city against new development to generate revenue for funding or recouping roadway improvements necessitated and attributable to new development.

Land Use Equivalency – correlation of a land use to the rate of vehicle miles CIP of network capacity it would consume

Maximum Fee Per Service Unit - the highest impact fee that may be collected by the City per vehicle-mile of supply. Calculated by dividing the costs of the capital improvements by the total number of vehicle-miles of demand expected in the 10-year planning period.

Pass-by Trip - a trip made as an intermediate stop on the way from an origin to a primary trip destination. For example, a stop at a convenience store on the way to office from home.

PM Peak Hour - the hour when the highest volume of traffic typically occurs. Data collection (May 2019) revealed the peak hour of travel between 5:00 and 6:00 pm for Rockwall.

PM Peak Hour Traffic Counts - the number of vehicles passing a certain point during the peak hours of travel. Traffic counts are conducted during the PM peak hour because the greatest demand for roadway capacity occurs during this hour.

Primary Trip - a trip made for the specific purpose of visiting a destination; for example, from home to office.

Roadway Demand - the demand placed on the roadway network as a result of development. Determined by multiplying the trip generation of a specific land use by the average trip length.

Roadway Supply (or Capacity) - the number of service units provided by a segment of roadway over a period of time. Determined by multiplying the lane capacity by the roadway length.

Service Area - the area within the city boundaries to be served by capital improvements. Criteria for developing the service area structure include; 1) restricted to six-mile limit by legislation (to ensure proximity of roadway improvements to development), 2) conforms to census or forecast model boundaries, 3) projects on CIP as boundaries, 4) effort to match roadway supply with projected demand, or 5) city limit boundaries.

DRAFT ORDINANCE 11.04.2019

Service Unit - a measure of use or generation attributable to new development for roadway improvements. Also used to measure supply provided by existing and proposed roadway improvements.

Trip - a single, one-direction vehicle movement from an origin to a destination.

Trip Generation - the total trip ends for a land use over a given period or the total of all trips entering and exiting a site during that designated time. Used in the development of the land use equivalency table for Rockwall. Based primarily on data prepared by the Institute of Transportation Engineers (ITE).

Vehicle - for impact fee purposes, any motorized appurtenance that carries passengers and/or goods on the roadway system during peak periods of travel.

Vehicle-mile - a unit used to express both supply and demand provided by, and placed on, the roadway system. A combination of a number of vehicles traveling during a given time period and the distance in which these vehicles travel in miles.

DRAFT ORDINANCE 11.04.2019

DRAFT ORDINANCE 11.04.2019

B. Land Use Definitions

LAND USE DEFINITIONS

Residential

Single-Family Detached - Any single-family detached home on an individual lot is included in this category. A typical example of this land use is a home in a suburban subdivision. Also included are duplex residential units and manufactured homes and other residential land uses not specified above.

Multi-Family - This land use includes both low-rise ("walk-up" dwellings) and high-rise multi-family apartments. An apartment is defined as a dwelling unit that is located within the same building with three or more dwelling units. Also included in this land use are residential condominiums, townhomes, triplex and quadplex units. Residential condominiums and townhomes are defined as single-family units that have at least one other single-family unit within the same building structure.

Independent Senior Living Facility - Retirement communities - restricted to adults or senior citizens - contain residential units like apartments or condominiums and are usually self-contained villages. They may also contain special services such as medical facilities, dining facilities, and some limited supporting retail facilities.

Office (Service)

General Office Building - A general office building houses one or more tenants and is the location where affairs of a business, commercial or industrial organization, and professional activity are conducted. The building or buildings may be limited to one tenant or contain a mixture of tenants including professional services, insurance companies, investment brokers, company headquarters, and services for the tenants such as a bank or savings and loan, a restaurant or cafeteria, and several retail facilities. Also included in this category are office parks, and other office uses not specified above.

Medical Office Building – A building that provides diagnoses and outpatient care on a routine basis but is unable to provide prolonged in-house medical and surgical care. One or more private physicians or dentists generally operate this type of facility.

Commercial/Retail

General Retail – General retail includes a variety of land uses that include shopping centers, home improvement stores, hardware stores selling a complete assortment of food, household goods and materials, apparel, servicing items. A shopping center is an integrated group of commercial establishments that is planned, developed, owned, and managed as a unit. It is related to its market area in terms of size, location, and type of store. Shopping centers provide on-site parking facilities. Some centers may include non-merchandising uses such as small office professional services, post offices, banks, health clubs, video rentals, and recreational facilities such as ice-skating rinks or video arcades.

DRAFT ORDINANCE 04-2019

Restaurant - This land use consists of sit-down eating establishments. Quality and high-turnover (sit-down) restaurants are included in this category. Quality restaurants usually have a turnover rate of at least one hour or longer. The turnover rate for a high-turnover (sit-down) restaurant is usually less than one hour.

Fast Food Restaurant - This category includes fast food restaurants with or without drive-through windows, such as McDonalds, Burger King, Dunkin Donuts, and Taco Bell. Some establishments may include an indoor or outdoor playground.

Convenience Store/Gas Station - Any convenience market that sells convenience foods, newspapers, magazines, and often, beer and wine and may have gasoline pumps. Gas stations generally are located at intersections or freeway interchanges and may include facilities for servicing, repairing, fueling motor vehicles and may have convenience stores. Convenience stores/gas stations that have a fast-food restaurant contained within should be calculated on a separate basis based on the appropriate independent variable.

Bank - This land use includes walk-in and drive-in banks. Walk-in banks are generally free-standing buildings with their own parking lots. These banks do not have drive-in windows. Drive-in banks provide banking facilities for the motorist while in a vehicle; many also serve patrons who walk into the building. Savings and loan companies should also be included in this category.

Hotel/Motel – A place of lodging that provides sleeping accommodations, small restaurants, lounges, and meeting spaces. Some hotels or motels may provide banquet rooms or other retail and service shops.

Furniture and Appliance Sales - A store specializing in the sale of furniture, household appliances and goods and often, carpeting.

Theater – This land use consists of a movie or live theater and contains audience seating, single or multiple auditoriums, lobby, offices and refreshment stands.

Self-Storage Facilities - A self-serve storage unit or vault that is rented for the storage of goods. Each unit is physically separated from other units and access is usually provided through an overhead door or other common access point.

Industrial (Basic)

General Industrial – General industrial includes a variety of land uses such as light industrial, manufacturing, salvage, facilities for preparation/assembly and warehouse/distribution of goods. Other uses include materials testing laboratories, high-tech facilities and assemblers of technical equipment. Most facilities are free standing and devoted to a single use. Also included in this category are any other industrial uses not specified above.

Manufacturing – Facilities where the primary activity is the conversion or fabrication of raw materials to finished products. In addition to production of goods, manufacturing facilities may also have ancillary office, warehouse and associated functions.

DRAFT ORDINANCE 04.2019

Warehousing – These facilities are primarily devoted to the storage of materials. These facilities differ from mini warehouse in that they are generally not self-service in nature.

Institutional

Private School - Private schools serve students between the kindergarten and middle school or high school levels. Private schools are usually centrally located in residential communities in order to facilitate student access and have no student drivers.

Community College - Community college provides two and four-year advanced degrees. Vocational and technical schools are other uses that may fall under this category.

Day Care Center - A day care center is a facility where care for pre-school age children is provided, normally during the daytime hours. Day care facilities generally include classrooms, offices, eating areas, and playgrounds. Some centers also provide after-school care for older children.

Hospital - A hospital is any institution where medical or surgical care is given to non-ambulatory and ambulatory patients, and overnight accommodations are provided.

Nursing Home - A nursing home is any facility whose primary purpose is to care for persons who are unable to care for themselves. The term applies to rest homes, chronic care, and convalescent homes.

Religious Facilities – Churches, synagogues or houses of worship that provide public worship services, and generally house an assembly hall or sanctuary, meeting rooms, classrooms, and occasionally dining, catering, or party facilities.

Activity Centers – A recreational center or private club such as a YMCA that may offer classes and clubs for adults and children; a day care or a nursery school, meeting rooms, swimming pools and whirlpools; saunas, tennis, racquetball and handball courts, exercise classes, weightlifting equipment and locker rooms. Some may offer a small restaurant or snack bar within.

U.S. Post Office – A building that contains service windows for mailing packages and letters, post office boxes, offices, sorting and distributing facilities for mail and vehicle storage areas.

DRAFT ORDINANCE 11.04.2019

D. Existing Capital Improvements

EXISTING CAPITAL IMPROVEMENTS

Definitions

LANES	The total number of lanes in both directions available for travel.
TYPE	The type of roadway (used in determining capacity): DA = divided arterial UA = undivided arterial UC = undivided collector
PK-HR VOLUME	The existing volume of cars on the roadway segment traveling during the afternoon (P.M.) peak hour of travel. A and B indicate the two directions of travel. Direction A is a northbound or eastbound and direction B is southbound or westbound. If only one half of the roadway is located within the service area (see % in service area), the opposing direction will have no volume in the service area.
% IN SERVICE AREA	If the roadway is located on the boundary of the service area (with the city limits running along the centerline of the roadway), then half of the roadway is inventoried in the service area and the other half is not. This value is either 50% or 100%.
VEH-MI SUPPLY PK-HR	The number of total service units (vehicle-miles) supplied within the service area, based on the length and established capacity of the roadway type.
VEH-MI TOTAL DEMAND PK-HR	The total service unit (vehicle-mile) demand created by existing traffic on the roadway segment in the afternoon peak hour.
EXCESS CAPACITY PK-HR VEH-MI	The number of service units supplied but unused by existing traffic in the afternoon peak hour.
EXISTING DEFICIENCIES PK-HR VEH-MI	The number of service units of demand in excess of the service units supplied.

NOTE: Excess capacity and existing deficiencies are calculated separately for each direction. It is possible to have excess capacity in one direction and an existing deficiency in the other. When both directions have excess capacity or deficiencies, the total for both directions are presented.

DRAFT 11.10.2020

City of Rockwall

DRAFT ORDINANCE 11.04.2019

E. Roadway Improvement Plan Projects

ROADWAY IMPROVEMENTS PLAN PROJECTS

Definitions

LANES	The total number of lanes in both directions available for travel.
TYPE	The type of roadway (used in determining capacity): DA = divided arterial SA = special arterial (similar to DA)
PK-HR VOLUME	the existing volumes of cars on the roadway segment traveling during the afternoon (P.M.) peak hour of travel.
% IN SERVICE AREA	If the roadway is located on the boundary of the service area (with the city limits running along the centerline of the roadway), then half of the roadway is inventoried in the service area and the other half is not. This value is either 50% or 100%.
VEH-MI SUPPLY TOTAL	The number of total service units (vehicle-miles) supplied within the service area, based on the length and established capacity of the roadway type.
VEH-MI TOTAL DEMAND PK-HR	The total service unit (vehicle-mile) demand created by existing traffic on the roadway segment in the afternoon peak hour.
EXCESS CAPACITY PK-HR VEH-MI	The number of service units supplied but unused by existing traffic in the afternoon peak hour.
FINANCE COST	Estimate of the cost of financing the cost of project development. Included for recoupment projects along John King Boulevard. Not applied for new recoupment and future projects added under this updated Impact Fee CIP
ROW	Estimated value of private owned right of way needed to be acquired for construction of the roadway improvements.

F. Roadway Improvements Plan Cost Analysis

ROADWAY IMPROVEMENTS PLAN COST ANALYSIS

Definitions

LANES	The total number of lanes in both directions available for travel.
TYPE	The type of roadway (used in determining capacity): DA = divided arterial SA = special arterial
% IN SERVICE AREA	If the roadway is located on the boundary of the service area (with the city limits running along the centerline of the roadway), then half of the roadway is inventoried in the service area and the other half is not. This value is either 50% or 100%.
TOTAL SEGMENT COST	The estimated cost (in dollars) of the entire segment of the proposed improvement.
TOTAL COST IN SERVICE AREA	The estimated cost (in dollars) of the portion of the proposed roadway improvement within the service area.

DRAFT NOT FOR ORDINANCE 10.04.2019

CITY OF ROCKWALL
2019 – 2029 WATER & WASTEWATER IMPACT FEE UPDATE

SECTION I – INTRODUCTION

A. GENERAL

In accordance with the requirements of Chapter 395.052 of the Local Government Code, this report establishes the City of Rockwall's Capital Improvement Plan for water and wastewater impact fees and calculates the maximum allowable fee for each. Land use assumptions for impact fees were generated under a separate document prepared by the City of Rockwall's Planning Department.

Chapter 395, of the Local Government Code is an act that provides guidelines for financing capital improvements required by new development in municipalities, counties, and certain other local governments. The basis for determination of an impact fee requires the preparation and adoption of a land use plan and growth assumption, and the preparation of a 10-year capital improvement plan. The capital improvement plan requires an analysis of total capacity, the level of current usage and commitments of capacity of existing capital improvements. From these two phases, a maximum impact fee is calculated.

The Act allows the maximum impact fee to be charged if revenues from future ad valorem taxes, and water and sewer bills are included as a credit in the analysis. If not, the Act allows the maximum fee to be set at 50% of the calculated maximum fee. The following items were included in the impact fee calculation:

1. The portion of the cost of the new infrastructure that is to be paid by the City, including engineering, property acquisition and construction cost.

2. Existing excess capacity in lines and facilities that will serve future growth and which were paid for in whole or part by the City.

3. Engineering and quality control fees for construction projects.

4. Interest and other finance charges on bonds issued by the City to cover its portion of the cost. 5% is assumed for this analysis.

DRAFT ORDINANCE 1.04.2019

The engineering analysis portion of the Water and Wastewater Fee determines utilized capacity cost of the major water distribution and wastewater collection facilities between the year 2019 and the year 2029. Facilities in this analysis include, water pump stations, water storage tanks, water transmission lines and wastewater collection lines. The North Texas Municipal Water District (NTMWD) water treatment, and water distribution components were excluded from this analysis. The study period is a ten-year period with 2019 as the base year. The impact fee calculations for the water and wastewater systems are based on land use assumptions prepared by the City of Rockwall. Prior to this impact fee update, the City's Water Distribution and Wastewater Collection hydraulic models were updated for 2019, 2029 and buildout conditions. The hydraulic model results are available for review from the City of Rockwall. The equivalency factors utilized in this analysis conform to the American Water Works Association Standards (C700 - C703).

B. WATER & WASTEWATER IMPACT FEE GLOSSARY

1. Advisory Committee means the capital improvements advisory committee established by the City for purposes of reviewing and making recommendations to the City Council on adoption of the City's impact fee program.

2. Area-Related Facility means a capital improvement or facility expansion which is designated in the impact fee capital improvements plan and which is not a site-related facility. Area-Related Facility may include capital improvements that are located off-site, or within or on the perimeter of the development site.

3. Assessment means the determination of the amount of the maximum impact fee per service unit that can be imposed on new development.

4. Capital Improvement means either a water facility or a wastewater facility with a life expectancy of three or more years, to be owned and operated by or on behalf of the City.

5. City means the City of Rockwall, Texas.

6. Credit means the amount of the reduction of an impact fee due, determined under this ordinance or pursuant to administrative guidelines that is equal to the value of area-related

DRAFT ORDINANCE 1.04.2019

facilities provided by a property owner pursuant to the City's subdivision or zoning regulations or requirements, for the same type of facility.

7. Debt Service means the 20-year financing costs of projects applied to all eligible existing and proposed water and wastewater facilities.

8. Facility Expansion means either a water facility expansion or a sewer facility expansion.

9. Impact Fee means either a fee for water facilities or a fee for wastewater facilities, imposed on new development by the City pursuant to Chapter 395 of the Texas Local Government Code in order to generate revenue to fund or recoup the costs of capital improvements or facility expansion necessitated by and attributable to such new development. Impact fees do not include the dedication of rights-of-way or easements for such facilities, or the construction of such improvements, imposed pursuant to the City's zoning or subdivision regulations.

10. Impact Fee Capital Improvements Plan means either a water capital improvements plan or a wastewater capital improvement plan adopted or revised pursuant to the impact fee regulations.

11. Land Use Assumptions means the projections of population and growth, and associated changes in land uses, densities and intensities over at least a ten-year period, as adopted by the City and as may be amended from time to time, upon which the capital improvements plans are based.

12. Land Use Equivalency Table means a table converting the demands for capital improvements generated by various land uses to numbers of service units, as may be amended from time to time.

13. New Development means the subdivision of land; the construction, reconstruction, redevelopment, conversion, structural alteration, relocation, or enlargement of any structure; or any use or extension of the use of land; any of which increases the number of service units.

DRAFT ORDINANCE 1.04.2019

14. Recoupment means the imposition of an impact fee to reimburse the City for capital improvements that the City had previously oversized to serve new development.

15. Service Area means either a water service area or wastewater service area which impact fees for capital improvements or facility expansion will be collected for new development occurring within such area, and within which fees so collected will be expended for those types of improvements or expansions identified in the type of capital improvements plan applicable to the service area.

16. Service Unit means the applicable standard units of measure shown on the land use equivalency table in the Impact Fees Capital Improvements Plan that can be converted to water meter equivalents, for water or for wastewater facilities, which serves as the standardized measure of consumption, use or generation attributable to the new unit of development.

17. Site-Related Facility means an improvement or facility which is for the primary use or benefit of a new development, and/or which is for the primary purpose of safe and adequate provision of water or wastewater facilities to serve the new development, and which is not included in the impact fees capital improvements plan and for which the property owner is solely responsible under subdivision or other applicable development regulations.

18. Utility Connection means installation of a water meter for connecting a new development to the City's water system, or connection to the City's wastewater system.

19. Wastewater Facility means a wastewater interceptor or main, lift station or other facility included within and comprising an integral component of the City's collection system for wastewater. Wastewater facility includes land, easements or structure associated with such facilities. Wastewater facility excludes site-related facilities.

DRAFT ORDINANCE 1.04.2019

20. Wastewater Facility Expansion means the expansion of the capacity of any existing wastewater improvement for the purpose of serving new development, but does not include the repair, maintenance, modernization, or expansion of an existing sewer facility to serve existing development.

21. Wastewater Capital Improvements Plan means the adopted plan, as may be amended from time to time, which identifies the wastewater facilities or wastewater expansions and their associated costs which are necessitated by and which are attributable to new development, for a period not to exceed 10 years.

22. Water Facility means a water main, pump station, storage tank or other facility included within and comprising an integral component of the City's water storage or distribution system. Water facility includes CCN acquisition, land, easements or structures associated with such facilities. Water facility excludes site-related facilities.

23. Water Facility Expansion means the expansion of the capacity of any existing water facility for the purpose of serving new development, but does not include the repair, maintenance, modernization, or expansion of an existing water improvement to serve existing development.

24. Water Capital Improvements Plan means the adopted plan, as may be amended from time to time, which identifies the water facilities or water expansions and their associated costs which are necessitated by and which are attributable to new development, for a period not to exceed 10 years.

25. Water Meter means a device for measuring the flow of water to a development, whether for domestic or for irrigation purposes.

C. LAND USE ASSUMPTIONS *(Prepared By: City of Rockwall Planning Department)*

The impact fee land use assumptions utilized in this update were prepared by the City of Rockwall's Planning Department and are presented in a separate document. The land use assumptions projected an ultimate residential population of approximately 149,525 in the City of Rockwall's ultimate planning boundary.

DRAFT ORDINANCE 11.04.2019

The residential and non-residential growth provided by the City for the year 2019 through 2029 is summarized in Table No. 1.

TABLE NO. 1

Residential and Non-Residential Growth from 2019 to 2029

Year	LUA Residential Population *	Residential Population Served **	Non-Residential Uses*** Employees	
2019	49,616	44,748	25,369	
2029	73,228	64,768	34,064	
Res. Growth Rate	**1.48**		**Non-Res. Growth Rate**	**1.34**

** Residential Population Inside Planning Boundary*
*** Residential Population Served Inside Existing City of Rockwall City Limit Boundary*
**** Basic – Industrial Land Uses*
**** Service – Office & Institutional Land Uses*
**** Retail – Commercial Land Uses*

As shown in Table No. 1, increases in the residential population and non-residential uses will occur during the 10-year capital recovery period. The water demand and wastewater flows from the residential and non-residential uses dictate the ultimate size of facilities, while the rate of growth is important to determine the timing of system improvements to meet the City's growing needs. The eligible water impact fee facilities are shown **on Exhibit 1**. The eligible wastewater facilities are shown on **Exhibit 2** in this report.

DRAFT ORDINANCE 11.04.2019

SECTION II

WATER & WASTEWATER C.I.P. AND IMPACT FEE ANALYSIS

A. DEFINITION OF A SERVICE UNIT – WATER AND WASTEWATER

Chapter 395 of the Local Government Code requires that impact fees be based on a defined service unit. A "service unit" means a standardized measure of consumption, use generation, or discharge attributable to an individual unit of development calculated in accordance with generally accepted engineering or planning standards. This impact fee defines a water and wastewater service unit to be a *5/8-inch water meter* and has referred to this service unit as a Single Family Living Unit Equivalent (SFLUE). The SFLUE is based on the continuous duty capacity of a 5/8-inch water meter. This is the City of Rockwall's typical meter used for a single family detached dwelling, and therefore is considered to be equivalent to one "living unit". Other meter sizes can be compared to the 5/8-inch meter through a ratio of water flows as published by the American Water Works Association as shown in **Table No. 2** below. This same ratio is then used to determine the proportional water and wastewater impact fee amount for each water meter size.

TABLE NO. 2

Living Unit Equivalencies For Various Types and Sizes of Water Meters

Meter Type	Meter Size	Continuous Duty Maximum Rate (gpm) [a]	Ratio to 5/8" Meter
Simple	5/8"	10	1.0
Simple	1"	25	2.5
Simple	1-1/2"	50	5.0
Simple	2"	80	8.0
Compound	2"	80	8.0
Turbine (Irrigation)	2"	160	16.0
Compound	3"	160	16.0
Turbine (Irrigation)	3"	350	35.0
Compound	4"	250	25.0
Turbine (Irrigation)	4"	650	65.0
Compound	6"	500	50.0
Turbine (Irrigation)	6"	1,400	140.0
Compound	8"	800	80.0
Turbine (Irrigation)	8"	2,400	240.0
Turbine	10"	3,500	350.0
Turbine	12"	4,400	440.0

DRAFT ORDINANCE 04.20.19

B. CALCULATION OF WATER & WASTEWATER - LIVING UNIT EQUIVALENTS

The City of Rockwall provided the existing water meter count by size category as of December 2018. In total, there are 15,680 domestic water and irrigation meters serving an existing population of 49,616 residents and business. **Table No. 3** shows the number of existing meters, the living unit equivalent factor and the total number of living unit equivalents for each sized water meter.

Similar, the City provided the number of wastewater accounts by corresponding water meter size. This number of wastewater accounts is 15,053. **Table No. 4** illustrates the existing wastewater accounts and the SFLUE's. The difference between the water and wastewater accounts is irrigation meters are not included in the wastewater accounts.

The residential growth rate of 1.48 in **Table 1** was applied to 5/8-inch through 1-1/2-inch meters. The non-residential growth rate of 1.34 in **Table 1** was applied to 2-inch through 12-inch meters. Utilizing these growth rates in a straight-line extrapolation of the existing water and wastewater accounts, the numbers of new accounts was calculated for the year 2029. City records indicate the historical growth of 5/8-inch and 1-inch meters is approximately 96% 5/8-inch meters and 4% 1-inch meters for the base meter sizes. These percentages were applied to the total growth of 5/8-inch and 1-inch meters. Living unit equivalents were then applied to the water meters and wastewater accounts for 2019 and 2029, resulting in a total number of living units. The difference in the total number of 2019 and 2029 living units results in the new living unit equivalents during the impact fee period. The calculation of living unit equivalents is summarized in **Table 3 and Table 4**.

TABLE NO. 3

Water Living Unit Equivalents 2019 – 2029

Meter Size	2019			2029			New Living Unit Equivalents During Impact Fee Period
	Number of Water Meters	Living Unit Equivalent Ratio for 5/8" Used	Total Number of Living Units	Number of Water Meters	Living Unit Equivalent Ratio for 5/8" Used	Total Number of Living Units	
5/8"	14,261	1.0	14,261	21,108	1.0	21,108	6,847
1"	597	2.5	1,493	882	2.5	2,205	712
1-1/2"	188	5.0	940	278	5.0	1,390	450
2"	617	8.0	4,936	827	8.0	6,616	1,680

12"	0	440.0	0	0	440.0	0	0
Totals	**15,053**		**18,946**	**22,227**		**27,656**	**8,710**

C. COST OF FACILITIES

Unit costs for proposed water and wastewater lines larger than 12 inches in diameter that are anticipated to be constructed between 2019 and 2029 by private development include the City's oversize cost participation only. These water and wastewater lines are colored green on **Exhibits 1 and 2**. Oversize cost participation from City is based on availability of funds. For City participation, the developer must bid the 12-inch as a base and the oversize as an additive alternate. City initiated water and wastewater lines include the full cost of the proposed facility. These water and wastewater lines are colored red on **Exhibits 1 and 2**. Developer initiated water and wastewater line projects which are 12 inches or less in diameter are not included in this Impact Fee analysis, as the cost for these size lines are the responsibility of the developer. These water and wastewater lines are colored light blue (cyan) on **Exhibits 1 and 2**.

Actual construction costs of the various existing elements of the water and wastewater systems were utilized where the information was known. The existing cost of facilities was determined from Contractor's final pay requests, City purchase orders, bid tabulation forms and developer's agreements. Existing water and wastewater facilities included in the impact fee analysis are only those with excess capacity available for future growth are colored dark blue on **Exhibits 1 and 2**.

DRAFT ORDINANCE 4.04.2019

Cost data for existing water and wastewater facilities included in the impact fee analysis were provided by the City. A 5% debt service, over a period of 20-years, has been added to all projects. Actual costs were used for those existing projects where records were available.

D. WATER DISTRIBUTION SYSTEM

Computer hydraulic models for the years 2019, 2029 and Buildout were prepared and analyzed by Birkhoff, Hendricks & Carter, L.L.P. The models were developed and water demand distributed from residential population and non-residential land use projections prepared by the City of Rockwall's Planning Department. The projected developed land areas from the City's Land Use Assumptions follow closely to the construction of major facilities in the system. These facilities include pump stations, storage tanks, and major distribution lines. All computer models were run for the Maximum Hourly Demands in a three-day extended period simulation to ensure proper sizing of the facilities to meet peak demands.

1. Existing Pump Stations, Ground Storage Reservoirs & Elevated Storage Tanks

The existing water distribution system included in the impact fee analysis (As of December 2018) includes the facilities summarized in **Table No. 5** and **Table No. 6**.

TABLE NO. 5

Water Distribution System -- Existing Pump Stations & Ground Storage

Pump Station	Number of Pumps	Rated Capacity (MGD)	Number of Ground Storage Tanks	Total Ground Storage Available (Gallons)
Heath Street 698.75	6	17.7	1	3,000,000
Eastside 698.75	6	25.9	1	3,000,000
698.75 Subtotal:	**12**	**43.6**	**2**	**6,000,000**
Eastside 780	3	8.6	1	1,000,000
780 Subtotal:	**3**	**8.6**	**1**	**1,000,000**
Total:	**15**	**52.2**	**3**	**7,000,000**

DRAFT ORDINANCE 11.04.19

TABLE NO. 6

Existing Elevated Storage Tanks

Elevated Storage Tanks	Capacity in Million Gallons
Southside Elevated Storage Tank	1.0
Country Lane Elevated Storage Tank	2.0
Springer Elevated Storage Tank	2.0
Total	**5.0**

The pump stations and ground storage facilities were analyzed with the maximum daily demand, while elevated storage acts dynamically and therefore was analyzed utilizing the difference between the Maximum Hourly Demand and the Maximum Daily Demand.

2. Distribution Lines

The distribution lines consist of all lines within the Service Area planning boundary supplying water to customers in the City of Rockwall. Existing and proposed distribution lines vary in size from 5/8-inch services to 48-inch transmission lines and pump station piping. The cost of water lines includes construction cost, appurtenances (water valves, fire hydrants, taps and the like), utility relocations, purchase of easements and engineering costs. Financing cost over a 20-year term is included for each project.

Unit cost for proposed capital improvement water lines 12-inches and larger in diameter classified as City initiated, or City participation in oversize water lines. Developer's initiated water line projects, 12 inches or less in diameter were not included in this Impact Fee analysis, as the cost for these size lines are the responsibility of the developer.

3. Water Supply

The City of Rockwall currently receives all of its water supply from the North Texas Municipal Water District (NTMWD). Rockwall's allocation of the capital cost of services as a Member of the NTMWD was specifically excluded from the impact fee analysis.

If included, Rockwall's share of the NTMWD capital cost could include the original construction cost, expansion cost and financing cost of the following components:

a) Water Rights Cost in Lake Lavon and other Sources

DRAFT ORDINANCE 11.04.19

b) Raw Water Intake Structures

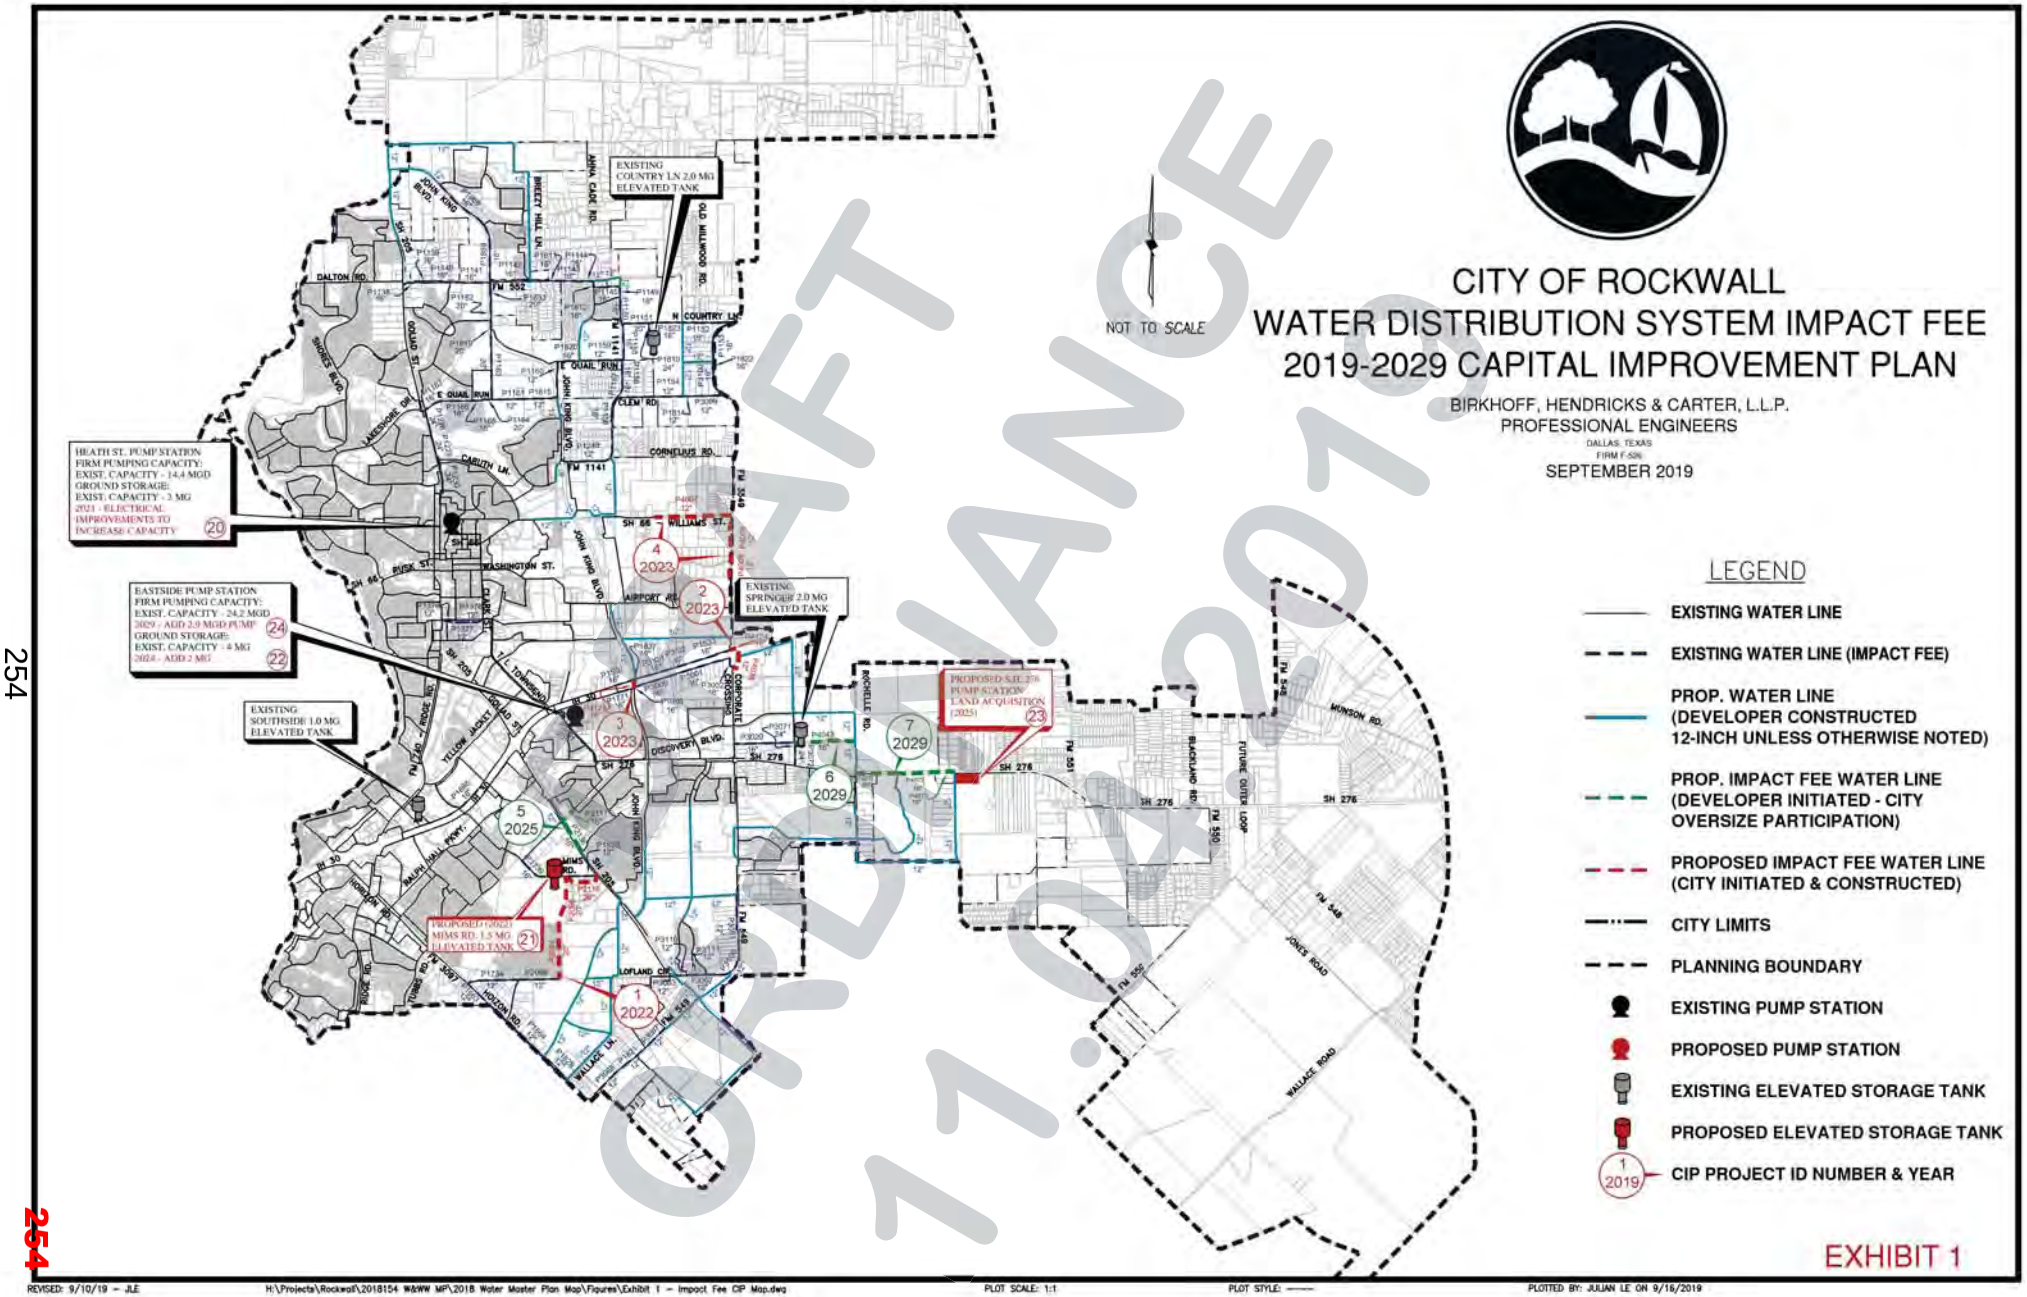
c) Raw Water Pump Stations

d) Treatment Plant and Expansion

e) High Service Pump Stations

f) Transmission Lines

g) NTMWD Owned Ground Storage Facilities



NTMWD has indicated that determining Rockwall's portion of cost for these items would not be possible, thus these costs have not been included in this analysis.

4. Water Distribution System Capital Improvement Projects for Impact Fees

In order to meet the demands of the anticipated growth over the next 10-years, as provided in the Land Use Assumptions prepared by the City of Rockwall, certain water distribution system improvements are required. **Exhibit 1** shows the recommended water system improvements and **Table No. 7** itemizes each project and the project cost in 2019 dollars. These recommended improvements form the basis for the water system impact fee calculation.

The capital improvement plan for impact fees provides for system improvements within the defined Service Area Planning Boundary. Most of the capital improvements are within the city limits, as requested by the City due to new State of Texas Annexation Laws.

DRAFT ORDINANCE 11.04.20

5. Utilized Capacity

Utilized capacity for the water distribution system was calculated based on the water line size required for each model year (2019, 2029 and buildout). Analysis of the water distribution system is based on the maximum daily demand, maximum hourly demand, and the minimum hourly demand. Pump station capacity is generally based on the maximum daily system demand while transmission and distribution facilities are sized based on either the maximum hourly demand or the minimum hourly demand, whichever demand is greater for a particular water line. Often times, the capacity of water lines are determined by the flows generated by the minimum hourly demand. The minimum hourly flows are usually higher in those lines that are used to refill elevated storage. For each line segment in the water distribution model, the maximum buildout flow rate in the line was compared to the flow rate in the same line segment for the 2019 and the 2029 models.

The percent utilized capacity was then calculated for each year based on the buildout capacity. The utilized capacity during the Impact Fee period is the difference between the year 2029 capacity and the year 2019 capacity. **Table No. 8** below summarizes the project cost and utilized capacity cost over the Capital Recovery Period (CRP) of 2019 - 2029 for each element of the Water Distribution System. The utilized capacity for each water distribution facility, both existing and proposed, is presented in detail in Impact Fee Capacity Calculation **Table Nos. 9, 10, 11, 12, 13 and 14.**

Table No. 8

Summary of Eligible Water Distribution Project Cost and Utilized Capacity Cost

Water System Facility	20-Year Project Cost	Utilized Capacity ($) In the CRP
Existing Pump Stations & Storage	$24,635,679	$8,804,864
Existing Transmission/Distribution Lines	$14,222,504	$2,863,156
Proposed Pump Stations & Storage	$17,499,436	$15,502,253

DRAFT ORDINANCE 1.04.2019

E. WASTEWATER COLLECTION SYSTEM

Computer models for the years 2019, 2029 and Buildout were prepared by Birkhoff, Hendricks & Carter L.L.P. The models were developed and peak flows calculated from the residential population and non-residential land use projections prepared by the City of Rockwall's Planning Department. Computer models were run to determine peak wet weather flow to insure proper sizing of the collection system.

1. Collection Lines

The natural creeks, whose basins will collect wastewater through the installed system of collection lines that flow into the geographic treatment area serviced by the NTMWD.

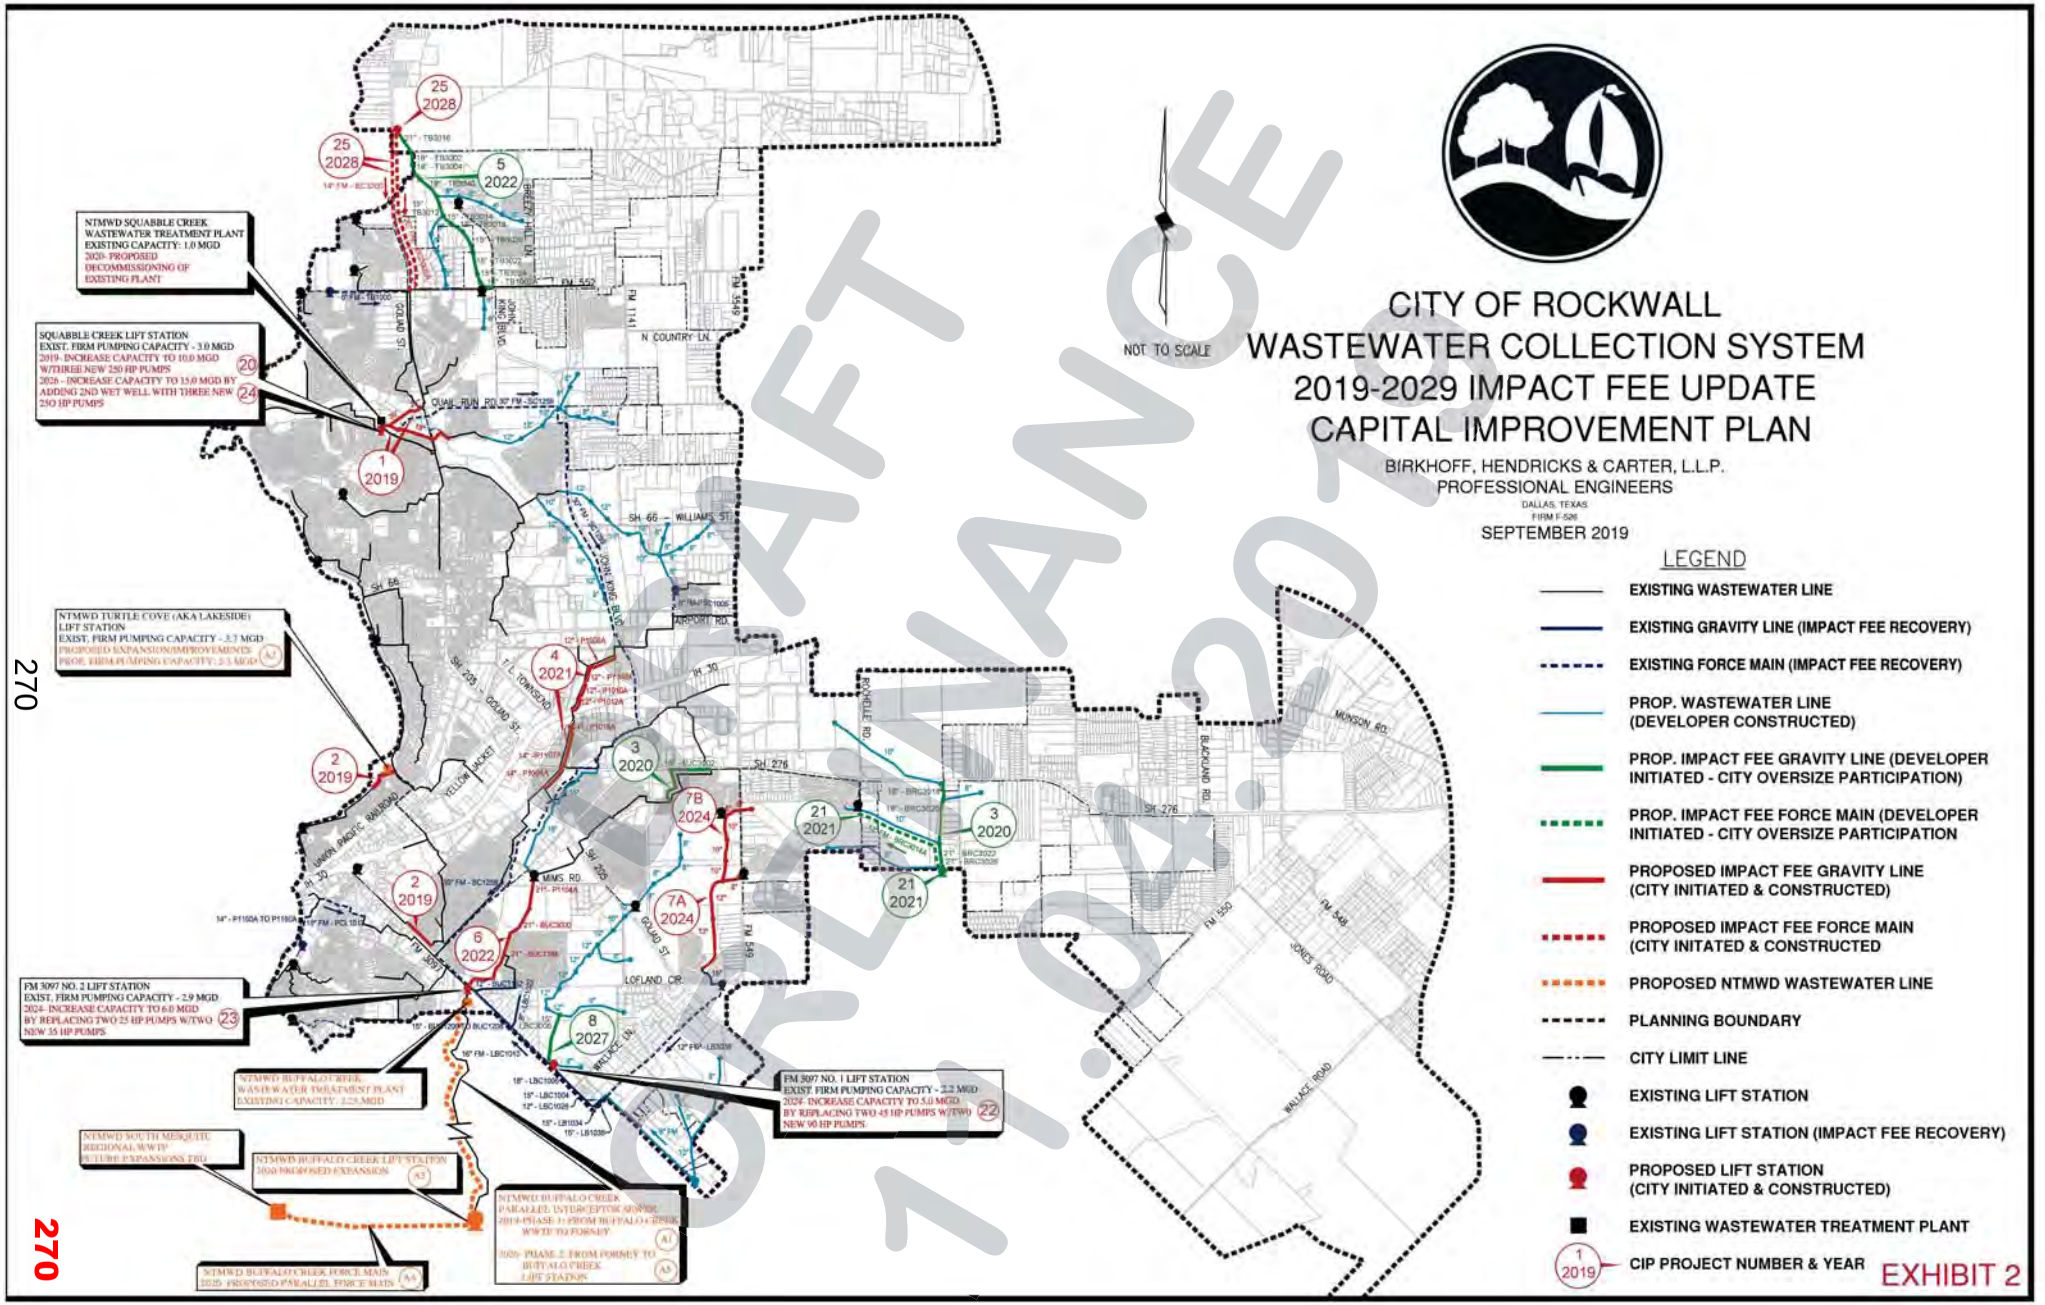
The wastewater collection system analysis covered all of the drainage basins within the Service Area planning boundary. Each collection system was analyzed for line sizes 12-inches in diameter and larger. Eliminating line sizes smaller than 12-inches in diameter from the study leaves only the interceptor and trunk lines included in the study. The wastewater project costs include necessary appurtenances (manholes, lift stations, aerial crossings and the like), purchase of easements, utility relocation, pavement removal and replacement, and engineering costs. For existing Impact Fee projects, actual costs were utilized where known. Future project cost estimates were based on 2019 average unit cost per linear foot and includes engineering, easements, and construction cost.

All eligible wastewater collection line projects in the Service Area planning boundary were included in the impact fee analysis. Eligible existing and proposed wastewater facilities are shown on **Exhibit 2** and have capacity for future growth.

2. Treatment

The North Texas Municipal Water District (NTMWD) provides the City of Rockwall with the entirety of wastewater treatment. NTMWD owns and operates the Squabble Creek and Buffalo Creek Wastewater Treatment Plants (WWTP). Excess flows above the permit levels of the Squabble Creek and Buffalo Creek WWTP's are conveyed to the NTMWD Buffalo Creek Regional system. Rockwall pays NTMWD for the cost of this service according to the City's percentage of wastewater flow contributions in any given year.

DRAFT ORDINANCE 04-19



This Impact Fee study includes the cost of NTMWD regional collection and transportation, and facilities located within the City's Service Area planning boundary that were paid for by NTMWD. Existing treatment plant and future treatment plant expansion costs of NTMWD were included in this Impact Fee analysis.

3. Wastewater System Capital Improvement Projects for Impact Fees

The 10-year Wastewater System Capital Improvement Plan for Impact Fees was developed by Birkhoff, Hendricks & Carter L.L.P. **Exhibit 2** shows the recommended system improvements and **Table No. 15** itemizes each project and the project cost. These recommended improvements form the basis for the Wastewater System Impact Fee Calculation.

The capital improvement plan for impact fees provides for system improvements within the defined Service Area Planning Boundary.

DRAFT ORDINANCE 11.04.2019

NTMWD SQUABBLE CREEK WASTEWATER TREATMENT PLANT
EXISTING CAPACITY: 1.0 MGD
2020- PROPOSED DECOMMISSIONING OF EXISTING PLANT
SQUABBLE CREEK LIFT STATION
EXIST. FIRM PUMPING CAPACITY - 3.0 MGD
2019- INCREASE CAPACITY TO 10.0 MGD W/THREE NEW 250 HP PUMPS
2026 - INCREASE CAPACITY TO 15.0 MGD BY ADDING 2ND WET WELL WITH THREE NEW 250 HP PUMPS
NTMWD TURTLE COVE (AKA LAKESIDE) LIFT STATION
EXIST. FIRM PUMPING CAPACITY - 3.7 MGD
PROPOSED EXPANSION/IMPROVEMENTS
PROP. FIRM PUMPING CAPACITY: 2.3 MGD
FM 3097 NO. 2 LIFT STATION
EXIST. FIRM PUMPING CAPACITY - 2.9 MGD
2024- INCREASE CAPACITY TO 6.0 MGD BY REPLACING TWO 25 HP PUMPS W/TWO NEW 35 HP PUMPS
NTMWD BUFFALO CREEK WASTEWATER TREATMENT PLANT EXISTING CAPACITY: 3.25 MGD
NTMWD SOUTH MESQUITE REGIONAL WWTP FUTURE EXPANSIONS TBD
NTMWD BUFFALO CREEK LIFT STATION 2030 PROPOSED EXPANSION
NTMWD BUFFALO CREEK FORCE MAIN 2025- PROPOSED PARALLEL FORCE MAIN
NTMWD BUFFALO CREEK PARALLEL INTERCEPTOR SEWER 2019- PHASE 1: FROM BUFFALO CREEK WWTP TO FORNEY
2026- PHASE 2: FROM FORNEY TO BUFFALO CREEK LIFT STATION

			Total: NTMWD Wastewater System Improvements:		**$ 60,964,600**	**$ -**	**$ 60,964,600**

(A) Opinion of Cost includes:
a) Engineer's Opinion of Construction Cost
b) Professional Services Fees (Survey, Engineering, Testing, Legal)
c) Cost of Easement or Land Acquisitions

Notes: 1. City obligations estimated based on City of Rockwall's contracted proportion or historical usage of NTMWD Regional Systems.
2. 10-Year CIP for NTMWD Regional Systems based on project listings provided for "Summary of Sewer System CIP" and "Summary of Regional Wastewater System CIP", both dated May 11, 2018.

PLANNING EXPENSES

	Project Description	Engineering Services	Opinion of Project Cost (A)
2029	Wastewater Masterplan & Impact Fee Update	$ 59,850	$ 59,850
		Total: Planning Expenses:	**$ 59,850**
Grand Total, City of Rockwall & NTMWD Wastewater System Improvements:			**$ 98,328,890**

DRAFT ORDINANCE 11.04.19

4. Utilized Capacity

Utilized capacity for the wastewater collection system was calculated based on land use assumptions prepared by the City of Rockwall. The population and non-residential growth in each wastewater drainage basin was determined utilizing the City's growth projections. These growth rates were utilized to calculate 2019, 2029 and buildout peak design flows.

The percent-utilized capacity was calculated for the design flow of each study year based on the buildout capacity. The utilized capacity during the Impact Fee period is the difference between the year 2019 capacity and the year 2029 capacity. **Table No. 16** below summarizes the project cost and utilized cost over the impact fee period of 2019 – 2029. The utilized capacity for each eligible existing and proposed wastewater collection line is presented in detail in the Impact Fee Capacity Calculation **Table Nos. 17 and 18**. **Table No. 19** summarizes the utilized capacity of lift stations eligible for impact fee recovery. **Table 20** summarizes the utilized capacity of NTMWD facilities eligible for impact fee recovery. **Table 21** includes the summary of utilized capacity allocation between the City of Rockwall and NTMWD.

TABLE NO. 16

Summary of Eligible Wastewater System Project Cost and Utilized Capacity Cost

Wastewater System Facility	20-Year Project Cost	Utilized Capacity ($) in the CRP Period
Existing Wastewater Collection Line	$12,344,474	$3,863,647
Existing Wastewater Facilities	$6,402,514	$629,875

A6	10-Year CIP for NTMWD Sewer System (Rockwall Responsibility Only)	5	2019-2029	N/A	N/A	$ 5,435,164		$ 5,435,164				33%	49%	16%	$ 1,803,518	$ 2,661,803	$ 858,285
A7	10-Year CIP for NTMWD Regional Wastewater System (Rockwall Responsibility Only)	5	2019-2029	N/A	N/A	$ 11,619,512		$ 11,619,512				33%	49%	16%	$ 3,855,634	$ 5,690,511	$ 1,834,877
Proposed NTMWD Facility Total						**$ 60,964,600**		**$ 60,964,600**							**$ 20,229,523**	**$ 29,856,651**	**$ 9,627,128**

Utilized Capacity for Regional NTMWD Treatment Facilities calculated using proportion of years 2019 & 2029 population to build-out population.

Notes: 1. City obligations estimated based on City of Rockwall's historical usage of NTMWD Regional Systems.
2. 10-Year CIP for NTMWD Regional Systems based on project listings provided for "Summary of Sewer System CIP" and "Summary of Regional Wastewater System CIP", both dated May 11, 2018.
3. Funded by NTMWD, 100% City Responsibility
4. Part of NTMWD Buffalo Interceptor System, assumed 59% City Responsibility
5. Part of NTMWD Regional Systems, assumed 2.915% City Responsibility
6. Utilized capacities for NTMWD facilities were determined using the proportion of the existing and projected 2029 population as compared to the build-out population.

DRAFT ORDINANCE 1.04.2019

DRAFT ORDINANCE 11.04.2019

F. CALCULATION OF MAXIMUM IMPACT FEES - WATER & WASTEWATER

Chapter 395, of the Local Government Code allows the maximum impact fee to be charged if revenues from Future Ad Valorem Taxes, and water and sewer bills are included as a credit in the analysis. If not, the Act allows the maximum assessable fee to be set at 50% of the calculated maximum fee. The maximum impact fees for the water and wastewater systems are calculated separately by dividing the cost of the capital improvements or facility expansions necessitated and attributable to new development in the Service Area within the ten year period by the number of living units anticipated to be added to City within the ten year period. To simplify collection, we recommend the fee remain fixed throughout the 5-year period, unless changed by Council.

The **Water System** impact fee for a 5/8" meter is calculated as follows:

$$\text{Maximum Impact Fee} = \frac{\text{Eligible Existing Facility Cost} + \text{Eligible Proposed Facility Cost}}{\text{Number of New Living Unit Equivalent over the Next 10-Years}}$$

$$= \frac{\$12,324,530 + \$18,582,427}{9,846} = \frac{\$30,906,957}{9,846}$$

Calculated Water Maximum Impact Fee = $3,139.04 *

* Maximum Allowable Water Impact Fee is 50% of the Calculated Water Maximum Impact Fee

Maximum Assessable Water Impact Fee = $3,139.04 X 50% = $1,569.52

The **Wastewater System** impact fee for a 5/8" water meter is calculated as follows:

$$\text{Maximum Impact Fee} = \frac{\text{Eligible Existing Facility Cost} + \text{Eligible Proposed Facility Cost}}{\text{Number of New Living Unit Equivalent over the Next 10-Years}}$$

$$= \frac{\$4,493,522 + \$37,488,749}{8,710} = \frac{\$41,982,271}{8,710}$$

Calculated Water Maximum Impact Fee = $4,820.01 *

* Maximum Allowable Water Impact Fee is 50% of the Calculated Water Maximum Impact Fee

Maximum Assessable Wastewater Impact Fee = $4,820.01 X 50% = $2,410.00

Table No. 22 summarizes the per service unit equivalent maximum assessable impact fee that can be charged based on the calculated 50% credit above.

DRAFT OF ORDINANCE 11.04.2019

TABLE NO. 22

Maximum Assessable Water & Wastewater Impact Fee

Maximum Assessable Water Impact Fee per Living Unit Equivalent: $1,569.52

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, Director of Public Works/City Engineer**

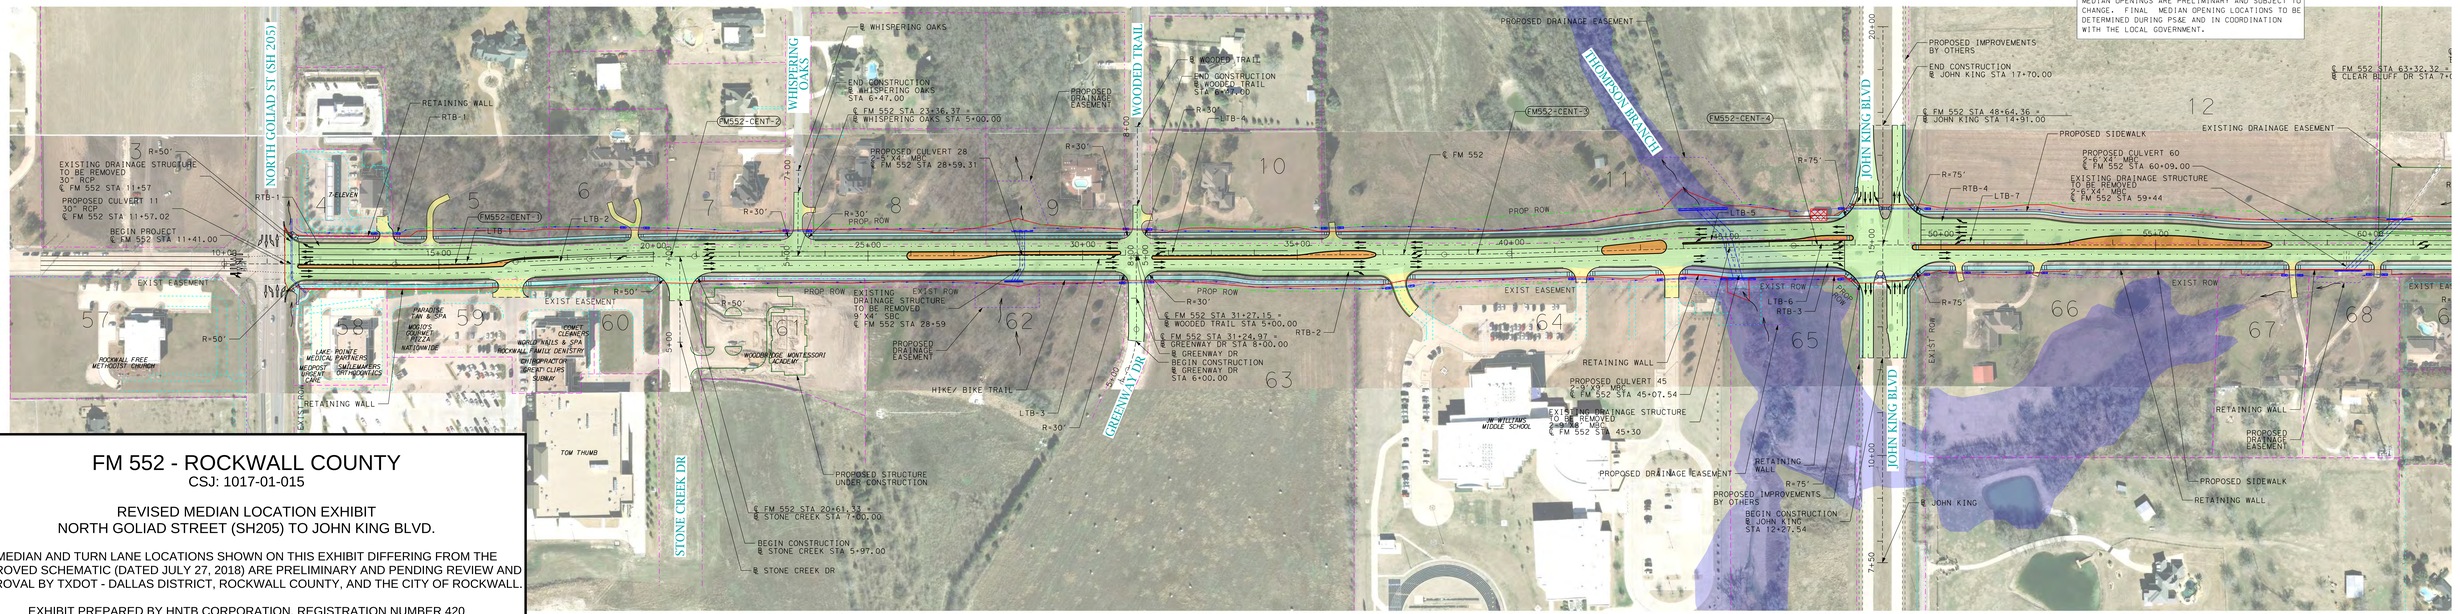
DATE: **October 30, 2019**

SUBJECT: **FM 552 Roadway Reconstruction Project**

Rockwall County and the Texas Department of Transportation (TxDOT) are partnering on the engineering design and construction of FM 552 from SH 205 to SH 66. The existing roadway is a two-lane asphalt roadway that will be expanded to a four-lane divided concrete reinforced roadway. The roadway will be designed and constructed to TxDOT standards including the drainage improvements.

On November 6, 2017, City Council approved the preliminary alignment and median openings for FM 552. Since this time, the TxDOT design engineers have revised the median openings from State Highway 205 east to John King to account for the Whispering Oaks residents and Williams Middle School. These revisions were due to comments received during TxDOT Public Hearing that was held at J.W. Williams Middle School on May 30, 2019. The attached exhibit shows the revised median openings.

Staff requests City Council please review the revised median openings and provide staff feedback.



If you have any questions, please advise.

MEMORANDUM

TO: **Honorable Mayor and City Council Members**

FROM: **Kristy Cole, City Secretary / Assistant to the City Manager**

DATE: **November 1, 2019**

SUBJECT: **Boards & Commissions (re)Appointments**

Council is asked to consider the following vacancies, terms of which expired back in August. The Council liaison(s) assigned to each board is listed next to the board title.

Airport Advisory Board (Pruitt, Fowler and Macalik)

- Kellie Roby resigned - *VACANCY TO BE FILLED*

Historic Preservation Advisory Board (Trowbridge)

- Daniel Nichols does not wish to be reappointed - *VACANCY TO BE FILLED*

Park Board (Johannesen)

- Fran Webb does NOT wish to be reappointed – *VACANCY TO BE FILLED*

The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Mary Smith, Assistant City Manager**

DATE: **November 1, 2019**

SUBJECT: **FY 2019 Budget Report**

The following analysis is offered for the fiscal year ended September 30, 2019 budget report. The budget is established in broad categories with line item estimates. In each category actual expenses as a whole should be considered rather than at the line item level.

Please keep in mind the figures in the accompanying report are not final. Staff will continue to accrue expenses for the year ended September 30, until at least late- November as part of preparing for Audit. Some invoices will come in during this period for services rendered prior to September 30.

General Fund Revenues

Total revenues for the year exceeded amended budget projections and should allow the fund balance to be increased by about 8 days.

- Sales tax increased by 3.1% for the month of September (July sales) as compared to the prior year, same month. Overall for the year, sales tax increased 7.14% over the prior fiscal year's collections.

General Fund Expenditures

All individual departments and divisions are within their appropriated budgets as amended during the budget process. We have accrued a large number of invoices as is typical for a year's end and know that we have numerous other expenses such as electricity, water, paving repairs, and other routine expenses incurred late in September and for which invoices are outstanding. With that said we should increase the General fund reserves by at least $900,000 or 9.25 days and likely more.

Water / Sewer Revenues

- Water sales – for the fiscal year sales were sales were down when compared to the prior year due in large part to the very wet spring and early summer.

Water / Sewer Expenditures

- Water Operations – we have received our rebate for using less than our annual take or pay amount and it has been netted against water purchases in the water operations budget.

- Sewer Operations – we just received the credit memos from NTMWD for the various sewer services they provide us. The credits are just over $800,000 and will be applied against the corresponding expense in the budget.

AGENDA

ROCKWALL CITY COUNCIL SPECIAL MEETING

Friday, November 8, 2019 - 3:00 PM

City Hall Council Chambers - 385 S. Goliad St., Rockwall, TX 75087

I. **CALL PUBLIC MEETING TO ORDER**

II. **HOLD A PUBLIC HEARING TO DISCUSS AND CONSIDER APPROVAL OF AN ORDINANCE IMPOSING A MORATORIUM ON ACCEPTING AND REVIEWING SUBDIVISION PLATS FOR COMMERCIAL AND RESIDENTIAL PROPERTY SITUATED WITHIN THE CITY'S EXTRATERRITORIAL JURISDICTION (ETJ), AND TAKE ANY ACTION NECESSARY. (2ND READING)**

III. **ADJOURNMENT**

This facility is wheelchair accessible and accessible parking spaces are available. Request for accommodations or interpretive services must be made 48 hours prior to this meeting. Please contact the City Secretary's Office at (972) 771-7700 or FAX (972) 771-7727 for further information.

The City of Rockwall City Council reserves the right to adjourn into executive session at any time to discuss any of the matters listed on the agenda above, as authorized by Texas Government Code § 551.071 (Consultation with Attorney) § 551.072 (Deliberations about Real Property) § 551.074 (Personnel Matters) and § 551.087 (Economic Development)

I, Kristy Cole, City Secretary for the City of Rockwall, Texas, do hereby certify that this Agenda was posted at City Hall, in a place readily accessible to the general public at all times, on the 5th day of November, 2019 at 2:00 p.m. and remained so posted for at least 72 continuous hours preceding the scheduled time of said meeting.

_____ _____

Kristy Cole, City Secretary
or Margaret Delaney, Asst. to the City Sect.

Date Removed

CITY OF ROCKWALL, TEXAS

ORDINANCE NO. 19-44

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ENACTING A TEMPORARY MORATORIUM STAYING THE ACCEPTANCE AND PROCESSING OF SUBDIVISION PLAT APPLICATIONS IN THE CITY OF ROCKWALL'S EXTRATERRITORIAL JURISDICTION; PROVIDING FOR FINDINGS OF FACT; PROVIDING FOR DEFINITIONS; PROVDING FOR APPLICABILITY, PURPOSE, ENACTMENT, DURATION, EXTENSION, EXCEPTIONS AND EXEMPTIONS, DETERMINATION, AND APPEALS; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR REMEDIES; PROVIDING FOR CONFLICTS; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, in conformance with Chapter 242, *Authority of Municipality and County to Regulate Subdivisions In and Outside Municipality's Extraterritorial Jurisdiction*, of the Texas Local Government Code the City of Rockwall has entered into an agreement (the *Interlocal Agreement*) with Rockwall County for the processing and review of subdivision plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ); and

WHEREAS, *Exhibit 'A'*, *Unified Regulations for Review of Plats in ETJ of City of Rockwall*, of the *Interlocal Agreement* provides the review criteria for subdivision plats in the Extraterritorial Jurisdiction (ETJ); and

WHEREAS, in accordance with the *Terms of Agreement* of the *Interlocal Agreement*, Rockwall County notified the City of Rockwall in writing on October 23, 2019 requesting to make changes to *Exhibit 'A'* of the *Interlocal Agreement* for the purpose of addressing changes in the *Subdivision Regulations* of Rockwall County; and

WHEREAS, the City of Rockwall finds that subdivision plats are a necessary mechanism to ensure that proper public facilities, infrastructure, drainage, and fire protection can be provided to support future development within the City's Extraterritorial Jurisdiction (ETJ), and to protect the health, safety, natural environment, quality of life, and general welfare of Rockwall County residents; and

WHEREAS, the City of Rockwall finds that the issues identified by Rockwall County contained in the *Interlocal Agreement* leave the City without sufficient review criteria to effectively review subdivision plats for property in the City's Extraterritorial Jurisdiction (ETJ), and that the agreement no longer adequately addresses the subdivision of land and the provision of adequate public facilities needed by citizens of Rockwall County; and

WHEREAS, in order for the City of Rockwall and Rockwall County to have adequate and reasonable time to review, evaluate, and revise and approve the *Interlocal Agreement*, and to consider the impact of the review criteria for subdivision plats -- *contained in Exhibit 'A' of the agreement* -- on the provision of adequate public facilities, infrastructure, drainage, and fire protection for future developments within the City's Extraterritorial Jurisdiction (ETJ), the City intends on imposing a temporary moratorium lasting for a period of 90-days for commercial property and 120-days for residential property, during which no applications for subdivision plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ) will be accepted; and

WHEREAS, the purpose of prohibiting subdivision plat applications for commercial and residential property in the City's Extraterritorial Jurisdiction (ETJ) during this temporary moratorium is to preserve the *status quo*, facilitate thoughtful and consistent planning, avoid exploitation of the delays inherent in the municipal legislative process, and prevent applications from undermining the effectiveness of the revised review criteria by submitting a subdivision plat to avoid the application of new -- *and possibly more restrictive -- Interlocal Agreement*.

WHEREAS, in recognition of the importance of subdivision plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ) to property owners in this area, the City desires to implement this moratorium for a stated and fixed time period, and to include an exception and exemption clause -- *in accordance with Subchapter E of Chapter 212 of the Texas Local Government Code* -- to facilitate subdivision plat approval in cases of necessity and undue hardship; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the City Council of the City of Rockwall, in compliance with the laws of the State of Texas have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all persons interested in and situated in the affected area and in the vicinity thereof, the City Council in the exercise of its legislative discretion has concluded that a moratorium on residential and commercial development for property in the City's Extraterritorial Jurisdiction (ETJ) is necessary and in the interest of good governance, and ultimately in the best interest of the City of Rockwall;

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

SECTION 1. ***Findings of Fact*.** The foregoing recitals are incorporated into this ordinance by reference as legislative findings of fact as if expressly set forth herein.

SECTION 2. ***Definitions.*** As used in this ordinance, the following terms are defined. Any term appearing in this ordinance that is not specifically defined below shall have the meanings provided in the Municipal Code of Ordinances for the City of Rockwall, or if not defined in this document then the common meaning of the word shall apply.

(1) *Commercial Property.* Commercial property is defined as any property that is being platted for the purpose of authorizing any land use other than single-family or agricultural land uses (*e.g. multi-family, industrial, commercial, etc.*).

(2) *Proper Public Facilities.* Unless otherwise indicated in this ordinance, proper public facilities shall be defined as meaning water, wastewater or sewer, drainage facilities, street improvements, and fire and police protection.

(3) *Residential Property.* Residential property is defined as any property that is being platted for the purpose of authorizing single-family and agricultural land uses.

SECTION 3. ***Applicability.*** The City of Rockwall hereby enacts this ordinance in order to impose a temporary moratorium on the acceptance and processing of subdivision plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ).

SECTION 4. ***Purpose.*** This temporary moratorium is being enacted to allow the City of Rockwall and Rockwall County to evaluate the *Interlocal Agreement* and to update the review criteria for subdivision plats contained in *Exhibit 'A'* of the agreement.

SECTION 5. ***Enactment.*** The City of Rockwall hereby enacts this ordinance implementing a temporary moratorium on the City of Rockwall acceptance, review, and approval of subdivision plats in the City of Rockwall's Extraterritorial Jurisdiction (ETJ).

SECTION 6. ***Duration.*** The initial duration of this temporary moratorium shall be for a period not to exceed 90-days for commercial properties and not to exceed 120-days for residential properties after the approval and adoption of this ordinance, or the repeal of this ordinance by the City Council of the City of Rockwall, whichever occurs first.

SECTION 7. ***Exceptions and Exemptions.*** The following projects shall be considered for exceptions and exemptions from the moratorium:

(1) Exceptions.

(A) *No Impact Projects.* The temporary moratorium implemented by this ordinance does not apply to subdivision plat applications proposing to assemble or subdivide residential property into two (2) or less lots where each lot is a minimum of 1½-acres gross area and has a minimum of 150-feet of frontage on a public right-of-way.

(B) *Ongoing Projects.* The temporary moratorium implemented by this ordinance does not apply to any commercial or residential property that has an active subdivision plat application with the City of Rockwall or Rockwall County that has not expired in accordance with the rules and requirements of Rockwall County, the City of Rockwall, or the Texas Local Government Code.

(C) *Vested Projects.* The temporary moratorium implemented by this ordinance does not apply to any commercial or residential property that are vested under Chapter 245, *Issuance of Local Permits*, of the Texas Local Government Code. Property owners asserting vested rights shall submit an application claiming an exception to this temporary moratorium to the Planning and Zoning Department of the City of Rockwall for review in accordance with the requirements of the current *Interlocal Agreement*.

(2) *Exemptions.* Any property owner who does not assert rights under Chapter 245, *Issuance of Local Permits*, of the Texas Local Government Code, but who seeks authorization to proceed with a subdivision plat outside of the exceptions listed in this ordinance and during the temporary moratorium can request the following alternative forms of approval:

(A) *212 Development Agreement.* Property owners with a negotiated approval granted by the City Council that provides for construction standards, platting and development rules pursuant to Subchapter G, *Agreement Governing Certain Land in a Municipality's Extraterritorial Jurisdiction*, Chapter 212, *Regulations of Subdivisions*, of the Texas Local Government Code may apply for an exemption from the temporary moratorium.

SECTION 8. ***Determination and Appeals.***

(1) *Determinations.* The Director of Planning and Zoning or his/her designee shall make all initial determinations regarding the status of all projects seeking to submit a subdivision plat application during this temporary moratorium concerning the status of a project as provided for above in the *Exceptions and Exemptions* section of this ordinance.

(2) *Appeals.* Property owners seeking to challenge a determination made by the Director of Planning and Zoning may appeal that initial determination to the City Manager. Secondary determinations of the City Manager may be appealed to the City Council. The City Council's decision shall be final.

(3) Exemptions. The decision to approve an *Exemption* as provided for above in the *Exceptions and Exemptions* section of this ordinance shall rest solely with the City Council.

SECTION 9. ***Ordinances Cumulative.*** All ordinances of the City of Rockwall in conflict with the provisions of this ordinance be, and the same are hereby superseded to the extent of that conflict.

SECTION 10. ***Severability.*** If any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Subdivision Regulations of the City of Rockwall, Texas, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable.

SECTION 11. ***Effective Date.*** This ordinance shall take effect immediately.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 8TH DAY OF NOVEMBER, 2019.

Jim Pruitt, Mayor

ATTEST:

Kristy Cole, City Secretary

MINUTES

ROCKWALL CITY COUNCIL REGULAR MEETING
Monday, November 04, 2019 - 5:00 PM
City Hall Council Chambers - 385 S. Goliad St., Rockwall, TX 75087

I. CALL PUBLIC MEETING TO ORDER

Mayor Jim Pruitt called the meeting to order at 5:05 p.m. Present were Mayor Jim Pruitt and Council Members Patrick Trowbridge, John Hohenshelt, Kevin Fowler, Bennie Daniels and Trace Johannesen. Also present were City Manager Rick Crowley, Assistant City Managers Mary Smith and Joey Boyd, and City Attorney Frank Garza. Mayor Pro Tem Macalik arrived and joined the meeting at 5:08 p.m.

Mayor Pruitt read the below listed discussion items into the record before recessing the public meeting to go into Executive Session at 5:06 p.m.

II. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding lease of real property in the vicinity of the downtown, pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
2. Discussion regarding employee personnel policies pursuant to Section §551.071 (Consultation with Attorney)
3. Discussion regarding reappointment(s) to the Rockwall Economic Development Corporation (REDC) Board pursuant to Section 551.074 (Personnel Matters)
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

III. ADJOURN EXECUTIVE SESSION

Council adjourned from Executive Session at 5:47 p.m.

IV. RECONVENE PUBLIC MEETING (6:00 P.M.)

Mayor Pruitt reconvened the public meeting at 6:00 p.m. with all council members being present.

V. INVOCATION AND PLEDGE OF ALLEGIANCE – COUNCILMEMBER TROWBRIDGE

Councilman Trowbridge delivered the invocation and led the Pledge of Allegiance.

VI. OPEN FORUM

Mayor Pruitt explained how Open Forum is conducted, asking if anyone would like to come forth and speak at this time.

Del Wendt
1841 Kelly Lane
Rockwall, TX 75087

Mr. Wendt thanked Councilmember Trowbridge for shining a light on the meter reading topic that results in longer cycles and larger bills a couple of times per year. He encouraged the City to address this issue to rectify it. He thanked the Council for lowering the tax rate, sharing that the city portion of his tax bill did decrease for about $10. Regarding impact fees, Mr. Wendt thanked Trowbridge for his comments at the last city council meeting. He feels the taxpayer was left out of the discussion at the last meeting. He pointed out that if impact fees are not paid for by developers, then the taxpayer has to pick up the cost. He shared the belief that, even if the council decides to go higher than what was previously discussed, it will not be heavily felt by / will not heavily impact the developer. He wonders what the impact of the Council's decision will ultimately be on tax payers. He urged Council to revisit this, bearing in mind the impact on the taxpayer.

Janice Morchower
144 Westwood
Rockwall, TX 75032

Ms. Morchower spoke about the condos that are being built at The Harbor, which she pointed out are essentially apartments. She shared that she had a phone conversation with Mayor Pruitt a while back, and she is wondering if there are any updates regarding this forthcoming development. She wonders how this transitioned from individually deeded condominiums to 'apartments.' She also spoke briefly on impact fees, sharing that she supports impact fees and believes they should be higher on developers. She does not believe that the taxpayers should have to pay for new development. Mrs. Morchower spoke briefly about a building moratorium that will be on the agenda this evening. She understands that this will be a short moratorium and it will be in the ETJ. She believes a longer moratorium is ideal in order to allow time for infrastructure development to catch up with growth. She is specifically concerned about existing and worsening traffic congestion. She suggested that a couple of traffic lights be evaluated for their timing; however, the mayor pointed out that both signal lights she has pointed out are TXDOT owned and operated.

There being no one else wishing to come forth and speak, Mayor Pruitt then closed Open Forum.

VII. TAKE ANY ACTION AS A RESULT OF EXECUTIVE SESSION

Mayor Pro Tem Macalik moved to approve the parking lease for police vehicles in the downtown area. Mayor Pruitt seconded the motion, which passed by a vote of 7 ayes to 0 nays.

VIII. CONSENT AGENDA

1. Consider approval of the minutes from the October 21, 2019 regular city council meeting, and take any action necessary.
2. **Z2019-021** - Consider a request by Pat Atkins of KPA Consulting, Inc. on behalf of the owners Gwen Reed, Saddle Star South Holdings, LLC, and CDT Rockwall/2017, LLC for the approval of an **ordinance** for a zoning amendment to Planned Development District 79 (PD-79) [Ordinance No. 16-39] for the purpose of amending the development standards and concept plan on a 70.408-acre tract of land identified as Tracts 1, 1-03, 1-5 & 2-03 of the P. B. Harrison Survey, Abstract No.

97, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 79 (PD-79) for Single-Family 8.4 (SF-8.4) District land uses, situated within the SH-205 By-Pass Overlay (SH-205 BY-OV) District, located on the north side of John King Boulevard south of Featherstone Drive, and take any action necessary **(2nd Reading).**

3. **Z2019-024** - Consider a request by Adam Buczek of Stone Creek Balance, LTD for the approval of an **ordinance** for a zoning amendment to Planned Development District 70 (PD-70) for the purpose of changing the number of hard-edged retention ponds required for the residential subdivision being a ~336.00-acre tract of land identified as the Stone Creek Subdivision and being situated within the W. T. Deweese Survey, Abstract No. 71 and the S. King Survey, Abstract No 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for Single-Family 10 (SF-10) District land uses, situated within the North SH-205 Overlay (N. SH-205 OV) and SH-205 By-Pass Overlay (SH-205 BY-OV) Districts, generally located at the southeast corner of the intersection of FM-552 and SH-205 [N. Goliad Street], and take any action necessary **(2nd Reading).**
4. Consider approval of an **ordinance** amending the Rockwall Code of Ordinances in Chapter 38. Subdivisions; Article I. In General; Sec. 38-23 Standards for Design of Developments within Subdivisions Adopted to reflect updates to these standards, and take any action necessary. **[2nd reading]**
5. **P2019-039** - Consider a request by Steven Homeyer of Homeyer Engineering, Inc. on behalf of Julia McKinney for the approval of a replat for Lot 8, Block A, Ellis Centre Phase 2 Addition being a 1.21-acre parcel of land identified as Lot 4, Block A, Ellis Centre Phase 2 Addition, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, located west of the intersection of Alpha Drive and Sigma Court, and take any action necessary.
6. **P2019-041** - Consider a request by David Raines for the approval of a replat for Lot 35, Block A, Chandler's Landing, Phase 18, Section 2 being a 0.19-acre tract of land identified as Lot 12, Block A, Chandler's Landing, Phase 18, Section 2, City of Rockwall, Rockwall County, Texas, zoned Planned Development 8 (PD-8) District for single family land uses, addressed as 5808 Constellation Circle, and take any action necessary.
7. Consider approval of a resolution terminating American United Life Insurance Company of Indianapolis, Indiana, a OneAmerica Company, as the city's 457(b) plan administrator's agent, and instead appointing International City Management Association Retirement Corporation (ICMA-RC) as investment advisory with respect to the City of Rockwall's 457(b) Plan, and take any action necessary.
8. Consider authorizing the City Manager to execute a professional engineering services contract for Birkhoff, Hendricks & Carter, L.L.P. to perform the engineering design services for the Squabble Creek Lift Station Wastewater Sludge Grinders project in an amount not to exceed $34,790.00, to be funded by the Wastewater Operations Budget, and take any action necessary.
9. Consider awarding a bid to WPI and authorizing the City Manager to execute a contract for on site fixed generators at three lift stations totaling $229,380 to be funded out of the Water and Sewer Fund, Sewer Operations Budget, and take any action necessary.
10. Consider approval of a purchase from the Debt Service fund for two (fire truck) pumpers in lieu of issuing debt, in the amount of $1,250,633, and take any action necessary.

Councilmember Johannesen moved to approve the entire Consent Agenda (#s 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10). Councilmember Hohenshelt seconded the motion. The ordinances were read as follows:

CITY OF ROCKWALL
ORDINANCE NO. 19-40

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, SO AS TO FURTHER AMEND PLANNED DEVELOPMENT DISTRICT 79 (PD-79) [*ORDINANCE NO. 16-39*] FOR THE PURPOSE OF AMENDING THE DEVELOPMENT STANDARDS AND CONCEPT PLAN ON A 70.408-ACRE TRACT OF LAND, ZONED PLANNED DEVELOPMENT DISTRICT 79 (PD-79) FOR SINGLE FAMILY 8.4 (SF-8.4) DISTRICT LAND USES, BEING IDENTIFIED AS TRACTS 1, 1-03, 1-5 & 2-03 OF THE P. B. HARRISON SURVEY, ABSTRACT NO. 97, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

CITY OF ROCKWALL
ORDINANCE NO. 19-41

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING PLANNED DEVELOPMENT DISTRICT 70 (PD-70) AND THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING THE DEVELOPMENT STANDARDS APPROVED WITH ORDINANCE NO. 09-44, BEING A 395.075-ACRE TRACT OF LAND SITUATED IN THE W. T. DEWEESE SURVEY, ABSTRACT NO. 71 AND THE S. KING SURVEY, ABSTRACT NO. 131, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

CITY OF ROCKWALL
ORDINANCE NO. 19-42

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE ROCKWALL CODE OF ORDINANCES IN CHAPTER 38. SUBDIVISIONS; ARTICLE I. IN GENERAL; SECTION 38-23 STANDARDS FOR DESIGN OF DEVELOPMENTS WITHIN SUBDIVISIONS ADOPTED; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

Following brief comments, the motion passed by a vote of 7 ayes to 0 nays.

IX. APPOINTMENT ITEMS

1. Appointment with Melody Mayer of Renew Fence & Construction to hear request and discuss and consider the possibility of changing the city's regulations pertaining to residential retaining walls, including material and height restrictions, and take any action necessary.

Mayor Pruitt indicated that this item will be postponed until the next, regular city council meeting, as Ms. Mayer was unable to attend the meeting this evening due to a death in her family.

2. Appointment with Brad Helmer of Heritage Christian Academy to provide an update on the progress of their capital campaign in accordance with the requirements of Specific Use Permit No. S-200 (Ordinance No. 19-02).

Brad Helmer
2917 Chuckwagon Drive
Rockwall, TX

Mr. Helmer came forth and indicated that his fundraising is currently at about 22%, and they are continuing to work on the fundraising efforts. He thanked the Council for working well with him on this SUP. Mayor Pruitt shared that he looks forward to seeing Mr. Helmer for an additional update on this in February. Council took no action pertaining to this agenda item.

3. Appointment with Scott Mommer of Lars, Anderson & Associates, Inc. on behalf of the Home Depot to discuss amending the Unified Development Code (UDC) to allow the "Rental, Sales, and Service of Heavy Machinery and Equipment" land use in the Commercial (C) District by a Specific Use Permit (SUP), and take any action necessary.

Jason Pyka
12225 Greenville Ave., Ste. 1000
Dallas, TX 75243

Mr. Pyka shared that he is appearing this evening on behalf of Mr. Mommer. Discussion took place pertaining to how much heavy equipment may be visible. Mr. Miller shared that the applicant will be required to build a masonry wall that is one foot higher than the equipment that is being screened. The applicant may request an alternate screening, which will consist of trees, shrubs and a wrought iron fence around it. This will be by the building expansion that will be at one end of the building and will be near 10 parking spaces.

The city attorney clarified that Council is deciding this evening whether or not to allow this type of use in a commercial district. If the council does decide to allow this use, then Home Depot would have to apply for an SUP thereafter and go through the standard SUP approval process.

Following the discussion, Councilmember Daniels moved to approve moving forward with amending the UDC to allow this land use. Mayor Pro Tem Macalik seconded the motion, which passed by a vote of 7 ayes to 0 nays.

X. PUBLIC HEARING ITEMS

1. **Z2019-022** - Hold a public hearing to discuss and consider a request by Marty Wright for the approval of an **ordinance** for a Specific Use Permit (SUP) allowing an accessory building on a one (1) acre tract of land identified as Lot 10, Block B, Saddlebrook Estates #2 Addition, City of Rockwall, Rockwall County, Texas, zoned Single-Family 16 (SF-16) District, addressed as 2340 Saddlebrook Lane, and take any action necessary **(1st Reading).**

Planning Director Ryan Miller provided background information concerning this agenda item. The applicant is requesting approval of a Specific Use Permit (SUP) for a detached garage that exceeds the maximum allowable size for properties located within a Single-Family 16 (SF-16) District. Currently situated on the subject property, there is a 3,397 SF brick single-family home and a 216 SF accessory building that is clad with wood. The proposed building will be situated behind the main structure, will be 13' 8" in height, and will be constructed of metal. The building will include a 24' x 40' (i.e. 960 SF) detached garage and a 6' x 40' (i.e. 240 SF) porch that will be on the front of the building. The total footprint of the building will be 1,200 SF (i.e. 35% of the size of the home). The porch will incorporate windows with shutters, double walk-in doors, and wooden posts. The applicant has stated that the purpose of the porch is to blend the building with the neighborhood by incorporating architectural elements that are typically seen on a single-family home. The building will have two (2) roll-up doors located on each of the side façades (i.e. north and south façades) and the applicant has stated that detached garage will be utilized to store several antique vehicles. The existing 12' x 18' (i.e. 216 SF) accessory building will be relocated and will be situated adjacent to the northern side façade of the proposed detached garage. The applicant has provided a site plan and proposed building elevations to be reviewed by the Planning and Zoning Commission and the City Council. Thirty notices were sent out to adjacent property owners. Four emails and one notice in favor were received back, and 1 was received back in opposition. The Planning & Zoning Commission recommended denial of the applicant's request by a vote of 7-0.

Mayor Pruitt opened up the public hearing, asking if anyone would like to come forth and speak.

Greg Givens
2308 Saddlebrook Lane
Rockwall, TX

Mr. Givens came forth and spoke in favor of approval of this SUP.

Steve Griffin
2348 Saddlebrook Lane
Rockwall, TX

Mr. Griffin spoke in favor of approval of this SUP.

Mr. Bob Wacker
309 Featherstone
Rockwall, TX

Mr. Wacker came forth and generally spoke in favor of this item.

There being no one else wishing to come forth and speak, Mayor Pruitt then closed the public hearing.

Councilmember Fowler moved to approve Z2019-022. Mayor Pro Tem Macalik seconded the motion. The ordinance was read as follows:

CITY OF ROCKWALL

ORDINANCE NO. 19-XX
SPECIFIC USE PERMIT NO. S-XXX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE (UDC) [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, ROCKWALL COUNTY TEXAS, AS PREVIOUSLY AMENDED, SO AS TO GRANT A SPECIFIC USE PERMIT (SUP) TO ALLOW A *DETACHED GARAGE BUILDING* THAT EXCEEDS THE MAXIMUM ALLOWABLE SIZE ON A ONE (1)-ACRE PARCEL OF LAND, IDENTIFIED AS LOT 10, BLOCK B, SADDLEBROOK ESTATES #2 ADDITION, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS; AND MORE SPECIFICALLY DESCRIBED IN *EXHIBIT 'A'* OF THIS ORDINANCE; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

The motion failed by a vote of 4 ayes with 3 against because it required a ¾ majority vote of council in order to be approved (Trowbridge, Hohenshelt and Pruitt voted against).

2. Hold a public hearing to discuss and consider imposing a moratorium on accepting and reviewing subdivision plats for commercial and residential property situated within the City's Extraterritorial Jurisdiction (ETJ), and take any action necessary.

Planning Director Ryan Miller provided background information pertaining to this agenda item.

Mayor Pruitt opened the public hearing, asking if anyone would like to come forth and speak at this time.

Janice Morchower
144 Westwood
Rockwall, TX 75032

Ms. Morchower came forth and said she is strongly in favor of this moratorium.

There being no one else wishing to come forth and speak, Mayor Pruitt then closed the public hearing.

Councilmember Trowbridge moved to approve the moratorium. Councilmember Fowler seconded the motion. Following brief discussion, the motion passed unanimously of those present.

CITY OF ROCKWALL, TEXAS
ORDINANCE NO. 19-44

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ENACTING A TEMPORARY MORATORIUM STAYING THE ACCEPTANCE AND PROCESSING OF SUBDIVISION PLAT APPLICATIONS IN THE CITY OF ROCKWALL'S EXTRATERRITORIAL JURISDICTION; PROVIDING FOR FINDINGS OF FACT; PROVIDING FOR DEFINITIONS; PROVDING FOR

APPLICABILITY, PURPOSE, ENACTMENT, DURATION, EXTENSION, EXCEPTIONS AND EXEMPTIONS, DETERMINATION, AND APPEALS; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR REMEDIES; PROVIDING FOR CONFLICTS; AND PROVIDING FOR AN EFFECTIVE DATE.

XI. ACTION ITEMS

1. **MIS2019-001** - Discuss and consider approval of an **ordinance** adopting updated impact fees for water, wastewater, and roadway facilities by updating the land use assumptions and capital improvement plans for such facilities, establishing updated service areas for such facilities, providing definitions, providing for collection and assessment, and take any action necessary. **(2nd Reading)**

Mr. Miller provided brief comments concerning this agenda item, indicating that this did not receive a unanimous approval at the last city council meeting. Mayor Pro Tem Macalik moved to approve the ordinance for MIS2019-001. Councilmember Hohenshelt seconded the motion. Hohenshelt proceeded to provide lengthy comments pertaining to this topic, generally indicating that there may be a misnomer that if impact fees are in place and adequate, then citizens' taxes will decrease. Mayor Pruitt expressed concern about residential roadway impact fees, as he believes they will adversely impact someone who, for example, is wanting to build on his or her acre or acre-and-a-half lot.

The ordinance was read as follows:

CITY OF ROCKWALL
ORDINANCE NO. 19-43

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE MUNICIPAL CODE OF ORDINANCES OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING ARTICLE III, *IMPACT FEE REGULATIONS*, OF CHAPTER 38, *SUBDIVISIONS*, FOR THE PURPOSE OF AMENDING THE IMPACT FEES FOR WATER, WASTEWATER, AND ROADWAY FACILITIES BY UPDATING THE LAND USE ASSUMPTIONS AND CAPITAL IMPROVEMENTS PLAN FOR SAID FACILITIES; ESTABLISHING UPDATED SERVICE AREAS FOR SUCH FACILITIES; PROVIDING FOR DEFINITIONS; PROVIDING FOR COLLECTION AND ASSESSMENT; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR REMEDIES; PROVIDING FOR CONFLICTS; AND PROVIDING FOR AN EFFECTIVE DATE.

The motion passed by a vote of 4 ayes with 3 against (Trowbridge, Pruitt and Daniels).

2. Discuss and consider the revised median openings for Texas Department of Transportation (TXDOT) roadway FM 552, and take any action necessary.

City Engineer/Director of Public Works, Amy Williams, provided background information pertaining to this agenda item. Mayor Pruitt moved to approve the revised median openings. Councilman Fowler seconded the motion, which passed by a vote of 7 ayes to 0 nays.

3. Discuss and consider appointments to fill vacancies on the city's Airport Advisory Board, Historic Preservation Advisory Board, and Park Board, and take any action necessary.

Councilmember Johannesen moved to appoint Anna Dodd to the city's Park Board (to replace former member, Fran Webb). Mayor Pruitt seconded the motion, which passed by a vote of 7 ayes to 0 nays.

XII. CITY MANAGER'S REPORT, DEPARTMENTAL REPORTS AND RELATED DISCUSSIONS PERTAINING TO CURRENT CITY ACTIVITIES, UPCOMING MEETINGS, FUTURE LEGISLATIVE ACTIVITIES, AND OTHER RELATED MATTERS.

1. Departmental Reports

Building Inspection Monthly Report - September 2019
Finance Department Report - September 2019
GIS Division Monthly Report - September 2019
Harbor PD Monthly Report - September 2019
Internal Operations Department Monthly Report - September 2019
Recreation Monthly Report - September 2019
Rockwall Animal Adoption Center Monthly Report - September 2019
Rockwall Fire Department Monthly Report - September 2019
Rockwall Police Department Monthly Report - September 2019
STAR Transit Monthly Report - September 2019

2. City Manager's Report

Mr. Crowley, City Manager, shared that he would like to begin exploring possible dates with council members in order to schedule a city council / staff retreat sometime after the first of the year.

Councilmember Fowler and Fire Chief Cullins briefly discussed EMS related calls.

Mayor Pruitt shared that there will be a Veterans appreciation event at The Harbor from 1-6 PM this Saturday. Also, the City is hosting a Veterans appreciation lunch for city, county and school district employees this Thursday, and the Council is invited to attend.

XIII. EXECUTIVE SESSION

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding lease of real property in the vicinity of the downtown, pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
2. Discussion regarding employee personnel policies pursuant to Section §551.071 (Consultation with Attorney)
3. Discussion regarding reappointment(s) to the Rockwall Economic Development Corporation (REDC) Board pursuant to Section 551.074 (Personnel Matters)
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

XIV. RECONVENE PUBLIC MEETING & TAKE ANY ACTION AS RESULT OF EXECUTIVE SESSION

Councilmember Hohenshelt moved to approve reappointing the following members to the Rockwall Economic Development Corporation (REDC) board for additional two year terms (expiring Dec. 2021): Rick Carroll, Rick Johnson and Matthew Neyland. Mayor Pruitt seconded the motion, which passed by a vote of 7 ayes to 0 nays.

XV. ADJOURNMENT

Pruitt adjourned the meeting at 7:23 p.m.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 18th DAY OF NOVEMBER, 2019.

16

MINUTES

ROCKWALL CITY COUNCIL SPECIAL MEETING
Friday, November 8, 2019 - 3:00 PM
City Hall Council Chambers - 385 S. Goliad St., Rockwall, TX 75087

I. CALL PUBLIC MEETING TO ORDER (AND OPEN FORUM HELD)

Mayor Pruitt called the meeting to order at 3:02 p.m. Present were Mayor Jim Pruitt, Councilmembers Patrick Trowbridge, Kevin Fowler, Bennie Daniels and Trace Johannesen, City Manager Rick Crowley, and Assistant City Managers Joey Boyd and Mary Smith.

Mayor Pruitt indicated that an Open Forum would be held at this time, asking if anyone would like to come forth and speak.

David Booth
D.R. Horton
11655 Caddo Creek Drive
Rockwall, TX 75166

Mr. Booth came forth and spoke, indicating that he just became aware of the item being considered today. He explained that his company has a residential development project in the ETJ that has been ongoing for about the past six months. A lot of consultants are working on the project. He went on to explain that in the ETJ, a developer does full blown engineering plans and goes straight to the 'final plat' stage. He shared that at a "pre-development meeting" that was held on Oct. 24 with city staff, a moratorium was not discussed or indicated at all, even though the city's discussions concerning imposing a moratorium started the next day, on Oct. 25. Mr. Booth went on to ask for an exception for his particular project, indicating that they will build their own water / sewer lines and streets. He explained that their project will not tie into any city streets, only state owned and maintained roads. He understands the reasoning for the moratorium; however, he does not believe his project will impact the City from the standpoint of maintenance and consumption of public facilities. Therefore, he would like to be able to continue his project, but this moratorium will really disrupt the process associated with his project. He shared that his project will abide by any / all City of Rockwall standards, which are all 'above and beyond' those that are in place in the county.

There being no one else wishing to come forth and speak, Mayor Pruitt closed the "Open Forum" / public input part of the meeting.

II. HOLD A PUBLIC HEARING TO DISCUSS AND CONSIDER APPROVAL OF AN ORDINANCE IMPOSING A MORATORIUM ON ACCEPTING AND REVIEWING SUBDIVISION PLATS FOR COMMERCIAL AND RESIDENTIAL PROPERTY SITUATED WITHIN THE CITY'S EXTRATERRITORIAL JURISDICTION (ETJ), AND TAKE ANY ACTION NECESSARY. (2ND READING)

Mayor Pruitt asked staff why 1.5 acre tracts are being exempted. Mr. Miller shared that the reason for this exemption is because those typically provide onsite sewage systems, and they don't pose issues for infrastructure. Anything larger than that, however, does impact infrastructure.

Mr. Miller indicated that, if they are required to subdivide, the city would review a property that does not create more than 2 lots, that each lot is greater than 1.5 acres and that they provide onsite sewage facilities. Mayor Pruitt expressed concern, indicating he does not understand why these types of properties should be exempted out.

Councilman Johannesen asked for staff to explain what a moratorium practically means. Mr. Miller shared that this particular moratorium only applies to the submission of plans/subdivision plat applications to the City for residential properties in the ETJ. This particular moratorium will be for 120 days. However, he pointed out that the Council does have the ability to possibly remove the moratorium sooner if the City signs an updated 'interlocal agreement' with the County to spell out how development(s) in the ETJ will be handled.

Mayor Pruitt moved to approve the ordinance imposing a moratorium, expressing that no properties will be exempted from the moratorium until the County gives the city plans regarding how subdivision plats and developments will be handled in the County (within the city's ETJ) so that it is fair to everyone concerned. Councilmember Daniels seconded the motion.

The ordinance was read as follows:

CITY OF ROCKWALL, TEXAS
ORDINANCE NO. 19-44

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ENACTING A TEMPORARY MORATORIUM STAYING THE ACCEPTANCE AND PROCESSING OF SUBDIVISION PLAT APPLICATIONS IN THE CITY OF ROCKWALL'S EXTRATERRITORIAL JURISDICTION; PROVIDING FOR FINDINGS OF FACT; PROVIDING FOR DEFINITIONS; PROVDING FOR APPLICABILITY, PURPOSE, ENACTMENT, DURATION, EXTENSION, EXCEPTIONS AND EXEMPTIONS, DETERMINATION, AND APPEALS; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR REMEDIES; PROVIDING FOR CONFLICTS; AND PROVIDING FOR AN EFFECTIVE DATE.

The motion passed by a vote of 5 ayes with 2 absences (Macalik and Hohenshelt).

III. ADJOURNMENT

Mayor Pruitt adjourned the meeting at 3:13 p.m.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 18th DAY OF NOVEMBER, 2019.

CITY OF ROCKWALL

CITY COUNCIL CASE MEMO

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
DATE:	November 18, 2019
APPLICANT:	Perry Bowen
CASE NUMBER:	P2019-040; *Lots 1 & 2, Block A, Haley & Kyle Addition*

SUMMARY

Discuss and consider a request by Perry Bowen on behalf of Kyle Bryan and Haley Brook Bowen for the approval of a replat for Lots 1 & 2, Block A, Haley & Kyle Addition being a 0.97-acre parcel of land currently identified as Lot A, Block 107, B. F. Boydston Addition, City of Rockwall, Rockwall County, Texas, being zoned Single-Family 7 (SF-7) District, addressed as 501 S. Clark Street, and take any action necessary.

PLAT INFORMATION

☑ The applicant is requesting to replat one (1) lot (*i.e. Lot A, Block 107, B. F. Boydstun Addition*) into two (2) lots (*i.e. Lots 1 & 2, Block A, Haley & Kyle Addition*) for the purpose of subdividing the property in order to construct two (2) single-family homes.

☑ The subject property was annexed prior to 1959, is zoned Single-Family 7 (SF-7) District, and is addressed as 501 S. Clark Street.

☑ On November 5, 2019, the Parks and Recreation Board reviewed the proposed *replat* and made the following recommendations:

1) The developer shall pay pro-rata equipment fees for Park District No. 21 in the amount of $516.00 for Lot 2. This will need to be paid at time of final plat; and

2) The developer shall pay cash-in-lieu of land fees for Park District No. 21 in the amount of $499.00 for Lot 2 to be paid at the time of final plat.

☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat -- *conforming to the requirements for final plats as stipulated by the Subdivision Ordinance in the Municipal Code of Ordinances* -- is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.

☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Conditions of Approval* section below.

☑ With the exception of the items listed in the *Conditions of Approval* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the Municipal Code of Ordinances.

CONDITIONS OF APPROVAL

If the City Council chooses to approve the replat for *Lots 1 & 2, Block A, Haley & Kyle Addition*, staff would propose the following conditions of approval:

(1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;

(2) Any construction resulting from the approval of this plat shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION

On November 12, 2019, the Planning and Zoning Commission's motion to recommend approval of the applicant's request with staff's conditions of approval passed by a vote of 5-0 with Commissioners Fishman and Welch absent.

OWNER'S CERTIFICATE
(Public Dedication)

STATE OF TEXAS
COUNTY OF ROCKWALL

WHEREAS KYLE BRYAN and HALEY BROOKE BOWEN, BEING THE OWNERS OF A TRACT OF land in the County of Rockwall, State of Texas, said tract being described as follows:

All that certain lot, tract or parcel of land situated in the B.F. BOYDSTUN SURVEY, ABSTRACT NO. 14, City of Rockwall, Rockwall County, Texas, and being all of that 0.97 acres tract of land as described in a Warranty deed from Mario Del Bosque to Kyle Bryan and Haley Brooke Bowen, dated May 19, 2019 and being recorded in Document no. 20190000007530 of the Official Public Records of Rockwall County, Texas, and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner in the East right-of-way line of Clark Street (60' R.O.W.) at the Southwest corner of the above cited tract of land, said point also being at the Northwest corner of a 0.52 acres tract of land as described in a Contract for deed to David Lecour and Renee Lecour, dated January 15, 1999 and being recorded in Volume 1821, Page 207 of the Real Property Records of Rockwall County, Texas;

THENCE N. 01 deg. 19 min. 59 sec. W. along said right-of-way line, a distance of 150.00 feet to a 1/2" iron rod found for corner at the Northwest corner of said Bryan and Bowen tract and at the southwest corner of Lot 2, Block 1, Clark Street Homesites Addition, an Addition to the City of Rockwall, Texas, according to the plat thereof recorded in Cabinet F, Slide 41 of the Plat Records of Rockwall County, Texas;

THENCE N. 88 deg. 38 min. 00 sec. E. a distance of 283.36 feet to a 1/2" iron rod found for corner at the Northeast corner of said Bryan and Bowen tract;

THENCE S. 00 deg. 39 min. 40 sec. E. a distance of 150.04 feet to a 1/2" iron rod found for corner at the Northeast corner of said Lecour tract;

THENCE S. 88 deg. 38 min. 21 sec. W. a distance of 281.60 feet to the POINT OF BEGINNING and containing 42,375 square feet or 0.97 acres of land.

NOW, THEREFORE, KNOW ALL MEN BY THESE PRESENTS:

STATE OF TEXAS
COUNTY OF ROCKWALL

I the undersigned owner of the land shown on this plat, and designated herein as HALEY & KYLE ADDITION, LOTS 1 & 2, BLOCK A, an Addition to the City of Rockwall, Texas, and whose name is subscribed hereto, hereby dedicate to the use of the public forever all streets, alleys, parks, water courses, drains, easements and public places thereon shown on the purpose and consideration therein expressed. We further certify that all other parties who have a mortgage or lien interest in the subdivision have been notified and signed this plat.

We understand and do hereby reserve the easement strips shown on this plat for the purposes stated and for the mutual use and accommodation of all utilities desiring to use or using same.

We also understand the following;

1. No buildings shall be constructed or placed upon, over, or across the utility easements as described herein.

2. Any public utility shall have the right to remove and keep removed all or part of any buildings, fences, trees, shrubs, or other growths or improvements which in any way endanger or interfere with construction, maintenance or efficiency of th eir respective system on any of these easement strips; and any public utility shall at all times have the right of ingress or egress to, from and upon the said easement strips for purpose of construction, reconstruction, inspecting, patrolling, maint aining, and either adding to or removing all or part of their respective system without the necessity of, at any time, procuring the permission of anyone.

3. The City of Rockwall will not be responsible for any claims of any nature resulting from or occasioned by the establishment of grade of streets in the subdivision.

4. The developer and subdivision engineer shall bear total responsibility for storm drain improvements.

5. The developer shall be responsible for the necessary facilities to provide drainage patterns and drainage controls such that properties within the drainage area are not adversely affected by storm drainage from the development.

6. No house dwelling unit, or other structure shall be constructed on any lot in this addition by the owner or any other person until the developer and/or owner has complied with all requirements of the Subdivision Regulations of the City of Roc kwall regarding improvements with respect to the entire block on the street or streets on which property abuts, including the actual installation of streets with the required base and paving, curb and gutter, water and sewer, drainage structures, sto rm structures, storm sewers, and alleys, all according to the specifications of the City of Rockwall; or

Until an escrow deposit, sufficient to pay for the cost of such improvements, as determined by the city's engineer and/or city administrator, computed on a private commercial rate basis, has been made with the city secretary, accompanied by an agreement signed by the developer and/or owner, authorizing the city to make such improvements at prevailing private commercial rates, or have the same made by a contractor and pay for the same out of the escrow deposit, should the developer an d/or owner fail or refuse to install the required improvements within the time stated in such written agreement, but in no case shall the City be obligated to make such improvements itself. Such deposit may be used by the owner and/or developer as p rogress payments as the work progresses in making such improvements by making certified requisitions to the city secretary, supported by evidence of work done; or

Until the developer and/or owner files a corporate surety bond with the city secretary in a sum equal to the cost of such improvements for the designated area, guaranteeing the installation thereof within the time stated in the bond, which time shall be fixed by the city council of the City of Rockwall.

We further acknowledge that the dedications and/or exaction's made herein are proportional to the impact of the subdivision upon the public services required in order that the development will comport with the present and future growth needs of the City; We , our successors and assigns hereby waive any claim, damage, or cause of action that I may have as a result of the dedication of exaction's made herein.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: **Richard Crowley, City Manager**

FROM: **Lea Ann Ewing, Purchasing Agent**

DATE: **November 15, 2019**

SUBJECT: **Cooperative Purchasing Agreement with the City of Texarkana**

An Interlocal Purchasing Agreement for participation in a cooperative purchasing program with the City of Texarkana is attached for City Council consideration.

The interlocal agreement provides for cooperative purchasing between the Cities of Rockwall and Texarkana for goods, materials and services. By participating in this cooperative program, cities realize additional savings through economies of scale when utilizing the coop contracts. Another benefit is by piggybacking other cities' contracts we would meet all the formal bidding requirements pertaining to contract purchases and eliminate the cost of the competitive bidding process for the contracted materials and services. The interlocal agreement would remain in effect until terminated by either the City of Rockwall or Texarkana.

The City of Texarkana wishes to piggyback our police motorcycle bid.

Staff asks City Council to consider joining this purchasing cooperative by authorizing the City Manager to execute the cooperative agreement.

STATE OF TEXAS	§
	§
COUNTY OF BOWIE	§

INTERLOCAL COOPERATION AGREEMENT

This Interlocal Cooperation Agreement ("Agreement") is by and between the City of Texarkana, Texas ("Texarkana"), and the City of Rockwall, Texas ("Rockwall"), acting by and through their authorized officers.

RECITALS:

WHEREAS, this Agreement is authorized by Chapter 791 of the Texas Government Code and Subchapter F, Chapter 271, Texas Local Government Code; and

WHEREAS, Section 271.102 of the TEX. LOC. GOV'T CODE authorizes a local government to participate in a Cooperative Purchasing Program with another local government or a local cooperative organization; and

WHEREAS, a local government that purchases goods and services pursuant to a Cooperative Purchasing Program with another local government satisfies the requirement of the local government to seek competitive bids for the purchase of the goods and materials; and

WHEREAS, each party has and will on an annual basis obtain competitive bids for the purchase of goods and services; and

WHEREAS, the parties desire to enter into a cooperative purchasing program, which will allow each party to purchase goods and services under each other's competitively bid contracts pursuant to Subchapter F, Chapter 271 of the TEX. LOC. GOV'T CODE;

NOW THEREFORE, in consideration of the mutual covenants and promises contained herein, the parties agree as follows:

ARTICLE I
PURPOSE

The purpose of this Agreement is to establish a cooperative purchasing program between the parties, which will allow each party to purchase goods and services under each other's competitively bid contracts pursuant to Subchapter F, Chapter 271 of the TEX. LOC. GOV'T CODE.

ARTICLE II
TERM

The term of this Agreement shall be for a period of one (1) year commencing on the last date of execution hereof ("Effective Date"). Thereafter this Agreement shall automatically renew for successive periods of one (1) year each under the terms and conditions stated herein, unless sooner terminated as provided herein.

ARTICLE III
TERMINATION

Either party may terminate this Agreement by providing thirty (30) days prior written notice to the other party.

ARTICLE IV
PURCHASING

The City Manager or designee for each of party is authorized to act on behalf of the respective party in all matters relating to this cooperative purchasing program. Each party shall make payments to the other party or directly to the vendor under the contract made pursuant to Subchapter F, Chapter 271 of the TEX. LOC. GOV'T CODE. Each party shall be responsible for the respective vendor's compliance with provisions relating to the quality of items and terms of delivery.

ARTICLE V
MISCELLANEOUS

5.1 **Relationship of Parties**: This Agreement is not intended to create, nor should it be construed as creating, a partnership, association, joint venture or trust.

5.2 **Notice**: Any notice required or permitted to be delivered hereunder shall be deemed received when sent in the United States Mail, Postage Prepaid, Certified Mail, Return Receipt Requested, or by hand-delivery or facsimile transmission addressed to the respective party at the address set forth below the signature of the party.

5.3 **Amendment**: This Agreement may be amended by the mutual written agreement of both parties hereto.

5.4 **Severability**: In the event any one or more of the provisions contained in this Agreement shall for any reason be held to be invalid, illegal, or unenforceable in any respect, such invalidity, illegality, or unenforceability shall not affect the other provisions, and the Agreement shall be construed as if such invalid, illegal, or unenforceable provision had never been contained in this Agreement.

5.5 **Governing Law**: The validity of this Agreement and any of its terms and provisions as well as the rights and duties of the parties shall be governed by the laws of the State of Texas; and venue for any action concerning this Agreement shall be in the State District Court of Bowie County, Texas.

5.6 **Entire Agreement**: This Agreement represents the entire agreement among the parties with respect to the subject matter covered by this Agreement. There is no other collateral, oral or written agreement between the parties that in any manner relates to the subject matter of this Agreement.

5.7 **Recitals**: The recitals to this Agreement are incorporated herein.

5.8 **Counterparts**: This Agreement may be executed in any number of counterparts, each of whom shall be deemed an original and constitute one and the same instrument.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, Director of Public Works/City Engineer**

DATE: **November 14, 2019**

SUBJECT: **Proposed 2019 Sanitary Sewer Condition Assessment**

The strategic plan associated with the City's Capacity, Management, Operations, and Maintenance (CMOM) Plan presented to the EPA requires that the City must complete a condition assessment of the sewer system within ten years. To develop this strategic initiative, staff and the firm that worked on the CMOM took the information provided through the flow monitoring study conducted in the spring of 2015. The study was divided into 37 basins that were ranked depending on how much inflow and infiltration was detected in rain events.

The strategic initiative consists of a condition assessment of evaluating of the basins that scored the lowest score in the study first. In 2019-2020, the wastewater division proposes to complete condition assessment of five basins that have a total of 134,200 feet of pipe with 407 manholes. The Professional Services Contract for the sanitary sewer condition assessment cost $156,600.00. The funds are available in the water and sewer operating budget, sewer line repair and replacement. Assessments of these basins will include:

- Manhole inspections
- Smoke testing
- Dye flooding
- Cleaning (City)
- CCTV (City)
- Analysis of any defects
- Mapping
- Cost estimates for repair or rehab
- Data collecting
- Final report

Included in this document is the contract for council considerations for engineering services through Pipeline Analysis, LLC for $156,600.00, and to authorize the City Manager to execute the contract.

PIPELINE ANALYSIS LLC
1115 Main Street
Garland, Texas 75040
800-637-0164
TBPE Firm No. F-6538

CONTRACT FOR PROFESSIONAL ENGINEERING SERVICES

THIS CONTRACT made and entered into on the date last stated below between the City of Rockwall, hereinafter called "City", and Pipeline Analysis, LLC hereinafter called "ENGINEER", acting by and through James H. Forbes, Jr., P.E. (Project Manager) duly authorized to so act on behalf of the ENGINEER.

WHEREAS, the CITY desires professional engineering services in connection with the Sanitary Sewer Condition Assessment of sewer on a specified portion of the City of Rockwall, Texas, hereinafter called "the PROJECT"; and

WHEREAS, the CITY has determined that the ENGINEER has experience in the area involved in the Project and is qualified to perform the work, and the ENGINEER is willing to enter into a contract with CITY to perform the engineering services desired by CITY in connection with the PROJECT.

THE CITY AND ENGINEER AGREE AS FOLLOWS:

The CITY hereby retains the ENGINEER to perform engineering services in connection with the PROJECT described above.

1. SCOPE OF SERVICES

The scope of Professional Engineering Services to be performed by the ENGINEER shall be as follows:

1.1 Approach to Project

This project will perform various field testing and inspection of the wastewater collection system within the Study Area as defined on the map included in Exhibit A and prepare a final report that recommend system repairs and estimated costs.

1.2 Detailed Scope of Services

See Exhibit A attached.

2. CITY'S RESPONSIBILITIES

So as not to delay the services of ENGINEER, the CITY shall do the following in a timely manner:

2.1 Provide Existing Data

CITY will provide to ENGINEER at no cost those sewer maps and any applicable previous reports. Existing data delivered to the ENGINEER by the CITY remains

the property of the CITY and must be returned to the CITY after completion of the PROJECT.

2.2 Provide Access

Arrange for access to, and make all provisions for, ENGINEER to perform services under this AGREEMENT.

2.3 CITY Representative

CITY designates the following person as the project representative to act as the contact person on behalf of the CITY.

Rick Sherer
Water/ Wastewater Manager
City of Rockwall
1600 Airport Road
Rockwall, TX 75087
972.772.6337

2.4 Cleaning and CCTV Inspection

CITY desires to perform the cleaning and CCTV inspection of sanitary sewers identified by Pipeline Analysis LLC. Pipeline Analysis LLC shall prepare a listing of line segments requiring internal cleaning and CCTV inspection based on field testing and inspection within the study areas. City will perform the cleaning and CCTV of the designated gravity sewers and provide Pipeline Analysis LLC the resulting database and digital video of the inspections where possible and incorporate these findings into the final report. Should the City elect not to perform these work tasks, then Pipeline Analysis LLC will undertake the required cleaning and CCTV inspection at the unit prices presented in Exhibit A Compensation.

3. SCHEDULE

3.1 Schedule

The ENGINEER'S services shall be performed in a timely manner consistent with sound professional practices. The ENGINEER will complete the work according to the schedule presented in Exhibit A.

The time limits set forth in the schedule shall include allowances for reasonable and expected review time by the CITY and approval by authorities having jurisdiction over the PROJECT, and shall not be allowed as cause for delay or adjustments to the

schedule. Delays in the project critical path caused by review times by the CITY or a permitting agency exceeding those anticipated by the ENGINEER'S schedule are cause for adjustments in the schedule. Any adjustments made to the agreed upon schedule shall be made in writing and acceptable to both parties.

The ENGINEER shall begin work immediately upon receipt of the executed CONTRACT and/or written Notice to Proceed.

3.2 Completion of Services

ENGINEER'S services under each item of the finalized Scope of Work shall be considered complete on the date when the submissions for that item have been accepted by CITY.

3.3 Changes

If the CITY requests significant modifications or changes in the Scope of Services, general scope, extent or character of the PROJECT, the time of performance of ENGINEER'S services, the various rates of compensation and schedule shall be adjusted equitably.

3.4 Written Authorization for Additional Work

Any provision in this CONTRACT notwithstanding, it is specifically understood and agreed that the ENGINEER shall not authorize or undertake any work pursuant to this CONTRACT which would require the payment of any fee, expense or reimbursement in addition to the fees stipulated in Section 4 (Payment for Services) of this CONTRACT, without first having obtained the specific written authority to do so from CITY.

4. PAYMENT FOR SERVICES

4.1 Terms

Terms used in describing the applicable method of payment for services provided by the ENGINEER shall have the meaning indicated below:

Basic Engineering Fee:

Basic Engineering Fee shall mean those expenses incurred by the ENGINEER in prosecuting the PROJECT Scope of Services.

Reimbursable Expenses

Not applicable

Additional Services

Additional services **not** covered under the Scope of Services, will be provided to the CITY on a unit price or lump sum basis. A revised written detailed scope of services for additional services will be provided with the pricing summary. Additional services must be approved by City along with a written notice to proceed.

4.2 Basis and Amount of Compensation for Basic Services

Compensation for basic services will be as shown in Exhibit A. These services will be billed monthly based on a percentage completed and will not exceed the total presented.

4.3 Basis and Amount of Compensation for Additional Services

Not applicable. No additional services are anticipated.

4.4 Partial Payments for Services

Partial fee payments may be applied for at monthly intervals, based upon statements which reflect the percentage of work completed for the various items listed under Scope of Services. These statements shall be prepared by the ENGINEER and must be verified and approved by CITY.

4.5 Delay

If ENGINEER'S design services or service during construction of the PROJECT are delayed or suspended in whole or in part by the CITY for more than one year for reasons beyond ENGINEER'S control the various rates of compensation, including Additional Services, provided for elsewhere in this CONTRACT shall be subject to equitable adjustment.

5. TERMINATION, SUSPENSIONS OR ABANDONMENT

5.1 Termination

The CITY or the ENGINEER may terminate this CONTRACT for reasons identified elsewhere in this CONTRACT. In the event such termination becomes necessary, the party effecting termination shall so notify the other party, and termination will become effective thirty (30) calendar days after receipt of the termination notice. Irrespective of which party shall effect termination or the cause therefore, CITY shall within thirty (30) calendar days of termination remunerate ENGINEER for services rendered and costs incurred, in accordance with the ENGINEER'S prevailing fee schedule (Exhibit A).

Services shall include those rendered up to the time of termination. All plans, field survey, and other data related to the PROJECT shall become the property of CITY upon termination of the CONTRACT and shall be promptly delivered to CITY in a reasonably organized form. Should CITY subsequently contract with a new Engineer for continuation of services on the PROJECT, ENGINEER shall cooperate in providing information. No amount shall be due for lost or anticipated profits.

5.2 Suspension

If the Project is suspended by CITY for more than 30 consecutive days, the ENGINEER shall be compensated for services performed prior to notice of such suspension. When the Project is resumed, the ENGINEER'S compensation shall be equitably adjusted to provide for expenses incurred in the interruption and resumption of the ENGINEER'S services.

5.3 Abandonment

This CONTRACT may be terminated by CITY upon not less than seven (7) days written notice to the ENGINEER in the event that the Project is permanently abandoned. If the Project is abandoned by CITY for more than ninety (90) consecutive days, the ENGINEER or CITY may terminate this CONTRACT by giving written notice.

5.4 Failure to Pay

Failure of CITY to make payments to the ENGINEER in accordance with this CONTRACT shall be considered substantial nonperformance and cause for termination.

If CITY fails to make payment to ENGINEER within thirty (30) days of a statement for services properly performed, the ENGINEER may, upon fourteen (14) days written notice to CITY, suspend performance of services under this CONTRACT. Unless ENGINEER receives payment in full within fourteen (14) days of the date of the notice, the suspension shall take effect without further notice. In the event of a suspension of services under this section, the ENGINEER shall have no liability to CITY for delay or damage caused CITY because of such suspension of services.

6. GENERAL CONSIDERATIONS

6.1 Professional Standards

Services performed by the ENGINEER under this CONTRACT will be conducted in a manner consistent with that level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. The ENGINEER shall comply with the applicable laws and rules of the current "Texas Engineering Practice Act". CITY's approval, acceptance, use of or payment for all or any part of the ENGINEER'S services herein under or of the project itself shall in no

way alter the ENGINEER'S obligations or CITY'S rights thereunder.

6.2 Progress and Performance

The provisions of this CONTRACT and the compensation to ENGINEER have been agreed to in anticipation of continuous and orderly progress through the completion of the ENGINEER'S services. Time for performance shall be extended to the extent necessary for delays due to circumstances over which the ENGINEER has no control. If the ENGINEER'S services are suspended or delayed the times of performance shall be extended to the extent of such delay or suspension. A delay or suspension shall not terminate this CONTRACT unless ENGINEER elects to terminate in accordance with the provisions of Section 5 of this CONTRACT. If a delay or suspension extends for a period of greater than one year for reasons beyond the control of the ENGINEER, the fees and rates of compensation set forth in Section 4 shall be subject to re-negotiating.

6.3 CITY Control

It is understood and agreed that CITY shall have complete control of the services to be rendered, and that no work shall be done under this CONTRACT until the ENGINEER is instructed to proceed with the work.

6.4 Independent Agent

ENGINEER and CITY agreed that ENGINEER and any officer, employee or agent of ENGINEER, in the performance of this CONTRACT shall act in an independent capacity and not as an officer, agent or employee of CITY.

6.5 Compliance with Laws

ENGINEER shall comply with all Federal, State, and local laws and ordinances in the execution of all work in connection with this PROJECT.

6.6 No Additional Work Without Authorization

Any provision in the CONTRACT notwithstanding, it is specifically understood and agreed that the ENGINEER shall not authorize or undertake any work pursuant to this CONTRACT, which would require the payment of any fee, expense or reimbursement in addition to the fee stipulated in Article 4 of this CONTRACT, without having first obtained specific written authority therefore from CITY.

6.7 Assignment & Subcontracting

This CONTRACT shall not be assigned or subcontracted in whole or part without the written consent of CITY.

6.8 Indemnification

ENGINEER, its officers, agents and employees agree to indemnify, hold harmless, and defend CITY, at ENGINEER'S cost, its officers, agents, and employees from and against any and all claims or suits for injuries, damages, loss, or liability of whatever kind of character, arising out of or in connection with the performance by the ENGINEER of those services contemplated by the CONTRACT, based upon negligent acts or omissions of ENGINEER, its officers, agents, employees, consultants and subcontractors, whether or not caused solely by the ENGINEER, its officers, agents, employees, consultants or subcontractors or jointly with any other party.

ENGINEER agrees that he is solely responsible for the safety of himself and his employees in the performance of this CONTRACT and agrees to indemnify and hold harmless CITY, its officers and agents from and against any liability arising from the personal injury or death of the ENGINEER or the employees of the ENGINEER arising out of or in connection with this CONTRACT.

6.9 Insurance

ENGINEER shall secure and maintain insurance that will protect him from claims under the Worker's Compensation Act (statutory amounts).

ENGINEER shall secure and maintain Commercial General Liability Insurance that will protect him from claims for bodily injury, death or property damage which may arise from the performance of his services under this CONTRACT, written on an occurrence basis, in the following amounts:

> For engineering design contracts for more than $10,000.00, insurance in an amount not less than $500,000 per occurrence and $1,000,000 annual aggregate for bodily injury or death and property damage. ENGINEER shall maintain Comprehensive Automobile Liability Insurance covering all owned, non-owned, and hired vehicles with combined single limit coverage of $1,000,000 for bodily injury, death or property damage.

ENGINEER shall maintain, at no expense to CITY, a professional liability (errors and omissions) insurance policy placed with a company rated at least A-/VII by Best's Key Rating Guide, authorized to do business in Texas. This coverage must be maintained for at least two (2) years after the PROJECT is completed. Coverage must be written on an occurrence basis. However, at its sole discretion, the CITY may accept coverage written on a claims-made basis if the policy provides for a retroactive date equivalent to the inception date of the CONTRACT or earlier, maintained during the full term of the CONTRACT. The minimum limits of coverage shall be in the following amounts:

All policies, except Worker's Compensation and Professional Liability, shall name the CITY as additional insured. All policies shall contain a waiver of subrogation in favor of the CITY and shall require the giving of written notice to CITY at least thirty (30) days

prior to cancellation, non-renewal or material modification of any policies, evidenced by return receipt of United States Certified Mail. ENGINEER shall furnish CITY with copies of said policies or certificates evidencing such coverage.

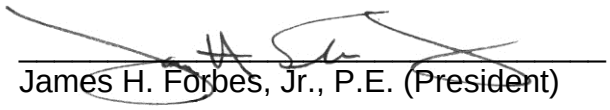
6.10 Property

All documents, including drawings, field notes, surveys, tracings, calculations, computer input and output, digital or computer files, etc., prepared by the ENGINEER pursuant to this contract shall become the property of CITY. The ENGINEER may retain copies of all documents. Any reuse of the documents shall conform to The Texas Engineering Practice Act.

6.11 Governing Law

This CONTRACT has been made under and shall be governed by the laws of the State of Texas. The parties agree that the performance and all matters related thereto shall be in Rockwall, Texas.

7. DOCUMENT EXECUTION



IN WITNESS WHEREOF, the parties have executed this CONTRACT the _____ day of _____, 2019.

James H. Forbes, Jr., P.E. (President)

Date: November 11, 2019

Exhibit A
Detailed Scope of Services

The purpose of this project is to perform a condition assessment on a portion of the City of Rockwall wastewater collection system and identity system defects that contribute to wet weather infiltration/inflow. The following summarizes the project tasks and approach to the project:

TASK 100 MOBILIZATION

Mobilize project team and coordinate startup. Establish personnel assignments and responsibilities. Inventory equipment needs and order expendable supplies. Review all relevant existing materials, previous reports, etc. developed for or by the City of Rockwall.

Deliverable:

1. Delivery of equipment and personnel
2. Work maps with delineated boundaries

To Be Provided by City:

1. Previous studies for the service area to be investigated
2. Sewer maps
3. Previous inspection data where available
4. Access for placement of equipment and personnel
5. Copies of all applicable reports, maps and historical data for the study area at no cost to ENGINEER
6. As-built drawings, sewer key maps, street plans, electronic aerial photographs if available and if requested at no cost to ENGINEER

TASK 200 MANHOLE/PIPE INSPECTION

Manholes can be a significant source of extraneous infiltration/inflow and thereby reduce system wet weather capacity. For this reason, each manhole within the study area is inspected. For the study area designated, field inspection crews will perform an inspection of manholes. The data gathered during this phase of the project will be used to prioritize manholes for rehabilitation and establish the base data necessary to accurately determine mainline sewer rehabilitation alternatives and costs. Other important deliverables resulting from this work task are the updating of the collection system map, determination of debris levels in pipes and verification of pipe sizes. This information is critical in preparing subsequent rehabilitation plans, cleaning requirements to restore capacity and updating of the system maps.

Inspection personnel will use digital cameras during the inspection of all manholes on this project. All

photographs will be included in the field inspection computer database so that a permanent electronic record can be maintained. During inspection, each of the following types of information will be obtained to establish the condition and prioritize least cost repairs:

1. Study Area Designation
2. Manhole/Cleanout ID
3. Inspection Status (buried, could not locate, no access, etc.)
4. Address and Sub-meter GPS coordinate (x,y) of manhole
5. Surface cover, grade, type of cover (paved, yard, etc.)
6. Material of construction – brick, concrete, etc.
7. Area and Internal photo of manhole
8. All incoming and outgoing pipe depths from rim to invert
9. All incoming and outgoing pipe digital photographs
10. Outgoing pipe length
11. Defects – Active, Evidence or No Infiltration/Inflow with digital photographs
12. Field corrections to collection system map

Upon completion of the manhole inspection, a condition assessment will be prepared for inclusion in the final report that will include:

1. Documentation with summary of field observations
2. List of manholes/lines requiring repair/rehabilitation
3. Digital photos
4. Documentation for preparing manhole rehabilitation quantities
5. Field updated map(s)
6. Prioritized Manhole Repair Recommendations and Cost Estimates

To Be Provided by City:

1. Current collection system map
2. Access (if requested) to manholes that are buried or could not be opened.
3. Assistance in locating assets (if requested)

Measurement of Payment:

Payment for this work task shall be a unit price for each manhole documented. Those manholes that are located, but buried or could not be opened will be noted and a list provided to the City. Manholes that could not be located using metal detectors or probes will be listed as Could Not Located (CNL). CNL manholes will not be billed. The City will provide replacement covers at no cost should a cover be broken while attempting opening.

TASK 300 SMOKE TESTING/PUBLIC AWARENESS/DATA ENTRY & ANALYSIS

Smoke testing will provide detailed information on wet weather inflow sources for the study area. In order to identify defects in the lines, a non-toxic smoke will be forced into the sewer by high capacity blowers. Data documentation includes measurements from two permanent points and will be sufficient to establish the location of each defect and determine the best repair method and priority. Color digital photographs will be taken to document each defect during the smoke test.

Forty-eight (48) hours prior to testing, door hangers will be used to notify residents. A local telephone number will be provided for those individuals with questions or for anyone requiring special assistance. Each day the fire department will be notified of the crew location since smoke may enter homes through defective plumbing.

To Be Provided by City:

1. Review and approval of Notice to Residents
2. Letter of introduction to be carried by field crews
3. Previous City smoke testing data, if any

Deliverables:

1. Defects listing and database
2. Defect location sketch
3. Digital photographs
4. Smoke Notification Flyers and Notification of Residents
5. Priority ranking of defects (both private and public sector)
6. Repair methods and estimated costs

Review Draft

City of Rockwall

For the next few days, inspection crews will conduct a physical survey of the wastewater collection system. Pipeline Analysis will perform this study, which involves opening manholes in the streets and backyard utility easements. Information gained from this study will be used to repair and improve the wastewater collection system.

One important task of the survey will be **smoke testing** of sewer lines to locate breaks and defects in the system. During this testing, white smoke will exit through vent pipes on the roofs of homes and through sewer line breaks. **The smoke is non-toxic, leaves no residue, and creates no fire hazard.** The smoke should not enter your home unless defective plumbing exists or drain traps are dry.

If you have seldom-used drains, please pour a gallon of water in the drain to fill the drain trap. This procedure will help prevent the possibility of smoke entering your living areas through those drains.

Field crews will perform testing of all sewers in the area. **At no time will field crews have to enter your business or residence.**

Your cooperation is appreciated. Should you have any additional questions concerning this study or if you desire special assistance, please phone:

City of Rockwall

PRUEBAS DE HUMO
AVISO A LOS RESIDENTES

Para los próximos días, los equipos de inspección llevará a cabo una inspección física de la red de alcantarillado. El Análisis de Pipeline Company, LLC llevará a cabo este estudio bajo contrato con la ciudad de Rockwall. El proyecto consiste en la apertura de pozos en las calles y servidumbres domésticas de servicios públicos. La información obtenida de este estudio se utilizarán para reparar y mejorar el sistema de recolección de aguas residuales.

Una tarea importante de la encuesta serán las pruebas de humo de líneas de alcantarillado para localizar roturas y defectos en el sistema. Durante esta prueba, el humo blanco saldrá a través de tubos de ventilación en los techos de las casas y por medio de saltos de línea de alcantarillado. El humo no es tóxico, no deja ningún residuo, y no crea ningún peligro de incendio. El humo no debe entrar a su casa a menos que exista o plomería defectuosa sifones están secos.

Si ha utilizado muy pocas veces-piso, lavabo, bañera o ducha desagües, por favor, vierta un litro de agua en el desagüe para llenar el sifón. Este procedimiento le ayudará a prevenir la posibilidad de humo introducción de sus áreas vivas a través de los desagües.

El personal de campo se realizan pruebas de todos los desagües de la zona. En ningún momento desplegar los equipos tiene que introducir su negocio o residencia.

Su cooperación es apreciada. Si tiene alguna pregunta adicional sobre este estudio o si desea recibir asistencia especial, por favor llame al:

PIPELINE ANALYSIS LLC
WASTEWATER COLLECTION SYSTEM ENGINEERS

Task 400 Dye Flooding

Pipeline Analysis staff will provide a listing of recommended location(s) for dye water flooding. Dye water flooding can be anticipated to assist in the locating of specific defects during CCTV inspection of specific defects. Non-toxic dye may be introduced as a powder or liquid. Cross-connections, roof drains and area drains that are suspected of being connected to the sanitary sewer may be positively identified using the dye tracer procedure. Internal CCTV inspection, while the dye flooding is taking place, will determine the exact source of the 'cross-connection'.

To Be Provided by City:

1. Cleaning and CCTV crew
2. Water for dye flooding
3. Coordination with Pipeline Analysis

To Be Provided by Pipeline Analysis:

1. Locations for dye water flooding
2. Liquid or powder dye for use by the City
3. Field Forms to be used to document results
4. Documentation of results

TASK 500 & 600 PREPARATORY CLEANING AND CCTV INSPECTION

Task 500 and 600 will be performed by City crews. Pipeline Analysis staff will prepare a detailed listing of line segments recommended for cleaning and CCTV inspection. Preparatory cleaning shall consist of hydraulic jet cleaning to facilitate the internal CCTV inspection. The City of Rockwall staff will perform this phase of the work in coordination with Pipeline Analysis.

To Be Provided by City:

1. Preparatory cleaning of CCTV pipe segments
2. CCTV inspection of recommended pipe segments
3. Provide CCTV video including:
    a. Date inspected
    b. Line segment inspected
    c. Location (Address) and Asset ID
    d. Digital video of inspection and written logs of work performed

To Be Provided by Pipeline Analysis:

1. Review video and logs not to exceed 15% of study area linear footage
2. Summary of line segments cleaned and CCTV'd
3. Prepare prioritized mainline rehabilitation plan and estimated costs
4. Incorporate Cleaning and CCTV inspection results into final report

TASK 700 ADMINISTRATION AND PROJECT MANAGEMENT

This task includes internal project administration and oversight including scheduling, budget, quality assurance and control meetings and reporting. The project schedule will be reviewed and milestones for the completion of each task will be assigned. The project schedule will be reviewed and updated monthly to ensure that all tasks are completed in a timely and organized fashion.

Management work items include:

1. Field crew supervision and project planning
2. Obtain initial maps for field use and verification
3. Prepare cleaning, CCTV and dye flooding documentation for City
4. Prepare monthly billings
5. Schedule equipment and order supplies

Major system deficiencies that are identified during the field inspections that if corrected would result in significant reduction in I/I or is deemed to be of a safety concern will be recorded and forwarded as soon as possible to City's designated project manager. Likewise, should City undertake a major repair within the study area, they will immediately notify ENGINEER to determine the impact on data analysis.

Deliverables:

1. Monthly invoice
2. Status reports
3. Project schedule and updates

To Be Provided by City:

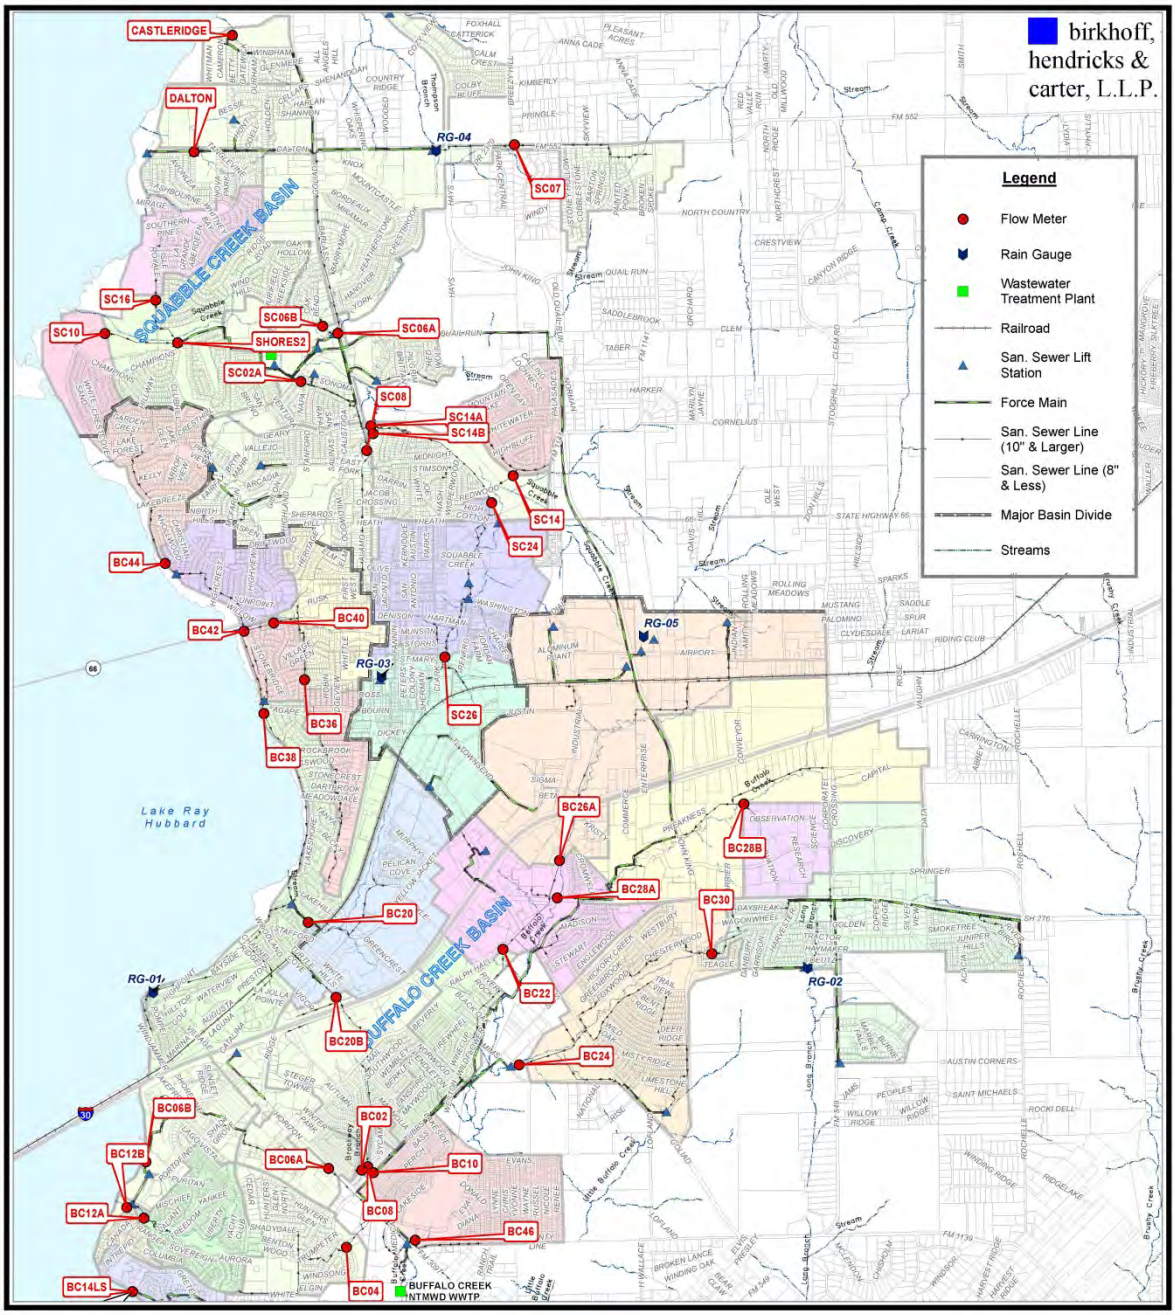
1. All reports or materials deemed necessary by ENGINEER and identified during the course of the project that is not specifically stated above will be provided at no additional cost to the ENGINEER

TASK 800 DEFECT ANALYSIS/ REHABILITATION PLAN/FINAL REPORT

This project will generate a considerable amount of data that will require proper entry and quality control. Data collection will include the following:

1. All collected defect data will be correlated between sources to address duplicate defects that were identified by different testing methods. Identify duplicate defects to ensure multiple rehabilitation methods are not recommended for the same defect.
2. Much of the baseline data required for rehabilitation decision is gathered during the normal course of field investigations. For example, "area photos" are taken of each manhole in the direction of the outgoing pipe. This photograph not only shows the location of the manhole but also provide data on the line cover and easement conditions.
3. Rehabilitation recommendations will consider the best repair for the particular asset (manhole, pipeline, etc.) being rehabilitated. A long-term least-cost solution may have an initial higher cost, but provide a higher level of service and lower operating and maintenance cost. The supporting data will be provided in electronic format.

To Be Provided by City:



- Complaint records and SSO database
- Review and comments on rehabilitation methods, cost estimates, and alternatives
- Engineer will provide electronic files of the City corrected GIS maps in ArcGIS. The City will have the final authority to accept the changes and update their master GIS map files.

Prepare and submit a Final Report that includes the following:

- Executive Summary
- Description of all tasks
- Manhole and pipe inspection summary/inventory
- Manhole defect summary
- Pipeline defect summary
- Service lateral defect summary
- Smoke test data summary
- Dye Flooding and CCTV data summary
- Recommendations and Cost Estimates for Private and Public sector repairs

Prepare and submit three (3) Final Reports and electronic database.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **November 12, 2018**

SUBJECT: **Construction Contract for St. Mary Street, Bost Street, and Sherman Street Water Line and Wastewater Line Replacement Project**

The existing water and sanitary sewer pipes in St. Mary's Street, Bost Street, and Sherman Street were installed prior to 1970 and are in need of replacement. The existing water lines in these streets consist of one-inch (1") poly lines and two-inch (2") cast iron lines that do not have any fire hydrants installed on them. The proposed replacement water lines will be constructed using a minimum of eight-inch (8") PVC pipe and have fire hydrants installed every four hundred feet (400') and at each street intersection. This proposed design will meet the current engineering standards. The eight-inch (8") water line with fire hydrants will improve water circulation, assist with the water quality, and provide better fire protection. The proposed eight-inch (8") sanitary sewer lines will be replacing existing four-inch (4") cast iron pipes. St. Mary's Street, Bost Street, and Sherman Street are asphalt roadways in need of repair and are on schedule to be rehabilitated after this project is to be complete as part of this fiscal year's Street Department's rehabilitation projects.

The City hired BW2 Engineers, Inc. to provide the engineering design and specifications for St. Mary Street, Bost Street, and Sherman Street Water Line and Wastewater Line Replacement Project. Ten (10) bids for construction were received and opened on November 5, 2019. The low bidder is Pittard Construction Company, Inc. with a Bid of $827,282.00. The engineering consultants have verified Pittard Construction Company, Inc. references and provided a letter of recommendation. Funding will be provided through the the Water / Sewer Fund.

Staff requests City Council consider approval of the St. Mary Street, Bost Street, and Sherman Street Water Line and Wastewater Line Replacement Project and authorize the City Manager to execute a contract with Pittard Construction Company, Inc. in an amount of $827,282.00, to be funded by the Water / Sewer Fund, and take any action necessary.

Re: St. Mary Street, Bost Street, and Sherman Street
Water Line and Wastewater Line Replacement Project
Letter of Recommendation

Dear Jeremy:

Bids were received by the City for the above-referenced project on Tuesday, November 5, 2019. There were ten responsive bids submitted. Several very good bids were received. Pittard Construction Company, Inc. submitted the low bid, with a bid amount of $827,282.00. The engineer's construction cost estimate, based on the plans as bid, was $1,071,779.

Pittard Construction provided some background information on their firm. The information provided included a list of equipment owned and operated by the company, some recent projects worked on by the company, and references associated with those projects. Based on the information provided, we were able to confirm that Pittard Construction has done a substantial amount of work for the cities in the area. We contacted several of the references and received positive responses from all of the references contacted.

Based on the information received from Pittard Construction, their experience working on similar projects in the area, and the positive comments received from references, it is recommended that the above-referenced project be awarded to Pittard Construction Company, Inc.

If you have any questions or need anything further, please let us know.

Sincerely,

Michael R. Burge

CITY OF ROCKWALL

CITY COUNCIL MEMORANDUM

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller, *Director of Planning and Zoning*
DATE:	November 18, 2019
SUBJECT:	MIS2019-014; *Master Water/Wastewater Plan Update*

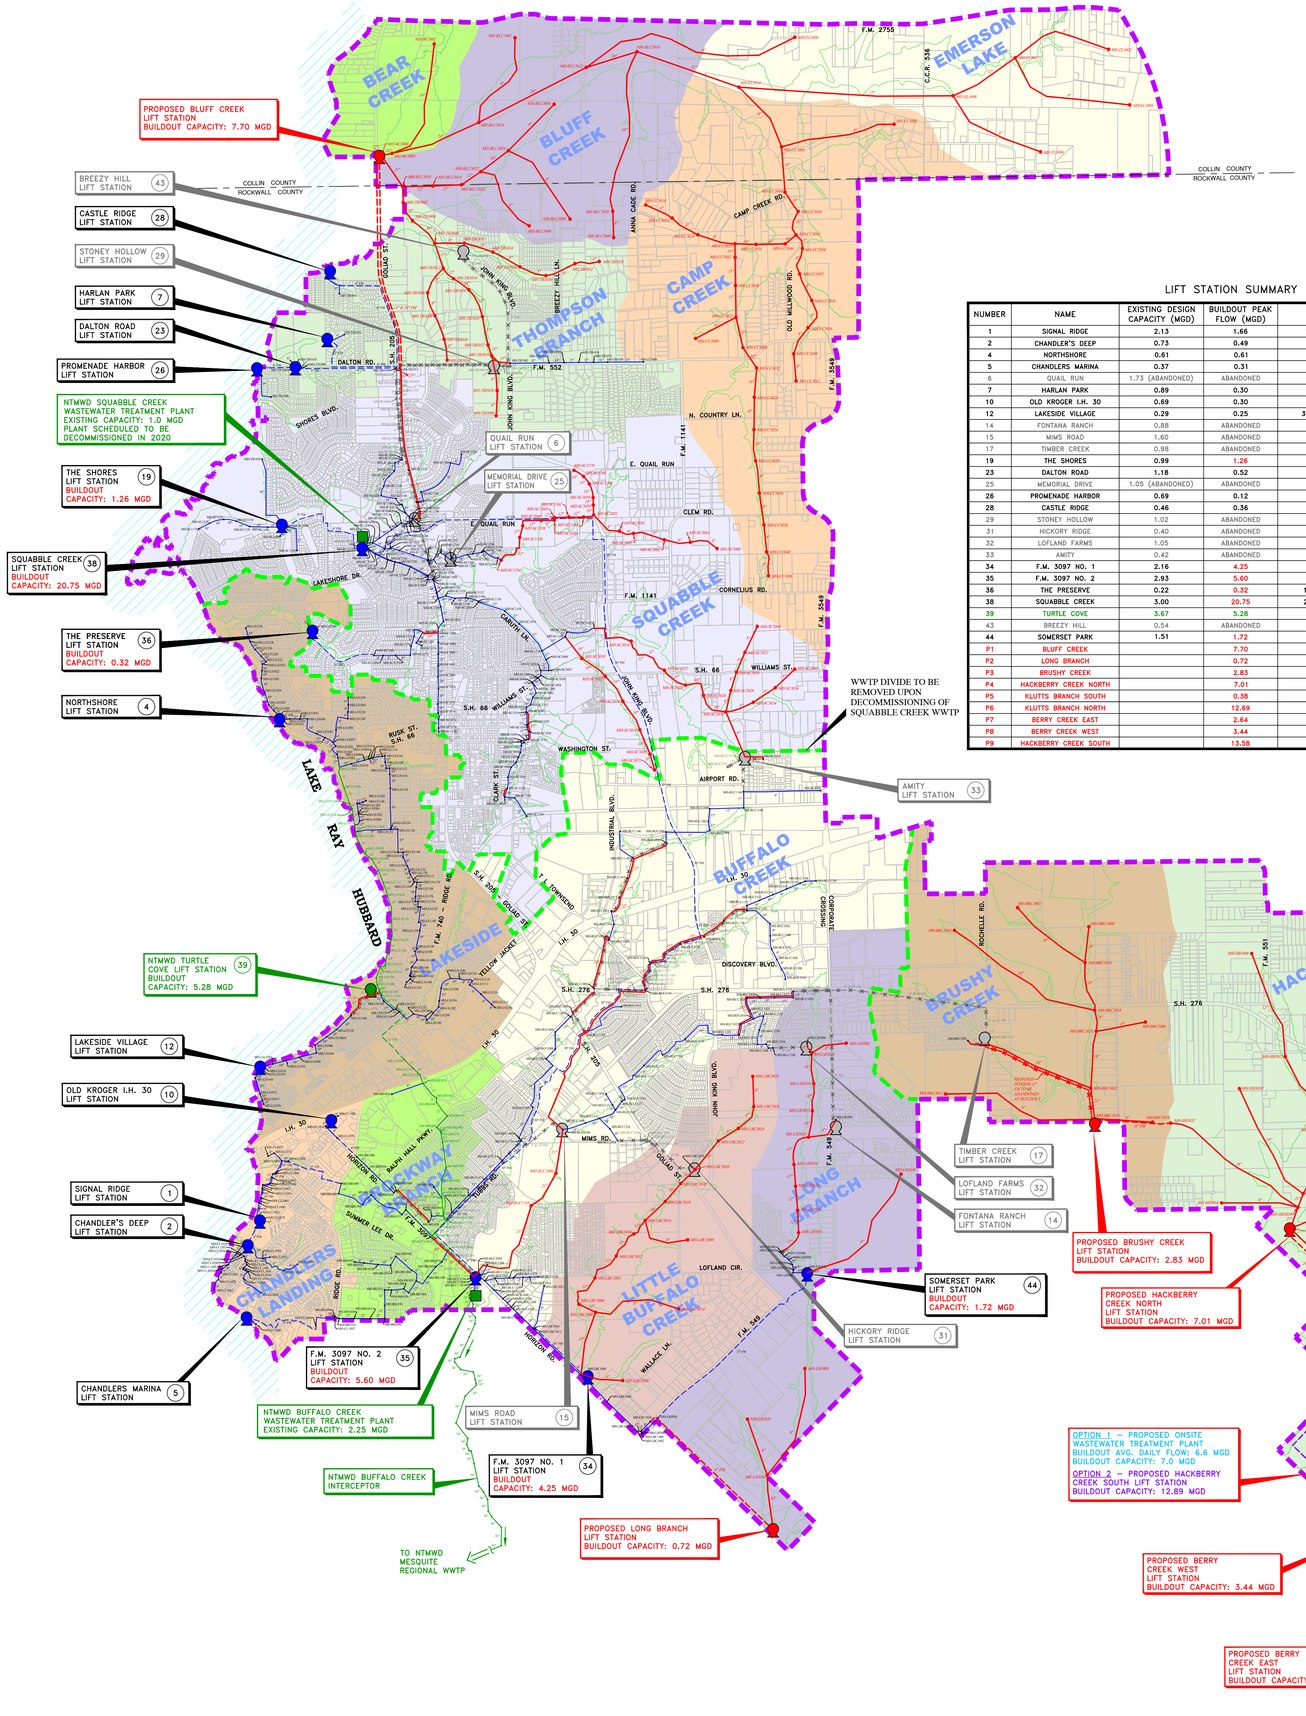
Recently, the City's consultant -- *Birkhoff, Hendricks & Carter LLP* -- finished revising the water and wastewater master plans. These plans were incorporated into the OURHometown Vision 2040 Comprehensive Plan on December 3, 2018 by *Ordinance No. 18-48*. As a result of their incorporation, staff is bringing forward an amendment to the Comprehensive Plan to incorporate the revisions identified by the City's consultants. According to Section 213.003 of the Texas Local Government Code, "*(a) comprehensive plan may be adopted or amended by ordinance following:*

(1) A hearing at which the public is given the opportunity to give testimony and present written evidence; and

(2) Review by the municipality's planning commission or department, if one exists."

Additionally, Section 9.03 of the City's Home Rule Charter states that "(r)ecommended changes to the Master Plan shall be submitted to the City Manager after the Planning and Zoning Commission holds at least one public hearing on the proposed change." Furthermore, Section 9.04 states that the "City Manager shall submit the proposed changes to the Council, together with any recommendations. The Council, after a public hearing, shall adopt or reject such proposed revision or any part thereof as submitted within sixty (60) days following its submission by the City Manager. If the proposed revision or part thereof should be rejected by the Council, the Planning and Zoning Commission may make modifications and again forward it to the City Manager for submission to the Council."

The meeting dates for this case are as follows:



~~Planning and Zoning Commission Work Session: October 29, 2019~~
~~Planning and Zoning Commission Public Hearing: November 12, 2019~~
City Council Public Hearing/1st Reading: November 18, 2019
City Council 2nd Reading: December 2, 2019.

On November 12, 2019, the Planning and Zoning Commission held a public hearing and approved a motion to recommend approval of the amendment by a vote of 5-0, with Commissioners Fishman and Welch absent. Should the City Council have any question concerning the amendment, staff will be available at the *November 18, 2019* work session meeting.

CITY OF ROCKWALL

ORDINANCE NO. 19-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ADOPTING REVISIONS TO THE MASTER WATER PLAN AND THE MASTER WASTEWATER PLAN CONTAINED IN THE OURHOMETOWN VISION 2040 COMPREHENSIVE PLAN IN ACCORDANCE WITH THE CITY'S HOME RULE CHARTER.

WHEREAS, the *Home Rule Charter* of the City of Rockwall, Texas, states that the Comprehensive Plan will contain recommendations for the growth, development and beautification of the City and its Extraterritorial Jurisdiction (ETJ); and

WHEREAS, the City Council of the City of Rockwall has previously authorized a study to update the Comprehensive Plan, also referred to as the Master Plan; and

WHEREAS, the citizens of the City of Rockwall were involved in the development of the Comprehensive Plan through participation in a citizen action committee (*i.e. the Comprehensive Plan Advisory Committee [CPAC]*) and public meetings; and

WHEREAS, the OURHometown Vision 2040 Comprehensive Plan was adopted by the City Council of the City of Rockwall on December 3, 2019 by *Ordinance No. 18-43*; and

WHEREAS, the Comprehensive Plan shall serve as a guide to all future City Council action concerning land use and development regulations, and expenditures for capital improvements; and

WHEREAS, the Water/Wastewater Master Plans are updated on a five (5) year basis and the City Council of the City of Rockwall authorized Brickoff, Hendricks & Cater, LLP to perform the update; and

WHEREAS, Section 213.003, *Adoption or Amendment of Comprehensive Plan*, of Chapter 213, *Municipal Comprehensive Plans*, of the *Texas Local Government Code* states that the adoption of or amendment to a Comprehensive Plan requires a hearing at which the public is given the opportunity to give testimony and present written evidence, and as required by the *Home Rule Charter of the City of Rockwall* a public hearing has been held on the proposed revisions to the Comprehensive Plan, and the governing body -- *in the exercise of its legislative discretion* -- has concluded that the Comprehensive Plan should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

Section 1. That the Master Water Plan and Master Wastewater Plan contained within *Appendix 'C'* of the OURHometown Vision 2040 Comprehensive Plan be amended as depicted in *Exhibit 'A'* of this ordinance; and

Section 2. The Comprehensive Plan shall be used by City Staff in planning and as a guide for future development of the City of Rockwall; and,

Section 3. This ordinance shall take effect immediately from and after its passage.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 2ND DAY OF DECEMBER, 2019.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Mary Smith, Assistant City Manager/Director of Finance**

DATE: **November 15, 2019**

SUBJECT: **REDC Debt Refinancing and New Money for Land Purchase**

In 2013, the REDC issued Sales Tax Revenue Bonds to purchase land adjacent to the Rockwall Technology Park. At that time the bonds sold at interest rates ranging from 5.2% to 5.8%. When the EDC issues debt for land purchases it is taxable debt and the rates are a bit higher than traditional tax-exempt city bond issues. Since this issuance in 2013, rates have dropped significantly and it is now advantageous to partially refinance (refund is the bond terminology) to lower the interest rate on the bonds which are still outstanding at this time. Hilltop Securities (the City's financial advisor for debt issuances) is estimating these bonds will sell with an interest rate in the 2.45% to 3.56% range. The balance to be refunded is $2,870,000. The bonds were sold with a call provision allowing the REDC to take advantage of lower municipal bond interest rates now available. The present value savings of the issuance is estimated to be 3.19% or approximately $175,474 over the remaining term of the bonds.

The REDC has had an "A" rating from Standard and Poor's. S&P did review this bond sale and determined to maintain the EDC's current bond rating.

In addition, the REDC Board is moving ahead with land acquisition in the vicinity of the park and has voted to approve the issuance of $6.7 million in new money bonds for this purpose. The Board voted 6-0 (Nielsen absent) at their November meeting to move forward with the issuance of these bonds. Pending Council approving of the Resolution the sale is scheduled for December 3rd if the market is advantageous at that time with closing on the bonds tentatively scheduled for January 7, 2020.

The par amount of the 2019 bonds - $9,515,000 will include the refunding, new money for the land purchase, and the mandatory reserve fund (1X the average annual principal and interest payment) which will have to be maintained by the EDC for the life of the issue. The bonds will be issued with the city's standard 20-year amortization period.

A Council Resolution approving the REDC's Resolution is included for consideration at the Council meeting on Monday November 18th. Staff will be available at the meeting to answer any questions.

CITY OF ROCKWALL

RESOLUTION NO. 19-25

A RESOLUTION OF THE CITY OF ROCKWALL, TEXAS APPROVING A RESOLUTION OF THE ROCKWALL ECONOMIC DEVELOPMENT CORPORATION; AUTHORIZING THE ISSUANCE OF THE CORPORATION'S SALES TAX REVENUE REFUNDING AND IMPROVEMENT BONDS; CONFIRMING A SALES TAX COLLECTION RESOLUTION; ENACTING OTHER PROVISIONS RELATING TO THE SUBJECT; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, Rockwall Economic Development Corporation (the "Corporation") is a non-profit industrial development corporation created, existing and governed by the Development Corporation Act, Chapters 501, 502 and 504, Texas Local Government Code, formerly Section 4A of Article 5190.6, Tex. Rev. Civ. Stat. Ann., as amended (the "Act").

WHEREAS, there has been presented to this City Council a resolution (the "Bond Resolution") adopted by the Board of Directors of the Corporation authorizing the issuance and sale of the Corporation's sales tax revenue refunding and improvement bonds for the purposes of refunding the Corporation's outstanding Sales Tax Revenue Bonds, Taxable Series 2013, in order to reduce debt service payments made by the Corporation and acquiring additional land for the Rockwall Technology Park;

WHEREAS, there has been previously approved by this City Council a Sales Tax Collection Resolution pursuant to which sales taxes collected by the City for the benefit of the Corporation pursuant to the Act shall be transferred and deposited into a fund for the use by the Corporation in the furtherance of its authorized powers and purposes;

WHEREAS, this City Council finds and determines that it is necessary and appropriate to approve the Bond Resolution for the purposes hereinabove provided; Now, Therefore

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS THAT:

Section 1. The recitals set forth in the preamble hereof are incorporated herein and shall have the same force and effect as if set forth in this Section. The Bond Resolution, attached hereto as Exhibit A, is hereby approved and the issuance by the Corporation of sales tax revenue refunding bonds in the principal amount not to exceed $9,950,000 (the "Bonds"), for the purpose of refunding all or a portion of the Corporation's outstanding Sales Tax Revenue Bonds, Taxable Series 2013, acquiring additional land for the Rockwall Technology Park, funding the reserve fund requirement for the Bonds and to pay costs of issuance of the Bonds, is hereby approved; and said Bond Resolution, the Bonds and the expenditure of funds of the Corporation in connection therewith are hereby approved.

Section 2. The Sales Tax Collection Resolution previously approved by the City and the Corporation, the appointment of the members of the Board of Directors of the Corporation and the adoption and amendments of the bylaws of the Corporation are hereby ratified, approved and confirmed.

Section 3. This Resolution shall be effective immediately upon adoption.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, this 18th day of November, 2019.

AGENDA

ROCKWALL CITY COUNCIL REGULAR MEETING

Monday, December 02, 2019 - 5:00 PM

City Hall Council Chambers - 385 S. Goliad St., Rockwall, TX 75087

I. CALL PUBLIC MEETING TO ORDER

II. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding legal issues pertaining to potential annexation/development in the Extraterritorial Jurisdiction (ETJ) pursuant to Section §551.071 (Attorney/Client Consultation).
2. Discussion regarding potential litigation concerning a franchise utility provider (Spectrum Cable) pursuant to Section §551.071 (Consultation with Attorney).
3. Discussion regarding sale of real property in the vicinity of John King Boulevard pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
4. Discussion regarding ballot voting associated with appointments to the Rockwall Central Appraisal District Board pursuant to Section 551.074 (personnel matters)
5. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

III. ADJOURN EXECUTIVE SESSION

IV. RECONVENE PUBLIC MEETING (6:00 P.M.)

V. INVOCATION AND PLEDGE OF ALLEGIANCE – COUNCILMEMBER HOHENSHELT

VI. OPEN FORUM

VII. TAKE ANY ACTION AS A RESULT OF EXECUTIVE SESSION

VIII. CONSENT AGENDA

pg.7 1. Consider approval of the minutes from the November 18, 2019 regular city council meeting, and take any action necessary.

pg.12 2. **MIS2019-014** - Consider approving an **ordinance** amending the OURHometown Vision 2040 Comprehensive Plan for the purpose of updating the water and wastewater master plans, and take any action necessary **(2nd Reading).**

pg.17 3. **P2019-044** - Consider a request by Arlyn Samuelson of Westwood Professional Services on behalf of Carolina Molina of SPR Packaging for the approval of Lot 3, Block A, SPR Packaging Addition being a replat of a 10.189-acre parcel of land identified as Lot 2, Block A, SPR

Packaging Addition, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1480 Justin Road, and take any action necessary.

pg.23 4. **P2019-047** - Consider a request by Matt Lucas, PE of Kimley Horn on behalf of Kevin J. Lloyd of 2424 MTA Realty, LLC for the approval of Lots 1, 2, & 3, Block A, MTA Andrews Addition being a final plat of a 9.6990-acre tract of land identified as Tract 15 of the E. P. G. Chisum Survey, Abstract No. 64, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the Scenic Overlay (SOV) District, located at the southwest corner of Ridge Road [FM-740] and Turtle Cove Boulevard, addressed as 2424 Ridge Road, and take any action necessary.

pg.30 5. **MIS2019-015** - Consider a request by Michael Guerrero of Atticus Harbor Village, LLC for the approval of an alternative tree mitigation plan for a 6.915-acre tract of land identified as Lots 3A, 4A & 5A, Isaac Brown Addition, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 32 (PD-32), situated within the Interior Subdistrict, located adjacent to Summer Lee Drive southwest of the intersection of Horizon Road [FM-3097] and Summer Lee Drive, and take any action necessary.

pg.35 6. Consider approval of a proposal from Ramco Rugged Portables in the amount of $67,845.95 for the Getac cloud storage solution and annual maintenance, appropriating Seizure Funds for this purpose, and take any action necessary.

IX. Action Items

pg.38 1. Discussion and consider a resolution providing for the casting of votes and submission of the official voting ballot associated with appointments to the Rockwall Central Appraisal District Board for the year 2020-2021, and take any action necessary.

pg.41 2. **A2019-001** - Discuss and consider the approval of a resolution stating an intention to commence annexation proceedings by Petition per Chapter 43, Subchapter C-4 of the Texas Local Government Code for a 41.49-acre tract of land situated within the City of Rockwall's Extraterritorial Jurisdiction (ETJ), and generally located on the north side of Cornelius Road west of the intersection of Cornelius Road and Stodghill Road [FM-3549], and take any action necessary.

pg.54 3. Discuss and consider approval of a facilities agreement with 549/I-30 Partners, L.P. for the construction of the Justin Road and FM-3549 intersection, and take any action necessary.

X. City Manager's Report, Departmental Reports and related discussions pertaining to current city activities, upcoming meetings, future legislative activities, and other related matters.

1. Departmental Reports

pg.68 Building Inspections Monthly Report - October 2019

pg.80 GIS Division Monthly Report - October 2019

MINUTES

ROCKWALL CITY COUNCIL REGULAR MEETING
Monday, November 18, 2019 - 5:00 PM
City Hall Council Chambers - 385 S. Goliad St., Rockwall, TX 75087

I. CALL PUBLIC MEETING TO ORDER

Mayor Pruitt called the meeting to order at 5:00 p.m. Present were Mayor Jim Pruitt, Mayor Pro Tem Dana Macalik, and Councilmembers Patrick Trowbridge, John Hohenshelt, Kevin Fowler, Bennie Daniels and Trace Johannesen. Also present were City Manager Rick Crowley, Assistant City Managers Mary Smith and Joey Boyd, and City Attorney Frank Garza. Students from the city's Youth Advisory Council (YAC) were also present.

Mayor Pruitt then read the below listed items into the public record before recessing the meeting to go into Executive Session at 5:03 p.m.

II. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding ballot voting associated with appointments to the Rockwall Central Appraisal District Board pursuant to Section 551.074 (personnel matters)
2. Discussion regarding legal matters pertaining to Breezy Hill pavilion pursuant to Section 551.071 (Consultation with Attorney).
3. Discussion regarding Breezy Hill Road pursuant to § Section 551.071 (Consultation with Attorney)
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

III. ADJOURN EXECUTIVE SESSION

Council adjourned from Executive Session at 5:18 p.m.

IV. RECONVENE PUBLIC MEETING (6:00 P.M.)

Mayor Pro Tem Macalik called the public meeting to order at 6:05 p.m. Mayor Pruitt joined the meeting at 6:07 p.m. (following the prayer and pledge).

V. INVOCATION AND PLEDGE OF ALLEGIANCE – MAYOR PRO TEM MACALIK

Mayor Pro Tem Macalik delivered the invocation and led the Pledge of Allegiance.

VI. INTRODUCTION OF ROCKWALL YOUTH ADVISORY COUNCIL (YAC) MEMBERS

The mayor and council members introduced the nine YAC students who were guests in attendance this evening.

VII. PROCLAMATION

Mayor Pruitt called forth Marilyn King from the Daughters of the American Revolution (DAR) and read and presented her with a (surprise) proclamation, naming the month of November as "Marilyn King Appreciation Day" in the City of Rockwall.

VIII. OPEN FORUM

Mayor Pruitt explained how Open Forum is conducted, asking if anyone would like to come forth and speak at this time. There being no one indicating such, he then closed Open Forum.

IX. TAKE ANY ACTION AS A RESULT OF EXECUTIVE SESSION

No action was taken as a result of Executive Session.

X. CONSENT AGENDA

1. Consider approval of the minutes from the November 4, 2019 regular city council meeting, and take any action necessary.
2. Consider approval of the minutes from the November 8, 2019 special city council meeting, and take any action necessary.
3. **P2019-040** - Consider a request by Perry Bowen on behalf of Kyle Bryan and Haley Brook Bowen for the approval of a replat for Lots 1 & 2, Block A, Haley & Kyle Addition being a 0.97-acre parcel of land currently identified as Lot A, Block 107, B. F. Boydstun Addition, City of Rockwall, Rockwall County, Texas, being zoned Single-Family 7 (SF-7) District, addressed as 501 S. Clark Street, and take any action necessary.
4. Consider approval of an Interlocal Purchasing Agreement with the City of Texarkana and authorizing the City Manager to execute such agreement, and take any action necessary.
5. Consider approval of Engineering Service Agreement with Pipeline Analysis, LLC, to provide engineering services for Sanitary Sewer Condition Assessments and authorize the City Manager to execute a contract for $156,600, to be funded by the Sewer Operations budget, and take any action necessary.
6. Consider approval of the St. Mary Street, Bost Street, and Sherman Street Water Line and Wastewater Line Replacement Project and authorize the City Manager to execute a contract

with Pittard Construction Company, Inc. in an amount of $827,282, to be funded by Water/Wastewater bonds, and take any action necessary.

Councilmember Johannesen moved to approve the Consent Agenda, as presented. Councilmember Trowbridge seconded the motion, which passed by a vote of 7 ayes to 0 nays.

XI. PUBLIC HEARING ITEMS

1. **MIS2019-014** - Hold a public hearing to discuss and consider approving an **ordinance** amending the OURHometown Vision 2040 Comprehensive Plan for the purpose of updating the water and wastewater master plans, and take any action necessary **(1st Reading)**.

Planning Director Ryan Miller provided background information pertaining to this agenda item. The Planning & Zoning Commission has recommended approval of this ordinance.

Mayor Pruitt opened the public hearing for MIS2019-014, asking if anyone would like to come forth and speak. There being no one indicating such, he then closed the Public Hearing.

Councilmember Trowbridge moved to approve MIS2019-014. Councilmember Daniels seconded the motion. The ordinance was read as follows:

CITY OF ROCKWALL

ORDINANCE NO. 19-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ADOPTING REVISIONS TO THE MASTER WATER PLAN AND THE MASTER WASTEWATER PLAN CONTAINED IN THE OURHOMETOWN VISION 2040 COMPREHENSIVE PLAN IN ACCORDANCE WITH THE CITY'S HOME RULE CHARTER.

The motion passed by a vote of 7 ayes to 0 nays.

XII. ACTION ITEMS

1. Discuss and consider approval of a resolution approving a resolution of the Rockwall Economic Development Corporation, authorizing the issuance of the Corporation's Sales Tax Revenue Refunding and Improvement Bonds, confirming a sales tax collection resolution, enacting other provisions relating to the subject, and taking any action necessary.

Assistant City Manager Mary Smith indicated that the REDC did approve a motion on Friday to move forward with the bond refinancing. Councilmember Fowler moved to approve the resolution approving the REDC resolution. Mayor Pro Tem Macalik seconded the motion, which passed by a vote of 7 ayes to 0 nays.

XIII. EXECUTIVE SESSION

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding ballot voting associated with appointments to the Rockwall Central Appraisal District Board pursuant to Section 551.074 (personnel matters)
2. Discussion regarding legal matters pertaining to Breezy Hill pavilion pursuant to Section 551.071 (Consultation with Attorney).
3. Discussion regarding Breezy Hill Road pursuant to § Section 551.071 (Consultation with Attorney)
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

XIV. RECONVENE PUBLIC MEETING & TAKE ANY ACTION AS RESULT OF EXECUTIVE SESSION

Council did not reconvene in Executive Session following the close of the public meeting agenda.

XV. ADJOURNMENT

Mayor Pruitt thanked the members of the Youth Advisory Council (YAC) for their attendance this evening and for their ongoing participation in YAC.

The meeting was adjourned at 6:27 p.m.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 2nd DAY OF DECEMBER, 2019.

CITY OF ROCKWALL

ORDINANCE NO. 19-45

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ADOPTING REVISIONS TO THE MASTER WATER PLAN AND THE MASTER WASTEWATER PLAN CONTAINED IN THE OURHOMETOWN VISION 2040 COMPREHENSIVE PLAN IN ACCORDANCE WITH THE CITY'S HOME RULE CHARTER.

WHEREAS, the *Home Rule Charter* of the City of Rockwall, Texas, states that the Comprehensive Plan will contain recommendations for the growth, development and beautification of the City and its Extraterritorial Jurisdiction (ETJ); and

WHEREAS, the City Council of the City of Rockwall has previously authorized a study to update the Comprehensive Plan, also referred to as the Master Plan; and

WHEREAS, the citizens of the City of Rockwall were involved in the development of the Comprehensive Plan through participation in a citizen action committee (*i.e. the Comprehensive Plan Advisory Committee [CPAC]*) and public meetings; and

WHEREAS, the OURHometown Vision 2040 Comprehensive Plan was adopted by the City Council of the City of Rockwall on December 3, 2019 by *Ordinance No. 18-43*; and

WHEREAS, the Comprehensive Plan shall serve as a guide to all future City Council action concerning land use and development regulations, and expenditures for capital improvements; and

WHEREAS, the Master Water Plan and Master Wastewater Plan contained in the Comprehensive Plan are updated on a five (5) year basis; and

WHEREAS, the City Council of the City of Rockwall authorized Birkhoff, Hendricks & Cater, LLP to perform the update of the Master Water Plan and Master Wastewater Plan; and

WHEREAS, Section 213.003, *Adoption or Amendment of Comprehensive Plan*, of Chapter 213, *Municipal Comprehensive Plans*, of the *Texas Local Government Code* states that the adoption of or amendment to a Comprehensive Plan requires a hearing at which the public is given the opportunity to give testimony and present written evidence, and as required by the *Home Rule Charter of the City of Rockwall* a public hearing has been held on the proposed revisions to the Comprehensive Plan, and the governing body -- *in the exercise of its legislative discretion* -- has concluded that the Comprehensive Plan should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

Section 1. That the Master Water Plan and Master Wastewater Plan contained within *Appendix 'C'* of the OURHometown Vision 2040 Comprehensive Plan be amended as depicted in *Exhibit 'A'* of this ordinance; and

Section 2. The Comprehensive Plan shall be used by City Staff in planning and as a guide for future development of the City of Rockwall; and,

Section 3. This ordinance shall take effect immediately from and after its passage.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 2ND DAY OF DECEMBER, 2019.

CITY OF ROCKWALL

CITY COUNCIL CASE MEMO

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
DATE:	December 2, 2019
APPLICANT:	Arlyn Samuelson; *Westwood Professional Services*
CASE NUMBER:	P2019-044; *Lot 3, Block A, SPR Packaging Addition*

SUMMARY

Consider a request by Arlyn Samuelson of Westwood Professional Services on behalf of Carolina Molina of SPR Packaging for the approval of Lot 3, Block A, SPR Packaging Addition being a replat of a 10.189-acre parcel of land identified as Lot 2, Block A, SPR Packaging Addition, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1480 Justin Road, and take any action necessary.

PLAT INFORMATION

☑ The applicant is requesting the approval of a replat for a 10.189-acre parcel of land [i.e. *Lot 3, Block A, SPR Packaging Addition*] that will abandon a portion of a 24-foot firelane, drainage, and utility easement and a water easement for the purpose of constructing an office addition to the existing office/warehouse/manufacturing facility. The *subject property* is zoned Light Industrial (LI) District and is addressed as 1480 Justin Road.

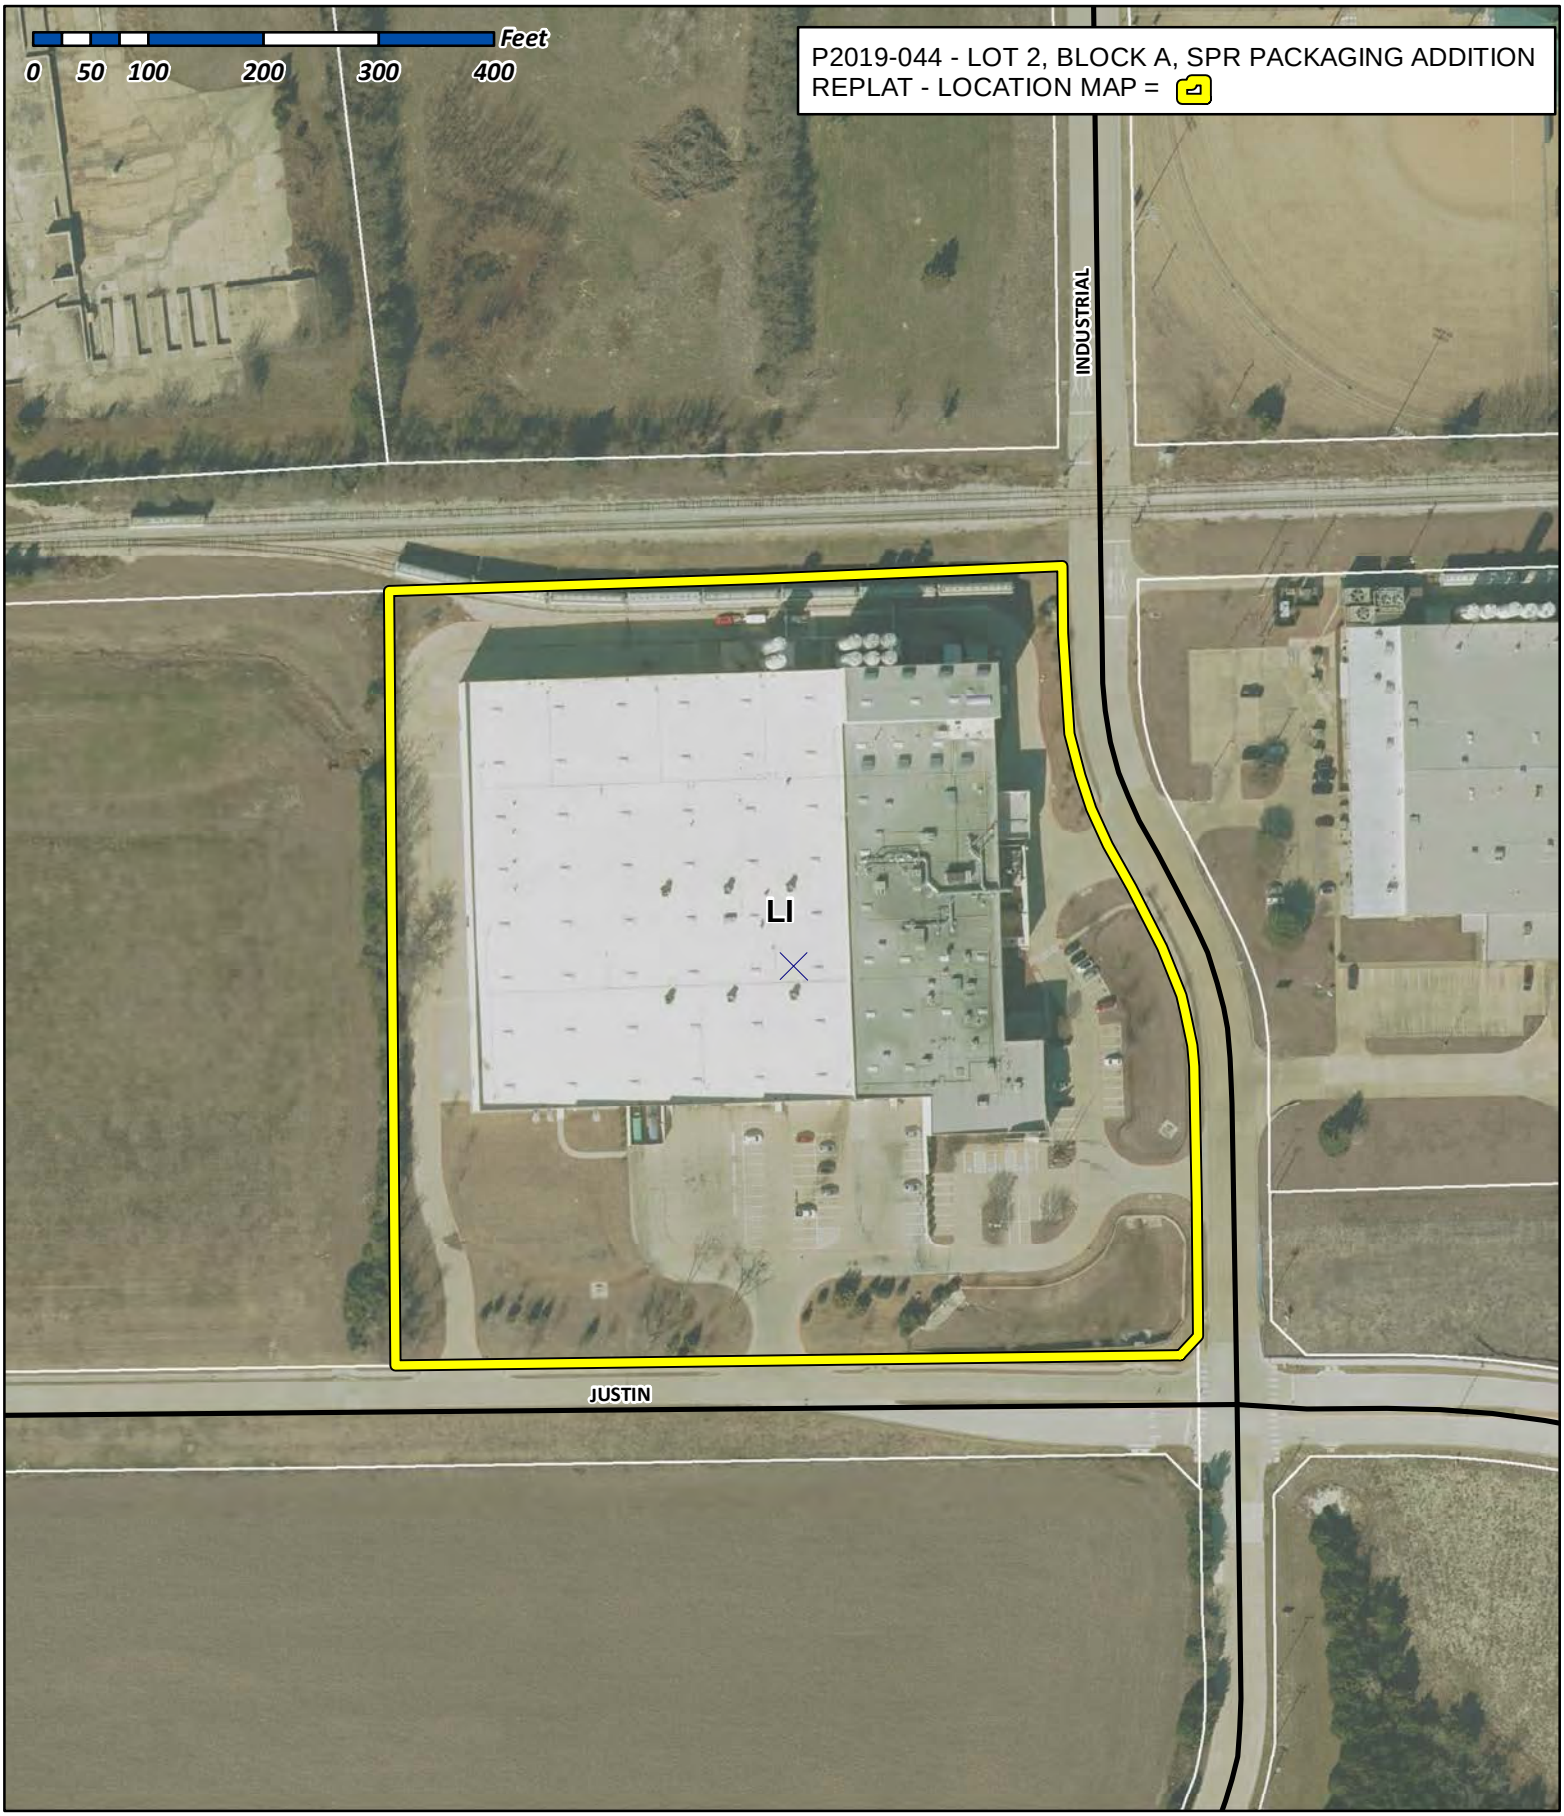
☑ On August 15, 2019, David A. Morales of Pross Design Group, Inc. on behalf of Carolina Molina of Alvaplast US (SPR Packaging) submitted a site plan [*i.e. Case No. SP2019-030*] proposing the construction of a ~22,564 SF, two (2) story office addition to the existing office/warehouse/manufacturing facility. Additionally, the site will incorporate a ~7,046 SF, one (1) story ink/locker room that is located on the south facing façade. On September 10, 2019, the Planning and Zoning Commission approved the site plan and all exceptions requested.

☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat -- *conforming to the requirements for final plats as stipulated by the Subdivision Ordinance in the Municipal Code of Ordinances* -- is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.

☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Conditions of Approval* section below.

☑ With the exception of the items listed in the *Conditions of Approval* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the Municipal Code of Ordinances.

CONDITIONS OF APPROVAL



If the City Council chooses to approve the replat for *Lot 3, Block A, SPR Packaging Addition*, staff would propose the following conditions of approval:

(1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;

(2) Any construction resulting from the approval of this plat shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION

On November 26, 2019, the Planning and Zoning Commission's motion to recommend approval of the replat with staff conditions passed by a vote of 4-0, with Commissioners Chodun, Logan, and Fishman absent.

OWNER'S CERTIFICATE
(Public Dedication)

STATE OF TEXAS
COUNTY OF ROCKWALL

WHEREAS, Flexland, L.P. is the owner of a 10.189 acre tract of land situated in the N. Butler Survey, Abstract No. 20 and the R. Ballard Survey, Abstract No. 29, Rockwall County, Texas; said tract being all of Lot 2, Block A, SPR Packaging Addition, an addition to the City of Rockwall, Texas according to the plat recorded in Cabinet H, Slide 155 of the Plat Records of Rockwall County, Texas; said 10.189 acre tract being more particularly described as follows:

BEGINNING, at a 5/8-inch iron rod with "Pogue Eng & Dev" cap found for corner at the north end of a right-of-way corner clip at the intersection of the northerly right-of-way line of Justin Road (a variable width right-of-way) and the westerly right-of-way line of Industrial Boulevard (a 65-foot right-of-way);

THENCE, South 44 degrees, 36 minutes, 19 seconds West, along the said right-of-way corner clip, a distance of 34.53 feet to a 5/8-inch iron rod with "Pogue Eng & Dev" cap found for corner in the said northerly line of Justin Road; said point also being at the south end of said corner clip;

THENCE, along the said northerly line of Justin Road, the following three (3) calls:

South 89 degrees, 36 minutes, 19 seconds West, a distance of 73.95 feet to a 5/8-inch iron rod with "Pogue Eng & Dev" cap found at an angle point;

North 89 degrees, 20 minutes, 30 seconds West, a distance of 86.95 feet to a 5/8-inch iron rod with "WESTWOOD PS" cap set at an angle point;

South 89 degrees, 05 minutes, 40 seconds West, a distance of 510.83 feet to a 5/8-inch iron rod with "Pogue Eng & Dev" cap found at the southwest corner of said Lot 2, Block A; said point also being the southeast corner of Lot 3, Block A, Whitmore Manufacturing Addition, an addition to the City of Rockwall, Texas according to the plat recorded in Cabinet H, Slide 237 of the said Plat Records;

THENCE, North 00 degrees, 29 minutes, 20 seconds West, departing the said northerly line of Justin Road and along the west line of said Lot 2, Block A and the east line of the said Lot 3, Block A, a distance of 674.79 feet to a 5/8-inch iron rod with "WESTWOOD PS" cap set in the southerly right-of-way line of UP/Dallas Garland N.E. Rail Road (a 100-foot wide right-of-way); said point being the northwest corner of said Lot 2, Block A and also being the northeast corner of said Lot 3, Block A;

THENCE, North 88 degrees, 04 minutes, 51 seconds East, departing the said west line of Lot 2, Block A and the said east line of Lot 3, Block A and along the north line of said Lot 2, Block A and the said southerly line of UP/Dallas Garland N.E. Rail Road, a distance of 584.53 feet to a "+" cut in concrete found at the intersection of said southerly line of UP/Dallas Garland N.E. Rail Road and the said westerly line of Industrial Boulevard; said point being the northeast corner of said Lot 2, Block A;

THENCE, departing the said north line of Lot 2, Block A and the said southerly line of UP/Dallas Garland N.E. Rail Road and along the said westerly line of Industrial Boulevard, the following five (5) calls:

South 00 degrees, 45 minutes, 22 seconds East, a distance of 81.19 feet to a 5/8-inch iron rod with "Pogue Eng & Dev" cap found at the beginning of a tangent curve to the left;

In a southeasterly direction, along said curve to the left, having a central angle of 27 degrees, 20 minutes, 30 seconds, a radius of 332.50 feet, a chord bearing and distance of South 14 degrees, 25 minutes, 36 seconds East, 157.17 feet, an arc distance of 158.67 feet to a "PK" nail found at the end of said curve;

South 28 degrees, 05 minutes, 51 seconds East, a distance of 87.64 feet to a 5/8-inch iron rod with "Pogue Eng & Dev" cap found at the beginning of a tangent curve to the right;

In a southeasterly direction, along said curve to the right, having a central angle of 26 degrees, 59 minutes, 12 seconds, a radius of 267.50 feet, a chord bearing and distance of South 14 degrees, 36 minutes, 15 seconds East, 124.83 feet, an arc distance of 125.99 feet to a 5/8-inch iron rod with "Pogue Eng & Dev" cap found at the end of said curve;

South 01 degrees, 06 minutes, 39 seconds East, a distance of 230.71 feet to the POINT OF BEGINNING;

CONTAINING, 443,847 square feet or 10.189 acres of land, more or less.

THAT I, Roman L. Groysman, do hereby certify that I prepared this plat from an actual and accurate survey of the land, and that the corner monuments shown thereon were properly placed under my personal supervision.

PRELIMINARY PLAT
NOT FOR RECORDING

Roman L. Groysman
Registered Professional Land Surveyor
No. 5864

NOW, THEREFORE, KNOW ALL MEN BY THESE PRESENTS:

STATE OF TEXAS
COUNTY OF ROCKWALL
I the undersigned owner of the land shown on this plat, and designated herein as the ***SPR PACKAGING ADDITION, LOT 2R, BLOCK A****, subdivision to the City of Rockwall, Texas, and whose name is subscribed hereto, hereby dedicate to the use of the public forever all streets, alleys, parks, water courses, drains, easements and public places thereon shown on the purpose and consideration therein expressed. We further certify that all other parties who have a mortgage or lien interest in the SPR PACKAGING ADDITION have been notified and signed this plat.*

I understand and do hereby reserve the easement strips shown on this plat for the purposes stated and for the mutual use and accommodation of all utilities desiring to use or using same. We also understand the following;

1. *No buildings shall be constructed or placed upon, over, or across the utility easements as described herein.*
2. *Any public utility shall have the right to remove and keep removed all or part of any buildings, fences, trees, shrubs, or other growths or improvements which in any way endanger or interfere with construction, maintenance or efficiency of their respective system on any of these easement strips; and any public utility shall at all times have the right of ingress or egress to, from and upon the said easement strips for purpose of construction, reconstruction, inspecting, patrolling, maintaining, and either adding to or removing all or part of their respective system without the necessity of, at any time, procuring the permission of anyone.*
3. *The City of Rockwall will not be responsible for any claims of any nature resulting from or occasioned by the establishment of grade of streets in the subdivision.*
4. *The developer and subdivision engineer shall bear total responsibility for storm drain improvements.*
5. *The developer shall be responsible for the necessary facilities to provide drainage patterns and drainage controls such that properties within the drainage area are not adversely affected by storm drainage from the development.*
6. *No house dwelling unit, or other structure shall be constructed on any lot in this addition by the owner or any other person until the developer and/or owner has complied with all requirements of the Subdivision Regulations of the City of Rockwall regarding improvements with respect to the entire block on the street or streets on which property abuts, including the actual installation of streets with the required base and paving, curb and gutter, water and sewer, drainage structures, storm structures, storm sewers, and alleys, all according to the specifications of the City of Rockwall; or*

Until an escrow deposit, sufficient to pay for the cost of such improvements, as determined by the city's engineer and/or city administrator, computed on a private commercial rate basis, has been made with the city secretary, accompanied by an agreement signed by the developer and/or owner, authorizing the city to make such improvements at prevailing private commercial rates, or have the same made by a contractor and pay for the same out of the escrow deposit, should the developer and/or owner fail or refuse to install the required improvements within the time stated in such written agreement, but in no case shall the City be obligated to make such improvements itself. Such deposit may be used by the owner and/or developer as progress payments as the work progresses in making such improvements by making certified requisitions to the city secretary, supported by evidence of work done; or

Until the developer and/or owner files a corporate surety bond with the city secretary in a sum equal to the cost of such improvements for the designated area, guaranteeing the installation thereof within the time stated in the bond, which time shall be fixed by the city council of the City of Rockwall.

I further acknowledge that the dedications and/or exaction's made herein are proportional to the impact of the Subdivision upon the public services required in order that the development will comport with the present and future growth needs of the City; Our successors and assigns hereby waive any claim, damage, or cause of action that We may have as a result of the dedication of exactions made herein.

CITY OF ROCKWALL

CITY COUNCIL CASE MEMO

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
DATE:	December 2, 2019
APPLICANT:	Matt Lucus, PE; *Kimley Horn*
CASE NUMBER:	P2019-047; *Lots 1, 2, & 3, Block A, MTA Andrews Addition*

SUMMARY

Consider a request by Matt Lucas, PE of Kimley Horn on behalf of Kevin J. Lloyd of 2424 MTA Realty, LLC for the approval of Lots 1, 2, & 3, Block A, MTA Andrews Addition being a final plat of a 9.6990-acre tract of land identified as Tract 15 of the E. P. G. Chisum Survey, Abstract No. 64, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the Scenic Overlay (SOV) District, located at the southwest corner of Ridge Road [FM-740] and Turtle Cove Boulevard, addressed as 2424 Ridge Road, and take any action necessary.

PLAT INFORMATION

☑ The applicant is requesting the approval of a final plat for a 9.6990-acre tract of land [i.e. Lots 1, 2, & 3, Block A, MTA Andrews Addition] for the purpose of establishing firelane, public access, drainage, and utility easements for the purpose of constructing a four (4) story office complex. The subject property is zoned Commercial (C) District and is addressed as 2424 Ridge Road.

☑ On November 19, 2018, Andrew Bennett of BOKA, LLC submitted a request for a Specific Use Permit (SUP) [i.e. Z2018-054] to allow for a building to exceed 36-feet in height within the Scenic Overlay (SOV) District. On January 7, 2019, the City Council approved the Specific Use Permit (SUP) [i.e. Ordinance No. 19-05, SUP No. S-203].

☑ On June 14, 2019, Matt Lucas, PE of Kimley Horn on behalf of Kevin Lloyd of 2424 MTA Realty, LLC submitted a site plan [*i.e. Case No. SP2019-025*] proposing the construction of a four (4) story, 80,236 SF office complex. On September 10, 2019, the Planning and Zoning Commission approved the site plan and all exceptions requested.

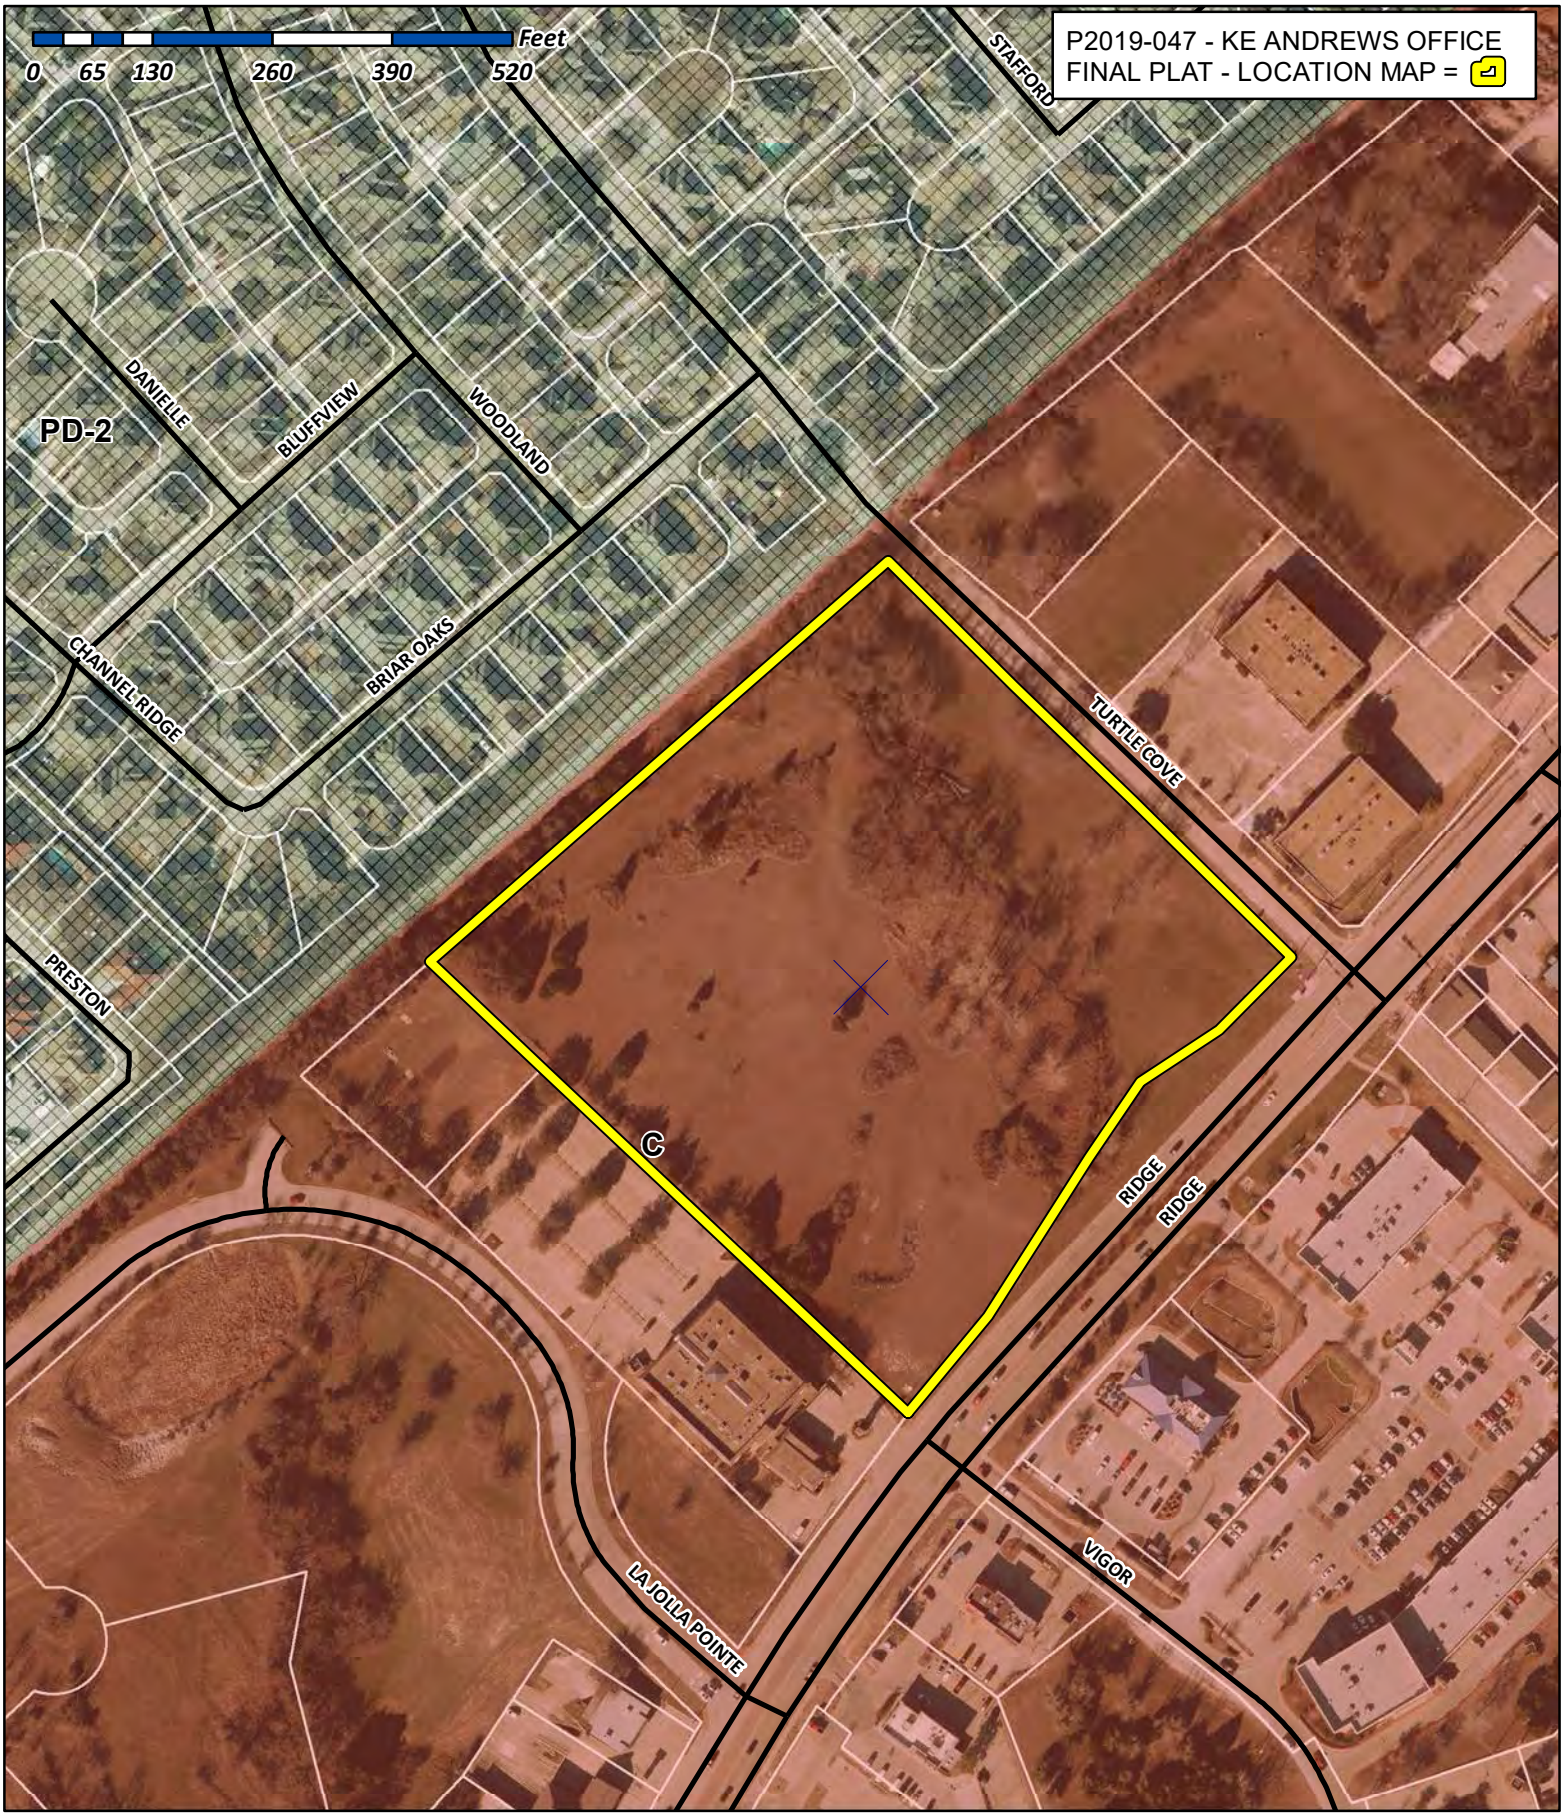
☑ The applicant is dedicating a 0.925-acre [*i.e. 40,299 SF*] portion as right-of-way for the purpose of constructing a two (2) lane roadway that will provide connection from Turtle Cove Boulevard to La Jolla Pointe Drive. The proposed roadway will be built to the *Minor Collector* specification; however, the paving width of this roadway will be reduced to a 37-foot back-to-back roadway. This will be done in conjunction with an existing facilities agreement that was approved by the City Council and signed by the adjacent property owner on June 22, 1994.

☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat -- *conforming to the requirements for final plats as stipulated by the Subdivision Ordinance in the Municipal Code of Ordinances* -- is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.

☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Conditions of Approval* section below.

☑ With the exception of the items listed in the *Conditions of Approval* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the Municipal Code of Ordinances.

CONDITIONS OF APPROVAL

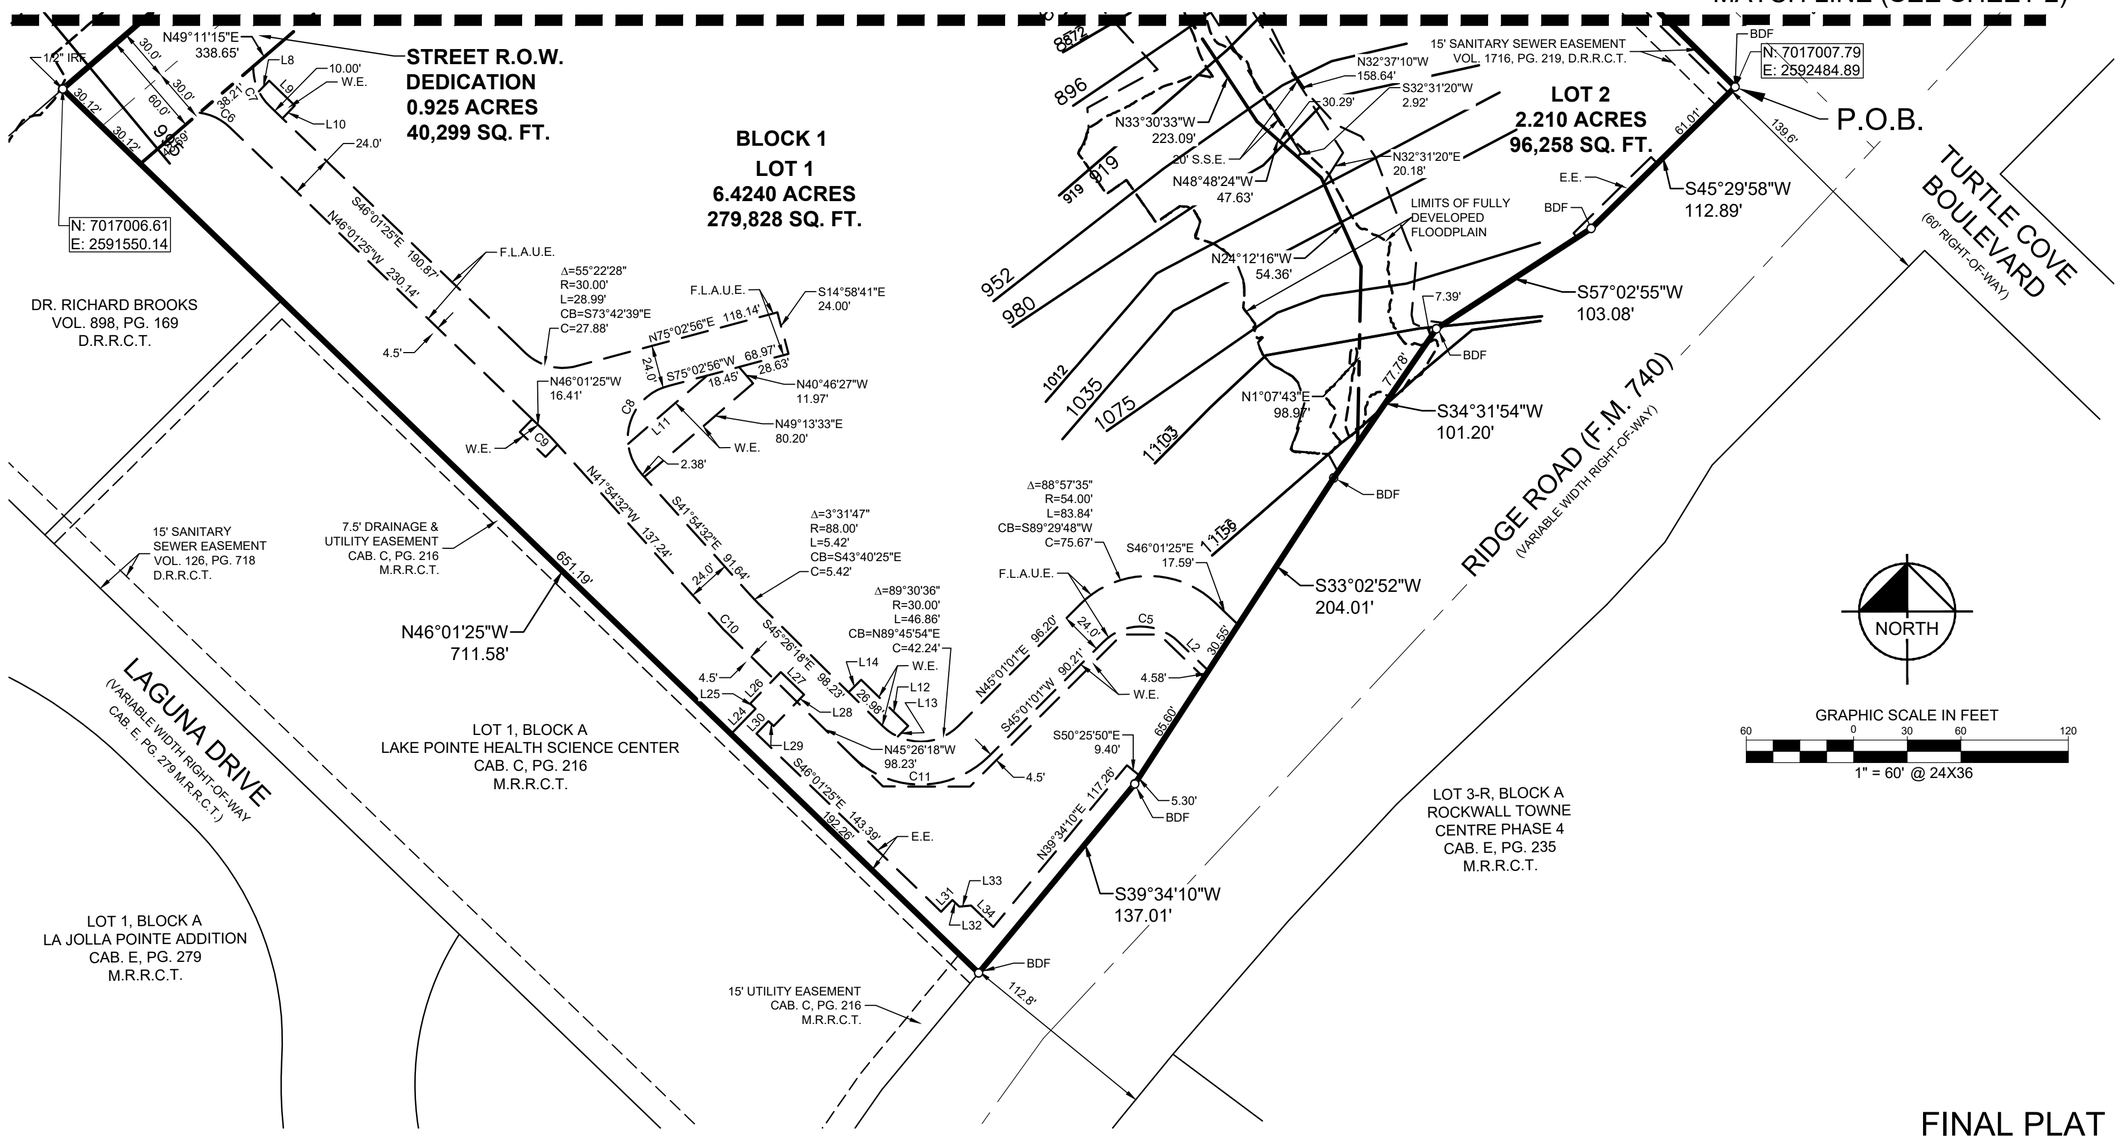


If the City Council chooses to approve the final plat for *Lots 1, 2, & 3, Block A, MTA Andrews Addition*, staff would propose the following conditions of approval:

(1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;

(2) Any construction resulting from the approval of this plat shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION



On November 26, 2019, the Planning and Zoning Commission's motion to recommend approval of the replat with staff conditions passed by a vote of 4-0, with Commissioners Chodun, Logan, and Fishman absent.

I (we) further certify that all other parties who have a mortgage or lien interest in the **MTA Andrews Addition** have been notified and signed this plat. I (we) understand and do hereby reserve the easement strips shown on this plat for the purposes stated and for the mutual use and accommodation of all utilities desiring to use or using same. I (we) also understand the following;

1. No buildings shall be constructed or placed upon, over, or across the utility easements as described herein.
2. Any public utility shall have the right to remove and keep removed all or part of any buildings, fences, trees, shrubs, or other growths or improvements which in any way endanger or interfere with construction, maintenance or efficiency of their respective system on any of these easement strips; and any public utility shall at all times have the right of ingress or egress to, from and upon the said easement strips for purpose of construction, reconstruction, inspecting, patrolling, maintaining, and either adding to or removing all or part of their respective system without the necessity of, at any time, procuring the permission of anyone.
3. The City of Rockwall will not be responsible for any claims of any nature resulting from or occasioned by the establishment of grade of streets in the subdivision.
4. The developer and subdivision engineer shall bear total responsibility for storm drain improvements.
5. The developer shall be responsible for the necessary facilities to provide drainage patterns and drainage controls such that properties within the drainage area are not adversely affected by storm drainage from the development.
6. No house dwelling unit, or other structure shall be constructed on any lot in this addition by the owner or any other person until the developer and/or owner has complied with all requirements of the Subdivision Regulations of the City of Rockwall regarding improvements with respect to the entire block on the street or streets on which property abuts, including the actual installation of streets with the required base and paving, curb and gutter, water and sewer, drainage structures, storm structures, storm sewers, and alleys, all according to the specifications of the City of Rockwall; or

   Until an escrow deposit, sufficient to pay for the cost of such improvements, as determined by the city's engineer and/or city administrator, computed on a private commercial rate basis, has been made with the city secretary, accompanied by an agreement signed by the developer and/or owner, authorizing the city to make such improvements at prevailing private commercial rates, or have the same made by a contractor and pay for the same out of the escrow deposit, should the developer and/or owner fail or refuse to install the required improvements within the time stated in such written agreement, but in no case shall the City be obligated to make such improvements itself. Such deposit may be used by the owner and/or developer as progress payments as the work progresses in making such improvements by making certified requisitions to the city secretary, supported by evidence of work done; or

   Until the developer and/or owner files a corporate surety bond with the city secretary in a sum equal to the cost of such improvements for the designated area, guaranteeing the installation thereof within the time stated in the bond, which time shall be fixed by the city council of the City of Rockwall.

I (we) further acknowledge that the dedications and/or exaction's made herein are proportional to the impact of the Subdivision upon the public services required in order that the development will comport with the present and future growth needs of the City; I (we), my (our) successors and assigns hereby waive any claim, damage, or cause of action that I (we) may have as a result of the dedication of exactions made herein.

CITY OF ROCKWALL

CITY COUNCIL MEMORANDUM

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller, *Director of Planning and Zoning*
DATE:	December 2, 2019
SUBJECT:	MIS2019-015; *Alternative Tree Mitigation Settlement Agreement*

The applicant, Michael Guerrero of Atticus Harbor Village, LLC, is requesting approval of an *Alternative Tree Mitigation Settlement Agreement* for the subject property. On December 13, 2016, the Planning and Zoning Commission approved two (2) site plans for the subject property laying out a 228-unit condominium development and a 48-unit townhome development [*i.e. SP2016-030 & SP2016-031*]. At the time of approval, the treescape plans for these cases indicated a total of 3,561 caliper-inches of trees would be removed from the subject property. The approved landscape plans for these cases indicated a total of 1,032 caliper inches would be added back to the subject property. This left an outstanding mitigation balance of 2,529-inches.

To address the outstanding balance the applicant has provided an invoice to staff indicating the cost of providing the City with 843, three (3) caliper inch trees (*i.e. 596 Cedar Elms & 247 Eastern Red Cedars x 3" = 2,529"*). The invoice includes the cost of the trees and a delivery fee for a total of $125,000. According to Section 5.6 of Article IX, *Tree Preservation*, of the *Unified Development Code* (UDC), the mitigation balance may be satisfied by one (1) or a combination of the following:

(1) The developer can provide trees on site to off-set the mitigation balance.
(2) The developer may petition the Parks and Recreation Department to accept the required number of trees to off-set the mitigation balance.
(3) Tree preservation credits may be purchased at a rate of $200.00 per inch for up to 20 percent of the total replacement inches. Additionally, if the developer plants a tree on the property, the developer would be eligible for a reduction in the cost of tree preservation credits of up to 50 percent (*i.e. $100.00 per inch*).

Based on these choices, the applicant could purchase 20% of the total replacement inches (*i.e. 505" = $50,580.00*), which would leave a mitigation balance of 2,023-inches. The remaining mitigation balance would translate to 674, three (3)-caliper inch trees, which would need to be provided to the Parks and Recreations Department for off-site planting. In lieu of providing the trees the applicant has submitted an offer indicating they would like to settle the mitigation balance through an alternative tree mitigation settlement agreement.

According to Section 5.7, *Alternative Tree Mitigation Settlement Agreements,* of Article IX, *Tree Preservation*, of the Unified Development Code (UDC), this gives the City Council the ability to approve alternative tree mitigation plans on a case-by-case basis -- *pending a recommendation from the Planning and Zoning Commission.* Should this request be approved, the applicant is proposing to satisfy the mitigation balance by providing a check in the amount of $125,000. These funds will be deposited in the City's tree mitigation fund and will be used for planting trees in the city's parks, medians, and other similar areas. If the City Council does not approve an alternative tree mitigation settlement agreement, the applicant intends to provide the full balance to the Parks Department to be used in other areas of the City.

On November 26, 2019, the Planning and Zoning Commission made a motion to recommend approval of the proposed *Alternative Tree Mitigation Settlement Agreement*. The motion was approved by a vote of 4-0, with Commissioners Chodun, Logan, and Fishman absent. The approval of the applicant's request is a discretionary decision for the City Council. Staff will be available at the *December 2, 2019* meeting.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Chief Kirk Aldridge**

FROM: **John Bader – Police Department IT Manager**

DATE: **November 22, 2019**

SUBJECT: **Police Department Getac Cloud Storage Request**

The City Council authorized the purchase of the Getac in-car and body-worn camera system in 2018. When the new system was put into production in August 2018, it was planned for 20 to 25 Terabytes of total storage over 5 years based on the storage needs of the previous Coban video system. The initial storage has filled up and has been expanded twice to its maximum storage capacity of 30 Terabytes. This is the maximum amount of storage that can be achieved without adversely affecting other city servers. The IT Department has developed a long-term solution for storage of Police Department videos by using cloud-based storage instead of a physical hardware appliance. This will be a more sustainable long-term solution for future growth. Getac cloud storage also provides more data redundancy as we currently are unable to perform file-level data backups due to the large volume of data.

Attached for the City Council's consideration is a quote in the amount of $67,845.95 that includes the first-year costs of cloud storage, the cost of configuring the service, moving the Police Department's existing videos, and testing. The cloud storage solution cost includes annual software maintenance for which the City currently pays $17,857.40.

The request is to increase the budget by $49,988.55 to implement a cloud-based storage solution for the Getac video system and amend the budget using Seizure Funds. If approved, there will be an ongoing cost for cloud storage for approximately $62,000 annually that includes the cost of the storage and maintenance. This amount will be requested in the next fiscal year budget. Staff will be available at the meeting to answer any questions.

CITY OF ROCKWALL

RESOLUTION NO. 19-26

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, PROVIDING FOR THE CASTING OF VOTES AND SUBMISSION OF THE OFFICIAL VOTING BALLOT TO THE ROCKWALL CENTRAL APPRAISAL DISTRICT (CAD) FOR THE 2020-2021 APPRAISAL DISTRICT BOARD OF DIRECTORS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, Texas Property Code Sec. 6.03 (a) provides that a board of directors governs the central appraisal district (CAD); and

WHEREAS, state law requires board of director appointments to the Rockwall CAD Board every odd numbered year to take office in even numbered years; and

WHEREAS, the City of Rockwall, an eligible taxing unit, has participated in the appointment process by nominating up to five candidates for service consideration; and

WHEREAS, the chief appraiser then prepared a ballot of all nominees and mailed it to the City of Rockwall and other taxing units for voting; and

WHEREAS, the City of Rockwall's entitlement has been determined by dividing the total dollar amount of property taxes imposed in the district by the taxing unit for the preceding tax year by the sum of the total dollar amount of property taxes imposed in the district for that year by each taking unit entitled to vote, by multiplying the quotient by 1,000; and

WHEREAS, according to information provided to the City of Rockwall by the appraisal district, the City of Rockwall has 450 votes to cast for 2020-2021.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THAT:

Section 1. the Rockwall City Council, as a result of the Executive Session held at its regular city council meeting on the 2nd day of December, 2019 hereby casts and submits its ballot to the Rockwall Central Appraisal District Board as specified in and attached hereto as "Exhibit A;"

Section 2. this Resolution shall become effective from and after its adoption and it is so resolved.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 2nd DAY OF DECEMBER, 2019.

ATTEST: **Jim Pruitt, Mayor**

Kristy Cole, City Secretary

CITY OF ROCKWALL

PLANNING AND ZONING COMMISSION MEMORANDUM

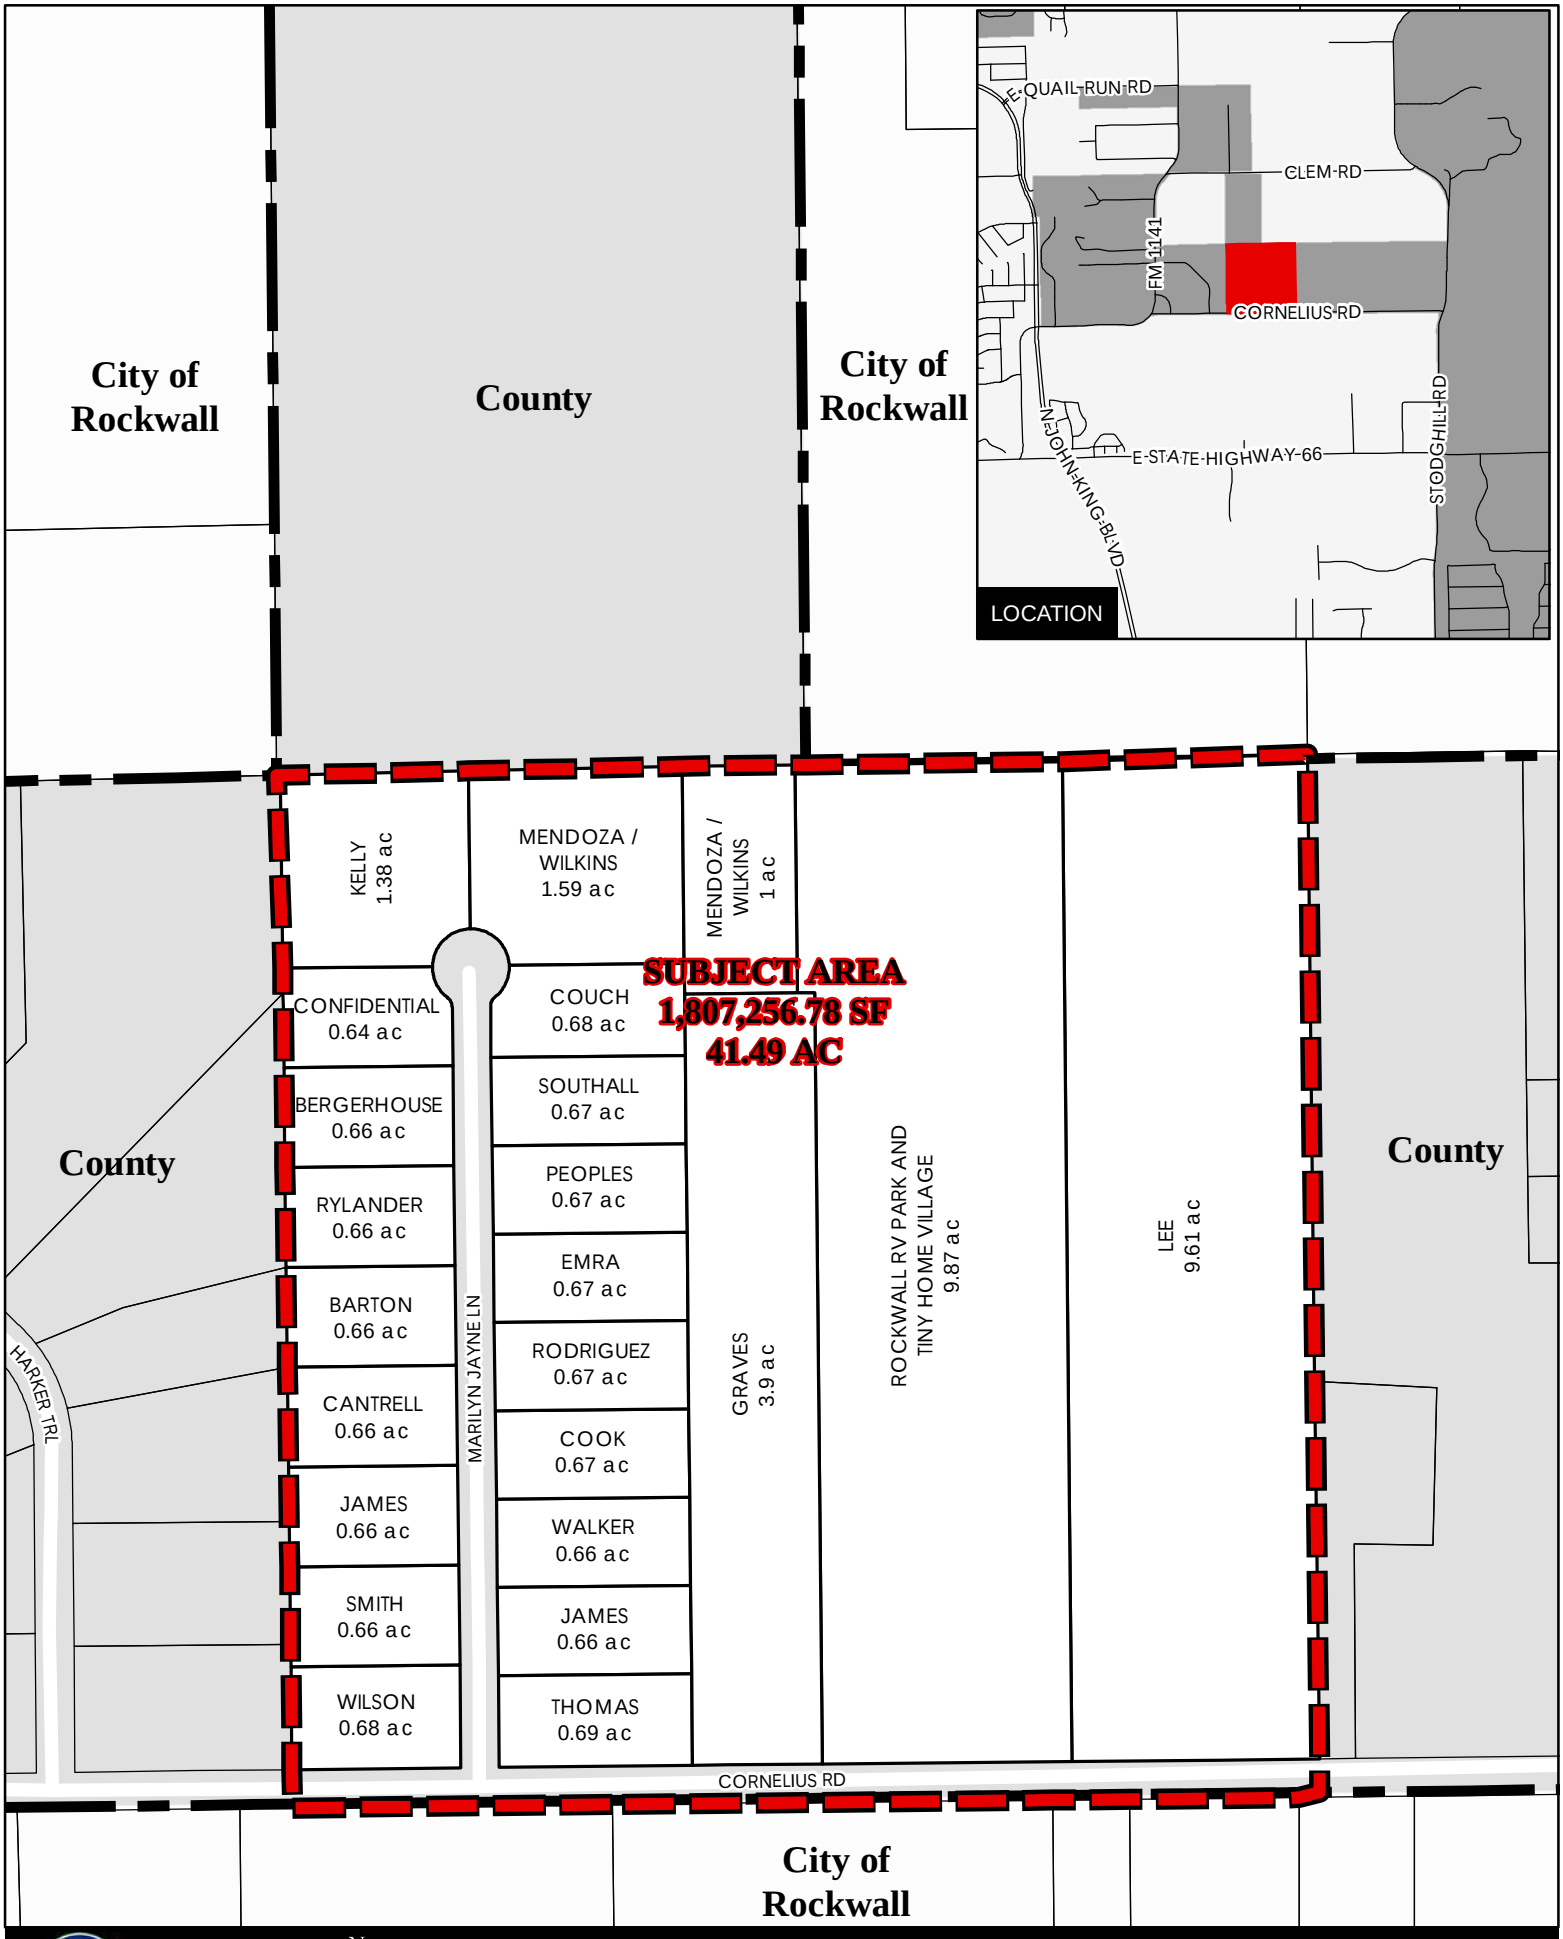
PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller, *Director of Planning and Zoning*
DATE:	December 2, 2019
SUBJECT:	Request for Voluntary Annexation on Cornelius Road

On November 19, 2019, Barbara Lee submitted a petition requesting annexation of ~41.49-acres adjacent to Cornelius Road (*see Exhibit A*). Situated within the ~41.49-acres of land are 23 tracts of land owned by 22 property owners. The petition was not signed by all 22 property owners and therefore the annexation must proceed under the requirements of the newly adopted annexation law. According to Subchapter C-4, *Annexation of Areas with Population of Less than 200 by Petition*, of Chapter 43, *Municipal Annexation*, of the Texas Local Government Code, "(a) municipality may annex an area with a population of less than 200 only if the following conditions are met, as applicable:

(1) the municipality obtains consent to annex the area through a petition signed by more than 50 percent of the registered voters of the area; and

(2) if the registered voters of the area do not own more than 50 percent of the land in the area, the petition described by Subdivision (1) is signed by more than 50 percent of the owners of land in the area."



In this case, the registered voters in the area do *not* own more than 50% of the area. As a result, Ms. Lee has submitted a petition signed by 12 of the property owners who own approximately 22.07-acres or ~53.19% of the land area. Based on this petition, staff is bringing Ms. Lee's request forward for consideration by the City Council. Should the City Council vote to approve the request and the attached resolution directing staff to commence with annexation, the schedule (*per the requirements of Chapter 43 of the Texas Local Government Code*) would be as follows:

- *December 2, 2019*: A Resolution declaring an intent to annex the area is adopted by the City Council.
- *December 3, 2019 – December 9, 2019*: Staff is required to mail notification to all effected property owners indicating the time and date of the public hearing, an explanation of the 180-day petition period. Staff will also be required to provide notice to the school district and public entities in the area including the County.
- *December 23, 2019 – January 1, 2020*: The City Council will be required to hold a special meeting to hold a public hearing on the annexation.
- *January 2, 2020*: 31-days after the resolution is adopted the municipality may start to collect signatures for the annexation petition from property owners within the annexation area.
- *May 30, 2020*: 180-days after the resolution is adopted the window for the municipality to collect signatures from property owners within the annexation area ends. If the City obtains the number of signatures on the petition required to annex the area, the City may annex the area after notifying the residents and property owners of the area proposed to be annexed of the results of the petition.

- *June 1, 2020*: The City Council will be required to hold a public hearing and the first reading of the annexation ordinance.
- *June 15, 2020*: The City Council will be required to hold a second public hearing and the second reading of the annexation ordinance.

If a petition protesting the annexation of an area is signed by a number of registered voters proposing the annexation equal to at least 50 percent of the number of voters who voted in the most recent municipal election and is received by the City Secretary before the date the petition period above ends, the City may not complete the annexation of the area without approval of a majority of the voters of the city voting at an election called and held for that purpose.

It should be noted that per the new annexation rules adopted with the last legislative session, no newspaper notice will be required. Attached to this memorandum is a resolution containing a preliminary service plan and stating an intent to annex the ~41.49-acre area. Should the City Council have any questions staff will be available at the December 2, 2019 City Council meeting.

PROPERTY OWNER CONSENT PETITION

PETITION FOR ANNEXATION OF LAND INTO THE CITY OF ROCKWALL

To the Mayor and City Council of Rockwall, Texas:

We the undersigned owners of the properties located within the boundary of the area depicted in *Exhibit 'A'* of this petition hereby request annexation of our land into the City of Rockwall. We understand that our request does not necessarily mean that the area depicted in *Exhibit 'A'* will be annexed, but that the City will consider our request based upon the requirements of Chapter 43, Municipal Annexations, of the Texas Local Government Code. Furthermore, we certify and swear that:

(1) We are the owners of the tracts of land depicted in the area described in *Exhibit 'A'* and we own more than 50% of the area to be annexed;

(2) All of the tracts are currently located within the City's Extraterritorial Jurisdiction (ETJ) and the area depicted in *Exhibit 'A'* is contiguous and adjacent to the current city limits of the City of Rockwall;

(3) The tracts are not located within the corporate limits or Extraterritorial Jurisdiction (ETJ) of any other municipality or other special district; and

(4) This request for inclusion of the area depicted in *Exhibit 'A'* into the Rockwall city limits is made voluntarily.

Exhibit 'A': Area of Proposed Voluntary Annexation

46

CITY OF ROCKWALL

RESOLUTION NO. 19-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, STATING AN INTENT TO ANNEX A ~41.49-ACRE TRACT OF LAND, WHICH IS MORE SPECIFCIALLY DESCRIBED IN *EXHIBIT 'A'* OF THIS RESOLUTION AND WHICH IS AN AREA THAT IS ADJACENT TO AND ADJOINS THE PRESENT BOUNDARY LIMITS OF THE CITY OF ROCKWALL, TEXAS; AUTHORIZING AND DIRECTING CITY STAFF TO NOTIFY THE EFFECTED PROPERTY OWNERS; AND PROVIDING FOR A DESCRIPTION OF THE SERVICES THAT WILL BE PROVIDED TO THE AREA UPON ANNEXATION.

WHEREAS, in accordance with the requirements of Subchapter C-4, *Annexation of Areas with Population of less than 200 by Petition*, of Chapter 43, *Municipal Annexation*, of the Texas Local Government Code the City of Rockwall is adopting this *Resolution* to state an intention to commence annexation proceedings to annex a ~41.49-acre tract of land identified as Lots 1-19, Maytona Ranch Estates Addition and Tracts 22-01, 22-02, 22-6 & 22-07 of the W. M. Dalton Survey, Abstract No. 72, Rockwall County, Texas -- *which herein after shall be referred to as the "Annexation Area"* --, generally located on the north side of Cornelius Road west of the intersection of Cornelius Road and Stodghill Road [*FM-3549*], and depicted and described in *Exhibit 'A'* of this *Resolution*; and

WHEREAS, the City Rockwall has received a petition from the majority of the property owners within the *Annexation Area* requesting the area be annexed by the City of Rockwall; and

WHEREAS, the City Council of the City of Rockwall finds that the annexation of the *Annexation Area* is in the best interests of the property owners within the *Annexation Area* and of the residents of the City of Rockwall; and

WHEREAS, the City Council of the City of Rockwall finds that -- *since the petition was not signed by all property owners in the Annexation Area* -- the *Annexation Area* is subject to the newly adopted annexation requirements outlined in Subchapter C-4, *Annexation of Areas with Population of less than 200 by Petition*, of Chapter 43, *Municipal Annexation*, of the Texas Local Government Code; and

WHEREAS, the *Annexation Area* is found to be situated within the City of Rockwall's Extraterritorial Jurisdiction (ETJ), and is adjacent to and adjoining the present boundaries of the City of Rockwall;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:

SECTION 1. RECITALS. The above recitals are found to be true and correct and they are incorporated as findings of the City Council for all purposes.

SECTION 2. INTENT. The City of Rockwall intends to annex the *Annexation Area* being a ~41.49-acre tract of land identified as Lots 1-19, Maytona Ranch Estates Addition and Tracts 22-01, 22-02, 22-6 & 22-07 of the W. M. Dalton Survey, Abstract No. 72, Rockwall County, Texas.

DRAFT RESOLUTION 1-21-2019

SECTION 3. ANNEXATION AREA. The *Annexation Area* is more specifically depicted and described in *Exhibit 'A'* of this resolution.

SECTION 4. NOTIFICATION. The Director of Planning and Zoning is hereby directed to provide notice to all property owners within the *Annexation Area* within seven (7) days of the adoption of this resolution. Said notices shall include:

(1) Notice of the public hearing required by V.T.C.A., Local Government Code §43.0684.
(2) An explanation of the 180-day petition period described by V.T.C.A., Local Government Code §43.0685.
(3) A signed copy of this resolution with contains description, list, and schedule of services to be provided by the municipality in the area on or after annexation as provided by V.T.C.A., Local Government Code §43.0682.

SECTION 5. SERVICES. A description of the services that will be provided by the City of Rockwall upon annexation is outlined in Exhibit 'B' of this resolution.

SECTION 6. EFFECTIVE DATE. This *Resolution* shall be effective immediately following its passage and approval by the City Council.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ON THIS THE 2ND DAY OF DECEMBER, 2019.

Municipal Services. Municipal services to the acreage described above shall be furnished by or on behalf of the City of Rockwall, Texas, at the following levels and in accordance with the following schedule:

(A) *Police Services.*

(1) Patrolling, responses to calls, and other routine police services, within the limits of existing personnel and equipment, will be provided within 60-days of the effective date of annexation.

(2) As development and construction commence within this area, sufficient police personnel and equipment will be provided to continue to furnish this area the level of police services consistent with police services available in other parts of the City with land uses and population densities similar to those projected in the annexed area.

(B) *Fire Services.*

(1) Fire protection by the present personnel and the present equipment of the Fire Department, within the limitations of available water and distances from existing fire stations, will be provided to this area within 60-days of the effective date of annexation.

(2) As development and construction commences within this area, sufficient fire personnel and equipment will be provided to continue to furnish this area the level of fire services consistent with fire service available in other parts of the City with land uses and population densities similar to those projected in the annexed area.

(C) *Health and Code Compliance Services.*

(1) Enforcement of the City's health ordinances and regulations including, but not limited to, weed and brush ordinances, junked and abandoned vehicle ordinances, food handlers ordinances and animal control ordinances, shall be provided within this area on the effective date of the annexation ordinance. These ordinances and regulations will be enforced through the use of existing personnel. Complaints of ordinance or regulation violations within this area will be responded and investigated by existing personnel beginning with the effective date of the annexation ordinance.

(2) The City's building, plumbing, electrical, gas heating, air conditioning and all other construction codes will be enforced within this area beginning with the effective date of the annexation ordinance. Existing personnel will be used to provide these services.

(3) The City's zoning, subdivision, and other ordinances shall be enforced in this area beginning on the effective date of the annexation ordinance.

(4) All inspection services furnished by the City of Rockwall, but not mentioned above, will be provided to this area beginning on the effective date of the annexation ordinance. Any property owner or his/her assigns who in good faith has a new building or structure, as defined in the Comprehensive Zoning Ordinance, under construction on the effective date of annexation shall be exempted from these inspections for that building or structure under construction for a period of one year from the effective date of annexation. For the purpose of this ordinance "under construction" shall mean any work that requires a building permit from the City of Rockwall.

(5) As development and construction commence within this area, sufficient personnel will be provided to continue to furnish this area the same level of Health and Code

DRAFT RESOLUTION 2019

compliance services as are furnished throughout the City.

(D) *Planning and Zoning Services*

(1) The planning and zoning jurisdiction of the City will extend to this area on the effective date of the annexation ordinance. City planning will thereafter encompass this property, and it shall be entitled to consideration for zoning in accordance with the City's Comprehensive Plan, Unified Development Code (UDC) [*i.e. Zoning Ordinance*], and Municipal Code of Ordinances.

(E) *Recreation and Leisure Services*

(1) Residents of this property may utilize all existing recreational and leisure services facilities and sites throughout the City beginning with the effective date of the annexation ordinance.
(2) Existing parks, playgrounds, swimming pools and other recreation and leisure facilities within this property shall, upon dedication to and acceptance by the City, be maintained and operated by the City of Rockwall.

(F) *Solid Waste Collection*

(1) Solid waste collection shall be provided to the property owner in accordance with existing City policies as to frequency and charges, beginning on the effective date of annexation except for properties that are served by a privately-owned solid waste management service provider. Such properties will be allowed to continue private service for a period of two (2) years from the effective date of annexation at which time the property will be required to begin service with a franchised solid waste contractor within the City of Rockwall.

(G) *Streets*

(1) The City of Rockwall's existing policies with regard to streets, roads and street/roadway lighting maintenance, applicable throughout the entire City, shall apply to this property beginning immediately as of the effective date of the annexation ordinance.
(2) As development, improvements or construction of streets to the City standards commence within this property, the policies of the City of Rockwall with regard to impact fees and participation in the cost thereof, acceptance upon completion, and maintenance after completion, shall apply.
(3) The same level of maintenance shall be provided to public streets and roadways within this property that have been accepted by the City of Rockwall as is provided to like City streets and roadways throughout the City.

(H) *Water Services*

(1) Connection to existing City water mains for water services for domestic, commercial and industrial use within this property will be provided in accordance with existing City policies. Upon connection to existing mains, water will be provided at rates established by City ordinance for such services throughout the City.
(2) Water mains of the City will be extended in accordance with provisions of the Municipal Code of Ordinances and other applicable ordinances and regulations. City

DRAFT RESOLUTION XX-19

participation in the costs of these extensions shall be in accordance with applicable City ordinances and regulations and will be provided as otherwise available in other parts of the City with topography, land uses, population densities similar to those reasonably contemplated or projected in the annexed area.

(3) Water mains which are within the annexed area and are owned and operated by the City shall be maintained beginning with the effective date of the annexation ordinance or upon acquisition by the City.

(4) Private water lines within this property shall be maintained by their owners, in accordance with existing policies applicable throughout the City.

(I) *Sanitary Sewer Services*

(1) Connections to existing City sanitary sewer mains for sanitary sewage service in this area will be provided in accordance with the existing City policies. Upon connection, sanitary sewage service will be provided at rates established by City ordinances for such services throughout the City.

(2) Sanitary sewer mains and/or lift stations which are within the annexed area and are connected to City mains shall be maintained by the City of Rockwall beginning with the effective date of the annexation ordinance or upon acquisition by the City.

(3) Sanitary sewer mains of the City will be extended in accordance with the provisions of the Municipal Code of Ordinances and engineering standards and other applicable ordinances and regulations. City participation in the costs of these extensions shall be in accordance with applicable City ordinances and regulations and will be provided as otherwise availably in other parts of the City with topography, land uses, and population densities similar to those reasonably contemplated or projected in the area.

(4) Previously granted exceptions to the requirements of connections to the City's sanitary sewer treatment system or Off-Site Sanitary Sewer Facilities (OSSF) constructed prior to annexation shall be continued until such alternate systems are determined to no longer function to meet the sanitary sewer needs of the subdivision granted the exception or for systems installed prior to annexation.

(J) *Public Utilities.*

(1) Other public utilities will be provided by the City's franchisee or a provider holding a Certificate of Convenience and Necessity (CCN) issued by the state to serve that area.

(K) *Miscellaneous.*

(1) General municipal administration services of the City shall be available to the annexed area beginning with the effective date of the annexation ordinance.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, Director of Public Works/City Engineer**

DATE: **November 26, 2019**

SUBJECT: **Facilities Agreement for the Intersection of Justin and FM 3549**

The Texas Department of Transportation (TXDOT) began the improvements to FM-3549 in December 2018. The existing roadway was a two-lane asphalt roadway and is now being upgraded to a four-lane divided concrete roadway that will include left turn lanes and median openings at existing street intersections. Per the City's Master Thoroughfare Plan, the developer funded and constructed Justin Road is to be a four-lane divided roadway in an eighty-five (85') foot right-of-way from John King Boulevard terminating at FM-3549. Since the Justin Road intersection at FM-3549 wasn't constructed at the time that TXDOT designed the FM-3549 project, TXDOT would not construct a median opening and left turn lane for the future intersection at Justin Road.

549/I-30 Partners, L.P. is currently designing the intersection of FM-3549 and Justin Road to facilitate the development of their adjacent tracts of land. This design and construction cost estimate for this intersection has been approved by TXDOT. TXDOT is willing to construct the intersection and median opening with their current FM-3549 project, but cannot enter into a financial agreement with a private developer. The funding agreement for this intersection is required to be between TXDOT and the City of Rockwall. Therefore, Randy McCuistion, an authorized agent of 549/I-30 Partners, L.P., has requested (see attached letter) that the City of Rockwall enter into the attached facilities agreement to accept the funds for the construction of the intersection of FM-3549 and Justin Road and pass these funds through the City to TXDOT after the City and TXDOT execute a local funding agreement. The City will not be responsible for providing any additional funding, above and beyond the money provided by the developer, for the construction of this intersection.

Based on this, staff requests City Council consider approving the Facilities Agreement with 549/I-30 Partners, L.P. for the construction of the Justin Road and FM-3549 intersection.

RE: Intersection Improvements Agreement for FM 3549 near Justin Road

Dear Mrs. Williams:

The purpose of this letter is to request that the City of Rockwall enter into an agreement with our partnership to fund the construction of the intersection of FM 3549 and Justin Road. We also respectfully request that the City of Rockwall enter into a separate agreement with Texas Department of Transportation to have their contractor construct this intersection.

We look forward to and appreciate your efforts on this project. Please let me know if there are further questions with regards to this contract or the completion of this project.

Randy McCuistion, **P.E.**

FACILITIES IMPROVEMENT AGREEMENT

This Facilities Improvement Agreement ("Agreement") is entered as of the Effective Date indicated below, by and between the **CITY OF ROCKWALL**, a Texas municipal corporation ("City") and ROCKWALL **549/I-30 PARTNERS, L.P.**, a Texas limited partnership ("Developer") as follows:

RECITALS

WHEREAS, Developer and the City are sometimes collectively referenced in this Agreement as the "Parties," or, each individually, as "Party"; and

WHEREAS, Developer is the owner and developer of a 93.654 acre tract of land out of the E.M. Elliott Survey, Abstract No. 77, John Lockhart Survey, Abstract No. 134, and described as Lot 1, Block A; Lot 1, Block B; Lot 1R, Block C; and Lot 1R, Block D, Rockwall Commercial Park Subdivision, Rockwall County, Texas, (the "Property") located entirely within the corporate limits of the City of Rockwall and depicted in the plat attached as **Exhibit A**; and

WHEREAS, Developer has submitted an application to City to replat the Property and has requested certain off-site roadway improvements to accommodate the anticipated improvements on the Property; and

WHEREAS, this Agreement is intended to memorialize Developer's agreement to reimburse city and Texas Department of Transportation ("TXDOT") for certain roadway improvements to FM 3549 near Justin Road, including the addition of a turn lane, driveway, median cut, etc. ("Justin Road Improvements") as described in preliminary engineering plans included in **Exhibit B**; and

WHEREAS, the Justin Road Improvements will be constructed by TXDOT to satisfy traffic flow requirements arising from Developer's anticipated improvements on the Property; and

WHEREAS, Developer understands and acknowledges that acceptance of this Agreement is not an exaction or a concession demanded by the City but rather is an undertaking of Developer's voluntary design to ensure consistency, quality, and adequate infrastructure that will benefit Developer's development of the Property.

NOW, THEREFORE, in consideration of the mutual covenants contained herein, the Parties agree as follows:

SECTION 1. RECITALS INCORPORATED

The recitals set forth above are incorporated herein as if set forth in full to further describe the Parties' intent under this Agreement and said recitals constitute representations by Owner and the City.

SECTION 2. JUSTIN ROAD IMPROVEMENTS

(a) Developer's Obligations.

(1) Developer is responsible for all costs for the Justin Road Improvement, including:

a. engineering and design;
b. permit fees paid to third parties, if any, for crossing of gas pipelines, creeks, roadways, etc.;
c. construction costs;
d. inspection; and
e. testing, sampling and other costs relating to obtaining governmental or regulatory approvals required to construct the roadway improvements.

(2) Developer acknowledges that it has received the estimated costs for the Justin Road Improvements attached hereto as **Exhibit C**, and which is incorporated herein for all purposes. Developer further acknowledges that the actual construction costs may be greater than those included in estimated costs in **Exhibit C**.

(3) Developer agrees to pay City within thirty (30) days of receipt of an invoice from City for the Justin Road Improvements.

(b) City's Obligations.

(1) City agrees to seek such agreement(s) with TXDOT to undertake construction the Justin Road Improvements.

(2) City agrees to provide documentation to Developer demonstrating the amounts paid by City to TXDOT for the actual construction costs for the Justin Road Improvements. The Parties shall cooperate in the review of the cost reports and documentation provided by TXDOT.

(3) In no event will the City be required to undertake the actual construction of the Justin Road Improvements. City will not be responsible for any direct and/or indirect costs for constructing the Justin Road Improvements.

SECTION 3. EFFECTIVE DATE

(a) The Effective Date of this Agreement is the date that the last of the Parties' signatures to this Agreement is fully and properly affixed to this Agreement and acknowledged by a public notary. The City's duties and obligations hereunder shall not arise unless and until the City Council has duly adopted this Agreement and Developer has duly executed same. In no event will the City's obligations set forth in Sections 2 hereinabove will terminate twenty (20) years after the Effective Date.

(b) In the event TXDOT should default and/or terminate its agreement(s) with City for construction of the Justin Road Improvements, then City shall have the right to terminate this Agreement upon written notice to Developer and City shall be relieved of all of its obligations under this Agreement. Developer agrees to pay for such pre-construction costs and any construction costs for the partially completed portions of the Justin Road Improvements as may be required by TXDOT. Upon such payment(s) Developer will also be relieved of its obligations under this Agreement.

SECTION 4. REPRESENTATIONS AND WARRANTIES

(a) Owner shall be deemed in default if its ad valorem taxes on the Property become delinquent during the Term of this Agreement. Delinquent does not include the process of protesting the assessment of taxes on the Property.

(b) Owner makes the following covenants and warranties to the City:

(1) Owner is authorized to do business and is in good standing in the State of Texas and shall remain in good standing in the State of Texas and the United States of America during any Term of this Agreement.

(2) The execution of this Agreement has been duly authorized by the Owner, and the individual signing this Agreement on behalf of the Owner is empowered to execute such Agreement and bind the company.

(3) The Owner is not a party to any bankruptcy proceedings currently pending or contemplated, and Owner has not been informed of any potential involuntary bankruptcy proceedings.

SECTION 5. DEFAULT AND REMEDIES

(a) Owner shall be deemed in default under this Agreement (which shall be deemed a breach hereunder) if Developer fails to perform, observe or comply with any of its covenants, agreements or obligations hereunder or breaches or violates any of its representations contained in this Agreement.

(b) In the event of default and/or breach by Owner under this Agreement, the City shall, after providing Owner written notice and a thirty (30) day opportunity to cure, have the right to terminate this Agreement. In addition, the shall have the following remedies:

(1) The recovery of direct and indirect damages and remedies in law and equity;

(2) The right to place a lien on the Property for any amounts owed and due by Developer under the terms of this Agreement;

(3) The right to deny the issuance of building and/or construction permits for development of improvements on the Property; and

(4) The right to disconnect and/or discontinue municipal utility services to the Property.

City's above-listed remedies are in addition to any other relief provided under the terms of this Agreement and are cumulative and not exclusive.

(c) In the event of City's default and after providing City's written notice and a thirty (30) day opportunity to cure, Developer may, as its sole and exclusive remedy, terminate this Agreement or seek injunctive relief of other equitable relief, including, without limitation, specific performance, to enforce the terms of this Agreement. Notwithstanding the foregoing, if injunctive or other equitable relief is barred by governmental immunity, then the Developer may pursue all other legal and equitable remedies that are not barred by governmental immunity; however, in no event shall Developer be entitled to an award of damages or any other monetary relief.

SECTION 6. SUCCESSORS AND ASSIGNS

(a) Without limiting the generality of the foregoing, and except as otherwise provided in this paragraph, Developer has the right (from time to time upon delivery of 21 days' prior written note to the City) to assign this Agreement, in whole or in part, and including any obligation, right, title, or interest of Developer under this Agreement, to any person or entity (an "Assignee") that is or will become a developer of any portion of the Property or that is an entity that is controlled by or under common control with Developer.

(b) Each assignment shall be in writing executed by Developer and the Assignee and shall obligate the Assignee to be bound by this Agreement to the extent this Agreement applies or relates to the obligations, rights, title, or interests being assigned. From and after such assignment, the City agrees to look solely to the Assignee for the performance of all obligations assigned to the Assignee and agrees that Developer shall be released from subsequently performing the assigned obligations and from any liability that results from the Assignee's failure to perform the assigned obligations; provided, however, Developer shall not be released until the City receives an executed copy of such assignment. Further, no assignment by Developer shall release Owner from any liability that resulted from an act or omission by Developer that occurred prior to the effective date of the assignment unless the City approves the release in writing. Owner shall maintain written records of all assignments made by Developer to Assignees, including a copy of each executed assignment and the Assignee's Notice information as required by this Agreement, and, upon written request from any Party or Assignee, shall provide a copy of such records to the requesting person or entity.

SECTION 7. MISCELLANEOUS PROVISIONS

(a) Authority to execute contract. The undersigned officers and/or agents of the parties hereto are the properly authorized officials and have the necessary authority to execute this Agreement on behalf of the parties hereto, and each party hereby certifies to the other that

any necessary resolutions or other act extending such authority have been duly passed and are now in full force and effect.

(b) Notice. All notices, demands or other communications required or provided hereunder shall be in writing and shall be deemed to have been given on the earlier to occur of actual receipt or three (3) days after the same are deposited in the United States mail, certified or registered, postage prepaid, return receipt requested, addressed to the parties at the addresses set forth below or at such other addresses as such parties may designate by written notice to the other parties in accordance with this notice provision.

If to the City:
Rick Crowley
City Manager
c/o Rockwall City Hall
385 S. Goliad Street
Rockwall, Texas 75087

If to Developer:
James J. Melino
Rockwall 549/I-30 Partners, L.P
8750 N. Central Expressway, Suite 1735
Dallas, Texas 75231

(c) Sovereign Immunity. Developer acknowledges that City is performing a governmental function. City has not waived its sovereign immunity as to suit and liability with respect to its performance of this Agreement.

(d) Complete Agreement. This Agreement embodies the entire Agreement between the Parties and cannot be varied or terminated except as set forth in this Agreement, or by written agreement of the Parties amending the terms of this Agreement.

(e) Applicable Law and Venue. This Agreement shall be performable and all compensation payable in Rockwall County, Texas. Venue and exclusive jurisdiction under this Agreement lies in a court of competent jurisdiction in Rockwall County, Texas.

(f) Severability. If any clause, paragraph, section or portion of this Agreement shall be found to be illegal, unlawful, unconstitutional or void for any reason, the balance of the Agreement shall remain in full force and effect and the parties shall be deemed to have contracted as if said clause, section, paragraph or portion had not been in the Agreement initially.

(g) Representation. Each signatory representing this Agreement has been read by the party for which this Agreement is executed and that such Party has had an opportunity to confer with its counsel.

(h) Attorney's Fees. In the event that the Developer and the City fail to resolve a dispute and become involved in litigation with regard to breach of or dispute arising out of this

Agreement, the prevailing Party shall be entitled to be paid its reasonable attorneys' fees and court costs.

(i) Consideration. This Agreement is executed by the Parties hereto without coercion or duress and for substantial consideration, the sufficiency of which is hereby acknowledged.

(j) Waiver. Waiver by either Party or any breach of this Agreement, or the failure of either Party to enforce any of the provisions of this Agreement, at any time, shall not in any way affect, limit or waive such Party's right thereafter to enforce and compel strict compliance of the Agreement.

(k) Miscellaneous Drafting Provisions. This Agreement was drafted equally by the Parties hereto. The language of all parts of this Agreement shall be construed as a whole according to its fair meaning, and any presumption or principle that the language herein is to be construed against any Party shall not apply. Headings in this Agreement are for the convenience of the Parties and are not intended to be used in construing this document.

(l) No Other Parties. This Agreement is exclusively between the City and Developer and is not intended to and shall not confer any rights or benefits on any third party not a signatory hereto.

(m) Binding Effect. This Agreement shall bind and inure to the benefit of the City and Developer and to any successor owner/developer of the property, may be recorded in the Collin County property records, and runs with the land.

(n) Counterparts. This Agreement may be executed in a number of identical counterparts, each of which shall be deemed an original for all purposes.

AGENDA

ROCKWALL CITY COUNCIL REGULAR MEETING

Monday, December 16, 2019 - 5:00 PM

City Hall Council Chambers - 385 S. Goliad St., Rockwall, TX 75087

I. CALL PUBLIC MEETING TO ORDER

II. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding Facilities Agreement litigation pursuant to Section 551.071 (Consultation with Attorney)
2. Discussion regarding Breezy Hill Road pursuant to Section § 551.071 (Consultation with Attorney)
3. Discussion regarding possible purchase/acquisition of real property for park land in the north portion of the city, pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

III. ADJOURN EXECUTIVE SESSION

IV. RECONVENE PUBLIC MEETING (6:00 P.M.)

V. INVOCATION AND PLEDGE OF ALLEGIANCE – COUNCILMEMBER HOHENSHELT

VI. OPEN FORUM

VII. TAKE ANY ACTION AS A RESULT OF EXECUTIVE SESSION

VIII. CONSENT AGENDA

p.6 **1.** Consider approval of the minutes from the December 2, 2019 regular city council meeting, and take any action necessary.

p.11 **2.** Consider approval the professional engineering services contract for Birkhoff, Hendricks & Carter, L.L.P. to perform the engineering design services for the Buffalo Creek Tributary 1 Sanitary Sewer Interceptor Capacity Improvements Project in an amount not to exceed $164,780., to be funded by Sanitary Sewer Bonds, and take any action necessary.

p.34 3. Consider authorizing the City Manager to execute an interlocal agreement with Rockwall County regarding Municipal Judge Services for upcoming "No Refusal Weekends," and take any action necessary.

p.39 4. Consider authorizing the City Manager to execute an agreement with MHS Planning & Design, LLC to update the Parks, Recreation & Open Space Master Plan for 2020-2030 in amount of $38,150 to be funded by Recreation Development Fund reserves, and take any action necessary.

p.80 5. **P2019-045** - Consider a request by Chase Finch of Corwin Engineering, Inc. on behalf of John Arnold of BH Phase 10, LTD for the approval of a final plat for Stone Creek, Phase X containing 118 single-family residential lots on a 36.428-acre tract of land identified as a portion of Tract 3 of the S. King Survey, Abstract No. 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for Single Family-10 (SF-10) District land uses, located at the southwest corner of John King Boulevard and Featherstone Drive, and take any action necessary.

p.87 6. **P2019-046** - Consider a request by Chase Finch of Corwin Engineering, Inc. on behalf of John Arnold of BH Phase 11, LTD for the approval of a final plat for the Breezy Hill, Phase XI containing 78 single-family lots on a 23.849-acre tract of land identified as a portion of Tract 7 and all of Tract 7-06 of the J. Strickland Survey, Abstract No. 187, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 74 (PD-74) for Single-Family 10 (SF-10) District land uses, generally located adjacent to Breezy Hill Road north of the intersection of Breezy Hill Road and FM-552, and take any action necessary.

IX. PUBLIC HEARING ITEMS

p.93 1. **Z2019-025** - Hold a public hearing to discuss and consider a request for the approval of an **ordinance** for a text amendment amending the Permissible Use Charts contained in Article IV, Permissible Uses, of the Unified Development Code [Ordinance No. 04-38] for the purpose of allowing the Rental, Sales, and Service of Heavy Machinery and Equipment land use by Specific Use Permit (SUP) in the Commercial (C) District, and take any action necessary. **(1st Reading)**

X. ACTION ITEMS

p.99 1. Discuss and consider adoption of a resolution setting solid waste collection rates, and take any action necessary

p.103 **2.** Discuss and consider an update regarding the Complete Count Committee for the U.S. 2020 Census and take any action necessary.

p.108 **3.** Discuss and consider an update regarding the South Lakeshore/Summit Ridge reconstruction project, and take any action necessary.

p.110 **4.** Discuss and consider (re)appointments to the city's Historic Preservation Advisory Board and Main Street Advisory Board, and take any action necessary.

XI. EXECUTIVE SESSION

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding Facilities Agreement litigation pursuant to Section 551.071 (Consultation with Attorney)
2. Discussion regarding Breezy Hill Road pursuant to Section § 551.071 (Consultation with Attorney)
3. Discussion regarding possible purchase/acquisition of real property for park land in the north portion of the city, pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

XII. RECONVENE PUBLIC MEETING & TAKE ANY ACTION AS RESULT OF EXECUTIVE SESSION

XIII. ADJOURNMENT

This facility is wheelchair accessible and accessible parking spaces are available. Request for accommodations or interpretive services must be made 48 hours prior to this meeting. Please contact the City Secretary's Office at (972) 771-7700 or FAX (972) 771-7727 for further information.

The City of Rockwall City Council reserves the right to adjourn into executive session at any time to discuss any of the matters listed on the agenda above, as authorized by Texas Government Code § 551.071 (Consultation with Attorney) § 551.072 (Deliberations about Real Property) § 551.074 (Personnel Matters) and § 551.087 (Economic Development)

I, Kristy Cole, City Secretary for the City of Rockwall, Texas, do hereby certify that this Agenda was posted at City Hall, in a place readily accessible to the general public at all times, on the 13th day of December, 2019 at 4:00 p.m. and remained so posted for at least 72 continuous hours preceding the scheduled time of said meeting.

MINUTES

ROCKWALL CITY COUNCIL REGULAR MEETING
Monday, December 02, 2019 - 5:00 PM
City Hall Council Chambers - 385 S. Goliad St., Rockwall, TX 75087

I. CALL PUBLIC MEETING TO ORDER

Mayor Pro Tem Dana Macalik called the meeting to order at 5:00 p.m. Present were Mayor Pro Tem Dana Macalik, Councilmembers Patrick Trowbridge, John Hohenshelt, Kevin Fowler, Bennie Daniels and Trace Johannesen as well as City Manager Rick Crowley, Assistant City Managers Mary Smith and Joey Boyd and City Attorney Frank Garza. Mayor Jim Pruitt was absent from the entirety of the council meeting.

Mrs. Macalik read the following discussion items into the record before recessing the public meeting to go into Executive Session at 5:01 p.m.

II. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding legal issues pertaining to potential annexation/development in the Extraterritorial Jurisdiction (ETJ) pursuant to Section §551.071 (Attorney/Client Consultation).
2. Discussion regarding potential litigation concerning a franchise utility provider (Spectrum Cable) pursuant to Section §551.071 (Consultation with Attorney).
3. Discussion regarding sale of real property in the vicinity of John King Boulevard pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
4. Discussion regarding ballot voting associated with appointments to the Rockwall Central Appraisal District Board pursuant to Section 551.074 (personnel matters)
5. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

III. ADJOURN EXECUTIVE SESSION

Council adjourned from Executive Session at 5:36 p.m.

IV. RECONVENE PUBLIC MEETING (6:00 P.M.)

Mayor Pro Tem Macalik reconvened the public meeting at 6:00 p.m. with 6 of the 7 council members being present (Pruitt absent).

V. INVOCATION AND PLEDGE OF ALLEGIANCE – COUNCILMEMBER HOHENSHELT

Councilmember Hohenshelt delivered the invocation and led the Pledge of Allegiance.

VI. Open Forum

Mayor Pro Tem Macalik explained how Open Forum is conducted, asking if anyone in the audience would like to come forth and address the Council at this time. There being no one indicating such, she then closed Open Forum.

VII. Take Any Action as a Result of Executive Session

Indication was given that no action was needed as a result of Executive Session.

VIII. Consent Agenda

1. Consider approval of the minutes from the November 18, 2019 regular city council meeting, and take any action necessary.
2. **MIS2019-014** - Consider approving an **ordinance** amending the OURHometown Vision 2040 Comprehensive Plan for the purpose of updating the water and wastewater master plans, and take any action necessary **(2nd Reading).**
3. **P2019-044** - Consider a request by Arlyn Samuelson of Westwood Professional Services on behalf of Carolina Molina of SPR Packaging for the approval of Lot 3, Block A, SPR Packaging Addition being a replat of a 10.189-acre parcel of land identified as Lot 2, Block A, SPR Packaging Addition, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1480 Justin Road, and take any action necessary.
4. **P2019-047** - Consider a request by Matt Lucas, PE of Kimley Horn on behalf of Kevin J. Lloyd of 2424 MTA Realty, LLC for the approval of Lots 1, 2, & 3, Block A, MTA Andrews Addition being a final plat of a 9.6990-acre tract of land identified as Tract 15 of the E. P. G. Chisum Survey, Abstract No. 64, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the Scenic Overlay (SOV) District, located at the southwest corner of Ridge Road [FM-740] and Turtle Cove Boulevard, addressed as 2424 Ridge Road, and take any action necessary.
5. **MIS2019-015** - Consider a request by Michael Guerrero of Atticus Harbor Village, LLC for the approval of an alternative tree mitigation plan for a 6.915-acre tract of land identified as Lots 3A, 4A & 5A, Isaac Brown Addition, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 32 (PD-32), situated within the Interior Subdistrict, located adjacent to Summer Lee Drive southwest of the intersection of Horizon Road [FM-3097] and Summer Lee Drive, and take any action necessary.
6. Consider approval of a proposal from Ramco Rugged Portables in the amount of $67,845.95 for the Getac cloud storage solution and annual maintenance, appropriating Seizure Funds for this purpose, and take any action necessary.

Councilman Hohenshelt moved to approve the Consent Agenda as presented (#s 1, 2, 3, 4, 5, and 6). Councilmember Trowbridge seconded the motion. The ordinance caption was read as follows:

CITY OF ROCKWALL

ORDINANCE NO. 19-45

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ADOPTING REVISIONS TO THE MASTER WATER PLAN AND THE MASTER WASTEWATER PLAN CONTAINED IN THE OURHOMETOWN VISION 2040 COMPREHENSIVE PLAN IN ACCORDANCE WITH THE CITY'S HOME RULE CHARTER.

The motion passed by a vote of 6 ayes with 1 absent (Pruitt).

IX. ACTION ITEMS

1. Discussion and consider a resolution providing for the casting of votes and submission of the official voting ballot associated with appointments to the Rockwall Central Appraisal District Board for the year 2020-2021, and take any action necessary.

Councilmember Fowler moved to approve the resolution, assigning 449 votes to John Hohenshelt and 1 vote to Patrick Trowbridge. Councilmember Johannesen seconded the motion, which passed by a vote of 6 ayes with 1 absent (Pruitt).

2. **A2019-001** - Discuss and consider the approval of a resolution stating an intention to commence annexation proceedings by Petition per Chapter 43, Subchapter C-4 of the Texas Local Government Code for a 41.49-acre tract of land situated within the City of Rockwall's Extraterritorial Jurisdiction (ETJ), and generally located on the north side of Cornelius Road west of the intersection of Cornelius Road and Stodghill Road [FM-3549], and take any action necessary.

Councilmember Trowbridge moved to approve A2019-001 (and the associated resolution). Councilmember Hohenshelt seconded the motion, which passed by a vote of 6 ayes with 1 absent (Pruitt).

3. Discuss and consider approval of a facilities agreement with 549/I-30 Partners, L.P. for the construction of the Justin Road and FM-3549 intersection, and take any action necessary.

City Engineer / Director of Public Works, Amy Williams provided brief background information concerning this agenda item. Following brief questions and answers, Councilmember Fowler moved to approve the facilities agreement. Councilmember Hohenshelt seconded the motion, which passed by a vote of 6 ayes to 0 nays with 1 absent (Pruitt).

X. CITY MANAGER'S REPORT, DEPARTMENTAL REPORTS AND RELATED DISCUSSIONS PERTAINING TO CURRENT CITY ACTIVITIES, UPCOMING MEETINGS, FUTURE LEGISLATIVE ACTIVITIES, AND OTHER RELATED MATTERS.

1. Departmental Reports

Building Inspections Monthly Report - October 2019
GIS Division Monthly Report - October 2019
Harbor PD Monthly Report - October 2019
Internal Operations Department Report - October 2019

Recreation Monthly Report - October 2019
Rockwall Animal Adoption Center Monthly Report - October 2019
Rockwall Fire Department Monthly Report - October 2019
Rockwall Police Department Monthly Report - October 2019
STAR Transit Monthly Report - October 2019

2. City Manager's Report

Brief announcements were made, including a reminder about the City's upcoming Christmas Tree Lighting, Christmas parade and associated downtown events on Saturday, December 7.

XI. Executive Session

The City of Rockwall City Council will Recess into Executive Session to discuss the following matters as authorized by Chapter 551 of the Texas Government Code:

1. Discussion regarding legal issues pertaining to potential annexation/development in the Extraterritorial Jurisdiction (ETJ) pursuant to Section §551.071 (Attorney/Client Consultation).
2. Discussion regarding potential litigation concerning a franchise utility provider (Spectrum Cable) pursuant to Section §551.071 (Consultation with Attorney).
3. Discussion regarding sale of real property in the vicinity of John King Boulevard pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
4. Discussion regarding ballot voting associated with appointments to the Rockwall Central Appraisal District Board pursuant to Section 551.074 (personnel matters)
5. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

XII. Reconvene Public Meeting & Take Any Action as Result of Executive Session

Council did not convene in Executive Session following the close of the public meeting agenda.

XIII. Adjournment

Mayor Pro Tem Macalik adjourned the meeting at 6:13 p.m.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 16th DAY OF DECEMBER, 2019.

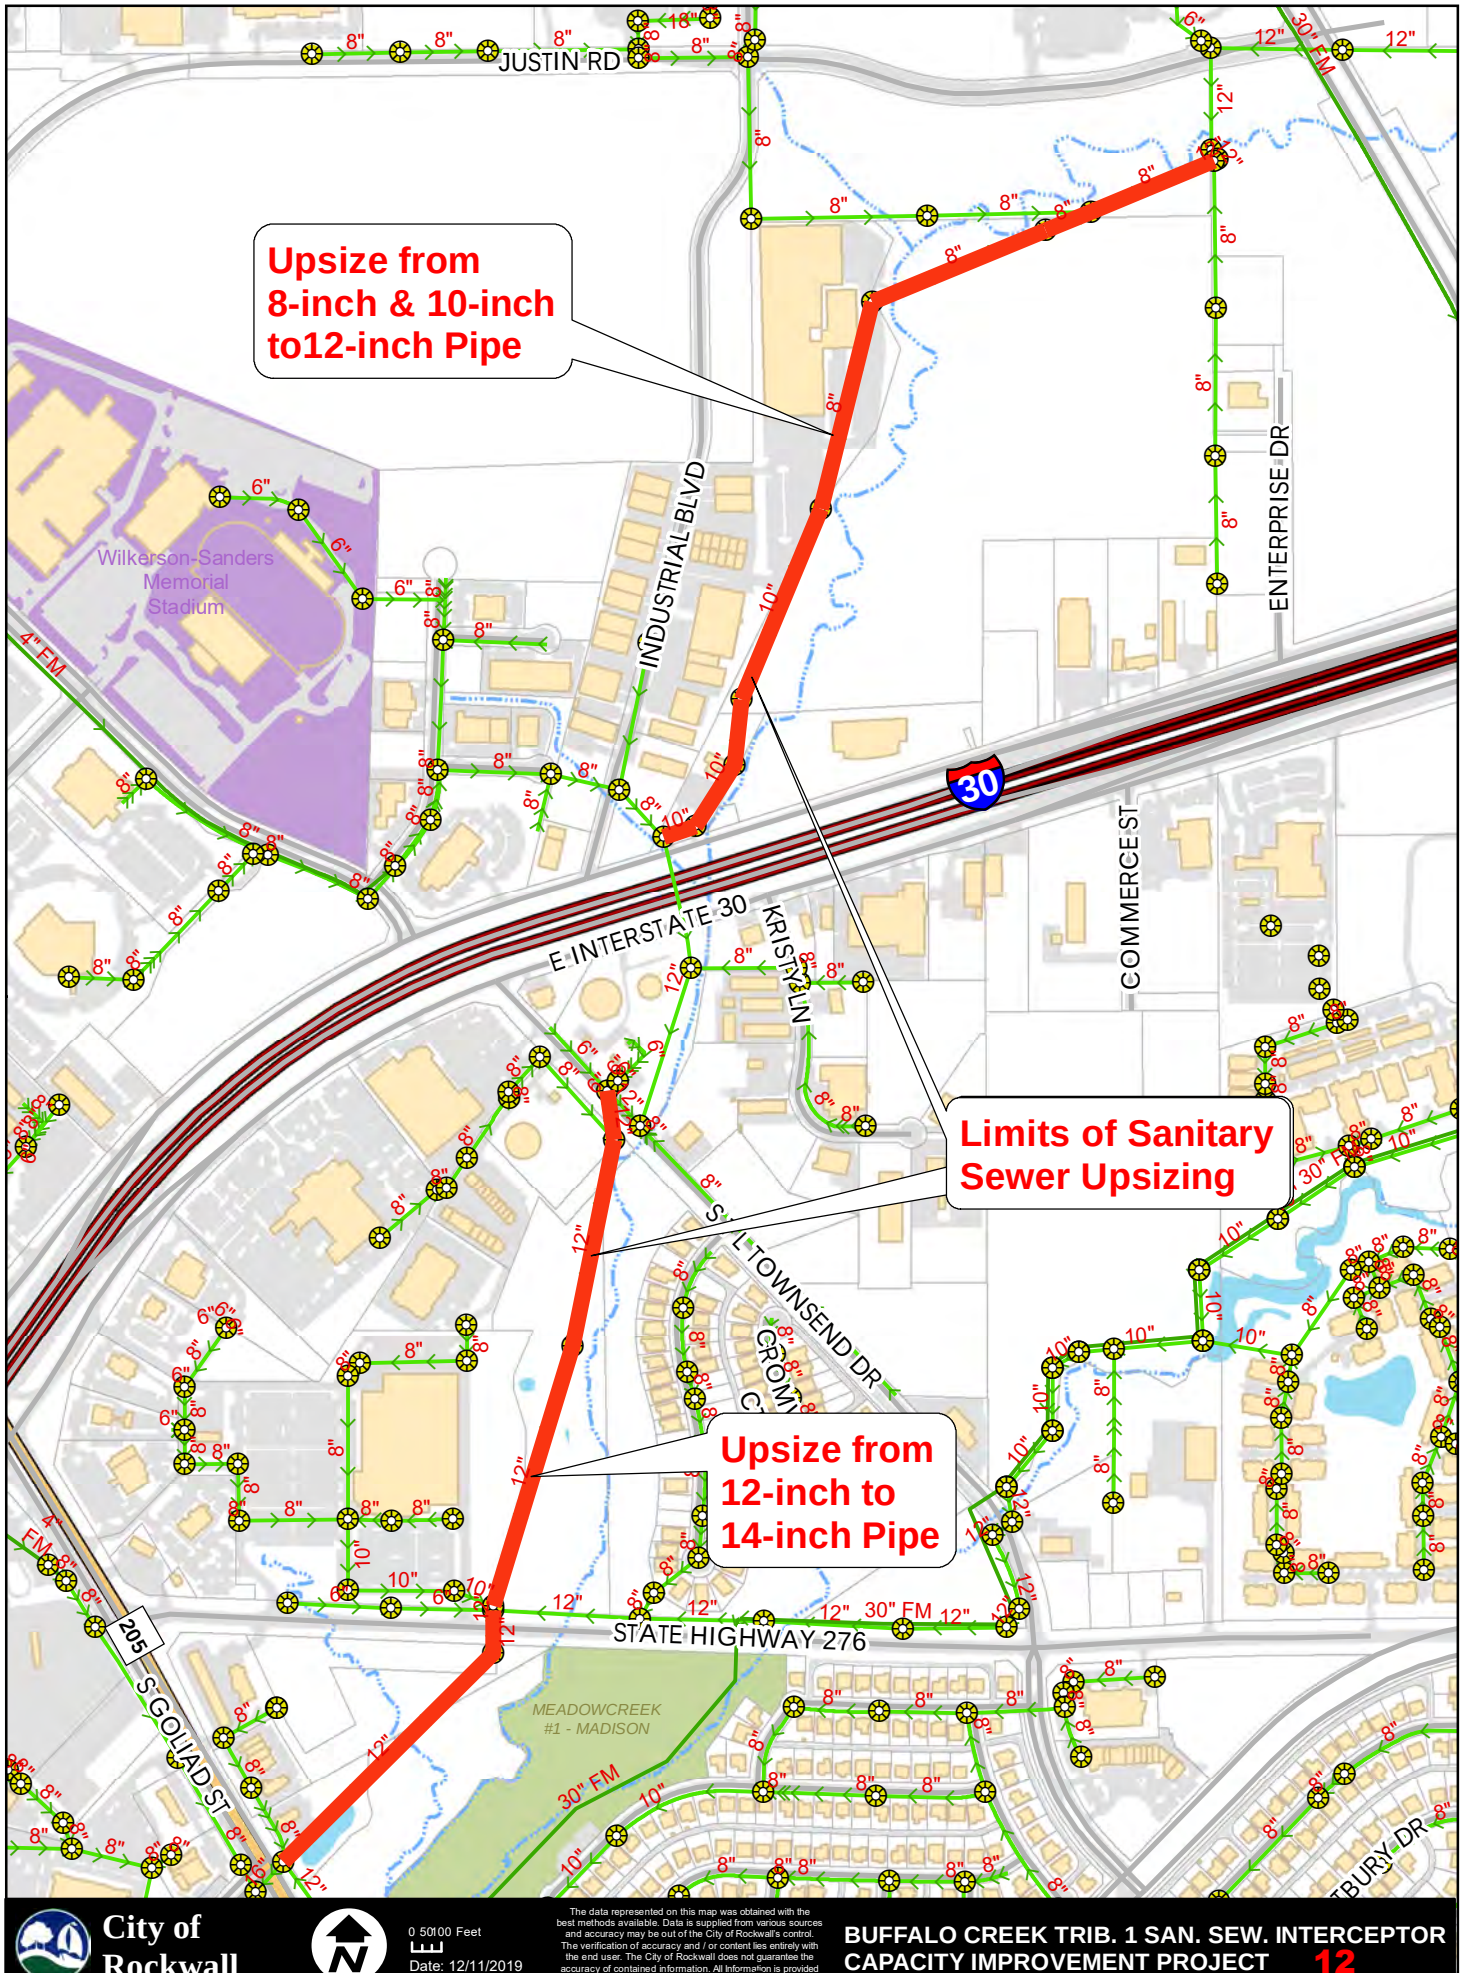
City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E, Public Works Director/City Engineer**

DATE: **December 11, 2019**



SUBJECT: **Buffalo Creek Tributary 1 Sanitary Sewer Interceptor Capacity Improvements Project**

The Buffalo Creek Tributary 1 Sanitary Sewer Interceptor currently services approximately 1,200-acres of residential, commercial, and industrial property, and is generally located between the intersections of S. Goliad Street and Ralph Hall Parkway and John King Boulevard and Justin Road (see attached map). Due to the growth of the community, the interceptor -- which was constructed between 1982 and 1997 - is currently experiencing flows beyond the design capacities of the line. Recently, the City of Rockwall Sewer Department attempted to inspect the line, but was only able to inspect 1,200 of the 6,500-linear feet of sewer pipe due to the inceptor's current capacity deficiencies. Approximately 80% of the length of the interceptor is under capacity for the existing sanitary sewer flows. For more information regarding the capacity deficiencies, please reference the Scope of Services in the attached engineering contract. The proposed capacity improvements would look to correct this issue by upsizing the existing line north of IH-30 from an eight (8) and ten (10) inch pipe to a 12-inch pipe, and south of IH-30 from a 12-inch pipe to a 14-inch pipe. Staff anticipates that the proposed improvements will also support future development in the basin based on the Future Land Use Map. As part of the scope of this project, different construction methods will be evaluated (e.g. open cut, trenches, etc.) to determine which method is the most advantageous to the City and the adjacent property owners.

Based on the aforementioned issues, staff requests that the City Council consider approving the professional engineering services contract for Birkhoff, Hendricks & Carter, L.L.P. to perform the engineering design services for the Buffalo Creek Tributary 1 Sanitary Sewer Interceptor Capacity Improvements Project in an amount not to exceed $164,780.00, to be paid for out of Water and Sanitary Sewer Funds.

STATE OF TEXAS ♦

♦

COUNTY OF ROCKWALL ♦

PROFESSIONAL ENGINEERING SERVICES CONTRACT

This Agreement is made and entered into in Rockwall County, Texas, between City of Rockwall, Texas ("CITY"), a municipal corporation and political subdivision of the State of Texas, acting by and through its City Manager and Birkhoff, Hendricks and Carter, L.L.P., ("ENGINEER"), located at 11910 Greenville Avenue, Suite 600, Dallas, Texas, Engineers duly licensed and practicing under the laws of the State of Texas.

WHEREAS, CITY desires to engage Engineer as an independent contractor to render certain technical and professional services necessary for performing:

PROFESSIONAL ENGINEERING SERVICES for the Buffalo Creek Tributary 1 Sanitary Sewer Interceptor Improvements project.

NOW, THEREFORE, for and in consideration of the mutual covenants and agreements contained herein, the Parties hereby agree as follows:

1. Scope of Work

Engineer agrees to perform professional engineering services as specifically defined in this Contract as Attachment "A" and as authorized by CITY. Specifically, Engineer shall perform Professional services as requested by CITY and defined in Attachment "A".

The Parties by mutual agreement through contract amendments may provide for additional technical and professional services to be performed under the basic general terms and conditions of this Contract. CITY reserves the right to enter into another agreement with other engineering firms to provide the same or similar professional services during the term of this Contract for different projects.

2. Compensation & Term of Agreement

Cost for such services will be an amount not to exceed One Hundred Sixty-Four Thousand Seven Hundred and Eighty dollars ($164,780.00) and billed in accordance with the payment schedule provided in Attachment "B". Engineer is not authorized to perform any work beyond the limited not to exceed amount without authorized written approval by CITY.

The term of this Agreement shall commence upon execution of this agreement and follow the schedule described in Attachment "C". In the event of termination, Engineer will assist the CITY in arranging a smooth transition process. However, Engineer's obligation to provide services to the CITY will cease upon the effective date of termination, unless otherwise agreed in writing.

3. Method of Payment

CITY shall pay Engineer its fees based on the presentation by Engineer to CITY of a correct monthly statement for all the amounts earned under the Contract together with reasonable supporting documentation verifying the accuracy of the fees and expenses. CITY shall then pay Engineer its fee within thirty (30) days after presentation of the accurate monthly statement by Engineer to CITY. CITY is a State sales and use tax exempt political subdivision of the State of Texas. All records supporting payment shall be kept in the offices of Engineer for a period of not less than three (3) years and shall be made available to CITY for inspection, audit or copying upon reasonable request.

4. Engineer's Standard of Care

Engineer shall provide its services under this Contract with the same degree of care, skill and diligence as is ordinarily provided by a professional Engineer under similar circumstances for a similar project. Engineer represents that it has the capability, experience, available personnel, and means required to perform the services contemplated by this Contract. Services will be performed using personnel and equipment qualified and/or suitable to perform the work requested by the CITY. CITY retains the right to report to Engineer any unsatisfactory performance of Engineer personnel for appropriate corrective action. Engineer shall comply with applicable federal, state, and local laws in connection with any work performed hereunder.

Engineer will seek written CITY approval to accept any contract or perform any services for any person, entity, or business working on this project. CITY may waive this potential conflict, but such waiver is at CITY's sole discretion and its decision shall be final.

5. Ownership of Documents

As part of the total compensation which CITY has agreed to pay Engineer for the professional services to be rendered under this Contract, Engineer agrees that hard copies of all finished and unfinished documents, data, studies, surveys, drawings, specifications, field notes, maps, models, photographs, preliminary reports, reports, bid packet/construction contract documents/advertisement for bids incorporating any CITY standard provisions provided by Engineer, will remain the property of the CITY. Engineer will furnish CITY with paper and electronic copies, to the extent they are available, of all of the foregoing to facilitate coordination, however, ownership of the underlying work product shall remain the intellectual property of the Engineer. Engineer shall have the right to use such work products for Engineer's purposes. However, such documents are not intended to be suitable for reuse by CITY or others on extension of the Project or on any other project. Any reuse without the express written consent of the Engineer will be at reuser's sole risk and without liability or legal exposure to the Engineer, and CITY to the extent allowed by law, shall hold harmless the Engineer from all claims, damages, losses, expenses, and costs, including attorneys' fees arising out of or resulting from the reuse of said documents without the Engineer's consent. The granting of such consent will entitle the Engineer to further compensation at rates to be agreed upon by CITY and the Engineer. The above notwithstanding, Engineer shall retain all rights in its standard drawing details, designs, specifications, databases, computer software and any other proprietary and intellectual property information provided pursuant to this Contract, whether or not such proprietary information was modified during the course of

providing the services.

6. Insurance

A. Engineer agrees to maintain Worker's Compensation and Employer's Liability Insurance to cover all of its own personnel engaged in performing services for CITY under this Contract in at least the following amounts:

Workmen's Compensation – Statutory
Employer's Liability – $100,000
Bodily Injury by Disease - $500,000 (policy limits)
Bodily Injury by Disease - $100,000 (each employee)

B. Engineer also agrees to maintain Commercial General Liability, Business Automobile Liability, and Umbrella Liability Insurance covering claims against Engineer for damages resulting from bodily injury, death or property damages from accidents arising in the course of work performed under this Contract in not less than the following amounts:

$2,000,000 General aggregate limit

$1,000,000 each occurrence sub-limit for all bodily injury or property damage incurred all in one occurrence

$1,000,000 each occurrence sub-limit for Personal Injury and Advertising

C. Engineer shall add CITY, its City Council members and employees, as an additional insureds on all required insurance policies, except worker's compensation, employer's liability and errors and omissions insurance. The Commercial General Liability Policy and Umbrella Liability Policy shall be of an "occurrence" type policy.

D. Engineer shall furnish CITY with an Insurance Certificate on the date this Contract is executed and accepted by CITY, which confirms that all above required insurance policies are in full force and effect.

E. Engineer agrees to maintain errors and omissions professional liability insurance in the amount of not less than one million dollars ($1,000,000) annual aggregate, on a claims made basis, as long as reasonably available under standard policies.

7. INDEMNIFICATION

ENGINEER SHALL INDEMNIFY AND SAVE HARMLESS THE CITY AND ITS CITY COUNCIL MEMBERS AND EMPLOYEES FROM SUITS, ACTIONS, LOSSES, DAMAGES, CLAIMS, OR LIABILITY, INCLUDING WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, ALL EXPENSES OF LITIGATION, COURT COSTS, AND REASONABLE ATTORNEY'S FEES FOR INJURY OR DEATH TO ANY PERSON, OR INJURY TO ANY PROPERTY, RECEIVED OR SUSTAINED BY ANY PERSON OR PERSONS OR PROPERTY, TO THE EXTENT CAUSED BY THE NEGLIGENT ACTS OF ENGINEER OR ITS AGENTS OR EMPLOYEES, IN THE EXECUTION OF PERFORMANCE OF THIS CONTRACT.

ENGINEER'S TOTAL LIABILITY TO CITY FOR ANY LOSS OR DAMAGES FROM CLAIMS ARISING OUT OF, OR IN CONNECTION WITH, THIS CONTRACT FROM ANY CAUSE INCLUDING ENGINEER'S STRICT LIABILITY, BREACH OF CONTRACT, OR PROFESSIONAL NEGLIGENCE, ERRORS AND OMISSIONS SHALL NOT EXCEED ONE MILLION DOLLARS ($1,000,000). NEITHER PARTY TO THIS AGREEMENT SHALL BE LIABLE TO THE OTHER PARTY OR ANY THIRD PARTY CLAIMING THROUGH THE OTHER RESPECTIVE PARTY, FOR ANY SPECIAL, INCIDENTAL, INDIRECT, PUNITIVE, LIQUIDATED, DELAY OR CONSEQUENTIAL DAMAGES OF ANY KIND INCLUDING BUT NOT LIMITED TO LOST PROFITS OR USE OF PROPERTY, FACILITIES OR RESOURCES, THAT MAY RESULT FROM THIS AGREEMENT, OR OUT OF ANY GOODS OR SERVICES FURNISHED HEREUNDER.

8. Addresses for Notices and Communications

CITY
Amy Williams, P.E.
Director of Public Works/City Engineer
City of Rockwall
385 S. Goliad Street
Rockwall, Texas 75087

ENGINEER
Derek B. Chaney, P.E., R.P.L.S.
Partner
Birkhoff, Hendricks & Carter, L.L.P.
11910 Greenville Ave., #600
Dallas, Texas 75243

All notices and communications under this Contract shall be mailed or delivered to **CITY** and **Engineer** at the above addresses.

9. Successors and Assigns

CITY and Engineer each binds itself and its successors, executors, administrators and assigns to the other parties of this Contract and to the successors, executors, administrators and assigns of such other parties, in respect to all covenants of this Contract. Except as noted in the first part of this Paragraph, neither CITY nor Engineer shall assign, sublet or transfer its interest in this Contract without the written consent of the other. Nothing herein shall be construed as creating any personal liability on the part of any officer, council member, employee or agent of any public body which is a party hereto.

10. Termination for Convenience of the Parties

Engineer and CITY may terminate this Contract for their convenience at any time by giving at least thirty (30) days notice in writing to each other. If the Contract is terminated by CITY and/or Engineer as provided herein, Engineer will be paid for the Work provided and expenses incurred up to the termination date, if such final compensation is approved by CITY, in its sole discretion. If this Contract is terminated due to the fault of Engineer, Paragraph 10 hereof, relative to Termination for Cause, shall apply.

11. Changes

CITY may, from time to time, request changes in the Scope of Work of **Engineer** to be performed hereunder. Such changes, including any increase or decrease in the amount of **Engineer's** compensation, or time for performance, which are mutually agreed upon by and between **CITY** and **Engineer**, shall be incorporated in written amendments to this Contract. Any subsequent contract amendments shall be executed by the City Manager or other authorized representative as designated by the City Manager or City Council.

Any alterations, additions or deletions to the terms of this Contract, including the scope of work, shall be by amendment **in writing** executed by both CITY and Engineer.

13. Reports and Information

Engineer, at such times and in such forms as **CITY** may reasonably require, and as specified in the Scope of Work or in additional Contract Amendments shall furnish **CITY** periodic reports pertaining to the Work or services undertaken pursuant to this Contract, the cost and obligations incurred, or to be incurred in connection therewith, and any other matter covered by this Contract.

14. Entire Agreement

This Contract and its Attachments and any future Contract Amendments constitute the entire agreement, and supersede all prior agreements and understandings between the parties concerning the subject matter of this Contract.

15. Waiver

The failure on the part of either party herein at any time to require the performance by the other party, of any portion of this Contract, shall not be deemed a waiver of, or in any way affect that party's rights to enforce such provision, or any other provision. Any waiver by any party herein of any provision hereof, shall not be taken or held to be a waiver of any other provision hereof, or any other breach hereof.

16. Severability

The invalidity or unenforceability of any provision of this Contract shall not affect the validity or enforceability of any other provision of this Contract.

17. Survival

Any and all representations, conditions and warranties made by Engineer under this Contract are of the essence of this Contract and shall survive the execution, delivery and termination of it.

18. Governing Powers and Law

Both Parties agree and understand that the City does not waive or surrender any of its governmental powers by execution of this Agreement. To that end, the parties further understand that this agreement shall not be considered a contract for goods or services under Texas Local Government Code, Section 271.151 and Contractor waives any right or entitlement granted said provisions. This Contract is governed by the laws of the State of Texas and all obligations of the parties under this Contract are performable in Rockwall County, Texas.

19. Attorney's Fees

If it is necessary for either Party herein to file a cause of action at law or in equity against the other Party due to: (a) a breach of this Contract by the other Party and/or (b) any intentional and/or negligent act or omission by the other Party arising out of this Contract, the non-breaching or non-negligent Party shall be entitled to reasonable attorney's fees and costs, and any necessary disbursements, in addition to any other relief to which it is legally entitled.

20. State or Federal Laws

This Contract is subject to all applicable federal and state laws, statutes, codes, and any applicable permits, ordinances, rules, orders and regulations of any local, state or federal government authority having or asserting jurisdiction, but nothing contained herein shall be construed as a waiver of any right to question or contest any such law, ordinance, order, rule or regulation in any forum having jurisdiction.

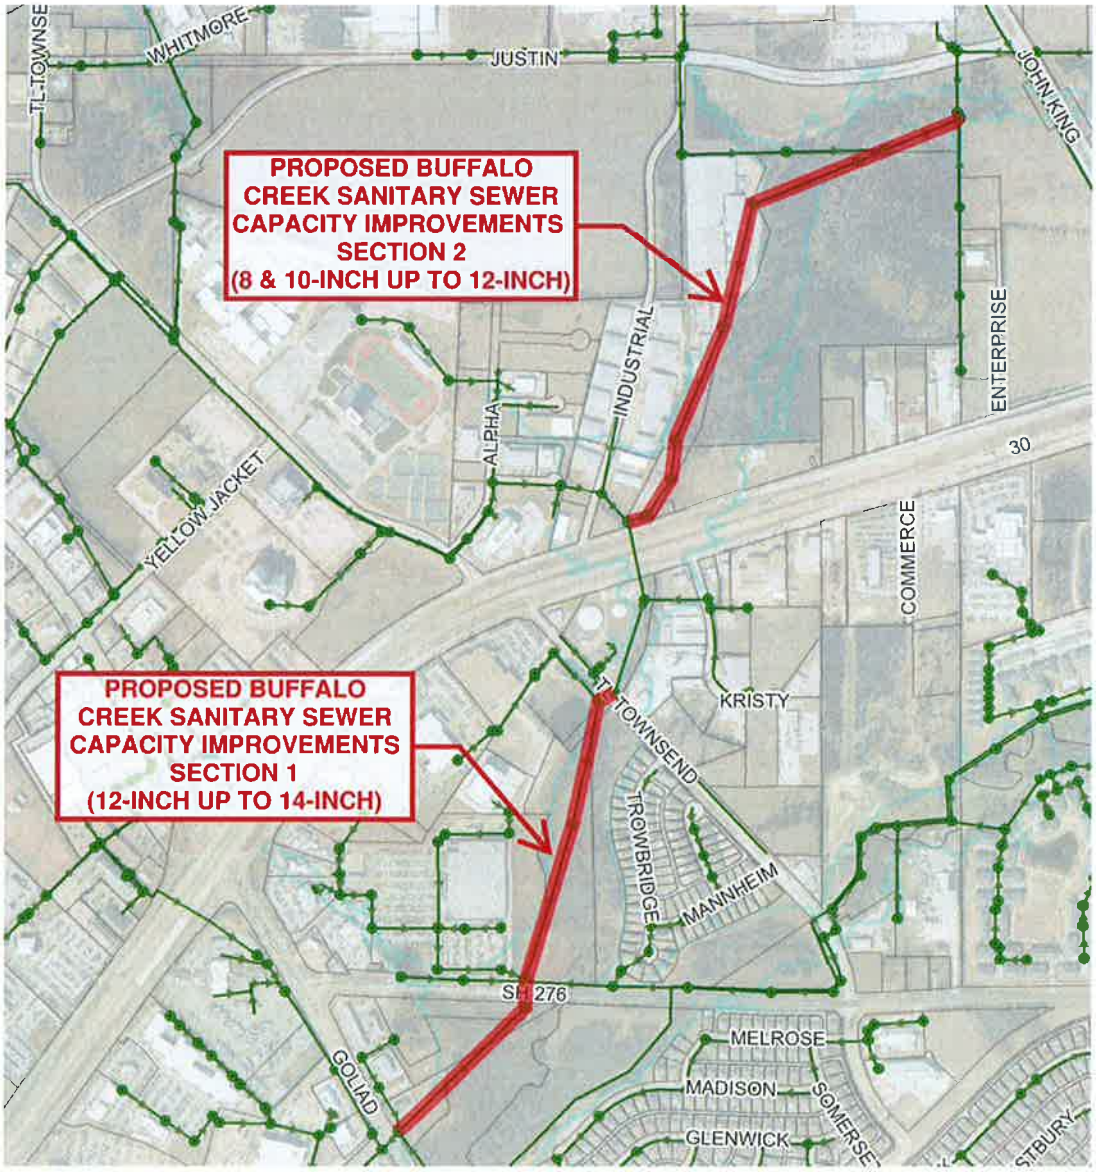
Scope of Services

Buffalo Creek Tributary 1 Sanitary Sewer Interceptor Improvements

Project Description:

The City of Rockwall (City) desires to engage the services of Birkhoff, Hendricks and Carter (Consultant) to provide engineering design, bidding, and construction administration services in connection with the Buffalo Creek Tributary 1 Sanitary Sewer Interceptor Improvements Project.

These improvements are required to address capacity deficiencies identified as part of the City's 2015 Wastewater Flow Monitoring Study and to provide additional capacity to support future development growth in the basin. The proposed improvements are separated into Section 1 and Section 2 as summarized below.



Section 1: The existing 12-inch diameter sanitary sewer (from S.H. 205 (Goliad) to TL Townsend) has a conveyance capacity in the range of 1.32 million gallons per day (MGD) compared to an existing peak wastewater flow in the range of 2.30 MGD. This represents a 74% deficiency in capacity, which results in the pipe operating in a surcharged state (water level above the top of pipe) under peak flow conditions.

The proposed capacity improvements include approximately 3,200 linear feet of proposed 14-inch diameter sanitary sewer.

Section 2: The existing 8-inch and 10-inch diameter sanitary sewer (from I.H. 30 to John King) have a conveyance capacity in the range of 0.68 MGD compared to a peak wastewater flow in the range of 0.96 MGD. This represents a 41% deficiency in capacity, which results in the pipe operating in a surcharged state under peak flow conditions.

The proposed capacity improvements include approximately 3,300 linear feet of proposed 12-inch diameter sanitary sewer.

The proposed improvements are consistent with the vision of the City's 10-Year (2019-2029) Wastewater System Capital Improvement Plan (CIP). A project location map is provided on the following page.

PROJECT LOCATION MAP

BASIC SERVICES

1. Preliminary Design Phase

1.1. Project Management

1.1.1. Conduct project kickoff meeting with Consultant Project Manager and City Staff.

1.1.2. Prepare and send Project Status Update (PSU) to City's Project Manager on monthly basis. PSU will summarize work completed in previous period, work in progress and/or anticipated to be completed in next period, actions or information needed from City, and a Project schedule update. PSU will be attached to the monthly invoice.

1.1.3. Prepare and submit project schedule to City staff.

1.2. Preliminary Design

1.2.1. Review record documents, and other pertinent information related to proposed project provided by the City.

1.2.2. Review City master plans, design standards, specifications, construction details, that may impact the design. Review of documents will include, but not limited to, the following:

(a) City of Rockwall Master Thoroughfare Plan
(b) City of Rockwall Water/Wastewater Master Plan
(c) City of Rockwall Standards of Design and Construction
(d) City of Rockwall Trail Master Plan

1.2.3. Develop AutoCAD base map showing existing Right-of-Way (ROW), property lines, known easements, and known utilities in the vicinity of the proposed improvements.

1.2.4. Reference the most current update to the City of Rockwall Wastewater Collection System Hydraulic Model (maintained by Consultant) to confirm existing and buildout design flow requirements at major design points along the proposed improvements.

1.2.5. Obtain and review as built or final design construction plans for the East Buffalo Creek Trunk Sewer Project (prepared by others in association with proposed SWBC Apartment Development) currently under construction to verify any interception of wastewater flows currently conveyed by existing Buffalo Creek Sanitary Sewer.

1.2.6. Coordinate with the City Staff to obtain video footage of CCTV camera pipe inspection of the existing sanitary sewer lines proposed for improvement. Results will be used to determine suitability of existing sanitary sewer lines for trenchless improvement methods (e.g. pipe bursting). CCTV pipe inspection to be performed by City of Rockwall Staff.

1.2.7. Based on evaluation of available information, including relevant construction plans, CCTV inspection reports, and preliminary survey data, develop recommended size, limits, and installation method for proposed improvements.

1.2.8. Prepare design memo summarizing findings from preliminary design, including an updated location map and engineers' opinion of project budget based on the proposed improvements.

1.2.9. Conduct meeting with City Staff to review and present findings from preliminary design.

2. Final Design Phase

2.1. Project Management

2.1.1. Conduct progress meetings at 60% and 90% completion to monitor the development of the project regarding project status, coordination issues and discuss City review comments of the plans.

2.1.2. Prepare and send PSU to City's Project Manager on monthly basis. PSU will summarize work completed in previous period, work in progress and/or anticipated to be completed in next period, actions or information needed from City, and a project schedule update. Invoice will be sent at end of the month with PSU.

2.1.3. Conduct up to two (2) project site visits.

2.2. Submittals

2.2.1. Submit 60% and 90% progress submittals to the City for review and comment. The following will be required for each submittal:

(a) Construction Plans
- i. Two (2) Full Size copies – 22-inch x 34-inch
- ii. Two (2) Half Size copies – 11-inch x 17-inch
- iii. Electronic PDF copy
- iv. Electronic PDF copy– Scanned City comments previous submittal

(b) Engineer's Opinion of Probable Construction Cost
- i. Two (2) Copies and electronic PDF copy

(c) 90% only – Project Specifications and Bidding Documents
- i. Two (2) Copies and electronic PDF copy

2.3 Construction Plans

(a) Each plan sheet in the construction plans set will conform to the Engineering Drawing Requirements set forth in the City of Rockwall's Standards of Design and Construction.

(b) Plan sheets will include additional documentation, notation, and clarification required by the City's Project Manager.

(c) Each stage of the construction plan review process will address City comments from previous submittals.

(d) Below is a table of the required construction plan sheets and at which submittals they are required.

Plan Sheets	**60%**	**90%**
Cover Sheet w/ Location Map and Sheet Index	X	X
Legend Sheet	X	X
General Notes Sheet	X	X
Horizontal/Vertical Coordinate Control Sheet (1"=40' scale)	X	X
Erosion Control Plan (1"=40' scale)		X
Sanitary Sewer Plan/Profiles (1"=20'H, 1'=5'V scale)	X	X
Temporary Bypass Pumping Plan (no greater than 1"=100' scale)		X
Site Access Plan (no greater than 1"=100'scale)		X
Construction Details		X

(e) Establish the location of existing public utilities based upon information provided by the City, and field survey information. (60%)

(f) Design and prepare proposed sanitary sewer plans and profiles. (60%)
(g) Design and prepare plan and profile for open cut installations as required at roadway crossings, including sizing of steel encasement pipe, if necessary. (60%)
(h) Review FEMA flood plain mapping to determine approximate elevation of 100-year floodplain along the route. If necessary, design improvements to raise existing manhole rim elevations above flood plain elevation.
(i) Show approximate horizontal and vertical location of utility crossings along the proposed route from record drawings and field surveys of manholes. (90%)
(j) Design required lateral and service connections to the existing sanitary sewer system. (90%)
(k) Identify location of insertion and receiving pits for pipe bursting. (90%)
(l) Identify required limits of pavement repair and revegetation in disturbed areas. (90%)
(m) Prepare sanitary sewer details as required to clarify intent of design. (90%)
(n) Compile applicable City Standard details and modify standard details as needed. (90%)
(o) Prepare erosion control plan. (90%)
(p) Develop temporary sewage bypassing plan based on existing average daily and peak wastewater flows reported by the City's model. (90%)

2.4 Franchise Utility Coordination

(a) Obtain list of franchise utility contacts from the City. (60%)
(b) Provide electronic PDF set of preliminary construction plans adequate for franchise utility relocation via email to each franchise utility for their review. Request each franchise utility to mark up the plans to show the size, type and location of their utilities. (60%)
(c) Attend up to two (2) franchise utility coordination meetings hosted by the City.
(d) Notify the City if any relocations are required. (90%)
(e) Conduct coordination with the franchise utilities if any relocations are required. (90%)

2.5 Specifications/Construction Contracts (90%)

Prepare general notes, specifications, and bidding documents in accordance with City of Rockwall requirements. Identify and prepare special specifications and/or special provisions applicable to the project. Prepare proposal and bid schedule of applicable items.

2.5.1 Contract documents will include the following:

(a) City of Rockwall standard construction contract forms
(b) Notice to bidders
(c) Special instructions to bidders
(d) Bid Schedule (Bid-Tab) – Electronic for Bidding
(e) Standard construction contract
(f) Performance bond
(g) Payment bond
(h) Maintenance bond
(i) Certificate of insurance
(j) General conditions
(k) Special conditions

(l) Technical specifications
(m) Permits for work as may be required from the TxDOT

2.6 Engineer's Opinion of Construction Cost (60% and 90%)
Generate tabulation of proposed quantities of work and formulate an engineer's opinion of probable construction cost based on historic bidding data of similar projects.

2.7 Agency Permitting/Coordination (City to coordinate with those not listed as applicable)

2.7.1 TxDOT - Consultant to coordinate with TxDOT on items related to the project crossing or being adjacent to the TxDOT right-of-way (IH-30, S.H. 276 & S.H. 205). If necessary, provide one construction plan submittal at 60% and assist City with permit submittals as required to achieve acceptance of proposed improvements.

3 Bidding Phase

3.1 Furnish the City with one 11-inch x 17-inch set of final construction plans, and one set of final Bidding Documents and Specifications for use during the bidding phase. Documents shall also be provided to the City in electronic PDF format.

3.2 City will be responsible for advertisement of the project in the Local Paper

3.3 Consultant will upload plans and specifications to the project bidding distribution site CivCast.

3.4 Respond to contractor questions and provide design clarifications in Addenda format.

3.5 Attendance at the pre-bid meeting, if requested by the City.

3.6 The Consultant will prepare addenda to answer questions of the plans and specifications. The Consultant will provide the City with sealed, signed and dated addenda. The Consultant will upload the addenda to CivCast. All addenda will be posted a minimum of 24-hours before the bid opening.

3.7 The Consultant will respond to questions submitted from potential bidders and provided by the City to the Consultant a minimum of 72-hours before the bid opening.

3.8 Attendance of Bid Opening

3.9 Complete tabulation of bids; checking for mathematical errors and unbalanced bids. (Bid documents to be provided to Consultant by the City).

3.10 Provide bid tabulation, in PDF format, to City via email and to Contractors who submitted bids via CivCast.

3.11 Obtain experience record and references from the apparent lowest bidder. Check references of apparent low bidder. Formulate opinion from information received and provide a letter of recommendation for award of a construction contract.

3.12 Return Bid Bonds to bidders.

4 Construction Phase

4.1 Pre-Construction Meeting: Prepare for and attend the Pre-Construction Meeting prior to commencement of Work at the Site. Consultant to provide the following quantities of plans and specifications for distribution at the Pre-Construction Meeting.

a) Half-size plans (11-inch x 17-inch) plans – (15 Total)
7 – City (File, Engr. Dept. PM, Inspector, Sub-Inspector, Water, Wastewater, Streets/Drainage)
4 – Franchise Utility Company Reps. (AT&T, Atmos, TXU/ONCOR, Charter)
3 – Contractor/Sub-contractors
1 – Geotech/Materials Testing Lab

b) Full-size plans (24-inch x 36-inch) plans – (5 Total)
2 – City (File and Inspector)
3 – Contractor/Subcontractors

c) Specification Books – (7 Total)
3 – City (Engr. PM, Inspector, Sub Inspector)
3 – Contractor/Subcontractors
1 – Geotech/Materials Testing Lab

d) Plan Set "Approved for Construction" on CD.

4.2 Attend on-site construction observation meetings to observe progress, clarify design concepts and/or assist with solutions needed to overcome obstacles in construction (as applicable to scope of work) or to study and evaluate possible practical alternative solutions. Three (3) site visits are included in the budget. Consultant is not responsible for Contractor means and methods, phasing including but, not limited to the Project Safety Program or adherence to Safety Practices per any and all local jurisdictions and/or OSHA regulations.

4.3 When requested by the City, provide a memo of the site visit observations to the City.

4.4 Clarifications and Interpretations. Issue clarifications and interpretations of the Contract documents to City as appropriate. Field Orders authorizing variations from the requirements of the Contract Documents will be made by City from clarifications and interpretations made by the Consultant.

4.5 Shop Drawings and Samples. Review and take appropriate action in respect to Shop Drawings and Samples and other data which Contractor is required to Submit. Review of shop drawings will be completed by review of electronic PDF files provided by the Contractor. Consultant review and appropriate action will not extend to means, methods, techniques, equipment choice and usage, sequences, schedules, or procedures of construction or to related safety precautions and programs. Such appropriate action of the Consultant is limited to the following:

(a) No exceptions taken,
(b) Revise and resubmit,
(c) Make corrections noted, and
(d) Rejected.

4.6 Substitutes and "or-equal". Evaluate and determine the acceptability of substitute or "or-equal" materials and equipment proposed by Contractor in accordance with the Contract documents, but subject to the provisions of applicable standards of state or local government entities. "Or-equal" acceptance by the Consultant will only be provided if the Consultant has experience with the substitution.

4.7 Limitation of Responsibilities. The Consultant shall not be responsible for the acts or omissions of any Contractor, or of any of their subcontractors, suppliers, or of any other individual or entity performing or furnishing the Work.

4.8 Final Construction Walk Through. Consultant shall be present at the City's final construction walk through and will prepare a "punch/checklist" for the contractor to use to achieve final project acceptance.

4.9 Record Drawings: Prepare project "Record Drawings" based on information provided by the Contractor, and/or City as to the actual field placement of the work including any changes or deletions. Consultant will provide the following deliverables:

(a) Electronic copy of the record drawings shall be submitted on CD/DVD or flash drive in the following formats.

i. AutoCAD (.dwg) format

ii. Portable Document File (PDF) 400 dpi (min) (22-inch x 34-inch paper size)

(b) If applicable, an electronic copy of geotechnical reports, survey data, photographs, and exhibits used for the project, in .PDF or jpg format.

(c) Electronic copy of project specifications in Microsoft Word (.doc) and PDF format.

(d) Record drawings shall be sealed, dated and signed by the Engineer of Record in accordance with the Texas Board of Professional Engineers Policy Advisory Opinion Regarding Record Drawings.

(e) All documented field changes and revisions provided shall be shown and noted in the revision block.

(f) Revisions shall be drawn using accepted drafting standards and shall be clear and legible.

(g) Line work and notes related to work deleted or changed shall be omitted from the Record Drawing.

ADDITIONAL SERVICES

The following scope items defined as additional services are those anticipated to be necessary to facilitate design of the project. These services will be performed on an as-need basis, and invoiced based on effort and expenses incurred.

5 Design Surveys

5.1 Consultant will prepare and send a "Request for Right of Entry for Surveying" and "Start of Engineering Design Notice" documents to property owners immediately adjacent to the proposed project route via regular U.S. Postal Service. Templates for documents and information for property owners will be provided by the City

5.2 Complete Property Research using Rockwall County records

5.2.1 Obtain plat information from County records or as provided by the City

5.2.2 Gather existing ROW (right-of-way) and easement information from Rockwall County records, and other records provided by the City.

5.3 Consultant will submit request to Texas 811 for location of franchise utilities.

5.4 Topographic and Design Survey

5.4.1 The intended scope of field survey includes a swath of approximately 40-feet centered on the City's existing 8-inch through 12-inch sanitary sewer generally located adjacent to Buffalo Creek. The limits of the survey generally begin near the north right-of-way for S.H. 205

(Goliad Road) and extend northeasterly to a point approximately 500-feet southwest of John King Boulevard and Justin Road intersection, excepting that portion between TL Townsend and I.H. 30 as shown by the location map included herein.

5.4.2 Establish horizontal control points and temporary vertical control benchmarks in the vicinity of the proposed improvements.

5.4.3 Perform field survey to identify and tie the horizontal and vertical location of relevant topographic elements. The field survey shall include, but is not limited to the following:

(a) Property boundary corner monumentation (that can be located)
(b) Sanitary sewer manholes (including flow line measure-down)
(c) Pavement, driveways, curbs, sidewalks, barrier free ramps, and signs.
(d) Storm sewer inlets, culverts, manholes, junction boxes and headwalls (including culvert sizes and flow line elevations)
(e) Top of bank, toe of bank and flow line of drainage channels/tributary.
(f) Utility vaults, water valves, water meters, wastewater cleanouts, sprinkler heads, utility poles, utility markers, and franchise utilities and markings
(g) Trees, including species and caliper (2-inch caliper and larger)
(h) Landscape features, including planters, shrubs, rocks and borders
(i) Buildings and permanent structures
(j) Retaining walls, fences and screening walls (including material type)

5.5 Perform up to one site visit for the purposes of reviewing the results of field survey and determining the need for any additional surveys.

6 Easement Document Preparation

6.1 Prepare easement documents (metes and bounds description and graphic exhibits) for proposed utility or temporary construction easements if required by the project. Preparation of up to ten (10) easement documents are included in the budget.

6.2 Individual parcel easement documents shall be prepared on 8.5-inch x 11-inch paper size, and both an electronic PDF copy and two (2) set of originals sealed, dated, and signed by a Registered Professional Land Surveyor shall be provided to the City.

6.2.1 Graphic exhibits shall contain the following:

(a) Parcel number
(b) Area required
(c) Area remaining
(d) Legal description
(e) Current owner
(f) Any existing platted easements or easements filed by separate instrument including easements provided by utility companies
(g) All physical features

6.2.2 Metes and bounds descriptions of the easement parcel will be prepared and provided on a separate sheet from the graphic exhibit, and each type of easement shall be described separately.

6.3 The Consultant shall provide easement documents to the City and/or their assigned Land Rights Acquisition Agent.

7 Geotechnical Evaluation

7.1 If necessary, up to two (2) soil borings will be collected from the project site and analyzed to provide soil profile logs summarizing the subsurface soil properties.

ATTACHMENT "B"

Payment Schedule

Compensation for Basic Services in Tasks 1-4 shall be on a lump sum basis. The tabulation below establishes the not to exceed amount for each category of contract service:

	Task	Fee
	BASIC SERVICES	
1.	Preliminary Design Phase	$ 16,600.00
2.	Final Design Phase	$ 57,700.00
3.	Bidding Phase	$ 7,100.00
4.	Construction Administration Phase	$ 15,000.00
	Basic Services Subtotal:	**$ 96,400.00**
Compensation for special services under Tasks 5-7 shall be on an hourly basis of salary cost times a multiplier of 2.45 for time expended on the task. Field survey crew shall be based on $170.00 per hour, inclusive of all equipment rentals and software licensing; plus, mileage charge at the IRS established rate. Expenses shall be at invoice cost times a multiplier of 1.15.		
	ADDITIONAL SERVICES	
5.	Design Surveys	$ 19,700.00
6.	Easement Document Preparation (10 sets of plat and field notes included)	$ 29,700.00
7.	Geotechnical Evaluation	$ 4,000.00
	Additional Services Subtotal*	**$ 53,400.00**
	ENGINEERING SERVICES CONTINGENCY (To be 10% of Services)**	**$ 14,980.00**
	***(This service is a miscellaneous amount to be used at the discretion of the City for additional Services outside of the scope of the contract. This item will be controlled by the City and will only be used if the City chooses. The Engineer has no right or guarantee to the use of this Contingency)*	
	Project Total*	**$ 164,780.00**

Fees that are Lump Sum for each task and will be invoiced monthly based upon the overall percentage of services performed.

INTERLOCAL COOPERATION AGREEMENT BETWEEN ROCKWALL COUNTY AND THE CITY OF ROCKWALL REGARDING MUNICIPAL JUDGE SERVICES

THIS INTERLOCAL COOPERATION AGREEMENT is made and entered into by and between Rockwall County, Texas, a political subdivision of the State of Texas (*hereinafter referred to as "COUNTY")*, and the City of Rockwall, a municipal corporation of the State of Texas (*hereinafter referred to as "CITY."*)

WHEREAS, the CITY is located within the COUNTY and its citizens are represented by the Rockwall County Criminal District Attorney in criminal matters; and

WHEREAS, both the CITY and the COUNTY seek to protect their citizens from harm and damage to property; and

WHEREAS, the COUNTY through the Rockwall County Criminal District Attorney intends to hold multiple "No Refusal Weekends" during the course of the year wherein warrants will be sought to draw blood from individuals suspected of driving while intoxicated who have refused to provide a breath or blood sample; and

WHEREAS, the CITY through its municipal court has the authority to issue evidentiary warrants in the State of Texas under certain conditions; and

WHEREAS, the CITY desires to make a municipal judge available to review, consider and sign, if appropriate, evidentiary warrants to obtain blood samples from individuals in Rockwall County suspected of driving while intoxicated during the periods set forth in this Agreement; and

WHEREAS, it is in the best interest of the citizens of Rockwall County to hold "No Refusal Weekends"; and

WHEREAS, both the COUNTY and CITY desire to enter into an Interlocal Cooperation Agreement, pursuant to chapter 791 of the Texas Government Code, whereby the COUNTY and the CITY will agree upon the terms of said written agreement;

NOW, THEREFORE, the COUNTY and the CITY mutually agree as follows:

I.
TERM OF AGREEMENT

A. The COUNTY and the CITY mutually agree that the term of this Agreement shall be for one (1) year commencing on the date it is formally and duly executed by both the COUNTY and the CITY.

B. During the term of this Agreement the COUNTY shall perform the "No Refusal Weekend" on four occasions as follows:

(1) New Year's Day – 12:01 a.m. December 27, 2019 through 5:00 p.m. January 2, 2020;
(2) Memorial Day – 12:01 a.m. May 22, 2020 through 5:00 p.m. May 26, 2020;
(3) Independence Day – 12:01 a.m. July 3, 2020 through 5:00 p.m. July 6, 2020; and
(4) Labor Day – 12:01 a.m. September 4, 2020 through 5:00 p.m. September 8, 2020.

C. Notwithstanding the foregoing, this Agreement may be terminated by either party by giving thirty (30) days' written notice of intent to terminate this Agreement to the other party. Any notice of intent to terminate must be delivered by deposit in the United States mail, certified, return mail receipt requested, to the other party at the addresses set out herein. Upon termination of this Agreement, neither party will have any obligations to the other party under this Agreement, except with respect to payment for services already rendered under this Agreement, but not yet paid.

II.
COUNTY RESPONSIBILITIES

The COUNTY will pay the CITY at a rate of $120.00 an hour for a total amount not to exceed $2500.00 for each of the aforementioned "No Refusal Weekend" periods, for the services of Associate Judge David Mallard to review, consider and sign, if appropriate, evidentiary warrants to obtain blood samples from individuals suspected of driving while intoxicated during the "No Refusal Weekend" periods. Payment of the judge's fee is specifically not made contingent upon approval of the warrant by the judge.

III.
CITY RESPONSIBILITIES

The CITY through Associate Municipal Judge David Mallard shall review, consider and sign, if appropriate, evidentiary warrants to obtain blood samples from individuals suspected of driving while intoxicated during the "No Refusal Weekend" periods. The CITY agrees that Judge Mallard will be available to provide these services at times to be scheduled at a later date during the "No Refusal Weekend" periods. The CITY further agrees to submit an invoice to the COUNTY (c/o the Rockwall County Auditor) for the services provided by the Judge. Payment shall be made 30 days after receipt of the invoice by the Rockwall County Auditor.

IV.
GENERAL PROVISIONS

A. **General Administration:**
The COUNTY and the CITY will designate their respective representatives for the general administration of this Agreement.

B. **Alteration, Amendment or Modification:**
This Agreement may not be altered, amended, or modified except in writing signed by all parties to this Agreement.

C. **Notice:**
All notices sent pursuant to this Agreement will be in writing and must be sent by registered or certified mail, postage prepaid, return-receipt requested.

Notices sent pursuant to this Agreement will be sent to the Rockwall County Judge's Office at the following address:

County Judge
Rockwall County Judge's Office
101 East Rusk, Room 202
Rockwall, Texas 75087

Notices sent pursuant to this Agreement may be delivered or sent to the City at the following address:

Rick Crowley
City Manager of Rockwall
385 South Goliad Street
Rockwall, Texas 75087

When notices sent pursuant to this Agreement are mailed by registered or certified mail, notices will be deemed effective three (3) days after deposit in a U.S. mail box or at a U.S. postal office.

D. **Severability:**
If any provision of this Agreement is found to be invalid, illegal, or unenforceable, such invalidity, illegality, or unenforceability will not affect the remaining provisions of this Agreement.

E. **Breach:**
The failure of either party to comply with the terms and conditions of this Agreement will constitute a breach of this Agreement. Either party will be entitled to any and all rights and remedies allowed under Texas law for any breach of this Agreement by the other party.

F. **Non-Waiver:**
The waiver by either party of a breach of this Agreement will not constitute a continuing waiver of such breach or of a subsequent breach of the same or a different provision. Nothing in this Agreement is intended by either party to constitute a waiver of any immunity from suit or liability to which it is entitled under applicable law.

G. **Entire Agreement:**
This Interlocal Cooperative Agreement constitutes the entire Agreement between the COUNTY and the CITY. No other agreement, statement, or promise relating to the subject matter of this Agreement and which is not contained in this Agreement or incorporated by reference in this Agreement will be valid or binding.

H. **Terms used in Document:**
As used in this Agreement, the terms "Interlocal Cooperation Agreement", "Interlocal Agreement", "Agreement", and "Contract" are synonymous.

I. **Non-Defined Terms:**
If not specifically defined in this Agreement, words and phrases used in this Agreement will have their ordinary meaning as defined by common usage.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: **Honorable Mayor and City Council**

CC: **Rick Crowley, City Manager**
Joey Boyd, Assistant City Manager
Mary Smith, Assistant City Manager

FROM: **Travis E. Sales, Director of Parks and Recreation**

DATE: **December 16, 2019**

SUBJECT: **Parks, Recreation & Open Space Master Plan Update 2020-2030**

The Park, Recreation & Open Space Master Plan 2010-2020 is set to expire in 2020. Staff has started initial planning discussions with MHS Planning and Design, LLC to update and provide the City of Rockwall with a Parks, Recreation & Open Space Master Plan 2020-2030. Not only does the master plan play a significant role in qualifying the City of Rockwall for Texas Parks and Wildlife grants in the future, it also provides direction for Parks and Recreation programming and development for the future. This process will take approximately 8-months to complete at a cost of $38,150.00. Attached in your packet is the time-line and cost associated with the project. Staff is requesting use of funds from the Recreational Development account to complete this project. We anticipate the project time line to be January to September of 2020. This project for unknown reasons was not originally budgeted during the 2019-2020 budget process. We are also requesting the council to amend the budget in the Rec Development fund as well.

Park Board voted unanimously to recommend to the City Council to proceed with the Master Plan update. The City Council is asked to authorize the City Manager to execute the agreement with MHS Planning and Design, LL. Staff will be available to answer any questions.

MHS
PLANNING & DESIGN, LLC

25 November 2019

Mr. Travis Sales, Parks & Recreation Director
City of Rockwall
108 East Washington
Rockwall, Texas 75087

RE: Letter Agreement between the City of Rockwall, Texas and MHS Planning & Design for the development of the City of Rockwall Parks, Recreation and Open Space Master 2020 - 2030

Dear Travis:

MHS Planning & Design is pleased to have the opportunity to submit this proposal for the above referenced project. Based upon our understanding of the City's desires for the Parks, Recreation and Open Space Master Plan, we have prepared the following scope of services for your consideration:

I Basic Services of the Consultant:

A. Service Area: The service area for the plan will be the corporate limits of Rockwall, Texas.

B. Time Frame: The Master Plan will cover a time period from 2020-2030.

C. Data Collection:

1. Obtain most recent maps of the service area including street maps, topography maps, and aerial photography, if available. Photograph all parks and park improvements that have been completed since January 2020. (See Section II for City's responsibility.)

2. Obtain relevant planning documents and produce an updated inventory of parks, recreation and open space facilities within the service area.

3. Obtain the most recent population projections and demographic data for the service area.

4. Meet with City staff to discuss achievements completed since the update was adopted, future park projects, desires, programming and maintenance of parks and public places.

D. Analysis of Supply and Demand:

1. Prepare "Needs Analysis" based on current and future supply and user demand.

2. Conduct two input workshops with special interest groups to further determine recreational needs. (See Attached Schedule)

3. Conduct a workshop with the City staff, Park Board members and the general public to identify special park issues and desires. (See Attached Schedule)

NOTE: The above listed workshops will be scheduled in two groups to reduce the cost of the Master Plan to the City.

D. Preparation of Preliminary Master Plan

1. Develop sketch plans to identify future land acquisition and proposed facilities for parks, open space and recreation.

2. Prepare preliminary cost projections for park and recreation improvements proposed for the next five (5) year planning increment and prepare financing alternatives for consideration. Future bond programs and potential partnerships will be discussed as alternative financial tools to help fund the implementation program.

3. Prepare draft written report detailing the Master Plan.

4. Submit the preliminary plan update and sketches to City Staff for comment. (One meeting)

5. Submit the draft master plan update to Texas Parks and Wildlife for review and comment.

F. Preparation of Final Master Plan

1. Incorporate review comments and prepare final written report including updated cost projections, proposed phasing plan for park and recreation improvements, full color exhibits, and financing alternatives.

G. Presentation of Final Plan

1. Make presentation of the final Parks, Recreation and Open Space Master Plan to the Park Board for approval and recommendation to the City Council for adoption, or

2. Make presentation of the final Parks, Recreation and Open Space Plan to the City Council for adoption.

3. Present five (5) copies of the final bound plan to the City. Product will be in full color bound format. The Consultant will also deliver to the City the final plan in PDF format.

H. Cost Containment:

1. In order to contain the cost of the plan, not more than six trips to Rockwall will be made by the Consultant. The City and the Consultant will make all reasonable efforts to group the scheduling of work tasks and meetings in order to take full advantage of each trip.

II The City's Responsibilities:

The City of Rockwall will:

A. Provide full information as to his requirements for the Project.

B. Provide to the Consultant all reasonably available information pertinent to the Project including a City base map in digital form, topography, aerial photography and all previous reports and any other data relative to planning of the Project.

C. Make all provisions for the Consultant to enter upon public and private lands as required for the Consultant to perform his work under this Agreement.

212 W. 9th Street Tyler, Texas 75701 903.597.6606 mhs@mhsplanning.com
41

D. Examine all studies, reports, sketches, estimates, drawings, specifications, proposals, and other documents presented by the Consultant and shall render in writing decisions pertaining thereto within reasonable time so as not to delay the work of the Consultant.

E. Advertise for, coordinate and arrange public meetings, board meetings, and focus group meetings, and pay for all costs incident thereto.

F. Provide such legal, accounting, and insurance counseling services as may be required for the Project.

III Additional Services

A. General: In addition to the basic services to be furnished by the Consultant under this proposal for which the payment of the standard consulting fee shall be made, the Consultant shall furnish additional services of the following types, if AUTHORIZED BY THE OWNER IN WRITING.

1. Additional services due to significant changes in general scope of the project including, but not limited to, changes in size, complexity, or character when such changes are requested by the Owner.

2. Revising at Owner's request studies, reports, design documents, drawings or specifications which were previously approved by the Owner except the Owner shall not be obliged to pay when:

   a. The changes are required by regulating authorities or to bring the plan into compliance with applicable codes, ordinances, or standards, or

   b. The changes are required as a result of some error or omission on the part of the Consultant.

B. Furnishing of additional copies of reports and additional prints of drawings.

C. Additional services and costs necessitated by out-of-town travel required by the Consultant other than visits to the Project and consultation in the Owner's office as required by Section I.

D. Serving as expert witness or giving counsel for the Owner in any litigation, real or potential, or other legal proceeding involving the Project where the Consultant is not a party to the litigation.

E. Additional services in connection with the Project not otherwise provided for in this agreement.

F. Preparation of boundary survey, wetland delineation survey, lake permitting, flood studies, geotechnical investigations, plats, legal descriptions, or deeds, record search, abstracting of ownership or other related surveyor work.

IV Fees

A. The total fee for the work outlined in Section I will be $34,400.00 plus reimbursable expenses including travel & reproduction.

V Billing

A. Billing shall be monthly based on the actual work completed. Invoices will be submitted to the City of Rockwall and shall be due upon receipt. Within ten (10) days of receipt of monthly bill, City shall review and accept the fees charged or notify MHS of any discrepancies. MHS Planning & Design, LLC reserves the right to charge the amount of interest allowable under the current laws of the State of Texas on any accepted invoices not paid within thirty (30) days.

212 W. 9th Street Tyler, Texas 75701 903.597.6606 mhs@mhsplanning.com
42

VI General Conditions

A. Termination: This Agreement may be terminated with or without cause by either party by giving ten (10) days written notice. If this Agreement is so terminated the Consultant shall be paid for work completed plus reimbursable expenses. Reimbursable expenses include actual expense for subcontracted services, transportation, and subsistence of personnel when traveling in connection with the Project; reproduction of reports, drawings, specifications, and similar Project related items.

B. Estimates: Since the Consultant has no control over the cost of labor and materials, or other competitive bidding and market conditions, the estimates of construction are to be made on the basis of his experience and qualifications but the Consultant does not guarantee the accuracy of such estimates as compared to the Contractor's bid, or the final contract cost.

C. **LIMITED LIABILITY: THE LIMIT OF LIABILITY OF THE CONSULTANT FOR THIS PROJECT SHALL NOT EXCEED THE TOTAL COMPENSATION OUTLINED IN SECTION IV OF THIS CONTRACT.**

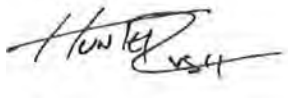
D. Successors and Assigns: The Owner and the Consultant each binds himself and his officers, successors, executors, administrators and assigns to the other party of this Agreement in respect to all covenants of this Agreement; except as above, neither the Owner nor the Consultant shall assign, or transfer his interest in this Agreement without the written consent of the other. Nothing herein shall be construed as creating any personal liability on the part of any office or agent of any public body which may be a part hereto.

E. Findings Confidential: All reports, information, and data prepared or assembled by the Consultant under this contract are confidential and the Consultant agrees that they shall not be made available to any individual or organization without the prior written approval of the Owner or unless required by state law or court order.

F. Interest of Members of City: No member of the governing body of the City, and no officer, employee, or agent of the City who exercises any functions or responsibilities in connection with the planning and carrying out of the program, shall have any personal financial interest, direct or indirect, in this contract; and the Consultant shall take appropriate steps to assure compliance.

G. Interest in Other Local Public Officials: No member of the governing body of the locality and no other public official of such locality, who exercises any functions or responsibilities in connection with the planning and carrying out of the program, shall have any personal financial interest, direct or indirect, in this contract; and the Consultant shall take appropriate steps to assure compliance.

H. Interest of Consultant and Employees: The Consultant covenants that he presently has no interest and shall not acquire interest, direct or indirect, in the study area or any parcels therein or any other interest which would conflict in any manner or degree with the performance of his services hereunder. The Consultant further covenants that in the performance of this contract, no person having any such interest shall be employed.



I. Personnel: The Consultant represents that he has, or will secure at his own expense, all personnel required in performing the services under this contract. Such personnel shall not be employees of the City. The Consultant further represents that although his staff does not include full time registered architects, that all personnel engaged in the work shall be fully qualified and shall be authorized or permitted under the Texas Engineering Practice Act, State Law and local law to perform such services which may be a part hereto.

212 W. 9th Street Tyler, Texas 75701 903.597.6606 mhs@mhsplanning.com
43

J. Governing Law. The laws of the State of Texas govern this Agreement and all obligations of the parties under this Agreement are performable in Rockwall County, Texas and venue shall lie therein

If this Agreement meets with your approval, please have the contract executed in the appropriate place below and return one original to us. I appreciate the opportunity to submit this proposal to you and look forward to working with you.

Sincerely,

Hunter N Rush

I. INTRODUCTION

The purpose for updating the 2010 Parks, Recreation and Open Space Master Plan is to ensure the goals, objectives and proposed developments outlined in the 2010 plan still coincide with the parks and open space needs of the community.

The 2017 Parks, Recreation and Open Space Master Plan Update includes summaries of the following:

- 2017 demographics & projections
- goals and objectives
- park standards
- park inventory
- parks and open space accomplishments since 2010
- new citizen input
- updated needs and priorities
- revised implementation schedule for future developments

Fox Chase Park

COMMUNITY

The City of Rockwall is the county seat for Rockwall County and is located east of Dallas on the eastern shore of Lake Ray Hubbard.

2020 Population Projection

- **47,474**

(Texas Water Development Board)

DEMOGRAPHICS

Estimated 2016 Population – 41,370

Population – 35,050 (2010 Census)

- 72.0 % - White
- 16.8 % - Hispanic
- 05.8 % - Black
- 02.4 % - Asian
- 03.0 % - Other

II. GOALS AND OBJECTIVES

Goals and Objectives are provided to give direction for future community decisions regarding parks, recreation and open spaces specifically in the City of Rockwall. The following goals and objectives were established in the 2010 master plan based on input from the City of Rockwall residents. These goals and objectives were reaffirmed in the 2016 public input process and remain valid.

GENERAL PARK AND RECREATION GOAL:

Rockwall's most significant outdoor features – its floodplains, woodlots, shorelands, sensitive habitats and rare ecosystems – should be woven with existing and future parks, greens and commons into a city-wide, comprehensive parks and open space system designed to serve the wide range of ages, abilities and interests of Rockwall's current and future citizenry. This parks and open space system should reflect a level of character, quality and care that communicates responsible stewardship and pride of place.

GENERAL PARK AND RECREATION OBJECTIVES:

- Encourage the creation of small, private greens and commons in new neighborhoods to enhance their character, desirability and the quality of social interaction within them.

- Research the viability of any opportunities to acquire and preserve areas of the native Blackland Prairies and surrounding areas, as important natural and historical landscape feature.

- Ensure that ultimately every Rockwall resident lives within ½ mile of a Neighborhood Park for their use.

- Ensure that ultimately every Rockwall resident lives within 2 miles of a Community Park for their use.

LAKE RAY HUBBARD GOAL:

Actively explore the potential for public waterfront use of the Lake Ray Hubbard shorelands and preserve those areas for use by the pubic.

LAKE RAY HUBBARD OBJECTIVES:

- Preserve areas identified in this plan (and the 2010 – 2020 Master Plan) for public use and enjoyment.
- Develop a lakeside park to provide a broad array of recreational opportunities along the shores of Lake Ray Hubbard.
- Explore potential for parks and passive greenway trails at appropriate locations along the shoreline.
- Explore potential for future private waterfront development that could include a public access component.

GREENWAYS GOAL:

Incorporate floodplains into an interconnected greenway network that preserves their natural flood water storage functions while providing trails, open spaces and conservation of natural areas.

GREENWAYS OBJECTIVES:

- Allow no significant filling of the 100 – year floodplain.
- Incorporate other significant natural areas, such as steep slopes and sensitive habitats, into the greenway network.
- Develop parks containing quality natural open spaces sensitively with the preservation of the natural environment as a high priority.

DESIGN DEVELOPMENT GOAL:

Design parks and open space improvements as first-class facilities, as they represent the public face or "front yard," of Rockwall.

DESIGN DEVELOPMENT OBJECTIVES:

- Ensure that park development reflects a high level of quality and a strong design ethic.

- Design park improvements for durability, long life and low maintenance requirements.

- Maintain high maintenance standards for development and maintenance of all Rockwall public land.

- Environmental stewardship measures, including the use of energy conserving components, the use of green building materials, preservation of existing habitat and vegetation and the use of native plant material should be included into the parks and open space network at every opportunity.

- Park design should consider and provide handicapped accessibility to park spaces and ensure meaningful usefulness of park facilities for user groups with varying degrees of abilities.

III. PARK STANDARDS AND INVENTORY

PARK STANDARDS

The Rockwall Parks network is made up of nine different park types – each having a role in satisfying the recreational needs of the community. It is important to note that the development costs of parkland have significantly increased over the past five years due to increased costs of materials and construction. The following chart defines the characteristics of each park type within the City.

CLASSIFICATION	SERVICE AREA	SIZE (ACRES)	POPULATION SERVED	TYPICAL FACILITIES	DEVELOPMENT COSTS
Mini – Park	¼ Mile	1 – 3 acres	500 - 2,500	Landscaping, drinking fountains, sidewalks, & benches	$75,000 - $125,000 per acre
Neighborhood Oriented Park (Public Parks associated with school properties)	¼ Mile	1 acre	500 - 2,500	Playground apparatus, landscaping, sidewalks, drinking fountains, lawn area, & benches	$100,000 - $150,000 per acre
Neighborhood Park	½ Mile	10 – 12 acres	2,000 - 10,000	Playground apparatus, picnic area(s), pavilion, play courts, play fields, multi-use trails, natural open space, landscaping, & parking	$150,000 - $175,000 per acre
Community Park	2 Miles	40 – 150 acres	10,000 - 50,000	Tennis courts, sports fields, playground apparatus, picnic area(s), pavilions, walking/jogging trails, swimming pools, open space, landscaping, recreation centers, restrooms, & parking	$70,000 - $200,000 per acre
Regional Park	10 Miles	200 – 1,000 acres	Entire Urban Area	Sports fields, tennis courts, swimming complexes, lakes, hike/bike trails, bridle paths, golf courses, campgrounds, nature areas, play structures, restrooms, & ample parking	$2,000,000 & Up (Total Cost)

CLASSIFICATION	SERVICE AREA	SIZE (ACRES)	POPULATION SERVED	TYPICAL FACILITIES	DEVELOPMENT COSTS
Natural Area	Varies	Determined by resource	Entire urban area	Nature trails, multi-purpose trails, benches, picnic areas, wildlife viewing stations, educational components, information kiosks, interpretive signs, exercise courses, & drinking fountains	Varies
Greenways	Varies	Varies	5,000 to entire community	Landscaping, multi-purpose trails, benches, information kiosks, exercise courses, & drinking fountains	$225,000 - $750,000 per mile
Special Use Park	Varies	Determined by Primary User	Varies – Dependent on Primary Use	Concentration of one or two of the following: Baseball/softball complex, soccer fields, tennis centers, sports stadiums, golf courses, performing arts parks, boat ramps, amphitheaters, & ornamental gardens	Varies
Sports Complex	Entire City	40 – 150 acres	Entire community	Sports fields, tennis courts, multi-purpose trails, concessions, spectator plazas, nature areas, play structures, restrooms, & ample parking	$5,000,000 - $8,000,000

* All costs exclude land and are based on 2017 dollars.

ROCKWALL PARK INVENTORY

The existing parks in Rockwall are classified in the Existing Parks and Open Space Inventory shown in the following table. Ideally, all developed residential areas of the city of Rockwall should fall within the service area of a neighborhood park and a community park.

	NAME	TYPE OF PARK	TOTAL ACRES	DEVELOPED ACRES	FACILITIES
1	Gloria Williams	Mini Park	.5	.5	• Basketball Court • Picnic Tables • Bar-B-Que Grill • Benches • Playground • Pool

IV. ACCOMPLISHMENTS

One of the main objectives of this master plan update is to address the accomplishments within the existing park system made since the 2010 plan. The City of Rockwall has successfully completed several projects addressed in the 2010 Master Plan and continues to make progress developing the City's parks and recreational opportunities. It is important to address the City's accomplishments in order to focus on what the city needs to accomplish in the upcoming years.

The additional parks that have been acquired and developed has increased the City's developed park acreage and thus increased the Level of Service (number of developed park acres per 1,000 residents) from 8.24 acres per 1,000 residents to 8.83 acres per 1,000 residents.

In order to keep up with the rapidly growing population, the City must develop a large piece of property, such as the Sports Complex or Lakeside Park, in order to further increase and exceed the level of service from past years.

TEXAS RECREATION AND PARK SOCIETY AWARDS

The City of Rockwall was awarded the GOLD MEDAL AWARD in 2017 which is given to honor departments in for excellence in the field of recreation and park management for the past three years. In addition, the city won the PROMOTIONAL AWARD which honors the most outstanding promotional efforts of a park, recreation and leisure agency for the past year.

CITIZEN INVOLVEMENT

To help the City of Rockwall move closer to its vision, volunteers have provided many hours of work improving the City's parks and natural areas. Eagle Scouts, Girl Scouts, civic organizations and churches, to name just a few, have contributed numerous projects and amenities that people desire and value.

The Butterfly Brigade was created as part of the nation wide Mayor's Monarch Pledge program. This passionate group of volunteers have helped create new butterfly way-stations and meadows as well as education and awareness to encourage residents to create their own habitat.

RENOVATIONS AT LEON TUTTLE ATHLETIC COMPLEX

The City of Rockwall has considered developing a Sports Complex for the past several years in order to meet the growing demands of youth athletics in the area. After the failed Sports Complex Bond, the City decided that the renovation of Leon Tuttle Park met the current demand in 2012 and was the most economical choice to best suite the citizens of Rockwall. Leon Tuttle Athletic Complex includes a total of eight renovated baseball / softball fields (six lighted fields), a playground and restroom facilities.

CONSTRUCTION OF THE ALL-INCLUSIVE PLAYGROUND AT YELLOW JACKET PARK

Shadesystemsinc.com

One of the Park Design Objectives for the City of Rockwall is to provide recreational opportunities for all abilities and ages for the residents and surrounding populations. In 2015, the City of Rockwall developed and constructed a playground specifically designed to allow children of all abilities to fully participate in outdoor recreation. The all-inclusive playground is located in Yellow Jacket Park and includes: a barrier free playground, shade canopies, music play, interactive panels and classic recreational playground elements.

Planetrockwall.com

CONSTRUCTION OF THE PHELPS LAKE TRAIL HEAD

The City developed the Raymond Cameron/Phelps Lake Master Plan in 2006 and has continually made improvements around the lakes to develop a large trail network. Since 2006, the City has renamed the lake property to The Lakes at Squabble Creek. In 2015, the City constructed the trail head at Phelps Lake. The trail head consists of a fishing pier / wildlife viewing area, a kayak launch, multi-purpose trails, natural open space, sitting areas and an area for a future native plant garden.

CONSTRUCTION OF THE PARK AT STONE CREEK

The City has strived to develop a park system that provides a neighborhood park ½ mile of every home. As Rockwall continues to grow, the City has committed to developing neighborhood parks in growing areas of the community. In 2016, the City completed the construction of an 11 acre park, The Park at Stone Creek, which includes: a playground, pavilion, multi-purpose trails, an open lawn area, fishing area / lake overlook, picnic area, benches, a drinking fountain and a parking lot. In the public input sessions of the design process, the nearby residents requested that emphasis be placed on the playground element of the park. The park now contains 9,400 sq.ft. devoted to play elements.

DESIGN OF THE PARK AT BREEZY HILL

As the City continues to develop and grow, the City has continued to acquire and develop park land. During the development of this Master Plan Update, the design and construction documents have been completed for an additional neighborhood park in northern Rockwall. The Park at Breezy Hill will consist of a pavilion, playground, walking trail, open lawn area, fishing pier / pond overlook landscaping and social gathering area. The project completion date is slated for November 2017.

DEVELOPMENT OF NORTHSHORE PARK

The development of Northshore Park was the number one priority on the Implementation Schedule in the 2010 master plan. Northshore Park was completed in 2011 and consists of: natural open spaces, a playground with swings, a basketball court, picnic stations and benches.

DEVELOPMENT OF TRAIL CONNECTIONS

Trails is and has been the number one priority in the City of Rockwall for several years. The City has been very successful constructing trail and sidewalk connections throughout the community. The construction of small sections of trail can connect miles and miles of trail, thus creating a city-wide trail network. The city has successfully completed three trail sections that have connected several miles of trails throughout neighborhoods and the city.

- The trail section at the intersection of John King Boulevard and CR 1141.

- The trail section at the intersection of John King Boulevard and Quail Run.

- The trail section at Dalton Park

V. CITIZEN INPUT

In order to develop a park system that will be used and highly supported by the citizens of Rockwall, the City has committed to using a citizen-driven needs based approach to park planning. In order to better understand the needs of the community, the City conducted a focus group meeting with local community leaders and a largely attended city-wide public meeting.

Overall, it is apparent that the City of Rockwall has a highly successful park system and is continually progressing. Many of the citizens feel that the City needs to continue moving in the same direction as identified in the 2010 master plan.

The following is a summary of the key responses regarding the City of Rockwall's park system.

FOCUS GROUP INPUT

The focus group consisted of several different community leaders from the City of Rockwall. The discussion primarily focused on the positive aspects of the current park system in Rockwall. In addition, the conversation lead to a handful of suggestions, such as: providing additional recreational opportunities, upgrading existing properties and enhancing the trail system. The group was asked collectively to come up with a the top three recreational priorities in the community and they are:

1 – Athletic Fields
2 – Lakeside Park Development
3 – Indoor Community / Recreation Center

PUBLIC MEETING – November 15th, 2016

The City hosted a public meeting in November in order to better understand the needs and desires of the residents of Rockwall. The meeting was well attended with approximately 35 people sharing their likes and dislikes about the park system. In addition, many of the participants shared their visions for the existing and future park system.

The following is a list of the input obtained from the public input meeting.

- The existing park system is highly maintained
- Additional trails are needed throughout the City to create more connectivity
- Construct a new sports complex
- The city has great programing
- Construct a public archery range
- Construct a community center
- Develop Lake Shore Park property
- Additional boating access is needed on Lake Ray Hubbard
- Trails do not need to be located on or through privately owned land
- Additional Special Needs playgrounds are needed throughout the community
- Construct an outdoor aquatic center
- Continue to maintain the park system at high level
- Construct bike lanes throughout city

VI. NEEDS AND PRIORITIES

The needs and priorities of the City of Rockwall are based on the goals and objectives, focus group input, citizens input, city staff recommendations and professional opinion. The following needs and priorities have been identified as important areas of focus for the City of Rockwall through 2020.

NEW PARK NEEDS

The City of Rockwall has been successful in the past six years by acquiring and developing additional new parks and open spaces within the city. As the city continues to develop, it is imperative the city focus on acquiring vacant land and greenways for additional parks to serve areas of the community that are not currently served. After conducting meetings with the general public, community leaders and key staff members it is apparent that the City of Rockwall needs to develop the Lakeside Park property in northwest Rockwall. The development of Lakeside Park would provide the residents of Rockwall with a Regional Park that should include:

- Multi-Purpose Trails
- Nature Trails
- Open Lawn Areas
- Sports Fields
- Pavilions
- Picnic Areas
- Bench Stations
- Water Features
- Nature Areas
- Playgrounds
- Restrooms
- Parking Lot

EXISTING PARK NEEDS

As the City of Rockwall continues to grow, it is essential that the city maintains, updates and renovates existing parks. As noted in the 2010 Master Plan, the level of maintenance of the existing parks is high and pleasing to the general public. There is a need to continue to update and improve existing parks to meet the ever changing demands of the residents of Rockwall.

NEIGHBORHOOD PARK NEEDS

Neighborhood Parks have been and will continue to be the backbone of the park system. The City of Rockwall has developed a parks districts map that represents different areas of growth and needs throughout the community. As part of the development process, residential developers are required by ordinance to dedicate land and monies to the city for parks and open spaces.

The districts map was recently reviewed and modified to better suite the needs of the community as it continues to grow and develop. It is imperative that the city continues to develop neighborhood parks, especially in the districts that are lacking neighborhood parks. (See Parks District Map)

INSERT

71

NATURAL OPEN SPACE NEEDS

As the City of Rockwall and surrounding communities continue to grow and develop, the amount of natural open space diminishes. The need for acquisition and preservation of natural open space was evident in the focus group meetings. Many of the citizens expressed the need for open spaces, creek corridors and preservation of existing trees. In addition, open spaces and nature trails are both ranked within the top five recreational priorities for the city. It is imperative, especially as the city continues to grow, to focus on preserving the most valuable environmental assets, such as wooded lots, natural open spaces, creek corridors and riparian areas.

Many of the creek corridors throughout the community are located in the floodplain and commercial and residential developments are not permitted. These key areas need to be preserved as natural open spaces and developed as trail corridors throughout the city.

ATHLETIC FACILITY NEEDS

Organized sports, especially youth sports are popular in the City of Rockwall and have continually grown in participation over the past five years.

As the population continues to grow and the field space becomes less and less available for practices, the city needs to consider a new sports complex that provides fields for practices as well as tournament quality fields.

Since the City has taken over the baseball and softball program approximately three years ago, the amount of teams have doubled and created a high demand for additional organized youth athletic fields.

PRIORITIES

The following Parks and Recreational Facility Priorities are based on results from the focus group meeting, public meeting, city staff, the needs analysis and professional opinion. The following list is depicted in order of priority, has been adopted and should be pursued as recreational priorities within the city.

RANK	FACILITY
1	Athletic Fields (Baseball, Softball, Soccer, Etc.)
2	Multi-Use Trails / Greenway Corridors
3	Playgrounds
4	Pavilions / Picnic Areas
5	Natural Open Space
6	Water Features (i.e. small lakes, ponds, creeks)
7	Open Areas for General Play / Sports Practice
8	Swimming Pool / Water Sprayground
9	Skate Parks
10	Tennis Courts
11	Disc Golf
12	Volleyball Courts

In 2016, the Rockwall City Council adopted the Parks and Recreation Department Strategic Plan in order to better guide and direct the needs of the Parks and Recreation Department. It is a priority for the department to review and implement the plan. The strategic plan focuses on the following priorities:

- Focus on the field space needs and requirements for youth baseball and softball
- Develop existing neighborhood parks to the fullest extent (+/- $1,250,000 for 11 acres of developed park land)
- Acquire and develop +/- 50 acre community park in south Rockwall
- Focus on the development and funding sources of the Lakeside Park Project
- Develop Master Plan for Alma Williams Howard Park
- Continue to develop the Lakes of Squabble Creek
- Focus on non-resident sales tax revenue
- Operate and maintain the existing and future park system at a high level

RECOMMENDATIONS

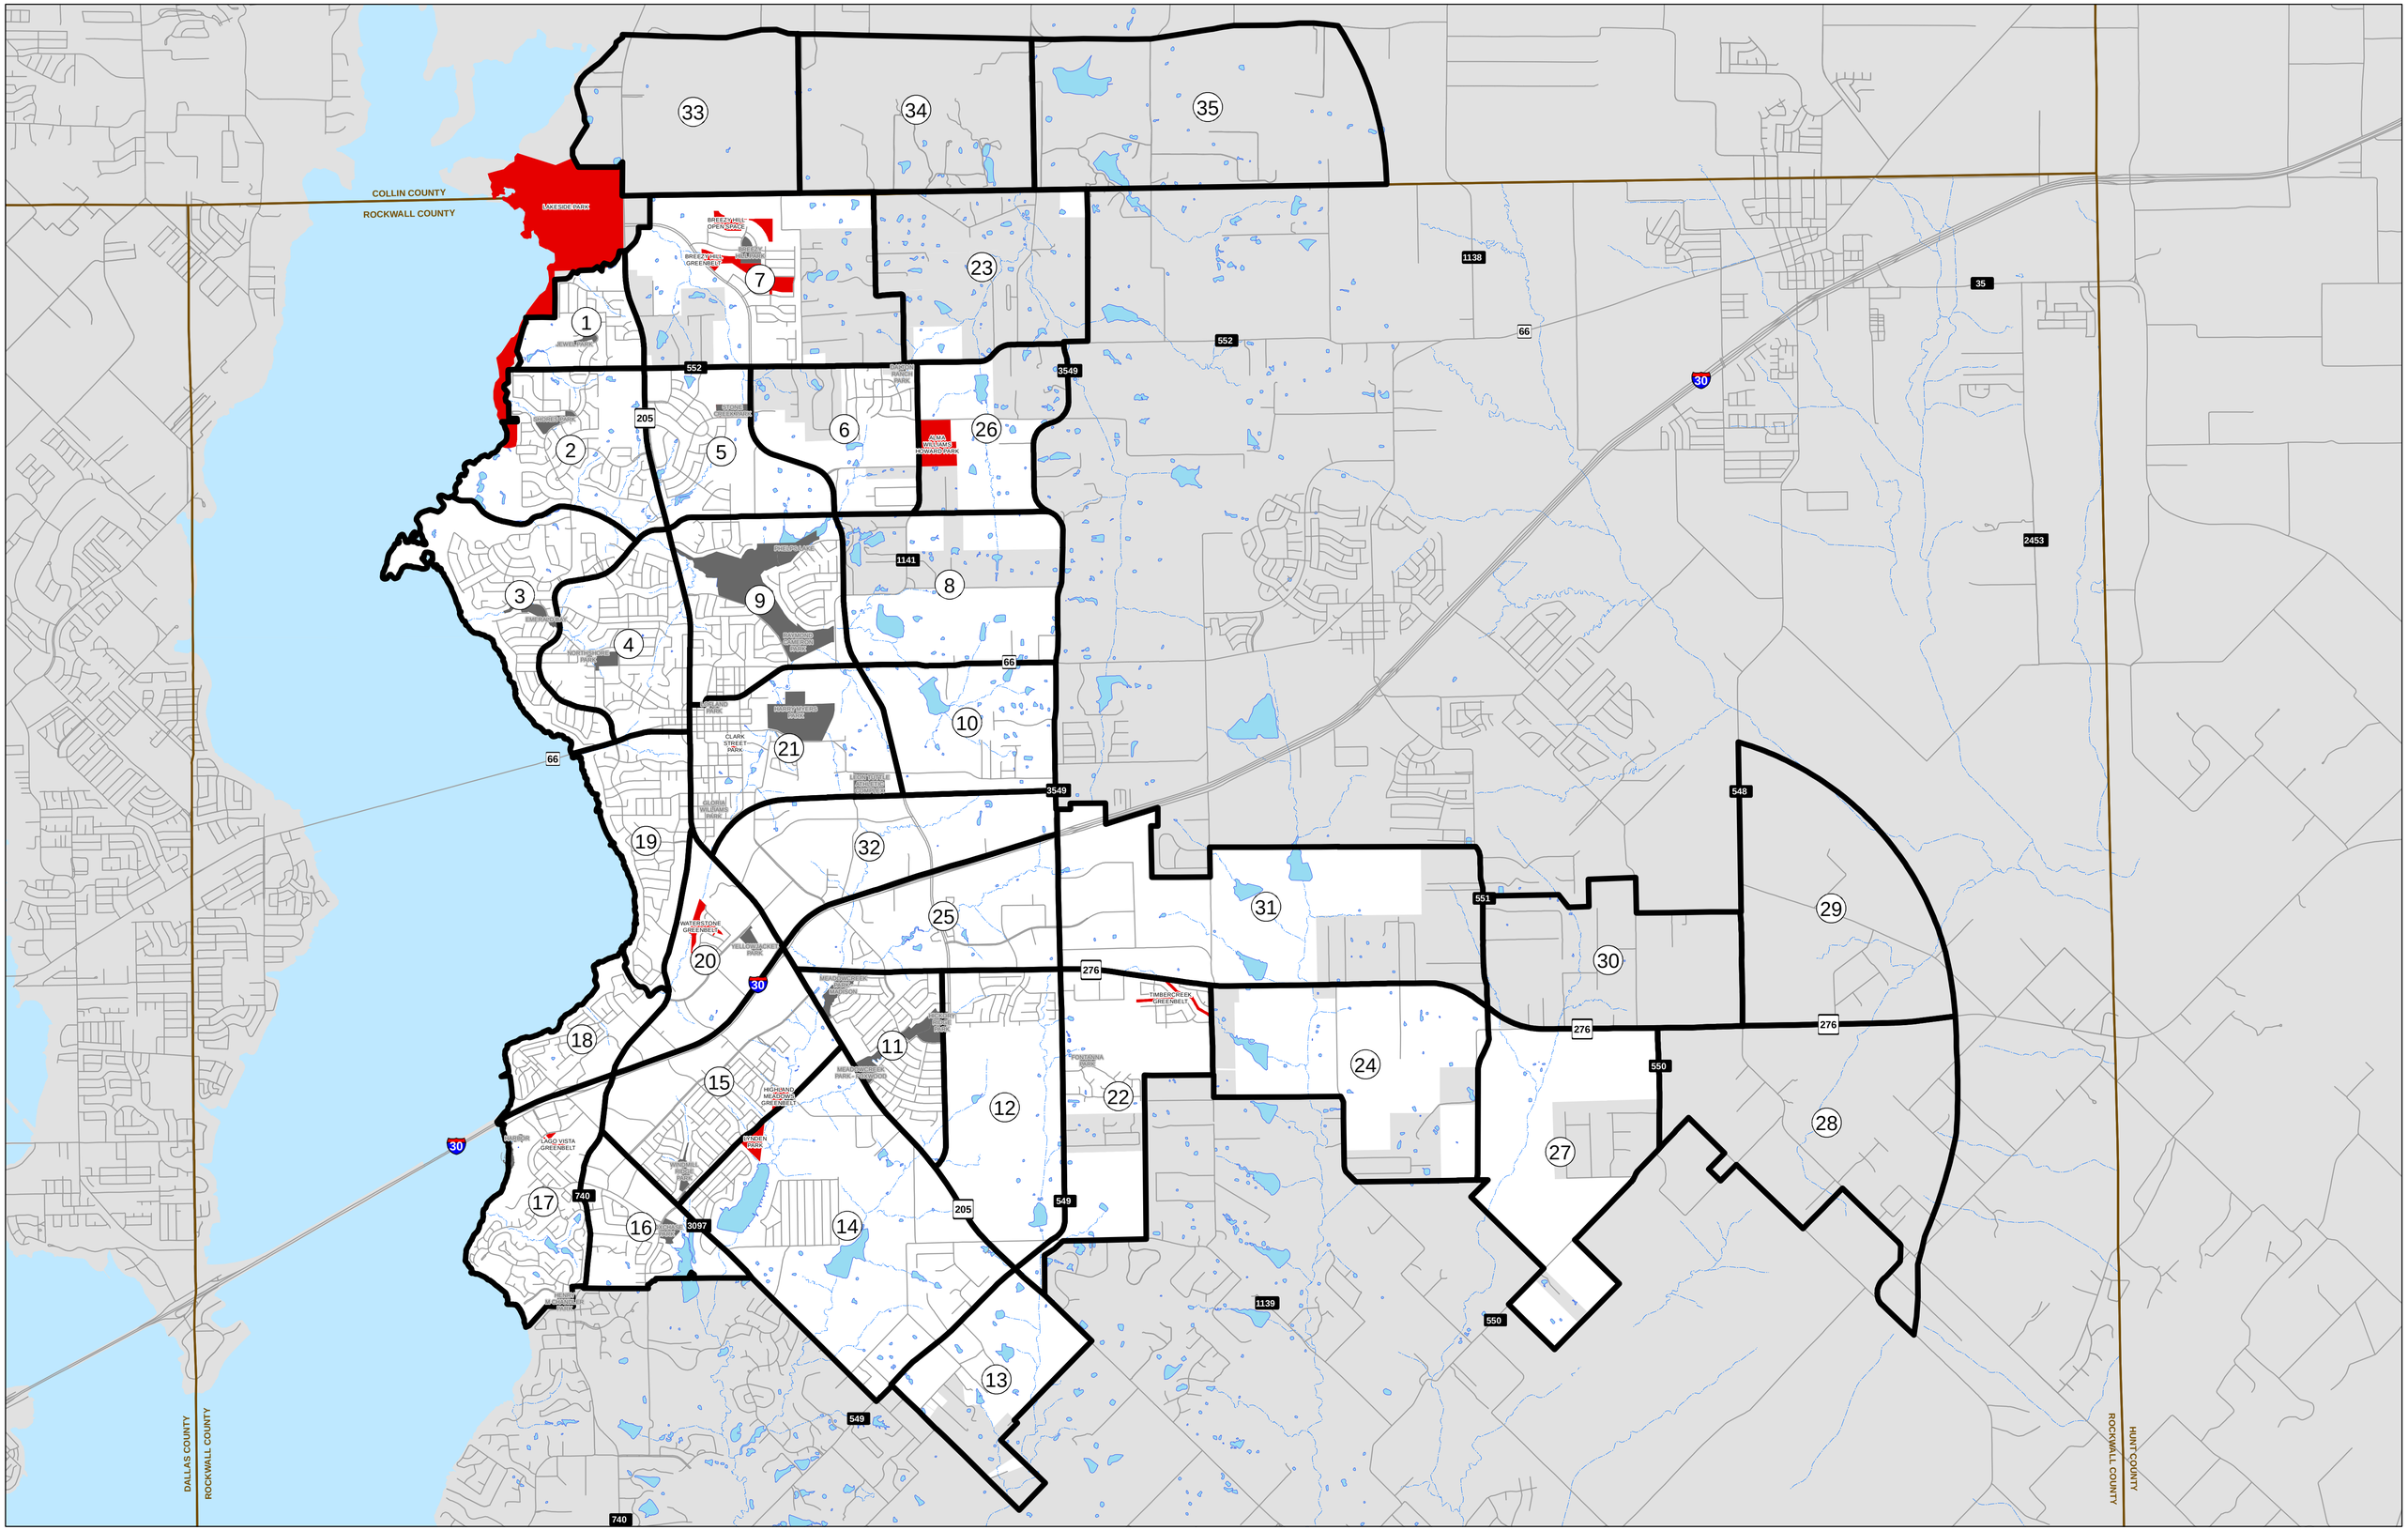
New Parks:
- Develop Lakeside Park Phase I in north west Rockwall
- Develop Master Plan for Alma Williams Howard Park
- Acquire and develop a sports complex (See Athletics below)
- Acquire and develop +/- 50 acres of land for a community park in south Rockwall
- Acquire and develop neighborhood parks in the growing areas of the community

Existing Park Upgrades:
- Continue to renovate existing neighborhood parks throughout the community. As neighborhoods continue to grow and develop, it is imperative that the neighborhood parks are updated and renovated to meet the needs of the neighborhood.
- Continue to update and renovate Harry Myers Park

Athletics:
- Develop a fully lighted, multi-purpose field sports complex that includes all the necessary athletic fields for tournaments, games and practices facilities as the participation rate and population continues to grow.

Trails:
- Continue to construct trails throughout the community to connect parks, schools, residential areas, commercial areas and employment centers. It is critical to construct trail segments that result in meaningful connectivity. Emphasis should be given to providing trails along creek corridors and other natural resources.

Natural Open Space:
- Acquire, preserve and develop key remaining natural areas for passive recreational opportunities as well as for natural habitats and trail corridors.



Park Operations & Maintenance:
- In order to maintain the park system and public spaces at a high level that is expected and appreciated by the residents, the city needs to continually review and update the parks operations and maintenance budget as the city continues to grow and develop additional properties.

In order to provide the best recreational opportunities for the residents of Rockwall at the best price, it is important that the City be creative in land acquisition, design and development of parks. The City should consider constructing the much needed sports complex on the Lakeside Park property. The combination of a sports complex and community park recreational amenities has proven to be successful in several other communities throughout Texas.

VII. IMPLEMENTATION SCHEDULE

The following table depicts the updated project list for the City of Rockwall for the next five years and beyond. It is important to note that the following schedule is intended to be a flexible guide for the development of parks, recreational facilities and open spaces over the next five years. The city should evaluate and take advantage of any unforeseen opportunities that may arise that are not identified in this implementation schedule as long it meets the goals and objectives of this plan. The city should continually and actively pursue partnerships and non-traditional funding sources to expedite implementation where possible to alleviate some of the burden of implementation expenses on residents.

PROJECT	DATE	ESTIMATED COST	POTENTIAL FUNDING SOURCES
Develop the Alma Williams Howard Community Park Master Plan	2018	$50,000 - $75,000	General Fund General Obligation Bond
Acquire 50 acres in South Rockwall for the development of a community park	2019	Market Price / Donation / Dedication	Donation General Fund General Obligation Bond
Develop Lakeside Park – Phase I	2019	$10,000,000 - $18,000,000	TPWD Grants General Fund General Obligation Bond
Acquire & Develop a Sports Complex with community park amenities	2020	$8,000,000 - $15,000,000	TPWD Grants General Fund General Obligation Bond
Develop Trail Linkages	2017 – 2020	$250,000 - $550,000 per mile	TPWD Grants TxDOT Enhancement Grant General Fund General Obligation Bond
Acquire & develop additional neighborhood parks throughout the community	2017 – 2020	Approximately $150,000 per acre	Developer Fees Land Dedication TPWD Outdoor Grant General Fund General Obligation Bond

VIII. SUMMARY

Based on all the input received from the focus group input, public meetings, City Staff and professional opinion, it is apparent that the citizens of Rockwall are very satisfied and invested in the existing park system. The City of Rockwall has made significant progress in the parks system with the addition of new parks, renovations of existing parks, planning and design of future parks and the continual development of the overall trail system. In addition, the city has continually maintained the existing park system at a high level. It is imperative to continue this high level of maintenance as the city acquires and develops additional park land.

The main objectives of this updated plan are to:

- Develop Lakeside Park in northwest Rockwall
- Acquire and develop a tournament quality sports complex
- Continue to acquire and develop land as it becomes available
- Focus on the preservation of natural open spaces
- Continue to renovate and upgrade existing parks
- Acquire and develop Neighborhood Parks throughout the city
- Continue to develop multi-use and nature trails that create a larger trail network to connect residential areas with commercial areas, parks and schools.

This master plan update is to be utilized as a guideline which should be reviewed annually and updated every five years to reflect the unique recreational needs of the changing population and demographics of the city. The city should take advantage of any unforeseen opportunities not identified in the plan that may arise, such as donations of land and/or facilities as long as the actions meet the intent of the goals, objectives and recommendations of this plan

The proposed improvements contained in this plan will enhance the quality of life throughout the entire community. The resulting benefits include tourism potential, economic value, increasing property values, civic pride and most importantly, an increased quality of life for the residents of the City of Rockwall.

CITY OF ROCKWALL

CITY COUNCIL CASE MEMO

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
DATE:	December 16, 2019
APPLICANT:	Chase Finch; *Corwin Engineering, Inc.*
CASE NUMBER:	P2019-045; *Final Plat for Stone Creek, Phase X*

SUMMARY

Discuss and consider a request by Chase Finch of Corwin Engineering, Inc. on behalf of John Arnold of BH Phase 10, LTD for the approval of a final plat for Stone Creek, Phase X containing 118 single-family residential lots on a 36.428-acre tract of land identified as a portion of Tract 3 of the S. King Survey, Abstract No. 131, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 70 (PD-70) for Single Family-10 (SF-10) District land uses, located at the southwest corner of John King Boulevard and Featherstone Drive, and take any action necessary.

PLAT INFORMATION

☑ The applicant is requesting the approval of a final plat for a 36.428-acre tract of land identified as a portion of Tract 3 of the S. King Survey, Abstract No. 131. The purpose of the final plat is to establish 118 single-family residential lots as part of the Stone Creek Subdivision. It should be noted this is the final phase of the Stone Creek Subdivision, which upon completion will consist of a total of 886 single-family lots (*i.e. 32 lots less than the maximum permitted by Planned Development District 70 [PD-70]0*.

☑ The proposed final plat conforms to the approved Preliminary Plat (*i.e. P2007-021*) and Master Plat (*i.e. P2007-017*) approved in conformance with Planned Development District (PD-70).

☑ The subject property was annexed into the City with the remainder of the Stone Creek Subdivision, which was annexed by four (4) different ordinances: [*1*] *Ordinance No. 61-01* on February 6, 1961, [*2*] *Ordinance No. 61-02* on February 6, 1961, [*3*] *Ordinance No. 86-37* on May 19, 1986, and [*4*] *Ordinance No. 98-10* on March 16, 1998.

☑ On April 2, 2007, the City Council approved *Ordinance No. 07-13* [*Case No. Z2007-006 and the development agreements*] establishing *Planned Development District 70* (PD-70) for Single-Family 10 (SF-10) District and General Retail (GR) District land uses. Planned Development District 70 (PD-70) would later be amended three (3) times [*i.e. Ordinance No.'s 09-44, 11-35, & 19-41*], two (2) of which increased the amount of land zoned for General Retail (GR) District land uses, and the third to redefine the number of hard-edged ponds required within the residential subdivision.

☑ On December 3, 2019, the Parks and Recreation Board reviewed the final plat and made the following recommendations:

(1) The developer shall pay pro-rata equipment fees of $83,898.00 (*i.e. $711.00 x 118 lots*) to be paid at the time of final plat.

(2) The developer shall install a 10-foot wide curvilinear trail along John King Boulevard right-of-way with landscaping, and connecting to the existing trail system.

☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat -- *conforming to the requirements for final plats as stipulated by the Subdivision Ordinance in the Municipal Code of Ordinances* -- is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.

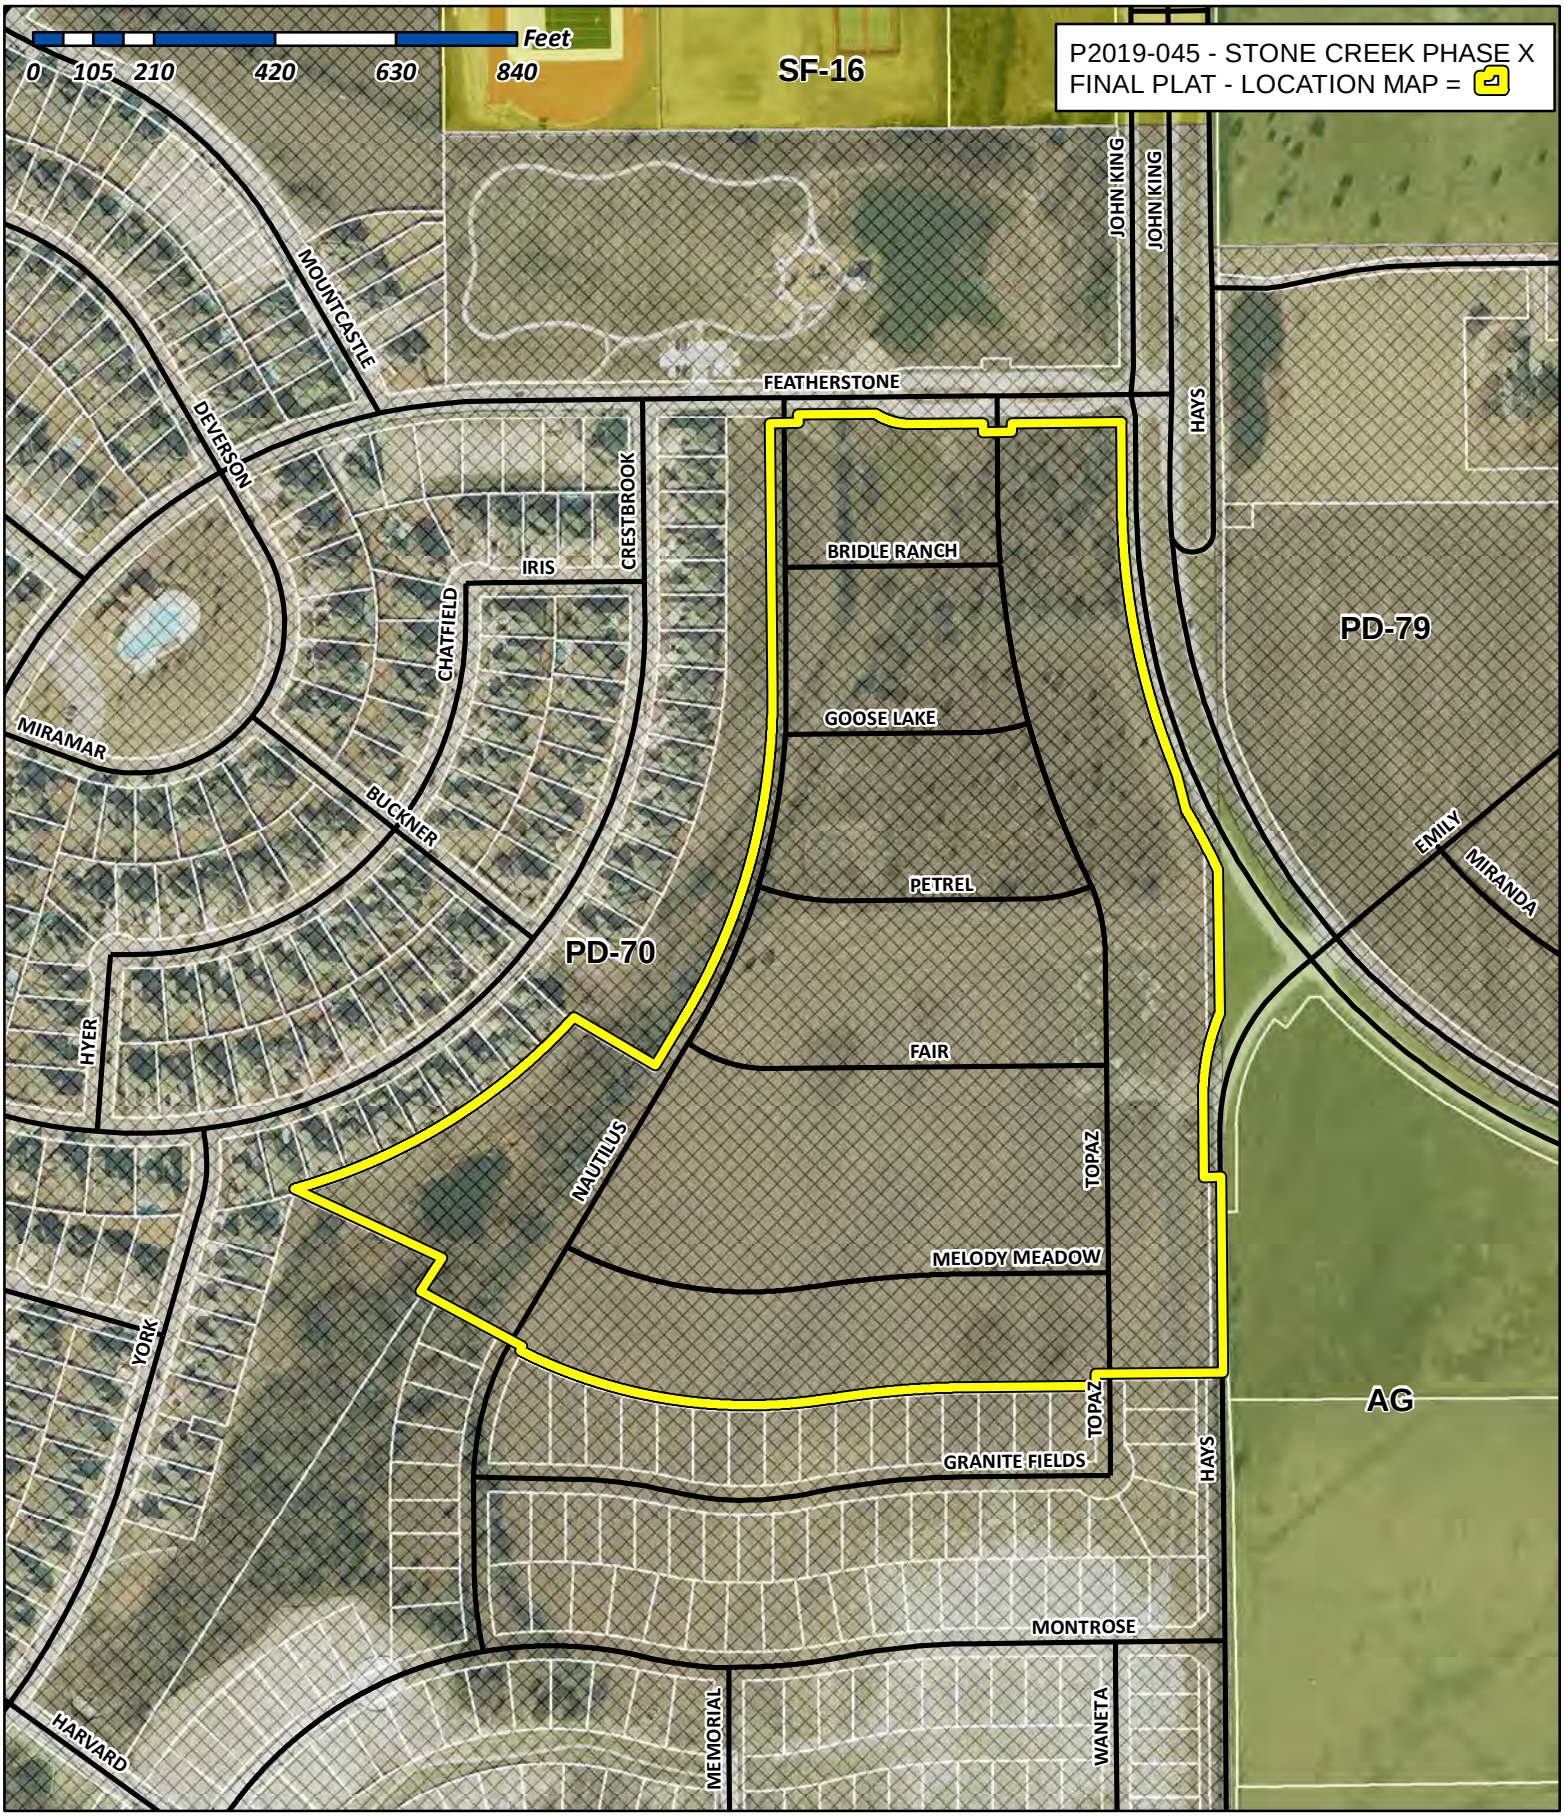
☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Conditions of Approval* section below.

☑ With the exception of the items listed in the *Conditions of Approval* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the Municipal Code of Ordinances.

CONDITIONS OF APPROVAL

If the City Council chooses to approve the final plat for *Phase X of the Stone Creek Subdivision*, staff would propose the following conditions of approval:

(1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;



(2) That the pro-rata equipment fees shall be paid prior to filing the final plat. These fees are subject to change from the time of approval by the Parks and Recreations Board at their December 3, 2019 meeting;

(3) The developer shall be responsible for constructing a ten (10) foot curvilinear trail along the right-of-way of John King Boulevard, and provide the required landscaping as stipulated by the SH-205 By-Pass Overlay (SH-205 BY-OV) District; and,

(4) Any construction resulting from the approval of this plat shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION

On December 10, 2019, the Planning and Zoning Commission's motion to recommend approval of the final plat passed by a vote of 6-0, with Commission Moeller absent.

NOW, THEREFORE, KNOW ALL MEN BY THESE PRESENTS:
STATE OF TEXAS
COUNTY OF ROCKWALL
We the undersigned owners of the land shown on this plat, and designated herein as the STONE CREEK PHASE X, subdivision to the City of Rockwall, Texas, and whose name is subscribed hereto, hereby dedicate to the use of the public forever all streets, alleys, parks, water courses, drains, easements and public places thereon shown on the purpose and consideration therein expressed. We further certify that all other parties who have a mortgage or lien interest in the STONE CREEK PHASE X, subdivision have been notified and signed this plat.

We understand and do hereby reserve the easement strips shown on this plat for the purposes stated and for the mutual use and accommodation of all utilities desiring to use or using same. We also understand the following;

1. No buildings shall be constructed or placed upon, over, or across the utility easements as described herein.

2. Any public utility shall have the right to remove and keep removed all or part of any buildings, fences, trees, shrubs, or other growths or improvements which in any way endanger or interfere with construction, maintenance or efficiency of their respective system on any of these easement strips; and any public utility shall at all times have the right of ingress or egress to, from and upon the said easement strips for purpose of construction, reconstruction, inspecting, patrolling, maintaining, and either adding to or removing all or part of their respective system without the necessity of, at any time, procuring the permission of anyone.

3. The City of Rockwall will not be responsible for any claims of any nature resulting from or occasioned by the establishment of grade of streets in the subdivision.

4. The developer and subdivision engineer shall bear total responsibility for storm drain improvements.

5. The developer shall be responsible for the necessary facilities to provide drainage patterns and drainage controls such that properties within the drainage area are not adversely affected by storm drainage from the development.

6. The detention drainage system is to be maintained, repaired and owend by the subdivision. Property owner shall be responsible for maintaining, repairing, and replacing all systems within the drainage and detention easements.

7. No house dwelling unit, or other structure shall be constructed on any lot in this addition by the owner or any other person until the developer and/or owner has complied with all requirements of the Subdivision Regulations of the City of Rockwall regarding improvements with respect to the entire block on the street or streets on which property abuts, including the actual installation of streets with the required base and paving, curb and gutter, water and sewer, drainage structures, storm structures, storm sewers, and alleys, all according to the specifications of the City of Rockwall; or

Until an escrow deposit, sufficient to pay for the cost of such improvements, as determined by the city's engineer and/or city administrator, computed on a private commercial rate basis, has been made with the city secretary, accompanied by an agreement signed by the developer and/or owner, authorizing the city to make such improvements at prevailing private commercial rates, or have the same made by a contractor and pay for the same out of the escrow deposit, should the developer and/or owner fail or refuse to install the required improvements within the time stated in such written agreement, but in no case shall the City be obligated to make such improvements itself. Such deposit may be used by the owner and/or developer as progress payments as the work progresses in making such improvements by making certified requisitions to the city secretary, supported by evidence of work done; or

Until the developer and/or owner files a corporate surety bond with the city secretary in a sum equal to the cost of such improvements for the designated area, guaranteeing the installation thereof within the time stated in the bond, which time shall be fixed by the city council of the City of Rockwall.

We further acknowledge that the dedications and/or exaction's made herein are proportional to the impact of the Subdivision upon the public services required in order that the development will comport with the present and future growth needs of the City; we, our successors and assigns hereby waive any claim, damage, or cause of action that we may have as a result of the dedication of exactions made herein.

_____

John Arnold
Director

STATE OF TEXAS
COUNTY OF DALLAS
Before me, the undersigned authority, on this day personally appeared JOHN ARNOLD, known to me to be the person whose name is subscribed to the foregoing instrument, and acknowledged to me that he executed the same for the purpose and consideration therein stated. Given upon my hand and seal of office this _____ day of _____, 2019.

Notary Public in and for the State of Texas My Commission Expires: _____

NOTE: It shall be the policy of the City of Rockwall to withhold issuing building permits until all streets, water, sewer and storm drainage systems have been accepted by the City. The approval of a plat by the City does not constitute any representation, assurance or guarantee that any building within such plat shall be approved, authorized or permit therefore issued, nor shall such approval constitute any representation, assurance or guarantee by the City of the adequacy and availability for water for personal use and fire protection within such plat, as required under Ordinance 83-54.

_____ _____
Planning & Zoning Commission Date

APPROVED

I hereby certify that the above and foregoing plat of an addition to the City of Rockwall, Texas, was approved by the City Council of the City of Rockwall on the _____ day of _____, 2019.

This approval shall be invalid unless the approved plat for such addition is recorded in the office of the Counrt Clerk of Rockwall, County, Texas, within one hundred eighty (180) days from said date of final approval.

WITNESS OUR HANDS, this _____ day of _____, 2019.

_____ _____ _____
Mayor, City of Rockwall City Secretary City Engineer

CASE NO. P2019-045 SHEET 2 OF 3

LEGAL DESCRIPTION

BEING, a tract of land situated in the W.T. DeWeese Survey, Abstract No. 71 and the S. King Survey, Abstract No. 131 in the City of Rockwall, Rockwall County, Texas, being part of a tract of land as described in Stone Creek Balance LTD., Clerks File No. 2007-00375394 and Stone Creek SF, LTD., Clerks File No. 2007-00375398 in said Deed Records, and being more particularly described as follows:

BEGINNING, at a 1/2 inch iron rod found at the northeast corner of Stone Creek Phase IX, an addition to the City of Rockwall, as described in Cab._Pg,_in the Plat Records of Rockwall County, Texas, and being in Hays Road;

THENCE, South 89° 24'25" West, along the north line of said Stone Creek Phase IX, for a distance of 222.00 feet, to a 1/2 inch iron rod found;

THENCE, South 00° 35'35" East, continuing along said north line, for a distance of 21.11 feet, to a 1/2 inch iron rod found;

THENCE, South 89° 24'25" West, continuing along said north line, for a distance of 226.33 feet, to a 1/2 inch iron rod found at the point of curvature of a curve to the left, having a radius of 1560.00 feet, a central angle of 08° 38'43";

THENCE, continuing along said north line and with said curve to the left for an arc distance of 235.39 feet (Chord Bearing South 85° 05'03" West - 235.16 feet), to a 1/2 inch iron rod found at the point of reverse curvature of a curve to the right, having a radius of 880.00 feet, a central angle of 36° 03'38";

THENCE, continuing along said north line and with said curve to the right for an arc distance of 553.85 feet (Chord Bearing North 81° 12'30" West - 544.75 feet), to a 1/2 inch iron rod found on a non-tangent curve to the right, having a radius of 475.00 feet, a central angle of 01° 01'09";

THENCE, continuing along said north line and with said curve to the right for an arc distance of 8.45 feet (Chord Bearing North 28° 02'57" East - 8.45 feet), to a 1/2 inch iron rod found;

THENCE, North 61° 26'29" West, continuing along said north line, for a distance of 201.15 feet, to a 1/2 inch iron rod found in the east line of Stone Creek Phase IV, an addition to the City of Rockwall, as described in Cab. H, Pgs. 317-318, in said Plat Records and being the northwest corner of said Stone Creek Phase IX;

THENCE, North 32° 48'57" East, along the east line of said Stone Creek Phase IV, for a distance of 68.38 feet, to a 1/2 inch rod found at the most easterly northeast corner of said Stone Creek Phase IV;

THENCE, North 65° 00'04" West, along the north line of said Stone Creek Phase IV, for a distance of 283.02 feet, to a 1/2 inch iron rod found, being in a south line of Stone Creek Phase I, an addition to the City of Rockwall, as described in Cabinet G, Pages 359-365 in said Plat Records, being on a non-tangent curve to the left, having a radius of 1030.00 feet, a central angle of 37° 07'00";

THENCE, departing the north line of said Stone Creek Phase IV and along the south line of said Stone Creek Phase I and with said curve to the left for an arc distance of 577.36 feet (Chord Bearing North 58° 24'09" East - 569.83 feet), to a 1/2 inch iron rod found, being the southeast corner of Lot 10 Block I out of said Stone Creek Phase I, same being the south line of Stone Creek Phase IIA, an addition to the City of Rockwall, as described in Cabinet H, Pages 293-294 in said Plat Records;

THENCE, South 59° 19'11" East, departing the south line of said Stone Creek Phase I and along the south line of said Stone Creek Phase IIA, for a distance of 164.69 feet, to a 1/2 inch iron rod found being the southwest corner of said Stone Creek Phase IIA;

THENCE, North 30° 40'49" East, along the east line of said Stone Creek Phase IIA, for a distance of 90.28 feet, to a 1/2 inch iron rod found being the point of curvature of a curve to the left, having a radius of 1125.00 feet, a central angle of 24° 31'11";

THENCE, continuing along said east line and with said curve to the left for an arc distance of 481.44 feet (Chord Bearing North 11° 40'00" East 477.78 feet), to a 1/2 inch iron rod found at the point of tangency;

THENCE, North 00° 35'35" West, continuing along said east line, for a distance of 460.08 feet, to a 1/2 inch iron rod found being in the south line of Featherstone Drive, an addition to the City of Rockwall, as described in Cab. H, Pgs. 33-34, in said Plat Records;

THENCE, North 89° 25'13" East, departing said east line and with said south line, for a distance of 50.00 feet, to a 1/2 inch iron rod found;

THENCE, North 00° 35'35" West, continuing along said south line, for a distance of 15.00 feet, to a 1/2 inch iron rod found;

THENCE, North 89° 25'13" East, continuing along said south line, for a distance of 133.20 feet, to a 1/2 inch iron rod found, being on a curve to the left, having a radius of 110.00 feet, a central angle of 34° 10'49";

THENCE, continuing along said south line and with said curve to the left for an arc distance of 65.62 feet (Chord Bearing South 73° 29'23" East - 64.65 feet), to a 1/2 inch iron rod found, being the point of tangency;

THENCE, North 89° 25'13" East, continuing along said south line, for a distance of 125.01 feet, to a 1/2 inch iron rod found;

THENCE, South 00° 35'35" East, continuing along said south line, for a distance of 15.00 feet, to a 1/2 inch iron rod found;

THENCE, North 89° 25'13" East, continuing along said south line, for a distance of 50.00 feet, to a 1/2 inch iron rod found;

THENCE, North 00° 35'35" West, continuing along said south line, for a distance of 15.00 feet, to a 1/2 inch iron rod found;

THENCE, North 89° 25'13" East, continuing along said south line, for a distance of 190.00 feet, to a ½ inch iron rod found at the most easterly southeast corner of said Featherstone Drive and being in the west line of John King Boulevard (120' R.O.W.), as described in Doc. No. 2007-0038477 in said Deed Records;

THENCE, South 00° 35'35" East, along the west line of said John King Boulevard, for a distance of 142.99 feet, to a 1/2 inch iron rod found being the point of curvature of a curve to the left, having a radius of 1260.00 feet, a central angle of 20° 22'32";

THENCE, continuing along said west line and with said curve to the left for an arc distance of 448.08 feet (Chord Bearing South 10° 46'51" East - 445.72 feet), to a 1/2 inch iron rod found;

THENCE, South 19° 17'03" East, continuing along said west line, for a distance of 34.76 feet, to a nail found;

THENCE, South 15° 03'48" East, continuing along said west line, for a distance of 61.67 feet, to a nail found on a non-tangent curve to the left, having a radius of 1271.00 feet, a central angle of 05° 21'14";

THENCE, continuing along said west line and with said curve to the left for an arc distance of 118.77 feet (Chord Bearing South 27° 58'51" East - 118.72 feet), to a nail found in the east line of said Stone Creek Balance, being in said Hays Road;

THENCE, South 00° 35'35" East, departing said west line and along the east line of said Stone Creek Balance and with said Hays Road, for a distance of 191.20 feet, to a 1/2 inch iron rod found at the most northerly corner of Part 2, R.O.W. Dedication, as described in Doc. No. 2007-00384711, in said Deed Records being on a curve to the left, having a radius of 380.00 feet, a central angle of 22° 31'28";; THENCE, South 89° 24'25" West, along the north line of said Stone Creek Phase IX, for a distance of 222.00 feet,to a 1/2 inch iron rod found;

THENCE, departing the east line of said Stone Creek Balance Tract and continuing along Hays Road with the west line of said Part 2 tract and along said curve to the left having an arc distance of 149.39 feet (Chord Bearing South 10° 53'46" West 148.43 feet), to a 1/2 inch iron rod found;

THENCE, South 00° 21'58" East, continuing along said lines, for a distance of 136.79 feet, to a nail found at the southwest corner of said Part 2 tract;

THENCE, North 89° 38'02" East, along the south line of said Part 2 tract, for a distance of 30.11 feet, to a 1/2 inch iron rod found at the southeast corner of said Part 2 tract, being in east line of said Stone Creek Balance tract and said Hays Road;

THENCE, South 00° 35'35" East, along the east line of said Stone Creek Balance tract and with Hays Road, for a distance of 339.01 feet, to the POINT OF BEGINNING and containing 36.428 acres of land.

SURVEYOR CERTIFICATE

I, WARREN L. CORWIN, do hereby certify that the plat shown hereon accurately represents the results of an on-the-ground survey made under my direction and supervision and all corners are as shown thereon and there are no encroachments, conflicts, protrusions or visible utilities on the ground except as shown and said plat has been prepared in accordance with the platting rules and regulations of the City Plan Commission of the City of Rockwall, Texas.

CITY COUNCIL CASE MEMO

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
DATE:	December 16, 2019
APPLICANT:	Chase Finch; *Corwin Engineering, Inc.*
CASE NUMBER:	P2019-046; *Breezy Hill, Phase XI*

SUMMARY

Discuss and consider a request by Chase Finch of Corwin Engineering, Inc. on behalf of John Arnold of BH Phase 11, LTD for the approval of a final plat for the Breezy Hill, Phase XI containing 78 single-family lots on a 23.849-acre tract of land identified as a portion of Tract 7 and all of Tract 7-06 of the J. Strickland Survey, Abstract No. 187, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 74 (PD-74) for Single-Family 10 (SF-10) District land uses, generally located adjacent to Breezy Hill Road north of the intersection of Breezy Hill Road and FM-552, and take any action necessary.

PLAT INFORMATION

☑ The Breezy Hill Subdivision is a master planned community that will provide approximately 405-acres of residential and commercial development. The residential subdivision will be composed of 750 single-family lots on 371.45-acres of land, and be broken down per the lot mix indicated in Planned Development District 74 (PD-74). The lot mix in this Planned Development District is as follows.

Lot Types	*A*	*B*	*C*	*D*	*E*	*F*	*G*
Typical Lot Frontage (Feet)	*60'*	*70'*	*80'*	*100'*	*60'*	*100'*	*70'*
Typical Lot Depth (Feet)	*120'*	*120'*	*125'*	*200'*	*110'*	*180'*	*120'*
Minimum Lot Size (Sq. Ft.)	*7,200 SF*	*8,400 SF*	*10,000 SF*	*20,000 SF*	*7,200 SF*	*18,000 SF*	*8,400 SF*
Number of Units	*164*	*131*	*137*	*140*	*40*	*44*	*94*
Dwelling Unit %	*21.86%*	*17.46%*	*18.27%*	*18.67%*	*5.34%*	*5.87%*	*12.53%*

☑ The applicant is requesting to *final plat* Phase XI of the Breezy Hill Subdivision for the purpose of laying out 78 lots on a ~23.849-acre portion of the 371.45-acre subdivision. The 78 proposed lots will be constructed to the *Type 'G'* standards (*all standards are displayed in the table above*).

☑ On December 3, 2019 the Parks and Recreation Board reviewed the *final plat* and made a recommendation to approve the plat with the following conditions:

- The developer is to pay the pro-rata equipment fees required in the amount of $19,890 [*i.e. 78 Lots @ $255.00 Per Lot*].

☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat -- *conforming to the requirements for final plats as stipulated by the Subdivision Ordinance in the*

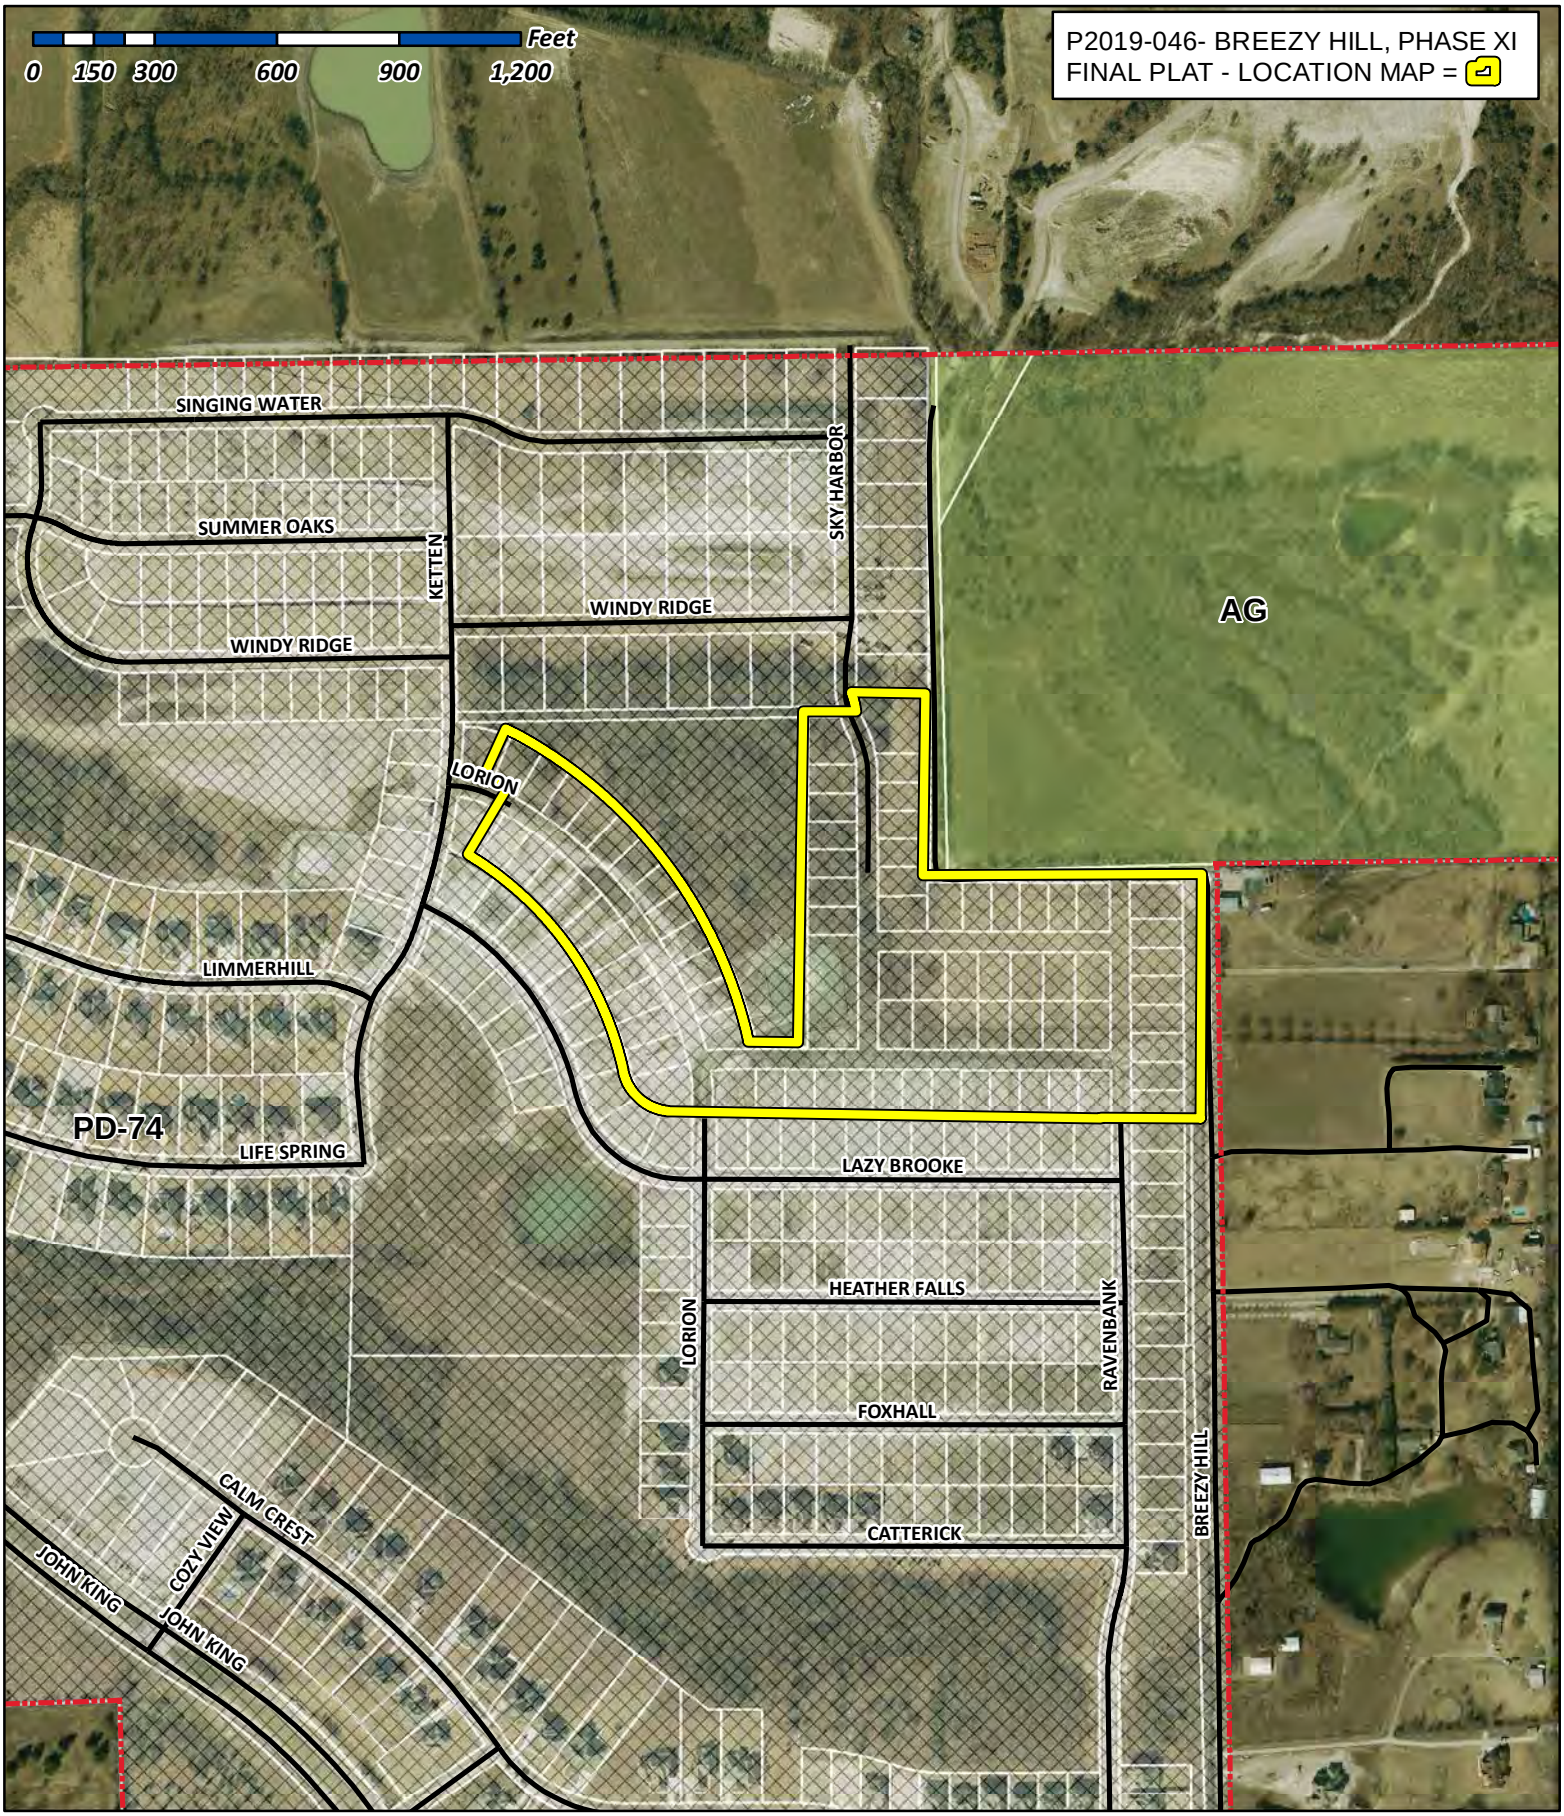
Municipal Code of Ordinances -- is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.

☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Conditions of Approval* section below.

☑ With the exception of the items listed in the *Conditions of Approval* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the Municipal Code of Ordinances.

CONDITIONS OF APPROVAL

If the Planning and Zoning Commission chooses to recommend approval of the final plat for *Breezy Hill, Phase XI*, staff would propose the following conditions of approval:



(1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;

(2) The development shall adhere to the recommendations of the Parks and Recreation Board;

(3) Any construction resulting from the approval of this plat shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION

On December 10, 2019, the Planning and Zoning Commission approved a motion to recommend approval of the final plat by a vote of 6-0, with Commission Moeller absent.

NOTES

1. Bearings are referenced to Breezy Hill Phase III, an addition to the City of Rockwall, as described in Cab. I, Slides 159-160, in the Plat Records of Rockwall County, Texas.
2. All lot lines are radial or perpendicular to the street unless otherwise noted by bearing.
3. 2/2 iron rods with "CORWIN ENGR. INC." caps set at all boundary corners, block corners, points of curvature, points of tangency, and angle points in public right-of-way unless otherwise noted.
4. B.L. - Building Line.
   U.E. - Utility Easements.
   C.M. - Controlling Monument.
   D.E. - Drainage Easement
   W.E. - Water line Easement
   S.S.E. - Sanitary Sewer Easement
   V.A.M.S. - Visibility, Maintenance & Sidewalk Easement
   H.O.A. - Homeowners Association
   ◊ - Street Name Change
5. All open spaces, drainage easements, detention easements and other common areas shall be repaired, replaced, and maintained by property owner and/or Homeowners Association.
6. No building permits will be issued until all public improvements are accepted by the City.
7. It shall be the policy of the City of Rockwall to withhold issuing building permits until all streets, water, sewer, and storm drainage system have been accepted by the City. The approval of a plat by the City does not constitute any representation, assurance or guarantee that any building within such plat shall be approved, authorized or permit therefore issued, nor shall such approval constitute any representation, assurance or guarantee by the City of the adequacy and availability for water for personal use and fire protection within such plat, as required under Ordinance 83-54.

LEGAL DESCRIPTION

BEING, a tract of land situated in the J. Strickland Survey, Abstract No. 187 in the City of Rockwall, Rockwall County, Texas, being out of a 39.298 acre tract, as described in Clerks File No. 20130000498882 in the Deed Records of Rockwall County, Texas and being all of a 2.944 acre tract, as described in Clerks File No. 20180000010717 and being more particularly described as follows:

BEGINNING, at a 1/2 inch iron rod found at the northeast corner of Breezy Hill Phase V, as addition to the City of Rockwall, as described in a Cab. J, Pg. 27 in the Plat Records of Rockwall County, Texas and being in the east line of said 39.298 acre tract same being in Breezy Hill Road (Variable R.O.W.);

THENCE, North 89° 43'54" West, along the north line of said Breezy Hill Phase V, for a distance of 244.79 feet, to a 1•2 inch iron rod found;

THENCE, South 00° 16'06" West, continuing along said north line, for a distance of 1.16 feet, to a 1•2 inch iron rod found;

THENCE, North 89° 02'54" West, continuing along said north line, for a distance of 1054.06 feet, to a 1/2 inch iron rod found at the point of curvature of a curve to the right, having a radius of 125.00 feet, a central angle of 76° 51'49";

THENCE, continuing along said north line and with said curve to the right for an arc distance of 167.69 feet (Chord Bearing North 50° 36'59" West 155.40 feet), to a 1/2 inch iron rod found at the point of reverse curvature of a curve to the left, having a radius of 825.00 feet, a central angle of 46° 53'29";

THENCE, continuing along said north line and said with curve to the left for an arc distance of 675.19 feet (Chord Bearing North 35° 37'50" West 656.50 feet), to a 1/2 inch iron rod found at the most southerly southeast corner of Breezy Hill Phase VI, an addition to the City of Rockwall, as described in Cab. J Pg. 291 in said Plat Records;

THENCE, North 30° 55'26" East, departing said north line and along the east line of said Breezy Hill Phase VI, for a distance of 191.00 feet, to a 1/2 inch iron rod found on a curve to the left, having a radius of 1016.00 feet, a central angle of 02° 27'58";

THENCE, continuing along said east line and with curve to the left for an arc distance of 43.73 feet (Chord Bearing North 60° 18'33" West 43.73 feet), to a 1/2 inch iron rod found at the point of compound curvature of a curve to the left, having a radius of 275.00 feet, a central angle of 04° 19'35";

THENCE, continuing along said east line and with said curve to the left for an arc distance of 20.77 feet (Chord Bearing North 63° 42'20" West 20.76 feet), to a 1/2 inch iron rod found;

THENCE, North 24° 07'53" East, continuing along said east line, for a distance of 125.00 feet, to a 1/2 inch iron rod found in the south line of a 6.705 acre tract, as described in Clerks File No. 20150000004156 in said Deed Records and being in the north line of said 39.298 acre tract being on a curve to the right, having a radius 400.00 feet, a central angle of 04° 19'35";

THENCE, along the south line of said 6.705 acre tract and north line of said 39.298 acre tract with said curve to the right for an arc distance of 30.20 feet (Chord Bearing South 63° 42'20" East 30.20 feet), to a 1/2 inch iron rod set with a yellow cap stamped "Corwin Eng. Inc.", at the point of compound curvature of a curve to the right, having a radius of 1141.00 feet, a central angle of 49° 01'03";

THENCE, continuing along said lines and with said curve to the right for an arc distance of 976.14 feet (Chord Bearing South 37° 02'01" East 946.65 feet), to a 1/2 inch iron rod set with a yellow cap stamped "Corwin Eng. Inc.", at the most southerly southwest corner of said 6.705 acre tract;

THENCE, South 89° 02'54" East, continuing along said lines, for an arc distance of 121.36 feet, to a 1/2 inch iron rod set with a yellow cap stamped "Corwin Eng. Inc.", at the most southerly southeast corner of said 6.705 acre tract and being an interior ell corner of said 39.298 acre tract;

THENCE, North 00° 57'06" East, along the east line of said 6.705 acre tract and a west line of said 39.298 acre tract, at 390.00 feet, passing the southwest corner of said 2.944 acre tract and a northwest corner of said 39.298 acre tract, continuing for a total distance of 813.56 feet, to a 1/2 inch iron rod set with a yellow cap stamped "Corwin Eng. Inc.", at the northeast corner of said 6.705 acre tract and being in the south line of a 30.728 acre tract, as described Clerks File No. 20170000023682, in said Deed Records same being the northwest corner of said 2.944 acre tract;

THENCE, South 89° 39'37" East, along the south line of said 30.728 acre tract and the north line of said 2.944 acre tract, for a distance of 130.28 feet, to a 1/2 inch iron rod set with a yellow cap stamped "Corwin Eng. Inc.", on a non-tangent curve to the right, having a radius of 225.00 feet, a central angle of 12° 28'10";

THENCE, continuing along said north and south lines and with said curve to the right for an arc distance of 48.97 feet (Chord Bearing North 14° 00'23" West 48.87 feet), to a 1/2 inch iron rod set with a yellow cap stamped "Corwin Eng. Inc.";

THENCE, South 89° 02'37" East, continuing along said lines, for a distance of 182.39 feet, to a 1/2 inch iron rod set with a yellow cap stamped "Corwin Eng. Inc.", at the northeast corner of said 2.944 acre tract and being an ell corner of said 30.728 acre tract being in the west line of a 2.64 acre tract, as described in Vol. 4341, Pg. 2426, in the Deed Records of Collin County, Texas;

THENCE, South 00° 57'23" West, along east line of said 2.944 acre tract, at 430.02 feet, passing the southeast corner of said 2.944 acre tract and an ell corner of said 39.298 acre tract and continuing with the west line of said 2.64 acre tract, for a total distance of 446.89 feet, to a 5/8 inch iron rod found at the southwest corner of said 2.64 acre tract;

THENCE, North 89° 40'58" East, along the south line of said 2.64 acre tract, for a distance of 686.22 feet, to a 1/2 inch iron rod set with a yellow cap stamped "Corwin Eng. Inc." at the southeast corner of said 2.64 acre tract being in said Breezy Hill Road same being in the east line of said 39.298 acre tract;

THENCE, South 00° 17'23" West, along the east line of said 39.298 acre tract and Breezy Hill Road, for a distance of 601.42 feet, to the POINT OF BEGINNING and containing 23.849 acres of land.

OWNER'S CERTIFICATE

NOW, THEREFORE, KNOW ALL MEN BY THESE PRESENTS:
STATE OF TEXAS
COUNTY OF ROCKWALL
We the undersigned owner"s" of the land shown on this plat, and designated herein as the BREEZY HILL PHASE XI, subdivision to the City of Rockwall, Texas, and whose name is subscribed hereto, hereby dedicate to the use of the public forever all streets, alleys, parks, water courses, drains, easements and public places thereon shown on the purpose and consideration thereinexpressed. We further certify that all other parties who have a mortgage or lien interest in the BREEZY HILL PHASE XI, subdivision have been notified and signed this plat.

We understand and do hereby reserve the easement strips shown on this plat for the purposes stated and for the mutual use and accommodation of all utilities desiring to use or using same. We also understand the following:

1. No buildings shall be constructed or placed upon, over, or across the utility easements asdescribed herein.

2. Any public utility shall have the right to remove and keep removed all or part of any buildings, fences, trees, shrubs, or other growths or improvements which in any way endanger or interfere with construction, maintenance or efficiency of their respective system on any of these easement strips; and any public utility shall at all times have the right of ingress or egress to, from and upon the said easement strips for purpose of construction, reconstruction, inspecting, patrolling, maintaining, and either adding to or removing all or part of their respective system without the necessity of, at any time, procuring the permission of anyone.

3. The City of Rockwall will not be responsible for any claims of any nature resulting from or occasioned by the establishment of grade of streets in the subdivision.

4. The developer and subdivision engineer shall bear total responsibility for storm drain improvements.

5. The developer shall be responsible for the necessary facilities to provide drainage patterns and drainage controls such that properties within the drainage area are not adversely affected by storm drainage from the development.

6. No house dwelling unit, or other structure shall be constructed on any lot in this addition by the owner or any other person until the developer and/or owner has complied with all requirements of the Subdivision Regulations of the City of Rockwall regarding improvements with respect to the entire block on the street or streets on which property abuts, including the actual installation of streets with the required base and paving, curb and gutter, water and sewer, drainage structures, storm structures, storm sewers, and alleys, all according to the specifications of the City of Rockwall; or Until an escrow deposit, sufficient to pay for the cost of such improvements, as determined by the city's engineer and/or city administrator, computed on a private commercial rate basis, has been made with the city secretary, accompanied by an agreement signed by the developer and/or owner, authorizing the city to make such improvements at prevailing private commercial rates, or have the same made by a contractor and pay for the same out of the escrow deposit, should the developer and/or owner fail or refuse to install the required improvements within the time stated in such written agreement, but in no case shall the City be obligated to make such improvements itself. Such deposit may be used by the owner and/or developer as progress payments as the work progresses in making such improvements by making certified requisitions to the city secretary, supported by evidence of work done; or Until the developer and/or owner files a corporate surety bond with the city secretary in a sum equal to the cost of such improvements for the designated area, guaranteeing the installation thereof within the time stated in the bond, which time shall be fixed by the city council of the City of Rockwall.

7. The Homeowners Association is responsible for maintaining all non-standard decorative signs, poles/post, hardware or other non standard items. The City of Rockwall has no maintenance or other responsibility related to these items. The City of Rockwall and the Homeowners Association agree the association will bear any and all maintenance cost related the said improvements. The City has the statutory authority to install and maintain Traffic Control Devices for Vehicular traffic on public Streets/Roads within the public right-of-way. This agreement in no way constitutes a change in that authority and does not constitute any delegation of that authority of the Association.

We further acknowledge that the dedications and/or exaction's made herein are proportional to the impact of the Subdivision upon the public services required in order that the development will comport with the present and future growth needs of the City; we, our successors and assigns hereby waive any claim, damage, or cause of action that we may have as a result of the dedication of exaction's made herein.

CITY OF ROCKWALL

CITY COUNCIL MEMORANDUM

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM

TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller, *Director of Planning and Zoning*
DATE:	December 16, 2019
SUBJECT:	Z2019-025; *Amendment to Article IV, Permissible Uses, of the UDC to allow the Rental, Sales, and Service of Heavy Machinery in a Commercial (C) District*

On November 4, 2019, the City Council directed staff to amend the *Land Use Standards* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) to allow the *Rental, Sales, and Service of Heavy Machinery* land use with a Specific Use Permit (SUP) in a Commercial (C) District. This direction came in response to a request submitted by Scott Mommer of Lars Anderson & Associates, Inc. to amend the code to allow the *Rental, Sales and Service of Heavy Machinery* in conjunction with an existing hardware store (*i.e. Home Depot*). The proposed facility will operate as a tool rental center (*i.e. power drills, saws, electric sanders*), which is permitted by-right in a Commercial (C) District. In addition to the rental of tools, the facility will also offer the rental of heavy equipment. Currently, the Unified Development Code (UDC) only permits *Rental, Sales, and Service of Heavy Machinery* in a Heavy Commercial (HC) or Heavy Industrial (HI) District by-right and in a Light Industrial (LI) District with a Specific Use Permit (SUP). Based on the City Council's direction staff proposes to change the code as follows (with the *highlighted, italics* areas indicating the changes):

Additions: Highlighted
Deletions: ~~Highlighted, Strikeout~~

SECTION 01: LAND USE SCHEDULE

SUBSECTION 01.01: USE OF LAND AND BUILDINGS

LAND USE SCHEDULE

LEGEND:

	Land Use *NOT* Permitted
P	Land Use Permitted *By-Right*
P	Land Use Permitted with Conditions
S	Land Use Permitted Specific Use Permit (SUP)
X	Land Use Prohibited by Overlay District
A	Land Use Permitted as an Accessory Use

SECTION 2: CONDITIONAL LAND USE STANDARDS AND DEFINITIONS

SUBSECTION 2.03: CONDITIONAL LAND USE STANDARDS.

(G) *Commercial and Business Services Land Uses.*

(5) *Rental, Sales, and Service of Heavy Machinery*

(a) In the Commercial (C) District, the *Rental, Sales, and Service of Heavy Machinery* land use is only permitted as an ancillary use to a *General Retail Store* (*i.e. a business whose primary purpose is to sell finished goods*) by Specific Use Permit (SUP).

(b) All outside storage of equipment and machinery shall be visibly screened from all adjacent properties utilizing one of the screening alternatives outlined in Subsection 05.02.(A), *Loading Docks and Outside Storage Areas*, of Article VIII, *Landscape and Fence Standards*, of the Unified Development Code (UDC).

(c) The storage area for equipment and machinery shall not occupy any required parking spaces. Excess parking spaces may be used if all other requirements are met.

(d) The storage and/or display of equipment and machinery shall be in a stowed position so as to not extend any part of the equipment or machinery in an upward or outward manner.

(e) The conditions above shall not be construed to permit the outside storage of equipment and machinery for outside display, and does not permit additional outside storage of other materials that are not associated with the *Rental, Sales, and Service of Heavy Machinery* land use.

(f) Maintenance or service of any equipment and machinery shall not be performed on-site.

In accordance, with Section 2.04 of Article XI, *Development Applications and Review Procedures,* of the UDC staff brought the proposed text amendment forward to the Planning and Zoning Commission for a recommendation to the City Council. On December 10, 2019, the Planning and Zoning Commission approved a recommendation to recommend approval of the amendment by a vote of 6-0, with Commissioner Moeller absent. The approval of the proposed amendment is a discretionary decision for the City Council.

Staff has sent out a 15-day notice to the Rockwall Herald Banner in accordance with all applicable state laws and Subsection 2.03(A)(3) of Article XI, *Development Applications and Review Procedures*, of the UDC. Should the City Council have any questions staff will be available at the meeting on *December 16, 2019*.

CITY OF ROCKWALL

ORDINANCE NO. 20-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING ARTICLE IV, *PERMISSIBLE USES*, OF THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*], PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, an amendment to the City of Rockwall's Unified Development Code [*Ordinance No. 04-38*] has been initiated by the City Council of the City of Rockwall to amend Article IV, *Permissible Uses,* of the Unified Development Code [*Ordinance No. 04-38*]; and,

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the city's corporate boundaries, and the governing body in the exercise of its legislative discretion, has concluded that the Unified Development Code [*Ordinance No. 04-38*] and Municipal Code of Ordinances should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

SECTION 1. That Article IV, *Permissible Uses,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'A'* of this ordinance;

SECTION 2. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars ($2,000.00*) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

SECTION 3. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code [*Ordinance No. 04-38*], and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

SECTION 4. That this ordinance shall take effect immediately from and after its passage.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 6TH DAY OF JANUARY, 2020.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Mary Smith, Assistant City Manager**

DATE: **December 11, 2019**

SUBJECT: **Republic Waste Request for Rate Increase**

The solid waste contract with Republic Waste sets periodic points in the contract term for an increase to the collection rates. The increase for 2019 is 3% on all residential and commercial collection rates.

The current contract expires in 2020. The accompanying resolution if adopted by the City Council will set the new rates to be effective 1/1/20.

The new residential rate in the proposal reflects an increase of $.51 per month including applicable sales tax.

Rick Bernas will be here to represent Republic Waste if the Council has any questions regarding this matter.

CITY OF ROCKWALL, TEXAS

RESOLUTION #

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS FIXING THE COLLECTION RATE TO BE CHARGED FOR GARBAGE COLLECTION SERVICES FURNISHED BY THE CITY; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, Chapter 34. Solid Waste, Article I. In General, Sec. 34-5 Collection Charges, of the City of Rockwall Code of Ordinances provides that the rates for garbage service within the city shall be established from time to time by city council resolution; and

WHEREAS, the City Council finds that, due to increasing costs, it is necessary to increase the rates charged for garbage collection services.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:

SECTION 1. That the following monthly rates are hereby established and adopted and shall be collected for garbage collection services billed by the City:

Residential Rates	
Twice per week collection **Twice per month brush/bulky** **Once per week recycle collection**	$16.21
Polycart Rental	$4.08 per month
Household Hazardous Waste collection	$.70 per month (retained by City for HHW Day)

Commercial Rates	
Twice per week hand collection	$16.96

	1X	2X	3X	4X	5X	6X	Extra
2 yard	$ 83.78	$154.99	n/a	n/a	n/a	n/a	$ 47.27
3 yard	$ 94.38	$174.57	n/a	n/a	n/a	n/a	$ 52.42
4 yard	$117.98	$218.24	$303.82	n/a	n/a	n/a	$ 58.24
6 yard	$141.56	$261.91	$364.19	$451.16	n/a	n/a	$ 68.89
8 yard	$176.96	$327.39	$455.34	$563.90	$656.29	$734.78	$ 81.53

Roll Off		***Compactors***	
20 yard	$492.19	**30 yard compactor**	$551.83
30 yard	$517.53	**35 yard compactor**	$595.10
40 yard	$536.92	**42 yard compactor**	$595.10
Del / Exc	$171.53		
Daily rental	$ 4.49		

Rentals range from $1.00 to $600.00 per month (determined by age, type, size of compactor). Installation is not included.

Rates include street use fees as described in the contract.

SECTION 2. That these rates and charges shall become effective and be in full force and effect starting January 1, 2020.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS THIS 16th DAY OF DECEMBER, 2019.

City of Rockwall
The New Horizon

MEMORANDUM

TO: City Council

FROM: Joey Boyd, Assistant City Manager

DATE: December 12, 2019

SUBJECT: Census 2020 – Complete Count Committee Update

At the October 7, 2019 meeting, the City Council approved a resolution establishing a complete count committee related to the 2020 US Census. Councilmember Bennie Daniels was appointed to lead the effort for the City of Rockwall. Since then, Rockwall County has hosted representatives from the US Census Bureau to provide training. The Committee includes elected officials, city management, service organizations, local churches, school district administration, and other civic and community leaders interested in participating in the census effort.

There are 4 ways to respond to the 2020 Census: online, by phone, by mail, and in-person interviews. The Complete Count Committee will strive to promote the importance of completing the census throughout the City and County as well as providing local assistance in known Hard To Count areas. Hard To Count populations include those who are hard to locate, those that lack trust in government, non-English speaking individuals, or those with disabilities. The map included shows an area in Rockwall identified as a Hard To Count area in the previous census that is estimated to have 2,396 residential homes with an estimated population of 8,200 people. Areas such as these will be a primary focus for the committee to conduct targeted community outreach and education events.

The committee will be using a community-based strategy that will begin with a public information campaign and likely will include community outreach meetings in neighborhoods known to have a historically lower level of response. Grants are available to local groups through the US Census. The Committee is developing strategies that may be eligible for grant funds to compliment other local efforts.

Key Facts / Dates:

- $675 Billion in funding is tied back to the census
- Funding of 132 programs are affected by the census. Some notable programs include nutritional assistance programs like Meals on Wheels, Head Start, school funding, national school lunch programs, and many more
- There are 9 questions on the census form
- Information provided is confidential
- The Committee will be able to use technology to track the response progress through the Response Outreach Area Mapper (ROAM), which is an interactive web mapping application. This will allow for the Committee to plan its outreach, marketing, and promotions more effectively based on response rates in specific areas of the City / County.
- Advertising and marketing for the 2020 Census will begin in January
- An initial notification from the US Census will be delivered by mail in March 2020
- March 13th will be the first day the census will be available for completion
- Census forms are available in 13 separate languages in addition to English
- April 1, 2020 is Census Day
- July 31, 2020 is the last day the census can be submitted
- Counts will be sent to the President by December 31, 2020
- Redistricting counts will be sent to the states by March 31, 2021

The Committee will provide regular updates to the City Council. Councilmember Daniels and city staff will be available to answer any question during the meeting.

MINUTES

ROCKWALL CITY COUNCIL REGULAR MEETING

Monday, December 16, 2019 - 5:00 PM

City Hall Council Chambers - 385 S. Goliad St., Rockwall, TX 75087

I. Call Public Meeting to Order

Mayor Pruitt called the public meeting to order at 5:00 p.m. Present were Mayor Jim Pruitt, Mayor Pro Tem Dana Macalik and Council Members Patrick Trowbridge, John Hohenshelt, Kevin Fowler, Bennie Daniels and Trace Johannesen. Also present were City Manager Rick Crowley, Assistant City Managers Mary Smith and Joey Boyd and City Attorney Frank Garza. Mayor Pruitt read the discussion items below into the record before recessing the public meeting to go into Executive Session at 5:01 p.m.

II. Executive Session.

The City of Rockwall City Council will Recess into Executive Session to discuss the following matters as authorized by Chapter 551 of the Texas Government Code:

1. Discussion regarding Facilities Agreement litigation pursuant to Section 551.071 (Consultation with Attorney)
2. Discussion regarding Breezy Hill Road pursuant to Section § 551.071 (Consultation with Attorney)
3. Discussion regarding possible purchase/acquisition of real property for park land in the north portion of the city, pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

III. Adjourn Executive Session

Council adjourned from Executive Session at 5:52 p.m.

Reconvene Public Meeting (6:00 p.m.)

Mayor Pruitt reconvened the public meeting at 6:00 p.m. with 6 of the 7 council members being present (Johannesen stepped out of the meeting and was absent for its entirety).

IV. Invocation and Pledge of Allegiance – Councilmember Hohenshelt

Councilman Hohenshelt delivered the invocation and led the Pledge of Allegiance.

V. Open Forum

Kristin and David Bota

840 Lazy Brooke Drive
Rockwall, TX 75087

Mr. and Mrs. Bota came forth and expressed concern about commercial utilization of drones, especially flying over residential neighborhoods. She wanted to encourage the City Council to consider enacting an ordinance to regulate their use within the City of Rockwall. She generally expressed her belief that footage obtained by drones is intrusive to personal privacy and can pose a safety risk to those residents who are videoed (i.e. break ins, robberies, etc.).

Following Mrs. Bota's comments, Bob Wacker (lives on Featherstone) came forth and provided follow-up comments pertaining to drones. He then briefly spoke about the last plat associated with Stone Creek Estates. He thanked the staff and Council for its work on this development and wished everyone a Merry Christmas.

VI. Take Any Action as a Result of Executive Session

Mayor Pro Tem Macalik moved to approve a reciprocal development agreement between the City of Rockwall and the following parties: Cory Knowlton, Charles W. Sinks and Sandra Sinks. Councilmember Trowbridge seconded the motion, which passed by a vote of 6 ayes with 1 absent (Johannesen).

VII. Consent Agenda

1. Consider approval of the minutes from the December 2, 2019 regular city council meeting, and take any action necessary.
2. Consider approval the professional engineering services contract for Birkhoff, Hendricks & Carter, L.L.P. to perform the engineering design services for the Buffalo Creek Tributary 1 Sanitary Sewer Interceptor Capacity Improvements Project in an amount not to exceed $164,780., to be funded by Sanitary Sewer Bonds, and take any action necessary.
3. Consider authorizing the City Manager to execute an interlocal agreement with Rockwall County regarding Municipal Judge Services for upcoming "No Refusal Weekends," and take any action necessary.
4. Consider authorizing the City Manager to execute an agreement with MHS Planning & Design, LLC to update the Parks, Recreation & Open Space Master Plan for 2020-2030 in amount of $38,150 to be funded by Recreation Development Fund reserves, and take any action necessary.
5. **P2019-045** - Consider a request by Chase Finch of Corwin Engineering, Inc. on behalf of John Arnold of BH Phase 10, LTD for the approval of a final plat for Stone Creek, Phase X containing 118 single-family residential lots on a 36.428-acre tract of land identified as a portion of Tract 3 of the S. King Survey, Abstract No. 131, City of Rockwall, Rockwall County, Texas, zoned

Planned Development District 70 (PD-70) for Single Family-10 (SF-10) District land uses, located at the southwest corner of John King Boulevard and Featherstone Drive, and take any action necessary.

6. **P2019-046** - Consider a request by Chase Finch of Corwin Engineering, Inc. on behalf of John Arnold of BH Phase 11, LTD for the approval of a final plat for the Breezy Hill, Phase XI containing 78 single-family lots on a 23.849-acre tract of land identified as a portion of Tract 7 and all of Tract 7-06 of the J. Strickland Survey, Abstract No. 187, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 74 (PD-74) for Single-Family 10 (SF-10) District land uses, generally located adjacent to Breezy Hill Road north of the intersection of Breezy Hill Road and FM-552, and take any action necessary.

Regarding the Consent Agenda, Councilmember Trowbridge moved to approve all items, as presented (#s 1, 2, 3, 4, 5, and 6). Mayor Pro Tem Macalik seconded the motion, which passed by a vote of 6 ayes with 1 absence (Johannesen).

VIII. PUBLIC HEARING ITEMS

1. **Z2019-025** - Hold a public hearing to discuss and consider a request for the approval of an **ordinance** for a text amendment amending the Permissible Use Charts contained in Article IV, Permissible Uses, of the Unified Development Code [Ordinance No. 04-38] for the purpose of allowing the Rental, Sales, and Service of Heavy Machinery and Equipment land use by Specific Use Permit (SUP) in the Commercial (C) District, and take any action necessary. **(1st Reading)**

Planning Director Ryan Miller provided background information pertaining to this agenda item. He explained that this text amendment is in response to a request that was previously made to Council by a representative of Home Depot. Staff has made the amendment and is proposing some land use standards and regulations that Council may wish to consider as part of this proposed text amendment. This issue was taken before the Planning & Zoning Commission, and the Commission has recommended approval by a vote of 6-0. Proper public notice has been given as well regarding this public hearing.

Mayor Pruitt opened the public hearing, asking if anyone would like to come forth and speak at this time. There being no one indicating such, he then closed the Public Hearing. Councilmember Hohenshelt moved to approve Z2019-025. Councilman Daniels seconded the motion. The ordinance was read as follows:

CITY OF ROCKWALL
ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING ARTICLE IV,

***PERMISSIBLE USES*, OF THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*], PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.**

The motion passed by a vote of 6 ayes with 1 absence (Johannesen).

IX. ACTION ITEMS

1. Discuss and consider adoption of a resolution setting solid waste collection rates, and take any action necessary

Mr. Bernas came forth and shared that, per the contract, there is a 3% cost of living increase annually. It was explained that, per the City Charter, the Council must fix the garbage rates by resolution. Following brief discussion, Councilmember Fowler moved to comply with the contract by adopting the proposed resolution setting the solid waste collection rates. Councilmember Trowbridge seconded the motion. One, small needed change to the resolution was pointed out. The motion to approve the resolution with the small correction being made then passed by a vote of 6 ayes with 1 absence (Johannesen).

2. Discuss and consider an update regarding the Complete Count Committee for the U.S. 2020 Census and take any action necessary.

Councilman Daniels explained that this is a voluntary committee made up of representatives throughout the county and from the County itself. This committee has met two times so far. The purpose of the committee is to decrease the undercount of the census within Rockwall County. The objective is to have as complete a count as possible. Historically, we have had pretty good compliance; however, there is a certain tract of land that has traditionally been undercounted in each census. He explained that, in general, the undercounted area is in and around the Lake Rockwall Estates subdivision. The number one reason for undercounts is distrust of the government. He went on to explain that those who perform the Census are sworn to a strict, lifetime confidentiality Oath. He stressed that the Census is directly associated with Congressional representation, and that is very important to the State of Texas at the Federal government level. Last, the Census is very important because many Federal grants are given out based on population, and we want to be sure we get our fair share of those grant monies. He pointed out that jobs are available, part time, this summer for those who might be interested in working on the Census count.

Mr. Boyd, Assistant City Manager, provided follow up comments after Councilman Daniels spoke, sharing some of the upcoming expectations as far as 'next steps' associated with the Census. April 1 is Census Day, and the counts will be presented to the President of the U.S. on or before Dec. 31, 2020.

People will be able to participate in the Census by the internet, by phone, at a Census center, or in person (with a Census rep. showing up at one's door).

Council took no action pertaining to this agenda item.

3. Discuss and consider an update regarding the South Lakeshore/Summit Ridge reconstruction project, and take any action necessary.

Mayor Pruitt shared that this is the largest bond project to date, and we are 10 months into a 2 year long project. He explained that his neighbors recently met; however, they did not invite him to the meeting. The mayor explained that staff has met with him and provided him with the huge contracts associated with this bond project, and he has reviewed those. He shared that some residents have concerns that there are many days when it appears as though no construction work is taking place, or very little work and progress is being made. He believes that two years is a very long time for a neighborhood to be torn up. He believes that the city needs a better way of communicating with residents about what is going on with the progress of construction. Also, he believes that city notifications should be expanded beyond those who only live in that immediate area. He shared that the contractor is responsible for ensuring the roadways are passable and that potholes stay filled. The contractor is required to clean up the job sites every day (i.e. after it rains). He would like to see the City limit a project like this to about a year (rather than 2 years). Also, he thinks that incentives should be built into the contract to encourage contractors to finish the job(s) just as soon as possible. Discussion took place related to a subcontractor of the general contractor who was negligent and accidentally damaged the bridge deck by cutting through it. The bridge repair should take place sometime after the first of the year.

Council took no action pertaining to this agenda item.

4. Discuss and consider (re)appointments to the city's Historic Preservation Advisory Board and Main Street Advisory Board, and take any action necessary.

Councilman Trowbridge explained that our city's Main Street Advisory Board has been pretty solidly in place for the last ten years. Now, however, three people are rolling off due to term limits, and there is one person who is resigning due to time constraints. He mentioned that candidate Jennifer Hoffman needs to get registered to vote and that she is working on that now. So, pending her doing so, he'd like to recommend her along with a few other candidates. Mayor Pruitt then moved to appoint the following individuals to the city's Main Street Advisory Board: Stacy Fuqua, Craig Stoddart, Geoffrey Lyons and Jennifer Hoffman and also appoint Jennifer Hoffman to the Historic Preservation Advisory Board. Councilmember Trowbridge seconded the motion, which passed by a vote of 6 ayes with 1 absence (Johannesen).

(Note: terms for the four new Main Street Advisory Board members will be from Jan. 2020 thru Jan. 2022 and the initial (partial) term for Ms. Hoffman on the Historic Preservation Advisory Board will run thru Aug. of 2021).

X. EXECUTIVE SESSION

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding Facilities Agreement litigation pursuant to Section 551.071 (Consultation with Attorney)
2. Discussion regarding Breezy Hill Road pursuant to Section § 551.071 (Consultation with Attorney)
3. Discussion regarding possible purchase/acquisition of real property for park land in the north portion of the city, pursuant to Section §551.072 (Real Property) and Section §551.071 (Consultation with Attorney).
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney)

XI. Reconvene Public Meeting & Take Any Action as Result of Executive Session

Council did not reconvene in Executive Session following the close of the public meeting agenda. See the start of the 6:00 p.m. meeting above for action taken at the beginning of this meeting.

XII. Adjournment

Mayor Pruitt adjourned the meeting at 6:58 p.m.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 26th DAY OF DECEMBER, 2019.

CITY OF ROCKWALL

ORDINANCE NO. 19-46

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING ARTICLE IV, *PERMISSIBLE USES*, OF THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*], PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, an amendment to the City of Rockwall's Unified Development Code [*Ordinance No. 04-38*] has been initiated by the City Council of the City of Rockwall to amend Article IV, *Permissible Uses,* of the Unified Development Code [*Ordinance No. 04-38*]; and,

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the city's corporate boundaries, and the governing body in the exercise of its legislative discretion, has concluded that the Unified Development Code [*Ordinance No. 04-38*] and Municipal Code of Ordinances should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

SECTION 1. That Article IV, *Permissible Uses,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'A'* of this ordinance;

SECTION 2. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars ($2,000.00*) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

SECTION 3. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code [*Ordinance No. 04-38*], and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

SECTION 4. That this ordinance shall take effect immediately from and after its passage.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 26TH DAY OF DECEMBER, 2019.

Jim Pruitt, Mayor

City of Rockwall
The New Horizon

MEMORANDUM

TO: Mayor and Council Members

FROM: Hotel Occupancy Tax Sub-committee Members
Mary Smith, Assistant City Manager

DATE: December 17, 2019

SUBJECT: 2020 Texas Juvenile Chiefs Summit

The City received an application for hotel occupancy taxes for the 2020 Texas Juvenile Chief's Summit to be held at the Hilton Rockwall in February 2020. The summit is attended by Juvenile Probation officials from across Texas from Sunday through mid-day Wednesday. The organization does work on a pretty small budget for the event so they have asked for all expenses not covered by their registration fees - $32,360 was the request. Last year's event included 175 room nights booked.

Prior to Council action on the above, the Hotel Occupancy Tax budget is as follows:

Fund Balance carried forward	**$ 363,500**
Budgeted Revenues	**1,009,000**
Previously Allocated Funding	**(658,870)**
Projected Fund Balance	**$ 713,630**

Subcommittee members Kevin Fowler, Bennie Daniels, and Dana Macalik met to discuss the request and are recommending a $30,000 award from hotel occupancy taxes. Council is asked to consider approving the funding as recommended by the subcommittee.

- ► COMPLETE AN APPLICATION FOR EACH EVENT/PROGRAM/EXHIBIT REQUESTING FUNDS
- ► INCOMPLETE APPLICATIONS WILL NOT BE FORWARDED TO THE COUNCIL SUBCOMMITTEE

1. **Mark an "X" next to the category or categories that your organization is requesting funds in the attached budget request.**

☒ **Advertising/Tourism** **Requested funding amount $32,360**
Conducting solicitation or promotional programs that encourage tourists and delegates to come to the City of Rockwall.

☐ **Arts** **Requested funding amount $**
Providing encouragement, promotion, improvement and application of the arts as it relates to the presentation, performance execution or exhibition of the major art forms in the City of Rockwall.

☐ **Historical** **Requested funding amount $**
Providing historical restoration, preservation, programs and encouragement to visit preserved historic sites or museums located in the City of Rockwall.

2. **Describe the program or event for the upcoming fiscal year (Oct. 1 2019 – Sept. 30, 2020) that you are requesting Hotel Tax funding. What is your event and why are you having it?**

The 2020 Texas Juvenile Chiefs Summit will host approximately 150 Juvenile Probation Chiefs/Directors around the state of Texas for professional networking and training. Attendees arrive on Sunday for the registration and Opening Session. Monday, Tuesday and ½ day on Wednesday consists of a total of 16.25 training hours with 9.5 approved management training hours. Training topics include leadership, employment, missing and exploited children, sex trafficking, generational differences, state standards and the monitoring process.

This conference is hosted annually by alternating regions across the state. It is the only conference dedicated solely to Juvenile Probation Chiefs and as such is consistently well attended by Juvenile Justice professionals as well as industry related guest speakers and exhibitors.

3. **How does the event/program meet the definition of the categories listed in Item No.1 above (promotion of tourism and the hotel industry in the City of Rockwall)?**

The 2020 Texas Juvenile Chiefs Summit promotes tourism and the hotel and convention industry in Rockwall by attracting approximately 150 conference attendees from around the state. The target audience is the Juvenile Probation Director/Chief of every county in Texas. Often, Assistant Directors attend as well as the Executive Director from the Texas Juvenile Justice Department and staff. In addition, we plan to host 17 speakers and approximately 25 vendors, the majority of whom work and reside outside of the Rockwall area.

The convention site is the Hilton Dallas/Rockwall Lakefront at the Harbor. Approximately 135 rooms will be reserved at the Hilton Harbor and 15 rooms at the

Spring Hill Suites. (See Attached Contracts) Area restaurants and a variety of businesses will also directly benefit from the 4 day event. **It is not the intent of the Northeast Texas Juvenile Chiefs' Association to profit from hosting this conference. All revenue will be will be returned to the Hilton or local businesses to enhance the conference.**

This request for funding relates to the following statutory expenditure categories:

#2 Administrative costs for facilitating convention registration (materials)
Registration related expenditures include the cost of registration bags, nametags, lanyards, registration table signage, and miscellaneous paper supplies and printing. The total estimated registration materials expense is $1,030.00

#3 Advertising, solicitations, and promotions that attract tourists and convention delegate to the City
We will be using a marketing tool called Mailchimp to send out E-blasts to every probation department in the state of Texas, promoting conference details, hotel accommodations and general tourist information related to their stay in Rockwall.
The cost of Mailchimp for 3 months is $29.97

#9. Signage directing the public to sights and attractions frequently visited by hotel guests in the City

We plan to utilize Eventscase, a fully integrated event management software application, which can be designed to include a "Community" feature within the app. This tab will invite conference attendees to explore the Rockwall area by providing easy access to a directory of restaurants, entertainment venues and local businesses, including URL links to their websites, through the user's IOS or Android mobile device. This puts Rockwall's wealth of community resources at the fingertips of every visitor wherever they may travel during their four day stay.
The cost of the Eventscase application is $1489.00

4. **Is the event/program that the organization is requesting Hotel Tax funds held in/on City-owned property?**
Yes Name location: Hilton Dallas/Rockwall Lakefront, at the Harbor

5. **Will your organization provide special event insurance coverage for the event/program if held on City property?**
No Name of Insurance Company: N/A

6. **Provide 3 years attendance history for the above listed programs, activities, exhibits or event described in Item No. 2 above.**

Event	Year	Event Duration (in Days)	Audience Size	# of Attendees in hotel rooms
Juvenile Chiefs Summit - San Marcos	2019	4	131	155
Juvenile Chiefs Summit – Kerrville	2018	4	153	175
Juvenile Chiefs Summit - Austin	2017	4	103	120

7. **What specific market will you target with the event/program's marketing plan? Attach up to 3 examples and evidence of marketing area and readership (Label Exhibit C).**

Our target market group/readership is approximately 161 Juvenile Probation Chiefs/Directors representing the 164 departments in the 254 counties within the state of Texas. We are marketing the event thru a variety of communication channels including:

- Distribution of Save the Date flyers at past juvenile conferences
- Posting conference information, registration and hotel links on the statewide Texas Juvenile Justice Department website http://www.tjjd.texas.gov
- Emails from the TJJD Training Director to Juvenile Probation Chiefs
- Weekly email blasts from the conference committee promoting vendors, training topics, keynote speakers, hotel information, registration updates etc.
- Newsletter articles from Juvenile Probation Consultants

Additional conference attendees include the approximately 17 guest speakers and approximately 25 vendors who will be featured guests at the event. Potential vendors were invited to participate through personal telephone calls and targeted emails with detailed information promoting exhibitor and sponsorship opportunities. Guest speakers were also recruited through phone calls and emails.

8. **The City of Rockwall must require segregated accounting of its Hotel funds. Organizations must maintain and account for revenue provided from the tax authorized by section 351.101(a) within one of the two options listed below.**

a) Separate checking account without combining with any other revenues or maintained in any other bank account or

b) Maintain a line item accounting, whereby the Hotel revenues may not be combined with any other revenues or expenditures. The funds may be maintained in the same bank account, provided they are reported as a separate line item in the organization's budget. Interest earned on the Hotel revenues must be used to support the event/program as well.

Will the organization be able to segregate the accounting process in either a) or b) above? Yes

9. **Provide all of the following documentation with this application and label each as outlined below.**

Exhibit A	Proposed budget for each event/program using attached form
Exhibit B	Letter of determination certifying federal tax exempt 501(c)(3) status
Exhibit C	Examples and evidence of marketing area and readership (limit 3)
Exhibit D	List members of the governing body including name, position, mailing address and phone number
Exhibit E	W-9 Form https://www.irs.gov/pub/irs-pdf/fw9.pdf?
Exhibit F	Form 1295 https://www.ethics.state.tx.us/whatsnew/elf_info_form1295.htm

We certify, to the best of our ability, that the information in this application, including all exhibits and supporting documentation is true and correct to the best of our knowledge. It is understood and agreed that any funds awarded as a/ result of this application will be used for the purpose set for herein and the program guidelines.

Form **W-9**
(Rev. October 2018)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

▶ **Go to *www.irs.gov/FormW9* for instructions and the latest information.**

Give Form to the requester. Do not send to the IRS.

Print or type. See Specific Instructions on page 3.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.

Northeast Texas Juvenile Chiefs Association

2 Business name/disregarded entity name, if different from above

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☐ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ▶ _____

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is not disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☑ Other (see instructions) ▶ **Exempt Organization 509(a)(2)**

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) **N/A**

Exemption from FATCA reporting code (if any) **N/A**

(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.

301 West Madison Street

Requester's name and address (optional)

6 City, state, and ZIP code

Clarksville, Texas 75426

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–			–				

or

Employer identification number

8	0	–	0	4	6	2	0	0	3

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here **Signature of U.S. person ▶** Sherry Dunn **Date ▶** 2/19/2019

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

2020 JUVENILE CHIEFS' SUMMIT
February 23 – 26, 2020
Exhibitor and Sponsorship Information

The Northeast Texas Juvenile Chiefs' Association (NETJCA) invites you to join us for the 2020 Texas Juvenile Chiefs' Summit, located at the beautiful, lakefront Hilton Bella Harbor in Rockwall, Texas. This year's event runs from February 23-26 and is packed with exciting new opportunities to showcase our vendors.

The annual Juvenile Chiefs' Summit offers a unique forum to build and strengthen partnerships that will ultimately benefit youth in the Texas juvenile justice system. Your company's active participation provides an opportunity to launch new initiatives, build brand awareness, and advance your company's product or service profile to a targeted audience of interested juvenile justice professionals.

Attendees include key decision makers in a wide range of juvenile justice professions:

- Chiefs & management staff from statewide juvenile probation departments
- Professionals from the Texas Juvenile Justice Department
- Members of juvenile justice associations throughout the state
- A variety of juvenile justice service providers and vendors

Your success is key to our success !

EXHIBITOR PACKAGE (Please see the attached Exhibitor Floor Plan)

Each registered Exhibitor receives the following benefits:

- Exhibition space at the venue including one 6' skirted table and chairs
- One ¼ page ad in the Conference Agenda Booklet
- A comprehensive list of each conference attendee's name and email address.
- The opportunity to meet and socialize with Juvenile Probation Chiefs from around the state, including 18 new Chiefs since 2018, who are eager to learn about your valuable products and services.

EXCITING NEW SPONSORSHIP OPPORTUNITIES!

Attached is an overview of our new exclusive sponsorship opportunities to highlight your company. We invite you to contact us for more detailed information about how we can assist you in best promoting your business.
For questions on all Sponsorship opportunities, please call Angie Scalf at 214-244-2930.

IMPORTANT DETAILS FOR EXHIBITORS AND SPONSORS

A limited number of Exhibitor Packages are available due to event space. In addition, each Sponsorship opportunity is exclusive and awarded on a first-come, first-served basis. Once you have selected the Exhibitor Package and / or Sponsorship opportunities you are interested in, please complete the attached registration form and email it to Angie Scalf at ascalf@rockwallcountytexas.com to reserve your space.

In order to best accommodate your needs, we ask that all information (such as corporate logo artwork, registration bag materials, Conference Agenda Booklet ads etc.) regarding your sponsorship be received no later than December 1, 2019. This will allow the Conference Committee time to make necessary arrangements for printing your custom products, banners etc. and to include your company's advertisement, logos and links in conference promotional materials and emails as included in your package.

Exhibitors are responsible for any shipping and handling costs incurred to ship directly to the event venue. Please call the Hilton Bella Harbor directly for shipping instructions.

Hilton Bella Harbor
2055 Summer Lee Drive
Rockwall, TX 75032
214-771-3700

Exhibitor set-up for the conference will begin on Sunday, February 23, 2020 at 3 p.m. General exhibiting hours are Sunday 5-8 p.m., Monday and Tuesday 8 a.m.– 6 p.m., and Wednesday 8 a.m. to 12 noon. Signage is the responsibility of each exhibitor. You may use table signs or place one floor easel adjacent to your table. Please bring extension / multi-outlet cords or surge protectors if needed.

Payment information is provided on the registration form. Please note:
Payment for Exhibitor Packages is due by January 31, 2020.
Payment for Sponsorship opportunities is due by December 15, 2019

We appreciate your support and look forward to seeing you in Rockwall in 2020 !

Angie Scalf

The MBA Dispatch

A Publication of Mel Brown and Associates

www.melbrown.org "Quality Service is Our Only Product" December 2019

MBA Requesting Assistance in Planning 2020 Projects

Since December is usually a slow month as far as MBA's training and consulting services are concerned, a significant part of the month is spent on developing new training topics as well as trying to schedule training dates for both the new topics and other topics clients have requested.

MBA President/CEO Dr. Mel Brown said, "we are requesting that our current clients as well as potential clients help us in four ways: (1) by suggesting training topics they would like for us to develop and offer, (2) by agreeing to serve as training sites for the regional training events which we offer, (3) by submitting questions regarding leadership and management they would like to see addressed in the 'Contemplation Corner' of our monthly newsletter (*The MBA Dispatch),* and

2020 Texas Juvenile Chiefs Summit to be Held in Rockwall

The 2020 Texas Juvenile Chiefs Summit, which is being hosted by the Northeast Texas Juvenile Chief Association (NETJCA), has been scheduled for February 23-26 at the Hilton Dallas/Rockwall Lakefront Hotel in Rockwall, Texas.

There is no state wide juvenile chiefs Association and the responsibility for hosting the annual summit rotates among the four regional juvenile chiefs' associations. The theme for the summit is "Rocking and Rolling into the 20's."

See Summit on Page 3

Murderer Claims His Sentence Ended Because He Died and was Resuscitated

Benjamin Schreiber, who has been behind bars since 1996 when he was charged in the death of John Dale Terry, a 39-yr-old whose bludgeoned body was found near an abandoned trailer in rural Agency, Iowa, claims his life sentence was completed when he died and was resuscitated.

Benjamin Schreiber

Prosecutors contended that Schreiber, then 43, had plotted with Terry's girlfriend before clubbing the man to death with the wooden handle of a pickax. A jury found him guilty of first-degree murder, and in 1997 he was sentenced to life without parole.

On March 30, 2015, Schreiber fell unconscious and was rushed to the University of Iowa Hospitals & Clinics where doctors brought him back to life by administering epinephrine through an IV. Doctors restarted his heart five times.

See Sentence on Page 5

Brown to Speak at Texas Plant Protection Association Conference

MBA President/CEO is scheduled to speak during the 31st Annual Conference of the Texas Plant Protection Association (TPPA) which is one of the leading agricultural conferences in Texas. The theme for this year's conference, which is being held at the Brazos Center in Bryan, Texas, December 10-11, 2019, is "Artificial Intelligence's Impact on Texas Agriculture."

Texas Plant Protection Association

Steward Named Co-Chair of Illinois Juvenile Detention Center Workgroup

William Steward, Deputy Executive Director of Cook County Juvenile Temporary Detention Center (JTDC) in Chicago, Illinois has been named Co-Chair of the Illinois Juvenile Justice Leadership Council's Juvenile Detention Center Workgroup.

Steward holds an Associate of Arts degree (Social Sciences) from City Colleges of Chicago – Kennedy – King College, Bachelor of Arts degree (African-American/Black Studies) from University of Illinois at Chicago, and Master of Divinity and Master of Social Justice and Community Development Degrees from Loyola University Chicago. He is working toward a Doctor of Education in Organizational Leadership at Grand Canyon University.

See Steward on Page 6

Carol Cramer Brooks Joins NCCHC Board of Directors

The National Commission on Correctional Health Care (NCCHC) and the National Partnership for Juvenile Services (NPJS) has announced that Carol Cramer Brooks has been appointed to the NCCHC board of directors. Brooks serves as the NPJS liaison to the NCCHC board of directors. She replaces Dr. David W. Roush, who retired from the board after 28 years of service.

Carol Cramer Brooks

According to the announcement, "Brooks' career focus includes training, technical assistance and program and curriculum development. Currently a consultant, her previous positions include director of training and confinement education for the National Juvenile Detention Association and director of the Office of Juvenile Justice and Delinquency Prevention's National Center for Youth in Custody."

See NCCHC on Page 6

Contemplation Corner

By

Mel Brown, Ph.D.

Leaders Are Still Readers

Last year, as I was seeking a topic for December's Contemplation Corner, I was reminded of President Harry S Truman's statement, "Not all readers are leaders, but all leaders are readers." What brought the quote to mind was someone saying, "Mel, you teach a lot of seminars and workshops on leadership. If I wanted to start a collection of the best books on leadership, what books would you suggest I get?"

I gave a lot of thought to that question over the next few weeks and decided that the answer would be beneficial to the readers of this column. I reviewed the titles of the books on shelves in my office and shared with our readers a list of books which I thought would prove valuable to any student of leadership.

A few weeks ago, while in Midland, Texas, facilitating an MBA Regional Training Event entitled, "Effective Leadership Skills for the Workplace," Midland County Community Supervision and Corrections Department Director Allen Bell shared with me that he had bought those books. He also shared with me the titles of some other books he was reading. Knowing that someone found that list of books helpful, I have decided, once again, to share with our readers some books I think would be beneficial for leaders or aspiring leaders to read.

The books I am recommending, some of which are repeats from last year, are listed in alphabetical order by author to avoid the appearance of a preference for one book over another. They each have their own type of value.

- **Bennis, Warren : *On Becoming a Leader***

  Bennis seeks to redefine leadership and analyzes what actually goes into making a true leader. He separates management from leadership, defines some of the core qualities required for leadership, and explains how anyone can embark on the journey to become a leader with a determined effort in the right direction. He opines that people often tend to confuse 'managing' for 'leading' when in fact these are two completely separate domains. As subjective as the subject might seem, he adopts more of a methodical approach for the readers to be able to follow the advice with relative ease. An interesting and inspiring leadership book which offers valuable insights on how leaders are "made" rather than "born."

- **Collins, Jim C: *Good to Great: Why Some Companies Make the Leap and Others Don't.***

  This book is based upon the findings of a study Collins and his research team conducted to answer two questions: Are there companies that defy gravity and convert long-term

Worth the Time

Realizing that busy executives and mid-managers do not always have the time to peruse the Internet or issues of magazines and journals in search of that elusive article containing information well worth the reading, this column provides a brief introduction and a hyperlink to material which we think is "Worth the Time" to read.

This month's featured article, "6 Ways to Reduce Employees Stress During the Holidays" is by author, consultant and speaker Kevin Sheridan. The title itself provides an adequate introduction to article so there is no need to add anything further.

Click here **to read the article**

Contemplation (Continued from Page 2)

mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great?

The findings of the study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include:

- Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness.
- The Hedgehog Concept: (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence.
- A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology.
- The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap.

Collins says, "Some of the key concepts discerned in the study fly in the face of our modern business culture and will, quite frankly, upset some people."

Even if Collins is correct in his statement, who can afford to ignore these findings?

➢ ***Kouzes, James M. and Posner, Barry Z: The Leadership Challenge***

This book presents a practical, evidence-based resource on how to mobilize people around a common goal and uses case studies to examine "The Five Fundamental Practices of Exemplary Leadership," as researched and developed by Kouzes and Posner.

These five practices are the foundation of leadership. They provide a road map that helps us understand what it takes to inspire those we are privileged to lead. The practices also teach us how to lead with empathy, conviction, and authenticity.

➢ **Lencioni, Patrick: *The Ideal Team Player***

Lencioni's latest page-turning fable is the story of a leader desperate to save his company by cracking the code on the virtues that define a true team player. Jeff Shanley takes over

See Contemplation on Page 4

Quote to Remember

"The best of all gifts around any Christmas tree: the presence of a happy family all wrapped up in each other." ~~ Burton Hills

Summit (Continued from Page 1)

District 33 State Representative Justin Holland will serve as the speaker for the opening session and according to Emily Lane, Chief Juvenile Probation Officer for Anderson County and NETJCA President, "Many different presenters are coming to add their expertise to inspire the leaders in the Juvenile Justice field. Topics will be covering hiring practices, human trafficking, monitoring updates, generational differences in the workforce and inspirational speakers to fire up the field. The speakers are varied from presenters with TJJD, counselors, authors, TAC specialists, and those with expertise in missing and exploited children."

"It looks like we can get 16.25 hours of credit for the conference with 9.5 being management hours. Management hours could go up based on what TJJD presents on Wednesday."

For additional information regarding the 2020 Texas Juvenile Chiefs Summit, contact Sherry Edwards, Chief Juvenile Probation Officer, Red River Co. Juvenile Probation Department at 903-427-5761 or sherry.edwards@co.red-river.tx.us.

Contemplation (Continued from Page 3)

his family's locally revered construction firm and realizes that the only way to deliver on the two biggest projects in the company's history is to rapidly build a culture of hiring and development around those virtues.

Beyond the fable, Lencioni presents a powerful framework and easy to use tools for identifying, hiring, and developing ideal team players in any kind of organization. Whether you are a leader striving to create a culture of teamwork, a human resources professional looking to hire real team players, or an employee wanting to make yourself an invaluable team member, The Ideal Team Player will prove to be as practical as it is compelling.

- **Lencioni, Patrick:** ***The Five Dysfunctions of a Team***

Lencioni blends a number of important leadership concepts into one readable business fable that is enthralling and instructive. The book distills the problems that keep even the most talented teams from realizing their full potential. Even more importantly, it outlines in prose that is crisp, clear, and fun to read, a powerful model and actionable steps that can be used to overcome common hurdles and build a cohesive, effective team.

- **Maxwell, John C:** ***The Five Levels of Leadership***

New York Times bestselling author John C. Maxwell explains how true leadership works and makes it accessible to everyone. Leadership does not come from your title. In fact, being named to a position is only the first and lowest of the five levels every effective leader achieves. To become more than a boss people are required to follow, you must master the ability to inspire and build a team that produces not only results, but also future leaders.

The 5 Levels of Leadership are:

- Position - People follow because they have to.
- Permission - People follow because they want to.
- Production - People follow because of what you have done for the organization.
- People Development - People follow because of what you have done for them personally.
- Pinnacle - People follow because of who you are and what you represent.

By combining the advice contained in these pages with work and a willingness to learn, anyone can rise to a higher and more effective level of leadership and thus make a greater impact.

- **Maxwell, John C:** ***The 21 Irrefutable Laws of Leadership: Follow Them and People Will Follow You***

This book gets down to the task straightaway and lays down specific principles one can apply diligently and consistently to

See Contemplation in Right Hand Column

Contemplation (Continued from Left Hand Column)

excel as a leader. Maxwell shares the accumulated wisdom of nearly decades of experience in the field and most of it is rather unconventional as compared with commonly held views on leadership.

Maxwell suggests that "leaders add value by serving others" as they acquire greater value from others by being of value to them. His Law of Process is based on the fundamental idea that "leadership develops daily, not in a day." The book lays out a complete philosophy of leadership which is simple yet highly effective, but rarely ever spelled out with such clarity. In short, a recommended read for leaders and managers who are faced with new challenges every day and are looking for a fresh perspective.

- **Sinek, Simon:** ***Leaders Eat Last: Why Some Teams Pull Together and Others Don't***

Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things.

In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why?

The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort - even their own survival - for the good of those in their care.

Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside.

Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking.

Merry Christmas and Happy Reading.

Quote to Remember

"He who has not Christmas in his heart will never find it under a tree." ~~ Roy L. Smith

Sentence (Continued from Page 1)

According to Schreiber's petition, when he lost consciousness a staff member called his brother, who told the hospital that although they could give Mr. Schreiber medicine to ease his pain, "otherwise you are to let him pass." Schreiber said he was resuscitated despite his brother's directions and his own do-not-resuscitate order on file with the Iowa Department of Corrections.

While recovering at the Iowa State Penitentiary, Schreiber filed a novel legal appeal claiming that because he died before he was resuscitated, he had technically fulfilled his life sentence.

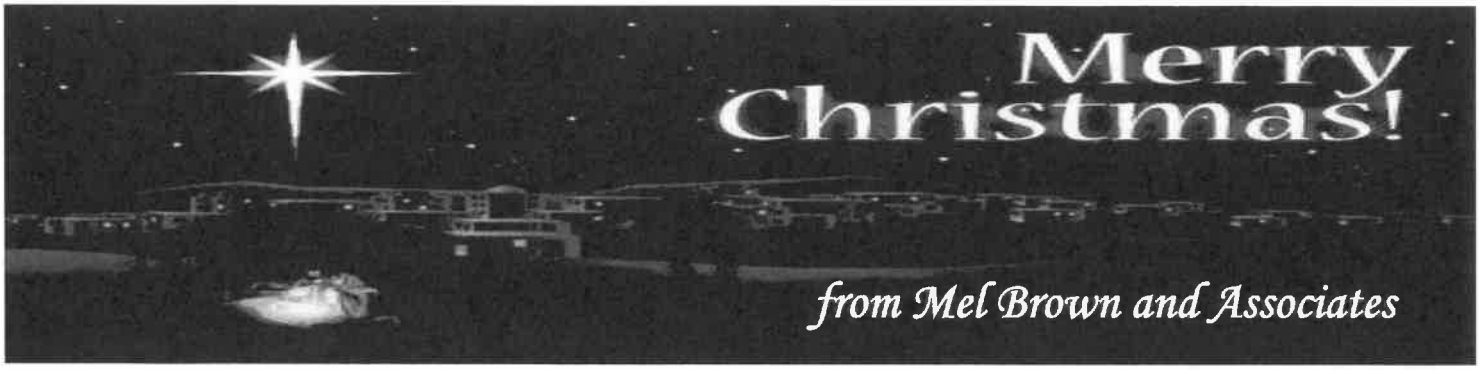
According to court records, Schreiber argued that he was sentenced to life without parole, "but not to life plus one day."

Judges, however, did not buy his argument. A district court previously denied Schreiber's motion and on Wednesday, November 6, 2019, the Iowa Court of Appeals upheld the lower court's decision, calling Schreiber's request "unpersuasive and without merit." The court ruled that dying for a brief amount of time does not amount to a get-out-of-jail-free card and said the 66-year-old will remain in prison until a medical examiner determines that he is dead for good. "Schreiber is either still alive, in which case he must remain in prison, or he is actually dead, in which case this appeal is moot," Judge Amanda Potterfield wrote in the court of appeals opinion. "Life" is not defined by the state's code, the judges had given the term "its plain meaning," which they took to prescribe that Mr. Schreiber must spend the rest of his natural life incarcerated, regardless of whether he had been revived.

"We do not find his argument persuasive," Judge Potterfield wrote, adding that the judges found it unlikely the Legislature would have wanted "to set criminal defendants free whenever medical procedures during their incarceration lead to their resuscitation by medical professionals."

Court records show the district court did not address Schreiber's additional claim that his due process rights were violated when the doctors failed to follow his "do not resuscitate" request. Because of this, the court of appeals in its ruling said it could not address it either, because the lower court had not made any judgment on it.

Assistance (Continued from Page 1)



(4) by allowing us to assist you with any organizational or leadership development activities you might be planning."

Brown pointed out, "There are a number of advantages of serving as a host of an MBA Regional Training Event. First of all, the host county determines what training will be offered at their site by selecting from workshops MBA already offers or by suggesting topics for MBA to develop for the training they are hosting. Secondly, it is definitely less expensive to do the training in-house than it is to send people across the state for training. Serving as the host for the training means there are no travel costs associated with the training -- no hotel cost, no meal cost, no mileage reimbursement, or any other cost associated with traveling. Tertiary, the host agency gets to register their people at the early registration fee rate regardless of when they register, and the host agency gets one free registration for each five paid registrations from their department. Serving as a host agency is especially helpful to departments who have to send people a long way to training."

"While we are interested in developing new workshops based upon the needs identified by local departments, we are also interested in finding hosts for the following workshops: a three-day workshop on 'The 21 Irrefutable Laws of Leadership' which we began offering in 2018, a two-day workshop entitled, 'Conquering the Leadership Challenge,' which is currently scheduled to be offered for the first time in March, 2020, and a variety of workshops we will be offering which focus on mental health and/or behavioral health, therapeutic interventions with offenders and human growth and development."

Brown is encouraging those who have topics they would like to see MBA develop and those interested in serving as a host for an MBA Regional Training Event to email him at ceo@melbrown.org.

In addition to contacting MBA regarding training issues, Brown said, "we would also love to hear from people who have technical assistance needs, such as program evaluations, organizational needs assessments, management studies, strategic planning, analysis of staffing needs, or facilitation of processes, such as vision and mission development or policy and procedure development."

Mel Brown and Associates: Equipping Individuals and Organizations to Accomplish Their Visions, Missions and Goals

Steward (Continued from Page 1)

In the letter to Steward thanking him for agreeing to serve as co-chair, Illinois Justice Project Program Director Garien Gatewood wrote, "your guidance and experience will be invaluable" and informed him that the initial meetings of the group will be designed to have members do three things: "first, discuss the goals of the workgroup; second, decide what additional people we should have join the group; and third, suggest to staff what data and research should be prepared for the group to make it successful."

Gatewood also stated, "The Administrative Office of Illinois Courts (AOIC) and the Illinois Department of Juvenile Justice (IDJJ) are in the process of updating detention standards. The standards will include housing, medical and health care, security, safety, and several other areas. Our workgroup can work in partnership with both the AOIC and IDJJ to help review some of the standards, definitions, collect data and offer the opportunity to collaborate on potential policy solutions."

"Like the workgroups in the past, we want to make the best use of the time we spend together, benefit from the expertise at each table and accomplish the tasks we set as a group. In preliminary discussions, Council and Workgroup members have expressed interest in understanding what is happening in Illinois, and nationally, concerning oversight. Specifically, questions have been raised about education, solitary confinement, treatment, and programs among other topics. We want to bring members to the table to share their knowledge and thoughts to set goals, outcomes and action steps for the group in order to get the best outcomes for youth."

"Christmas is not as much about opening our presents as opening our hearts."
~~ Janice Maeditere

Quote to Remember

"Christmas is not about the presents, but about His presence." ~~ Anonymous

NCCHC (Continued from Page 1)

"She is also a former director of program development and support services for the State of Michigan's Department of Human Services, Bureau of Juvenile Justice. Ms. Cramer Brooks co-authored the National Training Curriculum for Educators of Youth in Confinement and the Detention Careworker Training Curriculum, 3rd Edition."

Brooks' academic credentials include Master of Public Administration and Bachelor of Science in Special Education degrees from Western Michigan University.

Brooks, who as a juvenile justice expert, has a special appreciation for NCCHC's mission, stated, "Youth in the juvenile justice system present issues with complex medical and behavioral health care needs, and NCCHC has historically been a leader in addressing those needs. I look forward to the opportunity to learn, inform, exchange information and make connections."

TPPA (Continued from Page 1)

Attendees at TPPA conferences include individuals from 1. Agribusiness [dealers, distributors, manufacturers, applicators, consultants, ag lenders, farmers and ranchers], 2. researchers in the field of agriculture [Texas A&M AgriLife Research, graduate students, United States Department of Agriculture (USDA) crop protection and seed company researchers and contract researchers], 3. Extension and Education [Texas A & M AgriLife Extension Service, university faculty, USDA, graduate students], 4. the press [both agricultural related and local newspapers], and 5. regulatory agencies [Texas Commission on Environmental Quality (TCEQ), Texas Department of Agriculture (TDA), USDA, United States Environmental Protection Agency (EPA) and Texas Commission on Environmental Quality (TDEQ)].

The topic for Brown's presentation is "Wrapping it Up and Putting it All Together."

Quote to Remember

"Peace on earth will come to stay, When we live Christmas every day."

Form **W-9**
(Rev. October 2018)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

▶ **Go to *www.irs.gov/FormW9* for instructions and the latest information.**

Give Form to the requester. Do not send to the IRS.

Print or type. See Specific Instructions on page 3.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.
Northeast Texas Juvenile Chiefs Association

2 Business name/disregarded entity name, if different from above

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only one of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☐ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ▶ _____

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is **not** disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☑ Other (see instructions) ▶ **Exempt Organization 509(a)(2)**

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) **N/A**

Exemption from FATCA reporting code (if any) **N/A**

(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.
301 West Madison Street

6 City, state, and ZIP code
Clarksville, Texas 75426

7 List account number(s) here (optional)

Requester's name and address (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number
☐☐☐ - ☐☐ - ☐☐☐☐

or

Employer identification number
8 0 - 0 4 6 2 0 0 3

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here **Signature of U.S. person ▶** Sherry Edwards **Date ▶** 8/19/2019

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

Hilton Contract

PARKING SPECIAL SERVICES

Valet parking is available for $15.00+ per car overnight or $7.00+ per day for day meeting attendees.

HILTON HONORS POINTS

Hilton Honors Meeting Planner Event Points can be awarded to any designated Hilton Honors Member. The program awards one point per dollar spent, before tax and service charge, for contracted food and beverage and guest rooms that are billed to the master account. Please fill in the information below appointing the member that will be receiving the points for this contracted program.

The hotel will provide HHonors® Meeting Planner points to:

Name of Hilton Honors Member	[redacted]
Hilton Honors Number	[redacted]

Hilton Honors Meeting Planner Event Points are posted once the program is complete and the programs final balance had been paid. Please allow up to 8 weeks from the date of submission for the points to reflect on the Hilton Honors account. Hilton Honors Meeting Planner Event Points do not apply guest rooms that are billed individually. They also are not awarded for AV charges, meeting room rental or to any food or beverage that is purchased from the hotel outlets.

Initial

METHOD OF RESERVATIONS & PAYMENT

Reservations for the Event will be made by individual call in.

- Individuals are responsible for their own room, tax and incidental charges*.

Our check-in time is **3:00 PM**; check-out time is **12:00 PM**. All guests arriving before **3:00 PM** will be accommodated as rooms become available. We can arrange to check baggage for those arriving early when rooms are unavailable and for guests attending functions on departure day.

*Please note that individuals who are responsible for their own incidental charges will be required to provide a credit card at check in which will be authorized for up to $50.00 per night. Individuals who use a Debit Card should ensure they have sufficient funds in their account to cover the $50.00 per night hold.

GUARANTEED RESERVATIONS

For groups that are Individual Call In, reservations must be accompanied by a first room night deposit or guaranteed with a major credit card. For groups that provide a rooming list, reservations will be guaranteed to the master account. Cancellations will be accepted up to 24 hours prior to arrival. If the reservation is no longer required and is not cancelled prior to this time, the reservation will be released and subsequent room and tax charges will be billed to the form of payment on file.

CUT OFF DATE

Reservations by attendees must be received on or before **Friday, January 31, 2020** (the "Cut-Off date").
At the Cut-off date, Hotel will review the reservation pick up for the Event, release the unreserved rooms for general sale, and determine whether or not it can accept reservations based on a space-and-rate available basis at the group rate after this date.

Release of rooms for general sale following the Cut-off date does not affect the Group obligation, as discussed elsewhere in this Agreement, to utilize guest rooms.

GUEST ROOM ATTRITION

The Total Sleeping Room Nights Reserved under this Agreement will generate **$46,800.00** in revenue for Hotel (**"Anticipated Sleeping Room Revenue"**). If you do not use all of the sleeping rooms in your Room Block, you agree that the Hotel will suffer damages. Such damages will occur because Hotel will have lost the opportunity to offer your unused rooms to others either individually or as part of another block and will incur additional costs in attempting to resell inventory that was already sold. The parties agree that the exact amount of such damages will be difficult to determine.

The parties agree that the liquidated damages clauses provided for in this Agreement are a reasonable effort by the parties to agree in advance on the damages that the Hotel will suffer due to your lack of performance. Therefore, the parties agree that if the contracted Event is held

AK Initial

as scheduled, Hotel will not seek damages for Group's failure to use and pay for the Total Sleeping Room Nights Reserved if Group achieves a minimum of **80%** of the Anticipated Sleeping Room Revenue. Should Group achieve less than this amount, Group agrees to pay to Hotel, as reasonable liquidated damages and not a penalty, the difference between **80%** of the Anticipated Sleeping Room Revenue and the actualized guest room revenue received by Hotel for rooms used and paid for as part of the official Room Block, plus any applicable state and local taxes as required by law, as a reasonable estimate of the Hotel's losses on sleeping rooms, ancillary revenue, costs of sale and other losses.

CREDIT CARD PAYMENT

All master account charges are to be paid by credit card. Hotel accepts American Express, Master Card, Visa, Diners Club or Discover Card, for master account payments. Upon Contract signature, Group will provide Hotel with a credit card to which all master account charges will be charged. **Full pre-payment of all estimated charges will be posted to the credit card 72 hours prior to the first day of the function. Any remaining balance or overpayment will be charged or refunded within 3 business days after receipt of the final bill.** In the event any charges are disputed, you agree that Hotel may charge the undisputed charges to the account immediately and the remainder will be charged upon resolution.

DIRECT BILLING

Direct Billing may be established with us for this event. Please complete the enclosed Direct Billing application and return it along with the signed contract. Processing of Direct Bill applications takes 30 days. If your event takes place within 30 days of contract signature, Direct Billing privileges will not be available. If the application is not approved, you agree that the bill is to be paid by company check, certified check or wire transfer for the entire estimated charges 5 days in advance of arrival. The **Hotel** reserves the right to require advance payments or deposits of all or part of your estimated charges if your credit status changes after initial credit approval.

On receipt and approval of the Direct Billing application, a master account will be set up for this event. All charges posted to your master account should be approved in writing by you or your authorized designee. 25% of the master account will be due as a deposit with the signed contract. We accept all major credit cards and company checks as payment for advanced deposits.

With Direct Billing approval, you agree that the master account will be fully paid within 30 days after receipt of the bill. In the event any charges are disputed, all undisputed amounts will be paid within 30 days. All undisputed charges not paid within 30 days will be subject to interest accruing at the rate of 1 ½ % per month, or the highest rate permitted by law, until paid.

ADVANCED PAYMENT/DEPOSIT POLICY

Whether Group elects to pay by Direct Bill or Credit Card, a non-refundable advance deposit of **$3,000.00** will be required at the time of a signed contract. Deposit is payable via company check, credit card or certified funds.

Initial

A valid credit card is required with the signed contract, please fill out the authorization form on the last page of this document.

TAX EXEMPTION

Hotel will honor any available tax exemptions for which Group qualifies, provided that Group properly completes and provides all documentation required by the applicable jurisdiction to substantiate said exemption, group to provide these documents a week before the first day of the conference . Indicate Group's tax exemption status below by checking the appropriate box:

☐ Group is not exempt from taxes

☒ Group is exempt from taxes. Please indicate which tax or taxes Group is exempt from:

It is the Group's sole responsibility to provide tax exemption documentation at the time of contract signature. Failure to do so will result in all applicable taxes being charged to Group. Hotel cannot make any adjustments to taxes once they have been posted.

Initial

Function rooms are assigned according to the estimated attendance. Times, setup, and attendance are estimates. Final details will be determined while coordinating the event closer to the event date and confirmed within the Banquet Event Orders.

Room rental is subject to 6.00 % tax and 24.00% taxable service charge.
Audio Visual prices are subject to 8.25% sales tax and 24.00% taxable service charge.
Food and Beverage and all miscellaneous fees are subject to 8.25% tax and 24.00 % taxable service charge.

FOOD AND BEVERAGE MINIMUM

The guestroom rates and concessions outlined are based on Company's guaranteed expenditure of a minimum of **$12,000.00** in organized food and beverage, excluding taxes, gratuities and service charges (Minimum Food and Beverage Revenue).

Should you fall short of this Minimum Food and Beverage Revenue whether due to reduction in size of your meeting, drop in attendance, change in food and beverage events or otherwise, you agree that the Hotel will suffer damages that will be difficult to determine. Therefore, you agree that you will pay the Hotel the amount equal to the difference between the guaranteed Minimum Food and Beverage Revenue and the actual amount achieved as liquidated damages, plus applicable taxes. You agree that this charge is a reasonable estimate of the Hotel's losses on food and beverage.

FOOD & BEVERAGE DATES TO REMEMBER

- Final Menu Due Date **Saturday, February, 1, 2020**
- Signed Banquet Event Orders due **Saturday, February, 8, 2020**
- Final Count Due Date **Monday, February, 17, 2020 (5 business** days prior to event)

BANQUET EVENT ORDER/GUARANTEE

A final Banquet Event Order outlining all details of your event will be finalized no later than **Saturday, February, 8, 2020**. A guarantee with final guest count is due (5) **five business** days prior to your scheduled event. If no guarantee is received, your expected number will become your guarantee. **Once the guarantee is given, the number is no longer subject to reduction.**

ALCOHOLIC BEVERAGES

When special requests are honored for liquor, beer or wine items not carried as regular stock at the Hilton, the guest is then responsible for the total purchased amount of all items not consumed at the function.

The Hotel will require that beverages be dispensed only by the Hotel servers and bartenders. The Hotel's alcoholic beverage license requires the Hotel to (1) request proper identification (photo ID) of any person of questionable age. Hotel reserves the right to refuse alcoholic beverage service if the person is 1) underage 2) proper identification cannot be produced 3) appears intoxicated. The Hilton strictly adheres to the above polices without exception.

Initial

BANQUET ROOM LIABILITY

The Hotel reserves the right to inspect and control all private functions. Liability for damages to the premises will be charged accordingly. Please adhere to the following: No posters or signs can be located in the Hotel Lobby. No Silly String or Confetti may be used. Hotel reserves the right to inspect and control all private functions. Liability for damages to the premises will be charged accordingly to the client. All signs located outside the meeting space must be professionally printed. No handwritten signs will be allowed. Scotch tape, nails, pushpins or potentially damaging fasteners may not be used to hang signs.

THE HOTEL WILL NOT ASSUME ANY RESPONSIBILITY FOR THE DAMAGE OR LOSS OF ANY MERCHANDISE OR ARTICLES LEFT IN THE HOTEL PRIOR TO, DURING AND FOLLOWING YOUR FUNCTION. Guest agrees to be responsible for any damages done to the premises during the period of time the premises are under guest's control or for any independent contractor hired by the guest.

NOISE MITIGATION

Outdoor areas and open spaces where excessive noise may affect other guests have limits regarding the type of entertainment or hours of entertainment allowed. The Pre-function space, Patios and The Pergola are subject to these limitations. Your Conference Services Manager will approve the vendors for these areas and discuss the policy in place.

FOOD AND BEVERAGE

No food or beverage of any kind will be permitted to be brought into the Hotel by the guest, or any other guests or invitees from the outside without prior consent of the Convention Services Department. Food and beverage provided by the Hotel may not leave the premises. All prices are subject to a 24.00% service charge, which is not included in any of the banquet menu pricing unless otherwise stated. A fee of $125.00++ per chef will apply to any food station in which the Group has requested the services of a chef. A fee of $125.00++ per bartender (minimum of two required) will be applied for cash bars. A labor charge will be added to all food functions when less required guests (outlined in our menus) is guaranteed.

All banquet checks must be signed by the person in charge or a designated representative at the completion of each function. Any discrepancies in counts or charges should be identified and resolved at that time. In the event the Group vacates premises prior to signing the banquet check, all charges will be charged to the credit card on file or will be billed to guest. Food and beverage provided by the Hotel may not leave the premises.

It is necessary that your menu selection and all detailed arrangements be confirmed no later than three weeks prior to the function. The food and beverage menu items suggested are only a guide to assist us in planning your function, our culinary team will be happy to customize a menu to fit the needs of your guests.

Initial

ASSIGNMENT/CONFIRMATION OF SPACE

The Client agrees to confirm with us the assigned function space prior to printing any materials listing specific event locations. The schedule of events listed indicates space that is held upon signing of this contract by both parties. If for any reason the reserved is not available for your event, you agree to the substitution of space based on comparable, appropriate available space.

Please contact the Hotel at least three weeks prior to the scheduled event to confirm menus, space and details including but not limited to: decorations, entertainment, audio visual needs, beverage service, possible security needs, shipping/mailing and valet requirements. Upon review and approval of your event requirements the Banquet Event Orders (BEO's) will be sent to you to confirm all final arrangements and pricing. These BEO'S must be signed and returned prior to the event and will serve as a part of this agreement.

AUDIO VISUAL NEEDS

All audio visual services will be provided by Presentation Services Audio Visual (PSAV) The Hotel's onsite audio visual provider. Any outside equipment or vendor brought into the Hotel will be subject to fees based on the event space and scope of equipment and labor.

PRICE INCREASES

Menu price increases fees and service fees are subject to industry price increases annually. Unforeseen changes in market conditions may also affect menu price increases.

SHIPPING AND RECEIVING

If it is necessary for you to ship materials to the Hotel, please observe the following instructions to ensure proper handling of your event meeting materials. Each item should be clearly marked with the following:

- **Organization name and name of event planner**
- **Date of event and the name of your Hotel catering contact**

Boxed packages and display materials will be accepted no earlier than one day prior to your scheduled event. Please advise your Hotel contact of any special arrangements or requirements concerning your materials. The following shipping and receiving fees will apply:

- $10.00++ handling fee per box, 0-49lbs (incoming and outgoing)
- $50.00++ handling fee per box, 50+lbs (incoming and outgoing)
- $125.00++ handling fee per pallet (incoming and outgoing)
- $5.00++ storage fee, per box or pallet, per day
- $3.00+ guestroom delivery fee per item for generic amenity room drops
- $5.00+ guestroom delivery fee per item for personalized amenity room drops
- $25.00++ per hour labor charge will be assessed if the Hotel's assistance is required in unloading vehicles and/or moving items to storage areas.

Initial

The Hotel should be advised of any items over 100 pounds that will be displayed in any function room. All fees will be charged to the Master Account to be paid upon departure. All shipping/postage materials and account information will be the responsibility of the Client and must be arranged prior to the Clients arrival.

Arrangements must be made for prompt return or shipping of material upon conclusion of Event. A $50.00+ per day storage fee will be assessed for any items remaining in the Hotel's possession 48 hours after the conclusion of event

CANCELLATION

Hotel has offered the favorable sleeping room rates and other concessions in this Agreement based upon the total anticipated revenues for your Event. If this Agreement is cancelled by Group, the parties agree that the Hotel will have lost the opportunity to offer your unused facilities to others either individually or as part of another block and will incur additional costs in attempting to resell inventory that was already sold. The parties agree that the exact amount of such damages will be difficult to determine. The parties agree that the liquidated damage clauses provided for in this Agreement are a reasonable effort by the parties to agree in advance on the damages that the Hotel will suffer due to a cancellation. Therefore, Group agrees that should it cancel its Event for any reason, including changing its meeting site to another hotel, that Group will pay as liquidated damages to the Hotel immediately upon notice of cancellation a percentage of the total minimum revenues anticipated by the Hotel for your Event plus any applicable state and local taxes as required by law, as follows:

Date of Hotel's Receipt of Cancellation Notice	Amount of Cancellation Damages
Cancellation between: **date of signing** and **date of arrival**	(100% of rooms revenue + 100% of F&B revenue) **$ $58,800.00**

Total Minimum Anticipated Revenue for this Event is **$58,800.00**
Room Revenue: **$46,800.00**
Banquet Food and Beverage Revenue: **$12,000.00**

IMPOSSIBILITY

Neither party shall be responsible for failure to perform this Agreement if circumstances beyond their control, including, but not limited to: acts of God; governmental authority; or declared war in the United States; make it illegal or impossible for Hotel to hold the Event. The affected party may terminate this Agreement without liability upon providing written notice to the other party within ten (10) days of the occurrence.

Initial

DISPUTE RESOLUTION

The parties agree that, subject to the exclusion of intellectual property matters as set forth below, any dispute in any way arising out of or relating to this Agreement will be resolved by arbitration using one arbitrator before JAMS or American Arbitration Association in the state and city in which Hotel is located, or the closest available location; provided, however, a dispute relating to patents, trademarks, trade dress, copyrights, trade secrets, and/or infringement of intellectual property rights shall not be subject to this provision.

The parties further agree that in any arbitration proceeding, they may conduct reasonable discovery pursuant to the arbitration rules, that the law of the state in which Hotel is located will be the governing law, and any arbitration award will be enforceable in State or Federal court.

ATTORNEY'S FEES/ COSTS

The parties agree that the prevailing party in any arbitration or court proceeding arising out of or related to this Agreement will be entitled to recover an award of its attorney's fees and expert witness fees, costs and pre and post judgment interest at the highest available legal rate.

The parties further agree that if Hotel must retain counsel or initiate arbitration or legal action to collect of any monies owed to Hotel by Group under this Agreement, whether or not an arbitration or court action is filed, Hotel will be entitled to recover its attorney's fees incurred in such efforts to collect.

COMPLIANCE WITH LAW

This Agreement is subject to all applicable federal, state, and local laws, including health and safety codes, alcoholic beverage control laws, disability laws and the like. Hotel and Group agree to cooperate with each other to ensure compliance with such laws.

INDEMNIFICATION

To the fullest extent permitted by law, you agree to protect, indemnify, defend and hold harmless the Hotel, Hilton Worldwide, Inc. and the Hotel's Owner, and their respective owners, managers, partners, subsidiaries, affiliates, officers, directors, employees and agents (collectively, the "Hotel Indemnified Parties"), from and against any and all claims, losses or damages to persons or property, governmental charges or fines, penalties, and costs (including reasonable attorney's fees) (collectively, "Claim(s)"), in any way arising out of or relating to the Event that is the subject of this Agreement, and regardless of negligence, including, but not limited to, Claims arising out of the negligence, gross negligence or intentional misconduct of Group's employees, agents, contractors, and attendees; provided, however, that nothing in this indemnification shall require you to indemnify the Hotel Indemnified Parties for that portion of any Claim arising out of the sole negligence, gross negligence or intentional misconduct of the Hotel Indemnified Parties.

Initial

PROMOTIONAL CONSIDERATIONS

Hotel has the right to review and approve any advertisements or promotional materials in connection with Group's Event that specifically reference the name of the Hotel or a name or logo owned by a subsidiary of Hilton Worldwide, Inc., including, but not limited to: Hilton, Hilton Hotels & Resorts, Home2 Suites by Hilton, Hilton Grand Vacations, Hampton Inn, Hampton Inn & Suites, Doubletree, Conrad, Homewood Suites by Hilton, Embassy Suites Hotels and the Waldorf Astoria Collection. You agree that we may share your meeting and meeting planner information with our third party providers who offer support services to groups holding events at our Hotel, including audio/visual services, decorators, florists, and others.

ACCEPTANCE

Please sign and return a copy of this Agreement by July 19, 2019. This Agreement will constitute a binding contract between the parties. The individuals signing below represent that each is authorized to bind his or her party to this agreement.

If this agreement is not received by the date above, all rooms and space referred to herein will be released, and neither party will have any further obligations under this Agreement. The Hotel and **Northeast Texas Juvenile Chiefs Association** have agreed to and have executed this agreement by their authorized representatives as of the dates indicated below.

TAX EXEMPT STATUS

In order to qualify for tax exemption you must provide the HOTEL with a "Texas Hotel Occupancy Tax Exemption Certificate". This exemption applies only to guest room taxes, not taxes on food and beverage, audiovisual or meeting room rental. A "Texas Sales and Use Tax Exemption Certification" is required for exemption to taxes on food and beverage, audiovisual or meeting room rental. Also note that when paying the charges, tax exemption only applies when the charges are paid for with a check or credit card issued to the tax exempt organization. All other transactions not meeting this payment requirement are taxable.

Reservation Method: Individual Call In. To make reservations, your guests must phone in their reservation requests, to the following number: 888-287-9400. A reservation link will be provided by the hotel. Hotel reserves right to change email address and method of reservation.

PG 65

FORCE MAJEURE: No damages shall be due for a failure of performance occurring due to Acts of God, war, terrorist act, government regulation, riots, disaster, or strikes, any one of which make performance impossible. The Hotel shall have no liability for power disruptions of any kind.

INSURANCE AND INDEMNIFICATION:
Hotel and Rockwall County Juvenile Services each agree to carry and maintain and provide evidence upon request of liability and other insurance in amounts sufficient to provide coverage against any claims arising from any activities arising out of or resulting from the respective obligations pursuant to this contract. Group's insurance policy shall name the Hotel as an additional insured. Damage to the Hotel premises by the Group or appointed contractors will be the Group's responsibility. Group will accept full responsibility for any damages resulting from any action or omission of their individual attendees in conjunction with organized group activities.

The Hotel must pre-approve all outside contractors and vendors hired for use by the Group in the Hotel, and may have a list of approved contractors and vendors. The Hotel reserves the right to advance approval of all specifications, including electrical requirements, from all outside contractors, and to charge a fee for outside services brought into the Hotel. The Group and/or outside contractors must provide proof of worker's compensation insurance for employees who will work on Hotel premises and proof of adequate general liability coverage for the Group and/or outside contractors' activities while on Hotel's premises, and must comply with all other requirements the Hotel deems appropriate, in its sole discretion. Group's contracts with its contractors will all specify that contractor and the group will indemnify and hold the Hotel harmless from any and all damages or liabilities which may arise by such Contractors or through their use. Group agrees to conduct the Event in an orderly manner in full compliance with applicable laws, regulations, and Hotel rules, copies of which are available from the Catering Department. Group assumes full responsibility for the conduct of all persons in attendance at the Event and for any damage done to any part of Hotel's premises during any time the premises are under control of Group.

The Group shall indemnify, defend and hold harmless the Hotel and its officers, directors, partners, agents, members and employees from and against any and all demands, claims, damages to persons or property, losses and liabilities, including reasonable attorney's fees (collectively "Claims") arising out of or caused by the Group's negligence and/or its members', agents', employees', independent contractors' or Exhibitors' negligence in connection with the use of the Hotel facilities. The Group shall not have waived or be deemed to have waived, by reason of this paragraph, any defense which it may have with respect to such claims.

MISCELLANEOUS PROVISIONS: In the event of litigation, Texas law will apply; prevailing party shall recover attorneys' fees and all litigation costs and expenses, charges and costs incurred, including pre- and post-litigation fees related to collection and judgment enforcement efforts; parties consent to exercise of personal jurisdiction of Texas courts, which will have exclusive jurisdiction. This contract is the entire agreement between the parties, superseding all prior proposals, negotiations, representations, and other communications, whether oral and written. This agreement may be amended ONLY in writing, signed by representative of Group and Hotel's General Manager. Group may not assign any benefits associated in any way with this contract without consent of Hotel. No food and beverage of any kind may be brought into Hotel or any hospitality suite by group or its guests.

HOTEL POLICIES: (1) Group agrees that Hotel's Destination Management Department will be permitted to bid on any destination management services which may be part of your program (2) Hotel recommends its in-house A/V department (3) Hotel cannot store materials for group (4) Signs and banners are not allowed in public areas; signs in meeting space must be professionally printed and placement and posting approved by Hotel; nothing may be posted, attached or stuck to walls without permission. Gummed stickers or labels are strictly prohibited.

GENERAL TERMS AND CONDITIONS

1.**ACCEPTANCE.** This Event Quote will be valid for a period of thirty (30) days from the Quote Date, or until December 31 of the calendar year in which the Event Quote was issued, whichever is earlier ("Acceptance Period").These terms and conditions ("Terms") govern the provision of equipment, labor, and services to be provided by Audio Visual Services Group, LLC ("PSAV") to the undersigned customer ("Customer") for the event ("Event") at the venue ("Venue") each as specified in the Event Quote (or similar ordering document) to which these Terms are attached. In the event this Event Quote is not accepted, signed and returned to PSAV within the Acceptance Period, it will be void. All prices are subject to change without notice following the Acceptance Period. PSAV agrees to provide and Customer agrees to pay for, the charges for equipment, labor, and services specified in the Event Quote.

2. **ESTIMATE.** PSAV developed this Event Quote based upon information provided by the Customer. This Event Quote is only an estimate of equipment and services PSAV will provide in connection with the Event. In the case where Customer requests and PSAV provides, equipment, services, or labor in connection with the Event that is in excess of what is specified in the Event Quote, the parties will execute updated/amended forms or change orders as needed to indicate approval of these additional terms. Customer will be charged and pay for all such additional equipment, services, or labor (including rental fees and freight) at PSAV's prevailing standard rates, whether or not any additional forms are executed. Unless otherwise itemized on the Event Quote, all pricing excludes sales tax, freight, shipping/handling, and electrical charges (if applicable to the Event), which will be charged to, and payable by, Customer upon final invoice. Sales tax-exempt entities must submit sales tax exemption certificates prior to the commencement of the Event. If Customer does not send tax exemption certificates to PSAV prior to billing the Event, sales tax will be charged to, and payable by, the Customer, and will be included in the final invoice.

3. **LABOR RATES.** Hourly labor rates, minimum calls, overtime labor rates, daily labor rates, and per diems apply, and PSAV bases them upon prevailing rates and practices at the Venue and of the PSAV business division providing the equipment and services. PSAV developed labor estimates based on information provided by the Customer. All labor calls are subject to a minimum charge period based on the Venue rules, PSAV servicing division policies, and union rules, as they may apply. In the event that a labor resource works more hours than priced in the Event Quote, PSAV will bill the Customer and will pay for the appropriate prevailing or premium rate for the additional hours worked.

4. **SERVICE CHARGES.** Service Charges are billed in association with an Event. Service Charges are NOT gratuities that are paid in whole or in part to PSAV (or other) employees in connection with the event and amounts comprising Service Charges are NOT otherwise shared with PSAV employees.

5. **EQUIPMENT RATES.** Unless otherwise noted, PSAV bases all rates upon per-room, per-day calculations with the minimum rental period being one calendar day. A day rental period consists of all or any portion of each 24-hour period starting at 12:00 AM to 11:59 PM. Customer agrees to pay the rental fees described in the Event Quote for the stipulated period. Any equipment that is used or retained by Customer for a longer period will be subject to PSAV's prevailing rates until Customer returns the equipment.

6. **EQUIPMENT HANDLING.** PSAV personnel must handle all equipment. Customer may not move, store, or service the equipment or any other party. Customer may not operate the equipment unless authorized in writing by PSAV. Customer will incur additional charges if Customer violates this requirement. Customer permits PSAV free access to the equipment at any time before, during, or after the Event for purposes of set/strike, maintenance, and routine checks. PSAV retains all title and rights in and to the equipment and all related accessories.

7. **DAMAGE & SECURITY.** Customer will be responsible for all equipment that is damaged, lost, or stolen (whether by use, misuse, accident, or neglect), unless caused by PSAV's negligence. In addition to amounts due to PSAV in connection with the Event Quote, Customer agrees to pay PSAV, upon demand, all amounts incurred by PSAV on account of lost, damaged and stolen equipment, based upon repair costs for reparable equipment or full replacement cost for lost or irreparable equipment. In addition, Customer will be responsible for rental fees while a PSAV-authorized company repairs or replaces equipment as required. If Customer requires security or PSAV deems security necessary during an event, Customer will be responsible for all costs in connection with the provision of security.

8. **EQUIPMENT FAILURE.** PSAV maintains and services its equipment in accordance with the manufacturer's specifications and standard industry practice. However, PSAV does not warrant or guarantee that the equipment or services PSAV provides will be free of defect, malfunction, or operator error. If the equipment malfunctions or does not operate properly during the Event for any reason, Customer agrees to immediately notify a PSAV representative. PSAV will attempt to remedy the problem as soon as possible so that no problems interrupt the Event. Customer agrees and acknowledges that PSAV assumes no responsibility or liability for any loss, cost, damage, or injury to persons or property in connection with the Event because of inoperable equipment or other service issues.

9. **PAYMENT.** (a) **Master Account** Following the Event, PSAV may issue Customer an "Event Order" which summarizes all actual charges. If the Venue requires Customer to establish a "Master Account" with the Venue, the Venue will be PSAV's agent for payment. PSAV will invoice the Venue, and the Venue will invoice Customer. Customer will pay the Venue. Customer must notify PSAV prior to the Event if Customer did not secure a Master Account with the Venue in order to confirm direct billing arrangements. If Customer has established a Master Account, then Customer will make full and final payment to PSAV through such Master Account with the Venue in accordance with the Venue's payment terms; (b) **Direct Bill** – If the Venue is not invoicing Customer through a Master Account with the Venue, Customer will be direct billed for all equipment rental, labor, or services provided by PSAV, and must establish credit with PSAV by completing a credit application based on PSAV Credit Terms Approval SOP at least 30 days prior to the first day of the Event or at signing of the Event Quote if that date is within 30 days of the Event start date. Based on the results of the credit application, PSAV may require Customer to make a deposit payment of up to the full amount at least 30 days prior to the first day of the Event, or at signing of the Event Quote if such date is within 30 days of the first day of the Event. PSAV will credit the deposit received to the final invoice for the Event. PSAV requires Customer to make full and final payment to PSAV within the terms determined by PSAV from Customer's credit application; and (c) **Late Payment** – If Customer fails to make payment by the specified payment date outstanding balances will be subject to late payment charges in an amount equal to one and a half percent (1.5%) per month or a lesser amount as required by law.

10. **CREDIT CARDS.** PSAV accepts credit cards (Visa, Master Card, American Express, or Discover) as payment for invoices in certain situations, such as COD orders and orders under $50,000. For non-COD orders and orders over $50,000, Customer will pay by ACH or by check as directed by PSAV. There may be circumstances in which Customer may pay orders over $50,000 by credit card, but PSAV must approve such payment arrangements in writing in advance.

11. **CREDIT CHECK.** PSAV reserves the right to run a credit check on Customer before this Agreement is signed and at any time after the Agreement is signed, so long as this Agreement is in effect or Customer has outstanding funds due to PSAV. Should PSAV determine that Customer's credit history is such that PSAV must modify the payment terms included above, Customer agrees to work with PSAV reasonably and in good faith to update the payment terms. Customer specifically authorizes PSAV to prepare and file without Customer's signature any Uniform Commercial Code ("UCC") financing statement amendments to Customer's existing UCC financing statements and any other filings or recordings in all jurisdictions where PSAV determines necessary or desirable, and authorizes PSAV to describe the collateral in such filings in any manner as PSAV determines appropriate. If Customer fails to make payment by the specified payment date, outstanding balances will be subject to late payment charges in an amount equal to one and a half percent (1.5%) per month or a lesser amount as required by law.

12. **EVENT CANCELLATION.** If Customer cancels the Event or the provision of audiovisual equipment, labor, or services by PSAV **30 days or more** before the first day of the

Event, no cancellation charges will apply, except for any expenses actually incurred by PSAV, which will be payable by Customer. Cancellations received **29 to 15 days before** the first day of the Event will be subject to a cancellation charge equal to **50%** of the charges contained in the Event Quote. Cancellations received **14 to 3 days before** the first day of the Event will be subject to a cancellation charge of **75%** of the charges contained in the Event Quote. Cancellations received **less than 3 days (72 hours) before** the first day of the Event or after equipment has departed from its storage facility, will be subject to a cancellation charge equal to **100%** of the total charges set out in the Event Quote. Customer agrees and acknowledges that the cancellation charges described in this paragraph are reasonable and appropriate under the circumstances if Customer cancels the Event or cancels the provision of audiovisual equipment, labor, or services by PSAV, and that such charges are not a penalty. Cancellation fees, including fees to cover any incurred PSAV costs, will be due immediately upon any such cancellation by Customer. ALL CANCELLATION NOTICES MUST BE IN WRITING AND RECEIVED BY PSAV'S ONSITE REPRESENTATIVES BEFORE BECOMING EFFECTIVE. IF ANY CUSTOM SETS, GOBOS, OR OTHER CUSTOM MATERIALS HAVE BEEN ORDERED FOR AN EVENT, AN ADDITIONAL CANCELLATION FEE WILL BE APPLICABLE AND DUE TO PSAV REGARDLESS OF THE DATE OF CANCELLATION IN AN AMOUNT EQUAL TO THE DIRECT AND INDIRECT COSTS INCURRED BY PSAV OR ITS AFFILIATES IN SECURING OR CONSTRUCTING SUCH CUSTOM MATERIALS PLUS A 15% RESTOCKING FEE.

13. **CHANGES TO EVENT QUOTE.** Customer may request changes to equipment, labor, or services specified in the Event Quote, and the cancellation charges in Section 12 will not apply if Customer signs a revised Event Quote within 24 hours of the first day of the Event and provided that the total charges in the revised Event Quote are not less than ninety percent (90%) of the charges in the original Event Quote. PSAV will use commercially reasonable efforts to accommodate all such Customer requests but will not be liable to Customer for any failure to do so.

14. **INDEMNIFICATION.** Customer and PSAV each hereby forever agree to indemnify, defend, and hold harmless the other for any and all claims, losses, costs (including reasonable attorneys' fees and costs), damages, or injury to property and persons (including death) as a result of the negligent acts, errors, or omissions of the indemnifying party and its respective employees, agents, representatives, and contractors. Customer also agrees to indemnify, defend, and hold harmless PSAV against all claims for copyright, patent, or other intellectual property infringement including claims for licenses and royalties, as a result of PSAV's use of any and all Customer-provided materials such as images, recordings, transmissions, videos, software, hardware, or any other form of intellectual property, etc., in connection with the Event.

15. **LIMITATION OF LIABILITY.** Under no circumstances will either party be liable to each other for any indirect, exemplary, reliance, special, or consequential damages (including, but not limited to, loss of revenues or profits, interest, use, or other consequential economic loss) howsoever caused, whether arising in contract, tort, or otherwise, and even if such damages are foreseeable to such party or such party has been advised of the possibility of such damages. EACH PARTY'S TOTAL LIABILITY IN THE AGGREGATE FOR ANY AND ALL CLAIMS ARISING OUT OF OR IN CONNECTION WITH AN EVENT QUOTATION AND THE EVENT ITSELF WITH RESPECT TO ANY EXPENSE, DAMAGE, LOSS, INJURY, OR LIABILITY OF ANY KIND (INCLUDING INDEMNIFICATION OBLIGATIONS) WILL BE LIMITED TO AND WILL NOT EXCEED AN AMOUNT THAT IS EQUIVALENT TO THE CHARGES TO BE PAID BY CUSTOMER IN RESPECT OF THE APPLICABLE EVENT.

16. **COOPERATION IN INVESTIGATIONS**. PSAV and Customer each agree to promptly notify the other of any incidents, physical injuries, property damage, claims, demands, losses, causes of action, general damages, and expenses that may arise during PSAV's performance of the services for Customer. PSAV and Customer further agree to work together on the investigation of any such matters unless its own legal counsel, any law enforcement, or any other authority otherwise instructs either party.

17. **INTELLECTUAL PROPERTY.** Customer allows PSAV to use the trademarks, trade names, service marks, and other intellectual property of Customer given by Customer to PSAV for the strict purposes of carrying out PSAV's duties under the Agreement and as otherwise requested by Customer. Further, Customer permits PSAV to include event photos and renderings of set designs and other elements of Customer's event(s) as PSAV may reasonably require in showing current or prospective customers examples of PSAV's work.

18. **NO OTHER WARRANTY**. EXCEPT AS EXPRESSLY SET FORTH IN THESE TERMS, THE EQUIPMENT, LABOR, AND SERVICES ARE PROVIDED BY PSAV ON AN "AS IS" AND "AS AVAILABLE" BASIS, AND PSAV DISCLAIMS ALL OTHER WARRANTIES, REPRESENTATIONS, OR CONDITIONS OF ANY KIND, WHETHER EXPRESS OR IMPLIED.

19. **FORCE MAJEURE.** In no event will either party be liable to the other or any third party for any delay or failure in performance under this Agreement due to governmental actions, applicable law, ordinances, or regulations; acts of God, hurricanes, earthquakes, other adverse weather conditions; war or terrorism; strikes or other labor disputes; third party failures; or other causes outside of a party's control. The affected party will give notice of the delay and its cause to the other party as soon as practicable following the commencement of such delay.

20. **LOSS DAMAGE WAIVER (LDW).** If LDW is quoted in the Event Order and is accepted by Customer, then PSAV will waive charges for loss or damage to PSAV-owned equipment provided that: (1) if any loss or damage occurs, Customer agrees it will be required to participate in any investigation by PSAV, facility security, insurers, or other authorities; and (2) if PSAV determines that the loss or damage was intentionally caused by Customer or its representatives, the LDW will not apply and Customer will be fully responsible for all such loss or damage.

21. **MISCELLANEOUS.** This Event Quote (including the Terms) will be governed and interpreted in accordance with the laws of the state in which the Event is located. These Terms and the Event Quote (as may be subsequently amended or supplemented as mutually-agreed) are the entire agreement between the parties and supersede any prior agreements, amendments, purchase orders, written communications of any kind, or other terms previously entered into by the parties for the same services, and may only be modified by written agreement signed between the parties. For the avoidance of doubt, handwritten changes to these Terms or an Event Quote are expressly rejected unless signed or initialed by both parties. The terms of any purchase order or other document issued by Customer will not bind PSAV unless otherwise expressly agreed to by PSAV in a signed writing. Customer agrees that the Event Quote and related documents may be digitally scanned and transmitted to Customer following signing by Customer, and that on acceptance by PSAV of such signed Event Quote in digital, facsimile, or other form, such signed Event Quote in PSAV's possession will be deemed for all purposes to be an executed original.

22. **ADDITIONAL TERMS AND CONDITIONS.** From time to time, PSAV may also include additional Event-specific terms in an updated Event Quote. When Customer requests additional services, Customer understands and agrees to any additional provisions contained within the updated Event Quote.

About Eventscase

Eventscase is the truly "all in one" software for all types of events. A tool designed from birth to make the work of events organizers much easier. When we tal about events, we mean any meeting of people. Not only large fairs and congresses but also internal meetings, press conferences or technical conferences, among many others. A visual, intuitive and self-managed solution for which no type of technical training is necessary

From a deep knowledge of the event organization sector, we solve the most demanding professionals requirements with a modular and scalable platform adapted to the event and not on the contrary. We achieve our goal through events sites and apps, on-line and on-site registration and one-to-one networking, among many other features. And all this is possible from a single virtual worksepace

Our clients are the owners of our platform, that's why we are a white label software, that is, once we launch the project, our brand disappears completely because it is your project and we understand like this. In addition, eventscase's own multicultural philosophy, with staff and partners from more than 10 nationalities with offices in Spain, UK, US, Saudi Arabia and Colombia, makes us firmly bet on multilanguage. An example of this is that our platform is already adapted to Arabic writing. Faithful to our commitment to the client, security is one of our main concerns. We comply with the General Data Protection Regulation (GDPR).

Our Story

The history of eventscase begins in September 2012, in London, when the founders gave birth to the first community of event professionals in the world. There are more than 30,000 corporate events a year in London that attract more than 100 million professionals. These data became an obsession for both. They knew that the market was still untapped, so they wanted to create an online platform where attendees, organizer, speakers, and sponsors could work together

It was not easy especially considering that the team shared a one bedroom flat in London.

The road to success was not always easy but working tirelessly managed to connect with a significant number of prominent members of the events industry. They launched an Alpha and Beta version of their community and the software developers managed to create an Artificial Intelligence that allowed attendees to find events base on their interests and networking groups. The platform was very useful for event organizers because it made possible to track the generated data in their events and, therefore, increase the benefits

The original idea of the community was successful but the needings of the events industry were growing, especially in relation to technology. This led them to monetize their solution and transform it into what it is now: an all-in-one events management software capable of generation work networks and a "white label" version that customers can use under their own brand. The technological investors in the UK detected the potential of the software and they did not take long to arrive, supporting from the beginning of the company until reaching a very favorable situation.

Today, eventscase is a fully developed and implemented software that helps small firms such as Southbank and China Investors Club and large corporations such as BBVA, Telefonica, Santander (UK), Danone and Johnson & Johnson, among others. Is already working in Europe, America, and Asia its portfolio is growing in all markets around the world.

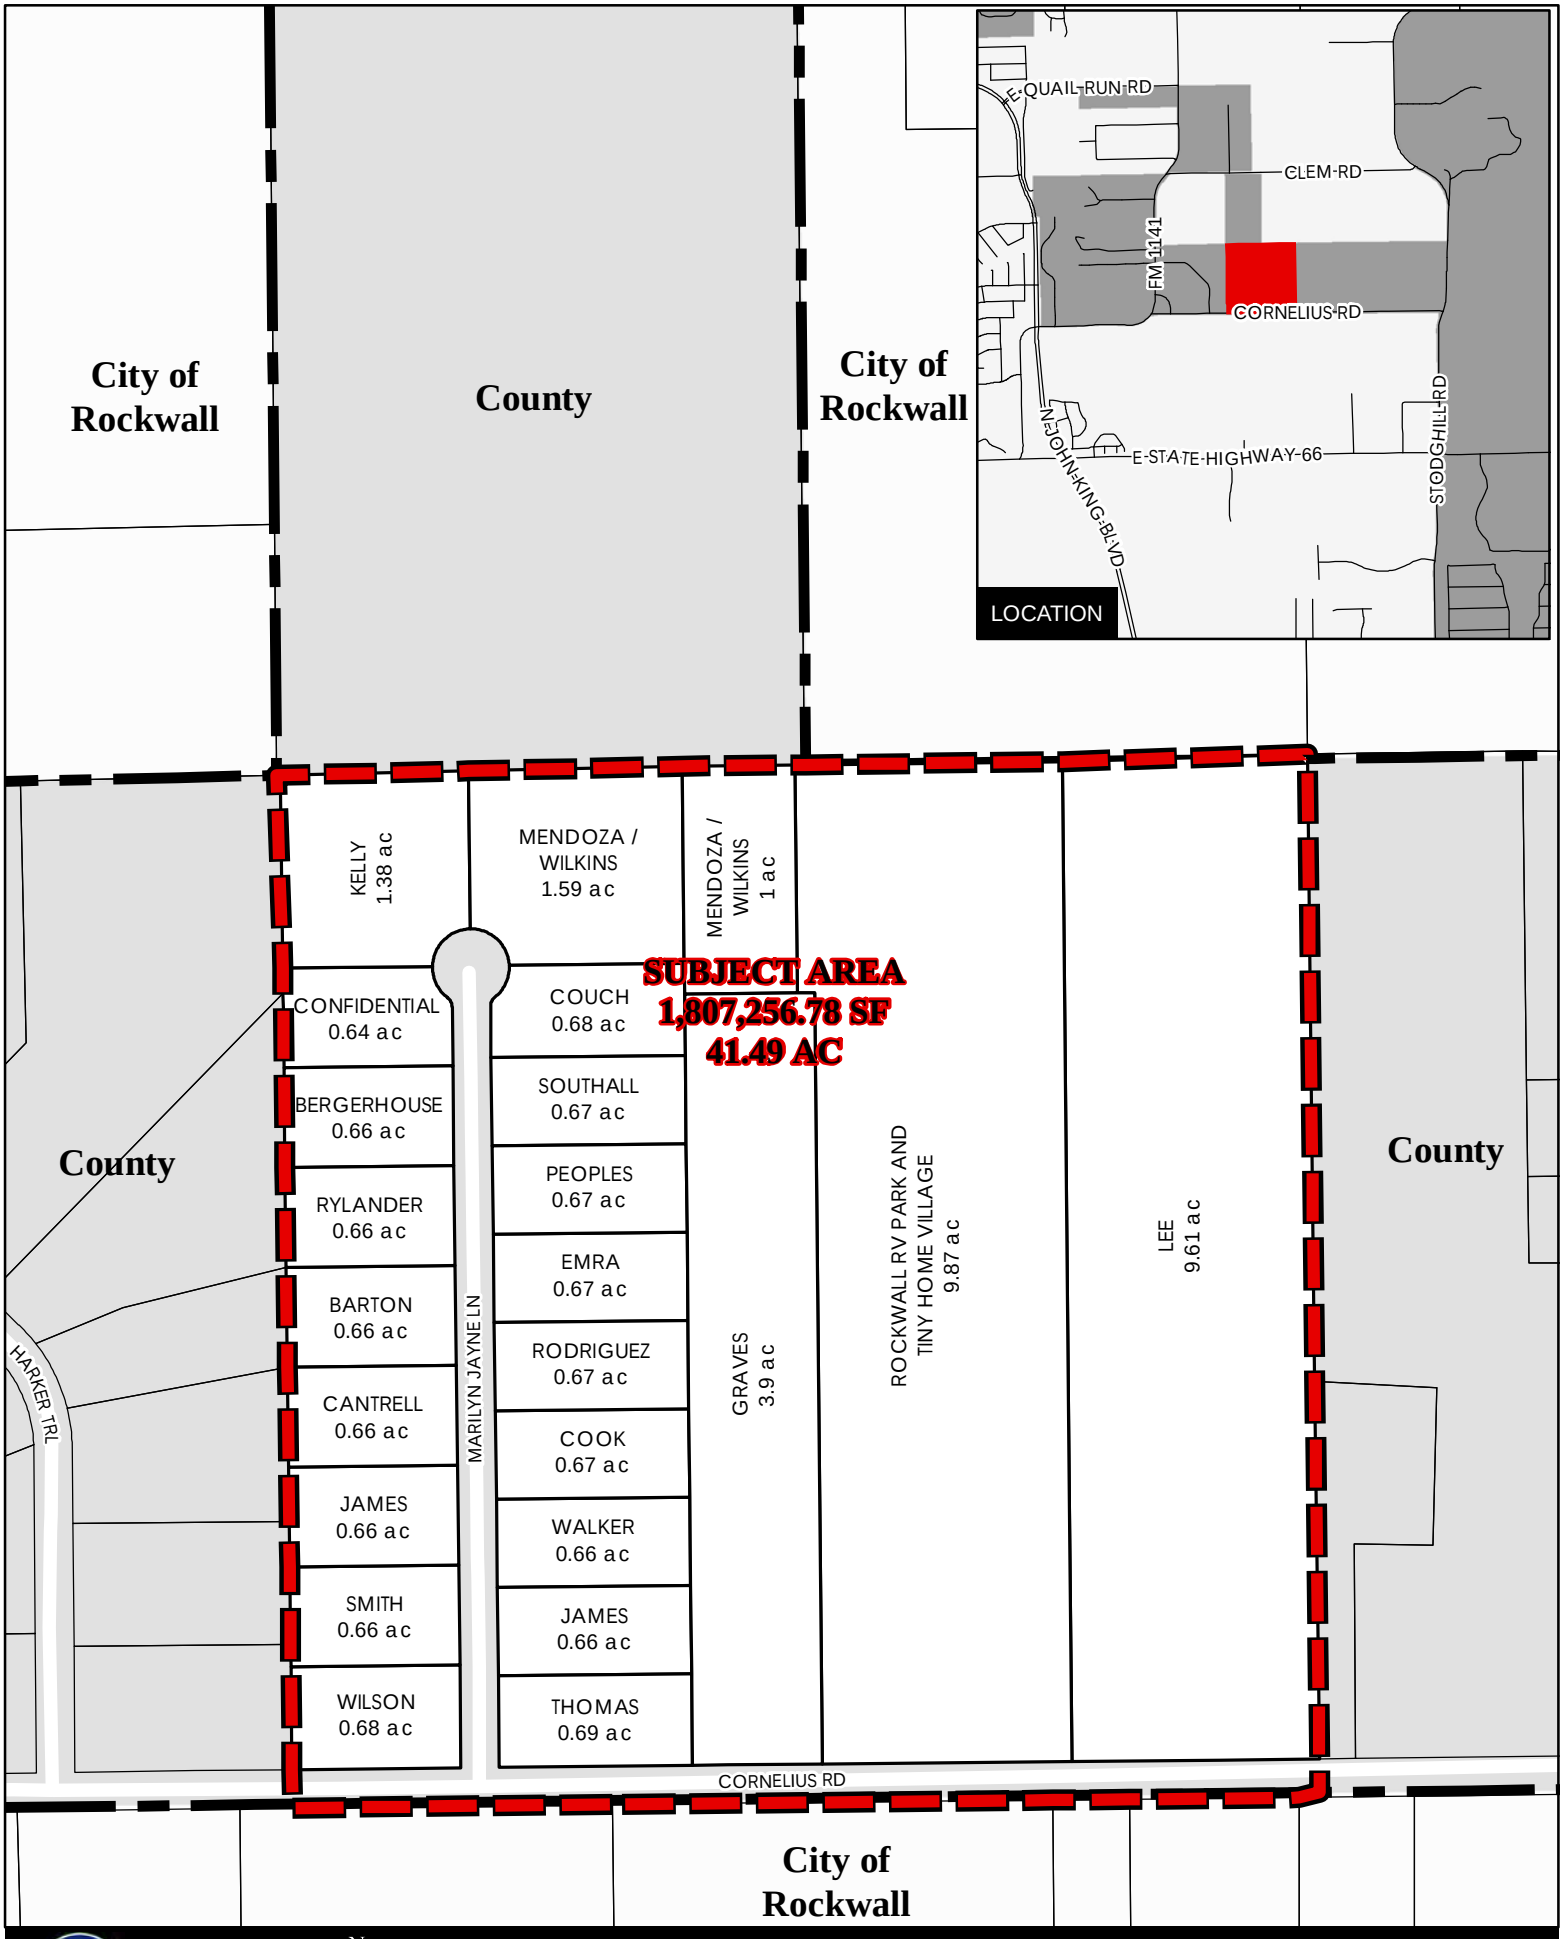
CITY OF ROCKWALL

PLANNING AND ZONING COMMISSION MEMORANDUM

PLANNING AND ZONING DEPARTMENT
385 S. GOLIAD STREET • ROCKWALL, TX 75087
PHONE: (972) 771-7745 • EMAIL: PLANNING@ROCKWALL.COM



TO:	Mayor and City Council
CC:	Rick Crowley, *City Manager* Mary Smith, *Assistant City Manager* Joey Boyd, *Assistant City Manager*
FROM:	Ryan Miller, *Director of Planning and Zoning*
DATE:	December 26, 2019
SUBJECT:	Request for Voluntary Annexation on Cornelius Road

On December 2, 2019, the City Council adopted *Resolution No. 19-27* directing staff to proceed with the annexation process for a ~41.49-acre tract of land adjacent to Cornelius Road (*see Exhibit A*). This direction came in response to a petition submitted on November 19, 2019 by Barbara Lee (*a resident in the ~41.49-acre tract of land*) indicating that a majority of the property owners in the annexation area supported annexation.

The next step in the annexation process will be for the City Council to hold a public hearing at the special City Council meeting on *December 26, 2019*. In preparation for this public hearing and based on the annexation requirements outlined in Subchapter C-4, *Annexation of Areas with Population of Less than 200 by Petition*, of Chapter 43, *Municipal Annexation*, of the Texas Local Government Code, City staff sent a letter to all properties within the annexation area notifying the property owners of the time and date of the public hearing. Staff also included a copy of the *Resolution No. 19-27* with the letter. This resolution outlines the City services that will be provided if the annexation effort is successful. Staff has included a copy of the letter that was sent out on December 4, 2019 in the attached packet for the City Council's review. Once this public hearing is complete the following steps will need to be completed:

- *January 2, 2020*: 31-days after the resolution is adopted the municipality may start to collect signatures for the annexation petition from property owners within the annexation area.
- *May 30, 2020*: 180-days after the resolution is adopted the window for the municipality to collect signatures from property owners within the annexation area ends. If the City obtains the number of signatures on the petition required to annex the area, the City may annex the area after notifying the residents and property owners of the results of the petition.
- *June 1, 2020*: The City Council will be required to hold a public hearing and the first reading of the annexation ordinance.
- *June 15, 2020*: The City Council will be required to hold a second public hearing and the second reading of the annexation ordinance.

Staff should note that *no action* is required by the City Council at the *December 26, 2019* public hearing. Staff will be available at this public hearing to answer any questions.

CORNELIUS RD POTENTIAL VOLUNTARY ANNEXATION

City of Rockwall
The New Horizon

December 4, 2019

TO: James and Barbara Lee
668 Cornelius Road
Rockwall, TX 75087

FROM: Ryan Miller, AICP, *Director of Planning and Zoning*
City of Rockwall
385 S. Goliad Street
Rockwall, TX 75087

SUBJECT: Annexation of a ~41.49-Acre Tract of Land Identified as Lots 1-19, Maytona Ranch Estates Addition and Tracts 22-01, 22-02, 22-6 & 22-07 of the W. M. Dalton Survey Abstract No. 72, Rockwall County, Texas

To Whom It May Concern:

The purpose of this letter is to notify you that in response to the City receiving a preliminary petition for voluntary annexation, the City Council of the City of Rockwall, Texas adopted *Resolution No. 19-27* on December 2, 2019 stating an intent to annex a ~41.49-acre tract of land, which is depicted in the attached map. According to the Rockwall Central Appraisal District (RCAD) you own one or more of the properties located inside the proposed annexation area. According to state law, the City is required to notify you of [*1*] the process for annexation, [*2*] provide you notice of the first public hearing, and [*3*] provide you a list/schedule of City services that will be provided by the City on or after annexation. For your reference, I have included a copy of *Resolution No. 19-27*, which contains a list/schedule of City services that will be provided if a petition for annexation is successful. The City of Rockwall will hold an initial *public hearing at 6:00 PM on December 26, 2019 in the City Council Chambers at City Hall, which is located at 385 S. Goliad Street, Rockwall, Texas*. Should you not be able to attend this public hearing, two (2) subsequent public hearings will be scheduled after the petition period in accordance with state law.

State law requires all municipalities proposing to annex an area with a population of less than 200 people be subject to the annexation petition requirements of Subchapter C-4, *Annexation of Areas with Population of Less than 200 by Petition*, of Chapter 43, *Municipal Annexation*, of the Texas Local Government Code. Based on this law, in order to annex the area located within the ~41.49-acre tract of land, the City will need to obtain a petition signed by more than 50% of the owners of land in the area. The period that the petition maybe signed will start on *January 2, 2020* and run until *May 30, 2020*, or until the City has obtained the required consent from 50% of the owners of land in the area. If the City is able to secure the necessary consent, the City will be required to [*1*] provide notice of the results of the petition, and [*2*] hold two (2) public hearings a minimum of ten (10) days apart prior to adopting an ordinance annexing the area. For reference staff has included a copy of Subchapter C-4 of Chapter 43 of the Texas Local Government Code attached to this letter.

If you have questions concerning this letter, the potential annexation, the petition, or City services please feel to contact me at your convenience by phone at (972) 772-6441 or by email at rmiller@rockwall.com.

Sincerely,

Ryan Miller, AICP
Director of Planning and Zoning
City of Rockwall, Texas

CITY OF ROCKWALL

RESOLUTION NO. 19-27

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, STATING AN INTENT TO ANNEX A ~41.49-ACRE TRACT OF LAND, WHICH IS MORE SPECIFCIALLY DESCRIBED IN *EXHIBIT 'A'* OF THIS RESOLUTION AND WHICH IS AN AREA THAT IS ADJACENT TO AND ADJOINS THE PRESENT BOUNDARY LIMITS OF THE CITY OF ROCKWALL, TEXAS; AUTHORIZING AND DIRECTING CITY STAFF TO NOTIFY THE EFFECTED PROPERTY OWNERS; AND PROVIDING FOR A DESCRIPTION OF THE SERVICES THAT WILL BE PROVIDED TO THE AREA UPON ANNEXATION.

WHEREAS, in accordance with the requirements of Subchapter C-4, *Annexation of Areas with Population of less than 200 by Petition*, of Chapter 43, *Municipal Annexation*, of the Texas Local Government Code the City of Rockwall is adopting this *Resolution* to state an intention to commence annexation proceedings to annex a ~41.49-acre tract of land identified as Lots 1-19, Maytona Ranch Estates Addition and Tracts 22-01, 22-02, 22-6 & 22-07 of the W. M. Dalton Survey, Abstract No. 72, Rockwall County, Texas -- *which herein after shall be referred to as the "Annexation Area"* --, generally located on the north side of Cornelius Road west of the intersection of Cornelius Road and Stodghill Road [*FM-3549*], and depicted and described in *Exhibit 'A'* of this *Resolution*; and

WHEREAS, the City Rockwall has received a petition from the majority of the property owners within the *Annexation Area* requesting the area be annexed by the City of Rockwall; and

WHEREAS, the City Council of the City of Rockwall finds that the annexation of the *Annexation Area* is in the best interests of the property owners within the *Annexation Area* and of the residents of the City of Rockwall; and

WHEREAS, the City Council of the City of Rockwall finds that -- *since the petition was not signed by all property owners in the Annexation Area* -- the *Annexation Area* is subject to the newly adopted annexation requirements outlined in Subchapter C-4, *Annexation of Areas with Population of less than 200 by Petition*, of Chapter 43, *Municipal Annexation*, of the Texas Local Government Code; and

WHEREAS, the *Annexation Area* is found to be situated within the City of Rockwall's Extraterritorial Jurisdiction (ETJ), and is adjacent to and adjoining the present boundaries of the City of Rockwall;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS THAT:

SECTION 1. RECITALS. The above recitals are found to be true and correct and they are incorporated as findings of the City Council for all purposes.

SECTION 2. INTENT. The City of Rockwall intends to annex the *Annexation Area* being a ~41.49-acre tract of land identified as Lots 1-19, Maytona Ranch Estates Addition and Tracts 22-01, 22-02, 22-6 & 22-07 of the W. M. Dalton Survey, Abstract No. 72, Rockwall County, Texas.

SECTION 3. ANNEXATION AREA. The *Annexation Area* is more specifically depicted and described in *Exhibit 'A'* of this resolution.

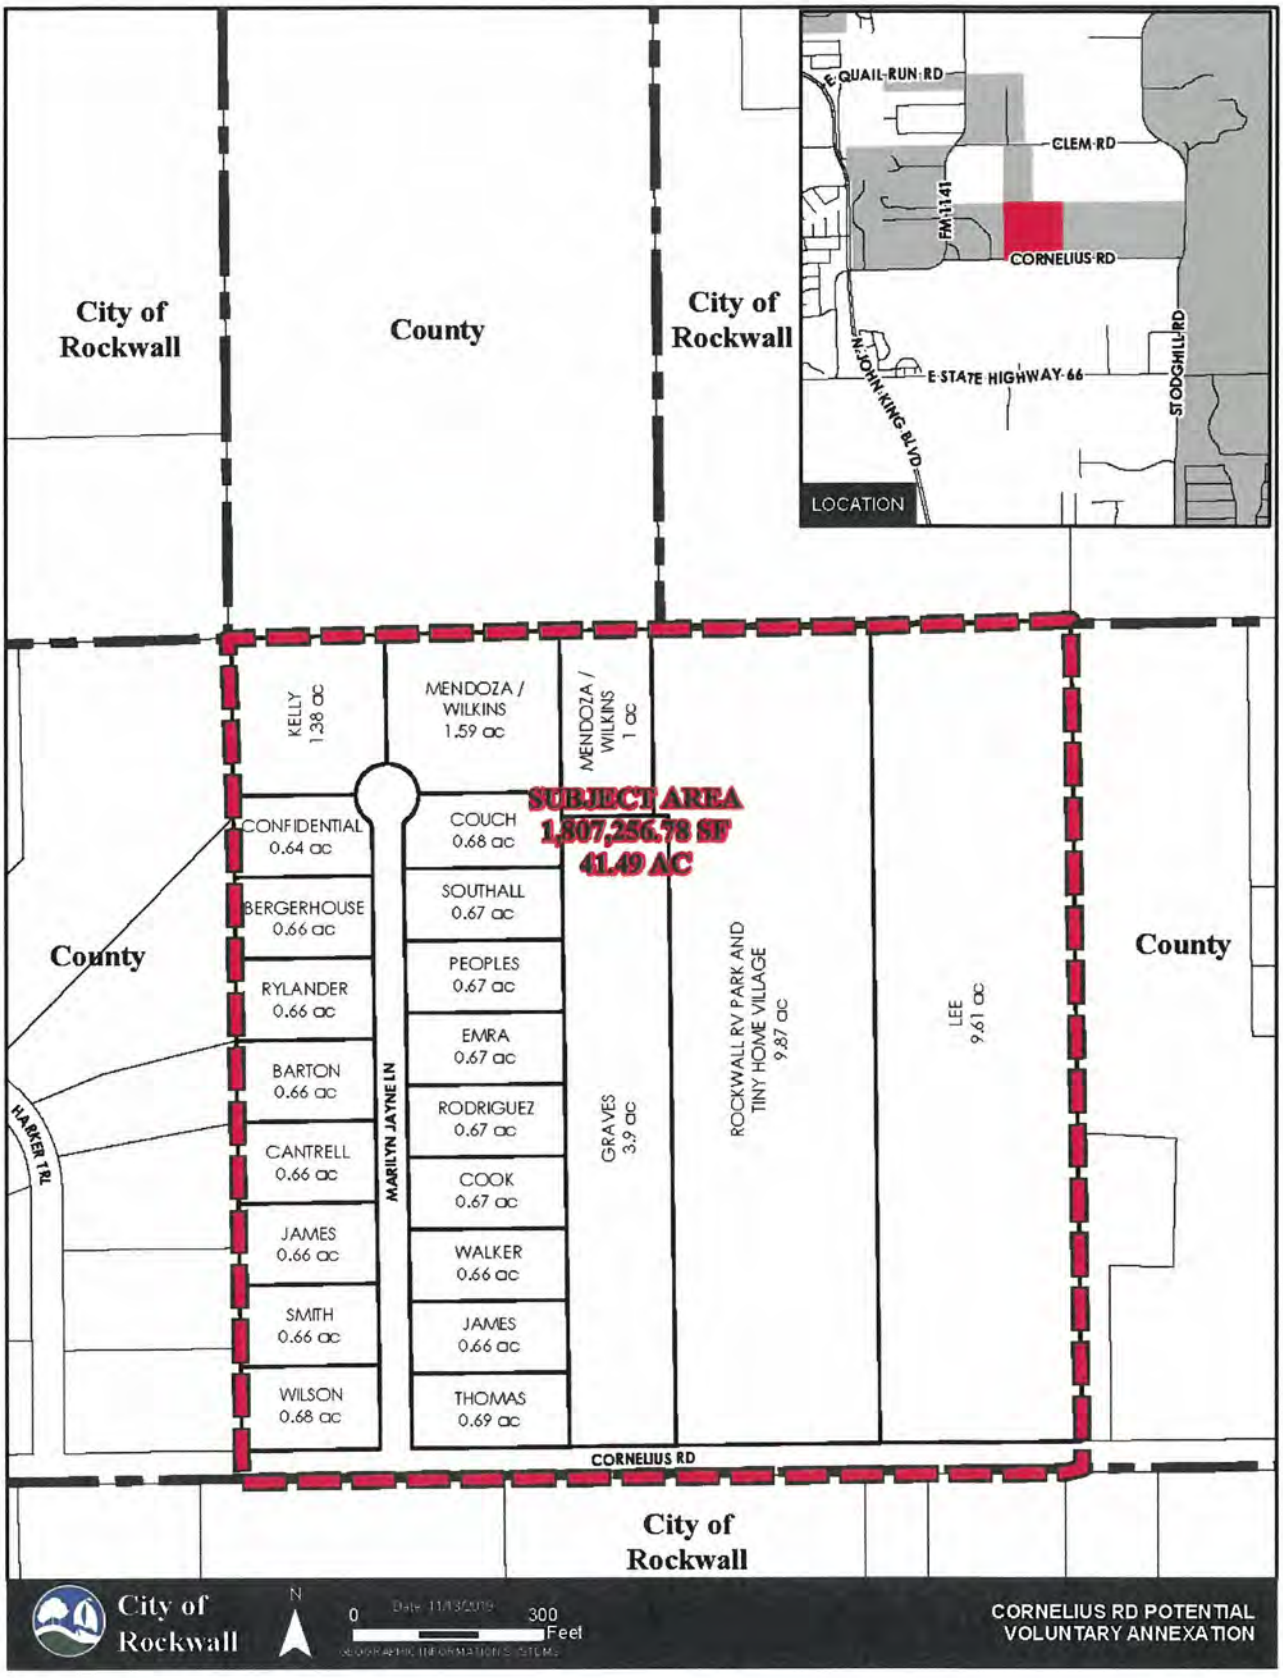
SECTION 4. NOTIFICATION. The Director of Planning and Zoning is hereby directed to provide notice to all property owners within the *Annexation Area* within seven (7) days of the adoption of this resolution. Said notices shall include:

(1) Notice of the public hearing required by V.T.C.A., Local Government Code §43.0684.
(2) An explanation of the 180-day petition period described by V.T.C.A., Local Government Code §43.0685.
(3) A signed copy of this resolution with contains description, list, and schedule of services to be provided by the municipality in the area on or after annexation as provided by V.T.C.A., Local Government Code §43.0682.

SECTION 5. SERVICES. A description of the services that will be provided by the City of Rockwall upon annexation is outlined in Exhibit 'B' of this resolution.

SECTION 6. EFFECTIVE DATE. This Resolution shall be effective immediately following its passage and approval by the City Council.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, ON THIS THE 2ND DAY OF DECEMBER, 2019.



APPROVED:

Jim Pruitt, Mayor

Municipal Services. Municipal services to the acreage described above shall be furnished by or on behalf of the City of Rockwall, Texas, at the following levels and in accordance with the following schedule:

(A) *Police Services.*

(1) Patrolling, responses to calls, and other routine police services, within the limits of existing personnel and equipment, will be provided within 60-days of the effective date of annexation.
(2) As development and construction commence within this area, sufficient police personnel and equipment will be provided to continue to furnish this area the level of police services consistent with police services available in other parts of the City with land uses and population densities similar to those projected in the annexed area.

(B) *Fire Services.*

(1) Fire protection by the present personnel and the present equipment of the Fire Department, within the limitations of available water and distances from existing fire stations, will be provided to this area within 60-days of the effective date of annexation.
(2) As development and construction commences within this area, sufficient fire personnel and equipment will be provided to continue to furnish this area the level of fire services consistent with fire service available in other parts of the City with land uses and population densities similar to those projected in the annexed area.

(C) *Health and Code Compliance Services.*

(1) Enforcement of the City's health ordinances and regulations including, but not limited to, weed and brush ordinances, junked and abandoned vehicle ordinances, food handlers ordinances and animal control ordinances, shall be provided within this area on the effective date of the annexation ordinance. These ordinances and regulations will be enforced through the use of existing personnel. Complaints of ordinance or regulation violations within this area will be responded and investigated by existing personnel beginning with the effective date of the annexation ordinance.
(2) The City's building, plumbing, electrical, gas heating, air conditioning and all other construction codes will be enforced within this area beginning with the effective date of the annexation ordinance. Existing personnel will be used to provide these services.
(3) The City's zoning, subdivision, and other ordinances shall be enforced in this area beginning on the effective date of the annexation ordinance.
(4) All inspection services furnished by the City of Rockwall, but not mentioned above, will be provided to this area beginning on the effective date of the annexation ordinance. Any property owner or his/her assigns who in good faith has a new building or structure, as defined in the Comprehensive Zoning Ordinance, under construction on the effective date of annexation shall be exempted from these inspections for that building or structure under construction for a period of one year from the effective date of annexation. For the purpose of this ordinance "under construction" shall mean any work that requires a building permit from the City of Rockwall.
(5) As development and construction commence within this area, sufficient personnel will be provided to continue to furnish this area the same level of Health and Code compliance services as are furnished throughout the City.

(D) *Planning and Zoning Services*

(1) The planning and zoning jurisdiction of the City will extend to this area on the effective date of the annexation ordinance. City planning will thereafter encompass this property, and it shall be entitled to consideration for zoning in accordance with the City's Comprehensive Plan, Unified Development Code (UDC) [*i.e. Zoning Ordinance*], and Municipal Code of Ordinances.

(E) *Recreation and Leisure Services*

(1) Residents of this property may utilize all existing recreational and leisure services facilities and sites throughout the City beginning with the effective date of the annexation ordinance.
(2) Existing parks, playgrounds, swimming pools and other recreation and leisure facilities within this property shall, upon dedication to and acceptance by the City, be maintained and operated by the City of Rockwall.

(F) *Solid Waste Collection*

(1) Solid waste collection shall be provided to the property owner in accordance with existing City policies as to frequency and charges, beginning on the effective date of annexation except for properties that are served by a privately-owned solid waste management service provider. Such properties will be allowed to continue private service for a period of two (2) years from the effective date of annexation at which time the property will be required to begin service with a franchised solid waste contractor within the City of Rockwall.

(G) *Streets*

(1) The City of Rockwall's existing policies with regard to streets, roads and street/roadway lighting maintenance, applicable throughout the entire City, shall apply to this property beginning immediately as of the effective date of the annexation ordinance.
(2) As development, improvements or construction of streets to the City standards commence within this property, the policies of the City of Rockwall with regard to impact fees and participation in the cost thereof, acceptance upon completion, and maintenance after completion, shall apply.
(3) The same level of maintenance shall be provided to public streets and roadways within this property that have been accepted by the City of Rockwall as is provided to like City streets and roadways throughout the City.

(H) *Water Services*

(1) Connection to existing City water mains for water services for domestic, commercial and industrial use within this property will be provided in accordance with existing City policies. Upon connection to existing mains, water will be provided at rates established by City ordinance for such services throughout the City.
(2) Water mains of the City will be extended in accordance with provisions of the Municipal Code of Ordinances and other applicable ordinances and regulations. City participation in the costs of these extensions shall be in accordance with applicable City ordinances and regulations and will be provided as otherwise available in other parts of the City with topography, land uses, population densities similar to those

reasonably contemplated or projected in the annexed area.

(3) Water mains which are within the annexed area and are owned and operated by the City shall be maintained beginning with the effective date of the annexation ordinance or upon acquisition by the City.

(4) Private water lines within this property shall be maintained by their owners, in accordance with existing policies applicable throughout the City.

(I) *Sanitary Sewer Services*

(1) Connections to existing City sanitary sewer mains for sanitary sewage service in this area will be provided in accordance with the existing City policies. Upon connection, sanitary sewage service will be provided at rates established by City ordinances for such services throughout the City.

(2) Sanitary sewer mains and/or lift stations which are within the annexed area and are connected to City mains shall be maintained by the City of Rockwall beginning with the effective date of the annexation ordinance or upon acquisition by the City.

(3) Sanitary sewer mains of the City will be extended in accordance with the provisions of the Municipal Code of Ordinances and engineering standards and other applicable ordinances and regulations. City participation in the costs of these extensions shall be in accordance with applicable City ordinances and regulations and will be provided as otherwise availably in other parts of the City with topography, land uses, and population densities similar to those reasonably contemplated or projected in the area.

(4) Previously granted exceptions to the requirements of connections to the City's sanitary sewer treatment system or Off-Site Sanitary Sewer Facilities (OSSF) constructed prior to annexation shall be continued until such alternate systems are determined to no longer function to meet the sanitary sewer needs of the subdivision granted the exception or for systems installed prior to annexation.

(J) *Public Utilities.*

(1) Other public utilities will be provided by the City's franchisee or a provider holding a Certificate of Convenience and Necessity (CCN) issued by the state to serve that area.

(K) *Miscellaneous.*

(1) General municipal administration services of the City shall be available to the annexed area beginning with the effective date of the annexation ordinance.
